M. Veniukoff, a member of the Russian Geographical Society, in the early part of last year, discovered a manuscript narrative by an unknown German traveller, which had hitherto lain in the topographical bureau of the Minister of War, unnoticed, giving a full and interesting account of an exploring tour made in 1806 over this very district. This traveller had, it seems, traversed the whole of northern Cashmere, as far as Kashgar; had passed down the Bolor River; and visited Badakshan, Wokhan, Khokhan, and other places of Chinese Turkistan. M. Veniukoff has compared this manuscript with a Chinese itinerary recently obtained and translated by Klaproth, and from the two has been able to deduce with great accuracy the position of the mountain lakes of Kari-kol, Sarik-kol, and Rian-kol; has traced the course of the Bolor, Douvand and Sharood rivers; has identified the last as the source of the Amoo-Daria, and has attained to a tolerably accurate knowledge of the mountains and plateau of Pamir.

Another Russian geographer, M. Golubeff, returned during the year 1861 from Soongaria, and the eastern portion of the Chinese empire, and has contributed to the transactions of the Russian Geographical Society a map of that

region, embracing the results of his own and of other travellers' investigations, and of the Chinese itineraries. This map covers a region extending over 5° of latitude and 6° of longitude, and, with the map of M. Veniukoff, gives a far better idea of Central Asia than has heretofore been attainable. The barbarous nomadic tribes which inhabit this region murder almost every European who comes among them, and seem incapable of civilization. It was in the attempt to penetrate into their country that the intrepid Schlagentweit lost his life.

But it is not in Turkistan alone that Russia has been extending her power and making her explorations. Officers of the staff of the commander-in-chief of the Russian army, accompanied by a mixed scientific commission of French and Russians, have been exploring the entire route of the Amoor, the largest river of the eastern continent, and have commenced a survey of the island of Saghalien, where they have found a tribe called the Ainos, whose origin seems to be involved in great obscurity. The Russian admiralty, meanwhile, have been making hydrographic surveys of the mouths of the Amoor, the strait of Nevelsky, and the shores of the newly-acquired Russian possessions bordering on the sea of Japan, from the gulf of Peter the Great to the bays of Saint Vladimir and Saint Olga. Unfortunately, they have bestowed Russian names on the principal points, not being aware that the French and English fleets had previously visited and named them, thus embarrassing the geographical descriptions of the region, by duplicate names of the same places.

During the year, the British Minister to Japan, Sir Rutherford Alcock, visited the isle of Napoleon and ascended Fusi-Yama, the sacred mountain of the Japanese. Count Escayrac de Lauture, a French geographer, at the peril of his life, visited and explored most of the provinces of China, and in 1861 published an atlas of them, far more full and complete than any previously published. The officers of the English navy in the Chinese waters, during the year, have made exact and careful surveys of the dangerous coasts of the China sea, and, under the direction of the admiralty, have commenced the exploration of the gulf of Pe-chee-lee and of the rivers Pei-ho, Si-kiang, and Yang-tse-kiang. On the last-named river they have penetrated as far as Han-kow, one of the two interior ports opened to trade by the treaty of Tien-tsin, about 1,000 miles from the sea. A scientific expedition, under the charge of Captain Blakiston, started from this point to ascend the river, and by this route to explore western China, and penetrate through Thibet to India. The expedition reached Pings-han, a small city of Se-chuen province, near the Thibetan frontier; but owing to the ferocity of the rebels, who were in full force in that vicinity, were compelled to retrace their steps, and returned to the coast within five months from the time of their departure. The expedition

was not, however, entirely fruitless. They ascertained that above I-chang, 1,100 miles from Shanghai, the navigation of the river was obstructed by numerous rapids and cataracts, and traversed for a considerable distance a narrow gorge, where immense rocky walls rose on each side. At Hu-nan and around the lake Tong-Ting they found a grain district of great fertility, which supplied Han-kow with cereals. At Pings-han, the river took the name of Kinchakiang, or river of gold, but the boatmen call it the river of Yunnan. West of Pings-han were an independent tribe called Maouttes, a race bearing no resemblance to the Chinese, but having an open, honest demeanor.

Another English explorer, Major Thuillier, has during the year continued his survey of the Karakorum or Kuen-Lun chain of mountains to the northeast of the valley of Cashmere, and has discovered a mountain summit, to which he gives the name of the chain Karakorum Peak, which, according to his measurement, is 28,278 feet high, being surpassed in altitude only by Mt. Everest in the Himalaya. This survey of the Kuen-Lun Mountains forms a portion of the triangulation of Upper India, now in its seventeenth year of successful prosecution, under the orders of the British Government. Under the directions of Colonels Waugh, Lambton, and Everest, aided by the enthusiastic labors of Major Thuillier, Capt. Montgomerie, and others, 316,000 square miles have been triangulated, and the survey of 94,000 miles completed.

The English resident in the kingdom of Cashmere, Lord William Hay, has after repeated efforts succeeded in obtaining the journal and papers of the lamented Adolphe Schlagentweit, and has forwarded them, through the foreign office, to his brothers in Germany. They bring down the narrative of his discoveries to a period within a few days of his death, and will be published in the magnificent history of discoveries in Higher Asia, now in course of publication by his brothers, of which two volumes have already appeared.

In Farther India, Sir Robert Schomburgk, the botanist, has, in company with two nephews of the king of Siam, explored the greater part of the peninsula of Siam, ascending the Meinam River from Bangkok to Rahaing, the most southern city of Laos, a voyage occupying three weeks; thence transported by elephants to Lahing, a fortified city of Laos, eleven days distant; thence through a terribly wild and mountainous region, where it was necessary for much of the distance to make the road over which they travelled to Lampon, three days farther; on the fourth day they entered a very fertile and beautiful country, in which they found the large city of Xieng-Mai, three miles in extent, the most important city of Laos, and having a large trade with Maulmain in teak wood, sending annually by raft down the Salwen more than two millions of dollars' worth of this valuable timber. After resting here some days he started with an escort of 150 men and 38

elephants, for Maulmain, which he reached after a journey of twenty-four days, traversing on his route vast forests along the Tenasserim River.

The French, who have had for many years some small possessions on the coast of Anam, have recently extended their conquests there, by capturing, after a somewhat severe action, Saigon, a fortified town on a delta of the Cambodia River, which they have now made their principal station in Southeast Asia; and in connection with it have made a careful topographical survey of the whole delta.

Returning to Western Asia, we find that Russian officers, attached to the scientific mission of the Caspian Sea, have made surveys of considerable extent in Persia, and have ascertained by astronomical measurement, the height of the volcanic peak of Demavend. Their measurement, made from two points, gives a height of 20,085 feet above the Caspian Sea, or an absolute height of about 20,000 above the sea level; but Capt. Nicolas, who ascended it in 1860, found an altitude of 21,567 feet.

Capt. Claude Clarke has visited Eastern Persia, passing from Meshed to Herat, a route seldom traversed by Europeans, and which led through the desert of Khorassan, of which he has published an interesting account.

The occupation of Syria by French troops, for the suppression of the insurrection there, led to several tours of exploration, in the regions of the Libanus and anti-Libanus chains, which, however, proved more archaeological than geographical. Baron Henri Aucepitaïne, a member of the staff of General de Beaufort, visited and explored the elevated plain of the Hauran; and M. Ernest Renan, the ancient city of Byblas, and others of the ruined towns of Phœnicia.

The most remarkable discovery in this region is unquestionably that of Cyril C. Graham, Esq., an English archaeologist, who visited Damascus in the early part of 1861, and obtaining an Arab escort, penetrated into the hitherto unknown region east of the Hauran, and found it a treeless volcanic district, covered to a considerable extent with lava, and traversed from north to south by a chain of hills forty miles in length. Passing around these to the south he found a continuation of the same lava-covered plain, but with stones, at first of basalt, containing inscriptions, which he believed to be set up to mark the distance. Proceeding farther, he found the ruins of four towns, built of a white stone, apparently brought from a distance, as nothing like it was found in the plain. These stones were of great size, and contained no inscriptions; but many curious and rude sculptures were lying about. Still farther east, he found numerous small areas of 300 or 400 yards in circumference, enclosed with stone, and every stone having upon it rude representations of camels, gazelles, apes, horses, and horsemen, and each accompanied by inscriptions which seemed to be in the most ancient Phœnician character. There were also many small batons

of red stone or compact pottery, inscribed with similar characters.

Africa, always the unsolved problem of geographers, has not yet yielded up its secrets, though some progress has been made. M. Henri Duveyrier, a French explorer, set out at the close of 1860, to explore the central portion of the Great Sahara Desert, from Rhadames to Rhaat, and thence to Insalah, accompanied by Ikhenonkhen, one of the chiefs of the Azjer Tuaricks; he penetrated as far as Rhaat, but owing to the fanaticism of the inhabitants, was not allowed to enter the town, and was compelled to return to Tripoli by way of Fezzan, the Tuarick chief accompanying him to Moor-zook. Thus repulsed, he has determined to take a route further west, in the hope of penetrating to Soudan.

M. le Colonieu, who attempted to reach the oasis of Touat from Algeria, was not more successful. The Tuaricks, fearful that the success of such an expedition would diminish their trade with Touat, impressed the inhabitants of that oasis with the belief that the French were coming to conquer them as they had done Algeria, and the gates of their principal town were shut against the caravan. Thus repulsed, he turned aside to the oasis of Onguerout, situated west of Touat, but poorer and of less importance, and thence returned to Algeria.

Colonel Faidherbe, the former governor of the French colony at the mouth of the Senegal River, having been recalled from thence, sent before his departure a highly educated negro of St. Louis, (the capital of the French colony,) named Si-bou Moghdad, who was familiar with Arabic and the Koran, on a pilgrimage to Mecca; intending at first that he should follow the route by Insalah and Rhaat, but finding that impossible, he passed through the western frontier of the desert, visiting the Trarzas and the wady Noun on the southern borders of Morocco, and after spending a little time there returned to St. Louis, from whence he will again attempt to cross the continent by a more southern route.

Lieut. A. Lambert, of the French marines, has ascended the Senegal to its sources, explored Teemboo and the head-waters of the Falema, Gambia, and Rio Grande, ascertained that the Fouta Jallon range of mountains rises above the snow line, and has given more full information in regard to the manners and customs of the Foulahs than has previously been obtained.

A French expedition has been occupied during the past year, with the survey of the great estuary of the Gaboon and the rivers Como, Boghoé and Rhamboé, and the creeks Assango, Bongia, and Shimbia, which discharge their waters into it. The discoveries they have made in this region are important.

The publication of the narrative of M. Paul B. Du Chaillu, of his explorations from 1856 to 1859, in the region about the head-waters of the Gaboon, has excited much attention and provoked some unfavorable criticism. It is,

however, generally conceded that his narrative is in the main a faithful one, and that his discoveries have added materially to our knowledge of the ethnology and natural history of that hitherto unexplored region.

South Africa, or rather that portion of it north of the country of the Bechuanas, has been explored to some extent the past year by Messrs. Green and Baldwin, and the Chevalier de Pradt. The Swedish traveller, Charles Andersson, has given to the public a further chapter of his discoveries on the banks of the Okavango River. He found a fertile country and a navigable river, and a people given to agricultural pursuits, but the climate, except in the months of June, July, and August, was extremely insalubrious to Europeans.

Dr. Baikie, who had been, since 1839, attempting to explore the course of the Upper Niger with his small screw steamer, has returned to England. His steamer was wrecked at Rabbah, and he was detained there more than a year, and defeated in his main object; but he and Lieut. Gower have been able to make an accurate and minute map of the lower course of the river, and also of the Yoruba region, concerning which they gathered many interesting and important facts.

In Eastern and Northeastern Africa, the course of discovery has not been very successful. Dr. Livingstone has ascended the Rovuma for 30 miles. He found it a new and important river, but, like most of those of Eastern Africa, rendered difficult of navigation by its sand bars and its rapids. He believes it to be the outlet of the Nyassa.

The death of Dr. Roscher, murdered by the natives in March, 1860, at Kisunguni, after having reached Lake Nyassa on the eastern side, did not deter his countryman, the Baron de Decken, from attempting to go over the same route. He left Quiloa on the 9th October, 1860, accompanied by 20 Beloochee soldiers and a train of 50 porters, servants, and interpreters, and proceeded along near the 9th degree of south latitude to Mesuela, a distance of about 150 miles from the coast; but here the villany of his attendants and the treachery of his guide compelled his return without accomplishing his purpose of penetrating to Lake Tanganyika. He found the country very populous and fertile; sugar-cane, rice, beans, peas, potatoes, cotton, and bananas were the common productions. The principal tribes were the M'gendos and M'gaus, both slaveholding tribes, but they treated their slaves with remarkable kindness.

The expeditions for the discovery of the sources of the Nile have proved remarkably unfortunate; M. G. Lejean, after advancing as far as Gondokoro, has been compelled by sickness and the wars among the natives to return; Dr. Peney advanced 75 miles beyond Gondokoro, lat. 3° 40' N., but was attacked with marsh fever on the 24th July and died on the 26th. M. Miani has returned from his tour in the same region, unable to accomplish any

thing. Captains Speke and Grant attempted to reach the sources of the Nile from the eastern coast by way of Lake Nyanza; on the 12th of December they had reached the Koko, a village west of Ugogo, and were hoping to reach the lake without encountering further obstacles, but have not yet been heard from. Mr. Petherick, English consul at Khartoum, had also started later in the year southward in the hope of meeting them, but his success is yet unknown.

A German expedition, amply supplied with all the means of successful explorations, set forward in the early summer to explore the region northeast of Abyssinia, and had reached on the 12th of July, Enkullo, a missionary station to the west of Massouah.

The mountain of Kilamandjaro, in Eastern Africa, whose elevation above the snow line, Dr. Krapf so stoutly insisted upon in 1857, has been measured the past year, and the missionary's statement fully verified.

In Australia, the geographical explorers have met with some misfortunes. An expedition, amply supplied with the means of successful exploration, and consisting of eminent naturalists, under the command of Mr. O'Hara Burke, reached Cooper Creek in the Colony of Victoria, on the 11th November; and on the 16th December, Capt. Burke, with three companions, six camels, one horse, and provisions for three months, started for Sturt's Eyre Creek on the gulf of Carpentaria, leaving the rest of the party at Cooper's Creek to await his return. They waited for him till April 21, 1861, when from want of provisions and the hostility of the natives, they were compelled to retreat, and in their return many of them perished, and the survivors endured terrible sufferings. Burke and his companions have not been heard from, though new expeditions have been sent out in search of them, and a steamer sent to the gulf of Carpentaria to watch for them.

The Queensland colony sent out an expedition, under the direction of Messrs. Smith and Dalrymple, to explore the northeast coast and the river Burdekin, which they accomplished, and made the acquaintance of the natives; but found them possessing such strong inclinations to cannibalism, that they were not disposed to cultivate any further intimacy.

In New Zealand, M. Julius Haast has been charged by the colonial government with the geological exploration of the mountainous district. He reports the existence of a magnificent chain of mountains from 11,000 to 13,000 feet in height, and resembling in their general character and their glacier system, the Alps. He found an abundance of excellent coal on the Grey River.

The Fi-ji Islands have been ceded to England, and the Solomon Islands explored with a view to their colonization.

On the American continent, M. Guinnard, a French explorer, taken captive by the Patagonians, and detained as a prisoner by them, has

published a narrative of his experiences, containing much information respecting that inhospitable region. The Emperor of Brazil has sent expeditions into the unknown interior of his empire and among the sources of the southern affluents of the Amazon. A new exploration of the isthmus of Darien, to settle finally the question of the practicability of the construction of a canal, has been made by a French and English company.

Capt. Burton and M. Jules Remy have been visiting and examining the Salt Lake and Carson valley region, and both have published the results of their observations.

The Canadian Government sent a scientific corps to Labrador to ascertain the feasibility of colonization there. They ascended the river Moise, as far as it was navigable for a canoe, and thence proceeded by land to the higher region. They report that the peninsula is a vast level but elevated plateau, having numerous lakes which communicate with the sea, by rivers 250 miles and more in length, but that the soil is too barren and the country too cold for emigrants.

Such, briefly, are the results of the year's discoveries. If less brilliant than those of some previous years, they are certainly not less important in their bearing on the future progress of the human race.

GEORGIA, one of the original thirteen States, is bounded north by Tennessee and North Carolina, east by South Carolina and the Atlantic Ocean, south by Florida, and west by Florida and Alabama. It is about three hundred miles in length from north to south, and two hundred and fifty-six miles at its greatest breadth, with an area of 58,000 square miles. The population in 1860 was 591,638 whites, 3,459 free colored, and 462,232 slaves. Total 1,057,329. The ratio of increase for the previous ten years had been 13.43 per cent. whites, 18.01 per cent. free colored, and 21.10 per cent. slaves. The Legislature meets biennially. The Senate consists of 47 members, and the House of 130 members. Both Houses are elected for each session. The term of the Governor of the State, Joseph E. Brown, expires in November, 1863. (*See NEW AMERICAN CYCLOPEDIA.*)

The session of the Legislature commenced in November, and its attention was early attracted to the movement to secede from the United States. Various propositions were offered and discussed, and on the 7th of December the following preamble and resolutions were adopted in the Assembly; yeas. 101, nays 27:

The grievances now affecting the Southern States must be effectively resisted.

The interests and destiny of the slaveholding States of this Union are and must remain common.

The secession of one from the Union must, more or less, involve or affect all; therefore

Resolved by the General Assembly of Georgia, That in the judgment of this General Assembly, any State in this Union has the sovereign right to secede from the Union, whenever she deems it necessary and proper

for her safety, honor, or happiness; and that when a State exercises this right of secession, the Federal Government has no right to coerce or make war upon her because of the exercise of such right to secede; and should any Southern State secede from the American Union, and the Federal Government make war upon her therefor, Georgia will give to the seceding Southern State the aid, encouragement, and assistance of her entire people. And should the State of Georgia secede from the Union by the action of the Convention of her people on the 16th of January next, she asks the like sympathy and assistance from her Southern sisters which she hereby offers to them.

This resolution was subsequently, under the indications of the strength of the popular feeling against separate State secession, rescinded by a vote of yeas 50, nays 47.

The Senate had previously indefinitely postponed all the resolutions on this subject which had been pending in that body, for the reason that a large majority of its members were indisposed to interfere with a matter upon which they had called a Convention of the People to act.

Subsequently, on the 14th of December, a meeting of all the members of the Legislature was held, at which resolutions were adopted, repudiating the idea that either of the slaveholding States would, under any circumstances, prove untrue to its own interests, and the interests of the sister States, and the success of the common cause. They also repudiated as delusive, the policy of secession first and co-operation afterwards. Interest, safety, and success, and ordinary respect to the sister slaveholding States required consultation with as many as would consult before secession; and then, if secession be deemed advisable, co-operation in secession, and co-operation after secession. Whatever mode or manner of redress was adopted, the first step to its successful accomplishment was to unite the counsels of those who were equally aggrieved, and who were simultaneously demanding redress. In hasty, ill-advised, separate State secession, nothing could be seen but divisions among the people, confusion among the slaveholding States, strife around their firesides, and ultimate defeat to every movement for the effective redress of grievances. In the consultation and co-operation of the slaveholding States would be found the maintenance of their rights and equality, the preservation of the laws, the peace of families, the security of property, the harmony of the people, the peaceful division of the public property, if division must ensue, and the success of whatever plan of redress might be agreed on and adopted. In selecting delegates to the approaching State Convention, the people were urged to be careful that they did not cast their votes for those who were in favor of immediate secession of Georgia alone; and to avoid doubt on that subject, it was suggested that the people should require every candidate to take a "distinct position against immediate State secession, at least until a proper effort of co-operation had failed."

An address to the people of the States of

South Carolina, Alabama, Mississippi, Florida, and of such other slaveholding States as might hold conventions earlier than the assembling of the Georgia State Convention, was adopted at this meeting. It was signed by fifty-two members of the Legislature. The State Convention of South Carolina refused to receive it. Its principal points were the following:

"In behalf of the people of Georgia, whom we represent, this meeting, composed of members of the General Assembly, do most respectfully but earnestly ask the people of our sister States, above named, to appoint delegates to such a General Convention of Southern States, or of as many as will convene; and that until such General Convention shall assemble and deliberate, no final separate State action shall be taken on the question of our longer continuance as members of the present Confederacy of our States.

"We urge this request, deeply feeling its importance to all, and to our great common cause.

"We have but one interest; we are separate independent sovereignties—but in welfare, feeling, and destiny, we are one individual people.

"The action of one State must affect all the Southern States. The separation of one from all must greatly involve not only the feelings, but the interests of all. No slaveholding State can live for itself; we must live with and for each other. God has not mingled more indistinguishably the drops of water in our rivers, than that He has linked indissolubly the destinies of our people and their children forever.

"In climate, soil, productions, and systems of labor, we are as identical with each other as we are separate from the balance of the world.

"Let us consult together, then. Let us so act that all may agree.

"Our people must be united. Our common interest must be preserved. Our common movement must be successful. Common dangers must be avoided. Our equality, our honor shall be preserved. All these can devise a co-operation. Not for our enemies, but for ourselves, our safety, our children, our peace, our necessities, we beseech you so to order your action, as that consultation and coöperation shall not be defeated.

"Nearly all our sister Southern States are, even at this writing, moving to this end. We believe all—most certainly a very large majority—will unite in such a Convention. The incurable embarrassments and dangers can thereby be avoided, and incalculable good ensue.

"We know we cannot be mistaken as to success, when we appeal to the noble chivalry of the Southern people not to take a final step, which must inevitably and irretrievably, in its very nature, involve all, without at least offering to consult with as many as will consult; and, above all, such action will not be taken

against the urgent request of those who beg that consultation, and who are now moving to secure it."

Numerous public meetings were at this time held in many counties of the State, at which resolutions were adopted expressing apprehensions of the consequences of the "election of Lincoln and Hamlin," but manifesting a disinclination to proceed to acts of immediate secession, until other measures had been tried. They were dignified and conservative in language, and clearly indicated that hostility to the Union was neither deep-seated nor bitter.

The election for delegates to the State Convention took place on the 4th of January. The vote on that occasion was thus spoken of soon after:

"We know as well as any one living that the whole movement for secession, and the formation of a new Government, so far at least as Georgia is concerned, proceeded on only a *quasi* consent of the people, and was pushed through, under circumstances of great excitement and frenzy, by a fictitious majority. With all the appliances brought to bear, with all the fierce rushing, maddening events of the hour, the election of the 4th of January showed a falling off in the popular vote of 25,000 or 30,000, and on the night of that election the co-operationists had a majority, notwithstanding the falling off, of nearly 3,000, and an absolute majority of elected delegates of 29. But, upon assembling, by coaxing, bullying, and all other arts, the majority was changed."

This convention assembled at Milledgeville on the 16th of January. General W. Crawford was elected President. Commissioners Orr, from South Carolina, and Shorter, from Alabama, were invited to seats in that body. On the 18th, a resolution declaring it to be the right and duty of Georgia to secede, and appointing a committee to draft an ordinance of secession, was offered and put to vote. On a division, the vote was—ayes, 165; noes, 130. The ordinance was as follows:

AN ORDINANCE to dissolve the union between the State of Georgia and other States united with her under the compact of Government entitled the Constitution of the United States:

We, the people of the State of Georgia, in Convention assembled, do declare and ordain, and it is hereby declared and ordained, that the ordinance adopted by the people of Georgia in Convention in the year 1788, whereby the Constitution of the United States was assented to, ratified, and adopted, and also all acts and parts of acts of the General Assembly ratifying and adopting the amendments to the said Constitution, are hereby repealed, rescinded, and abrogated; and we do further declare and ordain, that the Union now subsisting between the State of Georgia and other States, under the name of the United States of America, is hereby dissolved; and that the State of Georgia is in full possession and exercise of all those rights of sovereignty which belong and appertain to a free and independent State.

The vote on its adoption was—ayes, 208; noes, 89.

On the night after its passage, great demon-

strations of joy were made at the Capital, including the firing of cannon, torch-light processions, sky-rockets, music, speeches, &c. In Augusta there was an illumination with fireworks, ringing of bells, and firing of cannon.

A substitute was introduced for the ordinance of secession, but was lost. It was also moved to postpone the operation of the ordinance to March 3d. This motion failed. Subsequently a preamble and resolution were adopted, the object of which was to remove the unfavorable impression created by the large vote given in opposition to the ordinance of secession. The preamble was in these words :

Whereas, as a lack of unanimity in this Convention on the passage of the ordinance of secession indicates a difference of opinion amongst the members of the Convention, not so much as to the right which Georgia claims or the wrongs of which she complains, as to a remedy and its application before a resort to other means for redress ; and whereas, it is desirable to give expression to that intention which really exists among all the members of the Convention to sustain the State in the course of action which she has pronounced to be proper for the occasion ; therefore, &c.

The resolution required every member to sign the ordinance. This was adopted unanimously.

Before the Convention proceeded to sign the ordinance, a resolution was offered, proposing to submit it to a vote of the people, through the proclamation of the Governor, and that the question should be "secession" or "no secession" at the ballot-box. If a majority of votes were for secession, then the ordinance was to take effect, and not otherwise. The resolution was rejected by a large majority.

The ordinance was then signed by all present. The response to the resolutions of the New York Legislature was made by the passage of the following resolution :

Be it unanimously resolved by the people of Georgia, in Convention assembled, as a response to the resolutions of New York, that we highly approve of the patriotic and energetic conduct of our Governor in taking possession of Fort Pulaski by the Georgia troops, and request him to hold possession until the relations between Georgia and the Federal Government shall be determined by this Convention ; and that a copy of this resolution is hereby ordered to be transmitted to the Governor of New York.

The resolution was unanimously adopted.

Resolutions were adopted on the 22d, declaring that Georgia would demand her share of the public property ; another, pledging the State to pay the carriers for the transportation of the mails. An ordinance was passed, providing for the execution of the sentences of the Federal Courts, and for the execution of processes issued by the same courts, and to preserve indictments. Another to continue in force all the Federal laws in reference to the African slave trade was, after an amendment declaring it not to be piracy, but substituting imprisonment in the penitentiary, unanimously adopted. An ordinance was also reported relating to the inter-State slave trade ; also another revoking the Federal jurisdiction over all

lands ceded by the State, and authorizing the payment for fortifications, arsenals, and also for all improvements and stores.

On the 25th, a report was offered, that no State should be admitted into a Southern Confederacy unless it be a slaveholding State, and any State thus admitted subsequently abolishing slavery should be expelled from the Union.

When it was proposed that Commissioners be sent to slaveholding States, objection was made against including Delaware.

Subsequently, on the 28th, an ordinance continuing the existing revenue laws was lost ; and the ordinance, substantially that of the South Carolina Convention, was adopted after a long and animated debate. The vote was yeas 130, nays 116.

Representatives to the Montgomery Congress were appointed on the 24th. Before voting, an assurance was given to the Convention, that none of the candidates were in favor of forming a Government having in view an immediate or ultimate union with the Northern States. No such idea could be entertained. All were for the establishment of a Southern Confederacy on the basis of the old Constitution, and never, under any circumstances, to connect themselves with the Northern States.

Notwithstanding this unanimity in the Convention, there was a great reaction in some parts of the State, and the flag of the United States was kept flying without regard to the ordinance of the Convention. This was done also in North Alabama, and in portions of Mississippi and Louisiana. Fears were expressed by former members of Congress from Georgia, that the reaction might be greatly increased on the popular mind in the Gulf States, if a compromise was effected satisfactory to the Border States.

Two regiments were ordered by the Convention to be organized as the army for the Republic of Georgia, over which a number of officers were appointed by the Governor, chiefly those who had resigned from the army of the United States.

On the 7th of March, the Convention re-assembled at Savannah, after a brief adjournment. A resolution to take an oath to support the Provisional Constitution was offered and rejected.

Mr. Robertson, of Macon, wished to wait till the permanent Constitution was adopted, and Mr. Fouce saw no necessity for swearing at all ; he was opposed to it in the abstract. Besides, this was a convention of the sovereign people, and above all Constitutions.

A resolution that the people of Georgia, in Convention, heartily approve of the election of Messrs. Davis and Stephens to the Presidency and Vice-Presidency, was adopted.

On the 12th, the Convention transferred the forts, arms, arsenals, and munitions of war to the Confederate States. An ordinance was also passed, appropriating half a million of dollars to support the Government, and authorizing the

Governor to issue seven per cent. bonds for that amount.

On the 16th of March, the Constitution of the Confederate States was taken up, and adopted by the unanimous passage of the following ordinance :

Be it ordained by the people of Georgia, in Convention assembled, and it is hereby ordained by authority of the same, That the Constitution adopted by the Congress at Montgomery, in the State of Alabama, in the year of our Lord one thousand eight hundred and sixty-one, for the "permanent Federal Government" of the Confederate States of America, be and the same is hereby adopted and ratified by the State of Georgia, "acting in its sovereign and independent character,"

Thus Georgia was the second State to adopt the Constitution without any reference of the question to the people. By such action the principle of popular government is destroyed.

If the State Conventions which were called for another purpose can assume that they are the people, that they have the unlimited power of the people and can do whatsoever they list, and if, under such an assumption of power, they can appoint delegates to a General Convention without consulting the people, and can fix upon them a new Government without their consent, then a principle which has always been considered fundamental in the country and "prized above all price," is gone.

Seven of the ten members from Georgia in the Congress were also members of the State Convention.

The State Convention adjourned on the 23d of March. A State Constitution was adopted, to be submitted to the people for ratification or rejection in July.

This new Constitution, although differing wholly from the old, made but few essential changes in the organic law of the State. The most important of these alterations were the linking together in one Senatorial district of three contiguous counties, without regard to size or population, for the purpose of reducing the number of Senators to forty-four; requiring the assent of two-fifths of the members present to have the yeas and nays entered on the journal, instead of two members, as under the old instrument. All elections by the people were to be by ballot, but all elections by the General Assembly should be *viva voce*. Under the new system, Judges of the Supreme and Inferior Courts were to be appointed by the Governor, and confirmed by two-thirds of the Senate, instead of being elected by the people and Legislature, as heretofore. Another clause provided that the Governor should have been a citizen of the Confederate States twelve years.

The official vote on the Constitution was, for ratification, 11,497; against ratification, 10,697. Majority for ratification, 860.

After the proclamation of President Lincoln was issued, great excitement prevailed, especially in Savannah, and military preparations were commenced with great vigor. On the secession of Virginia, a salute of eight guns was fired. A full armament of one hundred

and fifty guns was sent to Fort Pulaski. Fort Jackson, on the Savannah River, below the city, was put in a complete state of defence. An exterior line of fortification to protect the mouth of the river was also commenced, chiefly on Tybee Island.

On the 26th day of April, the Governor issued his proclamation, forbidding the payment of debts to Northern creditors, as follows :

Whereas, by the oppressive and wicked conduct of the Government and people of that part of the late United States, known as the anti-Slavery States, war actually exists between them and the people of the Southern States; and whereas, the President of the United States has issued his proclamation, declaring his determination to blockade the ports of the Southern States, and is now collecting Federal troops upon Southern soil for the purpose of subjugating and enslaving us; and whereas, property belonging to the citizens of the State of Georgia, whenever found within the anti-slavery States is seized and forcibly taken from its owners; and whereas, all contracts made with the enemy during the existence of hostilities are, by the law of nations, illegal and void, and all remedies for the enforcement of contracts in our courts between citizens of this State and citizens of the States making war upon us, which were made prior to the commencement of hostilities, are suspended till the termination of the war; and whereas, in the language of the law of nations, "the purchase of bills on the enemy's country, or the remission and deposit of funds there, is a dangerous and illegal act, because it may be cherishing the resources and relieving the wants of the enemy, and the remission of funds in money, or bills to subjects of the enemy, is unlawful;" and whereas, sound policy as well as international law absolutely forbids that any citizen of this State shall, under any pretext whatever, assist the enemy by remitting, paying, or furnishing any money or other thing of value during the continuance of hostilities, to the Government or people of the States which have waged and are maintaining a most unnatural and wicked war against us; and whereas, justice requires that all sums due from citizens of this State to individuals in such hostile States, who do not uphold and sustain the savage and cruel warfare inaugurated by their Government, should be promptly paid so soon as hostilities have ceased, and the independence of the Confederate States is recognized by the Government of the United States :

Therefore, in view of these considerations, I, Joseph E. Brown, Governor and Commander-in-Chief of the army and navy of the State of Georgia, do issue this, my proclamation, commanding and enjoining upon each citizen or inhabitant of this State, that he abstain absolutely from all violations of the law above recited, and that he do not, under any pretext whatever, remit, transfer, or pay to the Government of the United States, or any one of the States composing said Government, which is known as a Free Soil State, including, among others, the States of Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, and Ohio; or to any citizen or inhabitant of any such State, any money, bills, drafts, or other things of value, either in payment of any debt due, or hereafter to become due, or for or on account of, any other cause whatever, until the termination of hostilities.

And I hereby invite each citizen or inhabitant of this State, who is indebted to said Government, or either of said States, or any citizen, or inhabitants thereof, to pay the amount of such indebtedness, whenever due, into the treasury of Georgia, in any funds bankable in Augusta or Savannah, or to deposit the same, subject to the order of the Treasurer of this State, in any one of the solvent banks of either of said cities, or in any legally authorized agency of either of said banks; and upon the making of any such deposit at the Treasury,

or upon presentation of any such certificate of deposit, the Treasurer of this State is hereby directed and required to deliver to such person a certificate, specifying the sum so deposited, which I hereby declare the faith and credit of this State will be pledged to repay to such depositor, in funds bankable in Augusta and Savannah, with seven per cent. interest from the date of the deposit, so soon as hostilities shall have ceased, and it shall again be lawful for debtors to pay the same to creditors in the hostile States above mentioned. This will not only afford to such of our citizens as owe money to Northern creditors, which international law and public policy forbid them at present to pay, a safe investment, and the highest security for its return to them at the end of the war, but it will enable them in the mean time to perform a patriotic duty and to assist the State, and through her the Confederate States, in raising the funds necessary to the successful defence of our homes, our firesides, and our altars.

And I do further command and strictly enjoin upon all and every chartered bank in this State, which may be in possession of any note, bill, draft, or other paper binding any citizen of this State to pay money to any one of the said hostile States, or any inhabitant or corporation thereof, or belonging to any such State or person, to abstain from protesting any such draft, bill, note, or other paper, provided the person liable on such bill, draft, note, or other paper, will exhibit to such bank or any of its agencies, having such paper in possession, a certificate showing that he has deposited the amount due on such paper, in the Treasury of this State, or in any one of the banks above mentioned, to the credit of the Treasurer, or will at the time such paper becomes due, make such deposit. I further command and require all Notaries Public in this State, to abstain absolutely from the performance of any official act for the protest of any paper of the character above mentioned, under such circumstances as are hereinbefore specified.

Given under my hand and the great seal of the State, at the Capitol, in Milledgeville, this twenty-sixth day of April, in the year of our Lord eighteen hundred and sixty-one, and of the independence of the Confederate States of America, the first. JOSEPH E. BROWN.

E. P. WATKINS, Secretary of State.

The agents for the cotton loan were active in their endeavors to obtain subscriptions. In other parts of the State, besides Savannah, very liberal subscriptions were made. The demand for arms, however, was, even at this early period, becoming urgent, and most extensive schemes were set on foot to undertake their manufacture. The reasons offered to induce capitalists to embark in these enterprises were: that their country was almost destitute of means to construct arms, their supplies from foreign countries had been cut off, their present stores must soon be exhausted; their enemies had all the means at hand for constructing the most destructive weapons.

The people were urged by the Governor to ship no more cotton while the blockade continued. This scarcity of cotton, it was believed, would operate upon the manufacturing industry of the world with such severity as to excite movements in behalf of the Confederate States. The view of the Governor was thus expressed: "It is said our enemies exempt cotton from blockade. Why? Because they cannot do without it. I appeal to our planters, therefore, to refuse to ship a bag while the blockade lasts. This will soon remove the blockade from our ports, and the increase in price will amply re-

ward you for the loss you may sustain while keeping your cotton on hand. I trust our people will hold public meetings, and petition the Government at Montgomery to lay an absolute embargo upon cotton, permitting not one bag to pass out of the Confederate States while the blockade is maintained. I appeal to our capitalists to go to work vigorously and prepare to manufacture such articles as we most need. I also appeal to our planters to redouble their energies for the production of all supplies of provision necessary to support our people at home and our armies in the field. The prospect is most flattering for an abundant wheat harvest. Let each planter, as soon as his wheat is cut, break and plant a few more acres of his best wheat land in early kind of corn. Finally, I appeal to all, ladies and gentlemen, to practise strict economy, dispense with every unnecessary luxury, and devote all to our country till the battle is won, and our independence acknowledged by the civilized nations of the earth."

The exhaustion of the supply of arms was becoming so certain that the Governor again addressed the people on the subject. He stated that all the arms in the arsenal at Augusta, at the date of the act for its transfer to the Confederate States, were turned over to the Secretary of War, and ordered by him out of the State to arm troops of other States on the border of the Confederacy. All those arms which were taken from the arsenal previous to its transfer, were placed in the hands of the State troops at that time in service. Over seventeen thousand troops had been fully armed, accounted and equipped by the State at the end of July, including full supplies of tents, knapsacks, haversacks, blankets, cartridge boxes, cap pouches, camp kettles, canteens, &c., at a cost of nearly \$300,000, over and above the cost of the guns and the expense of feeding and rendezvousing twenty regiments. About five thousand independent troops also had gone from the State, a part of whom had taken State arms. The supply that remained was only sufficient for two or three new regiments, and was then required. It was estimated that there were 40,000 good country rifles and 25,000 good double-barrelled shot-guns. From this source a temporary supply was expected.

The change in the financial condition of the State, arising from the stagnation of commerce and the disappearance of specie, caused great embarrassment among the people. This was accompanied with an advance on many necessary articles. So oppressive was this change upon the citizens, that the attention of the Legislature was called to it by the Governor, who recommended that such measures should be adopted as would put an end to the unjust and unpatriotic speculations in these prime necessities of life. He said: "There should be enacted a law, authorizing the Governor, or any military officer under his command, by his direction, to seize and appropriate any provisions or other supplies necessary for our army

in the hands of speculators or traders, and to pay them or tender to pay them reasonable and just compensation therefor, to be fixed by competent valuing agents. Such a measure would not only secure the Government against extortion, but it would also accomplish a general public benefit in the regulation of prices. The price fixed as the market value of the articles needed by the State, which are also the principal articles needed by the community, would very soon become the general market price in the State, as the authorities could, on information, seize supplies for the State in the hands of such persons as refused to sell at reasonable prices, and thus bring down those above to medium rates." Bacon, which cost, before the war commenced, ten cents per pound, was then selling for thirty cents. Country jeans had advanced from fifty cents per yard to one dollar twenty-five and one dollar fifty cents. An act was accordingly passed by the Legislature which allowed the owner to sell salt, wheat, flour, bacon, lard, cotton, osnaburgs, kerseys, leather, shoes, at an advance of sixty per cent. over the price in the month of April previous, but all speculative prices were forbidden.

The military quota of the State was ordered by the Confederate Government to the border States. The danger of invasion was at no time prior to the latter part of the year considered so imminent as to require a large force in the field, ready for defence. In September, about three thousand troops were stationed on the seaboard to defend the city of Savannah, and about one hundred and ten miles of sea-coast. The Governor frequently made offers to the Secretary of War to increase this force by calling out the militia, but no requisition was ever made by the latter. Finally the Governor, apprehending danger, called out a considerable force as a part of his duty, and proceeded to organize them. No assistance had thus far been received from the Confederate Government in the defence of the coast, and the Governor recommended to the State Legislature to undertake this duty. He said: "My own opinion is, that it is not now the time to count the cost, but that we should call out as many troops as may be necessary to repel the invader, should he appear either upon the sea-coast or upon the borders of Tennessee. Whether it may take ten thousand or twenty thousand men, or whether it may cost five or ten millions of dollars, I ask, in the name of the people, that their representatives place at my command the men and money necessary to accomplish this object."

The expedition to Port Royal (*see EXPEDITIONS*) sailed from Fortress Monroe so late in the year, that it served only to threaten the coast of Georgia for some time. A considerable force, as a coast guard, was collected, and some troops were also sent to aid in the defence of Charleston. A number of little steam-boats were equipped under Captain Tattnal, once an officer of the United States Navy. They were,

however, unable to oppose the overwhelming force sent by the Federal Government.

The vote for President in 1860 was: Douglas, 11,590; Breckinridge, 51,889; Bell, 42,886. No votes were cast for Mr. Lincoln.

GIBBS, JOSIAH WILLARD, LL.D., an American philologist and professor, born in Salem, Mass., April 30, 1790, died at New Haven, March 25, 1861. He graduated at Yale College in 1809, and was tutor there from 1811 to 1815. In 1824 he was appointed professor of sacred literature in the Yale Theological Seminary connected with the college, and continued to fulfil the duties of that professorship to the close of his life. In 1853 the College of New Jersey conferred on him the degree of LL.D. He was particularly fond of grammatical and philological studies, and had attained a high reputation for thoroughness and accuracy in them. He contributed to several of the most important philological works of the present century, among others to the revised edition of Webster's Unabridged Dictionary, to Prof. W. C. Fowler's work on the English language, and to the American Journal of Science, and other critical periodicals. His published works were: a translation of Storr's "Historical Sense of the New Testament," Boston, 1817; a translation of Gesenius' "Hebrew Lexicon of the Old Testament," 8vo. Andover, 1824; "A Manual Hebrew and English Lexicon," (abridged from Gesenius,) Andover, 1828, (2d edition, New Haven, 1832); "Philological Studies," New Haven, 1857; and "Latin Analyst," New Haven, 1858.

GIBSON, GEN. GEORGE, died at Washington on the 29th of September, 1861. A native of Pennsylvania, he entered the army from civil life as a captain of infantry, in May, 1808. Subsequently he was promoted to the rank of major and lieutenant-colonel, and after having served with distinction through the war of 1812-'15, he was discharged at its close. Reappointed as quartermaster-general in 1816, and subsequently made commissary-general in 1818, he rendered invaluable service in the former capacity to the army of Gen. Jackson in Florida, and thereby earned the enduring friendship of that stern soldier. Brevetted a brigadier-general for faithful service in 1826, and a major-general for meritorious conduct as commissary-general during the Mexican war, he administered the affairs of his department for a period of over forty years, to the entire satisfaction, it was believed, of his superiors and the army.

GORTCHAKOFF, PRINCE MIHIEL or MI-CHAEI, a Russian general, born in 1792, died May 30, 1861. He was a descendant of one of the oldest and noblest houses of Russia, being of the stock of Rurik, one of the early czars of Russia. His father was the celebrated prince Dimitri Petrowitsch Gortchakoff, well known as a Russian poet. Young Gortchakoff entered the army very early, and served against the French in the campaigns of 1807 and 1812-'14; against the Swedes in 1808-'9, and in 1810 as an artillery officer in Persia. During the cam-

paing of 1812-'14 he was present at Borodino, Lutzen, Bautzen, Dresden, and Leipzig. In 1828-'9 he was general of brigade, and led the sieges of Shumla and Silistria, capturing the latter city after a long siege, and was advanced to the rank of lieutenant-general; in 1831, he distinguished himself in the war of the Polish revolution at Grochow, where he was severely wounded at the capture of the bridge of Ostrolenka and the taking of Warsaw, and was made chief of staff of the active army, as a testimony of his ability as an officer. In 1843 he was appointed general of artillery, and in 1846 military governor of Warsaw, where he gained the affection of the people by his efforts for the improvement of the capital. In 1849, as major-general, he took part in the war with Hungary. In 1852 he attended the funeral of the Duke of Wellington as representative of the army of Russia, which had honored the duke with an appointment as field-marshal. In 1854 he was appointed commander of the army of the Pruth in the principalities. He besieged Silistria for some months, but finally raised the siege, and subsequently withdrew his troops into Bessarabia, where, a few months later, he received from the emperor the command of the entire Russian forces in the Crimea. He was defeated on the Tehernayo, but more than retrieved his reputation by his gallant defence of Sebastopol, and by his skilful retreat after its capture, which enabled him to avoid a disastrous capitulation. After the death of Paskiewitch he was appointed governor of Poland, and exerted himself, up to his death, to promote the peace of that unhappy country.

GRAHAM, SIR JAMES ROBERT GEORGE, an English statesman, born at Netherby, in Cumberland, June 1, 1792, died at his residence in Netherby, Oct. 25, 1861. He was educated at Westminster, and at Queen's College, Cambridge, and entered public life as secretary to Lord Montgomery, in Sicily, and afterwards served in the same capacity under Lord William Bentinck. In 1818 he was elected to parliament from Hull, coming out in opposition to the political views of his father, who was greatly displeased with his conduct. He soon distinguished himself as an able political writer, and advocated the principles of the liberal school in politics. In 1820 he retired from parliament; in 1824 he succeeded his father as baronet, and in 1826 was elected for Carlisle, and was a member of parliament, as the representative either of that city, Cumberland, East Pembroke, Dorchester, or Ripon, from that time till his death. From 1830 to 1834 he was first Lord of the Admiralty, and a member of the cabinet under the Grey Ministry. In 1831 he was one of the most efficient advocates of the Reform bill in the House. In 1834, in conjunction with Lord Stanley (now Earl Derby) he left the Grey Cabinet, and for some years attached himself to no particular party. In 1841 he was Home Secretary under Sir Robert Peel. In 1844 he was accused of tampering with the letters of the Italian republicans, which passed through

the London Post-office, and the accusation was sustained by strong evidence. In 1845 he ably advocated the Free Trade policy of Sir Robert Peel. In 1846, on the defeat of the Irish coercion bill, he retired from office, but was appointed one of the council of the duchy of Lancaster in 1847. In 1852 he again became first Lord of the Admiralty under Lord Aberdeen, but resigned in 1855, under Lord Palmerston, from his opposition to the premier's views relative to the Russian war. Sir Charles Napier brought very severe allegations against him for his mode of fitting out the Baltic fleet during his term of service, and these allegations were sustained by the most convincing evidence. The motives which prompted his action in this matter were never explained. In 1859 he took grounds with the advanced liberals in a speech on Earl Derby's Reform bill, although he had previously acted with the tories. He held no office under the Government after his resignation in 1855.

GREAT BETHEL is about 12 miles from Fortress Monroe, on the road from Hampton to Yorktown, and between two and four miles beyond Little Bethel on the same road. This latter spot, consisting chiefly of a small church, is about ten miles from Hampton and the same distance from Newport News, in Elizabeth City County, Virginia. At Little Bethel a Confederate outpost of some strength was established, the main army being in the vicinity of Yorktown. From Little Bethel the Confederate troops were accustomed to advance, both on Newport News and the picket guards of Hampton, to annoy them. They had also come down in small squads of cavalry and taken a number of Union men, and forced them to serve in their ranks, besides gathering up the slaves of citizens who had moved away and left their farms in charge of their negroes, and sent them to work on the intrenchments at Williamsburg and Yorktown. Gen. Butler, being in command at Fortress Monroe, determined to drive out the enemy and destroy his camp. At Great Bethel, which is a large church near the head of Back River, there was another outpost, and a considerable rendezvous with works of some strength in process of erection. Brig.-Gen. E. W. Pierce was appointed to the command of the expedition, and issued the following orders:

HEAD-QUARTERS CAMP HAMILTON, }
June 9, 1861. }

General Orders, No. 12: A plan of attack to-night is herewith enclosed and forwarded to Col. Duryea, commanding Fifth Regiment New York State troops, who will act accordingly. Col. Townsend, commanding Third Regiment New York State troops, will march his command in support of Col. Duryea; Col. Carr, commanding Second Regiment New York Volunteers, will detach the artillery company of his regiment, with their field-pieces, caissons, and a suitable supply of ammunition, and take their position at the burnt bridge, near Hampton. Cols. Allen, Carr, and McChesney will hold their entire command in readiness, fully prepared to march at a moment's notice. All the troops will be supplied with one day's rations, and each man with twenty rounds of ball cartridges. That no mistake may be made, all the troops, as they charge the

enemy, will shout "Boston." Cols. Allen, Carr, Townsend, Duryea, and McChesney will take notice, and act accordingly. By command of
Brigadier-General E. W. PIERCE.

Some notes were added to this order, the principal points of which were as follows:

A regiment or battalion to march from Newport News. A regiment or battalion to march from Camp Hamilton, Duryea's; each to be supported by sufficient reserves under arms in camp, and with advance-guard out on the line of march. Duryea to push out two pickets at 10 p. m.; one also two and a half miles beyond Hampton, on the county road, but not so far as to alarm the enemy. This is important. Second picket half so far as the first. Both pickets to keep as much out of sight as possible. No one whosever to be allowed to pass through their lines. Persons to be allowed to pass inward towards Hampton, unless it appear they intend to go around about and dodge through the front. At 12 m., (midnight,) Col. Duryea will march his regiment, with twenty rounds of cartridges, on the county road towards Little Bethel. Scows will be provided to ferry them across Hampton Creek. March to be rapid but not hurried. A howitzer with canister and shrapnell to go, and a wagon with planks and materials to repair the New Market bridge. Duryea to have the two hundred rifles. He will pick the men to whom they are to be intrusted. Newport News movement to be made somewhat later, as the distance is less. If we find the enemy and surprise them, we will fire a volley if desirable, not reload, and go ahead with the bayonet. As the attack is to be made by night, or gray of morning, and in two detachments, our people should have some token, say a white rag, or nearest approach to white attainable, on left arm.

Accordingly, on that night, the regiment of New York Zouaves, under Col. Duryea, and the Albany (N. Y.) regiment, under Col. Townsend, were despatched from Fortress Monroe, while the New York Steuben (German) regiment, under Col. Bendix, with detachments from the First Vermont and the Third Massachusetts, were ordered from Newport News. With the division from Fortress Monroe, or Camp Hamilton, as it was called, there was a small detachment of United States Artillery, Lieut. Greble commanding, with three pieces of light artillery.

The Zouaves were ordered to proceed over Hampton Creek at 1 o'clock in the morning, and to march by the road up to New Market Bridge; thence, after crossing, to go by a by-road, which would put them in the rear of the enemy, and between Little Bethel and Great Bethel. This was to be done for the purpose of cutting off the enemy and then to make an attack on Little Bethel. This movement was to be supported by Col. Townsend's regiment with two howitzers, which was to march from Hampton one hour later. The companies of Massachusetts and Vermont were to make a demonstration upon Little Bethel in front, supported by Col. Bendix's regiment with two fieldpieces. The regiments of Cols. Bendix and Townsend were to effect a junction at a fork of the road leading from Hampton to Newport News, about a mile and a half from Little Bethel. Col. Townsend, in his report, thus describes the manner in which this junction was made:

"In obedience to these orders, with the con-

certed sign of a white badge upon our left arm, (at midnight,) I marched my regiment to Hampton, where the general met the command and accompanied it.

"On approaching a defile through a thick wood, about five or six miles from Hampton, a heavy and well-sustained fire of canister and small-arms was opened upon the regiment while it was marching in a narrow road, upon the flank, in easy step and wholly unsuspecting of any enemy, inasmuch as we were ordered to reinforce Col. Duryea, who had preceded us by some two hours, and who had been ordered to throw out, as he marched, an advance guard two miles from his regiment, and a sustaining force half-way between the advance and the regiment; therefore, had Col. Duryea been obliged to retreat upon us before we reached his locality, we should have heard distant firing, or some of his regiment would have been seen retreating.

"The force which fired upon us was subsequently ascertained to be only the regiment of Col. Bendix, though a portion of the Vermont and Fourth Massachusetts regiments was with it, having come down with two 6-pounder fieldpieces from Newport News to join the column. These regiments took up a masked position in the woods at the commencement of the defile. The result of the fire upon us was two mortally wounded, (one since dead,) three dangerously, and four officers and twenty privates slightly, making a total of twenty-nine. At the commencement of the fire, the general, captain chamberlain, his aide-de-camp, and two mounted howitzers were about 250 paces in advance of the regiment; the fire was opened upon them first by a discharge of small-arms, and immediately followed by a rapidly returned volley upon my regiment and the fieldpieces; my men then generally discharged their pieces and jumped from the right to the left of the road, and recommenced loading and firing. In a few minutes, the regiment was reformed in the midst of this heavy fire, and by the general's directions, retired in a thoroughly military manner, and in order to withdraw his supposed enemy from his position. On ascertaining that the enemy were our friends, and on providing for the wounded, we joined Cols. Duryea and Bendix."

Col. Duryea, who was on the advance, thus describes his movement:

"At half-past 11 o'clock, at night, we commenced the march, and for the first two miles to Hampton Bridge, proceeded leisurely, waiting for the howitzer which should be placed at the head of the column. Arriving at Hampton Creek, much delay was occasioned by the non-arrival of the surf-boats which were to convey the regiment across the river, and it was 1 o'clock before the column was formed, ready to push forward on the other side. We now advanced rapidly, and soon came up with our two companies of skirmishers, who had been despatched ahead an hour and a half previous. Proceeding steadily on without resting a mo-

ment, we came about 4 o'clock in the morning to Little Bethel, a distance of about ten miles. At this point we discovered and surprised the picket-guard of the enemy, and a mounted officer with four or five foot were taken prisoners. While pushing forward towards Big Bethel, we suddenly heard a heavy fire of musketry and cannon in our rear, bespeaking a severe engagement. Supposing it to be an attempt of the enemy to cut off our reserve, we immediately countermarched in quick and double-quick time, when, having proceeded about five miles, we came upon two of our regiments, and learned that in the darkness of the night they had mistaken each other for enemies, and an unfortunate engagement, accompanied with some loss, had taken place."

Up to the time of this fatal mistake, the plan had been vigorously, accurately, and successfully carried out. As a precaution, the commanding general had ordered that no attack should be made until the watchword had been shouted by the attacking regiment. Ten of Col. Townsend's regiment were wounded, and one mortally. All hope of surprising the enemy above the camp at Little Bethel was now lost, and it was found, upon marching upon it, to have been vacated, and the cavalry had pressed on towards Great Bethel. Gen. Pierce now consulted with his colonels, and it was concluded to attempt to carry the works of the enemy at Great Bethel, and measures were taken for that purpose. The force proceeded on, and Great Bethel was reached about 10 o'clock. Over a small stream twelve miles from Hampton, a bridge, called County Bridge, crosses on the road to Yorktown. On the opposite side, and to the right, the enemy were posted behind sand batteries. In front of their batteries was a broad open field, and nearer to the bridge than that, and on the right of the advancing force, was a wood, and in front and to the left, a corn-field. Between the wood and the corn-field, ran a road connected with that by which the advance was made. Col. Duryea's regiment now advanced over the fence and into the corn-field, and deployed into an apple orchard on the enemy's right flank. The Albany regiment took a supporting position on the right and rear of Col. Duryea, while it in turn was supported in like manner by Col. Allen's regiment. In the road in front of the enemy's batteries, Lieut. Greble's howitzers were placed, having in their rear Col. Bendix's regiment, which deployed on the right, in the wood, and on the enemy's left flank with three companies of the Massachusetts and Vermont regiments. The fire of the enemy became at once incessant and galling on the Federal right. The howitzers of Lieut. Greble, supported only by the ordinary force of gunners, opened fire with great rapidity and effect, and were steadily advanced to within 200 yards of the enemy's position. Several attempts were now made to charge the batteries, but were unsuccessful, owing to a morass in their front and a deep ditch

or stream requiring ladders to cross it. The troops were, however, gradually gaining ground, although the action had continued nearly two hours and a half, when the order was given by Gen. Pierce to retreat. The howitzers maintained their position until their ammunition began to give out, when Lieut. Greble was struck on the back part of the head by a cannon ball, killing him instantly. The gunner having been disabled, the pieces were withdrawn by a small force under Col. Washburn.

On the right, the Vermont companies had outflanked the enemy, gaining a position in their rear and pouring such a hot fire as to silence the battery there. A statement by one of the Confederate force, says: "One company under Capt. Winthrop attempted to take the redoubt on the left. The marsh over which they crossed was strewn with their bodies. Their captain, a fine-looking man, reached the fence and leaping on a log, waved his sword, crying, 'Come on, boys; one charge and the day is ours.' The words were his last, for a Carolina rifle ended his life the next moment, and his men fled." The force retired from the field in order, about half-past 12 o'clock, and the enemy on the same day fell back to Yorktown. The number of Federal troops was between three and four thousand, while that of the enemy was nearly fifteen hundred. The loss on the Federal side was sixteen killed, thirty-four wounded, and five missing. The loss on the Confederate side was small.

A statement was made by an officer of Col. Bendix's regiment, that the latter had not received any intimation that the troops would wear white badges round the arm for the purpose of mutual recognition, and if he had, he would not have been able to distinguish such badge at the distance and in the dusk of the morning. Col. Bendix's command did not wear such badges. The uniform of Col. Townsend's regiment was very similar to that of the enemy. It was also further stated, that when Col. Townsend's troops approached the junction over a slight ridge, they appeared to be a troop of cavalry, because Gen. Pierce and staff and Col. Townsend and staff, in a body, rode in advance of their troops, and without any advance guard thrown out.

The expedition was originally undertaken with the object of cutting off a body of the enemy supposed to be near Newport News, and it was undertaken at night in order to surprise their batteries. This surprise was frustrated by the mistaken engagement between the two regiments. Some of the officers were opposed to an advance after this occurrence.

The bravery of the Federal troops was admitted even by the enemy, and if proper knowledge had been obtained beforehand of the position, and no order for retreat had been given, the attack would have been successful. No investigation has ever been made of the affair, nor has the generalship displayed ever been approved.

GREAT BRITAIN. The year commenced with gloomy apprehensions. The country was involved, in alliance with France, in a costly and, as was then probable, protracted war with China, and though news of a treaty of peace between the representatives of the allied powers and the Chinese Emperor (the treaty of Tien-tsin) soon arrived, yet the flight of the emperor and the wide-spread insurrection of the Tae-ping party, made it doubtful whether another and worse struggle was not to follow. In New Zealand a war had broken out between the natives and the colonists, which the experience of previous colonial wars led the nation to apprehend, might prove lengthy and expensive; in her relations to the European powers, there was much that boded ill for peace; Austria was threatened with an Italian war and insurrection in Hungary, and such a war would almost inevitably involve on one side or the other most of the powers of Europe; Prussia was developing a reactionary tendency, and her hostility to France and connection with England were strong motives to incline Great Britain to sympathize with a Germanic policy; France, by her disruption of diplomatic intercourse with Italy, the retention of her squadron at Gaeta, her persistent occupation of Syria against English remonstrances, her encouragement of the canal project of M. Lesseps, and her armed occupancy of the isthmus of Suez in connection with it; her whispered designs upon Sardinia, and the marked increase of her army and naval forces, had given rise to extreme uneasiness, on the part both of the British Government and people. At home, there was still more cause for depression. The deficiency in the crops of 1860 was very great, far beyond that of any previous year since 1847, and the purchase of grain from foreign countries had produced such a drain of specie, that the rate of discount in the Bank of England had risen to nine per cent., and the disturbances already existing in the United States, the general shortness of crops in France and Germany, and the apprehension of the imminence of war, had so far paralyzed trade, that the manufactories of the country were obliged to suspend or diminish their production. News, too, came from India that, owing to the extreme drought of the preceding season, a terrible famine was prevailing over extensive districts, and the wretched natives were dying daily by hundreds from starvation, and looked to England for help. The Government took measures at once to relieve, in part, this urgent distress, and subscriptions to the amount of \$500,000 were made by private individuals, to aid in preventing or alleviating the suffering from the famine. As the months rolled on, some of these causes of disquietude were removed; the Chinese treaty was observed, the Indian famine was relieved, the New Zealand insurgents surrendered to the British commander on the 18th of March, and though hostilities were subsequently renewed, their former prestige of success was lost; the

French fleet left Gaeta, and the city surrendered on the 14th of February; and, at the repeated and urgent solicitation of the British Government, the termination of the French occupation of Syria was definitively fixed for the 6th of June. The French Emperor disavowed any intention of obtaining possession of Sardinia, and made such explanations of his increased armament as were partially satisfactory, while his abrogation of the passport system, and his negotiation with Mr. Cobden, of the reciprocal commercial treaty, materially reducing the duties on the productions and manufactures of the two countries, were in some sort guarantees for his peaceful intentions.

The finances of the Government, too, which had given rise to some apprehension, a deficit having occurred the previous year, and a still larger one being expected the present one, had assumed unexpectedly a more favorable aspect; a moderate surplus having taken the place of the previous year's deficiency. But if these causes of solicitude had vanished, others had appeared in their place. Lord John Russell had communicated to the Italian court his sympathy with them, and had avowed the right of a people, situated as the Neapolitans were, to throw off their allegiance to the tyranny that oppressed them, and transfer it to another power. This declaration, intended only to encourage and unite the Italians, and perhaps to rebuke Prussia for her strongly reactionary tendencies, had a wider application than he intended; the Ionian Islands, under the Government of Great Britain, were desirous of transferring their allegiance to the Kingdom of Greece, and had the very good plea to offer, that Great Britain did not understand their needs or legislate for them, and their commissioners adroitly applied the language of the English Foreign Secretary as justifying them in making such a transfer; the Irish members of parliament, delighted with their opportunity, made a similar application of it to their own case; and the commissioners from the Confederate States, who had just appeared, hailed it as perfectly *apropos* to their position. Some awkward explanation was necessary, to avoid the dilemma into which the Secretary had fallen; but it was finally accomplished, without satisfying the claimants for its application to their several cases, that it was not intended to have so wide a range as they sought to give it.

The proposition to repeal the duty on paper, made by Mr. Gladstone, the Chancellor of the Exchequer, the preceding year, and then defeated by the House of Lords, was renewed during the session of 1861, and accompanied by a reduction of the income tax one penny on the pound, and the retention of the tea and sugar duties for another year. After a considerable debate, the bill for this purpose passed the House of Commons by a vote of 296 yeas to 281 nays, and the House of Lords without a division.

On the 29th of April, in answer to some inquiries made by Lord Malmesbury, in the House of Lords, Lord Wodehouse stated on behalf of the Government, that her Majesty's Government, after a mature deliberation, had decided not to obtrude advice or counsel on the Government of the United States; and Lord Lyons had been instructed to give no advice unless asked for by the contending parties, but at the same time, to express on every fitting occasion the earnest desire entertained by her Majesty's Government, that the differences between the North and the South might be peacefully arranged.

It became, with each succeeding month, more and more evident, not only that the manufacturing interests of Great Britain were destined to suffer from the want of a supply of cotton, consequent upon the condition of affairs in the United States, but also, that in a variety of ways the country would be involved in difficulties in connection with it.

The Cotton Supply Association, which had been established in 1857, in consequence of the partial failure of the American cotton crop of that year, for the purpose of encouraging the cultivation of cotton in other countries, and especially in India, but which had been nearly paralyzed in its action by the Indian mutiny and war of 1859, was now stimulated to the highest activity. Large quantities of cotton-seed were forwarded to India, Ceylon, South Africa, Egypt, Turkey, various African ports, Australia, the Phillippine Islands, New Zealand, the Mauritius, and the South American States, and measures for the encouragement of the cultivation by securing the tenure of the land to the cultivator, by improving the facilities of transportation, offering bounties, furnishing cotton-gins, &c., were urgently and, in general, successfully pressed on the Colonial Governments. In June, the Secretary of the Association sailed for India, where he remained for some months, superintending measures for a more extended cultivation of cotton there for the succeeding year. (*See COTTON.*)

On the 13th of May, the Queen issued a proclamation, declaring her determination to maintain a strict neutrality between the two contending parties, to both of which the rights of belligerents were to be accorded, and warning her subjects against aiding or assisting either party, as they would thereby throw themselves out of the pale of British protection, and on conviction of such offence would be punished by fine and imprisonment.

A blockade of the ports in the seceded States having been declared by the U. S. Government, and it being evident that strenuous efforts were put forth to make it effectual, the British Government, though strongly solicited to do so, declared that it could not, in accordance with the principles it had hitherto avowed, make any attempt to break the blockade, or encourage or approve of the efforts of its subjects to do so.

In the early part of the year, the cotton of the crop of 1860 had come forward in large quantities, the receipts of the year from the United States being about 1,750,000 bales, which, though less than usual, was, with the increased receipts from other countries, sufficient to supply the manufacturers for a time; but in the summer and early autumn it became evident that little of the crop of 1861 would reach British ports, and in consequence there was a strong manifestation of hostility towards the U. S. Government on the part of the public prints, with a few honorable exceptions, and on the part of a considerable number of members of parliament and men of wealth and position, and reiterated demands were made for the recognition of the Confederate States. These demands were coupled with gross abuse and misrepresentation of the position of the President and Cabinet of the United States, and it was asserted, not without probability, that several of the leading papers of London were in the pay of the Southern Confederacy.

The British Government, however, remained firm against these demands, and though at times indicating a spirit not wholly friendly, yet abstained from any manifestation of sympathy with the hostile disposition of a portion of the press and people.

Matters were in this condition, when two circumstances occurred, which at first seemed likely to precipitate the two countries into an immediate war; these were, the taking, by Com. Wilkes, of the U. S. frigate *San Jacinto*, of Messrs. Mason and Slidell and their secretaries, from the British mail steamer *Trent*, in the Bahama Channel, on the 8th of November, and the countenance and assistance given about the same time, it was said by order of the British Government, to the Confederate privateer steamer *Nashville*, which had entered Southampton harbor for repairs and supplies, after capturing and burning the American merchant ship *Harvey Birch*. Against this assistance and protection the American Minister protested; and the American steam-frigate *Tuscarora*, stationed off the harbor, awaited her coming out, to attack her, but was compelled by British war vessels to give her the advantage of twenty-four hours' start, which, as she was a remarkably swift sailer, of course precluded all hope of her capture.

The capture of Messrs. Mason and Slidell, (*see TRENT and DIPLOMATIC CORRESPONDENCE.*) was regarded by the British Government as equivalent to an invasion of her soil; and though that Government had on previous occasions committed precisely the same offence against vessels of other nations, and notably against those of the United States, it now took the opportunity of demanding the restoration of the parties captured, and an apology for the act. The course pursued by the Government was unquestionably influenced, to some extent, by the clamors of the opposition, who thought they had found in the event an oppor-

tunity for overthrowing the administration, and who denounced the American Government in no measured terms, and demanded immediate preparations for war. The demand for restitution and apology, which was said to have been at first couched in very haughty and menacing language, was, it is asserted, materially modified by the Prince Consort, with the approval of the Queen, and was one of the last acts of that much lamented and excellent personage. As received by the U. S. Government, though somewhat peremptory, it was not wanting in courtesy; its transmission had been accompanied by the forwarding of a body of 13,000 to 14,000 troops to Canada, as if to prepare for immediate war on the frontier.

While, however, the general course of the British Administration towards the U. S. Government had been marked by that dignity and courtesy becoming in such a nation, a painful exception must be made in regard to this affair. Within less than ten days after his knowledge of the capture of Messrs. Mason and Slidell, Mr. Seward, the American Secretary of State, had sent to the American Minister to the Court of St. James, instructions to communicate the fact to Earl Russell, and to inform him of the disposition of the American Government to arrange the affair in such a manner as to obviate any danger of hostilities between the two Governments; yet the ministry kept this fact concealed till the report of the surrender of Messrs. Mason and Slidell reached England, and by their silence and the measures they took, (such as prohibiting the exportation of salt-petre and sulphur, and ordering the putting of the army and navy upon the war footing), they aroused a feeling of hostility between the two countries which far outlasted its occasion.

The proffered surrender of the parties to the British Minister, restored the concord between the two Governments, though not that between the two peoples, and though the year closed with grievous apprehensions on the part of the English people, the early days of the new year brought to them a relief.

In the internal policy of the Government, there had been circumstances of some interest here passed over, in order to give a more connected view of its American policy. Among these might be named the partial famine in Ireland, the result of a failure of the potato crop, which was the subject of governmental investigation, and to some extent relief; the extraordinary increase of organizations of volunteer riflemen, encouraged by the Government, and stimulated by the apprehension of trouble with France in the early part of the year; the large increase of coöperative associations among the workmen of the different towns and cities, promoted by the fear of loss of work by the shortness of the cotton supply; the extensive strikes, especially among the workers in stone, which at one time produced serious trouble among the building fraternity; and the extensive preparations made for the great In-

ternational Exhibition of the present year. The building for this exhibition cost over \$2,000,000, and contained 25½ acres of flooring. The Prince Consort had taken a lively interest in it, and had indeed been the prime mover in the enterprise. Some statistics are subjoined, which indicate the material condition of the British Empire more forcibly than any description can do. The census of the United Kingdom of Great Britain and Ireland was taken on the 8th of April, 1861, and among its results were the following:

TABLE I.—AREA AND POPULATION OF GREAT BRITAIN AND IRELAND.

	Population.	Area in sq. miles.
England and Wales.....	20,061,725	58,820
Scotland.....	3,061,829	21,324
Ireland.....	5,792,025	82,512
Islands in the British seas.....	143,779	394
Out of the country, viz.: Army, navy, and merchant seamen..	803,442	
Total.....	29,862,800	112,550

The population of Ireland had decreased, owing to the large emigration. There were in the United Kingdom twelve cities having above 100,000 inhabitants, and nine of these had above 300,000, while London had a population of 2,861,000.

The other possessions of the British Empire, in Europe, Asia, Africa, America, Australia, and Polynesia, have the following areas and populations, according to the latest census:

British possessions.	Area in sq. miles.	Population.
<i>In Europe:</i>		
Gibraltar.....	1.67	17,750
Malta and Gozzo.....	115	186,271
Heliopolis.....	5.25	2,800
Ionian Islands (under British protectorate).....	1,041	220,736
Total.....	1,162.92	886,557
<i>In Asia:</i>		
Possessions of the late East India Company.....	851,018	185,442,911
Ceylon.....	24,700	1,759,528
Hong Kong.....	29.14	75,508
Labuan.....	50.	1,169
Total.....	875,797.14	187,279,105
<i>In Africa:</i>		
Gambia.....	5,698
Sierra Leone.....	800	38,818
Gold Coast, including Lagos.....	6,000	151,346
Cape Colony.....	104,921	267,096
Natal.....	18,000	121,068
Islands—St. Helena, Mauritius, Seychelles, Aden, &c.....	755?	252,099
Total.....	129,976?	885,650
<i>In America:</i>		
Labrador.....	170,000	5,000
Lower Canada.....	205,860	1,110,664
Upper Canada.....	141,000	1,896,091
New Brunswick.....	27,037	198,500
Nova Scotia and Cape Breton.....	17,846	276,177
Prince Edward Island.....	2,173	71,496
Newfoundland.....	36,000	119,334
British Columbia.....	222,080	64,000
Vancouver's Island.....	17,256	25,000
Bermudas.....	20	11,092

British possessions.	Area in sq. miles.	Population.

The budget of Mr. Gladstone, for the year ending April 1, 1862, was as follows :

TABLE II.—FINANCES OF GREAT BRITAIN.

<i>Receipts.</i>	
Customs.....	£28,585,000
Excise.....	19,463,000
Stamps.....	8,460,000
Income tax.....	8,150,000
Other taxes.....	11,200,000
Post-office revenue.....	3,500,000
Crown lands.....	295,000
Miscellaneous receipts.....	2,200,000
Total.....	£71,853,000
Or.....	\$359,265,000
<i>Expenditure.</i>	
Interest on the floating and consolidated debt.....	£26,180,000
Charges on the consolidated funds.....	1,930,000
Army and militia.....	15,256,000
Navy.....	12,029,000
Coast guard.....	995,000
Civil service.....	7,737,000
Cost of collection.....	4,750,000
War in Australia and China.....	1,000,000
Total.....	£69,907,000
Or.....	\$389,535,000
The debt of Gt. Britain was in 1860—	
Funded debt.....	£742,936,057
Unfunded debt.....	16,225,300
Irish debt.....	43,025,908
To which is added the Indian debt.....	80,453,765
And a pledge for the capital of the old East In- dia Company and railroad guaranties.....	12,000,000
Total.....	£894,644,060
Or.....	\$4,473,220,300

TABLE III.—ENGLISH ARMY FOR 1861-'2.

<i>Cavalry, including Life-Guards, Horse-Guards, and cavalry of the line :</i>	
Commissioned officers.....	677
Subalterns and soldiers.....	11,433
Horses.....	7,626

NAVY, April, 1861.

Total number of vessels afloat and building..	893
Of which were steam-vessels of the line, all screw-propellers.....	67
Frigates, three of them screw, the remainder paddle.....	52
Floating batteries, all screw-propellers.....	8
Gunboats, all screw-propellers.....	4
Corvettes, small gunboats, sloops, &c., all, or nearly all, propellers.....	365
Transport ships, all screw-propellers.....	66
Total.....	562
<i>Sailing vessels, viz. :</i>	
Ten line ships, 17 frigates, 18 sloops, 1 small ship, 83 sailing gunboats, in all.....	129
Total.....	691

The remaining 202 are storeships, hulks, &c., unfit for service. The number of guns in the whole fleet is 16,411, of which the steam vessels carry 11,137, and the sailing vessels 5,274. Of the whole number, 170 steam gunboats, and 147 sailing vessels are for port and coast-guard service.

There were, at the close of 1861, 4 iron-plated ships completed, and 11 more in process of construction. These were of five classes. The first class were to be 400 feet long, 6,621

tons burthen, to be fully plated, and were expected to attain a speed of 14 knots an hour; none of them are yet completed. The second class, of which the Warrior, Achilles, and the Black Prince are completed, are partially plated, and have a speed of 14 knots. The third class are 4,060 tons burthen, with a speed of 12 knots. They are fully plated. The fourth class are 3,668 tons, fully plated, and will have a speed of 11.45 knots. The fifth class were begun as wooden line-of-battle ships, but are to be fully plated. Their tonnage is 4,045 tons. Two of them have engines of 1,000 horse-power, and are expected to make 12.41 knots an hour; the other two have engines of 800 horse-power, and will have a speed of 11½ knots.

The Railways of Great Britain.—The following statistics of British railways give some idea of the magnitude of the railway interest. The number of miles of rail track is, in round numbers, 10,000; the number of employées 100,000; the capital invested, \$1,750,000,000; the annual revenue, \$140,000,000. The number of locomotives is 6,000; of passenger cars, 15,000; of freight cars and trucks, 180,000. The number of miles run in 1861, 195,000,000; the number of cattle and other animals conveyed, 12,600,000; the amount of freight, 90,000,000 tons, for the carriage of which \$75,000,000 was paid.

Factory Statistics of Great Britain and Ireland.—In 1861, there were in the United Kingdom 6,378 factories, containing 36,450,000 spindles, and 490,866 power looms, which required the services of 230,564 hand-loom weavers. The whole number of hands employed in these factories was 775,534, of whom 308,273 were males, and 467,261 females; an average of 121 hands to each factory. The aggregate power required for driving the machinery was 404,633 horse-power. In England and Wales there were 5,652 factories, employing 642,607 hands; in Ireland, 158 factories, employing 37,872 persons; in Scotland, 568 factories, with 95,055 operatives. Lancashire is the great manufacturing hive of England, having 2,144 factories, 22,067,703 spindles, and 363,531 power-looms.

Newspaper Statistics of the British Isles.—At the close of the year 1861, there were published in the United Kingdom 1,165 newspapers, a little more than double the number published in 1851. Of these, 845 were issued in England; 33 in Wales; 139 in Scotland; 134 in Ireland; 14 in the islands of the British Seas. In England there were 43 daily papers; 1 in Wales; 9 in Scotland; 16 in Ireland; and 2 in the British Islands. Beside these, there are 516 magazines and reviews, of which 213 are of a decidedly religious character.

Importation of Cotton in 1861.—The following table gives the entire importation of cotton into the United Kingdom during the year 1861, distinguishing the countries from which it was imported. The whole quantity was equivalent to 2,809,277 American bales:

	Cwt.
Russia (southern ports).....	4

GREAT EASTERN, STEAMER. This steamer was built at London and launched in the year 1859. She is estimated at 20,000 tons burthen, and is propelled by paddles on her sides and a screw at her stern. Her hull is made of iron; her masts are iron cylinders, and her main shrouds are composed of iron wire. Her length is 680 feet, and the breadth of beam 82½ feet.

This great ship, after leaving the Mersey, England, about 4 o'clock in the afternoon of Tuesday the 10th of September, bound to New York, proceeded all well until the afternoon of

the following Thursday, by which time she was about 280 miles westward of Cape Clear. Then she was met by a fresh breeze, which speedily swelled into a hurricane of most destructive violence, yet seemingly but partial in its range.

At this time one of the forward boats broke from one of her davits, and hung suspended from the other. Efforts were made to secure the boat, but these proving unavailing, the captain ordered it to be cut away, at the same time directing the paddles to be stopped and the helm to be put down, to bring the ship up in the wind, in order that the boat might drift clear of the wheel. The vessel did not answer her helm, but the boat fortunately went clear. The captain then directed several of the head sails to be hoisted for the purpose of bringing her head up, but they had hardly been set when they were blown to ribbons. Very shortly after that a terrific noise was heard in the engine-room, and on looking down, several large sheets of lead were seen knocking about with great violence from side to side. Just then a heavy sea struck the ship as she was lurching, and almost immediately after a grating noise was heard in the paddles. On examination, it was found that they were bent from their true position, and were scraping against the sides of the vessel. They, however, still continued to revolve, but the captain, fearing that they would tear holes in the sides of the ship, ordered them to be stopped, and trusted entirely to the screw to get the vessel on. During the whole of the remainder of the day the gale blew fearfully, the sea running mountains high, and the ship, not being able to head to, rolling frightfully. Things thus continued until the following morning, when it was found that the paddles had been broken clean away. It was at the same time discovered that the top of the rudder-post, a piece of iron 10 inches in diameter, had been smashed. The ship now lay quite helpless, like a log on the water, and tossing and rolling in the most alarming manner. On many occasions her decks were at an angle of 45 degrees. Crockery and culinary utensils went crashing about in all directions, chairs and tables were broken to pieces, chandeliers and mirrors were smashed to fragments, and the whole interior of the vessel presented one scene of utter confusion. Six of her boats were swept away, and two of those remaining were stove so as to be rendered completely useless. On Friday an attempt was made to turn the ship's head by the well-known device of throwing overboard a heavy spar with a hawser attached to each end, the two hawsers being brought up on opposite sides of the vessel. This was found to be entirely useless. On Saturday, after a thorough examination of the working parts of the rudder and the fracture of the post, Mr. Hamilton E. Towle, a civil engineer of Boston, Mass., a passenger, suggested a plan for working the rudder and controlling the vessel.

The rudder of the Great Eastern weighs 30

tons, and instead of being attached to the ship in the ordinary way, by pintles, it is supported by a collar resting upon friction rollers, the lower end being stepped in a shoe which extends backwards from the bottom of the vessel. The arrangement is represented in the accompanying engravings, *a* being the rudder post of wrought iron, 10 inches in diameter, and *c* the supporting collar. This collar is of cast iron, and consists of a central sleeve fitting upon the rudder-post; a flat bottom plate, with a groove for the rollers, and six radiating flanges, 2 inches in thickness. It is 18 inches in height, of conical form, pretty closely resembling in shape a church bell. This conical collar is keyed to the rudder stem and secured by a massive nut, 15 inches in diameter and 12 inches in length, which is screwed on the post above the collar. It was just above this nut that the rudder stem was broken, the fracture extending downward into the nut. The idea occurred to Mr. Towle, that a large chain-cable might be wrapped around the collar and connected with pulleys, and in this way the rudder might be controlled. The objection to this plan was the small size of the collar, (2 feet 9 inches in diameter at the base and 15 inches at the top,) giving a very short lever to resist the tremendous power of the waves against the broad rudder. This difficulty he proposed to overcome by wrapping successive coils of cable around the collar until he had obtained a diameter sufficient to give him the leverage required. He examined the collar to see if the cable could be secured to it, and fortunately found holes some 3 inches in diameter through the bottom plate—a hole between each pair of the radial flanges. The plan formed was to place one end of each alternate link of a heavy cable between each pair of the radial flanges of the collar, and secure the link in place by lashing it with a smaller chain passed repeatedly through the holes and around the flange and link. He measured the several parts and then went down into the hold and measured the largest cable. The tiller was 18 feet long, and the chain provided to operate it was $\frac{1}{2}$ the size of the main cable, requiring a drum 4 feet in diameter, in order to give a length of lever proportioned to the strength of the cable. A drawing of the plan was prepared and submitted to the officers of the ship, and although opposed by the engineer, he was authorized by Capt. Walker to proceed with his efforts.

It was 5 o'clock in the evening when his operations commenced, the awful scenes on board the wallowing ship having continued for more than two days and nights. The first step was to screw back the nut to its place, which the engineer had attempted to remove for the purpose of securing the lower tiller to the rudder-post in its place. There was a wrench on board fitted to the nut, having projections for entering holes drilled in the periphery of the nut. In conformity with all the proportions of the great ship, so massive was this wrench

that, in order to handle it, it had to be slung by ropes from a timber overhead. Mr. Towle had the wrench swung in a proper position, with its outer end firmly lashed in place, and then as the rudder was turning the proper way the wrench was pushed into its hold on the nut, when the onward turning of the rudder screwed the post up through the nut. As the rudder started to turn back in the opposite direction the wrench was removed. By three hours' labor in this manner the nut was screwed back to its place, the last turn carrying away the lashings, and sending the wrench rattling along the iron deck. Meantime, Capt. Walker had accomplished the great task of moving the massive cable back to the stern. A hole was cut in the upper deck, the cable passed down, and then commenced the difficult labor of winding it upon the collar.

Besides the rolling of the ship, the rudder was constantly beaten by the waves, turning the collar back and forth with resistless power, and thrashing the massive cable about the iron deck. The chain, too, was enormously heavy, each link weighing some 60 pounds. But the strength, courage, and devotion of the men, overcame all obstacles. The first coil around the collar was secured by lashings of smaller chains, these being passed through the holes in the bottom plate and around the flanges till the holes were filled with the chains. The second coil was secured in the same thorough manner to the first, and the third to the second, till a mass of chain, about 4 feet in diameter, was bound around the rudder. The ends of the cable were now carried around the two stout posts or bits, *b b*, figs. 1 and 2, which were provided for holding the stern cable in mooring

Fig. 1.

TEMPORARY STEERING APPARATUS OF THE GREAT EASTERN.

the ship, and connected with tackle for taking up the slack, while smaller chains attached to the two parts of the cable leading from the rudder-post were connected through the tackle, *d d*, with the steering gear of the lower tiller.

At 3 A. M., Mr. Towle informed the engineer that he was ready to steer the ship, and requested that steam might be put on, and the screw turned. But all of the next day was lost in waiting for the engineer to test another plan of his own. This was a failure and all the labor was lost. It was then 5 o'clock in the afternoon, and the captain was again requested by Mr. Towle to order a few turns at least to be given to the screw. The order was given, and the great ship moved off, again under the

perfect control of her commander's will. She swept around in a graceful circle, and then took up her course for Queenstown.

The paddle wheels being destroyed by the waves, the vessel was propelled by the screw alone, but she moved steadily on her course, and made nine knots an hour. During the voyage the steering apparatus required constant attention, great care being needed, especially to take up the slack in the main cable. If this became loose, a sudden turn of the rudder would snap off the smaller chain connected with the steering tackle, as if it were a piece of pack thread. The vessel arrived off Queenstown on Tuesday afternoon at 4 o'clock. On the arrival of the vessel, a meeting of the pas-

sengers was held, and resolutions passed complimentary to Mr. Towle, to whom also a gold watch was presented.

GREBLE, JOHN TROUT, an officer of the U. S. army, born in Philadelphia, Jan. 19, 1834, and killed in the battle of Great Bethel, Virginia, June 10, 1861. He acquired his early education at the Ringgold Grammar School and the Central High School of his native city, receiving his bachelor's degree at the latter in 1850, and immediately entered the U. S. Military Academy at West Point, where he graduated in 1854, with high rank in his class. On his graduation he was immediately commissioned as brevet second-lieutenant in the second artillery, and stationed at Newport, R. I. In September of the same year he was made second-lieutenant and sent to Tampa, Florida, where he served in the Indian troubles for two years, when he was compelled, in consequence of a severe fever, to return home on sick leave; but in the beginning of 1856 resumed his duties,

acting a part of the time as quartermaster and commissary till Dec. 1856, when he was appointed acting-assistant professor of Ethics in the Military Academy, the duties of which professorship he performed with credit and success till Oct. 1860, when, at his own request, he was detailed for active duty at Fortress Monroe. There he rendered efficient service in preventing the seizure of the fortress. On the 26th of May, 1861, he was sent to Newport News as master of ordnance, superintended the fortification of that point, and trained the volunteers to artillery practice. When the disastrous expedition to Great Bethel was planned, he was unexpectedly detailed to accompany it with two guns, and though in his own judgment it was ill-advised, and would probably prove fatal to him, he did not hesitate, but took an active part in its duties, and when the Federal troops were repulsed, by his admirable management of his guns, protected them from pursuit and utter annihilation. Just at the close of the action, when he had given the order to withdraw from the field he was struck by a cannon ball on the right temple and instantly killed.

GREENBRIER RIVER. On this river, in Pocahontas Co., Western Virginia, 13 miles from Cheat Mountain summit, and the same distance from Monterey, at the point where the Staunton turnpike ascends the Alleghany Mountains, the Confederates had an advanced camp after their flight from Tygart's Valley. Their force was said to be about 9,000, with about 5,000 near by as a reserve. Brig.-Gen. J. J. Reynolds, with a force of about 5,000 Federal troops, left his camp on Cheat Mountain summit at midnight of Oct. 2, to make an armed reconnoissance of this camp. They reached it shortly after daylight, drove in the Confederate pickets, and advanced regiments approached to within 700 yards of his intrenchments, and opened fire. A battle followed of about 4 hours' duration. The Confederate force at the camp were driven from their guns, three of which were disabled, and lost heavily in killed and wounded; their reserve came up after the action had continued about two hours, and, thus reënforced, they maintained their position behind their fortifications, but did not sally out to attack the Federal troops. Gen. Reynolds, finding his ammunition exhausted, and having accomplished his purpose, withdrew in perfect order, without being pursued, and returned the same night to his camp. The Federal loss was 8 killed and 32 wounded. The Confederate loss was much larger, and was estimated by Gen. Reynolds as at least 300. Gen. Reynolds brought away 13 prisoners, and completely disabled 3 of the Confederate guns.

GUYANDOTTE is a village in Cabell County, Virginia, situated on the Ohio River, at the mouth of the Guyandotte, 228 miles below Wheeling, and 360 miles west by north from Richmond. It contains from 1,000 to 1,500 inhabitants. A small body of Federal troops occupying the place were attacked by a con-

siderable Confederate force on the night of Nov. 10th. The Federal force consisted of 250 men, belonging to a Western Virginia regiment, and a few of Col. Zeigler's Fifth Virginia Volunteers. A plot was contrived between the Confederate force in the vicinity and some of the inhabitants of the town, who were their friends, to capture or destroy the Federal force. Accordingly, the latter were kindly received by these citizens, and invited to their houses on various pretexts. Those not on duty accepted the invitations. Meanwhile a body of Confederate cavalry made a dash upon the town. Sig-

nals were displayed from the houses in which were the Federal soldiers, who were immediately attacked and killed. Many of these friends of the Confederate troops seized their arms and aided in the slaughter. Most of those who were killed were the unarmed men. Only 50 of the Federal force escaped, the remainder were either killed or taken prisoners. Col. Zeigler, with a Federal force, arrived soon after, and upon learning the facts, ordered the town to be set on fire. Between 15 and 20 of the most valuable stores and dwellings were burned.

H

HABEAS CORPUS. This is the title given to a writ issued out of the higher courts of a State, or of the United States, directed to some person who holds, or is supposed to hold in his custody or possession, the body of another person, and commanding him to produce the body of such prisoner, with the day and cause of his capture and detention, to do, submit to, and receive whatsoever the Judge or Court awarding such writ shall consider in that behalf. The privilege of the writ of *habeas corpus* consists in the advantage or privilege to the prisoner of being brought at once before a competent tribunal, and having the cause of his detention inquired into. If such imprisonment is without sufficient legal cause, he is at once set at liberty. The eloquence and learning of the legal profession have been lavished upon this process, as constituting the great bulwark of individual freedom. During the year, a large number of citizens were arrested and imprisoned by order of the Federal Government, without the usual process of law, and whenever the bodies of these prisoners were demanded under a writ of *habeas corpus*, the delivery of them was refused. It is the province of this volume to state the action of the Government and the principles which it avowed, leaving to technical works the discussions of the questions involved.

The Constitution of the United States provides that "the privilege of the writ of *habeas corpus* shall not be suspended unless when, in cases of rebellion or invasion, the public safety may require it." Which department of the Government has the power to suspend this privilege, is the question at issue. What was done is hereafter stated.

On the 25th of May, John Merryman, a most respectable citizen of the State of Maryland, was arrested at his residence, at Hayfields, Baltimore County, and conveyed to Fort McHenry, near Baltimore, and imprisoned. On the same day he prepared a petition to the Chief-Justice of the United States, Roger B. Taney, who resides at Baltimore, praying that a writ of *habeas corpus* might issue, &c. The petition, briefly stating all the details of the arrest, was as follows:

To the Hon. Roger B. Taney, Chief-Justice of the Supreme Court:

The petition of John Merryman, of Baltimore County, and State of Maryland, respectfully shows that, being at home in his own domicile, he was, about the hour of two o'clock A. M. on the 25th of May, A. D. 1861, aroused from his bed by an armed force, pretending to act under military orders, from some person to your petitioner unknown: that he was by the said armed force deprived of his liberty by being taken into custody and removed from his said house to Fort McHenry, near to the City of Baltimore, and in the district aforesaid, and where your petitioner now is in close custody.

That he has been so imprisoned without any process or color of law whatsoever, and that none such is pretended by those who are thus detaining him, and that no warrant from any court, magistrate, or other person having legal authority to issue the same exists to justify such arrest, but, to the contrary, the same, as above is stated, hath been done without color of law and in violation of the Constitution and laws of the United States, of which he is a citizen.

That since his arrest he has been informed that by some order purporting to come from one General Keim, of Pennsylvania, to the petitioner unknown, directing the arrest of the captain of some company in Baltimore County, of which company the petitioner never was and is not captain, was the pretended ground, as he believes, on which he is now detained.

That the person now so detaining him and holding him at said fort is Brigadier-General George Cadwalader, military commander of said fort, professing to act in the premises under or by order of the United States.

The petitioner, therefore, prays that the writ of *habeas corpus* may issue, to be directed to the said George Cadwalader, commanding him to produce your petitioner before you, Judge as aforesaid, with the cause, if any, for his arrest and detention, to the end that your petitioner be discharged and restored to liberty, and as in duty, &c. JOHN MERRYMAN.

FORT MCHENRY, May 25, 1861.

This was laid before Chief-Justice Taney with the affidavits of the prisoner's counsel, and the following writ was issued on Sunday and served on General Cadwalader:

THE UNITED STATES OF AMERICA, }
Department of Maryland, to wit. }

To General George Cadwalader, greeting:

You are hereby commanded to be and appear before the Hon. Roger B. Taney, Chief-Justice of the Supreme Court of the United States, at the United States Court room, in the Masonic Hall, in the City of Baltimore, on Monday, the 27th day of May, 1861, at 11 o'clock in the morning, and that you have with you the body of John Merryman, of Baltimore County, and now in your custody, and that you certify and make known the day and cause of the capture and detention of the said John Merryman; and that you, then and there, do

submit to and receive whatever the said Court shall determine upon concerning you on their behalf, according to law, and have you then and there this writ.

Witness the Hon. Roger B. Taney, Chief-Justice of the Supreme Court, the fourth Monday in May, in the year of our Lord 1861.

THOMAS SPICER, Clerk Circuit Court.

Issued 26th May, 1861.

On Monday Colonel Lee appeared in Court, and stated that he was instructed by General Cadwalader to present to the Chief-Justice the annexed response to the writ, expressing, at the same time, the regret of General Cadwalader that pressing duties in connection with his command prevented him appearing before the Court in person. Colonel Lee then read as follows:

HEAD-QUARTERS DEPARTMENT OF ANNAPOLIS, {
FORT McHENRY, May 25, 1861. }

To the Hon. Roger B. Taney, Chief-Justice of the Supreme Court of the United States, Baltimore, Md.:

Sir: The undersigned, to whom the annexed writ of this date, signed by Thomas Spicer, Clerk of the Supreme Court of the United States, is directed, most respectfully states—

That the arrest of Mr. John Merryman, in the said writ named, was not made with the knowledge or by his order or direction, but was made by Col. Samuel Yohe, acting under the orders of Major-General Wm. H. Keim, both of said officers being in the military service of the United States, but not within the limits of his command.

The prisoner was brought to this post on the 20th instant by Adjutant James Wittmore and Lieut. Wm. H. Abel, by order of Colonel Yohe, and is charged with various acts of treason, and with being publicly associated with and holding a commission as lieutenant in a company having in their possession arms belonging to the United States, and avowing his purpose of armed hostility against the Government.

He is also informed that it can be clearly established that the prisoner has made often and unreserved declarations of his association with this organized force, as being in avowed hostility to the Government, and in readiness to cooperate with those engaged in the present rebellion against the Government of the United States.

He has further to inform you that he is duly authorized by the President of the United States in such cases to suspend the writ of *habeas corpus* for the public safety. This is a high and delicate trust, and it has been enjoined upon him that it should be executed with judgment and discretion, but he is nevertheless also instructed that in times of civil strife, errors, if any, should be on the side of safety to the country.

He most respectfully submits to your consideration that those who should cooperate in the present trying and painful position in which our country is placed, should not, by reasons of any unnecessary want of confidence in each other, increase our embarrassments. He therefore respectfully requests that you will postpone further action upon the case until he can receive instructions from the President of the United States, when you shall hear further from him.

I have the honor to be, with high respect, your obedient servant,

GEO. CADWALADER,

Brevet Major-General U. S. Army, commanding.

On finishing the reading of the reply of General Cadwalader, Colonel Lee was preparing to leave the Court, when the following interrogatories were put to him by the Chief-Justice:

Chief-Justice—Have you brought with you the body of John Merryman?

Colonel Lee—I have no instructions except to deliver this response to the Court.

Chief-Justice—The commanding officer declines to obey the writ?

Colonel Lee—After making that communication my duty is ended and my power is ended. [Rising and retiring.]

Chief-Justice—The Court orders an attachment to issue against George Cadwalader for disobedience to the high writ of the Court.

Subsequently, the Chief-Justice wrote and delivered to the clerk the following order:

Ordered, That an attachment forthwith issue against General George Cadwalader for a contempt in refusing to produce the body of John Merryman according to the command of the writ of *habeas corpus* returnable and returned before me to-day, and that said attachment be returned before me at twelve o'clock to-morrow, at the room of the Circuit Court.

ROGER B. TANEY.

MONDAY, May 27, 1861.

The Court then adjourned until Tuesday morning.

At 12 m. on Tuesday the Chief-Justice entered the Court, and took his seat upon the bench. The special proceedings of the day were then entered upon, and the following colloquy ensued:

Chief-Justice Taney—Marshal, have you the return, sir?

United States Marshal Bonifant, rising, handed to the Chief-Justice a folded paper, which the latter, after opening, transferred to Mr. Spicer, the Clerk of the Court.

Chief-Justice—Mr. Spicer, read this; read it aloud.

The Clerk then read the writ of attachment, and the Marshal's return thereto, as follows:

THE UNITED STATES OF AMERICA, {
DISTRICT OF MARYLAND, TO WIT. }

To the Marshal of the Maryland District, Greeting:

We command you that you attach the body of General George Cadwalader and him have before the Hon. Roger B. Taney, Chief-Justice of the Supreme Court of the United States, on Tuesday, the 28th of May, 1861, at 12 o'clock m., at the Circuit Court rooms of the United States, in the City of Baltimore, to answer for his contempt by him committed, in refusing to produce the body of John Merryman, of Baltimore County, according to the command of the writ of *habeas corpus* returnable, and returned before the said Chief-Justice, this 27th day of May, 1861. Hereof you are not to fail, and have you then and there this writ.

Witness, the Hon. Roger B. Taney, Chief-Justice of the Supreme Court, the first Monday in December, in the year of our Lord, 1861.

THOMAS SPICER, Clerk.

Issued 27th May, 1861.

I hereby certify to the Honorable Roger B. Taney, Chief-Justice of the Supreme Court of the United States, that by virtue of the within writ of attachment, to me directed on the 27th day of May, 1861, I proceeded on the 28th day of May, 1861, to Fort McHenry, for the purpose of serving the said writ. I sent in my name at the outer gate; the messenger returned with the reply "that there was no answer to my card," and therefore could not serve the writ as I was commanded. I was not permitted to enter the gate. So answers

WASHINGTON BONIFANT,

U. S. Marshal for the District of Maryland.

Chief-Justice Taney—Then no answer has been made to the writ?

Deputy Marshal Vance—There was no reply, sir, except that "there was no reply to my card." I was not permitted to enter the outer gate.

Chief-Justice Taney—Well, you should state that. The fact does not appear in your return.

The Deputy Marshal amended the return in compliance with the suggestion, and, handing the paper to the Chief-Justice, the latter proceeded to read from the manuscript the subjoined remarks, previously say-

ing, it is a plain case, gentlemen, and I shall feel it my duty to enforce the process of the Court.

I ordered the attachment yesterday, because upon the face of the return the detention of the prisoner was unlawful upon two grounds.

1. The President, under the Constitution and laws of the United States, cannot suspend the privilege of the writ of *habeas corpus*, nor authorize any military officer to do so.

2. A military officer has no right to arrest and detain a person, not subject to the rules and articles of war, for an offence against the laws of the United States, except in aid of the judicial authority and subject to its control; and if the party is arrested by the military, it is the duty of the officer to deliver him over immediately to the civil authority, to be dealt with according to law.

I forbore yesterday to state orally the provisions of the Constitution of the United States which make these principles the fundamental law of the Union, because an oral statement might be misunderstood in some portions of it, and I shall therefore put my opinion in writing, and file it in the office of the Clerk of the Circuit Court, in the course of this week.

After reading the above, the Chief-Justice orally remarked:

In relation to the present return, I propose to say that the Marshal has legally the power to summon out the *posse comitatus* to seize and bring into Court the party named in the attachment; but it is apparent he will be resisted in the discharge of that duty by a force notoriously superior to the *posse comitatus*, and, such being the case, the Court has no power under the law to order the necessary force to compel the appearance of the party. If, however, he was before the Court, it would then impose the only punishment it is empowered to inflict—that by fine and imprisonment.

Under these circumstances the Court can barely say, to-day, I shall reduce to writing the reasons under which I have acted, and which have led me to the conclusions expressed in my opinion, and shall report them with these proceedings to the President of the United States, and call upon him to perform his constitutional duty to enforce the laws; in other words, to enforce the process of this Court. That is all this Court has now the power to do.

After the delivery of this opinion, all further proceedings in the case were suspended, and the court-room was, in a few minutes, vacated by the throng which had occupied it.

The opinion of the Chief-Justice, which was subsequently filed in the office of the Clerk, is devoted to the elucidation of the two positions stated above.

About the 20th of May, Emmett McDonald was arrested by orders of the military commandant at St. Louis, Captain Lyon, and imprisoned. A writ of *habeas corpus* was issued returnable before Judge Trent of the United States District Court. The question raised by the counsel of the respondent was as follows:

Has this Court jurisdiction in a case of *habeas corpus* where the petitioner is in custody under authority of the United States, but not by virtue of any warrant, order, or process of Court, or under a technical "commitment,"—in other words, has a United States District Court or Judge, under the acts of 1789 and of 1833, the power to issue a writ of *habeas corpus*, and examine into the cause of the alleged illegal restraint, unless it appears on the face of the petition that there is such a technical or formal commitment?

In his argument the U. S. District Attorney for the respondent took the position that the petition set forth that the petitioner had been

arrested by a military authority without legal process. He cited precedents that the Court had no jurisdiction in the matter, as the military authority in time of war, or "rebellion," had the power and might arrest persons in array against the Federal Government for treason, or alleged treason.

The Court gave an elaborate opinion, deciding that it had jurisdiction in the case. Meanwhile General Harney, who had returned to the command of the department from Washington, refused to obey the writ, but on a subsequent day applied to the Court for permission to amend his return by saying that the prisoner never had been under his control; but by orders from Washington he had been removed from that military department. This answer was deemed by the Court to be sufficient.

The Circuit Court of the United States, at Washington, at its opening on the second day of the term, Judge Dunlop presiding, received a communication from one of the Assistant Judges, which was read in Court as follows:

On Saturday, the 19th of October, 1861, Mr. Foley, a lawyer of this city, called upon me with a petition, supported by affidavit in proper form, praying for a writ of *habeas corpus* to the Provost-Marshal requiring him to produce before the undersigned one John Murphy, who it alleged was a minor under the age of eighteen years, and illegally detained by said Provost-Marshal as an enlisted soldier of the United States. The order was given by me to the clerk, who issued the writ in the usual form. I was informed by Mr. Foley, on the afternoon of Saturday, that, by reason of the many engagements of the Deputy Marshal of the District of Columbia, he himself took the writ and served it, as by law he rightfully might do, upon the Provost-Marshal, General A. Porter; that when he delivered the writ to the Provost-Marshal he was told by him that he would consult the Secretary, (I think he said the Secretary of State,) whether he should respect the writ or not, and that he (Mr. Foley) must consider himself under arrest, but for the present might go at large as upon his parole.

Later in the afternoon Mr. Foley again called at my house, with one or two other persons—one, I think, was represented as the elder brother or some near relative of the boy Murphy—and desired to know whether he were now to consider the boy as finally discharged and at liberty to return home to his friends, inasmuch as he had then been dismissed from the guard-house. I declined to make any suggestions to him in the premises, and told him that whatsoever I did in the matter must be done judicially, and after facts had been spread before me upon affidavit, and the appropriate motion, if any, made thereon; and that, as the Court would meet on Monday morning, October 21st, in regular term, I should adjourn all proceedings under the writ into Court for the advice and action of the whole Court. He stated that he would reduce all the facts to writing, make affidavit, and file them, for that he expected to be arrested. He then withdrew.

On Monday morning, just before the meeting of Court, I went into the Clerk's office and asked Charles McNamee, the Deputy Clerk, if Mr. Foley had filed any affidavits in the case. He examined the papers and reported there was none. I then directed him to endorse upon the papers that they were by my order adjourned into the Court for its further action.

After the adjournment of the Court I was informed by a member of the bar that about eleven o'clock that morning Mr. Foley had been arrested and placed in the guard-house by order of the Provost-Marshal, and he announced his purpose to apply for his release. I told him that whatever application he had to make must be

in writing, upon proper affidavit, and that, as the whole Court was in regular session, he must make it to the Court in full sitting, and he withdrew to confer with some of his brother lawyers on his course.

After dinner I visited my brother Judges in Georgetown, and returning home between half-past seven and eight o'clock, found an armed sentinel stationed at my door by order of the Provost-Marshal. I learned that this guard had been placed at my door as early as five o'clock. Armed sentries from that time continuously until now have been stationed in front of my house.

Thus it appears that a military officer, against whom a writ in the appointed form of law has issued, first threatened with and afterwards arrested and imprisoned the attorney who rightfully served the writ upon him. He continued and still continues in contempt and disregard of the mandate of the law, and has ignominiously placed an armed guard to insult and intimidate by its presence the Judge who ordered the writ to issue, and still keeps up this armed array at his door, in defiance and contempt of the justice of the land.

Under these circumstances, I respectfully request the Chief-Justice of the Circuit Court to cause this memorandum to be read in open Court, to show the reasons for my absence from my place upon the bench, and that he will cause this paper to be entered at length on the minutes of the Court alongside the record of my absence, to show through all time the reasons why I do not, this 22d of October, 1861, appear in my accustomed place.

WILLIAM M. MERRICK.

Assistant Judge Circuit Court, D. C.

The reading of the communication having been concluded—

Judge Dunlop announced that the two remaining Judges had, after consultation, decided that the letter should be filed as requested by Judge Merrick, and it was so ordered.

They also thought it right, as the writ (of habeas corpus) had been regularly issued, to state that the matter was now before the Court to be tried.

The statement of their brother Judge (he said) presented a case where the progress of law is obstructed. It was the duty of the Court to afford the remedy, and, if the facts are as stated, to cause the law to be respected.

As the Provost-Marshal had obstructed a process of this Court, it would order a rule to be served on Gen. Andrew Porter to appear before the Court, and show cause why an attachment for contempt of Court should not issue against him.

Judge Morsell said that this was a palpable and gross obstruction to the administration of justice, to prevent a judge of this Court from taking his seat, because he issued a writ just such as the law requires. The placing of a sentinel before Judge Merrick's house was evidently for the purpose of embarrassing him in this particular subject, and to prevent his appearance in Court. He (Judge Morsell) would make the rule broader, so as to have Mr. Provost satisfy the Court as to both matters. The Court had its duty to do, a duty the judges are sworn to do, and that duty is the administration of justice according to law.

What is the real state of things? If martial law is to be our guide, we look to the President of the United States to say so. He (Judge Morsell) did not pretend to controvert the right of the President to proclaim martial law, but let him issue his proclamation. The Judges have their duty to do under the law, and they are liable to be punished if they do not do it.

The Judge then spoke of the rule which would be served on the Provost-Marshal, and in conclusion said: "I intend to do my duty, and vindicate the character of this Court as long as I sit here."

A notice was accordingly made out to be served on Gen. Porter, requiring him to appear before the Court on a subsequent day, to show cause why a writ of attachment for a contempt of Court should not issue against him.

On the day appointed, the Court being in session, the Deputy Marshal, Geo. W. Phillips, appeared and presented through the District Attorney the following paper:

To the Honorable the Judges of the Circuit Court of the District of Columbia:

George W. Phillips, in whose hands the rule herein-after mentioned was placed as Deputy Marshal, respectfully represents to your Honors that he did not serve the rule issued by your honorable Court on the 22d day of October, 1861, to be served on Gen. Andrew Porter, Provost-Marshal of said district, because he was ordered by the President of the United States not to serve the same, and to report to your honorable Court that the privilege of the writ of habeas corpus has been suspended for the present, by the order of the President of the United States, in regard to soldiers in the army of the United States within said district; and that he respectfully disclaims all intention to disobey or treat with disrespect the orders of this honorable Court.

GEO. W. PHILLIPS.

District of Columbia, Washington County, to wit:

On this 26th of October, 1861, personally appeared in open Court George W. Phillips above named, and made oath in due form of law that the matters and things stated in the foregoing and annexed answer are true.

GEO. W. PHILLIPS.

Test—Jno. A. SMITH, Clerk.

This return was held under advisement until the 30th of October, when Judge Dunlap announced his decision in the case as follows:

The return made by Deputy Marshal Phillips the 26th of October, 1861, we will order to be filed, though we do not doubt our power to regard it as insufficient in law, and to proceed against the officer who has made it.

The existing condition of the country makes it plain that that officer is powerless against the vast military force of the Executive, subject to his will and order as commander-in-chief of the army and navy of the United States.

Assuming the verity of the return, which has been made on oath, the case presented is without a parallel in the judicial history of the United States, and involves the free action and efficiency of the Judges of this Court.

The President, charged by the Constitution to take care that the laws be executed, has seen fit to arrest the process of this Court, and to forbid the Deputy Marshal to execute it. It does not involve merely the question of the power of the Executive, in civil war, to suspend the great writ of freedom—the habeas corpus. When this rule was ordered to give efficiency to that writ, no notice had been given by the President to the courts or the country of such suspension here, now first announced to us, and it will hardly be maintained that the suspension could be retrospective.

The rule in this case, therefore, whatever may be the President's power over the writ of habeas corpus, was lawfully ordered, as well as the writ on which it was founded. The facts on which the rule was ordered by the Court are assumed to be true as respects the President, because the President had them before him, and has not denied them, but forbade the Deputy Marshal to serve the rule on Gen. Andrew Porter.

The President, we think, assumes the responsibility of the acts of Gen. Porter set forth in the rule, and sanctions them by his orders to Deputy Marshal Phillips not to serve the process on the Provost Marshal.

The issue ought to be and is with the President, and we have no physical power to enforce the lawful process of this Court on his military subordinates against the President's prohibition.

We have exhausted every practical remedy to uphold the lawful authority of this Court.

It is ordered, this 30th day of October, 1861, that this opinion of the Court be filed by the Clerk, and made part of the record, as explaining the grounds on

which we now decline to order any further process in this case.

Judge Morsell, the Associate Judge then on the bench, submitted the following:

As a member of this Court, and on its behalf, I wish it understood that, notwithstanding the blow levelled at this Court, I do distinctly assert the following principles:

1st. That the law in this country knows no superior.

2d. That the supremacy of the civil authority over the military cannot be denied; that it has been established by the ablest jurists, and, I believe, recognized and respected by the great Father of the Country during the Revolutionary War.

3d. That this Court ought to be respected by every one as the guardian of the personal liberty of the citizen, in giving ready and effectual aid by that most valuable means, the writ of habeas corpus.

4th. I therefore respectfully protest against the right claimed to interrupt the proceedings in this case.

This opinion of Judge Morsell was also ordered to be placed on the record.

A writ of habeas corpus was also issued by Judge Garrison of Brooklyn, N. Y., and served upon the officer in charge of the prisoners at Fort Lafayette, commanding that one of them should be brought before him, but without any success.

The declarations of the Government coincide with the evidence of these facts.

On the 5th of July, Attorney-General Bates prepared an opinion, at the request of the President, on the suspension of the privilege of the writ of habeas corpus. He commences his opinion with these words:

SIR: You have required my opinion in writing upon the following questions:

I. In the present time of a great and dangerous insurrection, has the President the discretionary power to cause to be arrested and held in custody persons known to have criminal intercourse with the insurgents, or persons against whom there is probable cause for suspicion of such criminal complicity?

II. In such cases of arrest, is the President justified in refusing to obey a writ of habeas corpus issued by a court or a judge, requiring him or his agent to produce the body of the prisoner, and show the cause of his caption and detention, to be adjudged and disposed of by such court or judge?

Both questions were answered in the affirmative by the Attorney-General. The basis of his argument is in these words:

To make my answer to these questions at once consistent and plain, I find it convenient to advert to the great principle of government as recognized and acted upon in most, if not all, the countries in Europe, and to mark the difference between that principle and the great principle which lies at the bottom of our National Government.

Unity of power is the great principle recognized in Europe; but a plan of "checks and balances" forming separate departments of government, and giving to each department separate and limited powers, has been adopted here. These departments are co-ordinate and co-equal; that is, neither being sovereign, each is independent in its sphere, and not subordinate to the others, either of them or both of them together. If one of the three is allowed to determine the extent of its own powers, and that of the other two, that one can in fact control the whole government, and has become sovereign. The same identical question may come up legitimately before each one of the three departments, and be determined in three different ways, and each decision stand irrevocable, binding upon the parties to each case, for the simple reason that the departments are

co-ordinate, and there is no ordained legal superior with power to revise and reverse their decision. To say that the departments of our Government are co-ordinate, is to say that the judgment of one of them is not binding upon the other two, as to the arguments and principles involved in the judgment. This independence of the departments being proved, and the Executive being the active one, bound by oath to perform certain duties, he must be, therefore, of necessity, the sole judge both of the exigency which requires him to act, and of the manner in which it is most prudent for him to employ the powers intrusted to him, to enable him to discharge his constitutional and legal duty. Such is the outline of the preliminaries upon which this opinion rests.

When it first became evident that the Government would arrest citizens, and refuse the privilege of the writ of habeas corpus, consternation seized the public. What constitutes treason, and what rules will control the action of the Government in ordering the arrest of any individuals, became at once most important questions. The clause of the Constitution of the United States relating to treason is in these words: "Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act, or confession in open court."

The following letter from the Secretary of State, Mr. Seward, to the agent of the New York and Virginia steamship company, G. Heineken, furnishes an official statement of the views of the Government relative to the particular act to which it refers:

DEPARTMENT OF STATE, }
WASHINGTON, May 16, 1861. }

SIR: I have received your letter of yesterday's date, asking me to give you in writing my reasons for considering an acceptance on your part of Governor Letcher's proposition to purchase the steamships Yorktown and Jamestown, recently seized by his orders, and now in his possession, an act of treason. With this request I readily comply.

An insurrection has broken out in several of the States of this Union, including Virginia, designed to overthrow the Government of the United States. The executive authorities of that State are parties to that insurrection, and, so, are public enemies. Their action in seizing or buying vessels to be employed in executing that design is not merely without authority of law, but is treason. It is treason for any person to give aid and comfort to public enemies. To sell vessels to them which it is their purpose to use as ships-of-war, is to give them aid and comfort. To receive money from them in payment for vessels which they have seized for those purposes, would be to attempt to convert the unlawful seizure into a sale, and would subject the party so offending to the pains and penalties of treason, and the Government would not hesitate to bring the offender to punishment.

I am, sir, your obedient servant,

WILLIAM H. SEWARD.

To G. HEINEKEN, Esq.

On the 17th of August Mr. Seward writes to Mr. Adams, the American Minister at London, as follows:

On the 5th instant I was advised by a telegram from Cincinnati that Robert Muir, of Charleston, was on his way to New York to embark at that port for England, and that he was a bearer of despatches from the usurping insurrectionary authorities of Richmond to

Earl Russell. Other information bore that he was a bearer of despatches from the same authorities to their agents in London. Information from various sources agreed in the fact that he was travelling under a passport from the British Consul at Charleston.

Upon this information I directed the police at New York to detain Mr. Muir and any papers which might be found in his possession until I should give further directions. He was so detained, and is now in custody at Fort Lafayette, awaiting full disclosures. In his possession were found seventy letters, four of which were unsealed, and sixty-six sealed. There was also found in his possession a sealed bag, marked "Foreign Office, 3," with two labels, as follows: "On Her Brit. Maj. service. The Right Honorable the Lord John Russell, M. P., &c., &c., &c. Despatches in charge of Robert Mure, Esq.," signed Robert Bunch. "On Her Brit. Maj. service. The Right Honorable the Lord John Russell, M. P., H. B. M.'s Principal Secretary of State for Foreign Affairs, Foreign Office, London, R. Bunch." The bag bears two impressions of the seal of office of the British consul at Charleston, and seems to contain voluminous papers.

There were also found upon Mr. Muir's person, in an open envelope, what pretends to be a passport. Also a letter of introduction.

There were also found several unsealed copies of a printed pamphlet, entitled "A narrative of the battles of Bull Run and Manassas Junction, July 18th and 21st. Accounts of the advance of both armies, the battles and rout of the enemy, compiled chiefly from the detailed reports of the Virginia and South Carolina press; Charleston, Steam Power Presses of Evan & Coggeswell, No. 3 Broad, and 103 East Bay streets, 1861." This pamphlet is manifestly an argument for the disunion of the United States. Several copies of it were found addressed to persons in England.

The marks and outward appearance of the bag indicate that its contents are exclusively legitimate communications from the British consul at Charleston to H. B. M.'s Government. Nevertheless, I have what seem to be good reasons for supposing that they may be treasonable papers, designed and gotten up to aid parties engaged in arms for the overthrow of this Government, and the dissolution of the Union. These reasons are: 1st. That I can hardly conceive that there can be any occasion for such very voluminous communications of a legitimate nature being made by the consul at Charleston to his Government at the present time. 2d. Consuls have no authority to issue passports, the granting of them being, as I understand, not a consular but a diplomatic function. Passports, however, have, in other times, been habitually granted by foreign consuls residing in the United States. But soon after the insurrection broke out in the Southern States a regulation was made by this department, which I have excellent means of knowing was communicated to the British consul at Charleston, to the effect that, until further orders, no diplomatic or consular passports would be recognized by this Government, so far as to permit the bearer to pass through the lines of the national forces or out of the country, unless it should be countersigned by the Secretary of State, and the commanding general of the army of the United States. Mr. Muir had passed the lines of the army, and was in the act of leaving the United States in open violation of this regulation. Moreover, the bearer of the papers, Robert Muir, is a naturalized citizen of the United States, has resided here thirty years, and is a colonel in the insurgent military forces of South Carolina. 3d. If the papers contained in the bag are not illegal in their nature or purpose, it is not seen why their safe transmission was not secured, as it might have been by exposing them in some way to Lord Lyons, British Minister residing at this capital, whose voucher for their propriety, as Mr. Bunch must well know, would exempt them from all scrutiny or suspicion. 4th. The consul's letter to the bearer of despatches attaches an unusual importance to the papers in question, while it expresses great impatience for their immediate conveyance to their destination,

and an undue anxiety lest they might, by some accident, come under the notice of this Government. 5th. The bearer is proved to be disloyal to the United States by the pamphlet, and the letters found in his possession.

I have examined many of the papers found upon the person of Mr. Muir, and I find them full of treasonable information, and clearly written for treasonable purposes. These, I think, will be deemed sufficient grounds for desiring the scrutiny of the papers, and surveillance of the bearer on my part.

The remainder of the letter contains instructions to Mr. Adams, and is not important in reference to this subject. The opinion of the Courts of the United States has been often and very clearly expressed. On the 27th of April Judge Betts, of the U. S. District Court at New York, in a charge to the Grand Jury, thus stated acts which were treasonable:

Giving aid or comfort to the enemies of the country consists in furnishing the military supplies, food, clothing, harbor or concealment, or communicating information to them, helping their hostilities against the country and its Government.

It is most probable that complaints will be laid before you under this branch and definition of the crime. Within it will be included acts of building, manning, or in any way fitting out or victualling vessels to aid the hostilities of our enemies; sending provisions, arms, or other supplies to them; raising funds or obtaining credit for their service; indeed, every traitorous purpose manifested by acts, committed in this district by persons owing allegiance to the country, will be acts of treason. It is not necessary that the accused should have raised or created war by his own acts; he levies war by acting with those who have set it on foot, or by seizing or holding ports, or like acts of hostile aggression. The kindred crime of misprision of treason is this: If any person owing allegiance to the Government has knowledge of acts of treason committed by others within the jurisdiction of the Court, and does not make it known to the President of the United States, or one of the Judges of the United States, or the Governor of the State, or a judge or magistrate thereof, he becomes guilty of misprision of treason, and subject to seven years' imprisonment and a fine of one thousand dollars for the offence; and it is the duty of the Grand Jury to present for trial therefor such offender, whatever may be his individual connection or relationship with the offender.

In the Circuit Court of the United States for New York, Judge Nelson at a later day thus defined the overt act of treason:

There is more difficulty in determining what constitutes the overt act under the second clause of the Constitution—namely, adhering to the enemy, giving him aid and comfort. Questions arising under this clause must depend very much upon the facts and circumstances of each particular case. There are some acts of the citizen in his relations with the enemy which leave no room for doubt—such as giving intelligence, with intent to aid him in his act of hostility; sending him provisions or money; furnishing arms, or troops, or munitions of war; surrendering a military post, &c., all with a like intent. These and kindred facts are overt acts of treason, by adhering to the enemy. Words, oral, written, or printed, however treasonable, seditious or criminal of themselves, do not constitute an overt act of treason within the definition of the crime. When spoken, written, or printed in relation to an act or acts which, if committed with a treasonable design, might constitute such overt act, they are admissible as evidence, tending to characterize it, and show the intent with which the act was committed. They may also furnish some evidence of the act itself against the accused. This is the extent to which such publications may be used, either in finding a bill of indictment or on the trial of it.

Except in the cases of persons captured from privateers or who were placed as prize crews on board of vessels captured by privateers and subsequently recaptured, there were no trials for treason in any court of the United States.

The course pursued by the Government was to arrest persons suspected of treasonable actions or sympathies upon satisfactory information. They were then imprisoned and subsequently released on taking the oath of allegiance to the Government, or upon its becoming evident that the information was exaggerated. The manner in which arrests were at first made, and the information given to the public respecting the cause, are indicated by a few examples.

Mr. Ross Winans, a respectable citizen of Baltimore, when on his way from Frederick to Baltimore in Maryland, after the adjournment of the Legislature, of which he was a member, was arrested at the station called Relay House. An officer entered the cars and courteously inquired his name of him and stated, upon being informed, that he held an order for his arrest. He was taken from the cars across the track to an office and placed under military guard until the next day, when through the unrelenting efforts of his friends he was released. The public were informed that he was arrested by order of the President, upon the charge of furnishing ammunition to the South.

Mr. Faulkner, ex-Minister to France, was arrested upon an order from the State Department and confined in Fort Lafayette, in New York harbor, and subsequently was removed to Fort Warren at Boston. He afterwards was allowed to proceed on his parole to Richmond, and effect an exchange of a Federal prisoner for himself. No cause for his arrest has ever been made public.

The Mayor of Washington, James G. Berret, was arrested and confined in Fort Lafayette, and subsequently in Fort Warren. Afterwards he was released. The only fact of which the public were made acquainted was, that he had declined to take the oath prescribed by act of Congress to the Police Commissioners at Washington.

At the same time, Captain Robert Tansill, and Lieutenant Thomas S. Wilson, of the Marine Corps, who had tendered their resignations, were arrested and conveyed to Fort Lafayette. No further facts were given to the public.

Two parties existed in the Legislature of Maryland—one sympathizing with the South, and the other devoted to the Union. Numerous adjournments were made for a short period, after which that body would again meet. At the close of the last adjournment the Senate refused to re-assemble. There was a formal opening of the House by the clerks, only a few members being present, and a recess taken. At this time small squads of a Wisconsin regiment stationed at Frederick, were observed moving through the city, all taking different directions towards the outskirts. Thus in about a half-hour a cordon of armed pickets circled the entire town,

with instructions to allow no one to pass out without a written permit from a member of General Banks' staff, who had been appointed provost-marshal. This had scarcely been accomplished before a squad of police officers from Baltimore commenced to search the city for parties they were ordered to arrest. In the course of twenty-four hours, nine members of the House of Delegates were arrested, and also the officers of both Houses and the State Printer. Of the latter persons, however, all except one took the oath of allegiance and were then discharged. The others were sent to Fort Lafayette. The public were told, that the arrested members of the Legislature were informed that their vote in favor of certain resolutions was the cause of their arrest.

Marshal Kane, at the head of the Police Department at Baltimore, was arrested by a military force and finally sent to Fort Lafayette. The commanding General issued a proclamation at the time stating the cause of this arrest. (See page 58.) The Mayor and the Board of Police Commissioners were subsequently arrested and sent to Fort Lafayette.

In short, the process of arresting and confining in Fort Lafayette actually began in July. The routine was nearly the same in all cases. An order from Washington was received, generally by telegraph, to arrest and confine a person designated. The arrest, being forcibly made by the U. S. Marshal with armed attendants, the prisoner was conveyed to Fort Hamilton and turned over to Colonel Burke; an aid and guard of soldiers then conveyed him by boat to Fort Lafayette, where he was taken charge of by Lieutenant Wood, who gave a receipt for the prisoner, who was then divested of any weapons, money, valuables, or papers in his possession. His baggage was opened and searched. A soldier then took him in charge to the designated quarters, which was a portion of one of the embrasures for guns, lighted only from the port-hole, and occupied by seven to eight prisoners. "For each of these there was furnished a straw mattress on an iron bed; one blanket, one pillow and two sheets, which were never changed. One basin and pitcher served for all their morning ablutions in salt water. The breakfast was composed of one pint chicory-water sweetened in milk, a piece of salt pork and a piece of bread. Such papers and letters as had been opened, read, and approved of by the officer, were allowed the prisoners. At dinner was allowed rice or bean soup in tin plates, with iron spoons, bread and pork, or beef; and at supper, chicory-water in tin cups and one slice of bread." Occasionally, water becoming scarce, the prisoners were put upon allowance. Candles were allowed until 9 p. m., when they were generally burned out. The prisoners could write to their friends, but the letters were not sent if the contents were not approved by the officer. To this institution persons were committed by *lettres de cachet*, and discharged as mysteriously.

LIST OF PRISONERS CONSIGNED TO FORT LAFAYETTE, COMMENCING JULY, TO OCTOBER 19, 1861.

RECAPITULATION.

Imprisoned..... 175
Released to October 14, inclusive..... 67

In Fort Lafayette to October 19..... 108

* Taken to New York for trial.

† Removed to Bedloe's Island.

‡ Removed to Fort Columbus.

Mr. Pierce Butler, who was confined Aug. 20 and released Sept. 24, subsequently commenced action against Mr. Simon Cameron, ex-Secretary of War, for assault and false imprisonment. Mr. Butler was liberated in five weeks from the time of his incarceration, without reason being given for his discharge any more than for his arrest; and speaks in his complaint of being locked with nine other gentlemen in a cell twenty-six feet long by fourteen wide, in one of the casemates of Fort Lafayette, where he was allowed egress only at meals, and during one hour in the morning and evening for exercise in the quadrangle of the fort.

The fellow-occupants of Mr. Butler's cell were Charles J. Faulkner, James W. Wall, of Burlington; Thomas S. Serril, of Philadelphia; McMasters, of the New York "Freeman's Journal," De Bebin, of Wilmington, N. C., and others.

On the 30th of October all the prisoners at New York were removed to Fort Warren at Boston, a large and commodious structure. There were one hundred and nine political prisoners from Fort Lafayette; also six hundred and thirty-three of the prisoners taken at Hatteras Inlet. Others were subsequently added to this number.

HACKLEY, REV. CHARLES W., professor of mathematics and astronomy in Columbia College, N. Y., born in Herkimer Co., New York, in 1809, died at his residence in New York, Jan. 10, 1861. He entered West Point Academy in 1825, graduated in 1829, and was assistant professor of mathematics at West Point until 1832. He then studied law, and subsequently theology, and was ordained as a clergyman of the Protestant Episcopal Church in 1835. He was professor of mathematics in the University of New York until 1838, and afterwards President of Jefferson College, Mississippi, and rector of St. Peter's church in Auburn, N. Y. In 1843 he was elected professor in Columbia College, and from that year until the time of his death filled the chair in mathematics in that college. He was the author of the following works: a "Treatise on Algebra," New York, 1856; "Elementary Course on Geometry," New York, 1847; "Elements of Trigonometry," New York, 1850. He was also a large contributor to scientific periodicals, as well as to the weekly and daily journals, and exerted himself particularly in behalf of the establishment of an astronomical observatory in New York City.

HAMPTON is the capital of Elizabeth City County, Virginia. It is situated on the left bank of the James River, about 2 miles from its entrance into the Chesapeake Bay, and 96 miles southeast of Richmond. The part of the estuary of James River situated between this town and Norfolk is called Hampton Roads. It is an old town, possessing much historic interest. The distance from Fortress Monroe is two and a half miles. The town contained about 1,400 inhabitants, and early experienced

the effects of the war. On the 2d of July about thirty inhabitants remained.

The quaint old church was occupied as a guard-house by Federal troops, and two companies were stationed in the graveyard, which was surrounded by a high brick wall. Its tombstones bore date from the 17th century. In the new cemetery four companies of Col. Packard's regiment were posted, while the Federal force occupied the town.

It was subsequently evacuated by these troops, and then burnt by the Confederate force on the order of Gen. Magruder, to prevent its re-occupation. A few minutes after midnight on the 7th of August the torch was applied. The greater part of the five hundred houses having been built of wood, and being very dry, were soon in flames, and a strong south wind fanned them into a terrible conflagration. The fire raged all night, and on the next day, at noon, only seven or eight buildings remained. Among the buildings were four churches, and about four hundred and seventy houses. Thus was a pleasant town almost deserted and laid in ashes. From the inhabitants of this county six companies were furnished to the Confederate army to serve through the war.

HARPER'S FERRY. The situation of this town is at the confluence of the Shenandoah River with the Potomac, in Jefferson County, Virginia. The united stream at this point breaks through the Blue Ridge. It is 160 miles north of Richmond and 53 miles northwest of Washington. It is on the line of the Baltimore and Ohio Railroad. On the other side of the Potomac passes the Chesapeake and Ohio Canal. The village is compactly though irregularly built around the base of a hill.

A United States Armory and a National Arsenal were located here. At the armory 10,000 muskets were made annually, and the arsenal often contained 80,000 to 90,000 stand of arms. On the 2d of January, orders were received from Washington for the Armory Guard, Flag Guard, and Rifles to go on duty, as a precautionary measure. A few days afterwards a detachment of unmounted U. S. Dragoons, numbering sixty-four, under command of Lieut. Jones, arrived there. Affairs remained in a quiet condition until the excitement created through the country by the capture of Fort Sumter, and the issue of the first proclamation by the President calling out troops. A movement was immediately made by friends of the Southern Confederacy in Northern Virginia, to take possession of Harper's Ferry Arsenal. As early as the 18th of April, Lieut. Jones was informed that between 2,500 and 3,000 State troops would reach the ferry in two hours. Deeming the information positive and reliable, he gave orders to apply the torch to the buildings. In three minutes or less both the arsenal buildings, containing nearly 15,000 stand of arms, together with the carpenters' shop, which was at the upper end of a long and connected series of workshops of the armory proper,

were in a complete blaze. Lient. Jones then withdrew his small force, and marching all night, arrived at Carlisle barracks at half-past 2 o'clock the next afternoon. This was done by orders of the Government. The place was then taken possession of by the Virginian troops. Most of the machinery which was not destroyed was removed to Richmond. About six hundred arms were recovered. The official report of Lieutenant Jones to the War Department was as follows:

CARLISLE BARRACKS, PENNSYLVANIA, }
April 20, 1861. }

Assistant Adjutant-General, &c.:

SIR: Immediately after finishing my despatch of the 15th instant, I received positive and reliable information that 2,500 or 3,000 State troops would reach Harper's Ferry in two hours, from Winchester, and that the troops from Hulttown, increased to 300, were advancing, and even at that time—a few minutes after 10 o'clock—within twenty minutes' march of the ferry. Under these circumstances I decided the time had arrived to carry out my determination, as expressed in the despatch above referred to, and accordingly gave the order to apply the torch. In three minutes or less, both of the arsenal buildings, containing nearly 15,000 stand of arms, together with the carpenters' shop, which was at the upper end of a long and connected series of workshops of the armory proper, were in a blaze.

There is every reason for believing the destruction was complete.

After firing the buildings I withdrew my command, marching all night, and arrived here at 2 1/2 p. m. yesterday, where I shall await orders. Four men were missing on leaving the armory and two deserted during the night.

I am, sir, very respectfully,

Your obedient servant, R. JONES,
First Lieutenant R. M. Rifles.

WAR DEPARTMENT, WASHINGTON, }
April 22, 1861. }

Lieutenant R. Jones:

MY DEAR SIR: I take pleasure in apprising you that, in consideration of your very skillful and gallant conduct at Harper's Ferry, I have ordered a commission to be issued to you as assistant quartermaster-general, with the rank of captain.

SIMON CAMERON,
Secretary of War.

WAR DEPARTMENT, WASHINGTON, }
April 22, 1861. }

Lieutenant R. Jones:

MY DEAR SIR: I am directed by the President of the United States to communicate to you, and through you to the officers and men under your command at Harper's Ferry armory, the approbation of the Government of your and their judicious conduct there, and to tender you and them the thanks of the Government for the same.

I am, sir, very respectfully,
SIMON CAMERON,
Secretary of War.

Southern troops marched for the ferry immediately, and on the 20th of May, there were on the spot 8,000, made up from Kentucky, Alabama, South Carolina, and Virginia. They occupied all the neighboring heights on both sides of the Potomac and Shenandoah rivers, and claimed to hold an impregnable position against 40,000 men, so eligible were the points of defence. They expected accessions to their number, under the belief that the United States Government intended to make an effort to replant the national flag wherever it had been displaced.

A small force was thrown over the river to the heights on the Maryland shore, thus occupying a position important to the security of

Harper's Ferry. The invasion of Maryland by Virginia caused a remonstrance from Governor Hicks, addressed to Governor Letcher, of Virginia. The latter replied that the movement was unauthorized and should be countermanded. On the 14th of June the ferry was evacuated by the Confederate troops. Their total force on that day in and around the place was about 10,000.

The population of Harper's Ferry, previous to its occupation, and the adjacent towns of Bolivar and Virginus, consisted of about 5,000 people. About 350 armorers and laborers were employed in the arsenal, and the whole population depended for their support upon the Government's annual expenditure in the fabrication of arms. Besides, the place afforded a market to the neighboring farmers of Loudon and Jefferson counties in Virginia, and of Washington in Maryland, for wood and produce of field and garden. The workmen and others who were not forced into the army, have been scattered, and their families mostly left in a state of destitution.

The region had once been called "the garden spot of Virginia." On the day the evacuation commenced, the bridge over the Potomac was destroyed, having been partly blown up and then set on fire by the retiring force. It was a long and costly structure. This retreat arose in consequence of the movement of Union troops up the Potomac, from Washington, and from Chambersburg, in Pennsylvania, towards Harper's Ferry. At a later day, a small force of Confederate troops returned and burned the bridge over the Shenandoah and other property. After the passage of the Union troops across the Potomac at Williamsport, under Gen. Patterson, the Confederate force retired, and the ferry remained in possession of the former until the 29th of July. Subsequently the entire Union force under Gen. Banks, who had succeeded to the command in place of Gen. Patterson, recrossed the Potomac to the Maryland side, except one regiment left as a guard. This movement was in consequence of the indefensible nature of the place from the south. The army stores and provisions were removed to the Maryland side, about three miles from Sandy Hook, and five miles from the ferry. The construction of the bridge was also stopped. Previous to the close of the year, however, the bridge was rebuilt, and the town relieved of all apprehensions of an approach of the Confederate troops.

HARRISONVILLE, a village in Cass County, Missouri, 115 miles in a direct line west from Jefferson City. On the 13th of July, a body of Home Guards, in the United States service as a reserve, were attacked about three miles north of this place by a considerable Confederate force. The fight continued for four hours, when the latter retreated, having had fourteen killed.

HARVEY BIRCH, SMR. This ship, owned and registered in the city of New York, sailed for Havre on the 20th of September, with a

cargo of wheat, and arrived on the 9th of October. Having discharged her cargo and taken in ballast, the captain sailed for New York on the 16th of November. On the morning of the 19th, the ship then being in about lat. 40.6 N., long. 9.52 W., a steamer was made out, bearing for her, which was found to be an armed vessel, and hoisted at the peak the flag of the Confederate States. When within hailing distance a person on board hailed the ship, saying: "Haul down your colors and heave the ship to," the ensign of the United States being at this time set at the peak. This order was complied with, and the captain received the order, "Lower your boat and come on board," which he also complied with, taking the ship's papers with him. After arriving on board the steamer he was introduced by the first lieutenant, by name Fauntleroy, to Capt. Pegrim, commander of the Confederate States steamer Nashville, to whom he produced all the papers of the ship for examination. Capt. Pegrim took the ship's papers, and then told the captain that he should hold him as a prisoner of war by authority of the Confederate States. Capt. Nelson soon returned to his ship, with orders from the captain of the Nashville for all the crew to get their things ready as soon as possible, and go on board the Nashville, as they intended to destroy the Harvey Birch. They were allowed an hour or an hour and a half for this purpose, and got part out. The men from the steamer took most of the provisions, with the ship's chronometer, barometer, and some of the charts, permitting Capt. Nelson to retain his own chronometer, but he lost \$1,200 or \$1,400 of personal effects, books, charts, &c. They then set fire to the ship fore and aft, apparently in the deck-houses, and the vessel was soon in flames from stem to stern. The three masts were seen to go over the side, and the hull was still burning when the steamer left her. The Harvey Birch was a full-rigged ship of 1,487 tons, American measurement. She had a total of 29 souls on board. The men were put in irons on board the steamer, (with the exception of the captain and mate, who were treated with great politeness,) and kept as prisoners until the arrival of the vessel at Southampton, when they were immediately landed in the docks, and set at liberty with all the personal effects belonging to them.

HATTERAS INLET. From Cape Henry, Va., which is the southern point at the entrance of Chesapeake Bay, low sand islands and shoals lie between the shore of the mainland and the Atlantic Ocean. These extend for 200 miles along the coast, forming between themselves and the mainland the Currituck, Albemarle, and Pamlico sounds, navigable for vessels of light draft. The first practicable ocean inlet is 135 miles south of Cape Henry. It is a narrow and difficult entrance, known as Hatteras Inlet, with seven feet of water on the bar. A single vessel of light draft would be sufficient for the closing of this channel. It

was to this entrance that the military and naval expedition under Gen. Butler and Com. Stringham was destined. (*See EXPEDITIONS.*)

HATTERAS ISLAND. The occupation of Hatteras Inlet was followed by some events of interest. Hatteras Island, upon which the forts are situated, extends in a northeastern direction, 13 miles to Cape Hatteras light-house, thence north nearly 30 miles to Loggerhead Inlet, making a total length of about 40 miles. Its width varies from half a mile to two miles and upwards in various parts. It has an irregular sandy surface, interspersed with marshes and occasional spots covered with dwarf oak trees. The population is about 500 in number, who subsist by fishing, piloting, and similar pursuits. There are a few schools and a church upon the island.

Col. Hawkins, commander at Fort Hatteras, having learned that a Confederate force had taken possession of Roanoke Island, with the intention of making it a permanent stronghold, and also for the purpose of guarding an important inlet at that point, so that their privateers might have undisputed entrance, determined to place a force in that vicinity for the double purpose of protecting the loyal citizens and watching the enemy and preventing him from landing on the island, and also to prevent, if possible, their privateers from entering the channel which runs from the ocean at the junction of Albemarle and Pamlico sounds. On the 29th of September the Twentieth Indiana Regiment left on the small steamers or gunboats Putnam and Ceres, and arrived at their destination on the same afternoon—but on account of the shallowness of the water, they could not get nearer the shore than three miles. On the next morning the regiment was landed by means of small barges, but with only a few days' provision. Their camp equipage, intrenching tools, and supply of provisions were to be brought up the next day by the tug Fanny; which did not leave, however, until Tuesday, two days after, and arrived early that afternoon. No sooner had she come to anchor than three Confederate gunboats made their appearance and captured her with all her stores, consisting of 60 barrels of flour, 1,000 new overcoats, 9,000 pounds of beef, and all the sutler's goods. Learning now the true position of affairs, a Confederate expedition of between two and three thousand men was fitted out to capture the Indiana regiment. Their plan was to land part of this force above and the remainder below the regiment. Thus placed between the two forces it would be compelled to surrender. This movement was attempted on Friday morning the 4th of October. A part of the force was landed above and the steamers proceeded to land the remainder a few miles below, but were detained so that a landing was not effected until dark. Meantime Col. Brown of the Indiana regiment, perceiving the object of the enemy, commenced a retreat, with a small loss of pickets, and passed the lower force in the dark just after it had landed, and

reached Hatteras Light at midnight, having marched 28 miles. The first 10 miles were terrible. The sun was shining upon the white sand of the beach, heating the air as if it was a furnace. The men had neither provisions nor water. Having at first rushed out in haste to repel the enemy, and then being unable to return to their camp, they were prevented from taking a supply. They were unused to long marches; the sand was heavy, and the soldiers sank into it at every step. As the regiment pushed along, man after man would stagger from the ranks and fall upon the hot sand. A large number of the islanders left their homes through fear of the enemy. They could be seen in groups, sometimes with a little cart carrying their provisions, but mostly with nothing, fleeing for life—mothers carrying their babes, fathers leading along the boys, grandfathers and grandmothers straggling from homes they had left behind. Relying upon Federal protection, they had been friends to the regiment, which in an evil hour was compelled to leave them.

At Hatteras Light they were joined by Col. Hawkins, with 600 men, supported by the frigate *Susquehanna* and the gunboat *Monticello*. The latter proceeded up the beach, and soon found the enemy marching down with bands playing and flags flaunting in the breeze. The *Monticello* then ran within a half or three-quarters of a mile of the shore and sent a 10-inch shell into the enemy's front ranks, which exploded with apparent destruction. They attempted to retreat, but the gunboat kept on with them, pouring in a storm of shot and shell. They sought shelter in a small copse of wood, but were compelled to break from cover and rush in squads of hundreds across the barren beach, exposed to the fire of the guns. This continued for three hours and a half, and 180 shells were thrown at the enemy. The sand was covered with swords, accoutrements, and clothing thrown away. Finally the Confederate gunboats came down inside, and with barges the troops were taken on board under the cover of night; not, however, without some loss in embarking, and serious injury to one or two of the vessels by the shells thrown from the *Monticello*. The loss of the Confederate force was unknown, but stated by them to have been one man. They made a prize of the *Fanny*, estimated at \$80,000, and a part of the camp of the Indiana regiment, and took a few prisoners.

But the force on the island had occasion to contend with the elements, by which they were threatened with greater destruction than by the Confederate troops. On the night of the 1st of November, a gale of wind commenced with rain, which in the morning had reached a fearful violence. About 3 o'clock before daybreak, the waves of the ocean began to sweep over the island into the sound, and at daylight these two bodies of water appeared to be united. Not a spot of land was to be seen. All the

lower portion of the island where Forts Hatteras and Clark were situated was under water, and all chances of escape were cut off. It was not until a breaker swept across that the soldiers were aware of the presence of a great flood. The waters commenced to decline about 7 o'clock in the morning; otherwise if they had continued to rise a few hours more, all must have perished. Much property was destroyed, consisting of army stores, &c. A new inlet or channel was also cut between the forts nearly six feet deep.

HERBERT, SIDNEY, BARON HERBERT OF LEA, an English statesman, born in Wiltshire, Sept. 16, 1810, died near Wilton, England, Aug. 2, 1861. He was the second son of the 11th Earl of Pembroke by his second wife, a daughter of the Russian Count Woronzoff. He was educated at Oriel College, Oxford, where he graduated with high honors as a classic in 1831. In Dec. 1832 he was elected to parliament for the southern division of the county of Wilts, and continued to represent that county till his elevation to the peerage in 1861. His family connections had given him a strong leaning towards the Conservatives, but he gradually approached nearer to the Liberal party, and in 1841 supported Sir Robert Peel in his changes of the commercial policy of the Government. He became Secretary of the Admiralty in the Peel Ministry, and held this post till 1845, when he accepted the office of Secretary at War, with a seat in the Cabinet. In 1846 he explained to the House of Commons the views of the Government in relation to the repeal of the corn laws, and the introduction of the principles of free trade. During the premierships of Lord John Russell and Earl Derby, Mr. Herbert remained in opposition, but on the accession of Lord Aberdeen to power, in Dec. 1852, having been sworn a privy-councillor, he again accepted the portfolio of Secretary at War. In 1855 he resigned on a partial reconstruction of the Cabinet, and for a few weeks under the administration of Lord Palmerston held the Secretaryship of the Colonies. On the appointment by the House of Commons of a committee of inquiry into the state of the army before Sebastopol, he retired from the Government, regarding the raising of that committee as implying a censure on the Aberdeen Cabinet, though he had been very earnest in that Cabinet in his efforts to promote reform in the management of the army. He remained out of office till 1859, when Lord Palmerston urged his acceptance of his former post of Secretary at War, which he retained till his death, which was said to have been caused by excessive labor. He was raised to the peerage as Baron Herbert of Lea early in 1861. He was an able and elegant writer, and his contributions to the reviews on State questions were models of political writing. In private life he was distinguished for his abundant charities and his hearty zeal in the organization and promotion of schemes of social benevolence and general

utility. In the efforts of Florence Nightingale and others to promote the welfare and relieve the sufferings of the soldiers in the Crimea, they had no more zealous and efficient assistants than the Hon. Sidney Herbert and his amiable and accomplished lady. One of his later acts of benevolence was the erection of a beautiful church in the Lombardic style for the people of his native town of Wilton.

HOUSTON, a town of Southern Missouri, capital of Texas Co., situated on the Piney fork of Gasconade River, at the foot of the northern slope of the Ozark Mountains. Here, on the 4th of November, an expedition, under command of Col. Gresnel, sent by Col. Dodge, attacked a Confederate force stationed here, and captured 32 prisoners, several of them officers, 500 cattle, 90 horses and mules, a considerable amount of stores, and a large mail for the Confederate army, containing information respecting the position of the entire Confederate force in Missouri.

HOUSTON, SAM, a general, president, and governor of Texas, born near Lexington, Virginia, Mar. 2, 1793, reported as having died at Austin, Texas, Oct. 8, 1861. His life was one of remarkable adventures and sudden changes. His father was a soldier of the Revolution, and held the post of brigade-inspector at the time of his death in 1807. Soon after his death, his widow, with nine children, removed to Blount Co., Tennessee, on the very borders of civilization, within eight miles of the Cherokee settlements. Sam was sent to an academy, and made rapid progress in his studies, and begged permission of his teacher to be allowed to add Greek and Latin to his other studies. He was refused, and thereupon left the school, and could not be persuaded to return. After a short stay in a store as clerk, a situation not at all to his liking, he absconded, crossed the Tennessee River, and took up his abode with the Indians, with whom he remained for three years; Oolooteka, one of their principal chiefs, adopting him as his son. In 1811 he returned to his family, and opened a school for his maintenance; he soon had an abundance of pupils, though his price was high for the country and time. In 1813 he enlisted as a common soldier in the U. S. Army, distinguished himself by his good conduct, and was soon promoted to an ensigncy; and in 1814, at the battle of the great bend of the Tallapoosa, led the forlorn hope in a storming party to capture the Creek fortification, and was three times severely, and as it was supposed, mortally wounded. His daring attracted the attention, and secured him the lasting friendship of Gen. Jackson. For nearly three years he suffered severely from his wounds, and finally underwent a painful and dangerous operation, which nearly cost him his life. He had been promoted to a lieutenancy in 1815, and in November, 1817, was appointed as a subordinate Indian agent to carry out a treaty with the Cherokees. The next winter he conducted a delegation of In-

dians to Washington. His zeal in preventing the unlawful importation of negroes from Africa through Florida, then a Spanish province, into the Southern States, had made him enemies who were loud in their complaints against him. The Government acquitted him of all blame, but as its justification and approval of his course were not so decided as he thought it should have been, he threw up his commission on the 1st March, 1818, and returning to Tennessee, settled in Nashville, and began to study law. Applying himself to his studies with great earnestness, he was admitted to the bar within six months, after a rigid examination. He was soon appointed adjutant-general with the rank of colonel, and in Oct. 1819, one year after his admission to the bar, elected district-attorney of the Davidson district. He was remarkably successful as a prosecuting officer, and rose rapidly in reputation, although the bar of Nashville at that time was composed of an unusually large number of men of superior ability. In Dec. 1821, he was elected major-general of militia, and in 1823 chosen to Congress without opposition; he was reelected in 1825 by an almost unanimous vote, and in Aug. 1827 chosen Governor of Tennessee by a majority of 12,000. His popularity was such that he had not a single opponent in the State Legislature. In Jan. 1829, he was married, and in April of the same year, for reasons never publicly explained, separated from his wife, resigned his office, and went to the Indian Territory, whither his old friends the Cherokees had removed, and presented himself before the old chief Oolooteka, who received him kindly, and through whose influence he was formally admitted to all the rights and privileges of the Cherokee nation. He remained among the Indians till 1832, when he went to Washington to protest against the wrongs which had been inflicted on them by the Government agents, and to demand redress. The President ordered an investigation, which resulted in the removal of five of the Government Indian agents from office. This action involved Houston in numerous personal difficulties and annoyances, and led to a personal rencontre between him and Mr. W. R. Stansbury, of Ohio, in consequence of a charge of fraud made by him against Gen. Houston. In this rencontre Mr. Stansbury was severely beaten, and Gen. Houston was arrested, brought before the House, and publicly censured by the Speaker; he was also indicted and tried for the assault and fined \$500 and costs, but the fine was remitted by the President. The charge of fraud made against him was investigated and effectually disproved. Houston, on quitting Washington, returned to his Cherokee friends, but soon after removed to Texas with a few companions, professedly for the purpose of rearing herds of cattle on its prairies, but, as was commonly reported and believed, to take part in the impending revolution there. Soon after his arrival there he was a delegate from Nacogdoches to a Convention, to form a Constitution

for the new State of Texas, and exerted a powerful influence on its deliberations. At the commencement of the Texan war with Mexico, he was appointed general of the troops raised east of the Trinity River, and in Oct. 1835, was elected commander-in-chief of the Texan army, and after the Texan Declaration of Independence he resigned, but was immediately reelected. He took a leading part in all the subsequent measures of Texas; retreated with his handful of men before the Mexican army till he could be reinforced, secure a stronger position, and divide the enemy, whom he utterly defeated in the battle of San Jacinto, taking Santa Anna prisoner; was severely wounded himself in that battle, but recovering, was elected in September following President of the Republic of Texas, and as the Constitution did not permit him to serve two successive terms, he became a member of Congress at the expiration of his term of service, leaving the government and finances of the Republic in a prosperous condition. His successor, M. B. Lamar, was less fortunate or less able in his administration, and at its close the Republic was involved in a costly and disastrous war with the Indian tribes and Mexico, had incurred a debt of from ten to fifteen millions of dollars, and its credit was completely gone. In 1841, Gen. Houston was reelected, and during his administration secured the payment of a considerable portion of the debt, had reduced the expenditure, restored the credit of the Republic, and negotiated its annexation to the United States; which was finally consummated a few

months after the expiration of his term of office. On her admission into the Union, Gen. Houston was elected one of her Senators in the U. S. Senate, and reelected in 1853. While in the Senate he distinguished himself as an advocate for justice and humanity to the Indians. He opposed the Kansas and Nebraska bill, and on the 3d of March, 1854, made an able speech, in which he denounced the repeal of the Missouri compromise as a flagrant breach of faith, which would involve the country in great future trouble and distress. In the same speech he defended the 3,000 New England clergymen, who had signed a memorial against the bill, and avowed himself an adherent to the "American" party. He was soon after proposed by many of the papers of that party as a candidate for the presidency, and was also recommended for that office by the Democratic General Committee of New Hampshire. In 1858 he sustained the Lecompton Constitution for Kansas by his vote. In 1858, J. W. Hemphill was elected to the Senate in his place, but on his return to Texas in 1859, he became a candidate for Governor, and was elected Aug. 1, 1859. He opposed the secession movement from the beginning, and withstood for a long time the pressure which was exerted to induce him to call an extra session of the Legislature. To avoid collision, he acquiesced in the actions of the Legislature and those of the Convention, although each had been illegally called. Finally, he retired from office in preference to taking the oath required by the State Convention, and was succeeded by Lieut.-Gov. Clark. (See TEXAS.)

I

ILLINOIS, one of the interior States, was admitted into the Union in 1818. It is situated between latitude 36° 56' and 42° 30' N., and longitude 87° 35' and 91° 40' W. from Greenwich. Extreme length from north to south 388 miles; extreme breadth from east to west 212 miles. Area 55,405 square miles, or 35,459,200 acres. Population in 1860, 1,711,753. It is bounded north by Wisconsin, northeast by Lake Michigan, east by Indiana, south by Kentucky and the Ohio River, and west by the Mississippi River, which divides it from Missouri and Iowa. It is divided into 102 counties. The real and personal property of its citizens was valued, in 1850, at \$156,265,006, and in 1860 at \$871,860,282.

The Legislature of the State met at Springfield, on the 7th of January, 1861, and Gov. Yates' Message was delivered on the 8th. He recommended a complete reconstruction of the present military plan, by dividing the State into three divisions of battalion, regimental, and brigade formation, and that the most liberal legislative encouragement should be given to the formation of volunteer companies throughout the State. He advised also that the banks of the

State should be required to secure their circulation exclusively by the United States and Illinois stocks.

In regard to the difficulties at present existing south, he said: "If grievances to any portion of our Confederation have arisen within the Union, let them be redressed within the Union. If unconstitutional laws, trenching upon the guaranteed rights of any of our sister States, have found place upon our statute books, let them be removed. If prejudice and alienation towards any of our fellow-countrymen have fastened upon our minds, let them be dismissed and forgotten. Let us be just to ourselves and each other, allowing neither threats to drive us from what we deem to be our duty, nor pride of opinion prevent us from correcting wherein we may have erred." He recommended that, if Illinois had passed any laws tending to obstruct the operation of Federal authority or conflicting with the constitutional rights of others, they should at once be repealed.

Speaking not merely for himself, but reflecting what he assumed to be the voice of the whole people of Illinois, irrespective of party, as it reached him from all quarters, he adopt-

ed the sentiment of President Jackson, "The Federal Union: it must be preserved;" to which sentiment, he trusted, the Legislature would give emphatic expression at an early day.

On the second of February the Senate Committee on Federal Relations reported a series of resolutions, requesting the Governor to appoint five commissioners to attend the Peace Conference to be held at Washington on the 4th of that month, declaring that this appointment was not intended as an expression of opinion in favor of any change in the Federal Constitution as requisite to secure to the slaveholding States adequate guarantees of their rights, nor as an approval of the basis of settlement proposed by Virginia, but simply as an expression of their willingness to unite with that State in an earnest effort to adjust the present unhappy controversy in the spirit in which the Constitution was formed. They further avowed their belief that the appropriate and constitutional method of considering and acting upon the grievances complained of by the slaveholding States was by the call of a convention for the amendment of the Constitution as contemplated by the 5th article of that instrument. The resolutions passed by a vote of 13 to 10.

On the requisition of the Secretary of War for troops in April, the Governor issued a proclamation calling for six thousand volunteers, and in less than a day forty companies were officially reported as ready and anxious for service. Up to the 20th of April sixty-one companies had been positively accepted, and eight others conditionally, so that the complement of Illinois was then exceeded.

On the 12th of April (the day of the attack on Fort Sumter) Governor Yates had issued the following proclamation, convening the Legislature in extra session on the 23d of that month:

I, Richard Yates, Governor of the State of Illinois, by virtue of the authority vested in me by the Constitution, hereby convene the Legislature of said State, and the members of the twenty-second session of the General Assembly are hereby required to be and appear in their respective places at the Capitol, in the city of Springfield, on Tuesday the 23d day of April, A. D. 1861, for the purpose of enacting such laws and adopting such measures as may be deemed necessary upon the following subject, to wit: The more perfect organization and equipment of the militia of this State, and placing the same on the best footing to render efficient assistance to the General Government in preserving the Union, enforcing the laws, and protecting the property and rights of the people; also, the raising such money and other means as may be required to carry out the foregoing object, and also to provide for the expenses of such session.

In testimony whereof I have hereunto set my hand, and have caused the great seal of the State to be hereunto affixed at the city of Springfield, this 12th day of April, 1861.

RICHARD YATES.

On the 25th of April, Gov. Yates sent to the Legislature a Message, in explanation of his having taken military possession of Cairo and garrisoned it with Federal troops. He said in this Message:

"The transfer of part of the volunteer forces of the State to the city of Cairo was made in

compliance with an order from the War Department, directing a force to be stationed at Cairo. Simultaneously with the receipt of the order, reliable information reached me of the existence of a conspiracy of disaffected persons in other States to seize upon Cairo and the southern portion of the Illinois Central Railroad, and cut off communication with the interior of the State. It was my desire that the honor of this service should have been given to the patriotic citizens of the counties in the immediate vicinity, but as these were not at that time organized and armed for patriotic duty, and the necessity for speedy action was imperative, the requisition was filled from companies previously tendered from other portions of the State."

At this extra-session, the amount appropriated for war purposes was \$3,500,000. Of this sum \$1,000,000 was to organize and equip ten regiments called out by the State, \$500,000 was appropriated to purchase arms for the State, and to build a powder magazine, and \$2,000,000 for general purposes of State defence and national aid.

The entire militia of the State, consisting of all the able-bodied men between the ages of eighteen and forty-five years, were to be immediately organized. A bill defining and punishing treason to the State was passed. The telegraph was put under restraint, and measures taken to prevent its rendering aid to opponents of the Government, and every thing was done that was deemed necessary "to place the State in a condition to suppress insurrection, repel invasion, and render prompt assistance to the United States Government."

The Governor was indefatigable in his efforts to provide for the army which Illinois was raising, to aid in the maintenance of the Federal Government. On the 17th of August he issued a proclamation to the people of Illinois, stating that he had obtained permission from the Secretary of War to accept all companies that offered themselves for the three years' service, and announcing that all companies which should report themselves fully organized within twenty days from that date would be received; that orders for the transportation, sustenance, and equipment of troops had already been given, and that both equipments and arms of the best quality would be furnished at the earliest possible moment. The proclamation was eloquent and replete with patriotic feeling, and it awakened a hearty response in the hearts of the people of the State. The companies reported much faster than they could be armed and equipped, and on the 21st of November it was stated by authority that the State had 53,000 troops in the field, or ready for marching orders, of whom six regiments and two independent squadrons were cavalry. This was 8,600 more than her quota. The number was subsequently largely increased, and on the first of January, 1862, her force in actual service considerably exceeded 60,000.

The expenses of the war in the State in 1861 were nearly five million dollars, of which the United States Government would refund about \$3,400,000, besides the tax of August, 1861, which was assumed by the State, and which would amount to about \$1,700,000.

Late in the year, in accordance with a vote of the Legislature, an election was held for delegates to a convention to revise the Constitution; 75 members were elected, of whom 55 were democrats and 20 republicans. The convention did not commence its session till January, 1862, and continued in session nearly three months.

Illinois has made gigantic strides in material progress within the past ten years. With the exception of Ohio, she has more miles of railroad actually in operation than any other State in the Union, and another decade will probably enable her to surpass even that State, on whose heels she now treads closely. The number of miles completed and in progress in Illinois, January 1, 1862, was 3,849; the number of miles open for traffic was 3,024; the cost of the roads now constructed, with their equipments, &c., was \$113,591,014. Of these railroads 2,770 miles have been constructed since 1852. By means of these railroads she is able to bring her vast grain crops, for the culture of which her broad acres of prairie are so admirably adapted, into market with great facility. The amount of this crop is marvellous. The deliveries of grain at Chicago in 1861 were 33,214,294 bushels, being three-fifths of the whole amount exported to Europe under the extraordinary demand of that year. When we consider that for large portions of the crop St. Louis, Cairo, and Cincinnati are more convenient markets than Chicago, and take into account also the immense export down the Mississippi in the winter of 1860-61, and the large quantity required to supply the home consumption of 1,700,000 people, some idea can be formed of the productiveness of the State.

Abundant, however, as is the product of grain, it has been discovered of late that in the southern portion of the State, at least, other crops can be raised with greater profit and more uniform success. The culture of the sorghum, both for fodder and for the production of syrup and sugar, has been constantly on the increase for several years, and the supply of Louisiana sugar, which has been largely consumed in the West, having been cut off by the war, a greatly increased production of the sorghum followed.

The culture of cotton, long practised on a small scale in Southern Illinois, was greatly stimulated last year, and will be still more the present year, by the high price at which that great staple is held, in consequence of the war. It has been ascertained that the Tennessee cotton, or, better, that procured from China above the 35th parallel, can be cultivated successfully anywhere below 40° N. latitude in Illinois, and will yield an average crop of 300 to 500 lbs. to the acre. Before 1840 it was culti-

vated on almost every farm in Southern Illinois for home consumption, but the low price of cotton goods, and the demand for other products, led to the neglect of the cotton crop. Many thousand acres have now been planted with it, and should the season prove favorable, the cotton crop of Illinois, in 1862, will probably be of considerable value.

INDIA AND FARTHER INDIA. Of the events of 1861, in these remote countries, there are but few which particularly interest our readers. The intrigues of Russia with Dost Mohammed Khan, one of the most formidable of the princes of Turkistan, were manifested at the beginning of the year, in the refusal of that prince to meet Lord Canning, the Governor-General of India, during his "progress" through Northern India. The reason assigned by Dost Mohammed for his absence, was a deceptive one, and the fact gave some uneasiness to the British authorities.

The autumn of 1860 and the winter of 1860-61 were marked by a terrible famine prevailing over extensive districts of India, in consequence of the absence of the usual rains in the preceding summer. The famine made terrible ravages in Delhi and other districts, and many thousands perished from starvation. Extraordinary efforts were made for their relief, and a subscription of \$500,000 was made for supplying their wants, in England.

The Fifth European Regiment at Dinapore, previously under the East India Company's government, was incorporated with the British army of India, on the assumption of direct sway over India by the British Government. Dissatisfied with the amalgamation, which associated them with the faithful native regiments, they mutinied; the Governor-General caused the ringleaders of the mutiny to be seized, tried by court-martial, and hanged, and the regiment to lose its name, and its companies to be distributed among the other regiments. This prompt action saved the country from what appeared at first to threaten serious trouble.

The cultivation of indigo, though profitable to the large proprietors, is not so to the ryots or tenants of the lands, especially on the rich lands of Bengal, which yield better crops of cotton or other articles, with less severe labor. The indigo crop must be planted at a particular time, (in the inundated lands immediately on the recession of the waters, and on the dry land three or four days after the first rains,) and if not sown at that precise time the crop is a failure. The labor is very severe and the returns small; the English proprietors had been accustomed to use the most oppressive measures towards the ryots, imprisoning them, and subjecting them to cruel punishments for the slightest neglect or delay in sowing the indigo, and reducing them and their descendants to peonage for the small advances made to them. Contracts with them had often had conditions of peonage interpolated in them, unknown to the ryots, and these had been enforced by im-

prisonment. The Governor of Bengal, Mr. Grant, had, in a journey of 60 miles, met with thousands of the families of the ryots, who implored him on their knees to repeal the ordinance compelling them to cultivate indigo. He promised to do this, by a public proclamation; but the planters prevailed on the Council of India, at Calcutta, to nullify this proclamation. On an appeal to the Great Council of India, at London, however, Gov. Grant was sustained, the ryots relieved, and the planters severely rebuked.

The finances of India were at the commencement of the year in a deplorable state. The debt of India was £80,000,000, and a further sum of £12,000,000 was still to be paid to the old East India Company, and for the liquidation of other claims. The deficit for the year 1861, was estimated at £6,500,000. Mr. Wilson, an able financier, sent by the English Government in the spring of 1860, to examine the finances of the country, after careful investigation, proposed a scale of duties and an income tax, which he believed would raise the necessary revenue, in connection with a banking system, more comprehensive than had previously been introduced; but before his plans could be acted upon, he died from overwork, and his successor, Mr. Laing, adopted a different policy, retaining the bank, but diminishing the imports, and raising the amount needed by a stamp duty and a capitation tax.

The scarcity of cotton in 1861, in Great Britain, and the probability of a still greater scarcity in 1862, induced the greatest exertions to increase the crop in India, which, it was evident, must be the principal or at least the largest source of supply. In 1861, it furnished nearly one-third of the whole amount imported, and its capacity for a vastly increased production was well known, if it could be properly prepared, and brought into market without too great cost. For this purpose efforts have been made, and with considerable success, to open new lines of railway penetrating into the cotton districts; to furnish ample seed of the best quality to the planters and ryots, to relieve the latter from the oppression they have suffered, and thus impart a new stimulus to their industry; to introduce cotton gins of the best patterns, and improved methods of packing, that the cotton might come into market in better condition, and by offering bounties to encourage the culture. For the better attainment of these objects, the Secretary of the Cotton Supply Association went out to India in the spring of 1861, and remained till October. For the purpose of facilitating the plans of the association, arrangements were made with the Peninsular and Oriental Steam Navigation Company, and with parties in Egypt for shipping from Egypt four tons of cotton seed monthly to India. The Egyptian seed is said to produce on India soil a cotton of larger and stronger fibre than the American, and consequently will yield an article more nearly like the American cotton

than the Surat is at present. The result of these efforts will not be fully seen till the amount of cotton received from India in the winter and spring of 1862, is known; that the production has been greatly increased, is, however, certain.

The railway enterprises in India, which, in connection with the common roads being made as feeders for them, must greatly develop the industrial resources of that country, are on a gigantic scale, and are constructed mainly by British capital. On the 31st December, 1860, 842 miles were opened for traffic, and 1,353½ miles more were contracted to be completed in 1861, and 1,579 more in 1862. The cost of these lines is estimated at £49,000,000, or \$245,000,000. Besides these, the French Government were constructing a railroad to bring their town of Karikal into connection with the great Southern India line. One of the inclines on the Ghaut Mountains near Bombay, called the "Bhore Ghaut Incline," is 3,662 feet in height, and extends 15½ miles, being built up with a solid mass of masonry on an almost inaccessible mountain scarp. Its construction employed over 40,000 laborers for many months. Another marvel of engineering skill on one of these railroads is the Brahminee bridge on the line between Calcutta and Rajrushal. It consists of nine iron girders of 60 feet span, and seven brick arches of thirty feet span each. Its total length from abutment to abutment is 950 feet, and the height of the rail level above the bed of the river is about thirty feet, the foundations being sunk ten feet below the bed of the river. The fuel for burning the brick used had to be brought 70 miles on the native carts. Notwithstanding the numerous difficulties incident to a country without roads, and without fuel, Messrs. Perry and Powell, the engineers, succeeded in completing this noble bridge in a single season.

In Anam, one of the States of Farther India, France has, during the year, made considerable conquests. The strongly fortified town of Saigon, on the coast of Anam, was captured, and the region adjacent, for a considerable distance, ceded to the invaders, who have already commenced establishing a colony there.

INDIANA, one of the interior States of the American Union, was admitted in 1816. It is situated between latitude 37° 47' and 41° 46' north, and longitude 84° 49' and 88° 2' west from Greenwich. Its extreme length from north to south is 276 miles, its average breadth 140 miles, and its area 33,809 square miles, or 21,867,641 acres. Its population in 1860 was 1,350,479. It is bounded north by the Lake and State of Michigan, east by Ohio, south by Kentucky and the Ohio River, and west by Illinois. It is divided into 92 counties. The valuation of the real and personal property of its citizens, in 1850, was \$202,650,264; in 1860, \$528,835,371.

The sessions of the Legislature are biennial, and the Governor and Lieutenant-Governor are elected for four years.

The Report of the State Auditor for the year 1860 gives the following statement of the aggregates of the assessment of real and personal property in Indiana for the year 1860:

Number of acres.....	21,867,641
Value of lands without improvements.....	\$219,661,783
Value of improvements.....	\$55,491,249
Value of lands and improvements.....	\$275,153,032
Value of town lots and improvements.....	\$47,473,326
Total value of railroad assessment.....	\$6,619,342
Other corporation stocks.....	\$1,819,246
Other personal property.....	\$122,944,432
Total valuation.....	\$455,011,373
Number of polls.....	203,093

On the above-stated amount of property and number of polls, there is levied the following amount of taxes, which were collected in 1861:

State tax.....	\$659,159 12
County tax.....	1,192,437 95
School tax.....	536,044 86
Road tax.....	338,347 81
Township tax.....	141,641 21
Sinking fund tax.....	88,786 88
Railroad tax.....	41,339 92
Other corporation tax.....	607,721 99
Total amount of taxes on assessment of 1860.....	3,768,426 87
Delinquent tax.....	702,699 64
Total amount of taxes.....	4,471,126 51

The banks of Indiana, on the 1st of January, 1861, were 39 in number, and reported their condition as follows: Capital paid in, \$4,744,570; loans and discounts, \$8,158,038; stocks, \$1,297,828; real estate, \$316,024; other investments, \$77,293; due by other banks, \$1,198,961; notes of other banks, \$355,025; cash items, \$105,875; specie, \$2,296,648; circulation, \$5,755,201; deposits, \$1,841,051; due to other banks, \$117,868; other liabilities, \$152,650. At the time of the suspension of specie payment by the banks generally throughout the country in December, 1861, the banks of Indiana refused to suspend, and have maintained their condition as specie-paying banks up to the present time. The State debt in 1860 was \$10,286,855 57. Besides this, the State is holder for the canal stocks of the Wabash and Erie Canal, \$7,017,807 50; but the interest and a portion of the principal of this are paid from the canal revenues.

According to the United States census of 1860, the products of Indiana in the summer of that year were as follows:

Live Stock.—Number of horses, 409,504; asses and mules, 18,627; milch cows, 491,033; working oxen, 95,982; other cattle, 582,990; sheep, 2,157,375; swine, 2,498,528. Value of live stock, \$50,116,964.

Produce.—Bushels of wheat, 15,219,120; corn, 69,641,591; oats, 5,028,755; Irish potatoes, 3,873,130; sweet potatoes, 284,304; flax seed, 158,272. Pounds of rice, 1,219; tobacco, 4,657,964; wool, 2,466,264; butter, 17,934,767; cheese, 569,574; flax, 17,112. Tons of hay, 635,322. Value of home manufactures, \$847,251; value of slaughtered animals, \$9,592,322.

The Report of the Superintendent of Public Institutions, Professor Miles J. Fletcher, to the Governor, on the 1st of January, 1862, presents the following statistics in regard to the condition of popular education in the State:

Number of Children at the Enumeration of 1861.

Number of males.....	270,073
Number of females.....	258,118
Whole number.....	528,191
Number of children attending public schools during 1861.....	337,390
Number attending private schools.....	18,270
Number attending schools of all kinds.....	355,660
Number not attending schools of any kind.....	163,231
Amount of school revenue for tuition, collected and ready for apportionment in April, 1861.....	\$553,196 82
Amount collected and ready for apportionment in October, 1861.....	106,182 82
Total during the year.....	\$661,379 64
Amount apportioned in April.....	\$553,577 66
Amount apportioned in October.....	102,890 20
Amount apportioned during the year.....	\$656,467 86
Balance in State Treasury.....	\$4,911 73
Amount of Congressional Township revenue collected during the year.....	\$168,375 15
The Spring apportionment was.....	\$1 08 to the child.
The Fall apportionment was.....	20 " "
Whole amount per child.....	\$1 28

This is common school revenue. Congressional township revenue of 1861, \$168,175 16, added to the common school revenue, gives a total of \$1 60 per child.

There is now due the school revenue from the State, \$350,000. This amount was an unapportioned accumulation of said revenues, which was drawn from the State Treasury and "used for other purposes" prior to the year 1861. The Legislature, at the last session, made arrangements to repay it, at the rate of \$50,000 a year, commencing April, 1862.

It may seem that the number of children who did not attend school during the year is remarkably large. But it should be remembered that the enumeration includes all single persons between the ages of five and twenty-one years; that many of these are already in the active pursuits of life; that many parents, convinced of the evil of sending children to school at the tender age of five years, have abandoned it, and that near one-fourth of the schools have not been open during the year.

Early in their session the Legislature appointed commissioners to the Peace Convention held at Washington on the 4th of February, a decided majority being in favor of the movement. When the call of the President for troops was made, on the 15th of April, the Governor and people of Indiana responded with the utmost promptness to the summons. Within one week after the call the six regiments asked for were raised and mustered into the service, and ready to march, and would have been on their way to the field if they could have been provided with arms. They received them and were despatched to Western Virginia and other points before the middle of May.

The Legislature also authorized the raising and arming of six regiments for one year for home service, to be transferred to the Government service at the discretion of the Governor.

They were armed with State arms. More than twice as many companies as were needed for these six regiments were tendered the Governor.

The requisition for six regiments for three years' service was filled in twenty-four hours after the order came. Nearly the whole number were tendered the Governor in anticipation of the call.

Besides these eighteen regiments, raised by official requisition, there were about thirty regiments organized as "Home Guards," with one name or another. They held themselves in most cases subject to the call of the Government, and were armed as fast as the arms could be procured.

As renewed calls for troops were made, Indiana responded with a promptness and patriotism unsurpassed by any State in the Union. She sent into the field considerably more than her quota of troops, and they were admirably equipped and provided, and in the severe battles in which they were engaged exhibited the most undaunted and persistent bravery. In the war with Mexico, one of the Indiana regiments, at Buena Vista, had become panic-stricken, and its flight had brought a reproach upon the reputation of the State for courage. This stain it was the especial desire of the soldiers of the Indiana regiments to efface, and more than one regiment, on being sworn into the service, took a solemn oath to "remember Buena Vista," an oath they have kept most religiously, for whenever they have been engaged in battle, they have been eager to advance, steady in the fight, and utterly averse to retreating.

The forces raised in the State and sent into the field before the 1st of January, 1862, were, in round numbers, about 60,000. Of these 53,500 were infantry, 4,500 cavalry, and about 2,000 artillery. The following statement shows the arms that were distributed by the State to the different regiments during the year:

Muskets and Rifles.

Prussian muskets.....	4,006
United States rifles.....	5,290
Padrei ".....	5,000
Belgian ".....	957
New percussion muskets.....	7,299
Altered ".....	8,800
Long range rifles.....	600
Springfield ".....	1,830
Short Enfields.....	960
Long ".....	13,898
Saxony rifles.....	1,000
Austrian rifles, 54 cal.....	3,822
Mississippi ".....	562
Total.....	53,696

Cavalry Arms.

Colt's navy revolvers.....	2,547
Cavalry pistols.....	1,077
Cavalry sabres.....	4,411
Burnside's carbines.....	480
Sharpe's carbines.....	846
Hall's carbines.....	50
Musicians' swords.....	626
Non-commissioned officers' swords.....	922

The most of the cavalry arms were sent to the Indiana cavalry regiments direct by the Government after they left the State.

To this must be added the following pieces of ordnance:

Six-pounders.....	27
Twelve-pound howitzers.....	15
Six-pound rifle guns.....	20
Ten-pound Parrott guns.....	10

The Indiana troops have been, perhaps, more widely scattered through the different *corps d'armée* than those of any other State; they were with Gen. McClellan and his successors in Western Virginia; fought at Bull Run; garrisoned the forts at Hatteras Inlet, and were plundered of their clothing and supplies by the Confederates; participated in the victories of Gen. Lyon, and in the masterly retreat of Sigel; defended Lexington under Mulligan; formed a part of Fremont's army which went in pursuit of Gen. Price; were, indeed, in every considerable action in Missouri, and in most of those on the Potomac, and, during the present year, have been in the actions of Mill Spring, Roanoke Island, Fort Donelson, Pea Ridge, Pittsburgh Landing, and at the capture of Island Number Ten.

The Indiana Legislature, at its session in 1861, passed, on the 7th of May, a law for the reorganization of the militia, which greatly facilitated the subsequent supplying of troops on the demand of the Government. Some features of this law are worthy of notice. The militia were divided into two classes, sedentary and active. The sedentary militia comprised all white male persons liable to bear arms under the State constitution except those enrolled in the active militia. The active militia, styled also the Indiana Legion, consisted of all such able-bodied white male citizens of the State between the ages of eighteen and forty-five, as should enroll themselves and take the oath of allegiance to the United States and the State of Indiana. These persons were required to provide themselves with a uniform, but the State furnished them with arms, equipments, ammunition, &c., and paid the expenses of company and regimental drills; and when called into active service, either in behalf of the State or the General Government, they were to receive the same pay as corresponding grades in the United States army. They were required to parade four times a year, and in addition, to have not less than twelve company drills in the course of the year. The uniforms and equipments being similar to those of the United States troops, the members of the companies, on being received into the United States service, received compensation for the cost of their uniforms from the Government.

Under this act large numbers enrolled themselves in the active militia, and, from the regiments thus enrolled it was comparatively easy to supply, as they were needed, the troops required by the General Government.

On the 7th of September a terrible railroad accident occurred on the Ohio and Mississippi Railroad, by which over 100 volunteers of the Nineteenth Illinois Regiment, on their way to Western Virginia, were killed and wounded.

INDIANS, WESTERN. The population west of the United States, inhabiting that vast region known as territories, consists, with few exceptions, of Indians in various stages of civilization. Some, in naked savage bands, adorned with paint and feathers, armed with the tomahawk and scalping knife, roam the wilderness. Others differing from the planter or farmer only in their tawny complexion, possess cultivated lands, flocks, and herds.

The number of these Indians in direct connection with the Government of the United States is 239,506 souls, seven-twelfths of whom are females.

The large tribes of Cherokees, Chickasaws, and Choctaws, occupy lands in the southwestern part of the United States. These lands are west of Arkansas and north of Texas, and being within the limits of the southern superintendency, and under the supervision of agents who sympathized with the Government of the Confederate States, all intercourse was suspended by them with the agents of the United States. After the 4th of March, when a new administration had been inaugurated, the superintendent and agents were removed, and others appointed to discharge their duties. These new officers were unable to reach their posts, or to hold any intercourse with the tribes under their charge. The superintendent and some of the agents of the southern superintendency united with the Confederate States, and incited the Indians to acts of hostility. At the same time they claimed to exercise the same authority by virtue of commissions from the Confederate Government. These influences upon the Indians were sufficient to induce a portion of them to renounce the authority of the United States, and acknowledge the Confederate States. A treaty was ratified by the Confederate Congress with the Choctaws, by which two delegates from that nation received the privilege to sit in the Congress. Sampson Folsom and Eastman Loman were the delegates. Two regiments were raised and joined the Confederate army, and a third was organized during 1861. The hostile attitude assumed by some portions of the above-mentioned tribes was produced, it was supposed, by the threats of emissaries sent among them. A large proportion of these tribes are in comfortable circumstances; one very far advanced in the arts of civilization, and many of them are slaveholders. This last circumstance, the lack of information relative to the purposes of the new administration, the surrender of the posts in their vicinity, and the withdrawal of the Federal troops, are sufficient reasons to explain a change of allegiance on the part of any of them. Among the first to yield to such influences were the Choctaws and Chickasaws; amongst the last were the Cherokees, at the head of whom is John Ross, who resisted these movements as long as it was in his power. The following is his proclamation of neutrality:

I, John Ross, principal Chief, hereby issue this my proclamation to the people of the Cherokee Nation, re-

minding them of the obligations arising under their treaties with the United States, and urging them to the faithful observance of said treaties, and peace and friendship towards the people of all the States. The better to attain these important ends, I earnestly impress on all my fellow-citizens the propriety of attending to their ordinary avocations, and to abstain from political discussions of the events transpiring in the States, and from partisan demonstrations in regard to the same.

They should not be alarmed with false reports, thrown into circulation by designing men, but cultivate harmony among themselves, and observe good faith and strict neutrality between the States threatened with civil war. With these means alone can the Cherokee people hope to maintain their own rights unimpaired, and have their own soil and firesides spared from the hateful effects of devastating war. There has not been a declaration of war between the opposing parties, and the conflict may yet be avoided with a compromise or a peaceable separation. The peculiar circumstances of their condition admonish the Cherokees to the exercise of prudence in regard to a state of affairs to the existence of which they have in no way contributed, and they should avoid the performance of any act, or the adoption of any policy, calculated to destroy or endanger their territorial and civil rights. With an honest adherence to this course, they can give no just cause for aggression or invasion, nor any pretence for making their country the scene of military oppression, and will be in a situation to claim all their rights in the final adjustment that will take place between the several States.

For these reasons I earnestly urge on the Cherokee people the importance of non-interference with the people of the States, and the observance of unswerving neutrality between them;—trusting that God will not only keep from our own borders the desolation of war, but that He will, in His infinite mercy and honor, stay its ravages among the brotherhood of the States.

Given under my hand at the Executive office at Park Hill, this 17th day of May, 1861.

JOHN ROSS,
Principal Chief.

The number of the Cherokee nation is 22,000, among whom 30 schools are established. The number of the Choctaws is about 18,000, and that of the Chickasaws 5,000. Among the Choctaws there are numerous schools and churches; the proportion is about the same with the Chickasaws.

Notwithstanding the position taken by the Chief Ross, yet the unfavorable course of affairs connected with the Federal military movements in Missouri, and the activity of the Confederate agents, so strengthened the party in favor of an alliance with the Confederate States that Ross was overborne by their pressure. On the 20th of August he called the Council together at Tahlequah, and sent in a message recommending a severance of their connection with the Federal Government, and an alliance with the Confederate Government. The Council approved of these recommendations, and appointed commissioners to make a treaty of alliance. At the time of this change of views on the part of the Chief and Council, the Confederate Commissioners had made propositions offering to assume the payment of the regular annuity which the Cherokees had hitherto received from the United States, and which they now feared would be lost by an alliance with the Confederacy; threats of an invasion from Arkansas and Texas were also

made, without any hope of succor from the Federal Government. The wife of Ross held out to the last moment, and when an attempt was made to raise a Confederate flag over the Council House, her opposition was so spirited that it was prevented. A Home Guard of 1,200 men was raised and drilled. The Creeks, a nation of 13,550 persons, also raised 1,200 men.

The Delaware Indians, on a reservation in the State of Kansas, number 1,084. Their personal property averages almost \$1,000 to each individual. Many amongst them have become traders with other Indians, both reclaimed and wild, and travel even to the boundaries of California. Some of the more thrifty of the farmers hold more than a hundred acres subject to the plough.

The Pottawatomies have a reservation 30 miles square, rich in soil, and beautifully located on the Kansas River, near Topeka, the present seat of Government for the State. A division of sentiment exists in the tribe, which numbers 2,143 persons, as to holding land in severalty or in common. While the latter system prevails, they are dependent in a measure upon the chase for support. They are intelligent and happy, and have schools and mission churches.

The Sacs and Foxes are a vigorous and powerful race, refusing to adopt the costume of the whites. They accept the theory, but reject the practices of civilized life, and choose to rely upon their buffalo hunts and annuities for subsistence. They number over 1,300 persons.

The Shawnees, who own their lands in severalty, are estimated to hold as individual property a million and a half dollars in value. They number 810 persons, and are intelligent, of gentlemanly bearing, and prosperous.

The Ioways of the Missouri have almost entirely abandoned the chase, and devoted themselves to agriculture. They number 300, and have had during the year 225 acres of land under cultivation. Their individual wealth is estimated at \$16,000.

The Omahas are a prosperous agricultural community. Although the tribe numbers less than a thousand souls, they have, in addition to a thousand acres of land fenced for pasture, six hundred and seventy acres under cultivation. Their individual wealth is estimated at \$40,000. During the year they adopted a regular code of laws, established an internal police selected among themselves, and are making rapid advances in the manners and customs of civilization. The culture of sorghum has been commenced, from which they expect to obtain sugar and molasses.

The Kickapoos, upon whom famine, in consequence of the drought of 1860, pressed sore during the winter of 1860-'61, rejoiced in bountiful crops in 1861. They number 350, and own an aggregate of property worth \$40,000. Their efforts in raising wheat have been very satisfactory.

In the northern superintendency, the animos-

ities which have in former years existed among the various tribes still slumber. The land of the Winnebagoes on the northern frontier has been divided among them in severalty, giving to each head of a family eighty acres, and to each male adult forty acres. They number 2,256, and their aggregate individual wealth is \$70,000.

The Yantonnais band of the Sioux has hitherto been a wild and intractable people, manifesting no disposition to abandon in the least their savage mode of life. They have exercised a powerful and pernicious influence upon the neighboring tribes, who are less wild, and are disposed to cultivate more intimate relations with the whites. Now they are beginning to surrender their prejudices, and are disposed to arrive at a better understanding with the Government. Their band numbers 3,650.

Some of the Sioux located upon reservations, have made a fair beginning in the customs of civilized life. They have adopted the costume of the whites, and rely for a subsistence upon the arts of husbandry. This class is known as "Farmer Indians," a term which distinguishes them from the other class, known as "Blanket Indians." The "Farmer Indians" are met in each step in their endeavors to attain the arts of civilization by the constant opposition of the "Blanket Indians," who regard them as innovators upon their ancient customs, wanting in manliness, a discredit to their race, and "degenerate sons of noble sires." The Sioux number over 6,500, and their individual wealth is estimated above \$220,000, a part of which consists of horses. Ordinary and manual labor schools exist among them. Whiskey everywhere seems to possess for the Indian an irresistible attraction, and having no just appreciation of values, he readily exchanges the most valuable of his possessions to gratify his uncontrollable desire for this stimulant.

In the Colorado Territory, the agents of the Confederate States and the disaffected resident whites have made a strong impression on the minds of the Indians, and, although no acts of hostility were committed, they have begun to waver in their loyalty to the Federal Government. The Cheyennes and Arapahoes, numbering 1,250, have treaty relations with the Government.

Those formidable tribes between the Upper Arkansas and Texas have heretofore scorned the restraints of civilization. For two years past they have rendered the passage of the plains perilous to emigrants. Within the last year they have manifested a disposition to assume friendly relations, and upon receiving the annual present of goods, which had been withheld for the two previous years, they entered into a preliminary treaty. Thus the travel upon the great plains between the frontier and New Mexico has again been made secure, and its worst dangers averted. The recent discovery of gold within this territory has drawn thither a rapid tide of emigration, which, being precipitated amongst the tribes occupying the

gold-bearing regions of the territory, has mingled the white and red races, and forbids future difficulty. The change from savage to civilized life is very great, and is beset with difficulties and perplexities requiring the aid of soil, climate, and seclusion to encounter them successfully.

In Nevada Territory a talk was held with the Pah-Ute tribe on Walker River, which numbers 700, and with another tribe of the same Indians on Trackee River. Wunu-Mucka, their chief, made satisfactory declarations of his purpose to prevent all interference on the part of his people with the overland stage and the telegraph, which pass through their country between the Atlantic and the Pacific States.

The Washoe tribe presents a painful contrast to the other Indians, even of that region. They are a poor and degraded race, living on insects and spontaneous products.

The Apaches and Navajoes in New Mexico have been arrayed in hostility towards the whites. On the part of the former the hostility was open and undisguised, while the latter were more insidious but not less dangerous. On the other hand, the Pueblos and Mohuache Utahs have been friendly. The former are peaceable and loyal towards the Federal Government, and largely engaged in agricultural pursuits, and the latter are formidable in numbers, enterprising, intelligent, and loyal to such a degree that they tendered their services for the protection of white settlers against assaults of Confederate squads from Texas, as well as savage foes. The number of the Pueblos is 10,000; of the Navajoes, 9,000; Apaches, 10,000; Mohuache Utahs, 6,000.

In Utah Territory an unfavorable state of affairs exists among the Indians. The natural poverty of the country, the destruction of the wild game by the introduction of white men, and the selfish policy of the Mormon people, have deprived the bulk, of from 15,000 to 20,000, of the original proprietors of the country of their accustomed means of subsistence, and driven them to the alternative of laying violent hands on the property of the whites, or of perishing by want. Cattle husbandry is regarded as the surest means of relieving these Indians.

In California, a law has been passed by the Legislature, by which large numbers of Indians have been nominally indentured for a long term of years to white masters. By the operations of this law, Indians of any age under thirty, and of either sex, without their consent, or, if they be minors, that of their parents, are "indentured" to white masters, who thereupon become entitled to "the care, control, custody, and earnings" of those thus "indentured," whom, in consideration thereof, they undertake to "feed, clothe, care for, and protect;" but no security is required that this undertaking shall be performed, nor any penalties prescribed for its violation.

In Oregon, ill-disposed persons have asserted to the Indians that the Government of their

"Great Father" was destroyed, and that no more annuities would be paid. The consequence has been that the Rogue River Indians abandoned their reservation, and the Indians of other reservations threatened to follow their example. The Cayuses, numbering less than four hundred, own property valued at more than \$100,000.

The number of Indians in Washington Territory with whom treaties have been negotiated, is about 14,000. There are many tribes and bands besides who live in their neighborhood. About ten thousand whites have gone into the Nez Percés country in search of gold, but no trouble has arisen between them and these Indians.

At the Mackinac post, the greatest evil with which the Indians have to contend is whiskey. Those who live on the borders of the great lakes divide their time between the old pursuits of hunting, fishing, and trapping, and those of the interior depend on the cultivation of their farms. Large quantities of maple sugar are manufactured by them. Numbers of those Indians have been eager to manifest their good will to the Federal Government by enlisting in its military service, if the Government should desire it.

The number of the Indians holding relations with the Federal Government has been stated. The schools of all kinds among them are 162, having 5,950 pupils, under 186 teachers. The station best furnished with educational opportunities is that of New York; then follow, in the order of excellence, the Northern, Central, Southern California, Oregon, and Washington. In New Mexico and Utah there are no schools, nor in Nevada or Colorado territories. There are two hundred and forty-one farms in cultivation by Indians or for Indian use, comprising an area of 6,112 acres, of which 3,156 are worked by Indians alone.

The aggregate value of the movable personal property owned by the aforesaid Indian tribes, is \$4,670,053. Those in the most prosperous circumstances are the Shawnees, Wyandots, and Delawares, who average more than \$1,000 to each individual; the poorest are the tribes and bands in Utah. Indian wealth consists chiefly in horses, ponies, and mules; but cattle, farming implements, and household furniture are rapidly becoming important objects of acquisition.

The moral and religious cultivation of the Indians is under the care of seventy-seven missionaries, twenty-five of whom are under the care of the Methodist Episcopal Church, north and south; nineteen are in the communion of the Roman Catholic Church; nine are Baptists; five are members of the Society of Friends; three are Congregationalists; two are of the Protestant Episcopal, and one of the Lutheran Church. The remainder are undesignated. Their presence imparts to the Indians, by example as well as precept, lessons in industry of all kinds: in the arts and sciences;

in agriculture; in domestic economy; in temperance, manner of life and behavior, dress and deportment. How great are the advantages thus communicated to those children of the forest and prairie, the imagination can more easily picture than the pen describe.

* 6½ years' interest, at \$150 per annum.

† \$20,000 paid on, leaving half year's interest due on \$2,000.

The Federal Government has steadily pursued the plan of purchasing of the Indian tribes their surplus land, after a portion has been reserved, sufficiently large for them to occupy. A portion of the purchase money has generally been retained by the Government, with their consent, and invested in such securities as would yield to the tribe an annuity. The amount of such investments in the securities of the seceded States, the tribes to which they belong, the amount of interest due, and the time when the last payment of interest by these States was made, are shown in the preceding table.

INSURANCE. The amount of insurance in the United States has of late years grown to be very large, following the increase in property and the amount of general business, as well as the more strict adherence to the rule of insurance as a means of covering credits. The value of property covered by insurance risks in the United States is about \$2,500,000,000, and a large proportion of that insurance is effected in New York and the Eastern States, under the two general systems of insurance, proprietary and mutual. Before the formation of the present government, insurance seems in this country to have been confined to individual underwriters. In 1792 there was a company incorporated in Philadelphia, and in 1806 the Eagle Company in New York. Marine risks were the most sought after at those early dates in the New England States, where the interests were commercial. As the wealth and trade of the country continued to accumulate, and the operations of commerce were conducted on credits, the value of which depended in a great measure upon the safety of the goods, insurance became a necessary element in most transactions, and the demand for policies called into being a large number of companies. These have been the victims of frauds to a large extent, and have also been the means of victimizing the public through fraudulent organizations. If, on rightly conducted principles, they are the means of great benefit to the world, giving birth to numberless enterprises that would not have been undertaken if the individuals had no means of securing themselves from utter ruin through the unavoidable accidents of the elements; so also have they been the cause of a much larger destruction of property than would have taken place had they not been in existence. The total loss by fires in the United States in usual years is not far from 20 millions per annum; and in the year 1861, it has, through the operations of war, been more than double that amount.

The following is a record of the fires which occurred throughout the United States during each month of the year 1861, together with the value of the property destroyed, when the loss at each was estimated to be equal to, or to have exceeded, the sum of twenty thousand dollars, and also the day of the month on which the fire took place.

The following additional table shows the above losses during each month, compared with those of 1860:

Add to the above the value of property destroyed by fires in the United States during the year where in each instance the loss was estimated at less than twenty thousand dollars, and also the value of property destroyed in the South and West, such as the destruction of the products of Southern plantations, the burning of railroads and other bridges, together with private houses, barns, haystacks, &c., which have been destroyed by order of military commanders on both sides, and the aggregate would be increased over forty-five millions. We add the following table of estimates :

Losses as shown above.....	\$18,020,000
By fires that destroyed less than \$20,000 each.....	6,000,000
Products of Southern plantations burned.....	10,000,000
Bridges destroyed.....	6,000,000
Vessels burned.....	3,000,000
Buildings burned by military orders.....	2,000,000
Farm products destroyed.....	1,000,000

Total value of property destroyed in 1861... \$45,020,000

The following figures show the losses by fires in the United States during the past eight years:

YEARS.	Loss twenty thousand dollars and upwards.	Total Loss by all Fires.
1854.....	\$20,578,000	\$25,500,000
1855.....	18,040,000	17,000,000
1856.....	21,159,000	27,000,000
1857.....	15,792,000	20,000,000
1858.....	11,561,000	16,000,000
1859.....	16,058,000	22,000,000
1860.....	15,597,000	22,000,000
1861.....	18,020,000	45,000,000
Total in eight years...	\$131,814,000	\$194,500,000

This, although insured, is a positive destruction and utter loss of so much of the national capital, amounting very nearly to \$200,000,000 in 8 years, or one half of the value of the gold raised in California in the same period. Under the supposition that the productions of the United States are worth \$2,000,000,000, which is the census estimate, and that the dwellings are worth an average of \$500 each, the aggregate of goods and dwellings would be \$5,000,000,000, and the annual loss by fire would average two-fifths of one per cent.

The tonnage value of the United States is about \$250,000,000, and the loss of vessels is about \$13,000,000 per annum, which would be about 5 per cent.

The marine losses for three years were as follows:

Months.	Losses in 1859.	1860.	1861.
	Vessel and freight.	Vessel and freight.	Vessel and freight.
January.....	\$1,178,300	\$1,223,900	42
February.....	1,230,600	1,295,000	48
March.....	699,400	1,537,450	68
April.....	642,400	783,100	57
May.....	1,165,300	946,800	43
June.....	1,413,400	613,300	18
July.....	1,975,100	749,200	81
August.....	2,170,155	493,900	23
September.....	1,023,400	976,600	14
October.....	1,791,700	1,759,000	25
November.....	3,203,100	1,800,100	35
December.....	1,233,900	1,192,750	46
Total vessels and freight.....	\$17,901,150	\$18,325,000	452
Total cargoes.....	19,578,420	15,050,700	..
Total Marine....	37,479,570	28,882,000	..
Total Fire.....	15,577,000	16,058,000	..
Total Lake.....	1,081,011	1,156,015	..
Total loss.....	\$54,157,581	\$45,596,015	..

This immense loss of property in a single year testifies to the abundance of the national wealth, as well as to the risks that are incurred through the elements in the possession, transmission, and exchange of property. The agency of the insurance companies is very important in dividing up this loss in such a manner that

the whole capital of the country bears it rather than individuals. In respect of the fire risks, each State has different laws that govern the companies. In Massachusetts, where the most strict regulations prevail, the mutual principle has been most successful, while in New York the joint stock principle has been most popular. Where the business is skilfully conducted on sound principles, the mutual system seems to offer the most advantages, but each has its partisans, and in different States the local prejudices decide to some extent.

The difficulties of the year 1861 have had a marked effect upon Insurance, as upon most other business. The decline in the business for the year, as indicated in the amount of risks, seems to have been about 10 per cent., while the losses have not declined proportionately. Less marine business was done, because our shipping trade was interfered with by the operations of war, and what was done was more hazardous; and less fire business was done, because merchants held less stock, and people generally had less money to pay for premiums, while the events in the disturbed districts involved greater loss. The Massachusetts reports for the year 1861, as compared with the year 1860, give results as follows:

	1860.		1861.	
	RISKS.	LOSSES.	RISKS.	LOSSES.
Marine.....	\$114,350,563	\$3,714,093	\$94,024,701	\$3,451,520
Fire.....	379,624,707	1,493,941	355,987,306	1,340,060
Total.....	\$493,975,270	\$5,208,035	\$450,012,007	\$4,791,580
Decrease..	43,953,263	416,455

The decrease in marine business was, it appears, \$24,000,000, and in fire business \$20,000,000 in these Massachusetts companies. The business was divided among the several companies of that State as follows:

Massachusetts Insurance.

RISKS AND LOSSES.	1860.	1861.
<i>Marine Risks.</i>		
In 18 Stock Companies.....	\$52,154,961.50	\$39,265,893.00

In 56 Mutual Fire.....	456,676.05	340,265.85
Total Fire Losses.....	\$1,493,941.76	\$1,340,059.97
Total Losses, Fire and Marine.....	5,208,035.07	4,791,580.20

The commissioners, in respect to the cost of insurance, remark: "It would be interesting to infer the average cost to policy-holders and profit to the companies of each branch of insurance, but the returns lack the completeness and distinctness necessary to give a proper basis of facts. In the marine business, we have no means of knowing the whole or the average amount of risk borne or business done during the year, and in a year of disturbance like the past, the amount of risk outstanding at the close is hardly an indication of it. As to average profits, a question which really pertains only to Stock Companies, nothing can be determined, because the companies are chiefly mixed, insuring both fire and marine risks, while the expenses of each are not distinguished. In regard to the average cost to the policy-holder of the dollar of indemnity for loss by fire, it is possible more nearly to approach it, in regard to the two classes of Stock and Mutual Fire Companies. In the Stock Companies, the cash received for fire risks during the year, and in the Mutual Fire Companies, the cash received less the cash dividend returned during the year, represent very nearly the whole premium for the risks borne during the year on which the losses paid have occurred. From this we can easily infer how much the policy-holder has on the average had to pay in each year, in each class of companies, for every dollar of indemnity he has received."

In 1860.	Premiums.	Losses.	Cost of each \$ of indemnity.
Stock Companies.....	\$1,245,045.00	\$927,832.00	\$144.97
Mutual Fire Companies	538,780.00	456,976.00	117.93
Total.....	\$1,883,825.00	\$1,384,808.00	136.06
in 1861.			
Stock Companies.....	1,283,326.00	963,266.00	133.22
Mutual Fire Companies	454,446.00	349,265.00	130.11
Total.....	\$1,737,772.00	\$1,312,531.00	132.40

The whole number of home companies re-

ported in this year compared with last is as follows:

	1860.	1861.
Stock Companies.....	35	34
Mutual Marine and Fire and Marine Companies.....	14	13
Mutual Fire Companies.....	65	61
Total.....	114	108

The laws of New York, where the largest amount of insurance has been effected, indicate the changes which have taken place in the course of business. Up to the revision of the State Constitution in 1846, it was usual to grant special charters for the incorporation of companies, and fire, marine, and life powers were often granted to one and the same company. The growing jealousy of the people in respect to all corporations, led to the enactment of general laws, and in 1849 a general insurance law was passed by which any number of persons exceeding fifteen might organize into a company for fire and marine insurance, but it was expressly ordered that no company insuring lives should take any other kind of risks. In 1853 a new law was passed, enacting that no fire company should take any but fire and internal navigation risks.

In 1836, when the great fire of 1835 had swept down all the companies of that day, 11 companies on the mutual plan were organized; these still exist. In 1837, 4 more were started, and 4 others were added up to 1849, when under the general law 42 were started, of which 9 only remain. Of late years, the increase of companies has been very rapid, and the profits large. In the last 8 years the 21 companies organized prior to 1838 have declared an average of 142 per cent., or 18 per cent. per annum average. The dividends of other companies are not so large, but give very good investments. In 1861 the New York State companies were as follows:

	No.	Assets.	Net Premiums.	Losses.	Dividends.	Risks.
New York Joint Stock Fire.....	96	\$26,860,190	\$7,261,595	\$3,984,441	\$2,469,090	\$829,538,848
" Mutual ".....	25	4,560,159	1,029,167	120,486	..	\$7,136,107
" Marine.....	13	21,867,198	14,935,079
" Life Insurance.....	11	12,772,662	2,376,660	745,408
Total New York.....		\$66,060,209	\$25,002,501	\$4,853,330	\$2,469,090	\$916,474,965

The Mutual Fire Companies, now in New York State, compare as follows:

	No.	Assets.
1853.....	62	\$11,621,914
1859.....	28	4,793,506
1860.....	27	4,128,101
1861.....	25	4,560,159

This indicates the decline of the mutual principle in the State as applied to Fire Insurance. These are mostly, however, in the interior of the State, while the Stock Companies are more in the city of New York. Of the existing Stock Companies 21 were organized prior to 1838; under the act of 1849, 38; and under the act of 1853, 37 were organized, making the total of 96. Of these 11, with a capital of \$1,-

900,000, were organized in 1859. In addition to the New York companies doing business in New York, there are English companies, and also large institutions chartered in other States. Formerly, or up to 1836, foreigners could do business in New York only by paying a tax of 10 per cent. This was reduced to 2 per cent., and this tax gave a revenue of \$3,183, or \$813 per annum more than was derived from the 10 per cent. tax. The two great fires of 1835 and 1845 demonstrated the importance of having as much capital applied to the insurance of city property as possible. Instead of keeping foreign capital out by a high tax, it was manifestly advantageous that a portion of the city losses should be borne by that capital.

FIRE INSURANCE COMPANIES OF NEW YORK AND BROOKLYN, FOR THE YEAR ENDING DEC. 31, 1861,
according to the Official Returns made to the State Insurance Department.

Date of Organization.	NAME OF COMPANY.	Chartered Capital.	Total Assets on Dec. 31, 1861.	Total Premiums received in 1861.	Total Income.	Prior Losses paid in 1861.	Losses paid for 1861.	Stock Dividends.

ÆTNA.—\$13,227,534 of risks was inland navigation; premium thereon, \$173,232 68, and loss \$15,346 13; fire losses, \$700,269 80.

DELAWARE MUTUAL.—Marine portion of risks written \$26,831,752; perpetual fire ditto, \$26,600.

AMERICAN, BOSTON.—Fire premium, \$22,542 59; marine, \$184,024 80.

FRANKLIN, PHILADELPHIA.—Amount of risks written as in this table represents only the temporary fire risks. The Company holds \$36,652,985 of perpetual fire risks. The officers of Franklin did give an estimate of "reinsurance," and the Superintendent put it down at 50 per cent.

HOME, NEW HAVEN.—Marine risks written in 1861, \$1,998,893 75, and inland navigation, \$120,445. This Company has given up marine business.

JERSEY CITY FIRE.—Perpetual fire risks written \$9,000.

MANUFACTURERS', BOSTON.—Marine risks written \$12,271,915; premium thereon, \$218,619 43; fire premium, \$71,917 10.

MERCHANTS', BOSTON.—Marine risks, included in returns, \$2,964,859; fire premium, \$60,496 78.

MERCHANTS', PROVIDENCE.—Marine risks, included in returns, \$2,138,130.

NATIONAL, BOSTON.—This Company returned \$200,000 of capital to stockholders in 1861. Marine premium, cash and note, \$87,457 49.

INSURANCE COMPANY OF NORTH AMERICA, PHILADELPHIA.—Marine portion of premium returned, \$357,120 77; fire, \$36,405 31; marine loss paid, \$260,911 66; fire ditto, \$51,612 91.

Number of Fires in New York, 1854-1860. Amount insured on property damaged and lost by fire. Amount paid for loss and damage by fire.

YEARS.	No. of Fires.	Amount insured.	Amount paid for loss and damage.
1855.....	344	\$3,140,930	\$941,147
1856.....	315	4,011,848	1,267,812
1857.....	336	4,056,092	732,014
1858.....	302	2,948,455	632,108
1859.....	310	2,643,795	1,100,290
1860.....	397	5,416,700	1,390,594
Average of six years..	2,004	\$22,217,345	\$6,064,260
	334	3,702,974	1,010,710

With the exception of the year 1860, during which the number of fires was excessive, the return shows the normal regularity which the result of similar statistics in the Old World naturally led us to expect. The average number of fires per annum, as shown in the above table, is 334, from which 1860 differs by an excess of 63. The average in the years 1855-1859 is 321, and the greatest variation in any one year is reduced from over 15 per cent. to less than 7 per cent.

Column 2 exhibits the amount reported as insured on the property damaged, or destroyed by the fires. Taking the years from June, 1854, to May, 1860, as a basis, the *amount paid* is to the *amount insured* on the property as 27.96 : 100.

There are many interesting deductions which might be made from this table, though until much more detailed records are preserved, it will be impossible to reduce fire insurance to a mathematical basis similar to that which is now the groundwork of life insurance. The Fire Marshal is doing much, but his labors are not so valuable as they would be, were the companies to publish a detailed report of the risks and losses of their respective business. A rough estimate may be made of the amount of property insured in New York City by assuming the amount of premiums on risks "up town" and "down town" as the total premium received for insurance in New York. This was stated in Mr. Birney's "Assessment Report for account of Fire Patrol," as follows:

1859.....	\$2,196,367
1860.....	2,142,500

If we assume the average rate per cent. of all the companies and for all hazards to be 40 cents, then the total amount of property insured in this will be—

In 1859.....	\$549,091,750
In 1860.....	535,625,000

The assumption here is necessarily wide of the truth, because the two districts do not embrace all the property insured in the city, and the supposed rate per cent. is quite as likely to be in error as is the valuation of the property. On the basis of these figures the amount paid for loss is to the total amount insured in the city as 2003836 : 100.

The insurance on inland transportation has been increased in proportion to the extension of western commerce. The Lake losses in the past year were as follows:

1860.

	Vessels.	Cargo.	Total.
Steam.....	\$336,808	\$160,575	\$497,383
Sail.....	327,778	330,559	658,332
Total.....	\$664,581	\$491,434	\$1,156,015

1861.

	Vessels.	Cargo.	Total.
Steam.....	\$217,250	\$85,845	\$302,625
Sail.....	256,120	308,602	564,722
Total.....	\$473,400	\$393,947	\$867,347
Decrease.....	191,181	97,487	288,666

The value of steam tonnage on the Lakes has been \$5,473,800, and of sail tonnage, \$6,388,650. From this statement it will be seen that there is a great disproportion between the losses by steam and sail vessels; also, that the loss of life and property last year was much less than in 1860.

In ocean navigation, the past has been by no means a favorable year. The great loss of business growing out of the stoppage of the trade was followed by many disasters through the enemy's privateers, which however did not fall upon the insurers. The marine companies, however, were enabled to charge and obtain higher rates for war risks, which greatly improved their condition.

The premiums and losses of the New York City companies were as follows:

	Premiums.	Losses.
Marine Insurances.....	\$7,621,913	4,234,470
Fire Insurances.....	7,231,926	1,758,631
Total.....	\$14,853,839	5,993,101

The leading marine companies of New York were as follows:

	Total Premium.	Premium marked off as earned.	Losses paid.
Atlantic.....	\$5,314,576 38	\$4,155,165 78	\$2,311,650 29
*Union.....	725,744 22	518,082 84	162,077 73

Total, 1861..	\$15,521,340 20	\$12,827,911 92	\$7,902,168 58
" 1860..	17,559,943 16	12,620,210 04	10,745,314 23

On the results of the year the trustees of the Atlantic, after reserving two and a quarter million dollars and paying six per cent. interest on outstanding scrip, direct payment of the scrip of 1860, on 4th February, and declare a new scrip dividend of 30 per cent. on the net earned premiums of 1861. This makes the total profits of the company for nineteen and a half years, \$12,940,210.

* The premium includes \$45,400 46 for fire risks, and the losses \$10,753 44, on same account.

† Losses include "estimate of losses not adjusted."

‡ The Columbian statement is for fourteen months' business, owing to alteration of closing period for financial year. Pacific losses include estimate of claims ascertained but not due.

The Union, however, upon a less extent of business, declared a dividend of 31 per cent. on the net earnings for 1861; also a payment of six per cent. interest on old scrip, and after reserving one million dollars, directs a payment of 50 per cent. of the scrip of 1854, on 4th February.

The Pacific pays 6 per cent. interest on outstanding scrip, and declares a new scrip dividend of 10 per cent. on the business of 1861.

The Mercantile has improved its business considerably, paying 6 per cent. interest on scrip, 4 per cent. dividend to stockholders, and declaring a new scrip dividend of 12 per cent. on the net earnings of 1861.

The Columbian has suffered the most severely in the year, and is obliged to recall the balance of the scrip issue of 1858. The company shows assets of \$918,453 50, and paid 3½ per ct.

The Neptune has also been unfortunate, and has to recall \$28,300 of the outstanding scrip. The assets of the company are \$454,734 12.

The Washington is making a profit of \$18,004 75, but is content with paying seven per cent. interest on outstanding scrip, and shows a clear asset of \$251,283 59.

The different companies throughout the country do not make such concentrated reports as that they can be annually collected into a general table for annual comparison, by which, if it were possible to reproduce it, to observe the gradual increase of property covered by insurance. The following brings together a few of the aggregates, which carry the gross amount in excess of 2,050 millions. All the risks taken by the companies of the United States, would swell the amount to at least \$2,500,000,000. According to the leading returns, however, the capital employed and the amount at risk with the fire companies, were in 1860 as follows:

COMPANIES.	No.	Capital and Assets.	Fire risks.
New York Stock.....	96	\$26,323,384	\$829,338,563
New York Mutual.....	23	4,793,506	87,136,107
Massachusetts.....	99	6,353,100	855,687,306
New Hampshire.....	23	89,784,084
Providence.....	6	2,419,633	26,643,143
Connecticut.....	12	5,364,636	279,332,184
Philadelphia.....	10	6,510,601	139,229,374
Jersey City.....	1	179,713	5,231,061
Peoria, Ill.....	1	363,995	6,406,377
Cincinnati.....	18	749,808	14,000,000
Augusta, Ga.....	1	952,553	7,000,000
Charleston.....	2	98,000,800
New Orleans.....	9	6,788,081	221,100,000
			\$2,109,294,804

In addition to this are other amounts, probably \$50,000,000 of risks taken by English companies. This vast amount of property insured against fire, is the growth of the last 50 years, and it may be compared advantageously with the amount of risks abroad:

Great Britain fire risks.....	\$3,905,452,665
France fire risks.....	6,500,000,000
Germany fire risks.....	4,000,000,000
United States.....	2,500,000,000

Life insurance, which in England has flourished about 150 years on a scientific basis, has only of late years made much progress in the

United States, but seems of late to meet with more encouragement from the public. In New York there are altogether 12 companies doing business, which have a very good standing. In Massachusetts, however, more strict attention is paid to the condition of the institution, and the annual report of the commissioners there is justly regarded with respect, where it confines itself to the legitimate objects for which it is created. Its reputation is, however, at times damaged by the introduction of irrelevant and objectionable matter. The law of Massachusetts requires that all companies that undertake to do business there, shall furnish such full returns as will, upon analysis, justify confidence in the safety of the company. These provisions are so rigid, that while many companies might object, the fact that a company does do business in Massachusetts acts as an indorsement to its standing. As this return for 1861 embraces the leading companies, it gives an idea of the extent of the operations. (See table A on the following page.)

The following gives the computed aggregate operations for many years:

Whole Life Policies of Nineteen Life Insurance Companies doing business in Massachusetts, outstanding November 1, 1861, arranged according to the years in which they were issued, each year ending November 1.

YEAR.	Number of Policies.	Amount Insured.	Net Value.	Ratio of Value to Amount

Additions.....	135,859 35	58,313 05	42.93
Totals.....	53,348	\$144,253,449 43	\$14,424,743 81	10.00

Notwithstanding the violent disruption of political and social ties, and the suspension of amicable relations between the two great sections of the country, which characterized the year embraced in this report, the business of life insurance advanced, though not so rapidly as during the previous year. The aggregate amount insured by the nineteen companies doing business in Massachusetts was \$152,937,587 on the 1st November, 1861, against \$151,321,229 in 1860. Thus the new business has on the whole a little more than filled the chasm caused by the war, which at once swept away large num-

bers of Southern policies from the older companies. The values of these Southern policies were not wholly forfeited to the companies, many of the holders having taken care to surrender before hostilities commenced, and large amounts were paid by some of the companies even afterwards.

Claims by Death against Nineteen Life Insurance Companies doing business in Massachusetts, for the year ending Nov. 1, 1861.

Collating the returns of the last and two previous years, we find the death terminations of policies in all the companies for the three years from November 1, 1858, to Nov. 1, 1861, to be 1,364, and the years of life exposed to death on all policies in force during those years, counting the policies of the deceased as having been in force half a year, to be 154,761.05. The tables I., II., and III. give the amounts of life exposed

and the deaths at all the different ages, aggregately, in classes, and by the years of the policy, tending to show the effect of selection, and the risk of short-term insurance compared with insurance on the whole life. It will be seen that, as far as this observation goes, it tends to show that in no part of the scale of life, unless it be on the earlier years, where the amount exposed is too small to warrant any conclusion, is the mortality to be expected quite as high as that of the standard adopted for the valuation. The difference, indeed, is rather astonishing, and such as can hardly be expected to be maintained in the future as the grand average. There is room, however, for a great decline before reaching the line of English experience.

The proportion of deaths in New York is large as compared with foreign cities. The city of London has a population of millions; it is surrounded by low lands, and the sluggish Thames, at times almost stagnant, receiving the discharge of its sewers and the filth of its streets, flows through it, and at times almost stagnates in its midst. Yet the vital statistics give the proportion as 1 in 45.

The city of New York numbers about 1,000,000, lying on the sandy ridge of Manhattan Island; is fanned by the breezes of the ocean, and has both sides washed by the swift currents of the North and East rivers; yet its proportion of deaths is as one to 36. Much of this may be, and doubtless is, due to the large amount of immigration annually of poor and distressed persons, who crowd badly-ventilated dwellings that are the centres of infection. The organization of wise sanitary measures, and their efficient enforcement, will no doubt do much towards bringing down the proportion of deaths, not only in this but in other cities of the Union, within the operation of life companies.

TABLE I.

The Combined Mortuary Experience of all the Life Insurance Companies doing business in Massachusetts for the three years ending Nov. 1, 1861, compared with what was to be expected from the rate of Mortality, adopted by the Insurance Commissioners, derived from the experience of Seventeen English Offices.

From tables I. and II. it is also apparent that the mortality in our own companies has pressed more heavily, compared with that of the English, on the ages below 40 than on those above it. For example, the average age of the whole 154,761 years of life exposed was 41.51 years, and the average age of those dying from it was 45.27 years; while the average age of the 2,019 that should have died from the same amount of life exposed at the same ages by the English Combined Experience table would have been 46.20 years, or about one year older. Again, in table II., the life policies from which the first three years are excluded give the average age of the living 44 years, and the average of the dying 47.98 years; while the average age of the dying by the Combined Experience table on the same life at the same ages would have been 50.06 years. It is quite remarkable that this amount of 89,428 years of exposed life, from which we must suppose the

* There will be noticed a deficiency of five deaths in this table, as compared with Tables I. and II. Four of these are accounted for by the omission from this table of the experience of the Massachusetts Hospital Company, which included four deaths occurring in the 19th, 22d, 25th, and 34th years of the policy respectively. The other probably proves an error in Tables I. and II., which there has not been time to correct by going over the voluminous tallies employed to classify more than 150,000 years of policy by the ages. It will be noticed by comparison of footings that a rigid exactness of multiplication and division has not been obtained, but great confidence is felt that no inaccuracy has been committed sufficient to impair the practical value of the results. It is to be remarked that in this table the life exposed is grouped in "years of policy," as they stand on the Registry, from November to November. Hence a policy may be counted in its second year which has existed but a day, and all the policies of the first year average only six months from entry, of the second year eighteen months, and so on.

favorable influence of selection to have nearly, if not quite, ceased, gives a mortality which is, to that of the English Experience table, which included the benefit of selection—though of course not to so great a degree, because their business was not increasing so fast—as 100 to 131.74.

IOWA, one of the interior or Western States, was admitted into the American Union, in 1845. It is situated between lat. 40° 20' and 43° 30' N., and long. 90° 12' and 96° 53' W. from Greenwich. Its extent from N. to S. is 208 miles, and from E. to W. about 300 miles; its area is 50,914 square miles, or 32,584,960 acres. Population in 1860, 674,948. It is bounded N. by Minnesota, E. by the Mississippi, which separates it from Wisconsin and Illinois, S. by Missouri, and partly by the Des Moines River, and W. by the Missouri and Big Sioux rivers, which separate it from Nebraska and Dakota. It is divided into 99 counties. The valuation of the real and personal property of its citizens in 1850 was \$23,714,688; in 1860, \$247,388,265.

Great zeal has been manifested by the State in the prosecution of internal improvements. On the 1st of Jan., 1862, it had 2,087 miles of railway completed and in progress, of which 892 miles were open for traffic. These 892 miles cost, for construction and equipment, the sum of \$21,382,557.

The vote of the State for President in 1860 was as follows: Lincoln, 70,409; Douglas, 55,111; Breckinridge, 1,048; Bell, 1,763. The population of the State at the same time was: white, 673,925; free-colored, 1,023. The Governor is elected for four years. The Senate consists of thirty members, elected for four years, and the House of fifty members, chosen for two years.

The State Bank of Iowa, the only authorized or chartered bank of issue for the State, at the commencement of the year 1861, made the following statement of its condition:

Specie in bank.....	\$416,339.80
Bank Notes on hand.....	439,460.00
Due from other banks.....	297,716.88
Discounts.....	1,164,565.72
Capital of the bank.....	416,339.87
Circulation.....	880,308.00
Due other banks.....	24,478.92
Deposits.....	966,300.52

The great staples of Iowa are her cereals. Of these, the crop of 1861 was, in round numbers:

Wheat, bushels.....	23,000,000
Indian corn, ".....	41,000,000
Oats, ".....	5,880,000

Total bushels.....69,880,000

Some of the other products were, in 1860:

Irish potatoes, bushels.....	2,700,000
Sweet ".....	51,000
Butter, lbs.....	11,526,000
Cheese, ".....	901,000
Hay, tons.....	707,000
Flax, lbs.....	99,000
Wool, ".....	653,000
Live stock, value.....	\$21,800,000
Home Manufactures, ".....	814,000
Lumber, ".....	2,880,000
Flour, ".....	6,950,000
Steam Engines and Machinery, value ..	190,000
Agricultural Implements, ".....	110,000
Tanned Leather, ".....	82,000
Malt Liquors, ".....	221,000

During the year 1861, the prospective scarcity of cotton led to the increased culture of flax, and the introduction of machinery for the production of flax cotton. Extensive establishments supplied with the patent brakes for preparing the flax cotton were erected at various points in the State. The soil of Iowa is admirably adapted to the culture of flax, and it is very probable that it may become one of its most important crops.

At the commencement of the war, Gov. Kirkwood exerted himself to the utmost of his ability to raise troops for the defence of the State, and for the purpose of complying with the calls of the U. S. Government—a task of considerable difficulty, for Missouri, on the southern border of the State, was not then loyal, and Nebraska, at the West, though loyal, had too few inhabitants to be able to oppose much resistance to an armed invasion. He summoned the Legislature of the State to meet in extra session on the 15th of May, and on the 16th of that month delivered his Message, in which he made use of the following language:

"In this emergency, Iowa must not and does not occupy a doubtful position. For the Union, as our fathers formed it, and for the Government they formed so wisely and so well, the people of Iowa are ready to pledge every fighting man in the State, and every dollar of her money and credit; and I have called you together in extraordinary session for the purpose of making that pledge formal and effective.

"The procuring of a liberal supply of arms for the use of the State is a matter that I earnestly recommend to your early and serious consideration. The last four weeks have taught us a lesson which I trust we may never forget—that peace is the proper time in which to prepare for war.

"I feel assured the State can readily raise the means necessary to place her in a position consistent alike with her honor and her safety. Her territory, of great extent and unsurpassed fertility, inviting and constantly receiving a desirable emigration; her population of nearly three-quarters of a million of intelligent, industrious, energetic, and liberty-loving people; her very rapid past and prospective growth; her present financial condition, having a debt of only about one-quarter of a million of dollars, unite to make her bonds among the most desirable investments that our country affords."

In June the Legislature voted a war loan of \$600,000. The State of Iowa made a small debt, but its constitution provides that "the credit of the State shall not be given in any manner for any purpose. To meet casual deficits in the revenue, the State may borrow not exceeding \$250,000, at any one time, and the State may contract debt to repel invasion or suppress insurrection." Under the latter clause, a debt was contracted of about \$800,000, 7 per cent. interest, making the present State debt about \$1,000,000.

The progress of secession was watched with

much solicitude in Iowa, and upon the call of the President for a military force, the troops of the State were among the earliest in the field. The full number furnished during the year exceeded twenty thousand men, who were generally among the bravest in the field.

ITALY, a kingdom of southern Europe, comprising the whole of the Italian peninsula except Venetia and a portion of the former "States of the Church," and including also the islands of Sicily and Sardinia, and the Cisalpine provinces of Piedmont and Lombardy. It is bounded N. by Switzerland, N. E. by Tyrol, Venetia, and the Adriatic, S. E. by the Ionian Sea, S. W. by the Mediterranean, and N. W. by France. Population in 1861, 21,728,452.

At the commencement of the year 1861, Italy was in a transition state. Tuscany, Modena, Parma, Umbria, and the Marches, which, after the war of 1859, had sought to annex themselves to Sardinia, had, by solemn vote, in popular suffrage, resolved on their annexation, and, in accordance with the royal order of Jan. 3, 1861, elected deputies to the Sardinian parliament at Turin, which was to assemble on the 18th of February. The kingdom of the Two Sicilies had, under the energetic management of Garibaldi, been completely revolutionized, and on the 26th of Nov. 1860, that chief had delivered it into the hands of Victor Emmanuel, king of Sardinia. Three cities only, Gaeta, Messina, and Civitella, remained to their former king, Francis II., and these were besieged by the Sardinian forces. A popular suffrage had ratified the union of this kingdom to that of Sardinia, and delegates were elected from it to the parliament of Turin, in January, 1861.

On the 1st of January, the King of Sardinia issued an address to the people of Italy, recommending prudence, patience, and, above all, harmony. The election of deputies ordered resulted in a triumph of the Liberal party, in opposition to the clergy, who, except in the old kingdom of Sardinia, had reviled and resisted the annexation, and the measures which would be likely to follow it.

The speech of the King at the opening of the session, on the 18th of February, was well adapted to promote harmony and judicious action. "To your wisdom," he said to the deputies, "I commit the concerns of a free and almost wholly united Italy." After enumerating the claims of England and France to their grateful remembrance, he added, "In the consciousness of its power, the kingdom of Italy can follow the counsels of prudence. I have hitherto raised my voice for acts of daring, and even rashness; but it is as wise to wait at the proper moment, as to dare at the proper moment. Devoted to Italy, I have risked for her my life and my crown, but no one has a right to put at hazard the existence and the destinies of a nation." Count Cavour, the prime minister, (*see* CAVOUR,) sustained the pacific policy of the King in the parliament, and asked that the title of "King of Italy" should be conferred on Vic-

tor Emanuel, that thus the unity of Italy might be consecrated in the royal person. The law, enacting this as the royal title, passed the Senate on the 26th February by a vote of 126 yeas to 2 nays, and the Chamber of Deputies, on the 11th of March, unanimously; and on that day the King assumed the title, which was recognized by England on the 30th of March, and subsequently by Switzerland, Greece, Denmark, Portugal, the United States, and, on the 10th of June, by France. Austria protested against it, but without effect.

The Roman question was, of course, the most absorbing one with the Italian parliament, and it was, as it still is, involved in great difficulties. It may be well, as it has not been fully understood in the United States, to give briefly its history.

Since 1848, the Roman Government has chiefly been maintained by the overawing force of Austrians in the Legations and the French army in the capital. The defeats of the Austrians by the French and Sardinians at Magenta and Melagnano, in the summer of 1859, were immediately followed by the evacuation of the States of the Church by the Austrian garrisons. Upon this, several of these States at once revolted from the Pope, and proclaimed Victor Emanuel king or dictator. Bologna was the first in this movement, proclaiming for the Sardinian king, on the 13th of June. Forlì, Faenza, and Imola followed her example on the 15th; Rimini, Cesena, and Ravenna on the 17th; Perugia and its vicinity, on the 18th; and Fano, Urbino, Fossebrone, Sesi, and Ancona a few days later. Thus within a space of two weeks, one half of the Papal territory was lost. It was charged that this was done at the instigation and with the assistance of foreigners; but the error of this statement will be evident, if we call to mind the fact that even under the severe repressing influence of the Austrian garrisons, revolts against the Roman authority had often occurred, and the moment the pressure of these garrisons was removed, they returned to their former condition of disaffection and hostility to that Government.

On the 18th of June, the Pope issued an encyclical letter, in which he represented the nature and causes of the revolution; and on the 20th of June, he delivered an allocution, in which he threatened excommunication against all who, "by act or counsel or in any other way, have dared to violate, disturb, and usurp our and this Holy See's civil power and jurisdiction, and the patrimony of the blessed Peter;" and called upon the sovereigns of Europe to use their united zeal and counsel for the preservation of his temporalities intact. The Roman Government also took prompt measures to reduce the revolted provinces to obedience. By the end of June its authority was restored, for the time, in every part of the Papal dominions, except the four Legations of Bologna, Ferrara, Ravenna, and Forlì, but at the cost of a terrible amount of violence and

bloodshed. The Government next attempted the subjugation of these Legations, but in vain. Massimo d'Azeglio, the commissary extraordinary, with two Piedmontese regiments and a large body of volunteers, had already arrived at Bologna, and was ready to meet the Roman troops. The Pope consulted the French ambassador as to the best means of subjugating these revolted provinces; the ambassador advised delay, and promised to demand from the court of Turin the withdrawal of the Piedmontese troops. The peace of Villafranca occurred soon after, and the Pope asked the French Government to restore his authority in the Romagna; the Emperor refused on the ground of *quasi*-engagements of France to Italy, and postponed the matter till the close of the conferences at Zurich. A few weeks later, the Pope addressed a letter to the Emperor, asking that the French should garrison the Marches of Ancona and other points then occupied by Roman troops, so as to leave them at liberty to recapture the Legations. To this request the Emperor gave a negative reply.

Thus repulsed, the Roman Government turned to Spain, and applied for a sufficient number of troops to put down the insurrection. The Spanish Government promptly responded by a resolution to put 20,000 troops at the disposal of the Pope. But here a new difficulty occurred; it was necessary to notify the French Government of their intention, and that Government at once responded that they would neither consent to nor permit the entrance of a Spanish army into the Roman States; that the intervention of Spain would only produce fresh complications in the affairs of Italy; and that France would consider such a movement on the part of Spain as a declaration of war. As nothing was further from the wishes of Spain than a war with France, this reply effectually crushed all hopes of aid from that quarter. A subsequent application to the King of Naples was frustrated in a similar way.

On the 29th of August, 1859, the French Minister at Rome, the Duke de Grammont, had an audience of the Pope, and stated to him the wishes of the Emperor in regard to the Legations. He declared that the people had themselves cast off the Roman authority, which had indeed been exercised in such a way as to merit the disapproval of other nations; that he could not interfere consistently with his own position, to restore them to a Government which they hated, and advised him to consent to their separation, he having the right, for the first time only, to nominate the governor of the new republic. The Pope expressed the greatest surprise at these proposals, and indicated in the strongest terms, his determination never to relinquish any of the rights of the Holy See. "In that case," replied the Duke de Grammont, "France will withdraw her troops from Rome." The Pope is said to have answered: "Your Government, then, wishes to dethrone me. It knows that, with the revolutionary spirit which is

abroad in Italy, the withdrawal of its troops to-day will be the signal for the outbreak of the revolution to-morrow."

The first result of the refusal of the French Emperor to restore the Legations to the Pope, was the consummation of the revolution in these provinces. On the 6th of September, the national assembly of Bologna voted unanimously the cessation of the Roman authority, and the following day the same body decreed annexation to the constitutional kingdom of Victor Emanuel, and appointed a deputation to present their petition to that monarch. The interview for its presentation was held on the 24th of September, and the result, though favorable, was not decisive. Formal annexation took place, however, as a result of popular suffrage in the Legations on the 11th of March, 1860. The vote for annexation was almost unanimous. In the interval between the presentation of their petition and this suffrage for annexation, a pamphlet, evidently inspired by the French Emperor, and entitled *Le Pape et le Congrès*, had appeared, (December 22, 1859,) which had dexterously combated the claims of the Pope to a temporal sovereignty, and declared its incompatibility with his spiritual domination. This pamphlet produced an extraordinary effect, rousing the ultramontane and clerical party in France and all over Europe to intense hostility to the Emperor, (*see FRANCE*), and resulting in the abandonment of the proposed European Congress on Italian affairs, inasmuch as the Austrian Government required an engagement from the French Government neither to bring before the Congress the measures which the pamphlet advocated, nor to support them if brought forward by others—an engagement which the French Government would not consent to make.

Foiled in his attempts to enlist the aid of foreign powers in the subjugation of his former provinces, the Pope now appealed to the faithful throughout Europe to furnish him with the men and means for recovering his lost patrimony. M. De Lamoricière, a French general of high reputation, volunteered to take command of his troops. Large collections of Peter's pence were made throughout the Catholic world, and volunteers from Belgium, Austria, and Ireland joined the Roman army in considerable numbers. By the end of May, 1860, Lamoricière found himself at the head of 18,000 men, a force he believed fully equal to the reduction of the provinces which had annexed themselves to Sardinia. After spending the summer in disciplining his force, he took armed possession in September of the fortress of Ancona and other points in Umbria and the Marches of Ancona, to put down by force the tendencies to revolt which were daily becoming more evident there. Garibaldi was at this time engaged in the revolution of the kingdom of the Two Sicilies, and had entered Naples on the 8th of September. The people of Umbria and the Marches had appealed to the Sardinian Government for pro-

tection against the army of Lamoricière, which, like the Swiss mercenaries, was guilty of great outrages. Count Cavour on the 8th or 9th of September, had despatched an ultimatum to the court of Rome, demanding the immediate disbandment of that army as an offence against the public conscience of Italy and Europe. This demand being refused, on the 11th of September, the Sardinian army under command of General Cialdini crossed the Roman frontiers, welcomed everywhere by the people. Perugia, Spoleto, Pesaro, Fano, and Sinigaglia surrendered in rapid succession, and by a forced march of 38 leagues in 24 hours, Cialdini succeeded in reaching the heights of Osimo and Castel Fidardo, and thus prevented the junction of Lamoricière with the other Roman troops. The latter was thus compelled to give battle; and though he had 10,000 men and Cialdini but 8,000, yet after a sharp fight of some hours, Lamoricière was completely routed, his army scattered, and he himself abandoned the field and fled with a few attendants to Ancona. Cialdini pursued the Roman forces to Loreto, and captured the entire body. Ancona only now remained to the Pope of the whole provinces of Umbria and the Marches, and this Cialdini captured after a few days' siege. The result was a further accession, again by popular suffrage, to the Sardinian sway, of Umbria, with a population of 472,639; the Marches of Ancona, with 924,055 inhabitants; and Viterbo, with 129,372; leaving under the sway of the Pope only the comarca of Rome, Civita Vecchia, Velletri, and Frosinone, with an aggregate population of only 562,787 inhabitants. Though the number of his subjects were so greatly reduced, the Pope abated nothing of his demands.

In vain have the French Emperor and the King of Italy sought to pacify and arrange the complicated affairs of temporal Rome. To every proposition aimed at an adjustment of the existing difficulties, which looks to the restriction or abdication of his temporal sovereignty, the sole reply of the Pope is, "*Non possumus*," (we cannot.)

In consequence of the encouragement of the insurrection in the kingdom of the Two Sicilies by the King of Sardinia, France and Russia withdrew their ambassadors from Turin; and the former power, by stationing its fleet in the harbor of Gaeta, prevented an attack upon that fortress, the stronghold of Francis II., by the Sardinian navy. Convinced at last of the impossibility of the recovery of his ancient kingdom by that monarch, the French emperor withdrew his squadron early in February, and on the 14th of that month Gaeta surrendered, and the ex-king of Naples escaped on board a French war steamer to Rome, where he remained during the year, endeavoring, as opportunity offered, to raise insurrections, and encourage brigandage in his former dominions. Messina surrendered on the 18th of March, and Civitella on the 20th.

The reorganization of the newly-acquired

territory of the Italian king in such a way as to encourage and promote free institutions, commerce, agriculture, and education, which occupied the Italian parliament for some time, progressed favorably. The prime minister counselled patience and forbearance in relation to Rome, and curbed the fiery spirits, who proposed forcible measures; he also advocated delay and patience in regard to Austria, believing that her Hungarian troubles would enure to the benefit of Italy, and that Venetia might be gained without a war.

The following statement shows the debt of the new kingdom in 1861, and the different sources from which it has been accumulated; the new kingdom, of course, assumes the debts of its constituent States.

Debt of the Kingdom of Sardinia previous to 1848.....	\$27,000,000
Debt of the Kingdom of Sardinia created between 1848 and 1860.....	204,994,119
Duchy of Parma.....	2,111,643
Added under the administration of Farini..	1,000,000
Duchy of Modena.....	2,211,236
Added under the administration of Farini..	1,000,000
Duchy of Tuscany.....	30,416,000
Added during the administration of Ricasoli..	11,384,000
States of the Church annexed to Sardinia..	8,315,424
Administration of Marquis Pepoli.....	2,600,000
Kingdom of the Two Sicilies.....	110,000,000
Loan contracted by the New Kingdom.....	140,000,000
Total debt.....	\$536,032,422

Diplomatic relations were renewed between France and Italy in June, but accompanied by declarations on the part of the former power, of non-responsibility for, and non-approval of, certain measures of the latter. The position of the country at the close of the year in relation to the two great questions, the probable possession of Rome as its capital, and the future annexation of Venetia, was not entirely satisfactory.

The people of the late Neapolitan kingdom, so long oppressed, and kept in ignorance and degradation, by the grinding tyranny of the Bourbon kings, seem hardly fitted to appreciate the liberty they have gained; and disorders have been rife there through the year, fermented in part, doubtless, by the emissaries of Francis II., whose residence at Rome gives him ample opportunities for such intrigues, but partly also resulting from the license indulged in by a people unaccustomed to liberty. The suspense to which the nation has been subjected by the delay in the solution of the great questions so vital to its national unity and completeness, have exerted an unfavorable effect

upon it. Rome is its natural capital, and no jealousies would be raised against its selection, but that Naples, and Turin, Milan, Florence, and Genoa, are rival cities, and the residence of the court at either, excites the envy of the others. The condition of Venetia under the oppressive rule of Austria, excites the sympathy of the adjacent States for her, and their indignation against her oppressor; and that calmness and peace essential to a nation's prosperity can only be attained when the dreams of her great statesmen are realized, and the whole of Italy owns but the sway of a single ruler, and is united under a free and liberal Government, with its capital on the banks of the Tiber.

ITURBIDE, MADAME HUATE DE, ex-Empress of Mexico, and widow of the first and only emperor of Mexico of European descent, Augustin de Iturbide, died in Philadelphia, March 21, 1861, at the age of about 70 years. Since the execution of her husband by the Mexican Government in 1824, she had resided with her family in Philadelphia, and was endeared to a considerable circle of friends by her amiable and excellent qualities. One or two of her sons have resided in Mexico of late years, and have held places under the Mexican Government, from which she received a pension. Augustin de Iturbide, one of the best men whom Mexico has nurtured, was the leader of that country in throwing off the Spanish yoke, and a grateful people pressed upon him the imperial crown. He refused their importunities, till, by a vote of 77 to 15, the Congress forced it upon him, and on the 18th of May, 1822, he was crowned Emperor of Mexico, with the title of Augustin I. The machinations of Santa Anna, the evil genius of Mexico, soon detached the people from him, and, on the 20th of March, 1823, after a turbulent reign of less than a year, he abdicated, and permission was granted him to leave the country, with a pension of \$25,000 per annum. He went to Italy, but returned the succeeding year to Mexico, where, meantime, without his knowledge, he had been proscribed as a traitor. Gen. Garza, then Governor of Tamaulipas, under the guise of friendship, betrayed him to the Congress of that State, by whom he was immediately arrested and, without trial, sentenced to death, and executed on the 19th of July, 1824, within a week from the time of his landing, and before an appeal could be made to the General Government of Mexico. He died like the hero and brave man that he was, and in his death Mexico lost one of her best and purest patriots.

J

JAPAN, an empire of Eastern Asia, called by the natives Nippon or Nipon, from the name of its largest island. The whole empire is insular, and comprises the islands of the great Archipelago, separated from the coast of China

by the Sea of Japan. The number of islands is said to be about 1,000. The largest are: Nippon, 900 miles long, with an average breadth of 100 miles, and having an area of nearly 100,000 square miles; Kiusiu, having an area

of 16,000 square miles; and Sikokf about 10,000 square miles. Beside these, Yesso having an area of 3,000 square miles, was conquered and colonized by the Japanese, who also held until 1861 the southern part of Saghalien, and the Kurile Isles, as well as the important islands of Tsus-sima, in the straits of Corea. These last, together with Saghalien and one of the principal ports of Yesso, have come into the possession of Russia during the past year. The present area of the empire does not probably exceed 150,000 square miles. The number of inhabitants is uncertain, but judging by the density of the population of the islands visited by foreigners, cannot be less than 35,000,000 to 40,000,000. They are all of the Mongol race, but possess greater mental activity and capacity for the acquisition of knowledge than any other nations belonging to that race. In many respects they have attained to a high degree of civilization. Their attainments in the useful arts are extraordinary, surpassing in some particulars those of any of the nations of the West. Their manufactures of silk, lacquered ware, paper, iron, steel, and the precious metals are unrivalled. They imitate perfectly our manufactures, and Colt's revolvers, Sharpe's rifles, Yankee clocks, steam engines, Dahlgren guns, bomb-shells, &c. &c., are made as perfectly, and, owing to the low price of labor, at a much less cost at Nagasaki than in our workshops here. In literature and science, also, they have made great attainments. The prevalent religion of the country is Buddhism, though some others are tolerated. After the return of the Japanese ambassadors, who visited the United States in the summer of 1860, there were considerable disturbances in the country. The prime minister of the civil Emperor (for they have two emperors, a spiritual sovereign who presides over religious affairs, and a civil emperor who attends to secular matters) was assassinated, it was believed at the instigation of Prince Mito, one of the most powerful nobles of the empire, who was opposed to intercourse with foreign nations. A few months later, Prince Mito himself was assassinated. An attempt was made about the same time to assassinate several of the foreign ambassadors: the consul of the Netherlands was killed, and Mr. Olyphant, connected with the British legation, was wounded. The Japanese Government endeavored to discover and punish the assassins, and a number of them were put to death. It also promised a strong guard to protect them whenever they had occasion to go from their residences to other parts of the city or country. The British minister, Mr. Alcock, was nevertheless very much dissatisfied with the Japanese Government, and continually appealed to his Government to commence a war against them. The representative of the United States, Mr. Townsend Harris, on the contrary, as the result of a long acquaintance with the people, and a disposition to accord to them the same rights and privileges which he sought to obtain from them,

has uniformly defended their course towards foreign merchants, as in strict adherence to the terms of the treaties they have made with them, and in this position he has been sustained by the representatives of Holland and Prussia. Mr. Harris believed that the surest way of building up an important and mutually valuable commerce between the Japanese and our citizens, was to secure their confidence in our disposition to treat them honorably and fairly, and not in any case to take advantage of their ignorance of western customs, and the results are demonstrating the correctness of his views. During the year 1861, the Emperor of Japan sent ambassadors to France, and subsequently to England; in neither case, however, admitting in the delegation, as was done in the case of the ambassadors to this country, nobles of high rank. Treaties have been made during the past year by the Japanese Government with Russia, and with Prussia. A large number of costly and beautiful presents were sent to the Government of the United States, by the Tycoon or Japanese Emperor, in return for those sent by this Government to Japan, and the gifts of individuals were also honorably acknowledged by liberal presents. Mr. Harris, the able representative of the United States at the court of Japan for several years past, and the negotiator of the first commercial treaty of any value, in 1858, requested his recall in 1861, on account of ill health, and was replaced by Robert H. Pruyn, Esq., of Albany. The treaty made by Mr. Harris has been the model on which the treaties of the other nations have been based; and while in one or two instances reductions in the duties paid on goods imported from western nations have been made, as for instance by the English on cotton, woollen, and linen goods, the treaty contains a provision by which American exports will be admitted on the same terms with those of any other nation.

JEFFERSON, FORT. This fort, on one of the Dry Tortugas, covers the entire surface of Garden Key, and has an area of thirteen and a half acres. It is designed to mount 298 guns, when finished. About the 15th of January, eighty soldiers were first sent to the fort. There were at this time three hundred men on the island, who had been engaged in the advancement of the work. This fortification was subsequently well garrisoned by the United States, and its construction is still going forward, a number of United States Volunteers having been sent thither to work upon it, as a punishment for mutinous conduct. About January 20, while a United States steamer was landing troops and supplies, the steamer Galveston, of New Orleans, appeared in sight, with a Confederate force on board, for the purpose of taking the fort; but, upon discovering the steamer, and probably understanding the object of her visit, the Galveston did not approach, or make any demonstration other than to put about and disappear.

K

KANSAS, a central State of the American Union, bounded N. by Nebraska Territory; E. by Missouri; S. by the Indian Territory; W. by Colorado Territory. Population in 1860, 107,110. The Missouri River washes it on the N. E., and the Kansas and Osage tributaries of the Missouri, and the Arkansas and its affluents, drain it. It was admitted into the Union as a State in the congressional session of 1860-61.

Kansas has been, from its first organization as a territory, the scene of much suffering and distress; a border warfare ravaged it for nearly five years, and it had not emerged from the effects of the marauding forays, when, in the summer and autumn of 1860, it was visited by a terrible drought, which in the most populous districts completely cut off the crops. The famine which followed in the winter of 1860-'61, was terrible. Thousands were reduced to the verge of starvation, and a considerable number actually perished. The liberality of the other States, and their large contributions of grain, clothing, &c., alleviated, to a considerable extent, the suffering. In the spring of 1861, at the first call for troops for the war, the citizens of Kansas, inured, by their bitter experiences in the past, to war, volunteered in large numbers, and the State, in proportion to its population, furnished more soldiers than any other State in the Union.

The condition of Missouri, on her eastern border, which the secessionists were struggling to carry out of the Union, necessarily excited much feeling among the citizens of Kansas, and the recollection of the wrongs and indignities which her people had suffered from the "border ruffians," as they were designated, most of whom were inhabitants of Missouri, stimulated some of those who had suffered most, to acts of revenge, and a guerilla warfare, known in that region as "jay-hawking," ensued through most of the border counties, in which armed bands of either party, Unionist or Secessionist, visited the town, plundered the stores, laid the prominent citizens adhering to the other under contribution, or took them prisoners, and sometimes threatened them with instant death. In the counties at some distance from the border these outrages were less frequent, though occasionally occurring. In the autumn of 1861, preparations were made for organizing an army corps, to go from Kansas through the Indian Territory and S. W. Arkansas towards New Orleans, and it was proposed to place it under the immediate command of Gen. James H. Lane, then Senator from Kansas, and to give subordinate command to Col. Jennison, a noted Union guerilla leader, and some others of the prominent actors in the previous struggles in the State. Owing to some difficulties in regard

to the chief command, arising from misapprehensions between Gen. Lane and Gen. David Hunter, the former relinquished his leadership in the present year and returned to the Senate, and the expedition was finally abandoned.

KENT, VICTORIA MARIA LOUISA, DUCHESS OF, the mother of the present queen of Great Britain, born in Saxe-Coburg, Aug. 17, 1786, died at her palace of Frogmore, near Windsor, England, March 16, 1861. She was the daughter of Francis, Duke of Saxe-Coburg-Saalfeld, and sister of Leopold, the present king of Belgium. She married at an early age Emil, Prince of Leiningen, by whom she had one son, Prince Karl, who afterwards became an eminent officer in the Bavarian army, and died in Nov. 1856. The Prince of Leiningen died in 1814, and after four years of widowhood, the princess married May 29th, 1818, Edward, Duke of Kent, 4th son of George III., and on the 11th July the same year the ceremony of marriage was again performed in England, and according to the rites of the English Church. In Jan. 1820, the Duke of Kent died, leaving the duchess again a widow with one child, the Princess Victoria, who, by the death of the Princess Charlotte Augusta, daughter of George IV., and the want of issue on the part of the Duke of Clarence, afterwards William IV., became heir presumptive to the English throne.

Looking forward to this as her probable destiny, the Duchess of Kent spared no pains to qualify her daughter to fulfil the high duties of that station well. Her education, physical, moral, and intellectual, was entirely conducted under her own supervision, and the carefulness of her training has been manifest in the admirable manner in which the present queen has acquitted herself as daughter, wife, and mother. At the time of her marriage with the Duke of Kent, that nobleman, exalted as was his station, was in very straitened circumstances, and the early years of the present queen were passed in comparative poverty. After her daughter's accession to the throne, she did not intermeddle at all with public affairs, but confined herself to the exercise of a maternal watchfulness over her welfare and that of her family, and to the dispensation of charities to the poor and unfortunate, which was the delight of her life. The funeral services were imposing, as the relations of the deceased duchess to the sovereign demanded. The body lay in state for ten days, and on the 26th was removed to Windsor, where the funeral ceremonies were performed in the Chapel Royal, and the body was temporarily deposited in the royal vault, till the completion of a mausoleum at Frogmore. Most of the courts of Europe, with a number of which the deceased was connected, went into mourning for her death.

KENTUCKY, one of the Western States, is bounded north and northwest by Ohio, Indiana, and Illinois, from which it is separated by the Ohio River; east by the Big Sandy River and Cumberland Mountains, which separate it from Virginia; south by Tennessee; and west by the Mississippi River, which separates it from Missouri. The population in 1860 was 1,155,713, of whom 10,146 were free colored, and 225,490 slaves. The ratio of increase during the last ten years was as follows: white, 20.84; free colored, 1.35; slave, 6.87. Contiguous on the north to the Free States, and on the south to the Slave States, she occupies a central position among all the States. Her territory extends four hundred miles in length, and one hundred and seventy miles in width, at the widest portion, opposite Cincinnati, in Ohio. The Governor is elected for four years. The Legislature meets on the first Monday in December. The Senate consists of thirty-eight members elected for four years, and the House of one hundred members elected for two years. (*See NEW AMERICAN CYCLOPEDIA.*)

The first movement in Kentucky looking towards future events, consisted in a correspondence which took place at the close of the year 1860, between Governor Magoffin and the Commissioners from Alabama, relating to the coöperation of Kentucky with the Southern States. The following extract expresses the views of the Governor of the State, at this time:

"You ask the coöperation of the Southern States in order to redress our wrongs. So do we. You have no hope of a redress in the Union. We yet look hopefully to assurances that a powerful reaction is going on at the North. You seek a remedy in secession from the Union. We wish the united action of the Slave States assembled in convention within the Union. You would act separately; we, unitedly. If Alabama and other Slave States would meet us in convention, say at Nashville, or elsewhere, as early as the fifth day of February, I do not doubt but we would agree in forty-eight hours upon such reasonable guarantees, by way of amendments to the Constitution of the United States, as would command at least the approbation of our numerous friends in the Free States, and by giving them time to make the question with the people there, such reaction in public opinion might take place as to secure our rights and save the Government."

On the 8th of January, a Convention of the Union party, and the friends of Senator Douglas was held for the purpose of expressing their opinion on the difficulties of the country. Their resolutions manifested a patriotic spirit of devotion to the Union, and a firm determination to have the rights of Kentucky respected and maintained in the Union. They declared in favor of a Convention of the Border Slave and Border Free States, for the purpose of devising some basis of compromise by which the Union might be saved, and proposed contingent-

ly a Confederacy of such States as were willing to accept the Constitution as proposed to be amended by Senator Crittenden. They declared unalterable repugnance to a war with their brethren, North or South, and expressed a willingness to support Mr. Lincoln's Government unless he undertook coercion or civil war.

The Governor, in his Message to the adjourned session of the Legislature, asked their approval of the Crittenden resolutions, and submitted the propriety of providing for the election of delegates to a Convention, to assemble at an early day, to determine the future inter-State and Federal relations of Kentucky. Meanwhile he would leave no experiment untried to restore fraternal relations between the States. He recommended a Convention of the Border Slave States, to meet early in February at Baltimore. He said the hasty and inconsiderate action of the seceding States did not meet his approval, but objected to coercing them, and asked the Legislature to declare by a resolution their unconditional disapprobation by Kentucky of the employment of force against them.

On the 22d of January, resolutions were passed in the House declaring that in view of the tenders of men and money by several of the Northern States, to the General Government, the people of Kentucky, uniting with their brethren of the South, will resist such invasion of the soil of the South at all hazards and to the last extremity. Subsequently, resolutions were passed inviting the States to unite with Kentucky in an application to Congress to call a convention to amend the Constitution.

On the 1st of February, a resolution was passed in the Senate declaring it to be inexpedient at that time to take any action towards calling a State Convention. The vote was, Ayes 25, Noes 14. On the next day, resolutions were passed in the Senate, appealing to the Southern States to stop the revolution, protesting against Federal coercion, and providing that the Legislature reassemble on the 24th of April, to hear the responses from sister States; also, in favor of making an application to Congress to call a National Convention.

The House of Representatives, on the 5th of February, passed another resolution stating their action in favor of a National Convention, and also the appointment of delegates to the Peace Conference at Washington, and therefore conclude that it "is unnecessary and inexpedient for this Legislature to take any further action on this subject at the present time. As an evidence of the sincerity and good faith of our propositions for an adjustment, and an expression of devotion to the Union, and desire for its preservation, Kentucky awaits with deep solicitude the response from her sister States."

The Legislature adjourned on the 11th of February, to meet again on the 20th of March. With regard to the action of this body while in session, it may be said that the recommendation of the Governor in favor of the call of a con-

vention fell upon unheeding ears, while the bill to arm the State, when it was not proposed that Kentucky should make war upon any one, and no one proposed to make war upon her, also failed to command the respect which its advocates claimed for it. Indeed, Kentucky, having shown that she intended to stand by the Union to the last, and that the rash and precipitate policy of her Southern seceding sisters did not meet her sanction, now awaited to see if the North would but do justice, as she considered it.

Under instructions from the Treasury Department of the Confederate States, its revenue officers now required manifests to be delivered and entries to be made of all merchandise coming down the Mississippi from States beyond the limits of the Confederacy. The subject was brought up before the Legislature of Kentucky at its session in March, and the following resolutions were adopted:

Whereas this General Assembly is informed that certain persons acting as a Congress of the seceding States have assumed power to obstruct and regulate the free navigation of the Mississippi River by the citizens of this Union, to whom it belongs: therefore be it

Resolved, by the General Assembly of the Commonwealth of Kentucky, That Kentucky having as much right to the Mississippi River, to its free, unobstructed navigation, as Louisiana or any other State, and that right being of vital importance to her people, feels it her duty to herself and her sister States, at the earliest day, to make this her most solemn protest against any assumption of such power to control the navigation of that river as utterly without right or proper authority, and as what she cannot and will not submit to.

Resolved further, That the States in the valley of the Mississippi be earnestly requested to unite with Kentucky in this protest against the violation of a mutual right so vitally important to them all, and which their permanent interests forbid should ever rest in the discretion of any Government save that under which they live.

Resolved, That the Governor be requested to transmit copies of these resolutions to the Executives of the States aforesaid.

The attack upon Fort Sumter and the call of President Lincoln for seventy-five thousand men, were turned to the utmost advantage by the friends of the seceded States, to promote their cause. Kentucky, however, refused to take part either with the North or the South. Her Governor issued a proclamation convening an extra session of the Legislature, on the 27th of April.

In answer to the requisitions of the Secretary of War, the Governor sent the following reply by telegraph:

FRANKFORT, (KY.) April 15, 1861.

Your despatch is received. In answer, I say, emphatically, Kentucky will furnish no troops for the wicked purpose of subduing her sister Southern States.

B. MAGOFFIN, Governor of Kentucky.

Hon. SIMON CAMERON, Secretary of War.

The State Union Committee issued an address to the people on the condition of the country, declaring it to be the duty of the State to maintain neutrality, and to take no part either with the Government or the Confederates. Kentucky, they said, could not comply with the

appeal of the Government without outraging her solemn convictions of duty, and without trampling upon that natural sympathy with the seceding States which neither their contempt for her interests nor their disloyalty to the Union had sufficed to extinguish. She could not comply with the appeal of the seditious leaders in her midst without sullyng her unspotted loyalty, destroying her most vital interests, quenching in the blood of her own sons the last hope of reëstablishing the Union, and lashing her free destiny amidst the clash and fury of arms to the chariot-wheels of the Gulf Alliance. She ought clearly to comply with neither the one appeal nor the other. And, if she be not smitten with judicial blindness, she would not. The present duty of Kentucky was to maintain her present independent position, taking sides not with the Government, and not with the seceding States, but with the Union against them both; declaring her soil to be sacred from the hostile tread of either, and, if necessary, making the declaration good with her strong right arm. And, to the end that she might be fully prepared for this last contingency, and all other possible contingencies, they would have her arm herself thoroughly at the earliest practicable moment.

At Louisville, on the evening of the 19th, a Union meeting was held, at which Mr. Guthrie, once Secretary of the U. S. Treasury, and other prominent men, made speeches. He opposed the call of the President for volunteers for the purposes of coercion, or the raising of troops for the Confederacy; asserted that secession was no remedy for the pending evils, and that Kentucky would not take part with either side; at the same time declaring her soil sacred against the hostile foot of either. Resolutions were adopted that the Confederate States having commenced the war, Kentucky assumed the right to choose her position, and that she would be loyal until the Government became the aggressor.

On the 3d of May, the Governor issued his proclamation ordering an election on the 30th of June, for members to the extra session of Congress.

An extra session of the Legislature was also called for the 6th of May.

On the 4th, an election was held for delegates to the Border State Convention, at which the vote was overwhelmingly in favor of the Union, being nearly two-thirds of the entire vote at the election in November, 1860. The vast majority of Kentuckians were manifestly more aroused than ever before, to the absolute importance of the Union and to the indispensable necessity of its preservation for themselves and their posterity, as well as for the people of the whole country; and they were as manifestly determined to stand firm and quiet on their own soil, to keep the peace at home and along the border, and steadily to strive for its restoration and establishment.

The vote for Union Delegates to the Conven-

tion, in all the counties of the State except eighteen, was 98,561. The aggregate presidential vote in November was 146,216.

On the 17th, in the Legislature, the suspension of specie payments by the banks of the State was authorized.

The House also passed a series of resolutions declaring that Kentucky should maintain a strict neutrality during the present contest, and approving of the refusal of the Governor to furnish troops to the Federal Government under the existing circumstances.

Subsequently, the Governor issued a proclamation with the following warning:—

I hereby notify and warn all other States, separate or united, especially the United and Confederate States, that I solemnly forbid any movement upon Kentucky soil, or occupation of any post or place therein, for any purposes whatever, until authorized by invitation or permission of the Legislative and Executive authorities. I especially forbid all citizens of Kentucky, whether incorporated in the State Guard or otherwise, from making any hostile demonstrations against any of the aforesaid sovereignties, to be obedient to the orders of lawful authorities, to remain quietly and peaceably at home when off military duty, and refrain from all words and acts likely to provoke a collision, and so otherwise to conduct themselves that the deplorable calamity of invasion may be averted; but in the mean while to make prompt and efficient preparation to assume the paramount and supreme law of self-defence, and strictly of self-defence alone.

A resolution that this proclamation stated the position that Kentucky should occupy, was rejected in the House on the 22d of May. The State Guard were also required to take an oath to support the Constitution of the United States.

The Border State Convention assembled at Frankfort on the 27th of May. Kentucky and Missouri only were represented. An address was issued to the people of Kentucky declaring that the direct question before the people of the United States and of Kentucky, the grand and commanding question, was, Union or no Union, Government or no Government, Nationality or no Nationality; that Kentucky had no cause of complaint with the General Government, and no cause of quarrel with the Federal Constitution; that Kentucky would continue to be loyal to the Constitution, the Government, and the flag of the United States, and to refuse alliance with any who would destroy the Union or commit the great wrong of deserting their posts in the National Congress; that Kentucky would remain true to herself and loyal to the constitutional administration of the General Government, appear again in the Congress of the United States, insist upon her constitutional rights in the Union, not out of it, and insist on the integrity of the Union, its Constitution, and its Government.

At the election on the 30th of June, the Union Representatives to Congress were chosen from all the districts of the State except the 1st. In this district H. C. Burnett, State Rights, was chosen. With the exception of Boone County, the official return of the votes was as follows:—

	<i>Union. S. Rights.</i>	
First District	6,225	8,988
Second "	9,271	3,368
Third "	10,392	3,113
Fourth "	10,344	2,469
Fifth "	8,217	2,719
Sixth "	8,101	227
Seventh "	11,035	2,862
Eighth "	8,272	5,706
Ninth "	12,230	3,722
Tenth "	8,373	4,526
	92,460	87,700
Total Union majority	54,760	

Volunteers from Kentucky entered both the Union and the Confederate armies. Those attached to the former were ordered to Western Virginia, and there entered into active service.

So stringent had the restrictions upon all intercourse between the North and the South now become that commerce was to a great degree cut off, except by the route of the Louisville and Nashville Railroad. It had long become manifest that the blockade of the South would not be complete unless the transit of supplies through Kentucky was stopped. But how this should be effected while Kentucky was herself in so doubtful a position, was a question not easily determined. The authorities of Tennessee solved it, however, by placing a complete embargo on the Tennessee end of the road.

They forbade the exportation of cotton, tobacco, rice, and turpentine to Kentucky. From their own point of view the act was one of folly, for the freight sent North was never one-fifth part of that sent South, and at that moment especially must have been vastly inferior in importance to the constant supply of provisions flowing into Tennessee from Louisville. They thought, however, that they could afford the step, and therefore forbade all exports from Tennessee.

This cut the knot as to the enforcement of the blockade at Louisville. It put an end to all scruples on the part of Kentucky, except among the open sympathizers with secession; it placed the secessionists in the wrong in "neutral" eyes, and gave the Government firm ground on which to stand. The blockade being undertaken with vigor, those who were forwarding supplies to the secessionists attempted to break it by legal proceedings. They crowded the Louisville freight stations with merchandise consigned to Nashville, and sued the company as common carriers for refusing to receive and forward it. The decision of the Court justified the company in its course of obedience to the Federal Government, and gave to the Government the authority of legal approval, as well as the sympathy of right-minded citizens. It still remained, however, for the Tennessee secessionists, in their wisdom, to conceive one more plan for perfecting the work undertaken by the Government. This scheme they carried out on the fourth of July, by stop-

ping the running of cars on the railroad altogether, and by doing this in such a manner as to seriously injure a great interest in Kentucky.

Of this proceeding we have the following account:—

The Louisville and Nashville Railway is 286 miles in length, forty-five miles of it lying in Tennessee. These forty-five miles cost \$2,025,000, of which Tennessee contributed in all bonds to the amount of \$1,160,500, the remaining \$864,500 being raised by the Kentucky owners. On the first of July a Tennessee General, named Anderson, ordered the company to keep a larger amount of its rolling stock at Nashville. James Guthrie, president of the company, stated, however, that "there being no provision in the charter to the effect that the company should be subject to the military orders of Tennessee, the order was not complied with." On the 4th of July, General Anderson seized two trains that were about to leave Nashville, and one that came in, together with such machinery as could be found in Tennessee, and then called for a fair division of the rolling stock of the road, and agreed that while arrangements were in progress for this end the trains should be uninterrupted; but to this Mr. Guthrie astutely made answer that he could thus have no guarantee against the interference of others besides General Anderson, who was supposed to be acting under orders. This brought out the Governor of Tennessee as the real actor in the matter, for he at once replied to Mr. Guthrie with a proposition to continue the use of the road while a division of property was made. Mr. Guthrie at once rejoined, disproving the charge made by the Tennessee authorities, that their end of the road had not hitherto had its share of the rolling stock, and showing the impossibility of managing the road under Governor Harris's proposition.

The result was that the road was closed. The Kentucky stockholders declared that their chartered rights in Tennessee had been no protection to their property, and refused to risk any more property within the limits of that State. All questions as to the blockade upon this route were therefore disposed of by the breaking up of the route itself. The secessionists felt the extent of their error, for they urged Governor Magoffin to seize the Kentucky end of the road, and to run it in connexion with Governor Harris; but it was evident that such a step would only serve to remove the last scruple on the part of Union men as to forcible resistance to the bold plans of the secessionists in Kentucky.

The question as to the transit of provisions to the South by this railroad was thus settled, and, although it did not close other routes through Kentucky, which were equally important, the controversy which had sprung up took such a turn as to have an important effect throughout the State, stimulating the Union men everywhere to a more active support of the Government. A small encampment of

Federal troops was formed in Garrard County, which occasioned some excitement, as it was an infringement of the neutrality assumed by Kentucky. Letters were addressed to the commanding officer, Gen. Nelson, asking the special object which the Government had in view in the establishment of the camp called "Camp Dick Robinson." In reply, the commanding officer said, "The troops assembled here have been called together at the request of Union men of Kentucky. They are intended for no hostile or aggressive movement against any party or community whatever, but simply to defend Kentucky in case they are needed for that purpose, preserve its tranquillity, and protect the rights of all the citizens of the State under the Constitution and the laws; and the object of myself and all the officers in command will be, by all honorable means, to maintain that peace and tranquillity." Commissioners were then sent by the Governor to President Lincoln to insist on the neutrality of the State.

Governor Magoffin, in his letter to the President, said:—"In a word, an army is now being organized and quartered in this State, supplied with all the appliances of war, without the consent or advice of the authorities of the State, and without consultation with those most prominently known and recognized as loyal citizens. This movement now imperils that peace and tranquillity which from the beginning of our pending difficulties have been the paramount desire of this people, and which, up to this time, they have so secured to the State.

"Within Kentucky there has been, and is likely to be, no occasion for the presence of military force. The people are quiet and tranquil, feeling no apprehension of any occasion arising to invoke protection from the Federal arm. They have asked that their territory be left free from military occupation, and the present tranquillity of their communication left uninvaded by soldiers. They do not desire that Kentucky shall be required to supply the battle-field for the contending armies, or become the theatre of the war.

"Now, therefore, as Governor of the State of Kentucky, and in the name of the people I have the honor to represent, and with the single and earnest desire to avert from their peaceful homes the horrors of war, I urge the removal from the limits of Kentucky of the military force now organized and in camp within the State. If such action as is hereby urged be promptly taken, I firmly believe the peace of the people of Kentucky will be preserved, and the horrors of a bloody war will be averted from a people now peaceful and tranquil."

To this the President replied:—"In all I have done in the premises I have acted upon the urgent solicitation of many Kentuckians, and in accordance with what I believed, and still believe, to be the wish of a majority of all the Union-loving people of Kentucky.

"While I have conversed on this subject with many eminent men of Kentucky, includ-

ing a large majority of her members of Congress, I do not remember that any one of them, or any other person, except your Excellency and the bearers of your Excellency's letter, has urged me to remove the military force from Kentucky, or to disband it. One other very worthy citizen of Kentucky did solicit me to have the augmenting of the force suspended for a time.

"Taking all the means within my reach to form a judgment, I do not believe it is the popular wish of Kentucky that this force shall be removed beyond her limits; and, with this impression, I must respectfully decline to so remove it.

"I most cordially sympathize with your Excellency in the wish to preserve the peace of my own native State, Kentucky. It is with regret I search, and cannot find, in your not very short letter, any declaration or intimation that you entertain any desire for the preservation of the Federal Union."

A similar letter was addressed by the Governor to the President of the Confederate States. In the reply, President Davis said:—"The Government of the Confederate States of America neither intends nor desires to disturb the neutrality of Kentucky. The assemblage of troops in Tennessee to which you refer had no other object than to repel the lawless invasion of that State by the forces of the United States, should their Government approach it through Kentucky, without respect for its position of neutrality. That such apprehensions were not groundless has been proved by the course of that Government in Maryland and Missouri, and more recently in Kentucky itself, in which, as you inform me, 'a military force has been enlisted and quartered by the United States authorities.'

"The Government of the Confederate States has not only respected most scrupulously the neutrality of Kentucky, but has continued to maintain the friendly relations of trade and intercourse which it has suspended with the people of the United States generally.

"In view of the history of the past, it can scarcely be necessary to assure your Excellency that the Government of the Confederate States will continue to respect the neutrality of Kentucky so long as her people will maintain it themselves.

"But neutrality, to be entitled to respect, must be strictly maintained between both parties, or if the door be opened on the one side for the aggressions of one of the belligerent parties upon the other, it ought not to be shut to the assailed when they seek to enter it for the purpose of self-defence.

"I do not, however, for a moment believe that your gallant State will suffer its soil to be used for the purpose of giving an advantage to those who violate its neutrality and disregard its rights, over those who respect them both."

It should be stated that previous to this correspondence, Kentucky had been invaded by

Tennessee forces, and six cannons and a thousand stand of arms taken. The Confederate Congress, on August 7th, passed an act authorizing enlistments in Kentucky. The Legislature assembled on the 2d of September, and on the 5th a large barbecue was to be held in Owens County, about twelve miles from the seat of Government. The apprehensions of the Unionists were greatly excited on this occasion. The State Guard were invited to attend; they consisted of an organized body of troops about fifteen thousand strong, under the control of the friends of secession in the State. Intimidation of the Legislature was feared. Happily, the affair passed over without any special interest. A Peace Convention was also to be held on the 10th of the same month, which awakened apprehensions of an attempt to organize the secession force. But these likewise proved groundless. The Legislature stood 27 Union and 11 Southern Rights Senators, and 76 Union and 24 Southern Rights Representatives. The message of the Governor to the Legislature on the 5th of September, asserted that Kentucky had a right to assume a neutral position in the war; that she had no agency in fostering a sectional party in the Free States, and did not approve of separate action and the secession of the Southern States. Lawless raids had been suffered on both sides, private property seized, commerce interrupted, and trade destroyed. These wrongs had been borne with patience, but a military Federal force had been organized, equipped, and encamped in a central portion of Kentucky, without consultation with the State authorities. If the people of Kentucky desired more troops, let them be obtained under the Constitution of Kentucky. He recommended the passage of a law to enable the Military Board to borrow a sufficient sum to purchase arms and munitions for the defence of the State. He also recommended the passage of resolutions requesting the disbanding or removal of all military bodies not under State authority, from the State.

On the same day the Legislature were notified that Confederate troops had invaded the State, and occupied and fortified strong positions at Hickman and Chalk Bluffs. Governor Harris, of Tennessee, replied to a demand of the Kentucky authorities, that the troops "that landed at Hickman last night did so without my knowledge or consent, and I am confident without the consent of the 'President.' I have telegraphed President Davis requesting their immediate withdrawal."

Gen. Polk, in command of the secession forces, in reply to the Governor of Kentucky, stated that he had occupied Columbus and Hickman, in Kentucky, on account of reliable information that the Federal forces were about to occupy the said points. He proposed substantially that the Federal and Confederate forces should be simultaneously withdrawn from Kentucky, and enter into stipulation to respect the neutrality of the State.

In the proclamation issued on the 4th of September, General Polk gives this reason for invading Kentucky:—"The Federal Government having, in defiance of the wishes of the people of Kentucky, disregarded their neutrality by establishing camp depots for their armies, and by organizing military companies within the territory, and by constructing military works on the Missouri shore immediately opposite and commanding Columbus, evidently intended to cover the landing of troops for the seizure of that town, it has become a military necessity for the defence of the territory of the Confederate States that a Confederate force should occupy Columbus in advance."

On the 9th, the Governor communicated the following to the Legislature:—"The undersigned yesterday received a verbal message, through a messenger, from Gov. Harris. The message was that he (Gov. H.) had, by telegraphic despatch, requested Gen. Polk to withdraw the Confederate troops from Kentucky, and that Gen. Polk had declined to do so; that Gov. Harris then telegraphed to Secretary Walker, at Richmond, requesting that Gen. Polk be ordered to withdraw his troops from Kentucky, and that such order was issued from the War Department of the Confederacy; that Gen. Polk replied to the War Department that the retention of the post was a military necessity, and that the retiring from it would be attended by the loss of many lives. This embraces the message received."

On the same day, the Governor also received the following by telegraph from Gen. Polk:

"Gov. B. MAGOFFIN: A military necessity having required me to occupy this town, Columbus, I have taken possession of it by the forces under my command. The circumstances leading to this act were reported promptly to the President of the Confederate States. His reply was, the necessity justified the action."

As a matter of course, the invasion of the State by the Tennessee troops brought in a Federal force under Gen. Grant from Cairo. Thus ended the neutrality of Kentucky. It was on the 6th of September that Gen. Grant, with two regiments of infantry and a company of light artillery, in two gun-boats, took possession of Paducah, Kentucky. He found secession flags flying in different parts of the town, in expectation of greeting the arrival of the Southern army, which was reported to be 3,800 strong, and only sixteen miles distant. The loyal citizens tore down the secession flags on the arrival of the Federal troops. Gen. Grant took possession of the telegraph office, railroad depot, and the marine hospital. He found large quantities of complete rations, leather, etc., for the Southern army.

He issued a proclamation saying that he came solely for the purpose of defending the State from aggression, and to enable the State laws to be executed.

On the 11th of September, the Assembly of the Legislature adopted a resolution directing

the Governor to issue a proclamation ordering the Confederate troops to evacuate Kentucky soil. The vote was seventy-one against twenty-six. The House refused to suspend the rules to allow another resolution to be offered ordering the proclamation to be issued to both Federals and Confederates.

This resolution was subsequently passed by the Senate, and vetoed by the Governor. It was then passed, notwithstanding the Governor's objections, by a vote in the House of 68 to 26, and in the Senate of 25 to 9. The Governor then issued his proclamation as follows:

In obedience to the subjoined resolution, adopted by the General Assembly of the Commonwealth of Kentucky, the Government of the Confederate States, the State of Tennessee, and all others concerned, are hereby informed that "Kentucky expects the Confederate or Tennessee troops to be withdrawn from her soil unconditionally."

In testimony whereof, I have hereunto set my name, and caused the seal of the Commonwealth to be affixed. Done at Frankfort this 13th day of September, A. D. 1861, and in the seventieth year of the Commonwealth.

By the Governor:

THOS. B. MONROE, Jr., Secretary of State.

"Resolved, by the General Assembly of the Commonwealth of Kentucky, That his excellency Governor Magoffin be and he is hereby instructed to inform those concerned that Kentucky expects the Confederate or Tennessee troops to be withdrawn from her soil unconditionally."

On the 17th, the Senate passed a bill punishing the refusal to give up the State's arms, when ordered by the Military Board, by fine and imprisonment. The House concurred.

This abolished the State Guard.

The House adopted resolutions in favor of paying the war tax, and against the recognition of the Southern Confederacy.

Preparations were commenced in the State for different military movements.

While General Polk was thus invading the State on the west, General Zollicoffer was operating on the east. With about four thousand men he came to Cumberland Ford, which is situated near the point where the corner of Virginia runs into Kentucky, and captured a company of Home Guards. On the 17th, the Legislature received a message from Governor Magoffin communicating a telegraphic despatch from General Zollicoffer, announcing that the safety of Tennessee demanded the occupation of Cumberland, and the three long mountains in Kentucky, and that he had done so, and should retain his position until the Union forces were withdrawn, and the Union camp broken up.

On the 18th, the Committee on Federal Relations reported a series of resolutions, requesting Major Anderson, the commander at Fort Sumter when it was captured, to take command of the forces of the State. They manifest very distinctly the sentiments of the people at this time, and were as follows:

Whereas Kentucky has been invaded by the forces of the so-called Confederate States, and the commanders

of the forces so invading the State have insolently prescribed the conditions upon which they will withdraw, thus insulting the dignity of the State by demanding terms to which Kentucky cannot listen without dishonor, therefore,

Resolved, That the invaders must be expelled.

Inasmuch as there are now in Kentucky Federal troops assembled for the purpose of preserving the tranquility of the State, and of defending and protecting the people of Kentucky in the peaceful enjoyment of their lives and property, it is

Resolved, That General Robert Anderson, a native Kentuckian, who has been appointed to the command of the Department of Cumberland, be requested to take instant command, with authority and power from this Commonwealth to call out a volunteer force in Kentucky for the purpose of repelling the invaders from our soil.

Resolved, That in using the means which duty and honor require shall be used to expel the invaders from the soil of Kentucky, no citizen shall be molested on account of his political opinions; that no citizen's property shall be taken or confiscated because of such opinions, nor shall any slave be set free by any military commander; and that all peaceable citizens who remain at home and attend to their private business until legally called into the public service, as well as their families, are entitled to and shall receive the full protection of the Government in the enjoyment of their lives, their liberties, and their property.

Resolved, That his Excellency, the Governor of the Commonwealth of Kentucky, be requested to give all the aid in his power to accomplish the end desired by these resolutions, and that he issue his proclamation calling out the militia of the State, and that he place the same under the command of General Thomas L. Crittenden.

Resolved, That the patriotism of every Kentuckian is invoked and is confidently relied upon to give active aid in the defence of the Commonwealth.

The decision expressed by these resolutions was hailed with great satisfaction by the friends of the Union.

It is difficult to exaggerate the importance of this act on the part of that great State. Whether viewed in its relations to the material or moral aspects of the civil strife in the land, the active adhesion of Kentucky to the national cause was a momentous event. But it was specially valuable for the testimony it bore to the rightfulness and the necessity of the belligerent issue which the National Government had been compelled to accept.

These resolutions were vetoed by the Governor, and then passed by the requisite vote over his veto. His objection to the resolutions was thus stated:

"I cannot concede my constitutional right, as the Commander-in-Chief of the State, to designate the particular officer or officers to be employed in executing the will of the Legislature. General T. L. Crittenden, the officer designated by the resolution, has had many proofs of my confidence. He has my confidence now, and in this service I would not hesitate to employ him, but at the same time I reserve the point that it is not within the province of the Legislature to limit the constitutional right of the Governor and Commander-in-Chief to choose such of his subordinate officers as he may deem best fitted to enforce the execution of the laws of the State."

Colonel Crittenden, of Indiana, was the first to bring a regiment from another State into Western Virginia in aid of the Federal Government, and was the first to go to the aid of Kentucky. His regiment, well armed, passed through

Louisville on the 20th towards the Nashville depot, and were enthusiastically received. At the same time General Buckner, once the Inspector-General of Kentucky, but afterwards a Brigadier in the Confederate service, advanced on Elizabethtown, the capital of Hardin County, and on the railroad from Louisville to Nashville, forty-three miles south by west of the latter. Troops were now rapidly concentrated in the State, and despatched to points invaded by the Confederates.

General Robert Anderson assumed command of the State and National forces, and issued a proclamation, calling upon Kentuckians of all parties to assist in repelling the invaders of the State. Governor Magoffin also issued a proclamation, directing General Thomas L. Crittenden to call out the State troops to resist the invasion of the State, and Gen. C. accordingly called out the militia. Hamilton Pope, Brigadier-General of the Home Guard, also called upon the people in each ward in Louisville to organize themselves into companies for the protection of the city.

Thus was Kentucky launched with her whole soul into the bloody contest for the maintenance of the Government and the preservation of the Union.

On the 23d the House passed a bill authorizing the Military Board to borrow one million dollars, in addition to a million authorized May 24th, on the State bonds, payable in ten years, and established a tax to pay the bonds and interest. The above sum was to be appropriated to the defence of the State.

On the next day, a bill was passed calling out 40,000 volunteers for service from one to three years. The votes were, in the House, 67 to 13, and in the Senate, 21 to 5. The Senate also passed a bill providing that Kentuckians who voluntarily joined the Confederate force invading the State, should be incapable of taking estate in Kentucky by devise, bequest, division, or distribution, unless they returned to their allegiance within sixty days, or escaped from the invaders as soon as possible.

A bill was also passed tendering the thanks of the Legislature to Ohio, Illinois and Indiana, for having so promptly forwarded troops to aid in repelling the invasion of the State; and the Governor was instructed to communicate the same.

On the 1st of October, a resolution requesting John C. Breckenridge and Lazarus W. Powell to resign their seats as Senators in Congress, as they did not represent the will of the people of Kentucky; and, if they declined to comply, the Senate of the United States was respectfully requested to investigate their conduct, and if found to be in opposition to the Federal Government, to expel them from their seats, passed by a vote of 20 yeas to 5 nays, and was sent to the House, and passed by a vote of 55 to 31.

A bill for a loan of \$2,000,000 was also passed. The Bank of Kentucky promised her quota of the two millions for the defence of the State. The

Bank of Louisville, whose quota was nearly \$100,000, promised \$200,000. The Northern Bank promised \$25,000 more than her quota; and the Farmers' Bank promptly responded to her quota. So soon after the first step was Kentucky brought fully into the field with arms and money for the cause of the Union.

The Legislature then took a recess until November 27th. Previous to this adjournment, an address was issued by that body to the people of the State, on "the condition of the State, and the duties they had felt called upon to perform." The condition of the State is thus briefly related:

We have ardently desired peace, and hoped to save Kentucky from the calamities of war. When the Federal authorities deemed it necessary to employ force in self-defence, and to execute the laws of the Government, we assured our Southern neighbors of our purpose not to take up arms voluntarily against them, notwithstanding their wicked attempt to destroy the Government from which we and our fathers have received the greatest benefits. Every effort was made, both before and after the employment of force, to effect some compromise and settlement that would restore the Union, and prevent the effusion of blood.

The Federal Government did not insist upon our active aid in furnishing troops, seeming content if we obeyed the laws and executed them upon our own soil. Those engaged in rebellion, however, with hypocritical professions of friendship and respect, planted camps of soldiers all along our Southern border; seized, by military power, the stock on our railroad within their reach, in defiance of chartered rights; impudently enlisted soldiers upon our soil for their camps, whom they ostentatiously marched through their territory. They made constant raids into this State, robbed us of our property, insulted our people, seized some of our citizens and carried them away as prisoners into the Confederate States. Our military was demoralized by the treachery of its chief officer in command, and many of its subordinates, until it became more an arm of the Confederate States than a guard of the State of Kentucky. Thus exposed to wrongs and indignities, with no power prepared to prevent or resent them, some of the citizens of this State formed camps under the Federal Government for the defence and protection of the State of Kentucky. Whatever might have been thought of the policy once, recent events have proved that they were formed none too soon.

In this condition we found Kentucky when the Legislature met, on the first Monday in September. We still hoped to avoid war on our own soil. We were met by assurances from the President of the Confederate States that our position should be respected; but the ink was scarcely dry with which the promise was written, when we were startled by the news that our soil was invaded, and towns in the southwest of the State occupied by Confederate armies. The Governor of Tennessee disavowed the act, and protested his innocence of it. His commissioners at Frankfort professed the same innocence of the admitted wrong; but our warnings to leave were only answered by another invasion in the southeast of the State, and a still more direct and deadly assault upon the very heart of the State by way of the Nashville road. These sudden irruptions of such magnitude, skilfully directed, show that the assault on Kentucky was preconcerted, prepared and intended long before. The excuses made for any of them but add insult to injury. We shall not repeat them. They are but excuses for acts intended, without any excuse.

The purpose is to remove the theatre of the war from the homes of those who wickedly originated it, to those of Kentucky, and to involve this State in the rebellion. This purpose appeared to be well understood in the seceded States. They need the territory of Kentucky,

and are determined to have it, if it must be by blood and conquest.

Thus forced into war, we had no choice but to call on the strong arms and brave hearts of Kentucky to expel the invader from our soil, and to call for the aid of the Federal Government, as we had a right to do under the Federal Constitution.

Our foes would dictate terms to a brave people upon which we can have peace. We are required to join them in their unwarrantable rebellion, become accessory to their crimes, and consent to sacrifice the last hope of permanently upholding republican institutions, or meet their invasions as becomes Kentuckians.

We believe we have done our duty to a chivalric people who have forborne long, but will never fail as a last resort to resent an injury and punish an insult. We should hold ourselves unworthy to represent you if we had done less. The only error, we fear, is that we have not been as prompt, you may think, as the occasion demanded.

Thrice have the revolutionists appealed to the ballot-box in this State, and thrice have the people expressed, by overwhelming majorities, their determination to stand by the Union and its Government. They have not been active in this war, not from indifference or want of loyalty, but in the hope of better promoting a restoration of the Union, and checking the rebellion by that course. Our hope of an amicable adjustment, and a desire for peace, led us to forbear, until forbearance has ceased to be a virtue. The attempt to destroy the union of these States we believe to be a crime, not only against Kentucky, but against all mankind. But up to this time we have left to others to vindicate, by arms, the integrity of the Government. The Union is not only assailed now, but Kentucky is herself threatened with subjugation by a lawless usurpation. The invasion is carried on with a ruthless destruction of property, and the lives and liberties of our people, that belong only to savage warfare.

We have no choice but action, prompt and decided. Let us show the insolent invaders that Kentucky belongs to Kentuckians, and that Kentucky's valor will vindicate Kentucky's honor. We were unprepared because unsuspecting. An insolent and treacherous invader tells the people that their legislators have betrayed them; and he comes with fire and sword to correct their error, by a crusade against property, liberty, and life.

The position taken by the Legislature was fully sustained by the people, and upon the re-assembling of that body on the 27th of November, very emphatic resolutions were adopted. The following extract shows their character:

Resolved, by the General Assembly of the Commonwealth of Kentucky, That Kentucky has ever cherished and adhered to the Federal Union, and she will cling to it now, in this time of its extremest peril, with unfaltering devotion. While at the beginning of the mad and wicked war which is being waged by the rebellious States for the destruction of the Government, she forebore to take part, in the hope that she might interpose her friendly offices in the interests of peace, she has, nevertheless, sternly repelled every movement which looked to a change of her political relations, and has never swerved from her full and fervid loyalty to the noblest and freest Government in the world. And now, since her proffered mediation has been spurned, and her soil invaded by the Confederate armies, she deems it fit that she should announce to the world that, standing firmly by her Government, she will resist every effort to destroy it; and she calls upon her true and heroic sons to rally around the standard of their country, and put forth the whole energies of the Commonwealth till the rebellion shall be overthrown, and the just supremacy of the National Government shall be restored and maintained everywhere within its limits.

Resolved, That the existing civil war, forced upon the National Government without cause by the dis-

unionists, should not be waged upon the part of the Government in any "spirit of oppression, or for any purpose of conquest or subjugation, or purpose of overthrowing or interfering with the rights or established institutions of any of the States, free or slave, but to defend and maintain the supremacy of the Constitution, and to preserve the Union with all the dignity, equality, and rights of the several States unimpaired; and that as soon as these objects are accomplished the war ought to cease."

Resolved, That in the adoption of the foregoing resolution by the National Congress, with unprecedented unanimity, at its late session, a rule of action was prescribed to the Government from which it cannot depart without a disregard of the plighted faith of the National Legislature, which we would be slow to believe can be seriously entertained. Against any such departure we solemnly protest.

Resolved, That the purpose expressed in said resolution is the great end demanded, and that which inspires Kentucky with patriotic ardor to seek their achievement with all her loyal energies and means, in the confident hope of success, and belief that the country, saved, in our triumph, to us and to posterity, will still be glorious in the freedom of its people, in the unity of its Government, and the security of society, and worth infinitely more than it cost to save it.

Resolved, That slavery is a State institution, guaranteed by the Constitution of the United States, and we cannot agree that the National Government, to which we are and intend to be loyal, shall undertake the emancipation of slaves against the will of the slave-holding States.

Great honor will ultimately be given to the State of Kentucky, for the course pursued by her during the year. Her position of determined neutrality at first taken, was to some extent a consequence of her geographical situation. Refusing to take sides with either North or South, her coolness moderated the fiery impetuosity of both. At the same time she was an enviable acquisition to each. The Federal Administration, desirous to secure her hearty co-operation, saw plainly that it could not be obtained on any other terms than that of the Constitution and the rights of the States. And every position taken by the Administration has been of such a conservative character as to meet the ultimate approval of the people of that State. Amid all the efforts of extreme partisans in the Northern States to press the President into measures looking to emancipation, nothing was effected. The certain loss of Kentucky, and with her Western Virginia and Missouri, stayed the Government, even if there had been any inclination to, or conviction of the propriety of, such measures. As a consequence, Kentucky voluntarily entered the field for the Union.

On the other hand, the hopes of the Confederate Government that Kentucky would join the Confederacy, were extremely sanguine. The position of her people was undoubtedly neutral at heart. Extreme measures on the part of the Federal Government would, without doubt, have made her a seceding State. Indeed, so confident were the friends of the Confederate Government of her ultimate secession that a Convention was called by them to organize the forms of that movement. This party was called a "Sovereignty Convention." It met at Russell-

ville about the 27th of November, and was in session during three days.

It passed a Declaration of Independence and an Ordinance of Secession. A Provisional Government, consisting of a Governor, Legislative Council of ten, a Treasurer and an Auditor, was agreed upon. George W. Johnson, of Scott, was made Governor. The Legislative Council appointed was composed of Willis B. Machen, of Logan; John W. Crockett, of Henderson; James P. Bates, of Barren; James B. Cristman, of Wayne; Phil. B. Thompson, of Mercer; J. P. Burnside, of Warren; H. W. Bruce, of Louisville; J. W. Moore, of Montgomery; E. M. Bruce, of Nicholas; and George B. Hodge, of Campbell.

The Commissioners to Richmond were H. C. Burnett, W. E. Simms, and Wm. Preston. All executive and legislative powers were vested in the Governor and Council. Acts done by the Provisional Government were to have the concurrence of a majority of its members; the Council were authorized to fill vacancies, but no councilman should be made Governor to fill a vacancy. The old Constitution and laws of Kentucky were declared in force, except where inconsistent with the acts of the Confederate Government. Bowling Green was fixed as the new capital. Fifty-one counties were said to be represented in the Convention by over two hundred members not elected by the people.

The military operations in the State, though marked by no great achievement during the year, were nevertheless the forerunner of very important results. Civil, commercial and agricultural pursuits had engrossed the entire attention of the people. In a military point of view the State, like nearly all her sister States, was entirely defenceless. Men, arms, ammunition, were abundant, but an organized, drilled, and completely equipped force, ready to take the field and go into active service on a day's notice, could not be expected to exist. Notwithstanding the position of neutrality, after President Lincoln's proclamation, imperfect organizations were formed, under the name of Home Guards. Their object was to drill novices, and impart the preliminary information needed for the future soldiers. These embraced considerable numbers, and finally formed the chief portion of the force obtained by the secessionists in the State. Large numbers also left the State, and volunteered in the Federal and Confederate armies.

The first appearance of a military force within Kentucky was made under General Polk, commander of Confederate troops from Tennessee, as has been previously stated. They commenced fortifying Hickman and Columbus. The former is situated in the western part of the State, near the Tennessee line, and the latter about twenty-five miles north, both on the Mississippi River. (See COLUMBUS.) Their force was soon increased to thirteen regiments of infantry, six field batteries, a siege battery, three battalions of cavalry, with three steamboats on the river. Subsequently, the force was concentrated at Colum-

bus, which was very strongly fortified. At the same time, General Grant, commander of the Federal force at Cairo, took possession of Paducah, on the Ohio River. (See PADUCAH.) The distance between the two positions is forty-seven miles. The force of General Grant was two regiments of infantry, one company of light artillery, and two gunboats. These movements comprised the active military operations in the western part of the State during the year.

In the southeastern part of the State, Gen. Zollicoffer advanced from Tennessee with a considerable force of Confederate troops, and on the 18th of September a slight skirmish took place at Barbourville, between some of his men and a portion of Home Guards, but without any serious results on either side. The Confederate cavalry scoured the country in the vicinity of their camp, arrested prominent Union men, and destroyed their property. They also occupied the small towns in the vicinity. Subsequently, a portion of the same force entered Manchester, in Clay County, in the vicinity of the Cumberland Mountains. On the 1st of October, a retreat was commenced towards Barbourville, which was continued to the Cumberland Ford. This is fifteen miles within the limits of Kentucky, and was fortified by Gen. Zollicoffer; meanwhile, his advance was pushed to London, and the country ravaged. The salt-works in this region were an important possession to the Confederate force. In their rear was also the Cumberland Gap—a most important point—from which the East Tenn. & Va. R. R., 40 miles below, would be accessible to a Federal force. This railroad was one of the main lines for the transportation of supplies to the troops in Virginia. During this period, a Federal force of Ohio and Indiana troops, with some Kentucky volunteers, were advancing to hold the Confederates in check, and, if able, to rout them. This force was under the command of Gen. Schœpf. The first affair of any importance took place at a place called Camp Wildcat, on the 21st of October. About eleven o'clock in the forenoon, a body of Confederate troops, consisting of two regiments of Tennessee volunteers, under Cols. Newman and Bowler, advanced upon four companies of the Thirty-third Indiana regiment, Col. Coburn, and a portion of Col. Woodford's regiment of Kentucky cavalry. The Confederate force opened upon the Thirty-third Indiana on the left wing with cannon, and almost simultaneously their column appeared on the side of the hill, within sixty or seventy yards of the Indiana troops. A charge was ordered upon the latter, which was met with such a galling fire as brought the Tennesseans to a stand, when a charge by the Kentucky cavalry was made upon them, and they retired with severe loss. At one p. m. another attack was made at another point, and at a late hour a third attack was made by Gen. Zollicoffer. It was supposed that the Camp was defended only by a small force under Col. Garrard. The attacking force consisted of

Mississippians, Georgians, and Tennesseans. The opposing force was under Gen. Schœpf, consisting of Ohio, Indiana, and Kentucky troops. The Confederates were generally armed with flint-lock muskets and altered locks, buck-shot guns, and navy revolvers. The Federal force carried the Minié rifle. Reinforcements were added to each force during the day, and the different attacks were probably made after they were received by the Confederate commander. The Confederate troops were repulsed with severe loss, and retired to Barbourville. On the 10th of December, they were advancing with a strong force on Somerset, from which Gen. Schœpf retired.

On the 16th of December, Gen. Zollicoffer issued a proclamation to the people of southeastern Kentucky, as follows:

The brigade I have the honor to command is here for no purpose of war upon Kentuckians, but to repel those Northern hordes who, with arms in their hands, are attempting the subjugation of a sister Southern State. They have closed your rivers, embargoed your railroads, cut off your natural and proper markets, left your stock and products on your hands almost valueless, and thereby almost destroyed the value of your lands and labor. We have come to open again your rivers, to restore the ancient markets to your produce, and thereby to return to you the accustomed value of your lands and labor. They have represented us as murderers and outlaws. We have come to convince you that we truly respect the laws, reverence justice, and mean to give security to your personal and property rights. They have forced many of you to take up arms against us. We come to take you by the hand as heretofore—as friends and brothers. Their Government has laid heavy taxes on you to carry on this unnatural war, which is openly avowed to be to set at liberty your slaves, and the ensuing step in which will be to put arms in their hands, and give them political and social equality with yourselves. We saw these things in the beginning, and are offering our hearts' blood to avert those dreadful evils, which we saw the Abolition leaders had deliberately planned for the South. "All men must have the ballot or none; all men must have the *bullet* or none," said Mr. Seward, the present Federal Secretary of State. How long will Kentuckians close their eyes to the contemplated ruin of their present structure of society? How long will they continue to raise their arms against brothers of the South struggling for those rights and for that independence common to us all, which was guaranteed to all by the Constitution of 1787? For many long years we remonstrated against the encroachments against rights, and the insecurity to that property thus guaranteed, which these Northern hordes so remorselessly inflicted upon us. They became deaf to our remonstrances, because they believe they had the power, and felt in every fibre the will "to whip us in." We have disappointed them. We have broken their columns in almost every conflict. We have early acquired a prestige of success which has stricken terror into the Northern heart. Their grand armies have been held in check by comparatively few but stern-hearted men; and now they would invoke Kentucky valor to aid them in beating down the true sons of the South who have stood the shock, and in bringing common ruin upon Kentucky and her kindred people. Will you play this unnatural part, Kentuckians? Heaven forbid! The memories of the past forbid! The honor of your wives and daughters, your past renown, and the fair name of your posterity, forbid that you should strike for Lincoln and the abolition of slavery against those struggling for the right of independence of your kindred race. Strike with us for independence and preservation of

your property, and those Northern invaders of your soil will soon be driven across the Ohio.

This force encamped at Mill Spring, fortifying their position, in which Gen. Zollicoffer remained until the 19th of January, when he was killed, and his army routed by a strong force under Gen. Thomas, at the battle of Webb's Cross Roads or Mill Spring.

The small Federal force in Eastern Kentucky was under the command of Gen. Nelson, a Lieutenant in the Navy, who had been detached from his naval duties and sent to Kentucky, of which State he was a native, and well known to her citizens. Being furnished with arms by the Federal Government, he collected and organized a force in the eastern part of the State, near Virginia. With these he advanced, and on the 2d of November occupied Prestonsburg without any resistance. The enemy fell back about six miles. At this place he issued the following proclamation, on the 5th of November:

Having this day occupied the town of Prestonsburg with the force under my command, I declare to all whom it may concern: That the jurisdiction of the State of Kentucky is restored in this section of the State, and that the regular fall terms of the courts will be held in those counties in which the time for holding the same has not passed. And all civil officers are ordered to attend at the times and places of holding said courts, and attend to the duties of their respective offices.

His next movement was on Pikeville, near which a Confederate force under Gen. Williams had taken position. Pikeville is the capital of Pike County, on the west fork of the Big Sandy River. On the forenoon of the 7th, he despatched a force, under Col. Sill, of one regiment of infantry with a light battalion of three companies, and two companies of Kentucky volunteers mounted from the teams, and a section of artillery, to march by the way of John's Creek, and pass to the left of Pikeville, where was the Confederate position—a distance of about forty miles—and turn or cut them off. On the 8th, at 5 A. M., Gen. Nelson moved forward with three Ohio regiments, a battalion of Kentucky volunteers, and two sections of artillery, and took the State road direct to Pikeville, distant twenty-eight miles. Eight miles from Prestonsburg they met a picket of about forty cavalry, which escaped. At one P. M., the cavalry had advanced along the narrow defile of the mountain that ends at Ivy Creek. This mountain is the highest along the river, very precipitous, and thickly covered with brush and undergrowth, and the road, which is but seven feet wide, is cut along the side of it, about twenty-five feet above the river, which is close under the road. The ridge descends in a rapid curve and very sharp to the creek, or rather gorge, where it makes a complete elbow. Behind this ridge, and along the mountain side, the enemy, seven hundred strong, lay in ambush, and did not fire until the head of the Kentucky battalion, Col. C. A. Marshall, was up to the elbow. Four were instantly killed and thirteen wounded, and

the Kentuckians were ordered to charge. Col. Harris led his Second Ohio regiment up the mountain side with much gallantry, and deployed them along its face. Col. Norton, who had just reached the defile, led his Twenty-first Ohio regiment up the northern ridge of the mountain, deployed them along the creek, and made an attack. Two pieces of artillery were got in position on the road, and opened on the enemy. In an hour and twenty minutes the Confederate force dispersed and fled, leaving a number killed and wounded, of whom thirty were found dead on the field. The Federal loss was six killed and twenty-four wounded. In their retreat they obstructed the road by felling trees and burning or cutting all the bridges.

On the morning of the 10th, Gen. Nelson reached Pikeville, where Col. Sill had arrived, according to orders, on the previous day, having twice encountered mounted men. The result of these movements was so effectual, that, on the 10th, Gen. Nelson issued the following proclamation:

SOLDIERS!—I thank you for what you have done. In a campaign of twenty days you have driven the rebels from Eastern Kentucky, and given repose to that portion of the State. You have made continual forced marches over wretched roads, deep in mud. Badly clad, you have bivouacked on the wet ground, in the November rain, without a murmur. With scarcely half rations, you have pressed forward with unflinching perseverance. The only place that the enemy made a stand, though ambushed and very strong, you drove him from, in the most brilliant style. For your constancy and courage I thank you, and with the qualities which you have shown that you possess, I expect great things from you in future.

Thus closed the campaign in Eastern Kentucky. In the central part of the State the military movements were more extensive. Louisville, the head-quarters of the Union Department, is situated on the Ohio River, on the northern boundary of the State, and connected by river and railroad with all the Northern States, and by railroad with the localities of active operations near the borders of Central Tennessee. The level land on which the city is located, extends uninterruptedly south to Rolling Fork River, a stream two hundred feet in width and three feet deep. Crossing by bridge or a ford, a good road leads through a level country for two miles to a series of rugged hills, known as Muldraugh's Hills. The railroad follows a stream called Clear Creek, crossing it about half way up the ascent by a tressel-work ninety feet high, and two miles further south enters at its base Tunnel Hill. It emerges on a smooth level plain, which extends many miles south to Green River. Elizabethtown is four miles from Tunnel Hill and forty-two miles from Louisville. Nolin Creek is the first stream of any importance south of Elizabethtown, and fifty-three miles from Louisville. Munfordsville is on the right bank of Green River, and seventy-two miles from Louisville. Green River empties into the Ohio, and is navigable by steamboats most of the year. The railroad

crosses it by an extensive bridge. Bowling Green is on the railroad, one hundred and fourteen miles from Louisville and seventy-one miles from Nashville. It is also at the head of navigation on Barren River, which flows into Green River thirty miles below. A branch railroad to Memphis commences here; the distance by which to Clarksville, on the Cumberland River, is 62 miles, and from thence to Memphis one hundred and fifty-seven miles. The importance of Bowling Green is manifest from its position at the junction of two roads leading into Tennessee, furnishing great facilities for transportation. The entrance of hostile forces into the western part of the State, in September, produced great excitement at Louisville. Union Home Guards began to assemble, and other Union troops began to arrive from Ohio, Indiana, and Illinois. On the 18th of September, a body of the latter advanced to Rolling Fork, where they found the bridge had been destroyed by a hostile force under Gen. Buckner, formerly commander of the State Guard. This force was then five miles below, on Muldraugh's Hills, but subsequently withdrew to Elizabethtown. At this time Gen. Anderson, formerly in command at Fort Sumter, was ordered to the Department of Kentucky, and promoted to the rank of a brigadier-general. He immediately entered upon his duties, and on the 21st of September, issued the following proclamation :

KENTUCKIANS : Called by the Legislature of this my native State, I hereby assume command of this department. I come to enforce, not to make laws, and, God willing, to protect your property and your lives. The enemies of the country have dared to invade our soil. Kentucky is in danger. She has vainly striven to keep peace with her neighbors. Our State is now invaded by those who professed to be her friends, but who now seek to conquer her. No true son of Kentucky can longer hesitate as to his duty to his State and country. The invaders must, and, God willing, will be expelled. The leader of the hostile forces who now approaches is, I regret to say, a Kentuckian, making war on Kentucky and Kentuckians. Let all past differences of opinion be overlooked. Every one who now rallies to the support of our Union and our State is a friend. Rally, then, my countrymen, around the flag our fathers loved, and which has shielded us so long. I call you to arms for self-defence, and for the protection of all that is dear to freemen. Let us trust in God and do our duty as did our fathers.

Three days previously, Gen. Buckner, the commander of the Confederate force, issued a proclamation. It was dated at Bowling Green on the 18th.

TO THE PEOPLE OF KENTUCKY : The Legislature of Kentucky have been faithless to the will of the people. They have endeavored to make your gallant State a fortress, in which, under the guise of neutrality, the armed forces of the United States might secretly prepare to subjugate alike the people of Kentucky and the Southern States. It was not until after three months of covert and open violation of your neutrality, with large encampments of Federal troops on your territory, and a recent official declaration of the President of the United States not to regard your neutral position, coupled with a well-prepared scheme to seize an additional point in your territory, which was of such vital importance to the safety and defence of Tennessee,

that the troops of the Southern Confederacy, on the invitation of the people of Kentucky, occupied a defensive post in your State. On doing so the commander announced his purpose to evacuate your territory simultaneously with a similar movement on the part of the Federal forces, whenever the Legislature of Kentucky shall undertake to enforce against both belligerents the strict neutrality which they have so often declared. I return among you, citizens of Kentucky, at the head of a force, the advance of which is composed entirely of Kentuckians. We do not come to molest any citizen, whatever may be his political opinion. Unlike the agents of the Northern despotism, who seek to reduce us to the condition of dependent vassals, we believe that the recognition of the civil rights of citizens is the foundation of constitutional liberty; and that the claim of the President of the United States to declare martial law, to suspend the privileges of the writ of habeas corpus, and to convert every barrack and prison in the land into a Bastille, is nothing but the claim which other tyrants have assumed to subjugate a free people. The Confederate States occupy Bowling Green as a defensive position. I renew the pledges of commanders of other columns of Confederate troops to retire from the territory of Kentucky on the same conditions which will govern their movements. I further give you my own assurance that the forces under my command will be used as an aid to the Government of Kentucky in carrying out the strict neutrality desired by its people, whenever they undertake to enforce it against the two belligerents alike.

On the 24th of September, Gen. Anderson issued another brief proclamation dated at Louisville, in which he said :

The Commanding General, understanding that apprehension is entertained by citizens of this State, who have hitherto been in opposition to the policy now adopted by the State, hereby gives notice that no Kentuckian shall be arrested who remains at home attending to his business, and does not take part, either by action or speech, against the authority of the General or State Government, or does not hold correspondence with, or give aid or assistance to those who have chosen to array themselves against us as our enemies.

General Anderson was soon compelled to resign his command, in consequence of ill health, and was succeeded by Gen. Sherman, who for the same reason retired, and was succeeded by Gen. Buell.

As early as the 10th of October, a very considerable Federal force was in Camp Dick Robinson, in Garrard County—which was daily becoming more formidable. At the same time the Confederate General Buckner, who had boasted of an intention to spend the winter in Louisville with his troops, began to retire to Bowling Green, and on the 18th, a portion of the iron bridge over the Green River was blown up. Friends in Louisville and throughout the State had given him strong assurances that if he would come to Louisville, or even to Bowling Green, at the head of a force capable of maintaining its position for a short time, reinforcements would immediately pour in by thousands, rendering his army too powerful to be resisted. Unquestionably he came with the full conviction that these assurances would be verified, but he found them all falsified. There was reason to believe that not more than a thousand men joined him.

Accumulations of Federal troops from the States north of the Ohio river, with stores for a vast army, were made during the month of

November. On the part of the Confederates the same course was pursued. On the 1st of December, the Federal troops in the State were estimated at 70,000, of which there were nine regiments from Illinois, sixteen from Indiana, seventeen from Ohio, three from Pennsylvania, one from Michigan, three from Wisconsin, and two from Minnesota, and at least twenty-five thousand of her own soldiers. The army was well appointed, and with batteries of artillery and squadrons of cavalry to give it greater efficiency. The force of Kentucky alone, on the 10th of December, may be stated as follows:

Ready to be sworn in	17,200
To which add four regiments recruited in Camp Dick Robinson and in service	4,000
Two regiments in Rousseau's Brigade	2,000
Provost-Marshal's force at Louisville	500
Kentuckians in the two regiments in Western Virginia, say	1,000
Residents of the State who went to other States and entered the service, say	1,000
Recruited for the regular army, say	200
Making a force of	26,900

This vast force was looking ultimately to Nashville and the State of Tennessee; to withstand it, there was the force of Gen. Buckner, now estimated at thirty thousand men. No affair of importance occurred between these hostile troops during the year, except a small one at Munfordsville. (See MUNFORDSVILLE.)

Early the next year the Federal force commenced its march with brilliant success, and

by the 1st of March, 1862, every Confederate soldier had left the State. The effect of such a state of affairs as existed in Kentucky, upon all industrial pursuits, can be more easily imagined than described. Trade was paralyzed, commerce destroyed, the happiest social relations forever extinguished, and citizens of every class deeply embarrassed or ruined. Many prominent individuals in the State joined the South and became leaders in the Confederate army, among whom may be named Humphrey Marshall and John C. Breckinridge. The latter was Vice-President of the United States during the previous term, and a Senator in Congress previous to his appointment to a brigadier-generalship in the Southern army.

Battles and Skirmishes in Kentucky in 1861.

L

LACORDAIRE, JEAN BAPTISTE HENRI, a celebrated preacher of the Roman Catholic Church, born at Reccey-upon-Ouce, in the department of Côte d'Or, France, May 12, 1802, died in Paris, Dec. 1861. He was the son of a physician, at whose death his widow devoted herself to the education of her three sons in the Catholic faith. He entered the College of Dijon at an early age, and graduated in 1819 with the highest honor, but avowed himself, despite his mother's cares and anxieties, an infidel of the Voltairean School. He next entered upon a course of law studies at Dijon, and distinguished himself among his associates equally by his eloquence and his irreligious tendencies. Admitted to the bar in 1822, he came to Paris, and for 18 months practised his profession in the Court of Cassation. In 1824 he suddenly abandoned the law and entered the theological seminary of St. Sulpice. Here he became as remarkable for devotion as he had been before for scepticism, but carried his love of liberty into his new calling, and occasioned his superiors much anxiety by his erratic movements. In 1827 he was ordained to the priesthood, and soon after appointed almoner to the College of Henry IV., where he formed the acquaintance of Lamennais, the founder of a new system of politico-theology, in which ultra devotion to the Church

was combined with the completest radicalism in politics. In 1830 Montalembert and Lamennais associated Lacordaire with them in founding a new journal, "*L'Avenir*," ("The Future,") for which they adopted the motto "God and Liberty," and which they announced was to be devoted alike to the absolute authority of the Pope and the people. The audacity of the theories propounded by this journal, and the vehemence of its language, soon caused its editors to be arraigned before the courts, where Lacordaire pleaded their cause and secured their triumphant acquittal. The Pope, Gregory XVI., in 1832 issued an encyclical letter, condemning in the severest terms the doctrines advanced in "*L'Avenir*," declaring "the whole idea of the regeneration of the church absurd, liberty of conscience a delirium, freedom of the press fatal, and inviolable submission to the prince a maxim of faith." Lacordaire, who with Montalembert had a short time previously established a free school without legal authorization, and by his eloquence in the court averted all the threatened penalties of the law except a trifling fine, was startled by the papal denunciations of the doctrines of *L'Avenir*, and hastened with his colleagues to effect a reconciliation. Lamennais was stubborn and defiant, but Lacordaire

humbly submitted himself to the Holy Father, and on his return announced his determination thenceforward to know no other guide than the Church. He now gave his whole mind to preaching, and his conferences at Notre Dame drew a large assemblage of eminent men, attracted alike by his eloquence, his fervor, and his free discussion, under a religious guise, of all sorts of political and social questions. At the end of two years he again visited Rome, where he was favorably received by the Pope, and where he wrote his *Lettre sur le Saint Siège*, published in 1838, which is a solemn protest and argument against his former views as developed in *L'Avenir*. On his return to Paris he again preached for a time at Notre Dame, and then entered the convent of Minerva, and in April, 1840, took the Dominican habit, and added to his other titles that of founder of a new order of Dominicans. While in the convent he wrote his *Vie de Saint Dominique*, Paris, 1840, and in 1841 returned to Notre Dame, and with shaven head and white robe ascended the pulpit there and preached with a more intense fervor and a more burning eloquence than ever before. The ancient cathedral was crowded to hear him. In 1848, at the outbreak of the revolution, he was elected to the Constituent Assembly, and took his place with the most ultra-radical members; but finding himself in uncongenial society, he soon resigned. In 1853 some pointed political allusions in one of his sermons caused his temporary removal from Notre Dame, and the following year he retired permanently, and assumed the direction of the College of Sorreze in the department of Tarn. In Feb. 1860, he was elected to the French Academy as the successor of Alexis de Tocqueville. His health, which had not for some time been firm, and which he had impaired by the rigor of his asceticism, now failed, and he became sleepless and suffered from an intense exaltation of the brain and nervous system, which rendered the touch of even the most delicate fabric a torture, but gave to his intellect a preternatural activity. He dictated incessantly, and with the most extraordinary eloquence to a corps of amanuenses, who relieved each other in turn, and continued thus to pour out his thoughts till his days of suffering were finished by the utter exhaustion of his physical system. Besides the works already named, Father Lacordaire published *Considérations philosophiques sur le système de M. de Lamennais*, Paris, 1834, 8vo.; *Memoire pour le rétablissement en France de l'ordre des frères prêcheurs*, 1840, 8vo.; *Conférences de Notre Dame de Paris, 1835-1850*, 3 vols., 8vo.; *Conférences du R. P. Lacordaire prêchées à Lyon et à Grenoble*, Lyons, 1845, 8vo.; *Sermons et Eloges Funèbres*, 1844-1847, 8vo.

LEBANON is a small village in Boone County, Missouri, about forty-two miles north by west from Jefferson City, the capital of the State.

On the 13th of October, a sudden dash was made upon a body of Confederate troops num-

bering about three hundred, by a Federal force, a few miles east of Lebanon. The Confederate force had gathered on the side of a hill on the right of a road running eastward, and were drawn up in line of battle, expecting an attack from a corn-field on the opposite side of the road. In this position they remained an hour and a half, when, suddenly, two companies of Federal cavalry, under Capt. Montgomery and Switzler, advanced over the brow of the hill in their rear, and plunged forward to within a hundred paces, delivering, at the same time, a destructive fire on the enemy, who were scattered and retired precipitately on the road towards Lebanon. Several of the Confederate force were killed, and thirteen taken prisoners.

LEESBURG is a handsome town, and the capital of Loudon County, Virginia. It is situated near the Kittoctan Mountains, three miles from the Potomac River. The streets are well paved, and the town is built in a substantial manner. It is 150 miles north of Richmond, 38 miles northwest of Alexandria, and about 20 miles south by east of Harper's Ferry. It is the termination of the Alexandria, London, and Hampshire railroad. All the buildings of this road were destroyed by the Confederate troops when they evacuated this place on the 15th of June. This evacuation was immediately followed by its occupation by Union troops, under Col. Stone, who subsequently evacuated the place, when it was again occupied by Confederate troops, who remained in possession until withdrawn from northeastern Virginia.

LEXINGTON has been a thriving town, and the capital of Lafayette County, Missouri. It is in a high and healthy situation, on the right bank of the Missouri River, 120 miles, by the road, west of Jefferson City. The population was about 5,000.

On the 29th of August a body of Home Guards, with some United States regulars posted at Lexington, were attacked by a large Confederate force. The Federal force numbered 430, and was intrenched. The assailing party had no artillery, and were repulsed with a considerable loss, and subsequently withdrew. This attack showed the importance of sending forward reinforcements. Accordingly, on the 9th of September, the town was occupied by an Irish brigade under Col. Mulligan, which, in addition to a small force there, consisting of Home Guards, a few Kansas troops, a portion of the Missouri Eighth Regiment, and seven hundred of the Illinois Cavalry, swelled the number to 2,500 men. Soon after a Confederate force under Gen. Price threatened an attack upon them. No time was lost in the work of intrenching their position, chosen about midway between the new and old towns of Lexington, which are about a mile apart, connected by a scattering settlement. Midway stood a solid brick edifice, built for a college, and about this a small breastwork had been already begun. By Col. Mulligan's order this was extended, and the troops commenced the con-

struction of an earthwork, ten feet in height, with a ditch eight feet in width, enclosing a large area, capable of containing a force of 10,000 men. The army train, consisting of numerous mule teams, was brought within this. The work was pushed with great vigor. This work went on for three days, or until Thursday, the 12th, at which time that portion of the works assigned to the Irish Brigade was well advanced, that of the Home Guard being still weak on the west or New Lexington side.

The college building, within the fortification, became Col. Mulligan's head-quarters. The magazine and treasure were stored in the cellar and suitably protected. The hospital of the troops was located just outside of the intrenchments, in a northwesterly direction. The river, at that point, is about half a mile wide, and about half a mile distant from the fortifications. The bluff there is high and abrupt, the steamboat landing being at New Lexington.

The artillery of Col. Mulligan consisted of five brass pieces and two mortars, but, having no shells, the latter were useless. The cavalry had only side-arms and pistols.

On the 12th, scouts and advanced pickets driven in reported the near approach of the Confederate force. The attack was led by Gen. Rains with a battery of nine pieces of artillery against the point least prepared to resist assault. The Confederates were repulsed, and the result warned them that they had no easy task on hand. The hospital, containing about twenty-four patients, was not spared by the assailants. Some of the sick were pierced with bayonets or sabres in their cots. The chaplain and surgeon of the brigade were taken prisoners.

Skirmishing continued for several days, during which the enemy brought more of their artillery into action. Messengers had been sent to Jefferson City by Col. Mulligan to urge the necessity of reinforcements, but they had been captured. At the same time, sufficient troops were sent out by the enemy to intercept any Federal reinforcements. Thus a party of 1,500 Iowa troops were met and forced to retire when they had arrived within sixteen miles of the river.

The situation of the Federal force was daily growing more desperate. Within their lines were picketed about the wagons and trains a large number of horses and mules, nearly three thousand in all, now a serious cause of care and anxiety; for, as shot and shell plunged among them, many of the animals were killed or wounded, and from the struggles of these latter the danger of a general stampede was imminent. The havoc in the centre of the intrenchment was immense. Wagons were knocked to pieces, stores scattered and destroyed, and the ground strewn with dead horses and mules.

On the 17th the water gave out, and being cut off from the river, the Union troops were reduced to great straits. Rations, also, began to grow short. Meanwhile, the contest continued with little cessation, as a brilliant moon shone all night. Gen. Price had sent to Col. Mulligan a

summons to surrender, to which the latter sent a refusal, saying, "If you want us, you must take us." The Home Guard, however, had become discouraged and disheartened, and on the 21st, while Col. Mulligan was engaged in another part of the camp, a white flag was raised by Major Becker, of the Guards, in the portion of the intrenchments assigned to him. As soon as this was made known to Col. Mulligan, he ordered the flag to be taken down, which was done. The severest of the fighting during that day followed in a charge made upon the enemy's nearest battery. Subsequently, the Home Guards left the outer work and retreated within the line of the inner intrenchments, about the college building, refusing to fight longer, and here again raised the white flag, this time from the centre of the fortifications, when the fire of the enemy slackened and ceased. Under this state of affairs, Col. Mulligan, calling his officers into council, decided to capitulate, and Capt. McDermott went out to the enemy's lines, with a handkerchief tied to a ramrod, and a parley took place. Major Moore, of the brigade, was sent to Gen. Price's head-quarters, at New Lexington, to know the terms of capitulation. These were: that the officers were to be retained as prisoners of war, the men to be allowed to depart with their personal property, surrendering their arms and accoutrements. Reluctantly, this was acceded to.

At 4 p. m. on Sept. 21st, the Federal forces were marched out of the intrenchments. They left behind them their arms and accoutrements, reserving only their clothing. The privates, numbering some 1,500 strong, were first made to take the oath not to serve against the Confederate States, when they were put across the river, and, in charge of Gen. Rains, marched on Saturday night to Richmond, sixteen miles; whence, on Sunday, they marched to Hamilton, a station on the Hannibal and St. Joseph's railroad, where they were declared free to go wherever they pleased. While on this march they experienced generous and humane treatment, both from Gen. Rains and from the residents.

The Federal force at Lexington was composed of the Twenty-third Regiment, (Irish Brigade,) Col. Mulligan, 800; Thirtieth Missouri, Col. Peabody, 840; First Illinois, Col. Marshall, 500; Home Guards, Col. White, 500; total 2,640, with one 4, three 6, and one 12-pounders, and two 4-inch mortars. The Confederate force had been increased from 3,000 by the arrival of reinforcements to a large number, estimated at 20,000. It appears by the official report of Gen. Price, who took command at the outset, that, in addition to the large force he brought with him from the southwest, he was joined, before the battle, by the forces under Martin Green, Harris, Boyd, and Patten, all of whom participated in the siege. Green's force, when he crossed the river at Glasgow, was 2,500 men; Harris had 1,000 when he crossed;

and Patten and Boyd had about 6,000. If, therefore, the army that Gen. Price brought with him from the southwest is put as low as 12,000, the total force that he brought to bear on the garrison at Lexington was 21,500. The force of the garrison was only 2,640 men. The loss of water, and the inferiority of numbers caused the surrender. Gen. Price says that the firing was continued for fifty-two hours. The enemy adopted for defence a breastwork of hempen bales, which they rolled before them as they advanced. Their loss they state at 25 killed and 72 wounded. The Federal loss in killed and wounded was estimated from 300 to 500. Gen. Fremont, upon hearing of this surrender, sent the following despatch to Washington:

HEAD-QUARTERS, WESTERN DEPARTMENT, {
ST. LOUIS, Sept. 23, 1861. }

Col. E. D. Townsend, Adjutant-General:

I have a telegram from Brookfield that Lexington has fallen into Price's hands, he having cut off Mulligan's supply of water. Reinforcements 4,000 strong, under Sturgis, by the capture of the ferry boats, had no means of crossing the river in time. Lane's forces from the southwest, and Davis' from the southeast, upwards of 11,000 in all, could also not get there in time. I am taking the field myself and hope to destroy the enemy either before or after the junction of the forces under McCulloch. Please notify the President immediately. J. C. FREMONT, Major-Gen. Commanding.

Some remarks appeared in the St. Louis "Evening News" a few days after, commenting upon the neglect of the authorities at St. Louis to send out reinforcements, when the paper was immediately suppressed by Gen. Fremont, and its publisher and editor sent to prison, from which they were subsequently unconditionally released.

As a strategical point, the loss of the town was a serious affair to the Federal cause, and a gain of no small value to the Confederates. Its possession would tend to retain that part of Missouri to the Union side, while its loss would expose Kansas, as well as the northern and western parts of Missouri.

About the 1st of October, on the approach of Gen. Fremont, Lexington was partly evacuated by the Confederate force. On the 16th, Major White, with one hundred and fifty men of the First Missouri, surprised the garrison which remained, and recaptured the town, with all the sick and wounded, also a quantity of guns, pistols, two cannon, and other articles. The garrison numbered about two hundred.

LINCOLN, ABRAHAM. By the election on the 6th November, 1860, he was chosen President of the United States. The vote, as counted by Congress, was proclaimed to be as follows:

The whole number of Electors appointed to vote for President of the United States is 303, of which a majority is 152. The state of the vote for President of the United States was:

For Abraham Lincoln, of Illinois,.....	180
For John C. Breckinridge, of Kentucky,.....	72
For John Bell, of Tennessee,.....	39
For Stephen A. Douglas, of Illinois,.....	12

On the morning of the 11th of February fol-

lowing, at 8 o'clock, Mr. Lincoln left Springfield, Illinois, for Washington, to undertake the discharge of the duties of his office. Hitherto, amid all the excitement, anxiety, and alarm of the country—the gloom that hung over commerce, the paralysis of trade and manufactures, and the threatening aspect of the South; amid the secession of States, the attempted dismemberment of the Union, and the efforts of the wisest of the Northern States met in a Convention, consisting of an Ex-President, Ex-Cabinet Ministers, Ex-Foreign Ministers, Ex-Senators, Ex-Members of the House of Representatives, Ex-Chief-Justices of State Courts, Ex-Chancellors, a Governor and Ex-Governors, and Ex-Attorney-Generals, to devise measures to stay the impending ruin; hitherto, indeed, not a word had passed his lips to lift the weight of doubt and trouble that oppressed his countrymen. As he went forth from his humble home to put on the robes of his majestic office, all eyes watched his steps. Secessionist, Unionist, Republican, listened with anxious interest to catch every sound he uttered, as a sign of what the unseen future would be. As he entered the car-house at the Springfield depot, he met over a thousand of his townsmen assembled, to bid him farewell. Shaking hands with them as he approached the train, he then stepped on the platform and spoke as follows:

"My friends: No one not in my position can appreciate the sadness I feel at this parting. To this people I owe all that I am. Here I have lived more than a quarter of a century. Here my children were born, and here one of them lies buried. I know not how soon I shall see you again. A duty devolves upon me which is perhaps greater than that which has devolved upon any other man since the days of Washington. He never would have succeeded except for the aid of Divine Providence, upon which he at all times relied. I feel that I cannot succeed without the same Divine aid which sustained him, and in the same Almighty Being I place my reliance for support; and I hope you, my friends, will all pray that I may receive that Divine assistance, without which I cannot succeed, but with which success is certain. Again, I bid you all an affectionate farewell."

Along the route, multitudes assembled at the railway stations to greet the Presidential party. At Toledo, after a salute and in response to repeated calls, Mr. Lincoln appeared on the platform and said:

"I am leaving you on an errand of national importance, attended, as you are aware, with considerable difficulties. Let us believe, as some poet has expressed it, 'Behind the cloud the sun is shining still.' I bid you an affectionate farewell."

The party next proceeded to Indianapolis, where Mr. Lincoln was welcomed by the Governor of the State, and escorted to a carriage, when a procession was formed, composed of both Houses of the Legislature, the public officers, the municipal authorities, military, and

firemen. On reaching the "Bates House" the procession halted, and Mr. Lincoln was escorted to the balcony, from which he addressed the people :

"Fellow-citizens of the State of Indiana : I am here to thank you much for this magnificent welcome, and still more for the very generous support given by your State to that political cause, which I think is the true and just cause of the whole country and the whole world. Solomon says 'there is a time to keep silence ;' and when men wrangle by the mouth, with no certainty that they mean the same thing while using the same words, it perhaps were as well if they would keep silence. The words 'coercion' and 'invasion' are much used in these days, and often with some temper and hot blood. Let us make sure, if we can, that we do not misunderstand the meaning of those who use them. Let us get the exact definitions of these words, not from dictionaries, but from the men themselves, who certainly deprecate the things they would represent by the use of the words. What, then, is 'coercion' ? What is 'invasion' ? Would the marching of an army into South Carolina, without the consent of her people, and with hostile intent towards them, be invasion ? I certainly think it would, and it would be 'coercion' also if the South Carolinians were forced to submit. But if the United States should merely hold and retake its own forts and other property, and collect the duties on foreign importations, or even withhold the mails from places where they were habitually violated, would any or all of these things be 'invasion' or 'coercion' ? Do our professed lovers of the Union, but who spitefully resolve that they will resist coercion and invasion, understand that such things as these, on the part of the United States, would be coercion or invasion of a State ? If so, their idea of means to preserve the object of their great affection would seem to be exceedingly thin and airy. If sick, the little pills of the homœopathist would be much too large for it to swallow. In their view, the Union, as a family relation, would seem to be no regular marriage, but rather a sort of 'free-love' arrangement, to be maintained on passional attraction. By the way, in what consists the special sacredness of a State ? I speak not of the position assigned to a State in the Union by the Constitution, for that is the bond we all recognize. That position, however, a State cannot carry out of the Union with it. I speak of that assumed primary right of a State to rule all which is less than itself, and to ruin all which is larger than itself. If a State and a County, in a given case, should be equal in extent of territory and equal in number of inhabitants, in what, as a matter of principle, is the State better than the County ? Would an exchange of name be an exchange of rights ? Upon what principle, upon what rightful principle, may a State, being no more than one-fiftieth part of the nation in soil and population,

break up the nation, and then coerce a proportionably larger subdivision of itself in the most arbitrary way ? What mysterious right to play tyrant is conferred on a district of country with its people, by merely calling it a State ? Fellow-citizens, I am not asserting any thing. I am merely asking questions for you to consider. And now allow me to bid you farewell."

In the evening Mr. Lincoln held a levee until 9 o'clock, when he retired. In the morning, before his departure for Cincinnati, he took occasion to thank his friends for the reception they had given him, and said he trusted they all might meet again under one flag and one Union.

Proceeding thence to Cincinnati, he arrived in the afternoon, and received a most enthusiastic welcome. Having been addressed by the mayor of the city, and escorted by a civic and military procession to the Burnet House, he there addressed the multitude in these words :

"Fellow-citizens : I have spoken but once before this in Cincinnati. That was a year previous to the late Presidential election. On that occasion, in a playful manner, but with sincere words, I addressed much of what I said to the Kentuckians. I gave my opinion that we, as Republicans, would ultimately beat them as Democrats, but that they could postpone the result longer by nominating Senator Douglas for the Presidency than they could in any other way. They did not, in any true sense of the word, nominate Mr. Douglas, and the result has come certainly as soon as ever I expected.

"I also told them how I expected they would be treated after they should have been beaten, and now wish to call their attention to what I then said :

"When we do, as we say we will, beat you, you perhaps want to know what we will do with you. I will tell you—as far as I am authorized to speak for the opposition—what we mean to do with you. We mean to treat you as near as we possibly can, as Washington, Jefferson, and Madison treated you. We mean to leave you alone, and in no way to interfere with your institutions ; to abide by all and every compromise of the Constitution. In a word, coming back to the original proposition, to treat you, as far as degenerate men—if we have degenerated—may, according to the example of those noble fathers, Washington, Jefferson, and Madison. We mean to remember that you are as good as we ; that there is no difference between us other than the difference of circumstances. We mean to recognize and bear in mind always that you have as good hearts in your bosoms as other people, or as we claim to have, and to treat you accordingly."

"Fellow-citizens of Kentucky, friends, brethren : May I call you such ? In my new position I see no occasion and feel no inclination to retract a word of this. If it shall not be made good be assured that the fault shall not be mine." In the evening he had a reception, when large crowds called upon him.

On the next morning, at 9 o'clock, he left Cincinnati, and arrived at Columbus at 2 o'clock. He was received with a national salute and every demonstration of enthusiasm. He visited the Governor in the Executive Chamber, and was subsequently introduced to the members of the Legislature in joint session, when he was formally welcomed by the Lieutenant-Governor, to whom Mr. Lincoln responded in these words:

"It is true, as has been said by the President of the Senate, that very great responsibility rests upon me in the position to which the votes of the American people have called me. I am deeply sensible of that weighty responsibility. I cannot but know, what you all know, that without a name—perhaps without a reason why I should have a name—there has fallen upon me a task such as did not rest upon the Father of his Country. And so feeling, I cannot but turn and look for the support without which it will be impossible for me to perform that great task. I turn, then, and look to the American people, and to that God who has never forsaken them.

"Allusion has been made to the interest felt in relation to the policy of the new Administration. In this, I have received from some a degree of credit for having kept silence, from others some depreciation. I still think I was right. In the varying and repeatedly shifting scenes of the present, without a precedent which could enable me to judge for the past, it has seemed fitting, that before speaking upon the difficulties of the country I should have gained a view of the whole field. To be sure, after all, I would be at liberty to modify and change the course of policy as future events might make a change necessary.

"I have not maintained silence from any want of real anxiety. It is a good thing that there is no more than anxiety, for there is nothing going wrong. It is a consoling circumstance that when we look out there is nothing that really hurts anybody. We entertain different views upon political questions, but nobody is suffering any thing. This is a most consoling circumstance, and from it I judge that all we want is time and patience, and a reliance on that God who has never forsaken this people."

On the 14th of February, Mr. Lincoln proceeded to Pittsburg. At Steubenville, on the route, in reply to an address by Judge Lloyd in behalf of the crowd present, he said:

"I fear that the great confidence placed in my ability is unfounded. Indeed, I am sure it is. Encompassed by vast difficulties, as I am, nothing shall be wanted on my part, if sustained by the American people and God. I believe the devotion to the Constitution is equally great on both sides of the river. It is only the different understanding of that instrument that causes difficulty. The only dispute is, 'What are their rights?' If the majority should not rule who should be the judge? Where is such a judge to be found? We should all be bound

by the majority of the American people—if not, then the minority must control. Would that be right? Would it be just or generous? Assuredly not." He reiterated, the majority should rule. If he adopted a wrong policy, then the opportunity to condemn him would occur in four years' time. "Then I can be turned out and a better man with better views put in my place."

He remained at Pittsburg until the next morning, when he left for Cleveland. Before his departure he made an address to the people in which he said:

"In every short address I have made to the people, and in every crowd through which I have passed of late, some allusion has been made to the present distracted condition of the country. It is naturally expected that I should say something upon this subject, but to touch upon it at all would involve an elaborate discussion of a great many questions and circumstances, would require more time than I can at present command, and would perhaps unnecessarily commit me upon matters which have not yet fully developed themselves.

"The condition of the country, fellow-citizens, is an extraordinary one, and fills the mind of every patriot with anxiety and solicitude. My intention is to give this subject all the consideration which I possibly can before I speak fully and definitely in regard to it, so that, when I do speak, I may be as nearly right as possible. And when I do speak, fellow-citizens, I hope to say nothing in opposition to the spirit of the Constitution, contrary to the integrity of the Union, or which will in any way prove inimical to the liberties of the people or to the peace of the whole country. And, furthermore, when the time arrives for me to speak on this great subject, I hope to say nothing which will disappoint the reasonable expectations of any man, or disappoint the people generally throughout the country, especially if their expectations have been based upon any thing which I may have heretofore said.

"Notwithstanding the troubles across the river, [the speaker, smiling, pointed southwardly to the Monongahela River,] there is really no crisis springing from any thing in the Government itself. In plain words, there is really no crisis except an artificial one. What is there now to warrant the condition of affairs presented by our friends 'over the river'? Take even their own view of the questions involved, and there is nothing to justify the course which they are pursuing. I repeat it, then, there is no crisis, except such a one as may be gotten up at any time by turbulent men, aided by designing politicians. My advice, then, under such circumstances, is to keep cool. If the great American people will only keep their temper on both sides of the line, the trouble will come to an end, and the question which now distracts the country will be settled just as surely as all other difficulties of like character which have originated in this Gov-

ernment have been adjusted. Let the people on both sides keep their self-possession, and just as other clouds have cleared away in due time, so will this, and this great nation shall continue to prosper as heretofore."

He then referred to the subject of the tariff, and said :

"According to my political education, I am inclined to believe that the people in the various portions of the country should have their own views carried out through their representatives in Congress. That consideration of the Tariff bill should not be postponed until the next session of the National Legislature. No subject should engage your representatives more closely than that of the tariff. If I have any recommendation to make, it will be that every man who is called upon to serve the people, in a representative capacity, should study the whole subject thoroughly, as I intend to do myself, looking to all the varied interests of the common country, so that when the time for action arrives, adequate protection shall be extended to the coal and iron of Pennsylvania and the corn of Illinois. Permit me to express the hope that this important subject may receive such consideration at the hands of your representatives, that the interests of no part of the country may be overlooked, but that all sections may share in the common benefits of a just and equitable tariff."

Mr. Lincoln, upon his arrival in Cleveland, also made a speech, in which he adverted to the same subject in the following terms :

"It is with you, the people, to advance the great cause of the Union and the Constitution, and not with any one man. It rests with you alone. This fact is strongly impressed on my mind at present. In a community like this, whose appearance testifies to their intelligence, I am convinced that the cause of liberty and the Union can never be in danger. Frequent allusion is made to the excitement at present existing in national politics. I think there is no occasion for any excitement. The crisis, as it is called, is altogether an artificial crisis. In all parts of the nation there are differences of opinion in politics. There are differences of opinion even here. You did not all vote for the person who now addresses you. And how is it with those who are not here? Have they not all their rights as they ever had? Do they not have their fugitive slaves returned now as ever? Have they not the same Constitution that they have lived under for seventy odd years? Have they not a position as citizens of this common country, and have we any power to change that position? What, then, is the matter with them? Why all this excitement? Why all these complaints? As I said before, this crisis is all artificial. It has no foundation in fact. It was 'argued up,' as the saying is, and cannot be argued down. Let it alone, and it will go down itself."

On Saturday he proceeded to Buffalo, where he arrived at evening, and was met at the door

of the car by a deputation of citizens, headed by Ex-President Fillmore.

The crowd surrounding the depot numbered not less than 10,000 people. But one company of soldiers and file of police were detailed to act as escort to the party, and it was with the greatest difficulty that they could protect them from being crushed. While passing from the train to the carriages, in the jam, Major Hunter, of the U. S. Army, one of Mr. Lincoln's suite, had his shoulder dislocated. The passage of the procession up Exchange and Main streets to the American Hotel was a perfect ovation.

Arriving at the American Hotel, Mr. Lincoln was welcomed in a brief speech by acting Mayor Bemis, to which he made a brief reply, as follows :

"Mr. Mayor and fellow-citizens : I am here to thank you briefly for this grand reception given to me, not personally, but as the representative of our great and beloved country. Your worthy Mayor has been pleased to mention in his address to me, the fortunate and agreeable journey which I have had from home—only it is rather a circuitous route to the Federal Capital. I am very happy that he was enabled, in truth, to congratulate myself and company on that fact. It is true, we have had nothing thus far to mar the pleasure of the trip. We have not been met alone by those who assisted in giving the election to me ; I say not alone, but by the whole population of the country through which we have passed. This is as it should be. Had the election fallen to any other of the distinguished candidates instead of myself, under the peculiar circumstances, to say the least, it would have been proper for all citizens to have greeted him as you now greet me. It is evidence of the devotion of the whole people to the Constitution, the Union, and the perpetuity of the liberties of this country. I am unwilling, on any occasion, that I should be so meanly thought of, as to have it supposed for a moment that these demonstrations are tendered to me personally. They are tendered to the country, to the institutions of the country, and to the perpetuity of the liberties of the country for which these institutions were made and created. Your worthy Mayor has thought fit to express the hope that I may be able to relieve the country from the present, or, I should say, the threatened difficulties. I am sure I bring a heart true to the work. For the ability to perform it, I trust in that Supreme Being who has never forsaken this favored land, through the instrumentality of this great and intelligent people. Without that assistance I should surely fail ; with it I cannot fail. When we speak of threatened difficulties to the country, it is natural that it should be expected that something should be said by myself with regard to particular measures. Upon more mature reflection, however,—and others will agree with me—that when it is considered that these difficulties are without precedent, and never have been acted upon by any

individual situated as I am, it is most proper I should wait and see the developments, and get all the light possible, so that when I do speak authoritatively, I may be as near right as possible. When I shall speak authoritatively, I hope to say nothing inconsistent with the Constitution, the Union, the rights of all the States, of each State, and of each section of the country, and not to disappoint the reasonable expectations of those who have confided to me their votes. In this connection, allow me to say, that you, as a portion of the great American people, need only to maintain your composure, stand up to your sober convictions of right, to your obligations to the Constitution, and act in accordance with those sober convictions, and the clouds which now arise in the horizon will be dispelled, and we shall have a bright and glorious future; and when this generation shall have passed away, tens of thousands shall inhabit this country where only thousands inhabit it now. I do not propose to address you at length. I have no voice for it. Allow me again to thank you for this magnificent reception, and bid you farewell."

On Monday, Mr. Lincoln proceeded from Buffalo to Albany. Here he was met by the Mayor and City Councils and the Legislative Committees, and, after some brief formalities, was conducted to the Capitol, where he was welcomed by Governor Morgan, and responded briefly as follows:

"Governor Morgan: I was pleased to receive an invitation to visit the Capital of the great Empire State of this nation, while on my way to the Federal Capital. I now thank you, and you, the people of the capital of the State of New York, for this most hearty and magnificent welcome. If I am not at fault, the great Empire State at this time contains a larger population than did the whole of the United States of America at the time they achieved their National Independence; and I was proud to be invited to visit its capital, to meet its citizens as I now have the honor to do. I am notified by your Governor that this reception is tendered by citizens without distinction of party. Because of this I accept it the more gladly. In this country, and in any country where freedom of thought is tolerated, citizens attach themselves to political parties. It is but an ordinary degree of charity to attribute this act to the supposition that, in thus attaching themselves to the various parties, each man in his own judgment supposes he thereby best advances the interests of the whole country. And when an election is passed, it is altogether befitting a free people that, until the next election, they should be one people. The reception you have extended me to-day is not given to me personally. It should not be so, but as the representative, for the time being, of the majority of the nation. If the election had fallen to any of the more distinguished citizens, who received the support of the people, this same honor should have greeted him that greets me

this day, in testimony of the unanimous devotion of the whole people to the Constitution, the Union, and to the perpetual liberties of succeeding generations in this country. I have neither the voice nor the strength to address you at any greater length. I beg you will, therefore, accept my most grateful thanks for this manifest devotion—not to me, but to the institutions of this great and glorious country."

He was then conducted to the Legislative halls, and received by the members with demonstrations of respect. Here, in reply to an address of welcome, he made a more formal speech, in which he again adverted to the troubles of the country in the following terms:

"Mr. President and Gentlemen of the Legislature of the State of New York: It is with feelings of great diffidence, and, I may say, feelings even of awe, perhaps greater than I have recently experienced, that I meet you here in this place. The history of this great State, the renown of its great men, who have stood in this chamber, and have spoken their thoughts, all crowd around my fancy, and incline me to shrink from an attempt to address you. Yet I have some confidence given me by the generous manner in which you have invited me, and the still more generous manner in which you have received me. You have invited me and received me without distinction of party. I could not, for a moment, suppose that this has been done in any considerable degree with any reference to my personal self. It is very much more grateful to me that this reception and the invitation preceding it, were given to me as the representative of a free people, than it could possibly have been, were they but the evidence of devotion to me or to any one man. It is true that, while I hold myself, without mock-modesty, the humblest of all the individuals who have ever been elected President of the United States, I yet have a more difficult task to perform than any one of them has ever encountered. You have here generously tendered me the support, the united support, of the great Empire State. For this, in behalf of the nation—in behalf of the President and of the future of the nation—in behalf of the cause of civil liberty in all time to come—I most gratefully thank you. I do not propose now to enter upon any expressions as to the particular line of policy to be adopted with reference to the difficulties that stand before us in the opening of the incoming Administration. I deem that it is just to the country, to myself, to you, that I should see every thing, hear every thing, and have every light that can possibly be brought within my reach to aid me before I shall speak officially, in order that, when I do speak, I may have the best possible means of taking correct and true grounds. For this reason, I do not now announce any thing in the way of policy for the new Administration. When the time comes, according to the custom of the Government, I shall speak, and speak as well as I am able for the good of the

present and of the future of this country—for the good of the North and of the South—for the good of one and of the other, and of all sections of it. In the mean time, if we have patience, if we maintain our equanimity, though some may allow themselves to run off in a burst of passion, I still have confidence that the Almighty Ruler of the Universe, through the instrumentality of this great and intelligent people, can and will bring us through this difficulty, as he has heretofore brought us through all preceding difficulties of the country. Relying upon this, and again thanking you, as I forever shall, in my heart, for this generous reception you have given me, I bid you farewell.”

At Albany, he was met by a delegation from the city authorities in New York, and on the 19th started for that city. Vast crowds greeted him at every important station on the Hudson River Railroad. At Poughkeepsie, he was welcomed by the mayor of the city, who hoped that he would so administer the affairs of the Government that the whole country would bless him. Mr. Lincoln in reply said:

“I am grateful for this cordial welcome, and I am gratified that this immense multitude has come together, not to meet the individual man, but the man who, for the time being, will humbly but earnestly represent the majesty of the nation. These receptions have been given me at other places, and, as here, by men of different parties, and not by one party alone. It shows an earnest effort on the part of all to save, not the country, for the country can save itself, but to save the institutions of the country—those institutions under which, for at least three-quarters of a century, we have become the greatest, the most intelligent, and the happiest people in the world. These manifestations show that we all make common cause for these objects; that if some of us are successful in an election, and others are beaten, those who are beaten are not in favor of sinking the ship in consequence of defeat, but are earnest in their purpose to sail it safely through the voyage in hand, and, in so far as they may think there has been any mistake in the election, satisfying themselves to take their chance at setting the matter right the next time. That course is entirely right. I am not sure—I do not pretend to be sure—that in the selection of the individual who has been elected this term, the wisest choice has been made. I fear it has not. In the purposes and in the principles that have been sustained, I have been the instrument selected to carry forward the affairs of this Government. I can rely upon you, and upon the people of the country; and with their sustaining hand, I think that even I shall not fail in carrying the Ship of State through the storm.”

The reception of President Lincoln in New York City was a most imposing demonstration. Places of business were generally closed, and hundreds of thousands were in the streets. On the next day, he was welcomed to the city by Mayor Wood, who, in his address, spoke of the

state of public affairs in very emphatic terms, as follows:

“Mr. Lincoln: As Mayor of New York, it becomes my duty to extend to you an official welcome in behalf of the Corporation. In doing so, permit me to say that this city has never offered hospitality to a man clothed with more exalted powers, or resting under graver responsibilities, than those which circumstances have devolved upon you. Coming into office with a dismembered Government to reconstruct, and a disconnected and hostile people to reconcile, it will require a high patriotism, and an elevated comprehension of the whole country, and its varied interests, opinions, and prejudices, to so conduct public affairs as to bring it back again to its former harmonious, consolidated, and prosperous condition.

“If I refer to this topic, sir, it is because New York is deeply interested. The present political divisions have sorely afflicted her people. All her material interests are paralyzed. Her commercial greatness is endangered. She is the child of the American Union. She has grown up under its maternal care, and been fostered by its paternal bounty; and we fear that if the Union dies, the present supremacy of New York may perish with it. To you, therefore, chosen under the forms of the Constitution as the head of the Confederacy, we look for a restoration of fraternal relations between the States—only to be accomplished by peaceful and conciliatory means—aided by the wisdom of Almighty God.”

Mr. Lincoln immediately replied, but without affording any satisfaction on those subjects of which the Mayor expressed anxiety.

“Mr. Mayor: It is with feelings of deep gratitude that I make my acknowledgments for the reception given me in the great commercial city of New York. I cannot but remember that this is done by a people who do not, by a majority, agree with me in political sentiment. It is the more grateful, because in this I see that, for the great principles of our Government, the people are almost unanimous. In regard to the difficulties that confront us at this time, and of which your Honor has thought fit to speak so becomingly and so justly, as I suppose, I can only say that I agree in the sentiments expressed. In my devotion to the Union, I hope I am behind no man in the nation. In the wisdom with which to conduct the affairs tending to the preservation of the Union, I fear that too great confidence may have been reposed in me; but I am sure I bring a heart devoted to the work. There is nothing that could ever bring me to willingly consent to the destruction of this Union, under which not only the great commercial city of New York, but the whole country, acquired its greatness, except it be the purpose for which the Union itself was formed. I understand the ship to be made for the carrying and the preservation of the cargo, and so long as the ship can be saved with the cargo, it should never be

abandoned, unless it fails the possibility of its preservation, and shall cease to exist, except at the risk of throwing overboard both freight and passengers. So long then, as it is possible that the prosperity and the liberties of the people be preserved in this Union, it shall be my purpose at all times to use all my powers to aid in its perpetuation. Again thanking you for the reception given me, allow me to come to a close."

On the next day he proceeded to Philadelphia. At Trenton, on the route, he remained a few hours, and visited both Houses of the Legislature, then in session. On being received in the Senate, he thus addressed that body:

"Mr. President and Gentlemen of the Senate of the State of New Jersey: I am very grateful to you for the honorable reception of which I have been the object. I cannot but remember the place that New Jersey holds in our early history. In the early Revolutionary struggle, few of the States among the old Thirteen had more of the battle-fields of the country within its limits than old New Jersey. May I be pardoned, if, upon this occasion, I mention, that away back in my childhood, the earliest days of my being able to read, I got hold of a small book, such a one as few of the younger members have ever seen, 'Weems' Life of Washington.' I remember all the accounts there given of the battle-fields and struggles for the liberties of the country, and none fixed themselves upon my imagination so deeply as the struggle here at Trenton, New Jersey. The crossing of the river—the contest with the Hessians—the great hardships endured at that time—all fixed themselves on my memory more than any single revolutionary event; and you all know, for you have all been boys, how these early impressions last longer than any others. I recollect thinking then, boy even though I was, that there must have been something more than common that those men struggled for. I am exceedingly anxious that that thing which they struggled for—that something even more than National Independence—that something that held out a great promise to all the people of the world to all time to come—I am exceedingly anxious that this Union, the Constitution, and the liberties of the people, shall be perpetuated in accordance with the original idea for which that struggle was made, and I shall be most happy indeed if I shall be an humble instrument in the hands of the Almighty, and of this, His almost chosen people, for perpetuating the object of that great struggle. You give me this reception, as I understand, without distinction of party. I learn that this body is composed of a majority of gentlemen who, in the exercise of their best judgment in the choice of a Chief Magistrate, did not think I was the man. I understand, nevertheless, that they came forward here to greet me as the constitutional President of the United States—as citizens of the United States,

to meet the man who, for the time being, is the representative man of the nation, united by a purpose to perpetuate the Union and liberties of the people. As such, I accept this reception more gratefully than I could do did I believe it was tendered to me as an individual."

He then passed into the Chamber of the Assembly, and upon being introduced by the Speaker, addressed that body as follows:

"Mr. Speaker and Gentlemen: I have just enjoyed the honor of a reception by the other branch of this Legislature, and I return to you and them my thanks for the reception which the people of New Jersey have given, through their chosen representatives, to me, as the representative, for the time being, of the majesty of the people of the United States. I appropriate to myself very little of the demonstrations of respect with which I have been greeted. I think little should be given to any man, but that it should be a manifestation of adherence to the Union and the Constitution. I understand myself to be received here by the representatives of the people of New Jersey, a majority of whom differ in opinion from those with whom I have acted. This manifestation is therefore to be regarded by me as expressing their devotion to the Union, the Constitution, and the liberties of the people. You, Mr. Speaker, have well said, that this is the time when the bravest and wisest look with doubt and awe upon the aspect presented by our national affairs. Under these circumstances, you will readily see why I should not speak in detail of the course I shall deem it best to pursue. It is proper that I should avail myself of all the information and all the time at my command, in order that when the time arrives in which I must speak officially, I shall be able to take the ground which I deem the best and safest, and from which I may have no occasion to swerve. I shall endeavor to take the ground I deem most just to the North, the East, the West, the South, and the whole country. I take it, I hope, in good temper—certainly with no malice towards any section. I shall do all that may be in my power to promote a peaceful settlement of all our difficulties. The man does not live who is more devoted to peace than I am—none who would do more to preserve it. But it may be necessary to put the foot down firmly. And if I do my duty, and do right, you will sustain me, will you not? Received, as I am, by the members of a Legislature, the majority of whom do not agree with me in political sentiments, I trust that I may have their assistance in piloting the Ship of State through this voyage, surrounded by perils as it is; for if it should suffer shipwreck now, there will be no pilot ever needed for another voyage."

On his arrival in Philadelphia a few hours afterwards, he was received with great enthusiasm. The mayor of the city greeted him with an address designed to draw forth, if possible, some expression or sentiment indicative

of the future policy of the Government. It was as follows :

"Sir : In behalf of the Councils of Philadelphia and of its citizens, who, with common respect for their Chief Magistrate-elect, have greeted your arrival, I tender you the hospitality of this city. I do this as the official representative of ninety thousand hearths, around which dwell six hundred thousand people, firm and ardent in their devotion to the Union ; and yet it may not be withheld, that there are but few of these firesides whose cheer is not straitened and darkened by the calamitous condition of our country. The great mass of this people are heartily weary and sick of the selfish schemes and wily plots of mere politicians, who bear no more relation to true statesmanship than do the barnacles which incrust the ship to the master who stands by the helm. Your fellow-countrymen look to you in the earnest hope that true statesmanship and unalloyed patriotism may, with God's blessing, restore peace and prosperity to this distracted land. It is to be regretted that your short stay precludes that intercourse with the merchants, manufacturers, mechanics, and other citizens of Philadelphia, which might afford you a clear discernment of their great interests. And, sir, it could not be other than grateful to yourself to have the opportunity of communicating with the memories of the past, in those historic walls where were displayed the comprehensive intellects, and the liberal, disinterested virtues of our fathers, who framed the Constitution of the Federal States, over which you have been called upon to preside."

Mr. Lincoln replied :

"Mr. Mayor and Fellow-citizens of Philadelphia : I appear before you to make no lengthy speech but to thank you for this reception. The reception you have given me to-night is not to me, the man, the individual, but to the man who temporarily represents, or should represent, the majesty of the nation. It is true, as your worthy Mayor has said, that there is anxiety among the citizens of the United States at this time. I deem it a happy circumstance that this dissatisfied portion of our fellow-citizens do not point us to any thing in which they are being injured, or are about to be injured ; for which reason I have felt all the while justified in concluding that the crisis, the panic, the anxiety of the country at this time, is artificial. If there be those who differ with me upon this subject, they have not pointed out the substantial difficulty that exists. I do not mean to say that an artificial panic may not do considerable harm ; that it has done such I do not deny. The hope that has been expressed by your Mayor, that I may be able to restore peace, harmony, and prosperity to the country, is most worthy of him ; and happy indeed will I be if I shall be able to verify and fulfil that hope. I promise you, in all sincerity, that I bring to the work a sincere heart. Whether I

will bring a head equal to that heart, will be for future times to determine. It were useless for me to speak of details of plans now ; I shall speak officially next Monday week, if ever. If I should not speak then, it were useless for me to do so now. If I do speak then, it is useless for me to do so now. When I do speak, I shall take such ground as I deem best calculated to restore peace, harmony, and prosperity to the country, and tend to the perpetuity of the nation, and the liberty of these States and these people. Your worthy Mayor has expressed the wish, in which I join with him, that it were convenient for me to remain with your city long enough to consult your merchants and manufacturers ; or, as it were, to listen to those breathings rising within the consecrated walls wherein the Constitution of the United States, and, I will add, the Declaration of Independence, were originally framed and adopted. I assure you and your Mayor, that I had hoped on this occasion, and upon all occasions during my life, that I shall do nothing inconsistent with the teachings of these holy and most sacred walls. I never asked any thing that does not breathe from those walls. All my political warfare has been in favor of the teachings that come forth from these sacred walls. May my right hand forget its cunning, and my tongue cleave to the roof of my mouth, if ever I prove false to those teachings. Fellow-citizens, now allow me to bid you good-night."

On the next morning, which was Friday, Mr. Lincoln visited the old "Independence Hall," (so called because within its walls was held the session of that Congress which issued the Declaration of Independence in 1776,) for the purpose of raising the national flag over it. Here he was received with a warm welcome by one of the prominent citizens, to whom he thus replied :

"Mr. Cuyler : I am filled with deep emotion at finding myself standing here, in this place, where were collected the wisdom, the patriotism, the devotion to principle, from which sprang the institutions under which we live. You have kindly suggested to me that in my hands is the task of restoring peace to the present distracted condition of the country. I can say in return, sir, that all the political sentiments I entertain have been drawn, so far as I have been able to draw them, from the sentiments which originated and were given to the world from this hall. I have never had a feeling politically that did not spring from the sentiments embodied in the Declaration of Independence. I have often pondered over the dangers which were incurred by the men who assembled here, and framed and adopted that Declaration of Independence. I have pondered over the toils that were endured by the officers and soldiers of the army who achieved that independence. I have often inquired of myself what great principle or idea it was that kept this Confederacy so long together. It was not the mere matter of the separation of the colonies from the mother-land, but that sentiment in the

Declaration of Independence which gave liberty, not alone to the people of this country, but, I hope, to the world for all future time. It was that which gave promise that in due time the weight would be lifted from the shoulders of all men. This is a sentiment embodied in the Declaration of Independence. Now, my friends, can this country be saved upon this basis? If it can, I will consider myself one of the happiest men in the world if I can help to save it. If it cannot be saved upon that principle, it will be truly awful. But if this country cannot be saved without giving up that principle, I was about to say I would rather be assassinated on this spot than surrender it. Now, in my view of the present aspect of affairs, there need be no bloodshed or war. There is no necessity for it. I am not in favor of such a course, and I may say, in advance, that there will be no bloodshed unless it be forced upon the Government, and then it will be compelled to act in self-defence.

"My friends, this is wholly an unexpected speech, and I did not expect to be called upon to say a word when I came here. I supposed it was merely to do something towards raising the flag. I may, therefore, have said something indiscreet. I have said nothing but what I am willing to live by, and, if it be the pleasure of Almighty God, to die by."

The party then moved to a platform erected in front of the State House, and the President-elect was invited to perform the ceremony of raising the flag. This drew forth from him another brief speech to the assembled multitude.

Mr. Benton, of the Select Council, then, in a few words, invited the President-elect to raise the flag. Mr. Lincoln responded in a brief speech, stating his cheerful compliance with the request, and alluded to the original flag of thirteen stars, saying that the number had increased as time rolled on, and we became a happy and a powerful people, each star adding to its prosperity. "The future," he added, "is in the hands of the people. It is on such an occasion as this that we can reason together, reaffirm our devotion to the country and the principles of the Declaration of Independence. Let us make up our mind, that when we do put a new star upon our banner, it shall be a fixed one, never to be dimmed by the horrors of war, but brightened by the contentment and prosperity of peace. Let us go on to extend the area of our usefulness, add star upon star, until their light shall shine upon five hundred millions of a free and happy people."

The President-elect then threw off his overcoat, a brief prayer was offered and a gun fired, when hand over hand he raised the flag of thirty-four stars to the top of the staff.

At half-past 9 o'clock the party started for Harrisburg. The Legislature of Pennsylvania was then in session in that city. Both Houses were visited by Mr. Lincoln, and to an address of welcome by the presiding-officer of each, he thus replied :

"I appear before you only for a very few brief remarks, in response to what has been said to me. I thank you most sincerely for this reception, and the generous words in which support has been promised me upon this occasion. I thank your great commonwealth for the overwhelming support it recently gave, not to me personally, but the cause, which I think a just one, in the late election. Allusion has been made to the fact—the interesting fact, perhaps we should say—that I, for the first time, appear at the Capital of the great Commonwealth of Pennsylvania upon the birthday of the Father of his Country, in connection with that beloved anniversary connected with the history of this country. I have already gone through one exceedingly interesting scene this morning in the ceremonies at Philadelphia. Under the high conduct of gentlemen there, I was, for the first time, allowed the privilege of standing in Old Independence Hall, to have a few words addressed to me there, and opening up to me an opportunity of expressing, with much regret, that I had not more time to express something of my own feelings, excited by the occasion, somewhat to harmonize and give shape to the feelings that had been really the feelings of my whole life. Besides this, our friends there had provided a magnificent flag of the country. They had arranged it so that I was given the honor of raising it to the head of its staff. And when it went up I was pleased that it went to its place by the strength of my own feeble arm; when, according to the arrangement, the cord was pulled, and it flaunted gloriously to the wind without an accident, in the bright glowing sunshine of the morning, I could not help hoping that there was in the entire success of that beautiful ceremony at least something of an omen of what is to come. Nor could I help feeling then, as I often have felt, in the whole of that proceeding, I was a very humble instrument. I had not provided the flag; I had not made the arrangements for elevating it to its place. I had applied but a very small portion of my feeble strength in raising it. In the whole transaction I was in the hands of the people who had arranged it, and if I can have the same generous coöperation of the people of the nation, I think the flag of our country may yet be kept flaunting gloriously. I recur for a moment but to repeat some words uttered at the hotel in regard to what has been said about the military support which the General Government may expect from the Commonwealth of Pennsylvania in a proper emergency. To guard against any possible mistake do I recur to this. It is not with any pleasure that I contemplate the possibility that a necessity may arise in this country for the use of the military arm. While I am exceedingly gratified to see the manifestation upon your streets of your military force here, and exceedingly gratified at your promise here to use that force upon a proper emergency—while I make these acknowledgments, I desire

to repeat, in order to preclude any possible misconstruction, that I do most sincerely hope that we shall have no use for them; that it will never become their duty to shed blood, and most especially never to shed fraternal blood. I promise that, so far as I may have wisdom to direct, if so painful a result shall in any wise be brought about, it shall be through no fault of mine. Allusion has also been made by one of your honored speakers to some remark recently made by myself at Pittsburg, in regard to what is supposed to be the especial interests of this great Commonwealth of Pennsylvania. I now wish only to say, in regard to that matter, that the few remarks which I uttered on that occasion were rather carefully worded. I took pains that they should be so. I have seen no occasion since to add to them or subtract from them. I leave them precisely as they stand, adding only now, that I am pleased to have an expression from you, gentlemen of Pennsylvania, significant that they are satisfactory to you. And now, gentlemen of the General Assembly of the Commonwealth of Pennsylvania, allow me to return you again my most sincere thanks."

The afternoon was devoted to the reception of the citizens, and at 6 o'clock Mr. Lincoln retired to his private apartments, declining to receive any more visitors. The arrangements for the next day were that he should leave Harrisburg in the morning, stop at noon in Baltimore, and arrive at Washington in the evening. To the amazement of every one, however, telegraphic despatches from Washington on the next morning reported that Mr. Lincoln was in that city. This proved to be true. Mr. Lincoln had assumed, to prevent recognition, a plaid cap and cloak, and taken a special train that night and passed through to Washington without being recognized. This sudden and unexpected arrival at an early hour in the morning caused a great surprise, and curiosity was excited to discover the motives of this secret change in the manner of Mr. Lincoln's journey. Several reports were immediately in circulation. One was that a telegraphic despatch was sent requesting him to be present at Washington for reasons of State, before the separation of the Peace Conference; a second was that a despatch from official parties in Washington requested him to come in advance of the time announced, in order to prevent possible disturbances that might grow out of conflicting purposes of political clubs in Baltimore—of the Republican clubs to honor Mr. Lincoln with a public demonstration, and of their far more numerous opponents to prevent it; another was, that under all the circumstances of the case, Mr. Lincoln deemed it would be best to avoid all chances of turmoil, and at the same time he would be relieved of all further demonstrations, of which his journey had already been amply full.

As early as the 16th of January rumors were afloat of combinations forming to interfere with the inauguration of Mr. Lincoln. In reply to a letter from the mayor of Washington, on the

subject of those rumors, the marshal of Baltimore, on the 16th, said:

SIR: In reply to your wish that I would state to you my opinion with reference to the truth of the rumors which you say prevail in Washington, and are industriously circulated there, to the effect that associations of armed men are being formed here for the purpose of making unlawful demonstrations at the seat of Government on the 4th of March, I beg to say, with all the confidence begotten by the fullest means of information, that they are wholly without foundation. No such organization now exists, none has existed, nor will the citizens of Baltimore tolerate any such.

The people of Baltimore are a conservative and law-abiding people. They hope and believe, and mean to act upon that belief, that the day for mobs and riots in their midst has passed, never to return.

That the citizens of Maryland have a strong sympathy with their Southern brethren, and that upon every lawful occasion for the expression of that sympathy it will doubtless be emphatically heard, cannot be denied; but that they will tolerate or connive at the unlawful doings of a mob, or permit violence or indignity to any public functionary passing through the State, I believe to be entirely devoid of truth. The whole thing is probably a political *canard*, receiving a slight coloring of reality from the thoughtless expressions of a class of people who, in times of excitement, are mostly to be found at street corners or in public bar-rooms.

The President-elect will need no armed escort in passing through or sojourning within the limits of this city or State, and, in my view, the provision of any such at this time would be ill-judged.

The insult offered to President Buchanan in the streets of this city on the eve of his inauguration, to which reference has been made as the ground for apprehending a similar indignity to the President-elect, it is well known, was the act of two or three members of one of the fanatical clubs of his political opponents which at that time infested our city, but which have long since been numbered among the things that were.

In expressing to you the opinion I have given, I do it with full confidence that no such organization could exist here without being speedily brought to my knowledge.

I have the honor to be, sir, your obedient servant,
GEORGE P. KANE.

On the Wednesday following the Mayor and Council of the city waited upon Mr. Lincoln and tendered to him a welcome. He replied as follows:

"Mr. Mayor: I thank you, and through you the municipal authorities of this city who accompany you, for this welcome. And as it is the first time in my life since the present phase of politics has presented itself in this country, that I have said any thing publicly within a region of country where the institution of slavery exists, I will take this occasion to say that I think very much of the ill-feeling that has existed, and still exists, between the people in the sections from whence I came and the people here, is dependent upon a misunderstanding of one another. I therefore avail myself of this opportunity to assure you, Mr. Mayor, and all the gentlemen present, that I have not now, and never have had, any other than as kindly feelings towards you as the people of my own section. I have not now, and never have had, any disposition to treat you in any respect otherwise than as my own neighbors. I have not now any purpose to withhold from you any of the benefits of the Constitution, under any

circumstances, that I would not feel myself constrained to withhold from my own neighbors; and I hope, in a word, that, when we shall become better acquainted, and I say it with great confidence, we shall like each other the more. I thank you for the kindness of this reception."

Again, on the next evening, a serenade was given to him by the members of the Republican Association, accompanied by the marine band. Upon this occasion Mr. Lincoln addressed a few words to the multitude, as follows:

"My friends: I suppose that I may take this as a compliment paid to me, and as such please accept my thanks for it. I have reached this city of Washington under circumstances considerably differing from those under which any other man has ever reached it. I am here for the purpose of taking an official position amongst the people, almost all of whom were politically opposed to me, and are yet opposed to me, as I suppose.

"I propose no lengthy address to you. I only propose to say; as I did on yesterday, when your worthy Mayor and Board of Aldermen called upon me, that I thought much of the ill-feeling that has existed between you and the people of your surroundings and that people from amongst whom I came, has depended, and now depends, upon a misunderstanding.

"I hope that, if things shall go along as prosperously as I believe we all desire they may, I may have it in my power to remove something of this misunderstanding; that I may be enabled to convince you, and the people of your section of the country, that we regard you as in all things our equals, and in all things entitled to the same respect and the same treatment that we claim for ourselves; that we are in no wise disposed, if it were in our power, to oppress you, to deprive you of any of your rights under the Constitution of the United States, or even narrowly to split hairs with you in regard to those rights, but are determined to give you, as far as lies in our hands, all your rights under the Constitution—not grudgingly, but fully and fairly. (Applause.) I hope that, by thus dealing with you, we will become better acquainted, and be better friends.

"And now, my friends, with these few remarks, and again returning my thanks for this compliment, and expressing my desire to hear a little more of your good music, I bid you good night."

The inauguration took place on the 4th of March, and Mr. Lincoln became President of the United States amid a greater display of military force than had ever before been witnessed on such an occasion. (*See WASHINGTON.*)

LITERATURE AND LITERARY PROGRESS OF 1861. I. IN THE UNITED STATES.—The public attention was so strongly attracted from almost the beginning of the year by the progress of events which speedily culminated

in secession and open war, that there was very little demand for any works except those treating upon the questions then agitating the public mind. Essays, orations, sermons, and addresses on the right, causes, and consequences of secession, and on the subject of slavery in its relation to the secession movement, were numerous, and in great demand. The daily and weekly newspapers, especially the illustrated papers, also felt the influence of the popular excitement, and their circulation greatly increased. When hostilities actually began, there was a call at once for works on military science, and immense numbers of manuals of infantry, cavalry, and artillery tactics, military dictionaries, works on ordnance, gunnery, fortification, &c., &c., were sold, and a great variety of cheap manuals for the use of soldiers prepared. The reading public not directly connected with the army, also demanded sketches of prominent persons, places, and events connected with the war, beyond the ability of the daily and weekly press, active as that press was, to supply; and this demand was satisfied by the issue of an infinitude of handbooks, charts, maps, &c. The whole number of books, pamphlets, &c., having direct reference to the war, published during the year, exceeded 450; of these about 250 were sermons, addresses, and orations; about 60 were works on military science and art; eight were serials, chronicling the events, history, or biography of the war; and the remainder, essays, descriptions, charts, biographies, &c. Among the most noticeable of the serials were "The Rebellion Record," edited by Mr. Frank Moore; "The Southern Rebellion and the War for the Union," by Mr. Orville J. Victor; "Pictorial History of the War of 1861," edited by Hon. E. G. Squier; "The Fallen Brave," edited by Mr. J. Gilmory Shea; and "Heroes and Martyrs, Notable Men of the Time, &c.," edited by Mr. Frank Moore. "The Illustrated News," "Frank Leslie's Illustrated Newspaper," and "Harper's Weekly," among the illustrated weekly papers, devoted the greater part of their space to pictorial and descriptive representations of the battles and other incidents of the war. The scientific works called out by the war were, many of them, of high merit. Among them were a "Military Dictionary," by Col. H. L. Scott, Inspector-General of the United States army; "A new Manual of the Bayonet," and one of "Sword and Sabre Exercise," by Capt. J. C. Kelton, U. S. A.; "Notes on Sea Coast Defence," by Major (now General) J. G. Barnard, United States Engineers; "Evolution of Field Batteries of Artillery," by Major (now General) Robert Anderson; "A Treatise on the Camp and March," by Capt. Henry D. Grafton, U. S. A.; "Rifles and Rifle Practice," by Major (now General) C. M. Wilcox; "Manual of Bayonet Exercises," by Major-General George B. McClellan; "The Ordnance Manual," prepared under direction of the War Department; "Instruction in Field Artillery," prepared by a board of ar-

tillery officers; "The Field Manual of Evolutions of the Line," "A Manual of Military Surgery," by S. D. Gross, M. D.; "A Practical Treatise on Military Surgery," by Frank H. Hamilton, M. D.; "Naval Ordnance and Gunnery," by Commander J. H. Ward, &c., &c.

But though the principal demand of the public during the year was for literature connected directly or indirectly with the war, there were a few books published on other topics, worthy of note. In the department of theological and religious literature, Muller's "Life of Trust," a compilation and abridgment from the reports and narratives of that remarkable man, prepared by Rev. H. L. Wayland, was remarkably popular; "Thoughts on Preaching," by Rev. James W. Alexander, D. D., and "Notes on New Testament Literature and Ecclesiastical History," by his brother, Rev. J. Addison Alexander, D. D., were very favorably received, as were also "Twelve Sermons," by Horace Mann; "Discourses on Sacramental Occasions," by Rev. Ichabod S. Spencer, D. D.; Sermons by Rev. Cortland Van Rensselaer, D. D.; "Evenings with the Doctrines," by Rev. Nehemiah Adams, D. D.; "Morning Hours in Patmos," by Rev. A. C. Thompson, D. D.; and "Sermons preached at Harvard College," by Rev. James Walker, D. D. Among other discussions of theological and religious questions of the year were "Human Destiny," and "Debt and Grace," by Rev. C. F. Hudson; "Thoughts on the Administration of God's Moral Government," by a plain man; "Christ in the Will, the Heart, and the Life," by Rev. A. B. Muzzey; "New Testament Standard of Piety," by W. Macdonald; and "Religio-political Physics," by Calvin Blanchard.

In sociology and political science, a book entitled "Negroes and Negro Slavery; the first an Inferior Race, the latter its Normal Condition," by J. H. Van Evrie, M. D., excited some attention from its absurdity and gross perversion of all the facts of science, in the attempt to demonstrate that the negro belonged to a different and lower species of beings than the white, and was therefore intended for menial service; an elaborate defence of "American Slavery, distinguished from the slavery of English theorists, and justified by the Law of Nature," by Rev. Samuel Seabury, D. D., also attracted notice, from the calmness of its tone, and the conspicuous position of the author; "The Doctrine and Policy of Protection," by William Elder, M. D., an attack on the system of protective tariffs, by a distinguished advocate of free trade; "Woman's Rights under the Law," by Mrs. Caroline H. Dall, a candid exposition of the legal disabilities and privileges of the female sex, under ancient and modern legislation; and "The Cotton Kingdom," by Fred. Law Olmsted, an abridgment and re-arrangement of the author's previous observations in the slave States, were the only other noticeable books in this department.

In history and biography, the principal works were the 15th and 16th volumes of Benton's Abridgment of the Debates of Congress, completing the work; vol. III. of Hopkins' "History of the Puritans," completing that work; "The Destruction of H. M. war sloop Gaspee," from official documents, compiled by John Russell Bartlett; "Rehoboth in the Past," a historical oration by S. C. Newman; "Contributions to the Ecclesiastical History of Connecticut, prepared for the 150th anniversary of the (Congregational) General Association of the State;" "Life, Times, and Services of Gen. Anthony Wayne," by Orville J. Victor; "Life and Times of André;" "Memoirs of Nathaniel Emmons, with Sketches of his Friends and Pupils," by Prof. Edwards A. Park; "Mémorial and Writings of Gen. Nathaniel Lyon;" "Lives of Eminent Physicians of the 19th Century," by S. D. Gross, M. D.; "Memoirs of Bishop Bruté," by Bishop Bayley; "Life of Bishop Berkeley," by J. N. Norton; "Autobiography of William Neil, D. D.;" "Memoirs of Daniel Safford," and "The Wetmore Family in America."

In the department of travels, usually so prolific in American literature, there were very few books published, but one of these produced a decided sensation on both sides of the Atlantic; it was the "Explorations and Adventures in Equatorial Africa," of Mr. Paul B. Du Chaillu. The new animals and the hitherto unknown African races described by the traveller, and his details of their strange and extraordinary cannibalism, excited much interest, and produced protracted controversy; but, in the end, his statements were mostly corroborated by missionaries and others, familiar with some of the countries he had traversed. The only other volumes of travels at all noteworthy, were "Life and Adventures in the Southern Pacific," by a roving printer; "After Icebergs with a Painter," by Rev. L. L. Noble; "Pictures of Southern Life," being W. H. Russell's Letters to the London "Times" from the Southern States; and "European Recollections," by Peter C. Baker.

In the department of science and art, the contributions were considerably numerous. Two volumes of the "New American Cyclopædia," the 12th and 13th, were published during the year. In mechanical science, Mr. A. L. Holley issued a valuable work on "American and European Railway Practice;" Commander Walker, of the United States Navy, "Notes on Screw Propulsion;" and the late W. H. King, United States Navy, "Lessons and Practical Notes on Steam, the Steam Engine, Propellers, &c." In numismatics appeared: "Coins, Medals, Seals, &c.," by William C. Prime; "A Description of the Medals of Washington, of National and Miscellaneous Medals, illustrated by seventy-nine fac-simile engravings," &c., by James Ross Snowden, Director of U. S. Mint; and "A Description of Ancient and Modern Coins in the Cabinet Collection at the Mint of

the United States," by the same author. In medical science, the principal works were: "Theory and Practice of the Movement Cure," by Chas. F. Taylor, M. D.; "Phthisis Pulmonalis, a Practical Treatise," by L. M. Lawson, M. D.; "Diphtheria, its Nature and Treatment," being the essay which received the Fiske Fund prize in 1860, by Daniel D. Slade, M. D.; "A Warning to Fathers, Teachers, and Young Men, in relation to a Frightful Cause of Insanity," by W. S. Chipley, M. D.; "Diseases of the Throat and Lungs," by R. T. Trall, M. D.; "The Breath of Life," by George Catlin, an admirable essay on the advantages of keeping the mouth closed; "Currents and Counter-Currents in Medical Science," by Oliver Wendell Holmes, M. D.; Guilmette's "Vocal Physiology"; "Principles and Practice of Obstetrics," by Gunning S. Bedford, M. D.; and "Tobacco, What It Is and What It Does," by Dan King, M. D.

In agricultural and geological science, the elaborate work of J. H. Klippart, the Secretary of the Ohio Board of Agriculture, on "The Principles and Practice of Land Drainage;" "Manual of Agriculture for the School, Home, and Farm," by Geo. B. Emerson and Charles L. Flint; and "The First Principles of Geology," by David A. Wells, are worthy of notice. The inventor is informed "How to get a patent," by Mr. T. P. How; and in educational science we have Calkins' "Primary Object Lessons," and Warren's "Manual of Elementary Geometrical Drawings."

In the department of belles-lettres, we find not more than half-a-dozen novels, properly so called, and some of these belong to the class of religious fiction: Meta Lander (Mrs. Prof. Lawrence) published "Marion Graham; or Higher than Happiness;" Alexander Clark, "The Old Log School House," an educational story; C. E. K., "Daisy Deane;" and "Mrs. Madeline Leslie;" "Tim, the Scissors-Grinder;" the sequel to "Tim;" and "The Dermott Family," in 5 vols., all S. S. Stories; Geo. W. Curtis, "Trumps, a Novel;" Mrs. Emma D. E. N. Southworth, "The Gipsy's Prophecy;" Miss Virginia F. Townsend, "Amy Deane, and other Tales;" "Grace Greenwood," "Old Wonder Eyes;" the lamented Theodore Winthrop left a posthumous novel, "Cecil Dreem." Poetry and the drama were still less liberally represented; a new and enlarged edition of the "Poems" of John G. Saxe; a collection, now made for the first time, of the "Poems" of Samuel Woodworth, the author of the "The Old Oaken Bucket;" "Elijah, a Sacred Drama, and other Poems," by Rev. Dr. Davidson; "The Shadowy Land, and other Poems," by Rev. Gurdon Huntington; and "Flirtation, and what comes of it," a comedy by Frank B. Goodrich; were all the new published poems, indigenous to American soil, of the year, unless we add Mr. Richard Grant White's "National Hymns, how they are written, and how they are not written," which gives numerous examples of the good and bad among the hymns sent in for the \$500

prize. "The Dutch Dominie of the Catskills" was a piece of descriptive and semi-biographical writing, by Rev. David Murdoch, D. D.; the Springfield philosopher "Timothy Titcomb" (Dr. J. G. Holland) made a successful venture with another of his volumes of unique but readable essays, entitled "Lessons in Life." Prof. Chas. D. Cleveland, of Philadelphia, added to his list of popular compendiums of literature, an admirable "Compendium of Classical Literature," and Rev. R. S. Maclay, a missionary for many years in China, described in a graceful little volume some features of "Life among the Chinese."

The magazine literature of the year was of a high character. In original articles of great literary excellence, the "Atlantic Monthly" took the lead, its contributions being equal to those of any magazine in the language; while "Harper's Monthly" added to a large number of articles of great merit, the attractions of abundant illustration; the Knickerbocker Magazine, Godey's, and Peterson's, all maintained a high rank, and most of them obtained an increased circulation. At the close of the year, a new candidate for public favor made its appearance, — the "Continental Monthly," under the editorship of Mr. C. G. Leland, and devoting more space than the others to the discussion of political questions. Besides those named, there were a considerable number of monthly periodicals of religious character, but occasionally discussing national or other popular questions, all of them conducted with ability.

Among the bi-monthly and quarterly periodicals, which mostly belong to the class of reviews, there were quite a number of marked excellence, and which, during the past year, gave proofs of extraordinary vigor and ability. We may specify among these "The North American Review," the oldest of our quarterly periodicals, and always ably conducted; the "Christian Examiner," a bi-monthly review of very high order; Barnard's "American Journal of Education," unsurpassed in the ability and range of its educational articles; "The National Review," a young but promising quarterly; "The Bibliotheca Sacra," a valuable repository of biblical and classic science and literature; the "American Theological Review," a periodical which at once took the front rank in theological science; the "Biblical Repository," the organ of the Princeton theologians, and inferior to none of the others in ability; the "New Englander," the representative of the New Haven theology, but handling also, with much freedom and spirit, the popular questions of the day; and "Brownson's Review," a quarterly which, while professedly Roman Catholic, discussed with an earnestness and liberality unusual in the periodicals of that Church, subjects of national or political interest. Besides these, which, though some of them under the influence of particular classes and sects of religionists, may in some sense be considered national, each denomination has its

quarterly review, some of them, indeed, more than one; most of them ably edited, and some of them having an extensive circulation; "The Methodist Quarterly," the "Boston Review," the "Christian Review," the "Presbyterian Quarterly," the "Mercersburg Review," and the "Free Will Baptist Quarterly," are the most widely known of these.

The interests of science were promoted by the "American Journal of Science," a bi-monthly now approaching its fiftieth year, and which, by the aid of its numerous collaborators, fully represented every department of general science. The medical profession possessed an able quarterly, "The American Journal of the Medical Sciences," devoted to their interest, besides numerous monthly journals, and one semi-monthly; the mechanical, engineering, railway, banking, insurance, and mercantile interests had each their periodical or periodicals, all conducted by men of high reputation in their several professions. The number of strictly literary magazines, monthly or weekly, was not so great in the United States as in England, but the number of newspapers and their circulation was far greater, and their influence over the people fully equal. In the case of the religious press, the contrast between the two countries is very strongly marked. The number of religious newspapers in England, aside from those which are the organs of some of the great religious benevolent societies, is small; they are all, or nearly all, in part political, and their circulation is of very moderate extent. The leading religious papers here have a very large circulation, and, except in the case of the present war, when they have mostly entered with zeal into the discussion of the causes and consequences of the war, they have usually abjured questions of party politics. The "Independent," the family of "Christian Advocates," the "New York Observer," and, we believe, also several others of the religious papers, each have a circulation nearly or quite equal to the aggregate of any two or three of the English religious newspapers.

The so-called literary papers of New York, Boston, and Philadelphia, have also a greatly larger weekly sale than that of papers of a corresponding class in Great Britain, and though some of them have fallen off during the past year, the pictorial war newspapers having taken a considerable share of their circulation, the aggregate is still counted by millions.

II. IN GREAT BRITAIN.—The year was one of extraordinary activity in every department of literature. In the department of religious and theological works, the publication of the "Essays and Reviews," in the autumn of the preceding year, and the circumstances which gave notoriety to that work, led to the publication, throughout the year, of numerous works bearing directly or indirectly on the topics treated in the "Essays." The range of these topics was extended so far, that it admitted very considerable diversity in the subjects of

the replies, and while one class occupied themselves with the defence of the chronology and authenticity of the historical books of the Old Testament, or with those of the Pentateuch, or the Kings or Chronicles, in particular, another class discussed the inspiration of the Scriptures, another the chronology, another the character and fulfilment of the prophecies; while others still gave their attention to the events of the New Testament history, to the alleged mythical or allegorical character of Christ, to his divinity, and to the various theological questions connected with these. A collection, said not to be complete, of the various works called out by this book, had over sixty titles. The millenarian views urged so persistently by Rev. Dr. Cumming, and reiterated with more than his previous eloquence early in the year in his "Great Tribulation," and "Great Preparation," also elicited several replies, either in the form of commentaries on Daniel and the Apocalypse, or in direct controversy with the views he had maintained. The two controversies to which we have referred, enlisted many of the ablest theological writers of Great Britain; among them were the Archbishops of Canterbury and Dublin, several bishops, especially those of London, Ripon, Chester, Killaloe, &c. Profs. Rawlinson, Ellicott, &c., and numerous clergymen of the Established Church; among the members of the Scottish and dissenting Churches, Rev. Donald McDonald, and such laymen as Edward Miall and the venerable Isaac Taylor. The essayists and reviewers and their friends were also active in defending the views they had put forth, and numerous sermons, essays, and dissertations maintaining one or other of their positions appeared. Aside from these discussions, the number of works in this department was not very great. The most important were "The Lost Tribes and the Saxons of the West, with new views of Buddhism, and readings of the Rock-records," by George Moore, M. D., well known as a psychological writer; "English Puritanism and its Leaders, Cromwell, Milton, Baxter, Bunyan," by Principal Tulloch; "Lectures on the History of the Eastern Church," by Arthur Penrhyn Stanley; "The Providence of God Manifested in Natural Law," by John Duncanson, M. D.; "Creation in Plan and Progress," by Prof. Challis, of Cambridge; "The Sanskrit Text, part III., The Vedas," by J. Muir; "Life of Rev. Dr. Doyle, Roman Catholic Bishop of Kildare," by W. J. Fitzpatrick; "Notes on Hebrews," by Rev. E. H. Knowles; "Life and Letters of Rev. John Angell James," by Rev. R. W. Dale; "The Epistles to the Seven Churches in Asia," by R. C. Trench, D.D.; "The Acts and Writings of the Apostles," by C. P. Clarke; "The Missionary in Many Lands," by Erwin House; "The Platonic Dialogues for English Readers," by W. Whewell, LL. D.

In the department of politics, sociology, &c., the American war called out a very considerable number of pamphlets and some works of

greater pretension. Mr. Herbert Spencer published a series of brilliant essays on "Education;" Mr. Edward Arnold published a treatise on the subject of education in India and its necessity; and Mr. E. T. Rogers, an Oxford examiner, a work on "Education at Oxford; its Methods, its Aims, and its Results;" Mr. J. Austin a treatise on "The Province of Law Determined;" J. Francillon, "Lectures, Elementary and Familiar, on English Law;" A. H. Louis a learned and able essay entitled "England and Europe, a Discussion of National Policy;" Miss Martineau one of her politico-economic tales on Health, Husbandry, and Handicraft; Mr. Montague Bernard discussed "The Principle of Non-Intervention;" and two anonymous writers, of decided ability, "The Progress of Nations," and "Admiralty Administration, its Faults and Defaults." The trouble between the indigo planters in India and the ryots also gave rise to a considerable number of pamphlets.

In the way of travel and exploration, the list is somewhat larger: Mr. A. H. Tilley published a gossipy book on "Japan, the Amoor, and the Pacific;" Mr. T. Forrester described his "Rambles in Corsica and Sardinia;" Mr. J. L. Farley, "The Massacres in Syria;" and Mrs. Harvey, "Our Cruise in the Claymore," one of the war vessels sent to the Syrian coast. "Social Life and Manners in Australia" were portrayed by "a Resident." Capt. C. S. Forbes narrated his experiences in the "Campaigns of Garibaldi," as well as his observations of "Iceland; its Volcanoes, &c.;" Mr. H. B. Tristram penetrated into "The Great Sahara," and gave a somewhat dry account of his journeyings; Dr. N. Davis informed the public of the results of his explorations in "Ancient Carthage;" Mrs. Bromley, in a series of letters to her father, gave the detail of 20,000 miles of journeyings in the New World in ten months, under the title of "A Woman's Wanderings in the Western World;" Rev. J. C. Browne described what he himself observed and learned of "The Punjab and Delhi in 1857;" and Mr. E. Lecky confuted some of the "Fictions Connected with the Indian Outbreak in 1857;" J. Hollingshead, as a result of travels nearer home, gives a touching picture of "Ragged London in 1861;" Rev. W. M. Mitchell, of Toronto, O. W., gave an account of "The Underground Railroad;" Capt. Sherrard Osborne described some incidents of Japanese life, under the title of "Japanese Fragments," which he illustrated by fac-similes of Japanese drawings. The often trodden route to Sinai was once more traversed by Mr. Beaumont in his "Cairo to Sinai, and Sinai to Cairo." The late Chinese war was described by Mr. Robert Swinhoe, in a volume with the title of "The North China Campaign of 1860." Lady Charlotte Pepys gave some glimpses of "Domestic Life in Russia," and an anonymous writer treated of "The Spanish Peninsula; its past History, present Condition, and future Prospects."

Large contributions were made to the catalogue of scientific books. In natural history, the most remarkable books were "John Hunter's Essays and Observations on Natural History," edited and enriched by Richard Owen; Darwin's "Origin of Species;" Hartwig's "The Sea and its Living Wonders;" Dr. Hicks' "The Honey Bee; its Natural History, &c.;" Sir John Herschel's treatises on "Physical Geography and Meteorology;" Thos. Moore's "British Ferns and their Allies;" Bentley's "Botany;" Von Kittlitz' "Vegetation of Coasts and Islands of the Pacific;" E. Maling's "Indian Plants;" Lovell Reeve's "Elements of Conchology;" Dr. John Blackwall's "History of Spiders of Great Britain and Ireland;" David Page's "Past and Present Life of the Globe;" Dr. Geo. Ogilvie's "The Genetic Cycle in Organic Nature;" Sir R. Murchison and Mr. A. Geikie's "Geologic Map of Scotland;" Chas. Boner's "Forest Creatures;" and Robt. McWilliam's Foot Notes from the Page of Nature, or First Forms of Vegetation." In mechanics, engineering, architecture, &c.: William Fairbairn's "Iron; its History, &c.;" E. Hull's "Coal Fields of Great Britain;" Dollman and Jobbin's "Analysis of Ancient Domestic Architecture;" Humber's "Cast and Wrought Iron Bridge Construction;" R. Scott Burns' "Illustrations of Mechanical Movements and Machines;" and Sir John Herschel's "Essay on the Telescope." In archaeology and philology, Mr. S. Sharpe on "Egyptian Hieroglyphics," and Mr. Craik's "History of the English Language from the Norman Conquest." The principal contributions to medical science were: Dr. R. B. Todd's "Clinical Lectures;" Dr. Greenhow on "Diphtheria;" Dr. Parke's "On the Urine in Health and Disease;" Dr. Holmes' "System of Surgery;" Dr. Mayne's "Expository Lexicon of Medicine;" Dr. Edwin Smith's "Health and Disease, as influenced by Changes in the Human System;" Dr. Brinton's "Food and its Digestion;" Dr. G. M. Humphrey's "Human Foot and Human Hand;" Dr. Walton's and Dr. Holmes' treatises on "Diseases of the Eye;" Dr. John Gardner's "Household Medicine;" Dr. E. Meryon's "History of Medicine;" and Dr. J. Rutherford Russell's "History and Heroes of the Art of Medicine;" Dr. C. B. Radcliffe's "Epileptic and other Convulsive Affections;" and Messrs. Walsh and Lupton's "The Horse, in the Stable and the Field; his Diseases, &c." Knight's "Cyclopedia of Arts and Sciences," vols. 7 and 8, completing that section; and the whole work, which extended to 22 volumes, were published in the course of the year, as was also a 22d volume of the "Encyclopedia Britannica," containing an analytical index, and completing that work.

The contributions to history and biography were also extensive, and some of them of great value; the fifth volume of Baron Macaulay's "History of England," edited by his sister, Lady Trevelyan, was perhaps the most valu-

able, but among the other important historical works were: Mr. Froude's "History of the Tudors;" Vaughan's "Revolutions in English History;" the Calendars of State Papers collected and arranged by Mrs. Everett Greene, Mr. W. N. Sainsbury, and others, the former referring to the time of Charles II.; "Annals of the Wars of the Eighteenth Century," by Hon. Sir Edward Cust; "Domestic Annals of Scotland, 1688-1745," by Robert Chambers; a large class of historic biographies and correspondence of persons either themselves eminent, or associating with persons of distinction; among these were Lord Colchester's "Diaries and Correspondence;" Mrs. Delany's (Mary Granville) "Autobiography and Correspondence," containing reminiscences of George III. and Queen Charlotte; Lord Stanhope's "Life of William Pitt;" Dr. Doran's "Memoir of Queen Adelaide;" J. S. Watson's "Life of Porson;" "Autobiography of Miss Cornelia Knight, Lady Companion to the Princess Charlotte;" "Life of Mrs. Cameron;" "Life and Letters of Lady Mary Wortley Montagu," by W. M. Thomas (vol. II.); Miss Strickland's "Bachelor Kings of England;" Napier's "Life of Sir Charles Napier;" "Memoir of the Life and Times of A. De Tocqueville;" Dr. Thomas Somerville's "My own Life and Times, 1741-1814;" T. Macknight's "Life and Times of Edmund Burke;" Burton's "Lectures on Archbishop Cranmer;" Martha W. Freer's "Henry IV. and Marie di Medici;" Froude's republication of "The Pilgrim; a Dialogue relative to the conduct of Henry VIII.," by a Welshman, named Thomas, contemporary of that king; Dean Ramsay's second series of "Reminiscences of Scottish Life and Character;" Lord Brougham's "History of England under the House of Lancaster;" Rev. B. W. Savile's "Introduction of Christianity into Britain." Besides these there were monographs, such as "Arminius; a History of the German People," by the late Thomas Smith; "Malta under the Phœnicians, Knights, and English," by W. Tullock; "Private Diary of General Sir Robert Wilson, 1812-1814;" "History of Manchester;" "Secret History of France under Louis XV.;" Muir's "Life of Mahomet;" Dicey's "Memoir of Count Cavour;" J. Hepworth Dixon's "Life of Francis Bacon;" Ellis' "Armenian Origin of the Etruscans;" Black's "Guide to Surrey;" MacFarlan and Thompson's "Comprehensive History of England;" Rev. P. Jones' "History of the Ojibway Indians;" "The Twelve Great Battles of England, from Hastings to Waterloo;" Pearson's "Early and Middle Ages of England;" J. Goldwin Smith's "Irish History and Irish Character;" G. Smith's "History of Wesleyan Methodism;" the "Memoirs of Joseph Alleine, Samuel Drew, &c.;" Mrs. Jane Williams' "Literary Women of England;" an anonymous but wretchedly compiled volume of "Contemporary Biography;" and George Coultie's "Annals of Eminent Living Men," also belong to this department.

In the department of belles-lettres the year was remarkably prolific; all the English novelists of high reputation have furnished their quota of fiction. Mr. Dickens' "Great Expectations" was received with much favor; Mr. Thackeray's "Lovell, the Widower," first published in the "Cornhill Magazine," enhanced his popularity; "George Eliot" (Miss Evans) followed her "Mill on the Floss" by "Silas Marner, the Weaver of Raveloe," a tale of great power; Shirley Brooks published "The Silver Cord;" the Trollope brothers, "Framley Parsonage," and "La Beata;" Mrs. Henry Wood, "East Lynne;" Wilkie Collins, "Hide and Seek;" Walter Thornbury "Cross Country;" W. G. Wills "Notice to Quit;" J. F. Corkran, "East and West, or Once upon a Time;" Edward Copping, "The Home of Rosefield;" Garth Rivers, "Miss Gwynne of Woodford;" Mary C. Hume, "The Wedding Guests, or the Happiness of Life;" Philip Ireton, "The Broken Troth," a tale of village life in Tuscany, from the Italian; J. Blagden, "Agnes Tremorne;" John Saunders, "The Shadow in the House;" "Holme Lee," "Legends from Fairy Land;" Mr. E. Peacock, "Gryll Grange;" F. C. Armstrong, "The Frigate and the Lugger, a Nautical Romance." Several anonymous novels of merit appeared during the year; among them were "Memoirs of an Unknown Life;" "My Heart's in the Highlands;" "Tilbury Nogo, or Passages in the Life of an Unsuccessful Man;" "The Anchorite of Montserrat;" and "Wild Dayrell, a biography of a Gentleman Exile."

In the way of essays, the second series of "Recreations of a Country Parson" and "The Country Parson in Town," by Rev. A. K. H. Boyd, and "Horæ Subsecivæ, or Spare Hours," by Dr. John Brown, author of "Rab and his Friends," were received with great favor. "Three Lectures on Translating Homer," by Matthew Arnold, show very clearly how the Greek poet should not be translated. The late Mr. S. Leigh Sotheby published, just before his death, an exquisitely illustrated work entitled "Ramblings in Elucidation of the Autograph of Milton;" and Mr. J. R. Wise gratified the lovers of Shakspeare by the publication of an admirable guide-book to Stratford-on-Avon, adorned with some of Linton's best drawings, under the title of "Shakspeare; his Birthplace and Neighborhood." Two translations of Hindoo works deserve notice: Mr. Edward Arnold's "Book of Good Counsels," translated from the Hitopadesa, and Father Beschi's "Adventures of Gooroo Simple and his Five Disciples," a collection of Hindoo satires, illustrated by Alfred Crowquill. Mr. (Dr.?) J. H. Brenton, in his "Tragedy of Life; Reminiscences of some Phases of Lunacy in a Physician's Practice," worked with considerable success the vein struck many years ago by Samuel Warren in his "Diary of a Physician." Miss Strickland, leaving for awhile the stately walks of history, gave some pleasant sketches of East

Anglian manners and customs in her "Old Friends and New Acquaintances;" and Mr. Alex. Leighton furnished a second instalment of his "Traditions of Scottish Life."

In the way of poetry, the events of the year were the publication of Alexander Smith's "Edwin of Deira," and, near its close, Tennyson's "Idylls of the King." Among other poems of some merit published during the year were: "Tannhäuser, or the Battle of the Bards," by Neville Temple and Edward Trevor; "Shakspeare's Curse, and other poems;" and "Poems, by the author of the Patience of Hope." Mr. Theodore Martin translated with extraordinary skill and elegance the "Poems of Catullus;" Mr. Francis T. Palgrave made an admirable collection of our best lyrics, under the title of "The Golden Treasury of the Best Songs and Lyrical Poems in the English Language;" and Mr. David Irving published an elaborate and valuable "History of Scottish Poetry, from the Middle Ages to the Close of the Seventeenth Century."

The magazine literature of Great Britain had received a new and extraordinary impulse from the success of the "Cornhill Magazine;" and prompted by its extraordinary success "Temple Bar," edited by Mr. G. Augustus Sala, and the "St. James Magazine," edited by Mrs. S. C. Hall, were commenced with the year, and both attained an extensive circulation. The "Once a Week," and "All Round the Year," as well as "Good Words," and several other magazines of the previous year, were issued in monthly parts, and all attained to a high reputation, while MacMillan, Frazer's, "Chambers' Journal," and "Blackwood" abated nothing of their popularity. The leading publishing houses find a magazine necessary to the successful prosecution of their business, and, under the rivalry of competition, pay almost incredible prices to secure contributions from distinguished writers. "Framley Parsonage," certainly not a novel of extraordinary merit, was first published in the "Cornhill Magazine," and Mr. Trollope, without relinquishing his right to the profits of its publication in book-form, received a check of £1,000 for its appearance there. Tennyson's poetry is undoubtedly valuable, but a hundred guineas for a hundred lines, when the author still retains his property in them, is certainly a liberal compensation. The tendency of the time is towards magazine writing, and very few successful novels appear for the first time in bound volumes. The temptation to the serial form of publication is strong, but there is a probability that it will in the end impair the quality of the novels themselves. Interest in a serial novel can hardly be kept up except by the introduction, in each monthly part, of some startling or exciting incident; but this, which adds to its vivacity, as a serial, almost inevitably ruins the effect of the work as a whole. It requires talent as well as tact of the highest order to avoid this danger, and the writers even

of the highest rank who have been successful in the attempt have been very few.

We must content ourselves with a mere glance at the literature of France and Germany, which have been as prolific, in this respect, as England. The political, religious, and financial questions which agitated France during the year led to the publication of numberless pamphlets, some in the interests of the Pope, and some opposing him; some blaming, and others defending the Italian king; some advocating war, and others seeking for peace; some discussing with favor, and others with disfavor, the budget, the taxes, the Mires defalcation, and the deficiency of cotton. Numerous too, have been the *brochures* relative to the war in America. Each side had its advocate, and the battles of the war have been discussed with great fulness and freedom, though not always with accurate geographical knowledge.

France has a corps of young philosophical writers, whose works give evidence of profound thought and research, and of vigorous intellect. Among them may be named Ernest Renan, H. Taine, Saint René Taillandier, Edmond Scherer, Jules Simón, Foucher de Careil, Saisset, La Boulaye, Caro, Rondelet, Nourisson, and Jourdain. They are contributors to the leading reviews, the *Revue de Deux Mondes*, *Revue Contemporaine*, *Revue Germanique*, and *Revue Européenne*, all of which are issued semi-monthly and have a large circulation. Many of them have also published several volumes on theological, political, or social topics, criticism, or art-subjects, and their books, as well as their contributions to the reviews, are exciting a powerful influence upon the reading classes in France.

In science, the French maintained in 1861 their deservedly high reputation. Their geographical and historical works, and their books of travel, are models for the accuracy and extent of the scientific knowledge they exhibit, and are valuable additions to the archives of science.

In fiction and poetry, their record is meagre of works destined to have a permanent reputation. In the department of philosophical romance, MM. Alfred Assolant, Henri Rivière, Erckmann Chatrian, and Jules Noriac enhanced their previously high reputation by their works of the year. Of writers of novels describing social life, MM. Feydeau, Champfleury, and Duranty, Mesdames Louis Figner and Charles Reybaud, and Mlle du Plessé, are the most prominent. The vile and pernicious fictions which some years since degraded the literature of France, are far less popular now than then, and the taste of the reading public is becoming elevated and purified. The review in France, like the magazine in England, is absorbing the time and labors of the literary class, and there are very few works of the lighter class which do not appear at first as *feuilletons* of one or other of the reviews.

To enumerate even the principal writers of

Germany would be a task far beyond our time or limits; we can merely indicate a few of those who, in the last year, sought to instruct or amuse the public. Of all known countries the literature of Germany is the most extensive and the most varied; and in all the departments of science, art, or belles-lettres, history, biography, or politics, their treatises are more nearly exhaustive than those of any other people. Biography has occupied a considerable share of attention in Germany the past year. Numerous memoirs of Alexander von Humboldt, Karl Ritter, Baron von Stein, Dr. Vogel, and other eminent German scholars have appeared, from the pens of Hauff, Klencke, Wilhelm Baur, &c. Herr Brockhaus, the eminent Leipsic publisher, is issuing in monthly parts an *Unsere Zeit*, or contemporary biographical lexicon, and extends his researches to eminent men of all nations. In geographical, ethnological, and archæological science, the Germans have no superiors, and the great work, now in progress, of the brothers Schlagentweit, descriptive of their scientific exploration of the region of the Himalaya; the *Mittheilungen* of A. Petermann, published monthly at Gotha; and the *Erdkunde* of Berlin, geographical periodicals of the highest value, not less than the works of Sprüner, Sprenger, Ch. Vogel, Barth, Ritter, and Kiepert, are authorities everywhere on questions pertaining to these sciences.

German poetry inclines oftenest to mysticism, and German romance to diffuseness. Schiller is, *par excellence*, the German poet, and the occurrence of the centenary of his birthday in Nov. 1859, created a poetic furor which increased in volume throughout the year 1861, and the poems of the year were inspired by the recollection of the honors and immortality in store for him who should prove himself the poet of the people. The novelists of Germany now possessing the highest reputation are Gustav Freytag, Otfried Mylius, Paul Heyse, M. Gutzkow, one of whose novels extends to eight volumes, Baron Hackländer, the author of *Tannhäuser*, Fanny Lewald, Louise Ernesti, Marie Nathusius, Eliza von Moscherosch, Auerbach, and Kompert. In dramatic literature the great names of the year are: Labe, Mosenthal, Melchior Meyer, Max Ring, Hersch, Freytag, Oscar de Redwitz, and Brachvogel.

The death of Heinrich Heine and Justinus Kerner, among the German poets, Baur among the theologians, and of others of equal celebrity in other departments of literature, has left a void in the literary circles of Germany not easily to be filled.

LOUISIANA is one of the Southern States of the United States, and is bounded on the west by Texas, on the south by the Gulf of Mexico, on the east by the State of Mississippi and the Gulf of Mexico, and on the north by Mississippi and Arkansas. This State has no parallel on the face of the globe in the natural advantages which she enjoys for river trade with an interior, extending back directly north 2,000

miles to St. Anthony's Falls; northwestward, 3,000 miles to the very base of the Rocky Mountains; northeastward, through the entire extent of the Ohio valley, 2,500 miles, even into the State of New York; besides innumerable intermediate points in the great valleys of the Mississippi, Missouri, Ohio, Arkansas, Tennessee, Cumberland, Red River, and a multitude of tributary streams, which pour the products of fourteen States into her lap; while many more await only the advance of population to add new treasures from tracts roamed by the savage and the buffalo.

The Governor is elected for four years. The Senate consists of 32 members, and the House of Representatives of 97 members, both elected by the people, the former for 4 years, and the latter for 2. The Legislature assembles on the 3d Monday in January. The Governor of the State is Thomas O. Moore, whose term of office expires in January, 1864. Louisiana, including all the territory west of the Mississippi, excepting Texas and New Mexico, and the territory west of the Rocky Mountains, was purchased by President Jefferson in 1803, for the sum of \$11,250,000, besides the assumption on the part of the United States of some claims of her citizens against the Government of France.

The authorities of Louisiana were undoubtedly early enlisted in the plans for the secession of the Southern States from the Union, and ready to use all their efforts to secure success. In November, 1860, Governor Moore issued a proclamation for an extra session of the Legislature on the 10th of December. The reason requiring this session was thus stated:

Whereas the election of Abraham Lincoln to the office of President of the United States by a sectional and aggressive anti-slavery party, whose hostility to the people and the institutions of the South has been evinced by repeated and long-continued violations of constitutional obligations and fraternal amity, now consummated by this last insult and outrage perpetrated at and through the ballot-box, does, in my opinion, as well as that of a large number of citizens of all parties and pursuits, furnish an occasion such as is contemplated by the Constitution; and whereas some of our sister States, aggrieved like ours, are preparing measures for their future security, and for the safety of their institutions and their people, and both patriotism and the necessity of self-preservation require us to deliberate upon our own course of action; now, therefore, I, Thomas O. Moore, Governor of the State of Louisiana, do hereby convene the Legislature of this State in extra session, and do appoint Monday, the 10th day of December next.

On the day appointed this body met at Baton Rouge, and caused to be prepared an act providing for a State Convention, to be held on the 23d of January, and for the election of delegates. On the next day the act was passed by the Senate and House. In the Senate it was eloquently opposed by Randall Hunt. In the House a strong effort was made to cause the question "Convention or no Convention" to be submitted to a vote of the people. It, however, failed of success. At the same time a military act passed both Houses, which appropriated \$500,000

for such purposes, and provided for the appointment of a military commission, the organization and arming of volunteer companies, and for the establishment of military depots. When the bill was on its passage, an amendment was offered which forbade the purchase of arms in the Northern States. This was lost. A bill was also introduced which provided for the confiscation of all goods arriving from the Northern States after the 1st of January, 1861, and ordering that the proceeds of any sales under such confiscation should be appropriated to the purchase of arms. It failed to pass the Legislature. On the 12th, Wirt Adams, commissioner from Mississippi, was introduced to the Legislature in joint session, and made an address, announcing the action of Mississippi, and asking the cooperation of Louisiana. The speech was eagerly listened to by a crowded audience. On the next day the Legislature adjourned to January 21st.

Friends of secession became active in New Orleans, the great city of the State, as soon as the movement commenced in South Carolina, and the sentiment had gathered so much volume that as early as December 21st a general demonstration of joy was made over the secession of that State. One hundred guns were fired, and the Pelican flag was unfurled. Speeches in favor of secession were made by distinguished citizens, and the Marseillaise hymn and polkas were the only airs played.

The movement had now commenced in earnest. The influence and efforts of New Orleans were expected to carry the rest of the State. Only four days later a mass meeting was held to ratify the nomination of the "Southern Rights" candidates, as they were called, for the Convention. It was the largest assemblage of all parties ever held in the city. Speeches were made by prominent citizens advocating immediate secession amid unbounded enthusiasm. The Southern Marseillaise was again sung as the banner of the State was raised, with reiterated and prolonged cheers for South Carolina and Louisiana. A citizen of eminence in the southern part of the State, writing upon the condition of affairs at this time, thus says:

"In our section the excitement is confined to the politicians, the people generally being borne along with the current, and feeling the natural disposition of sustaining their section. I think that ninety-nine out of every hundred of the people sincerely hope that some plan will yet be devised to heal up the dissensions, and to settle our difficulties to the satisfaction of both the North and South; and a combined effort will be made to bring about such a result, even after the States withdraw from the Union."

A State Convention was early called, and the vote in New Orleans for members was close enough to defeat a portion of the secession candidates. The city was entitled to twenty "representative delegates" and five "senatorial delegates." The "immediate secessionists"

succeeded in electing all of the latter class and fifteen of the former, whilst the "cooperationists" obtained five of the "representative delegates." The majority of the secessionists for the senatorial delegates was about 350. The number of votes polled was little upwards of 8,000, being less than one-half the voters registered in the city.

Their success, however, was regarded as sufficient to be made the occasion of great rejoicing. This election took place on the 8th of January. On the next day three separate military organizations departed to take possession of Forts Jackson and St. Philip at the mouths of the Mississippi, and also the arsenal at Baton Rouge.

On the 18th the United States revenue cutter *Lewis Cass* was seized by a military company at Algiers, opposite New Orleans. The vessel was laid up and undergoing repairs. Her armament, consisting of one long 24-pounder and six 8-pounder carronades, with a large quantity of cannon-balls, powder, and other military stores, had been placed in the Belleville Iron Works, an extensive and unoccupied brick building.

About the same time the barracks below the city, which had been for several months occupied as a marine hospital, were taken possession of in the name of the State of Louisiana. They contained at the time 216 invalids and convalescent patients. The collector at New Orleans was required to remove the convalescents immediately, and the sick as soon as practicable. The reason assigned for this act by the State authorities was that they wanted the buildings for quarters for their own troops. (See Forts, &c.)

The Legislature of the State assembled at Baton Rouge on the 21st of January, and the Governor in his message represented the finances of the State to be in a flourishing condition, with a surplus in the Treasury.

On the 24th the State Convention met at the same place and organized. A committee of 15 was ordered to report an ordinance of secession. Over the capital waved a flag with 15 stars.

On the 26th the ordinance of secession was adopted by a vote of ayes 113, noes 17. The following is the ordinance:

An ordinance to dissolve the union between the State of Louisiana and other States united with her under the compact entitled "The Constitution of the United States of America."

We, the people of the State of Louisiana, in convention assembled, do declare and ordain, and it is hereby declared and ordained, that the ordinance passed by us in Convention on the 22d day of November, in the year 1811, whereby the Constitution of the United States of America, and the amendments of said Constitution, were adopted, and all laws and ordinances by which the State of Louisiana became a member of the Federal Union, be, and the same are hereby, repealed and abrogated; and that the union now subsisting between Louisiana and other States, under the name of the "United States of America," is hereby dissolved.

We do further declare and ordain, that the State of Louisiana hereby resumes all rights and powers heretofore delegated to the Government of the United

States of America; that her citizens are absolved from all allegiance to said Government; and that she is in full possession and exercise of all those rights of sovereignty which appertain to a free and independent State.

We do further declare and ordain, that all rights acquired and vested under the Constitution of the United States, or any act of Congress, or treaty, or under any law of this State and not incompatible with this ordinance, shall remain in force, and have the same effect as if this ordinance had not been passed.

The undersigned hereby certified that the above ordinance is a true copy of the original ordinance adopted this day by the Convention of the State of Louisiana.

Given under my hand and the great seal of Louisiana, at Baton Rouge, this 26th day of the month of January, in the year of our Lord, 1861.

[L. S.]

A. MOUTON,
President of the Convention.

J. THOMAS WHEAT, Secretary of the Convention.

The aspect of New Orleans at the time of the passage of this ordinance is thus reported:

"Every thing in this city appears to be in rapid progress towards a war establishment. Trade is at a stand still; the importation of merchandise has almost entirely ceased; the warehouses of the Federal Government are everywhere literally glutted with bonded goods; the banks are remorselessly curtailing their discounts; ordinary creditors are endeavoring by all means short of legal pressure to lessen the liabilities of their debtors; stores and manufactories, traders, and mechanics are diminishing their expenses by the discharge of hands, and, save the office-holders, an influential, wealthy, and important body, electorally considered, everybody looks dubious and bewildered, not knowing what to expect or what may happen. The proceedings at Baton Rouge will take no one by surprise. The Legislature is engaged in spending money profusely, and the Convention is engaged in laying down a broad foundation for the erection of a monstrous superstructure of debt."

In the Convention on the 31st, a resolution was offered to instruct the delegates to the Montgomery Convention, who had been previously appointed, to resist any attempt to reopen the African slave trade. This was laid on the table by a vote of 83 to 28. Mr. Walker, of New Orleans, then offered a resolution, declaring that the foregoing vote was not the sense of the Convention, but that it did not consider it to be proper to bind their delegates by instructions upon this or any other point. After an exciting debate the resolution was passed.

On the same day, the United States Mint and Custom House at New Orleans were quietly taken possession of by the State authorities, and the oath was subsequently administered to the officials under the ordinance. In the mint was \$118,311, and in the sub-Treasury \$483,984. A draft of the United States for \$300,000 was presented soon after, which the sub-Treasurer refused to pay, saying that "the money in his custody was no longer the property of the United States, but of the Republic of Louisiana."

An ordinance was soon passed, however, authorizing the payment of all drafts drawn by disbursing officers in the regular course of disbursement out of funds standing to the credit of said officers respectively, provided the same did not exceed \$306,592. Also all drafts of the United States drawn prior to the passage of the ordinance of secession, provided the same did not exceed \$146,226. The sum of \$31,164, standing to the credit of the Post-office Department, was allowed to remain subject to its draft.

About this time a special agent, appointed by the Secretary of the Treasury at Washington, to secure the revenue cutters McClelland and Lewis Cass from seizure by the authorities of Louisiana, arrived at New Orleans. He found the captain of the McClelland after a long search, and delivered to him the following order:

NEW ORLEANS, Jan. 29, 1861.

SIR: You are hereby directed to get the United States revenue cutter McClelland, now lying here, under weigh immediately, and proceed with her to New York, where you will await the further instructions of the Secretary of the Treasury. For my authority to make this order, you are referred to the letter of the Secretary, dated the 19th inst., and handed you personally by me.

Very respectfully,

WM. HEMPHILL JONES,

Special Agent.

To Capt. J. G. BRESHWOOD, commanding U. S. revenue cutter Robert McClelland.

To this letter, Captain Breshwood replied as follows:

U. S. REVENUE CUTTER ROBERT MCCLELLAND,
NEW ORLEANS, Jan. 29, 1861.

SIR: Your letter, with one of the 19th of January from the Hon. Secretary of the Treasury, I have duly received, and in reply refuse to obey the order.

I am, sir, your obedient servant,

JOHN G. BRESHWOOD, Captain.

To Wm. Hemphill Jones, Esq., Special Agent.

The special agent, W. H. Jones, then sent by telegraph a despatch to Secretary Dix, as follows:

NEW ORLEANS, Jan. 29, 1861.

Hon. J. A. Dix, Secretary of Treasury:

Captain Breshwood has refused positively in writing, to obey any instructions of the Department. In this I am sure he is sustained by the Collector, and believe acts by his advice. What must I do?

W. H. JONES, Special Agent.

To this despatch Secretary Dix immediately returned the following answer:

TREASURY DEPARTMENT, Jan. 29, 1861.

W. Hemphill Jones, New Orleans:

Tell Lieutenant Caldwell to arrest Captain Breshwood, assume command of the cutter, and obey the order through you. If Captain Breshwood, after arrest, undertakes to interfere with the command of the cutter, tell Lieutenant Caldwell to consider him as a mutineer, and treat him accordingly. If any one attempts to haul down the American flag, shoot him on the spot.

JOHN A. DIX, Secretary of the Treasury.

This despatch from Secretary Dix was not received. It probably was withheld from the agent. His further proceedings are thus stated in his report to the Secretary of the Treasury:

Believing that Captain Breshwood would not have

ventured upon this most positive act of insubordination and disobedience of his own volition, I waited upon the Collector at the Custom-House, and had with him a full and free conversation upon the whole subject. In the course of it, Mr. Hatch admitted to me that he had caused the cutter to be brought to the city of New Orleans by an order of his own, dated January 15th, so that she might be secured to the State of Louisiana, although at that time the State had not only not seceded, but the Convention had not met, and in fact did not meet until eight days afterwards. This, I must confess, seemed to me a singular confession for one who at that very time had sworn to do his duty faithfully as an officer of the United States; and on intimating as much to Mr. Hatch, he excused himself on the ground that in these revolutions all other things must give way to the force of circumstances. Mr. Hatch likewise informed me that the officers of the cutter had long since determined to abandon their allegiance to the United States, and cast their fortunes with the independent State of Louisiana. In order to test the correctness of this statement, I addressed another communication to Captain Breshwood, of the following tenor:

NEW ORLEANS, Jan. 29, 1861.

SIR: By your note of this date I am informed that you refuse to obey the orders of the honorable Secretary of the Treasury. As, on accepting your commission, you took and subscribed an oath faithfully to discharge your duties to the Government, and as you well know, the law has placed the revenue cutters and their officers under the entire control of the Secretary of the Treasury, I request you to advise me whether you consider yourself at this time an officer in the service of the United States.

Very respectfully,

WM. HEMPHILL JONES, Special Agent.

To Captain BRESHWOOD.

To this letter I never received any reply. I then repaired again on board the cutter, and asked for the order of the Collector bringing her to New Orleans. The original was placed in my possession, of which the following is a copy. And here it may be proper to observe, that the order is written and signed by the Collector himself:

CUSTOM-HOUSE, NEW ORLEANS, }
COLLECTOR'S OFFICE, Jan. 15, 1861.

SIR: You are hereby directed to proceed forthwith under sail to this city, and anchor the vessel under your command opposite the United States Marine Hospital, above Algiers.

Very respectfully, your obedient servant,

F. H. HATCH, Collector.

To Capt. J. G. BRESHWOOD.

In the latter part of January, the Collector at New Orleans, acting under instructions from the State authorities, refused to deliver foreign goods that had been imported by merchants in the cities of the Northern States or bordering on the Mississippi and Ohio rivers, unless the duties were paid at New Orleans. Applications for instructions were made by the Collectors of these cities to the Treasury Department at Washington, and the answer was returned "that duties on imports collected by the State of Louisiana, at New Orleans, will not be recognized by the General Government."

On the 7th of February, an ordinance was passed by the Convention conferring the right of citizenship on all persons residing in the State of Louisiana at the date of the adoption of the secession ordinance.

Subsequently a State flag was adopted, consisting of a red ground, upon which appears a single star of pale yellow. The ground is

crossed by bars of blue and white, making of the three colors fifteen stripes.

An ordinance was passed making it a penal offence for pilots at the Balize to bring over the bar any United States vessel of war.

Another ordinance was adopted to accept the criminal code of the United States District Court.

In the House of Representatives of the Legislature, on the 15th of February, a joint resolution was introduced and referred, inviting the southern portion of Indiana and Illinois, which gave large majorities against Mr. Lincoln, to form a pro-slavery State and join the Southern Confederacy.

The speech of Mr. Lincoln, at Indianapolis, was regarded by the Legislature in session at Baton Rouge as foreshadowing coercion, and that war was inevitable. It was then declared that, "upon the first demonstration by him, the Provisional Government would send immediately a large army North. The South would never wait to be invaded."

An appropriation bill amounting to one million and a half passed the House on the 19th, and one hundred thousand dollars were asked to put the forts on the Mississippi in a complete state for defence. A regular force of three regiments was to be raised, which, with the volunteers, were supposed to be sufficient for any emergency.

At the same time, the bishop (Polk) of the Protestant Episcopal Church for the Diocese of Louisiana, issued a pastoral letter, arguing that secession likewise embraced that portion of the Church, which thereby separated from the Church in the Northern States. He thus expressed his views:

"Our separation from our brethren of 'The Protestant Episcopal Church in the United States' has been effected, because we must follow our nationality. Not because there has been any difference of opinion as to Christian doctrine or catholic usage. Upon these points we are still one. With us it is a separation, not a division—certainly not alienation. And there is no reason why, if we should find the union of our dioceses under our National Church impracticable, we should cease to feel for each other the respect and regard with which purity of manners, high principle, and a manly devotion to truth never fail to inspire generous minds. Our relations to each other hereafter will be the relations we both now hold to the men of our mother Church of England."

On the 4th of March the State Convention re-assembled at New Orleans. On the same day a resolution was passed, that the Convention will unite in a public reception of General Twiggs, and inviting him to a seat on the floor of the Convention. A resolution was also adopted instructing the Louisiana delegates in the Southern Congress not to cede any part of the public domain to the Confederation.

On the next day General Twiggs was enthu-

siastically received. A salute was fired, and immense crowds gathered along the route of the procession. The military, the members of the State Convention, and others escorted him to his residence. In reply to an address of welcome, he said, "It was his hope that Providence would grant him sufficient strength to take part in the momentous struggle which threatened the country." While the procession was moving, a ludicrous mishap occurred. A file of the neatly-attired citizen soldiers was drawn up along the street in front of a building in course of construction, and close in their rear was a long mortar-bed, two feet deep, with that plastic composition ready for the workmen. The space between the files for the passage of the carriages being rather narrow, the officer ordered his men to take a step back. They did so, and about twenty feet of them instantaneously disappeared from sight backwards, the front file, in close order, preventing the rear rank from recovering themselves, when their heels stumbled against the mortar-bed. They were submerged, and every soldier had his uniform spoiled. They took cabs and disappeared.

By another ordinance, \$536,000 were transferred to the Government of the Confederate States as the amount of bullion found and revenue from the customs seized by the State. At a later day, an ordinance to submit the Constitution of the Confederate States to a vote of the people for their acceptance or rejection, was defeated in the Convention by a vote of ayes 26, noes 74. The popular vote of the State for delegates to the Convention was not known until some time after the passage of the ordinance of secession. The names of the delegates who were elected only were sent to the Convention, without the popular vote of the different parishes. It was finally made public, however, as follows: For secession, 20,448; against secession, 17,296. At the Presidential election in November, 1860, the vote was as follows: Lincoln, —; Douglas, 7,625; Breckinridge, 22,681; Bell, 20,204.

At the time when the vote was announced, the distinction between coöperation and secession had lost much of its force. It was, however, asserted in different parts of the State that there was a majority from two to three hundred on the popular vote for coöperation.

The right of secession was discussed at this time, and it was proposed to amend the ordinance ratifying the Constitution by adding thereto the following:

And it is hereby solemnly declared and ordained, That the true meaning and interpretation of this ordinance of ratification is, and shall be, construed as follows:

Whereas a free State cannot be too jealous in guarding its fundamental rights; and whereas many citizens of Louisiana had grave doubts whether separate secession was a peaceable, constitutional remedy for their grievances in the late Union; and whereas those doubts arose from the silence upon that subject, both of the Constitution of the United States of America and of the act by which the State of Louisiana gave in

her adhesion thereto; and whereas the Constitution of the Confederate States of America appears in this, as in most respects, to have been modelled after this Constitution of the United States; now, therefore, to prevent misunderstandings, and to secure harmony in future,

It is further ordained by the People of Louisiana, in Convention assembled, That, in adopting the Constitution of the Confederate States of America, the sovereign State of Louisiana does expressly reserve to herself the right peaceably to withdraw from the Union created by that Constitution, whenever, in the judgment of her citizens, her paramount interest may require it.

Mr. Marks, of Orleans, moved to lay the amendment on the table; and the yeas and nays having been called for, the motion was carried by yeas 92, nays 11. So the Convention refused to entertain the proposition.

The Permanent Constitution was, on the 21st of March, ratified in Convention by a vote of ayes 101, noes 71.

On the 26th, a resolution was introduced declaring in favor of entire free trade with the Western States, slave and free, by the Confederate States.

An ordinance was passed transferring the fortifications, arsenals, lighthouses, and revenue cutters of the State to the Confederate Government.

The ordinance on banking was passed, prohibiting the issue of notes of less than ten dollars, and this issue was not to exceed three-fourths of the capital paid in; the liabilities were to be represented by one-third specie and ninety days' paper. The State debt at this time was about \$11,000,000, and the apparent surplus in the Treasury was \$193,416.

The demand for troops made upon the State by the Confederate Government, was responded to with alacrity. The parishes poured into New Orleans large numbers of troops who were sent forward to Pensacola. They also made liberal appropriations for their support. Tensas parish appropriated \$16,000 for the use of the State, and paid \$20 a month to each soldier, besides supporting his family during his absence. East Feliciana subscribed \$50,000 for the same purpose, and at a large meeting passed a resolution that the Planters' parish in East Feliciana stand pledged to tender to Louisiana and the Government of the Confederate States, should it be needed, the whole of the annual proceeds of the crops, deducting only what may be necessary for current expenses during the continuance of the present hostilities.

The state of affairs at New Orleans at this time is thus reported: "The war fever here is raging intensely, as it is also in all parts of the State, and in Alabama, Mississippi, Texas, Georgia, and other cities and towns in the Confederate States. Indeed, so extensive are the preparations for the coming and inevitable conflict, that every thing in the way of business is lost sight of, and thousands are arranging their personal effects in anticipation of the worst. In this city the ardor and enthusiasm have never been exceeded, and twenty-five thousand men

could be mustered into the Confederate army. Business here is well nigh suspended. There are few ships here, and these get high figures for freights, especially British bottoms, which have the preference."

On the 24th of April, Governor Moore issued an address calling for 3,000 additional troops. It was as follows:

To the People of Louisiana:

The Government at Washington, maddened by defeat and the successful maintenance by our patriotic people of their rights and liberties against its mercenaries in the harbor of Charleston, and the determination of the Southern people forever to sever themselves from the Northern Government, has now thrown off the mask, and sustained by the people of the non-slaveholding States, is actively engaged in levying war, by land and sea, to subvert your liberties, destroy your rights, and to shed your blood on your own soil. If you have the manhood to resist, rise, then, pride of Louisiana in your might, in defence of your dearest rights, and drive back this insolent barbaric force. Like your brave ancestry, resolve to conquer, or perish in the effort; and the flag of usurpation will never, never fly over Southern soil. Rally, then, to the proclamation which I now make on the requisition of the Confederate Government.

A number of parishes in the State appropriated ten thousand dollars each for the support of the volunteers, and pledged themselves to pay fifty thousand dollars a year, each, as long as the war should last.

This quota of 3,000 men, when made up, would raise the number to 6,000, which had then been sent forward. This last call was completed within thirty days.

By the 1st of June Louisiana had not less than sixteen thousand men under arms. Of these, seven thousand were on duty, as follows: Pensacola, 2,100; in Virginia, and on the way, 2,300; in Arkansas, 1,000; sea-coast and harbor defence, 1,700; marines, 250; total, 7,350. At Tangipaha, in camp, there were, in addition to the above, 4,000, and at New Orleans 5,000. At the ship yards at Algiers several vessels were put in condition for privateers, as the *Star of the West*, captured in a port of Texas; the *McRae*, once the *Marquis de Havana*; and the *Sumter*, once the *Miramón*, all of which were strong steamers. On the 10th of July the condition of affairs is thus described by a citizen and permanent resident of the State:

"What do we see? A treasury which a few months ago was full to repletion now collapsed, a great city comparatively defenceless, a people full of chivalrous feeling discouraged, an ardent and zealous local militia disappointed and disgusted; and, while all this is notoriously so, the imbecility which has produced it is perpetually taxing its ingenuity to devise some new expedients, finding fresh pretexts for rewarding hangers-on of disgraceful antecedents or useless appendages of the old militia system."

There are four routes by which New Orleans may be approached. The first is by the Mississippi River; the second is through lakes Borgne and Pontchartrain; another is up the Atchafalaya to Berwick Bay, and thence by bayous Torrel and Plaquemine to Iberville,

one hundred miles above New Orleans; and the fourth by way of Grand Pass and Bayou Lafourche to Donaldsonville, eighty miles above the city.

The Mississippi River at the Balize divides into four branches, discharging themselves respectively through Pass a l'Ostre, Northeast Pass, South Pass, and Southwest Pass. Above, where these four outlets begin, there are two forts, almost opposite to each other, named Jackson and St. Philip, which were well manned by a Confederate force, and mounted one hundred and seventy guns.

By the route through lakes Borgne and Pontchartrain, vessels drawing eleven feet can be brought to the Lake House, which is five miles from New Orleans. Troops landed there might be taken up the canal by water, or marched at ease in any numbers up the shell road, one of the finest in the country. On each side of it, and the canal, which runs parallel, the ground falls away into a swamp covered with a dense undergrowth, affording excellent covers for skirmishers. There are no fortifications of any kind on this road, except barricades. On this route a large trade is usually carried between New Orleans and Mobile. The length of the two lakes is one hundred and ten miles. At the entrance of Borgne, the more eastern of the two, are three islands, known as Cat, Ship, and Horse Islands. Upon the mainland opposite is Mississippi City.

The Atchafalaya route affords, at the barrel stakes, only twelve feet water, but above that any depth needed, for thirty or forty miles. Through it and the Plaquemine, vessels of that draught can pass to Iberville, thence into the Mississippi, at any time from the 1st of December to the 1st of June, when the river is full.

Vessels of ten feet draught can go up the Bayou Lafourche during the same season of the year. The western extremity of Borgne extends within twelve miles of the city, and from thence troops and munitions of war could be transported, notwithstanding the swampy character of the country, for the greater part of the route.

During the summer, New Orleans became so embarrassed, as a municipal corporation, as to be regarded as bankrupt. This was ascribed to large expenditures to aid the military movements, although the real cause was undoubtedly the utter destruction of her credit and business, and the destitution to which a large portion of her citizens were exposed. All her foreign commerce was destroyed by the blockade.

In September, the banks of the city suspended specie payment, at the request of the Governor of the State, who issued a proclamation stating that the step was necessary to maintain the credit of the one hundred millions of treasury notes issued by the Confederate Government, in order to obtain the means with which to carry on the war. The banks were required to receive and pay out these notes at par.

Under the confiscation act of the Confederate Congress all branches of northern firms doing business in the city were required to present a full balance sheet to the authorities. For instance, a co-partner of a northern commercial firm was required to close at once and adjust the balances. If there was any thing due to northern co-partners it was at once sequestered. In October the Governor issued an order directing all military captains to drill their companies once during each day, and he authorized them to force the attendance of their men by placing all who refused to do duty upon the list of persons who were suspected of being unsound in their allegiance to the Confederacy.

The report of the markets for the 9th of November presented the following facts:

"The receipts of cotton since September 1 were 1,789 bales; stock on hand, 11,907 bales. Flour was selling at \$11 25 to \$12 25 per barrel; week's receipts 4,970 barrels. Corn had advanced to \$1 25 per bushel for white; and red wheat \$2 25 per bushel. Oats \$1 25 per bushel. Western hay \$50 per ton, and prairie grass \$35 per ton. Mess pork was retailing at \$45 per barrel; the stock in private hands was only 99 barrels, the rest of the stock (3,929 barrels) being held for Government stores. Hams were retailing at from 25 to 27 cents per pound, and lard 27 to 28 cents. There had been no receipts for a week of either pork, bacon, or lard. Western butter was quoted at 35 to 40 cents per pound. Kentucky bagging was selling at 24 cents per yard, and India at 24 cents. Gunny bags sold at 30 cents each. Whiskey \$1 per gallon, and the week's receipts only amounted to 31 barrels. In regard to the article of coffee there was none in first hands, and the amount held by grocers was very small, the stock being almost exhausted. Sales of Liverpool salt brought the following rates: \$10 to \$10 50 per sack for coarse, and \$11 to \$11 50 for fine; packing salt has advanced from \$5 50 to \$6 per bag of two bushels. Lard oil sold at \$2 50 to \$2 60 per gallon."

The Governor, in his Message to the Legislature in November, stated that the taxes for State purposes were payable on or before the 1st of December in each year. The amount paid in to the 15th of November was \$614,816; the amount then unpaid and due was \$1,113,948. Only about one-third of the amount assessed had then been paid in. The amount of funds in the State Treasury on the same day was \$383,622.

The appropriations for military purposes made by the last Legislature amounted to \$960,000. Of this sum there had been expended \$768,446. In addition \$670,000 had been borrowed of the banks, of which there had been expended \$646,761. The total expenditures for military purposes were \$1,415,207. There were at the same time outstanding debts for the same objects amounting to \$181,000. Total military expenses, \$1,596,807.

This sum is charged to the Confederate States, and was at that time before the authorities at Richmond to be audited and paid. The amount, when allowed, would be an offset against the Confederate tax laid upon the State, and would help the State to settle with the Confederate authorities and assume the collection of the quota of Louisiana through her new officers, and at her own convenience. In making these expenditures, the Governor had obtained a loan of \$670,000 from the Bank of New Orleans, of which his balance in hand was \$106,101.

The debts to the banks for advances to the quartermasters and for estimated military expenditures, reached \$950,000. There were the balance with the banks and the balance of unexpended appropriations, so that new appropriations were required for \$653,944, and new means to the amount of \$845,499. These are for military advances. The money in the Treasury belonging to the several branches of domestic administration was \$383,622, of which sum only a trifle of \$12,860 belonged to the general fund applicable to appropriations. Such was the aspect of the Treasury, and it was one evidently requiring the wisdom and sagacity of the Legislature to find means for sustaining the public credit. The willingness of the people to contribute unstintingly to the public wants was constrained only by the lack of ways in which to make their property and means serviceable to the cause in which they were embarked.

The measures recommended by the Governor were the following:

An extension by the Legislature of the time for the collection of taxes.

An act to make Confederate notes receivable for taxes.

Authorizing planters to issue "supply notes," or notes negotiable for the purchase of plantation supplies which should be a lien on crops.

The suspension by the Legislature of the duty imposed on the Attorney-General to institute proceedings for a forfeiture of the bank charters for suspension of specie payment, with provision to submit their action to a convention of the people, to be held after the conclusion of peace.

The issue of small notes by the banks, for the purpose of abating the nuisance of illegal private circulations.

The question of a stay law had been much discussed, and the Governor advised the Legislature to proceed with extreme caution in relation to it. He discouraged any interference with the regular course of probate and judiciary proceedings, and was disposed to approve generally of such legislation as should merely stay executions and secure the lien of creditors on the property of debtors.

At this session of the Legislature an act was passed to suspend all judicial proceedings against persons in the military and naval service. Another to suspend forced sales, known

as a stay law, was also passed. Property, however, might be sold, when nine-tenths of its appraised value, according to the standard of valuation on the first of June, 1860, were offered.

The position of Louisiana at a distance from the Federal force, enabled her to devote all her military strength to the assistance of the Confederate Government. The number of her troops in service at the close of the year was eight regiments and two battalions in Virginia, three regiments in Kentucky, one in Missouri, and five more within the State. Besides these volunteers, fourteen companies of infantry had been mustered directly into the Confederate service. There were also thirteen companies at Camp Lewis near New Orleans, and it was estimated that 3,891 men had been raised in the State and mustered into the Confederate service directly by the War Department. The aggregate of soldiers furnished by Louisiana up to November was therefore 24,093 men, which was about half of the number of voters.

According to the report of Adjutant-General Grivot, there were, on the 20th of December, 23,577 troops from Louisiana in the Confederate service. The report of the organized militia of the State was incomplete, as many parishes had made no returns. In nine parishes there was a force of 5,898. The first division under Major-General Lewis was 30,499 strong; the regiment of Confederate Guards numbered 752 men, making a total military force reported as organized in the State, of 37,149. The grand total of Louisiana troops in and out of the State was 60,726.

The only hostile movements within the limits of the State in 1861 were made at the mouths of the Mississippi. On the 12th of October, near four o'clock in the morning, as the Federal steamship Richmond, under the command of John Pope, was lying at the Southwest Pass receiving coal from the schooner J. H. Toone, a floating ram, as it was called, was discovered close upon the ship.

By the time the alarm could be given, she had struck the ship abreast of the fore channels, tearing the schooner from her fasts, and forcing a hole through the ship's side.

Passing aft, the ram endeavored to effect a breach in the stern, but failed. Three planks on the ship's side were stove in about two feet below the water line, making a hole about five inches in circumference. At the first alarm the crew promptly and coolly repaired to their quarters, and as the ram passed abreast of the ship the entire port battery was discharged at her, with what effect it was impossible to discover, owing to the darkness.

The sloops of war Preble and Vincennes, and the smaller steamer Water Witch, were lying at anchor a short distance below. A red light was shown from the Richmond as a signal of danger, and the vessels, having slipped their cables, were under way in a few minutes. Soon, three large fire rafts stretching

across the river were seen rapidly approaching, while several large steamers and a bark-rigged propeller were astern of them. The squadron, however, moved down the river, and, under the advice of the pilot, an attempt was made to pass over the bar, but in the passage the Vincennes and Richmond grounded, while the Preble went clear. This occurred about eight o'clock in the morning, and fire was opened on both sides. The shot of the fleet fell short, while shells of the enemy burst around them, or went beyond them. About half-past nine o'clock the commander of the Richmond made a signal to the ships outside of the bar to get under way. This was mistaken by Captain Hardy of the Vincennes as a signal for him to abandon his ship. Accordingly, with his officers and crew he left her, after having lighted a slow match at the magazine. But as no explosion occurred for some time, he was ordered to return and attempt to get her off shore. At ten o'clock the enemy ceased firing. No one was killed or wounded on the Federal fleet. No damage was done to any vessel except to the Richmond. The schooner J. H. Toone was captured, having about fifteen tons of coal on board.

The ram, as it was called, was the hull of a steamer, iron-plated with railroad iron, and having a projection on her bow beneath the water line, sufficient to punch a hole in the hull of a wooden vessel when struck with force. It was under the command of Capt. Hollins, formerly of the United States navy, the officer who was in command at the bombardment of Greytown, Nicaragua.

LYON, NATHANIEL, a general of volunteers in the United States army, born at Ashford, Windham Co., Connecticut, July 14, 1819, killed at the battle of Wilson's Creek, Missouri, August 10, 1861. His mother was a daughter of Lieutenant Daniel Knowlton, who served through the old French war and the Revolution. Gen. Lyon graduated at the Military Academy at West Point in 1841, and immediately received the appointment of second-lieutenant in the second regiment of infantry. His first field of service was Florida, during the latter part of the Seminole war, where he distinguished himself as an able and energetic officer. He was subsequently stationed for several years at different posts on the western frontier. In 1847 he was promoted to a first-lieutenancy, and upon the commencement of the war with Mexico was again ordered to active service. He joined Gen. Taylor at Monterey, and accompanied his regiment when it was detached from the command of Gen. Taylor and placed under that of Gen. Scott. He served at the bombardment of Vera Cruz and the battles of Cerro Gordo, Contreras, and Churubusco, and for "meritorious conduct" received the brevet rank of captain. At the close of the war with Mexico, Gen. Lyon was ordered to California, and detailed to service among the Indian tribes, who had become troublesome, and while en-

gaged in this service was promoted to a full captaincy in 1851. From California Gen. Lyon was ordered to Kansas, during the height of the political troubles there, and used his influence to maintain order and calm the strife of partisans. Some of his articles written for the press at this period, bear evidence of great vigor of intellect, and earnest devotion to his country's good. Early in 1861 Capt. Lyon was placed in command of the United States arsenal at St. Louis; after the fall of Fort Sumter the possession of Missouri seemed to depend upon his energy and coolness. The police commissioners of St. Louis assumed to themselves the power of opposing the Government, and demanded that Capt. Lyon should confine his jurisdiction to the arsenal grounds; this he refused. Not long before, the Governor of Missouri had authorized the formation of camps in various parts of the State. Taken in connection with the action of the commissioners, Capt. Lyon considered the concentration of these forces as an act of open hostility to the Government, and suddenly surrounded one of the camps, known as Camp Jackson, with a large force of the State "Home Guards" under Cols. Blair and Siegel, and, planting his guns on the heights, demanded of Gen. Frost, the commander of Camp Jackson, an immediate surrender; satisfied that he was unable to resist so large a force, Gen. Frost yielded up his whole command as prisoners of war. (*See St. Louis.*) A few days later Gen. Harney arrived at St. Louis and assumed the command, and Capt. Lyon was appointed general of the first brigade of Missouri Volunteers. He broke up a Confederate force at Potosi, and caused several important seizures of war material destined for Camp Jackson. Upon the removal of Gen. Harney, Gen. Lyon was placed in command of the department. Gov. Jackson and Gen. Price sought an interview with him, in which they insisted that no United States troops should march through or quarter in Missouri, although they had already allowed Confederate troops to do so. Lyon's reply was that the troops of the United States should march peaceably everywhere through the United States, offering insult to none, but would oppose every attack and crush every effort to molest them. Upon this Gov. Jackson withdrew from St. Louis and prepared for war. Gen. Lyon then took the field, but previously issued a proclamation to the citizens of Missouri, in which, after rehearsing the various acts of Gov. Jackson, he concludes: "If, in suppressing these treasonable projects, carrying out the policy of the Government, and maintaining its dignity, hostilities should unfortunately occur, and unhappy consequences should follow, I would hope that all aggravation of those events may be avoided, and that they may be diverted from the innocent and may fall on the heads of those by whom they have been provoked. In the discharge of these plain but onerous duties, I shall look for the countenance and active coöperation of

all good citizens, and I shall expect them to discountenance all illegal combinations or organizations, and support and uphold, by every lawful means, the Federal Government, upon the maintenance of which depend their liberties and the perfect enjoyment of all their rights."

Learning that Gov. Jackson and Gen. Price had commenced hostilities, Gen. Lyon moved towards Jefferson City with a small force, and upon his approach Gov. Jackson abandoned his position and retreated to Booneville, where a battle was fought on the 17th of June, which resulted in a complete victory, all the tents, ammunition and supplies falling into Gen. Lyon's hands. Upon entering Booneville, he issued a proclamation, in which, after a statement of the facts in relation to the battle, he said: "I hereby give notice to the people of this State that I shall scrupulously avoid all interference with the business, rights, and property of every description recognized by the laws of the State, and belonging to law-abiding citizens. But it is equally my duty to maintain the paramount authority of the United States with such force as I have at my command, which will be retained only so long as opposition makes it necessary, and that it is my wish, and shall be my purpose, to visit any unavoidable rigor arising in this issue upon those only who provoke it."

He soon after moved forward to Springfield, an important town of Southwestern Missouri, driving the Confederates before him, and defeating them at Dug Spring, about 15 miles from that town. Subsequent to the battle of Dug Spring, the Confederates received heavy reinforcements, and Gen. Lyon, after making several appeals to the Government for more troops, and receiving no response, called a council of war, to determine upon the question of evacuating Springfield. Fearing any retrograde movement would be fatal to the cause, it was decided to attack Gens. McCulloch and Price in their camp at Wilson's Creek, though with scarcely any hope of success, as the Union force was but a little over five thousand, while the Confederate force was nearly twenty-five thousand. The battle was a desperate one, and Gen. Lyon, after being twice wounded, was killed, while making a gallant charge at the head of the First Iowa Regiment, which had lost its colonel. His body was subsequently conveyed to Connecticut, the home of his parents, and upon its way was received everywhere with marked respect. Military honors were paid to it at Cincinnati, Pittsburg, Philadelphia, Jersey City, and New York. The funeral oration was delivered by Galusha A. Grow, Speaker of the United States House of Representatives. In Congress, Senator Pomeroy delivered an eloquent tribute to his memory, and the following resolutions passed both Houses:

Resolved, by the Senate and House of Representatives of the United States of America in Congress

assembled—*First*, That Congress deems it just and proper to enter upon its records a recognition of the eminent and patriotic services of the late Brigadier-General Nathaniel Lyon. The country to whose services he devoted his life will guard and preserve his fame as a part of its own glory. *Second*, That the thanks of Congress are hereby given to the brave officers and soldiers who, under the command of the late General Lyon, sustained the honor of the flag, and achieved victory against overwhelming numbers at the battle of Springfield, in Missouri, and that, in order to commemorate an event so honorable to the country and to themselves, it is ordered that each regiment en-

gaged shall be authorized to bear upon its colors the word "Springfield," embroidered in letters of gold. And the President of the United States is hereby requested to cause these resolutions to be read at the head of every regiment in the army of the United States.

Upon opening his will, it was ascertained that Gen. Lyon had bequeathed his entire property, \$80,000, with the exception of some slight bequests, to the Government, to aid in the preservation of the Union.

M

MAINE, the easternmost State of the American Union, was admitted in 1820, previous to which period it had formed a district of Massachusetts. It is situated between latitude 42° 57' and 47° 32' north, and longitude 66° 52' and 71° 6' west from Greenwich. Its extreme length from north to south is 303 miles, and its extreme width 212 miles. Its average length is about 200 miles, and its average width 160 miles. Its area is 31,766 square miles, or 20,330,240 square acres. Population, in 1860, 628,276. It is bounded northwest and north by Canada, east by New Brunswick, southeast and south by the Atlantic Ocean, and west by New Hampshire. It is divided into 16 counties. The valuation of the real and personal property of its citizens in 1850 was \$122,777,571; in 1860, \$190,211,600.

The following are some of the agricultural statistics of the State, from the census of 1860. The number of acres under cultivation was 2,677,136; value of cultivated lands, \$78,688,525; value of stock, \$15,437,380; tons of hay raised, 975,686; bushels of potatoes, 6,274,617; corn, 1,546,071; pounds of wool, 1,495,063; maple sugar, 306,942; butter, 11,687,784; value of orchard products, \$501,757. Number of vessels built in 1860, 172; tonnage, 57,867 tons, or more than one-fourth of the whole tonnage of vessels built in the United States that year.

There are 79 banks in the State, with an aggregate capital of \$7,968,850. These banks have a circulation of \$4,075,433; liabilities, \$7,338,846; loans and discounts, \$12,540,367; specie, \$724,036. There are also in the State 14 savings institutions, which have an aggregate deposit of \$1,620,270.

The State debt, at the beginning of 1861, was about \$1,172,000; and in addition to other property, it held 3,190,000 acres of public lands. The permanent school fund was about \$150,000, to be increased by the sale of 487,567 acres of reserved lands, 20 per cent. on all subsequent sales of unsold public lands, and \$30,000 in notes for school lands already sold. About \$113,000 are appropriated annually for educational purposes by the Legislature, and the towns are obliged to raise by tax for school purposes a sum equal to 60 cents for each inhabitant.

Maine had, on the 1st of January, 1862, 640

miles of railway completed, or in course of construction; of which 450 miles, constructed and equipped at a cost of \$16,901,057, were open for traffic. During the session of the Legislature in 1861, measures were taken to promote the completion of a line of railroad, of which considerable sections were already built, connecting by a continuous line Portland, Maine, with Halifax, Nova Scotia, with a branch line to the Aroostook at Hamilton, Maine. This great international undertaking was projected and fairly set in motion, some years ago, at the Portland Convention. The entire distance from Portland to Halifax is 562 miles; of this 238 miles lie in Maine, 200 miles in New Brunswick, and 124 miles in Nova Scotia. Of this line 138 miles are built in Maine from Bangor, 160 miles in New Brunswick from St. John to Shediac, on the Gulf of St. Lawrence, and 61 miles in Nova Scotia from Halifax, northward, to Truro. For more than half the distance, therefore, the line is already completed. The provinces of New Brunswick and Nova Scotia built their sections as public provincial works, at the expense of their governments, and were ready to complete their entire portions on being assured of the readiness of Maine to complete its section to the boundary.

The Governor strongly urged on the Legislature the duty of completing their share of the work; but as the Constitution of Maine prohibited the creation of a State debt, or a loan of credit, except for national defence, he advised them to apply the proceeds of the State lands, and of the claims of Maine on the United States Government, to this object.

After much debate, a bill was passed granting the proceeds of one million of acres of land, and the claims of Maine on the Government of the United States, towards the completion of the work.

In view of the secession and threatened secession of several States from the United States Government, the Legislature passed, on the 16th of January, 1861, by a large majority, the following joint resolutions:

Whereas, By advices received from Washington, and by information received in many other ways, it appears that an extensive combination exists of evil-disposed persons to effect the dissolution of the Fed-

eral Union and the overthrow of the Government; and *whereas* the people of this State are deeply attached to the Union and thoroughly loyal to the Government, and are heartily devoted to their preservation and protection; therefore,

Resolved, That the Governor be, and hereby is, authorized and requested to assure the President of the United States of the loyalty of the people of Maine to the Union and the Government thereof; and that the entire resources of the State in men and money are hereby pledged to the Administration in defence and support of the Constitution and the Union.

On the 11th of March, the Senate passed a bill repealing the Personal Liberty Act. The vote stood 17 for repeal, and 10 against it.

On the 16th of April, Governor Washburn issued the following proclamation, calling together the Legislature, which had adjourned, in an extra session on the 22d of April:

The fact that the laws of the United States have been, and now are opposed, and their execution obstructed, in the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana and Texas, by a combination too powerful to be suppressed by the ordinary course of judicial proceedings, or by the power vested in the Marshals by the laws that are; the fact that a requisition has been made on me by the President of the United States for a portion of the militia of the State to aid in suppressing such combinations, and causing the laws to be duly executed; the fact that I find myself without sufficient authority of law to enable me to respond thereto as the exigency of the case requires,—these facts present, in my judgment, one of those extraordinary occasions contemplated in the Constitution for convening the Legislature.

In consideration whereof, I, Israel Washburn, Jr., Governor of the State of Maine, in virtue of the power vested in me by the Constitution to convene the Legislature of this State, hereby require the Senators and Representatives to assemble in their respective chambers at the capitol in Augusta, on Monday, the 22d day of April instant, at 12 o'clock noon, and then and there to consider and determine on such measures as the condition of the country and the obligations of the State may seem to demand.

ISRAEL WASHBURN, Jr.

The session of the Legislature was a brief one, lasting only three and a half days; but during that time, all business necessary to enable the State to meet the remarkable crisis of the country, was performed with promptness and unanimity. Provisions were made to receive, arm, and equip ten regiments of volunteers, not to exceed 10,000 men. To meet this expense, the State credit was to be loaned and scrip issued, to the amount of \$1,000,000. A bill was also passed to raise a volunteer corps of militia of three regiments, not to exceed 3,000 men, who should be armed, equipped, and drilled at the expense of the State, and subject to be called into actual service at the demand of the proper authorities. The volunteers in actual service were to receive two months' bounty and the regular pay of \$11 per month. The proper steps were taken to place the whole militia force of the State in the most effective condition. A contingent bill was also passed, authorizing the Governor, if in his discretion the public safety should demand it, to provide a coast guard to protect the ships, commerce, and harbors of the State from privateers. To meet the expense of this coast

guard, if it should be deemed necessary to organize it, a loan of \$300,000 was authorized to be made.

The spirit which prompted this patriotic action pervaded the people of the State during the year. All classes were influenced by it. The ship-builders and ship-owners of the State met and offered their vessels to the Government; the lumbermen of the interior, and the fishermen of the coast willingly volunteered to preserve the Union, and men of all professions hastened to fill up the ranks with loyal and brave soldiers. Sixteen regiments, one of them one of the best cavalry regiments in the service, six batteries of artillery, and a company of sharpshooters, were furnished from this State, being more than 2,500 beyond its quota, and they have maintained the high reputation of the State for bravery and self-possession in their numerous battles.

The elections for State officers and the Legislature gave a majority of nearly 60,000 for the vigorous prosecution of the war.

During the year, arrangements were made for the erection of a fort at the mouth of the Kennebec River. An appropriation of \$100,000 was made for it four years ago, but Secretary Floyd would not take the necessary steps for procuring a title and domain over the land necessary for its location. Messrs. Hamlin, Williams, and Poor, the Commissioners of the State, took measures to have the matter brought properly before the Secretary of War, and secured the appropriation. It is to be called Fort Popham, in honor of Governor Popham, who, in 1608, erected a fort on the same site.

The Legislature, at its regular session in 1861, authorized a partial geological survey of the State, which was commenced in the autumn of that year by Messrs. E. Holmes, of Winthrop, Me., and C. H. Hitchcock, of Amherst, Mass., and is to be prosecuted more thoroughly the present year. Their investigations in 1861 were confined mostly to the northern and northeastern parts of the State, and they made a report of the results to the Legislature in a volume of 400 octavo pages. The most important of these results are: the discovery of a rich fertile district in northern Maine, of climate much milder than that of the regions south of it, in which plants that could not endure the climate of Massachusetts grow spontaneously and come to perfection. In the eastern part of Aroostook County, extensive beds of marl and some gypsum were found, as well as valuable quarries of statuary marble of excellent quality, limestone, and roofing slate. Gold was found on the Upper St. John River, and copper ores in the eastern part of Aroostook and the northern part of Washington County. In another section a large mass of tin ore was discovered, and the indications for a tin mine were better than any previously found in this country. Extensive beds of fossils were found in rocks analogous to the Lower Helderberg group and Oriskany sandstone.

MANASSAS JUNCTION is the spot where the Alexandria Railroad unites with the Manassas Gap Railroad. It is about half-way between the eastern spur of the Blue Ridge and the Potomac below Alexandria, and commands the whole country between. The position is a succession of hills nearly equidistant from each other. On the right, looking towards Washington, a wooded country stretches off towards the head waters of the Occoquan, which can be made almost impassable by felling trees. On the left is a rolling table-land, easily commanded from the successive elevations until a country so rough and rugged is reached that it is a defence to itself. In a military point of view the key of the position is that which was chosen at the outset for the centre of the Confederate forces, and which was fortified in the strongest manner. In front of the hills is a ravine so deep and so thickly wooded, as to be almost impassable except at two points, and those through gorges easily defended by a handful of men. It was of one of these points that an officer of the Confederate army thus spoke: "Here the Washington Artillery of New Orleans were at first encamped, and though only half the battalion was then there, and we had only one company of infantry to support us, we slept as soundly under the protection of our guns as if we had been in a fort of the amplest dimensions."

The strength and advantages of this position at Manassas are very much increased by the fact that fourteen miles further on is a position of similar formation, while the country between is admirably adapted to the subsistence and intrenchment of troops in numbers as large as they can easily be manoeuvred on the real battle-field. Water is good and abundant; forage such as is everywhere found in the rich farming districts of Virginia, and the communication with all parts of the country easy.

Here, overlooking an extensive plain, watered by mountain streams which ultimately find their way to the Potomac, and divided into verdant fields of wheat, and oats, and corn, pasture, and meadow, were the head-quarters of the advanced forces of the Confederate army of the Potomac. They were South Carolinians, Louisianians, Alabamians, Mississippians, and Virginians for the most part; the first two, singularly enough, being in front.

The fortifications constructed here ultimately became of the most extensive kind, and the numbers of troops in them during some months of the year comprised the great mass of the Confederate army. It was evacuated in the next spring by means of the railroad to Richmond, at a time when the country roads were in such an almost impassable condition as to prevent all approach of the Union army. The inactivity of the Confederate army after the battle of Bull Run, near Manassas, occasioned great surprise in the Confederate States. The manner in which it was regarded at Richmond in August ensuing is authentically stated as follows:

"Much criticism has been passed upon Gen. Beauregard, and those who are believed to direct the movements of the army, more particularly respecting his failure to occupy or destroy Alexandria and Washington City. Congress called for information on this point, and the President referred the inquiry to Gen. Beauregard, who, in his answer, placed the blame where it really belonged. He had been for weeks almost beseeching the War Department to supply him with the material needful to carry on the war—men, ammunition, provisions, wagons; but the quartermaster and commissariat departments being in incompetent hands, the day of battle came and found our generals without the means of carrying the army forward. Quite an acrimonious debate sprang up in the House upon the reading of this answer, in which Messrs. Miles and Chesnut, of South Carolina, who had been in the staff of Gen. Beauregard at Manassas, and had supported him during that eventful day, found it necessary to vindicate their great chief from the aspersions which certain members were disposed to throw out against his military reputation. Since the 21st July many circumstances have combined to keep the troops in a stationary position. Rain had fallen in great quantities and almost incessantly, rendering the roads impassable for heavy wagon transportation and the marching of large bodies of troops, and there had been a great deal of sickness among the soldiers; probably twenty per cent. were at one time unfit for duty."

MANGUM, HON. WILLIE PERSON, a United States Senator, born in Orange County, N. C., in 1792, died at his residence in Orange County, Sept. 21, 1861. He graduated at the University of North Carolina, in 1815. He was an able lawyer, and was elected to the House of Commons in his native State in 1818. In 1819 he was chosen Judge of the Superior Court, and from 1823 to 1826 served as a Representative in Congress. In 1831 he was elected a United States Senator, and continued to serve for three terms. During President Tyler's administration he was President of the United States Senate. Since 1853 he had withdrawn from political life, and it is probable his death was hastened by depression, on account of the loss of an only son, wounded at the battle of Manassas.

MARTIAL LAW was proclaimed at Baltimore, St. Louis, Alexandria, and other cities, during the year 1861. Various definitions have been given of this law by writers. According to one, "for all practical considerations, martial law and the suspension of the right to *habeas corpus*, are one and the same thing." Another writer considers martial law to be that military rule and authority which exist in time of war, and are conferred by the laws of war, in relation to persons and things under and within the scope of active military operations in carrying on the war, and which extinguish or suspend civil rights, and the remedies founded

upon them, for the time being, so far as it may appear to be necessary in order to the full accomplishment of the purposes of the war; the party who exercises it being liable in an action for any abuse of the authority thus conferred. It is the application of military government—the government of force—to persons and property within the scope of it, according to the laws and usages of war, to the exclusion of the municipal government, in all respects where the latter would impair the efficiency of military rule and military action. When the public safety requires it, and the civil authority is powerless to provide that safety, the strong arm of the military is invoked, and the will at the head of the military is the governing power. It is not an irresponsible will. It can exercise no more force than is required to effect its object—the public safety. It must cease so soon as the exigency which called it forth has been satisfied. The civil power must then be restored, and for every oppressive act done from corrupt motives, for every wilful abuse of the authority and power thus exercised to the wrong or injury of the public or the citizen, to person or to property, the person committing it will be responsible in the ordinary courts of justice.

Many interesting and important questions arise relative to martial law, such as, "Who has the power to declare it?" &c., which more properly belong to other volumes. The course of events in relation to this subject affords the best exposition of the views of the Government respecting its powers and duties regarding martial law.

At Baltimore, the measures contemplated were gradually adopted, and the extent of their operations appears to have been decided by the views of the commanding General respecting the state of affairs in the city. Martial law was never fully and entirely declared. Civil law continued in force, with the exception that some orders were issued, and some acts were done, which could take place only under a recognized existence of martial law.

Thus, on the 13th of May, General Butler marched a body of troops into Baltimore, and encamped on Federal Hill. On the next day, the 14th, he issued a proclamation to the citizens. For that portion of the proclamation which states his objects in placing his force in the city, *see* BALTIMORE; the remainder of the proclamation, which declares the extent to which he shall exercise his powers, and forbids certain acts on the part of the citizens, was as follows:

No transportation from the city to the rebels of articles fitted to aid and support troops in the field will be permitted, and the fact of such transportation, after the publication of this proclamation, will be taken and received as proof of illegal intention on the part of the consignors, and will render the goods liable to seizure and confiscation.

The Government being ready to receive all such stores and supplies, arrangements will be made to contract for them immediately, and the owners and manufacturers of such articles of equipment and clothing, and munitions of war and provisions, are desired

to keep themselves in communication with the Commissary-General, in order that their workshops may be employed for loyal purposes, and the artisans of the city resume and carry on their profitable occupations.

The acting Assistant-Quartermaster and Commissary of Subsistence of the United States here stationed, has been instructed to proceed and furnish, at fair prices, 40,000 rations for the use of the army of the United States, and further supplies will be drawn from the city to the full extent of its capacity, if the patriotic and loyal men choose so to furnish supplies.

All assemblages, except the ordinary police, of armed bodies of men, other than those regularly organized and commissioned by the State of Maryland, and acting under the orders of the Governor thereof, for drill and other purposes, are forbidden within the department.

All officers of the militia of Maryland, having command within the limits of the department, are requested to report through their officers forthwith to the General in command, so that he may be able to know and distinguish the regularly commissioned and loyal troops of Maryland from armed bodies who may claim to be such.

The ordinary operations of the corporate government of the city of Baltimore and of the civil authorities will not be interfered with, but, on the contrary, will be aided by all the power at the command of the General, upon proper call being made, and all such authorities are cordially invited to cooperate with the General in command to carry out the purposes set forth in the proclamation, so that the city of Baltimore may be shown to the country to be, what she is in fact, patriotic and loyal to the Union, the Constitution, and the laws.

No flag, banner, ensign, or device of the so-called Confederate States, or any of them, will be permitted to be raised or shown in this department, and the exhibition of either of them by evil-disposed persons will be deemed and taken to be evidence of a design to afford aid and comfort to the enemies of the country. To make it the more apparent that the Government of the United States by far more relies upon the loyalty, patriotism, and zeal of the good citizens of Baltimore and vicinity than upon any exhibition of force calculated to intimidate them into that obedience to the laws which the Government doubts not will be paid from inherent respect and love of order, the commanding General has brought to the city with him, of the many thousand troops in the immediate neighborhood, which might be at once concentrated here, scarcely more than an ordinary guard, and until it fails him, he will continue to rely upon that loyalty and patriotism of the citizens of Maryland, which have never yet been found wanting to the Government in time of need. The General in command desires to greet and treat in this part of his department all the citizens thereof as friends and brothers, having a common purpose, a common loyalty, and a common country. Any infractions of the laws by the troops under his command, or any disorderly, unsoldierlike conduct, or any interference with private property, he desires to have immediately reported to him, and pledges himself that if any soldier so far forgets himself as to break those laws that he has sworn to defend and enforce, he shall be most rigorously punished.

The General believes that if the suggestions and requests contained in this proclamation are faithfully carried out by the cooperation of all good and Union-loving citizens, and peace and quiet, and certainty of future peace and quiet are thus restored, business will resume its accustomed channels, trade take the place of dulness and inactivity, efficient labor displace idleness, and Baltimore will be in fact what she is entitled to be, in the front rank of the commercial cities of the nation.

Given at Baltimore, the day and year (May 14th, 1861) herein first above written.

BENJ. F. BUTLER,

Brig.-General Comm'g Department of Annapolis.
E. G. PARKER, Lieut.-Col., Aide-de-Camp.

Soon General Butler was transferred to the command of Fortress Monroe, and General Banks took command of the Department of Annapolis, with his head-quarters at Baltimore. On the 27th of June, the City Marshal of Police, Kane, was arrested by a military force acting under the command of General Banks. At the same time, a Provost-Marshal was appointed, and a proclamation issued by the commanding General. For so much of the proclamation as states the cause and object of the arrest, *see* BALTIMORE. The proclamation then proceeds as follows:

For this reason of superseding his official authority, as well as that of the Commissioners of Police, I have arrested, and do now detain him in custody of the United States; and in further pursuance of my instructions, I have appointed, for the time being, Colonel Kenly, of the First Maryland Regiment of Volunteers, Provost-Marshal in and for the City of Baltimore, to superintend and cause to be executed the Police laws provided by the Legislature of Maryland, with the aid and assistance of the subordinate officers of the Police Department, and he will be respected accordingly. Whenever a loyal citizen shall be otherwise named for the performance of his duty, who will execute the laws impartially and in good faith to the Government of the United States, the military of this Department will render to him that constant and willing obedience which is due from every good citizen to the Government.

N. P. BANKS,

Major-General Commanding.

HEAD-QUARTERS DEPARTMENT OF ANNAPOLIS, }
June 27, 1861.

To Colonel Kenly:

SIR: By virtue of instructions received from the Department of War, at Washington, dated June 24th, 1861, I do hereby appoint you Provost-Marshal in and for the City of Baltimore. You will enter upon your duties forthwith at the head-quarters of Police for the city, and, notifying his Honor, the Mayor, of your appointment, by reading to him this order and the proclamation enclosed herewith, you will proceed at once, with the assistance of the subordinate officers of the Police Department, to superintend and cause to be executed the Police law provided by the Legislature of Maryland, "for the government of Baltimore."

I am, very respectfully, yours, &c.,

N. P. BANKS,

Major-General Commanding.

Provost-Marshal Kenly immediately issued the following order:

OFFICE PROVOST-MARSHAL, June 27, 1861.

To the Officers and Men of the Police of Baltimore:

By order of Major-General Banks, commanding the Department of Annapolis, I assume and take command of the police force of the City of Baltimore, to superintend, and, with the aid of the subordinate officers of the Police Department, to execute and cause to be executed the Police laws provided by the Legislature of Maryland for the government of the City of Baltimore. You will continue to discharge your duties under existing regulations until further orders.

JOHN B. KENLY, Provost-Marshal.

Immediately after these proceedings, the Police Commissioners met and issued the following protest, which shows the authority by which they were appointed, and under which they acted:

OFFICE BOARD OF POLICE, BALTIMORE, }
June 27, 1861.

Whereas, the laws of the State of Maryland give the whole and exclusive control of the police force of the city to the Board of Police, organized and appointed

by the General Assembly; and not only are the said Board bound to exercise the powers vested in and discharge the duties imposed upon them, but all other persons are positively prohibited, under heavy penalties, from interfering with them in so doing. And whereas, there is no power given to the Board to transfer the control over any portion of the police to any person or persons whomsoever, other than the officers of police appointed by them, in pursuance of the express provisions of the law, and acting under their orders. And whereas, by the orders of Major-General Banks, an officer of the United States Army, commanding in this city, the Marshal of Police has been arrested, the Board of Police superseded, and an officer of the army has been appointed Provost-Marshal, and directed to assume the command and control of the police force of the city; therefore, be it

Resolved, That this Board do solemnly protest against the order and proceedings above referred to, of Major-General Banks, as an arbitrary exercise of military power, not warranted by any provisions of the Constitution or laws of the United States, or of the State of Maryland, but in derogation thereof.

(For the additional resolutions adopted by the Board, *see* BALTIMORE.) Upon the appearance of this protest, General Banks issued the following instructions to the Provost-Marshal:

HEAD-QUARTERS DEPARTMENT OF ANNAPOLIS, }
June 27, 1861.

To Colonel Kenly, Provost-Marshal:

SIR: My attention has been called to a resolution, purporting to have been this day passed by the late Board of Police Commissioners, expressing the opinion that "the suspension of their functions suspended at the same time the operations of the police law, and puts the officers and men off duty for the present."

You will take special notice, sir, that by my proclamation of this day, neither the law nor the officers appointed to execute the laws are affected in any manner whatever, except as it operates upon the members of the Board of Commissioners and the Chief of Police, whose functions were and are suspended. Every part of the police law is to be enforced by you, except that which refers to the authority of the Commissioners and Chief of Police, and every officer and man, with the exception of those persons above named, will be continued in service by you, in the positions they now occupy, and with the advantages they now receive, unless one or more shall refuse to discharge their duties.

If any police officer declines to perform his duty, in order to avoid the anarchy which it was the purpose of the Commissioners to bring upon the city, by incorrectly stating that it had been by my act deprived of its police protection, you will select, in conference with such of the public authorities as will aid you, good men and true to fill their places and discharge their duties.

You will also take especial notice that no opinion, resolution, or other act of the late Board of Commissioners, can operate to limit the effective force of the police law, or to discharge any officer engaged in its execution. If any provision of the law fails to be executed, it will be from the choice of the city, and if any officer, except such as are hereinafter named, leave the service, it will be upon his own decision.

You will cause these rules to be made known as the rule of your conduct.

I repeat my declaration and my purpose—no intervention with the laws or government of the city whatever is intended, except to prevent secret, violent, and treasonable combinations of disloyal men against the Government of the United States.

I am, sir, very truly yours, &c.,

NATH. P. BANKS.

These details are sufficient to show the extent of the operations of martial law in Baltimore, and the principles upon which it was

based. On the 14th of August, General Fremont proclaimed martial law in St. Louis. The following is his proclamation :

HEAD-QUARTERS WESTERN DEPARTMENT,
St. Louis, Aug. 14.

I hereby declare and establish martial law in the City and County of St. Louis. Major J. McKinstry, United States Army, is appointed Provost-Marshal. All orders and regulations issued by him will be respected and obeyed accordingly.

Signed, J. C. FREMONT,
Major-General Commanding.

On the same day, Major McKinstry issued a proclamation to the citizens, as follows :

To the People of the City and County of St. Louis :

The undersigned having been appointed Provost-Marshal of the City and County of St. Louis, calls upon all good citizens to cheerfully obey the rules it has been deemed necessary to establish in order to insure the preservation of the public peace.

The undersigned enters upon the duties of his office with a full sense of the responsibility that devolves upon him, and he deprecates as sincerely as any citizen can, the state of affairs that compels the establishment of the stringent measures he will enforce, but having confidence in the loyalty and patriotism of the masses, he appeals to them to cooperate with the civil and military authorities in preserving peace and good order in the city and county.

The civil law will remain in force, and the undersigned will exercise the power given him only in case where the civil law is found to be inadequate to the maintenance of the public peace and the public safety. Any violation of order will be followed by prompt and adequate punishment, regardless of persons or positions.

J. MCKINSTRY,

Major U. S. Army, Provost-Marshal.

Office of the Provost-Marshal, St. Louis, Mo., August 14, 1861.

ORDER NO. 20.

OFFICE PROVOST-MARSHAL, Aug. 14, 1861.

The wearing of concealed weapons by any persons not in the military service of the United States, or in the regularly constituted police force of the city, is hereby prohibited.

No excuse of any kind or description will mitigate the severe punishment ordered to be inflicted for a violation of this order.

J. MCKINSTRY,
Major U. S. Army, Provost-Marshal.

ORDER NO. 21.

OFFICE PROVOST-MARSHAL, ST. LOUIS, Aug. 14.

Notice is hereby given to gunsmiths and dealers in fire-arms, residents in the city and county of St. Louis, that no description of fire-arms will be permitted to be sold or given away after this date, without a special permit from this office.

J. MCKINSTRY,
Major U. S. Army, Provost-Marshal.

As a further illustration of this subject, the following documents, although belonging to the records of the ensuing year, are introduced in this place. They serve to show the views entertained by the Confederate Government, and the manner in which it acted in the execution of martial law :

GENERAL ORDERS NO. 1.

WAR DEPARTMENT, ADJUTANT AND INSPECTOR-
GENERAL'S OFFICE, RICHMOND, April 8, 1862.

I. The following proclamation is published for the information of all concerned :

PROCLAMATION.

By virtue of the power vested in me, by law, to declare the suspension of the privilege of the writ of *habeas corpus* :

I, Jefferson Davis, President of the Confederate

States of America, do proclaim that martial law is hereby extended over the Department of East Tennessee, under the command of Major-General E. K. Smith; and I do proclaim the suspension of all civil jurisdiction, (with the exception of that enabling the courts to take cognizance of the probate of wills, the administration of the estates of deceased persons, the qualification of guardians, to enter decrees and orders for the partition and sale of property, to make orders concerning roads and bridges, to assess county levies, and to order the payment of county dues,) and the writ of *habeas corpus* aforesaid.

In witness whereof, I have hereunto signed my name and set my seal, this 8th day of April, in the year one thousand eight hundred and sixty-two.

[Seal.] JEFFERSON DAVIS.

II. Major-General E. K. Smith, commanding Department of East Tennessee, is charged with the due execution of the foregoing proclamation. He will forthwith establish an efficient military police, and will enforce the following orders :

The distillation of spirituous liquors is positively prohibited, and the distilleries will forthwith be closed. The sale of spirituous liquors of any kind is also prohibited, and establishments for the sale thereof will be closed.

III. All persons infringing the above prohibition will suffer such punishment as shall be ordered by the sentence of a court-martial: Provided, that no sentence to hard labor for more than one month shall be inflicted by the sentence of a regimental court-martial, as directed by the 67th Article of War.

By command of the Secretary of War.

S. COOPER, Adj't and Inspector-General.

Official : H. L. CLAY, A. A.-G.

GENERAL ORDERS NO. 23.

HEAD-QUARTERS DEPARTMENT EAST TENN., }
KNOXVILLE, April 18, 1862.

I. Col. W. M. Churchwell is appointed Provost-Marshal, and charged, under the direction of the Major-General commanding, with the due execution of the foregoing proclamation in this Department.

By command of Major-General

E. KIRBY SMITH.

H. L. CLAY, A. A.-G.

HEAD-QUARTERS DEPARTMENT EAST TENN., }
OFFICE PROVOST-MARSHAL, KNOXVILLE, April 18, 1862.

Martial law having been declared in this Department, the people of East Tennessee are notified that whilst the criminal courts of the land continue in the exercise of their functions, they—the people—are amenable for offences committed under the "Articles of War," and they can be tried, under the orders of the Department Commander, by military courts.

The following extracts from the Rules and Articles of War, are published for their information and guidance :

ARTICLE 5. Any officer or private who shall use contemptuous or disrespectful words against the President of the Confederate States, against the Vice-President thereof, against the Congress of the Confederate States, or against the Chief Magistrate or Legislature of any of the Confederate States in which he may be quartered, if a commissioned officer, shall be cashiered, or otherwise punished, as a court-martial may decide; if a non-commissioned officer or soldier, he shall suffer such punishment as shall be inflicted by the sentence of a court-martial. * * * * *

ART. 28. Any officer or soldier who shall be convicted of having advised or persuaded any other officer or soldier to desert the service of the Confederate States, shall suffer death, or such other punishment as shall be inflicted upon him by the sentence of a court-martial. * * * * *

ART. 55. Whosoever, belonging to the armies of the Confederate States in foreign parts, shall force a safeguard, shall suffer death.

ART. 56. Whosoever shall relieve the enemy with

money, victuals, or ammunition, or shall knowingly harbor or protect an enemy, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.

ART. 57. Whosoever shall be convicted of holding correspondence with, or giving intelligence to, the enemy, either directly or indirectly, shall suffer death, or such other punishment as shall be ordered by the sentence of a court-martial.

WM. M. CHURCHWELL,
Colonel and Provost-Marshal.

It must be apparent that the principles and operation of martial law are wholly, and perhaps necessarily, undefined. In each of the preceding cases the extent of its operations has been different. Other cases, not stated in detail, present the same result. In all cases, the commanders of the Federal forces issued their proclamations upon the orders of the War Department, which is under the immediate authority of the President as Commander-in-Chief.

MARTINSBURG, a thriving village heretofore, is the capital of Berkley County, Virginia. It is located on the Tuscarora Creek and on the Baltimore and Ohio Railroad, 180 miles north of Richmond. Its situation is in an elevated and fertile region a few miles west of the Blue Ridge. The force of Gen. Patterson which crossed the Potomac on the morning of July 2d at Williamsport, after the skirmish at Falling Water, moved to Hainesville, and thence to Martinsburg on the 3d July. The nearest force of the Confederates at the time was at Big Springs, on the route to Winchester, three miles below. This was only a double picket-guard. Gen. Johnston had moved forward the heaviest part of his column to Bunker Hill, a small village ten miles below. Whilst this point was in the possession of the Confederate force, a great destruction of locomotives, cars, and other property of the Baltimore and Ohio Railroad Company was made. An eye-witness thus describes the scene presented to his view :

"On the 6th June we rode about three miles along the Baltimore and Ohio Railroad. All along were scattered coal-cars in long lines, with the coal still burning, having been set on fire by the Confederate force. They had kindled huge fires around them, burning all the wood-work, and a great deal of the iron. They were all fine iron cars, holding about twenty tons each. Here and there the road led above them, and looking down, we could see the inside—a mass of red-hot coals. Some small bridges had been burnt with the cars on them, and, giving way, the cars were left piled one on another in the small streams below, all battered and bent. We counted the line of locomotives that had been burnt, (forty-one or forty-two in all,) red and blistered with the heat. (See B. & O. RAILROAD.) The withdrawal of troops on the retreat of General Patterson again exposed the inhabitants of this town to the power of the Confederate force.

MARYLAND, the most southern of the Middle States, is bounded on the north by

Pennsylvania, east by Delaware and the Atlantic, and south, southwest, and west by Virginia, from which it is separated by the Potomac River. The population in 1860, was 516,128 whites, 83,718 free colored, and 87,188 slaves; total, 687,034. The ratio of increase during the previous ten years was 23.49 white, 12.04 free colored, 3.52 slaves. The Governor is elected for four years. The term of Governor Hicks expired at the close of 1861. The Senate consists of twenty-two members, who are elected for four years, and the House of seventy-four members, who are elected for two years. (See NEW AMERICAN CYCLOPÆDIA.)

The location of Maryland on the highway between the North and the South, and the position of the District of Columbia within her territory, made her somewhat of a coveted prize with the States determined to secede. By her secession she would take possession of the District of Columbia, and Washington become the capital of the Southern Confederacy. These considerations caused unusual excitement among her citizens as to the course which the State should pursue. Perhaps the most weighty of the material considerations which controlled as well her action as that of Kentucky, arose from her geographical position.

A border State, adjoining a great slave State on one side, and on the other a greater and far more populous free State, which was one of those Maryland had cause to censure as having provoked, although it did not justify the extreme violence of the South, and that was restrained by law and decency from open warfare upon slave property; yet the moment she joined and made common cause with others of the South, then would commence the stampede that in less than six months would either not leave a remnant of that peculiar property in the State, or make the residue evil disposed and of no value.

The slave property in the state, at the commencement of the difficulties of the country was estimated at not less than fifty millions in value. In addition, there would also have been the removal of about one hundred thousand servile laborers from the cultivation of the soil, thereby become desolate. This change of circumstances in her condition would have made her a free State, thereby destroying almost entirely her particular interest for a union with the Southern States, and placing her on terms of disunion and hostility with the free North, to which she had thus become in a degree assimilated.

The first decisive public act of the Governor in favor of the Union, was his reply to A. H. Handy, who had been appointed by the Legislature of Mississippi, as a commissioner from that State to Maryland. The occasion of this visit of the Mississippi Commissioner, as stated by himself, was "the crisis in the national affairs of this country, and the danger which imperils the safety and rights of the Southern States by reason of the election of a sectional candidate to the office of President of the

United States, and upon a platform of principles destructive of our constitutional rights, which calls for prompt and decisive action for the purpose of protection and future security." To the views expressed by the Commissioner sent upon such an occasion, the Governor replied on the 19th of December. In this reply he declared his purpose to act in full concert with the other Border States, "and I do not doubt," he adds, "the people of Maryland are ready to go with the people of those States for weal or woe." He fully agreed in the opinion as to the necessity for protection to the rights of the South, and while his sympathies were with the gallant people of Mississippi, he hoped they would act with prudence as well as with courage.

From this time unparalleled efforts were made to induce the Governor to call an extra session of the Legislature. The success of this movement involved, among its consequences, the possession of Washington by the Southern Confederacy, the prevention of the inauguration of the President-elect, and the prominence that would be given to the Southern Government in the eyes of the world, by actually supplanting that of the United States in its very citadel. Another consequence of immediate importance to the citizens of Maryland would also follow, and that was whether the State should form a part of the United States or of the Southern Confederacy. With a single eye to this consideration, the Governor appears to have been controlled.

Nevertheless, the friends of the Southern States were strenuous in their efforts to overcome the opposition of the Governor. The action of the Legislature was necessary, to obtain a legal State Convention. Through the decision of such a body it was hoped to place the State side by side with her Southern sisters. Twelve members of the twenty-two, who composed the State Senate, met, and adopted an address to the Governor, urging the necessity of an extra session. Preliminary steps were contemplated for calling an informal State Convention of prominent citizens of all political parties, in order to obtain from that body an expression of the sentiment of the people in favor of an extra session of the Legislature. On the other side, the friends of the Union memorialized the Governor in opposition to such a measure. They said his course of refusal received their full approval, and they hoped he would steadily refuse, unless there should appear to his calm and deliberate judgment just cause to do so. In answer to these appeals he issued an address, stating very fully his views, in which he said:

I firmly believe that a division of this Government would inevitably produce civil war. The secession leaders in South Carolina, and the fanatical demagogues of the North have alike proclaimed that such would be the result, and no man of sense, in my opinion, can question it. What could the Legislature do in this crisis, if convened, to remove the present troubles which beset the Union? We are told by the

leading spirits of the South Carolina Convention that neither the election of Mr. Lincoln nor the non-execution of the Fugitive Slave law, nor both combined, constitute their grievances. They declare that the real cause of their discontent dates as far back as 1833. Maryland and every other State in the Union, with a united voice, then declared the cause insufficient to justify the course of South Carolina. Can it be that this people who then unanimously supported the cause of General Jackson, will now yield their opinions at the bidding of modern secessionists? I have been told that the position of Maryland should be defined so that both sections can understand it. Do any really understand her position? Who that wishes to understand it can fail to do so? If the action of the Legislature would be simply to declare that Maryland is with the South in sympathy and feeling; that she demands from the North the repeal of offensive, unconstitutional statutes, and appeals to it for new guarantees, that she will wait a reasonable time for the North to purge her statute-books, as to do justice to her Southern brethren, and, if her appeals are vain, will make her common cause with her sister border States in resistance to tyranny if need be, it would only be saying what the whole country well knows, and what may be said much more effectually by her people themselves, in their meetings, than by the Legislature, chosen eighteen months since, when none of these questions were raised before them. That Maryland is a conservative Southern State all know who know any thing of her people or her history. The business and agricultural classes, planters, merchants, mechanics, and laboring men, those who have a real stake in the community, who would be forced to pay the taxes and do the fighting, are the persons who should be heard in preference to excited politicians, many of whom having nothing to lose from the destruction of the Government, may hope to derive some gain from the ruin of the State. Such men will naturally urge you to pull down the pillars of this "accursed Union," which their allies at the North have denominated a "covenant with hell."

The people of Maryland, if left to themselves, would decide, with scarcely an exception, that there is nothing in the present causes of complaint to justify immediate secession; and yet, against our judgments and solemn convictions of duty, we are to be precipitated into this revolution, because South Carolina thinks differently. Are we not equals? Or shall her opinions control our actions? After we have solemnly declared for ourselves, as every man must do, are we to be forced to yield our opinions to those of another State, and thus in effect obey her mandates? She refuses to wait for our counsels. Are we bound to obey her commands? The men who have embarked in this scheme to convene the Legislature, will spare no pains to carry their point. The whole plan of operations, in the event of the assembling of the Legislature, is, as I have been informed, already marked out, the list of ambassadors who are to visit the other States is agreed on, and the resolutions which they hope will be passed by the Legislature, fully committing this State to secession, are said to be already prepared. In the course of nature, I cannot have long to live, and I fervently trust to be allowed to end my days a citizen of this glorious Union. But should I be compelled to witness the downfall of that Government inherited from our fathers, established, as it were, by the special favor of God, I will at least have the consolation, at my dying hour, that I neither by word nor deed assisted in hastening its disruption.

THOMAS H. HICKS.

As time passed on, it became apparent that the approval of the policy of Gov. Hicks was almost unanimous on the eastern shore, and that in the western part of the State the same sentiment prevailed. A meeting for a counter movement, called under favorable circumstances in Baltimore, was attended by only a few hundred persons. On the 18th and 19th of Febru-

ary, an irregular State Convention was held at Baltimore, in which most of the counties in the State were represented. Its object was to take into consideration the position of Maryland in reference to the national difficulties, and its deliberations resulted in an address and a series of resolutions.

The action proposed was simply to wait. The resolutions asserted that a full and fair expression of the popular will was most likely to be had by a Convention called on the recommendation of the Governor, and that, as it was asserted that the Governor would, by proclamation, authorize such a movement in the event of a failure upon the part of Congress and the Peace Conference, to adopt any satisfactory plan of compromise, the Convention approved that purpose, and adjourned until the 12th of March, to await the Governor's action; unless, intermediately, the State of Virginia should secede, when the Convention was to be immediately reassembled at the call of its President. If the Governor declined to call a "Sovereign" Convention previous to the 12th of March, then the Convention would at once recommend to the people to proceed to the election of delegates to such a Convention.

This Convention reassembled again on the 12th of March, in reduced numbers. The result of its action was simply a negation of the necessity for any movement on the part of Maryland at that time. The Convention further resolved that the proposition for a Conference among the Southern Border States, by delegates deriving authority from the people, would meet the approval of Maryland, and appointed a committee to visit the Virginia Convention and express to them that assurance. Those of the delegates who desired to go farther than was proposed by the report of the Committee on Resolutions, submitted amendments, declaring that all attempts upon the part of the Government to "reoccupy, repossess, or retake" any forts or any other property within the limits of the seceded States, would be acts of war, and that such acts would absolve Maryland and the Border States from all connection with the United States. These amendments were opposed, as in reality opening the way to secession, and as initiating a programme that would not be sanctioned by the people of Maryland. Finally the subject was postponed.

Movements were also commenced for the organization of a Union party in the State. At a public meeting held at Frederick, a State Convention to be held on the 2d May, was recommended to form a Union party.

The assault on Fort Sumter made no changes in the Governor's views. He still contended that Maryland should maintain the same position of devotion to the Union and the Constitution that she had held throughout this period of national trouble. Secession was no remedy for any wrongs complained of, and in the case of Maryland especially would be an aggravation of them all, with the accompaniment of civil

strife among her own citizens, bringing ruin to all her varied commercial and agricultural interests. The election for members of Congress would give a fair opportunity for a test of the sentiment of the State on the question of secession, and there was no doubt that it would be conducted on the issue of "Union" or "Disunion."

To the proclamation of the President and the requisition for a quota of troops from Maryland, the Governor replied by stating the position of affairs in the State, and issued the following proclamation:

To the People of Maryland:

The unfortunate state of affairs now existing in the country has greatly excited the people of Maryland.

In consequence of our peculiar position it is not to be expected that the people of this State can unanimously agree upon the best mode of preserving the honor and integrity of the State, and of maintaining within her limits that peace so earnestly desired by all good citizens.

The emergency is great. The consequences of a rash step will be fearful. It is the imperative duty of every true son of Maryland to do all that can tend to arrest the threatened evil.

I therefore counsel the people, in all earnestness, to withhold their hands from whatever may tend to precipitate us into the gulf of discord and ruin gaping to receive us. I counsel the people to abstain from all heated controversy upon the subject; to avoid all things that tend to crimination and recrimination; to believe that the origin of our evil day may well be forgotten now by every patriot in the earnest desire to avert from us its fruit.

All powers vested in the Governor of the State will be strenuously exerted to preserve the peace and maintain inviolate the honor and integrity of Maryland.

I call upon the people to obey the laws, and to aid the constituted authorities in their endeavors to preserve the fair fame of our State untarnished.

I assure the people that no troops will be sent from Maryland, unless it may be for the defence of the National Capital.

It is my intention in the future, as it has been my endeavor in the past, to preserve the people of Maryland from civil war; and I invoke the assistance of every true and loyal citizen to aid me to this end.

The people of this State will, in a short time, have the opportunity afforded them in a special election for members of the Congress of the United States to express their devotion to the Union or their desire to see it broken up.

THOMAS H. HICKS,
Governor of Maryland.

BALTIMORE, April 18, 1861.

The exciting events at Baltimore on the 19th of April, produced greater impression in the neighborhood of that city than elsewhere in the State. (See BALTIMORE.) The object of the Governor was to gain time. He had thus far opposed a session of the Legislature, under a conviction that a majority of the members were in favor of secession, and desired to place the State in antagonism to the Federal Government. Under the excitement produced by the events at Baltimore, the Senator from that county, Coleman Gellott, after advising with the Board of Police Commissioners, and being instigated by the more prominent secessionists, issued, without a shadow of lawful authority, a proclamation for an assembling of the Legislature at Baltimore. That would have placed that body in the midst of the largest and most

active portion of the secessionists of the State. Speaking of this state of affairs at a subsequent day, the Governor said:

"I knew it was time for me to act. True, I might then have called upon the President of the United States to quell the insurrection, but this would almost certainly have caused the destruction of the city of Baltimore. I might have called out the militia to endeavor to restore quiet; and, indeed, I did make an effort to that end. But I discovered that nearly all the officers were in league with the conspirators, and the volunteer corps of the city and vicinity which possessed arms were almost entirely in the same category. It is true, there was a considerable loyal military force in Baltimore, but it was undisciplined, and entirely unarmed. So that if I had effectively called out the militia at that time, I should have actually assisted the conspirators in their designs. I concluded, therefore, after anxious deliberation, that there was but one course left to me. I summoned the Legislature to assemble at Frederick City, in the midst of a loyal population, on the 26th day of April, believing that even the few days thus gained would be invaluable."

An election was immediately held in the city of Baltimore for members of this Legislature. Only one ticket was nominated. This received about 9,200 votes. The vote of the city at the Presidential election was 30,150.

On the 26th this body assembled at Frederick. The Governor, in his Message, briefly described the recent events which had taken place in the State, and his own action in connection with them. He said:

Believing it to be the design of the Administration to pass over our soil troops for the defence of the City of Washington, and fearing that the passage of such troops would excite our people and provoke a collision, I labored earnestly to induce the President to forego his purpose. I waited upon him in person, and urged the importance of my request. I subsequently communicated with him and his Cabinet by special despatches, entreating an abandonment of his designs. To all my requests I could get but the reply that Washington was threatened with attack; that the Government had resolved to defend it; that there was no other way of obtaining troops than by passing them over the soil of Maryland, and that the military necessity of the case rendered it impossible for the Government to abandon its plans, much as it desired to avoid the dangers of a collision. My correspondence with the authorities at Washington is therewith submitted. The consequences are known to you. On Friday last a detachment of troops from Massachusetts reached Baltimore, and was attacked by an irresponsible mob, and several persons on both sides were killed. The Mayor and Police Board gave to the Massachusetts soldiers all the protection they could afford, acting with the utmost promptness and bravery. But they were powerless to restrain the mob. Being in Baltimore at the time, I cooperated with the Mayor to the fullest extent of my power in his efforts. The military of the city were ordered out to assist in the preservation of the peace. The railroad companies were requested by the Mayor and myself to transport no more troops to Baltimore City, and they promptly acceded to our request. Hearing of the attack upon the soldiers, the War Department issued orders that no more troops would pass through Baltimore City, provided

they were allowed to pass outside its limits. Subsequently a detachment of troops were ascertained to be encamped at or near Cockeysville, in Baltimore County. On being informed of this, the War Department ordered them back. Before leaving Baltimore, Colonel Huger, who was in command of the United States arsenal at Pikesville, informed me that he had resigned his commission. Being advised of the probability that the mob might attempt the destruction of this property, and thereby complicate our difficulties with the authorities at Washington, I ordered Colonel Petherbridge to proceed with sufficient force and occupy the premises in the name of the United States Government, of which proceeding I immediately notified the War Department. On Sunday morning last I discovered that a detachment of troops, under command of Brigadier-General Benjamin F. Butler, had reached Annapolis in a steamer, and taken possession of the practice-ship Constitution, which during that day they succeeded in getting outside of the harbor of Annapolis, where she now lies. After getting the ship off, the steamer laid outside the harbor, and was soon joined by another steamer having on board the Seventh regiment, from New York City. Brigadier-General Butler addressed me, asking for permission to land his forces. It will be seen from the correspondence herewith submitted, that I refused my consent. The Mayor of Annapolis also protested. But both steamers soon afterwards landed and put off with the troops. Subsequently other large bodies of troops reached here in transports, and were landed. I was notified that the troops were to be marched to Washington. They desired to go without obstruction from our people, but they had orders to go to Washington, and were determined to obey those orders. In furtherance of their designs they took military possession of the Annapolis and Elk Ridge Railroad, in regard to which act I forwarded to Brigadier-General Butler the protest, and see the reply herewith submitted. On Wednesday morning the two detachments landed, and took up the line of march for Washington. The people of Annapolis, though greatly exasperated, acting under counsel of the most prudent citizens, refrained from molesting or obstructing the passage of the troops through the city. Seriously impressed with the condition of affairs, and anxious to avoid a repetition of events similar to those which had transpired in Baltimore, I deemed it my duty to make another appeal at Washington. Accordingly, I sent a special messenger to Washington, with a despatch to the Administration, advising that no more troops be sent through Maryland; that the troops at Annapolis be sent elsewhere, and urging that a truce be offered with a view of a peaceful settlement of existing difficulties by meditation. I suggested that Lord Lyons, the British Minister, be requested to act as mediator between the contending parties. These events have satisfied me that the War Department has concluded to make Annapolis the point for landing troops, and has resolved to open and maintain communication between this place and Washington. In the brief time allowed, it is impossible for me to go more into detail. I shall promptly communicate such other information as may reach me.

Notwithstanding the fact that our most learned and intelligent citizens admit the right of the Government to transport its troops across our soil, it is evident that a portion of the people of Maryland are opposed to the exercise of that right. I have done all in my power to protect the citizens of Maryland, and to preserve peace within our borders. Lawless occurrences will be repeated, I fear, unless prompt action be taken by you. It is my duty to advise you of my own convictions of the proper course to be pursued by Maryland in the emergency which is upon us. It is of no consequence now to discuss the causes which have induced our troubles. Let us look to our distressing present and to our portentous future. The fate of Maryland, and perhaps of her sister border slave States, will undoubtedly be seriously affected by the action of your honorable body. Therefore should every good citizen bend all his energies to the task before us, and therefore

should the animosities and bickerings of the past be forgotten, and all strike hands in the bold cause of restoring peace to our State and to our country. I honestly and most earnestly entertain the conviction that the only safety of Maryland lies in preserving a neutral position between our brethren of the North and of the South. We have violated no right of either section. We have been loyal to the Union. The unhappy contest between the two sections has not been commenced or encouraged by us, although we have suffered from it in the past. The impending war has not come by any act or any wish of ours. We have done all we could to avert it. We have hoped that Maryland and other border slave States, by their conservative position and love for the Union, might have acted as mediators between the extremes of both sections, and thus have prevented the terrible evils of a prolonged civil war.

The majority of the Committee on Federal Relations, to whom had been referred a memorial of 216 voters of Prince George's County, praying the Legislature, if in its judgment it possesses the power, to pass an ordinance of secession without delay, reported that in their judgment the Legislature did not possess the power to pass such an ordinance, and that the prayer of the said memorialists cannot therefore be granted. The minority reported favorably to the prayer of the petitioners. On the question to substitute the minority report for that of the majority, it was rejected; ayes, 13—noes, 53. This was considered as settling the question against any constitutional power on the part of the Legislature to pass an act of secession.

The change in public sentiment was very rapid. Soon after the disturbances in Baltimore, the determination became strong to stand by the Government and its laws, without meaning thereby to endorse the President or his policy. The 13th of June was designated by the Governor as the day for the election of the members of Congress to represent the State at the extra session.

The Commissioners appointed by the Legislature to wait upon President Lincoln, submitted a report to that body on the 6th of May, in which, after stating that they were courteously received by the President, and had represented to him the sense of the Legislature of Maryland in relation to the occupation of a portion of the soil of that State by the Federal troops, they proceed to say:

"Full explanations were exchanged between the undersigned and the Secretary of War and Secretary of State, who were present, and participated in the discussion, as to the facts and circumstances that rendered necessary the extraordinary incidents accompanying the passage of Federal troops through Maryland en route to the city of Washington, and especially in reference to those acts of the authorities of the city of Baltimore which arrested the progress of the troops by the railroads leading from Pennsylvania and Delaware into Maryland, and of the opposition to the landing of the troops subsequently at Annapolis by the Governor of the State. And in connection with this action of the authorities of the State, the hostile feeling manifested by the people to the passage of

these troops through Maryland was considered and treated with entire frankness by the undersigned, who, while acknowledging all the legal obligations of the State to the Federal Government, set forth fully the strength of sympathy felt by a large portion of our people for our Southern brethren in the present crisis. Although many of the incidents and circumstances referred to, were regarded in different lights by the undersigned and the Federal Government, even to the extent of a difference of opinion as to some of the facts involved, yet in regard to the general principle at issue, a concurrence of opinion was reached. The President concurred with the undersigned in the opinion that so long as Maryland had not taken, and was not about taking, a hostile attitude to the Federal Government, that the exclusive military occupation of her ways of communication, and the seizure of the property of her citizens, would be without justification; and what has been referred to in this connection, so far as it occurred, was treated by the Government as an act of necessity and self-preservation.

"The undersigned did not feel themselves authorized to enter into any arrangements with the Federal Government, to induce it to change its relations to the State of Maryland, considering it proper, under the circumstances, to leave the entire discretion and responsibility of the existing state of things to that Government, making such representations as they deemed proper, to vindicate the moral and legal aspects of the question, and especially insisting on its obligation to relieve the State promptly from restraint and indignity, and to abstain from all action in the transportation of troops that can be regarded as intended for chastisement or prompted by resentment.

"The undersigned are not able to indicate to what extent or to what degree the Executive discretion will be exercised in modifying the relations which exist between the State of Maryland and the Federal Government, and in the particular matter of the commercial communications between the city of Baltimore and other parts of the country, brought to the attention of the General Assembly by the Mayor and City Council of Baltimore. But they feel authorized to express the opinion that some modification may be expected."

In the Legislature, stay laws were passed, also an act to relieve the Governor and Mayor of Baltimore, and all acting under their orders, from prosecutions, on and after the 19th of April.

The Governor replied to a call for information by the Legislature, "if he consented to or authorized the burning of the bridges on the Baltimore and Harrisburg, and Baltimore and Philadelphia Railroads," that he "neither authorized nor consented to the destruction of the bridges, but left the whole matter in the hands of the Mayor of the city of Baltimore, with the declaration that he had no authority in the premises; I was a lover of law and order, and

could not participate in such proceedings." The Mayor of Baltimore stated that the assent of the Governor was unequivocal; to this is added certificates of the Marshal and Police Commissioners.

The House passed, by vote of ayes 43, noes 12, a series of strong resolutions, condemning the war and the military occupation of the State.

On the 14th both Houses adjourned, to meet again in the city of Frederick, on the 4th of June. They previously adopted, as a compromise, a resolution providing for a committee of eight members, (four from each House,) to visit the President of the United States and the President of the Southern Confederacy, and to lay before them the report of resolutions of the Committee of the Legislature on Federal Relations. The manner in which this committee discharged their duties was reported at the next session. On the 5th of June, the four members of the committee on the part of the House, submitted their report, in which they say:

"The manifest purpose of those resolutions was, in the opinion of your committee, to secure, if possible, through the instrumentality of Maryland, peace to our disturbed country; and if failing in that, then a cessation of hostilities on the part of the armies of the Federal and Confederate troops until Congress should express its opinion on the subjects which now agitate the people. The purposes being defeated by the movement of Federal troops in Virginia, and an actual commencement of hostilities, we have considered our mission as ended, and therefore have not felt authorized, on the part of the sovereign State of Maryland, to present a request which has in advance been repudiated. The dignity of the State as well as self-respect seemed to demand this of us."

The Commissioners appointed to visit President Davis, received from him a letter. (*See CONFEDERATE STATES.*)

Nothing was done to make any change in the state of affairs at this session. The movement of Virginia State troops to Harper's Ferry and upon the Maryland side of the river, led to the concentration of Union forces in their neighborhood. A kind of border warfare took place, which, although not marked by any large or vigorous skirmishes, was, nevertheless, for months destructive to the peace and prosperity of the inhabitants. Forces moved from Chambersburg, in Pennsylvania, to the neighborhood of Harper's Ferry. Western troops, under Gen. McClellan, with many brilliant skirmishes, advanced to Cumberland. The transportation of the Baltimore and Ohio Railroad was entirely suspended, and great destruction was made of their property. This state of affairs continued throughout the year.

When the destruction of the railroad and of the Chesapeake canal property commenced, the principal officer of the latter corporation visited the Confederate camp at Harper's Ferry, to en-

deavor to stop it. He reached Dam No. 4, near Williamsport, while a skirmish was going on between the Marylanders and the Virginians—the latter endeavoring to destroy the dam, and the former to defend it. He crossed the river under a flag of truce, and demanded to be taken to Harper's Ferry. An escort of twelve men was furnished, who conducted him to Gen. Johnston, the commander of the Confederate forces. He remonstrated against the destruction of the dams, boats, and other property of the company, claiming that they were the property of Marylanders, and should be exempt from seizure and destruction. Gen. Johnston replied that his orders were positive to destroy all property that could in any way be made to benefit the United States forces, and that it was useless to talk of the property belonging to Maryland. He should therefore obey his instructions, and destroy every thing that he could reach.

The election for members of Congress, early in June, was a complete triumph for the friends of the Union. Not an advocate of the Southern Confederacy was elected throughout the State.

The movement of troops, as already stated, from Chambersburg, in Pennsylvania, towards Harper's Ferry, took place early in June, and on the 18th, the force arrived at Hagerstown and Williamsport, comprising the Pennsylvania First, Second, Third, Seventh, Eleventh, Thirteenth, and Twenty-fourth Regiments, together with the First Rhode Island, two regiments of U. S. Regulars, and seven hundred U. S. Cavalry. The next day, a division of the troops under Gen. Cadwallader was ordered across the Potomac, and pressed forward towards Martinsburg.

The Legislature continued to hold short sessions, adjourning from time to time. At the session ending June 25, an effort had been made to pass an act of amnesty for the benefit of those who participated in the riot of April 19th. The following is a section of this act:

Sec. 1. *Be it enacted by the General Assembly of Maryland, That all the courts, public officers, and Grand Jury, are hereby forbidden to prosecute or punish any person concerned in the aforesaid affray with the soldiers in the City of Baltimore on the 19th of April last, or for any offence arising from or growing out of said affray, or in any way connected therewith.*

It failed to pass. A joint resolution was, however, passed, directing the Governor to return the State arms to the companies that he had disarmed, also a bill to suspend proceedings on the bonds of officers of companies for the return of arms.

The Legislature again assembled, after adjournment, on the 31st of July. In the Senate a preamble and resolution was offered setting forth that, in view of the almost unanimous declaration of Congress, that the present war was not being waged to subjugate the South, but only to assert the supremacy of the Constitution, the people of Maryland ought not to heed the in-

temperate declarations of a few members, but ought to maintain the position of the State in the Union, and should discountenance rebellion in all its forms. This proposition was laid over.

No measures of importance to the State were adopted, nor did the session serve any other purpose than tend to keep alive the spirit of dissatisfaction. An adjournment soon took place until the 17th of September. The session was prevented at that time by the military arrest of some secession members of the House, (*see HABEAS CORPUS*), and the refusal of the Senate to assemble. This high proceeding of arresting by military force, members of a legislative body, would, at any other time and under any other circumstances, have been regarded as a most flagrant offence. In this case, the Union members were doubtless gratified, and returned to their homes, while public sentiment had inclined to the side of peace and Union. None, therefore, espoused the cause of the prisoners.

The views of the President at the time, relative to these arrests, were understood to be to the following effect :

"The public safety renders it necessary that the grounds of these arrests should at present be withheld, but at the proper time they will be made public. Of one thing the people of Maryland may rest assured : that no arrest has been made, or will be made, not based on substantial and unmistakable complicity with those in armed rebellion against the Government of the United States. In no case has an arrest been made on mere suspicion, or through personal or partisan animosities, but in all cases the Government is in possession of tangible and unmistakable evidence, which will, when made public, be satisfactory to every loyal citizen."

The usual State election for Governor took place on the 6th of November. A Union candidate and a State rights candidate were offered for the choice of the voters, when the former was elected by an unusually large majority, and the candidates of similar views, for other offices, were elected by about the same majority. This was regarded as such an overwhelming victory for the Union, that all open movements of sympathy for the Confederate States ceased.

The Governor then issued a proclamation, calling the Legislature of the State to assemble in extra session, at Annapolis, on the 3d of December. In his proclamation he said, that "as the people of the State had at their recent election again expressed their unalterable devotion to the Union and the Government of our fathers, it is important that the Legislature should, as speedily as possible, conform to and carry into effect the will of the people so expressed, by furnishing all necessary aid to the Government of the United States in its efforts to suppress the unholy insurrection that seeks the dissolution of that Union and the destruction of that Government." He therefore called this extra session, "to consider and determine the steps necessary to be taken to enable the State

of Maryland to take her place with the other loyal States, in defence of the Constitution and Union."

This newly elected Legislature assembled at Frederick, on the 3d of December. The Governor, Hicks, in his final Message, delivered on the same day, presents an explicit statement of affairs in the State during the year. The action of the last Legislature is thus described :

The history of that Legislature is before the country. Not only did it fail to do its duty, as representing a loyal State, but it actually passed treasonable resolutions, and attempted to take, unlawfully, into its hands both the purse and the sword, whereby it might plunge us into the vortex of secession. It was deterred from doing this latter only by the unmistakable threats of an aroused and indignant people.

Restricted in the duration of its sessions by nothing but the will of the majority of its members, it met again and again ; squandered the people's money, and made itself a mockery before the country. This continued until the General Government had ample reason to believe it was about to go through the farce of enacting an ordinance of secession ; when the treason was summarily stopped by the dispersion of the traitors.

Inasmuch as the Legislature in ordinary times is presumed to represent the people of a State, the treasonable action of the late Senate and House of Delegates has apparently placed Maryland in an attitude of hostility to the General Government, and her Union-loving people in a false and unwarrantable position. I say apparently, because the votes of the people on the 13th of June, and again on the 6th of November, have declared in the most emphatic tones, what I have never doubted, that Maryland has no sympathy with rebellion, and desires to do her full share in the duty of suppressing it.

Under the tax bill passed at the session of Congress in July, the proportion of Maryland was \$436,000, which it was proposed that the State should assume.

In consequence of the omission of the Legislature, to provide money to pay the expense of recruiting and equipping the quota of troops required from the State by the Federal Government, that number was not raised.

Although a portion of the northwestern part of the State was occupied by Federal troops after the month of June, yet the Governor, in his Message, says :

"I congratulate you, and the people of the State, upon the immunity we have enjoyed from the dreadful evils which have fallen upon some of the other States. While carnage and desolation have stalked through Virginia, Kentucky, and Missouri, we here, in Maryland, have had no battle-fields, no wanton destruction of homes, no outrages upon helpless women and children. True, in every section of the State, rancor and deadly hatred, and in some cases even judicial persecution, have been openly indulged against those whose only offence is loyalty to the Government. But this hatred, bitterness, and persecution have not yet culminated in bloodshed. The tread of hostile armies has not interfered with the calling of the husbandman, but the earth has yielded more bountifully than ever before."

The only invasion of Maryland which took place, from the Confederate States, was made

by the first Virginia troops which marched to Harper's Ferry. This force crossed the Potomac and took a position on the heights on the Maryland side. A protest was immediately made by Governor Hicks to Governor Letcher, of Virginia, and the troops were at once ordered to withdraw to the Virginia side of the Potomac.

The commercial affairs of the State suffered the same embarrassment and decline which prevailed through all the Northern States.

MASSACHUSETTS, one of the six New England States, was one of the original thirteen of the Union. It has a general surface 150 miles long by 50 broad, although the eastern end spreads out nearly 90 miles, and shoots out a long tongue of sand bank into the ocean. On the north are the States of New Hampshire and Vermont; on the west, New York; and on the south, Connecticut and Rhode Island. It has an area of 7,800 square miles, and is between 41°15' and 42°52' north latitude, and 69°50' and 73°30' west longitude. It has a population more dense than most of the States, and although naturally one of the least favored soils, yet its wealth is greater per head than that of any other State in the Union. Its manufacturing and commercial industry has, under protective tariffs, found ample and remunerative home markets in all the other States of the Union, and its wealth has accumulated in an unparalleled manner. The energy of its people has been conspicuous from the earliest times, and always made itself felt in the councils of the nation. The population has increased as follows:

1790.....	378,717	1840.....	737,699
1800.....	423,345	1850.....	994,514
1810.....	472,040	1855.....	1,132,599
1820.....	523,287	1860.....	1,231,697
1830.....	610,408		

The manufacturing wealth of Massachusetts is very large. The productions enumerated in the State census for 1855, show nearly \$300 per head per annum for each inhabitant.

The distribution of these manufactures by counties is as follows, as compared with the population and taxable valuations in 1860:

	1855.		1860.	
	Population.	Amount of Manufactures.	Population.	Taxable Valuation.
Barnstable...	35,442	\$3,092,442 11	36,010	\$12,621,201
Berkshire...	52,791	12,756,264 99	55,186	24,186,692
Bristol.....	87,425	29,328,874 18	98,811	66,994,256
Dukes.....	4,401	762,282 20	4,401	2,908,194
Essex.....	151,018	39,843,019 74	165,635	84,687,537
Franklin....	31,655	5,033,250 84	31,499	12,448,961
Hampden....	54,852	12,120,444 68	57,392	26,252,663
Hampshire..	35,485	7,022,878 84	37,977	17,787,649
Middlesex..	194,042	58,205,633 71	216,484	135,458,009
Nantucket..	8,064	1,608,800 03	6,097	3,875,598
Norfolk....	94,445	24,244,054 53	108,165	85,805,500
Plymouth...	61,513	12,844,702 05	66,734	29,160,937
Suffolk.....	171,818	48,188,956 32	192,768	801,201,107
Worcester...	149,545	40,719,627 78	159,644	73,413,160
Total.....	1,132,599	295,520,632 00	1,231,803	\$76,602,264

The construction of railroads wrought a great change in the internal commerce as well as in

the manufactures of Massachusetts. They not only offered the means of cheap conveyance of materials to the best factory sites, but also brought away the goods to market at low rates, while they afforded the cheap and easy means of circulating labor. Their extended lines also placed Massachusetts in connection with the most remote sections of the Union on terms as favorable as those enjoyed by any other State. They thus concentrated her energies to produce and at the same time extended the market for the sale of goods.

The returns of railroads of Massachusetts for the year 1861 were as follows:

Length of roads, in miles.....	1,530.60
“ double track, “	342.77
“ branches, “	153.28
Capital paid in	\$49,367,606.02
Debt.....	18,798,035.53
Cost of roads, &c., equipments	63,272,801.71
Number of miles run.....	6,369,474
“ passengers carried.....	11,252,621
“ tons freight.....	3,521,299
Total income.....	\$9,016,149.12
Expense, working.....	5,380,004.04
Interest.....	746,389.14
Net income	2,916,411.80
Dividends, rent, etc.....	2,524,519.22

Thus over \$63,000,000 have in Massachusetts been expended in those means of communication, and the outlay itself yields a handsome interest, while it has been the means of increasing the State wealth in a much larger ratio.

The manufacturing industry seems to have absorbed all others. The agriculturists have apparently migrated from the State, while manufacturing labor has been supplied by immigration from abroad; nevertheless, the agricultural interests of the commonwealth have been highly prosperous during the year 1861. Their products are estimated as exceeding thirty-two millions of dollars. The season was propitious, and the crops, with few exceptions, were abundant and profitable. The census of 1850, which gave the nativities of the people, disclosed the following facts in relation to Massachusetts:

Natives of Massachusetts living in Massachusetts..	695,236
Foreigners living in Massachusetts.....	299,278
Total population.....	994,514
Natives of Massachusetts living in other States...	199,582

How many natives of Massachusetts there are living in foreign countries is not known. But only three-fourths of all born in the State are living in it.

The amount of taxable property is large, but official investigation shows that about \$150,000,000 eludes assessment. Hence the real amount is, in round numbers, one thousand millions, or an average of \$811 for every soul in the State. The average in New York is less than \$400. In other words, while Massachusetts has 4 per cent. of the whole white population of the Union, she has 10 per cent. of the taxable wealth, a state of things which strongly illustrates the thrift of her people under Federal

laws, which have given them the monopoly of manufacturing for the agricultural sections.

In politics Massachusetts, always strongly whig, is more decidedly republican. The vote at the last presidential elections was as follows:

In 1856, Fremont had 108,518 votes. Mr. Fillmore, 19,679, and Buchanan, 39,287. Mr. Lincoln had 2,000 less votes than Mr. Fremont, and the three Union candidates had together 3,700 more than Buchanan and Fillmore, united. This decline in the republican vote would seem to be due to the apprehensions of approaching troubles, which the canvass developed. The views under which the canvass was conducted, are manifested in the speech of W. H. Seward, in Bowdoin Square, Boston, August 14. He was attended by Gov. Banks, C. F. Adams, and Henry Wilson. In the course of his remarks he stated: "Here I can play no part; I can affect no disguise; because, although not a son of Massachusetts, nor even of New England born, I feel and know it my duty to confess that if I have ever studied the interests of my country and of humanity, I have studied them in the school of Massachusetts. If I have ever conceived a resolution to maintain the rights and interests of these free States in the union of the Confederacy, I learned it from Massachusetts. It is twenty-two years ago, not far from this season, when a distinguished and venerable statesman of Massachusetts had retired to his home, a few miles in the suburbs of your city, under the censure of his fellow-citizens, driven home to his quarters by the peltings of remorseless pro-slavery people, that I, younger then, of course, than I am now, made a pilgrimage from my own home, which was not molested on my way, to the Sage of Quincy, there to learn from him what became a citizen of the United States, in view of the deplorable condition of the intelligence and sentiment of the country under its demoralization by the power of slavery. And there I received, and thence I have derived, every resolution, every sentiment, that has animated and inspired me in the performance of my duty as a citizen of the United States, all this time. I know, indeed, that those sentiments have not always been popular, even in the State of Massachusetts. I know that citizens of Massachusetts, as well as citizens of other States, have attempted to drive the disciples of that illustrious teacher from their policy. But it is to-night that I am free to confess that whenever any man, wherever he might be found, whether he was of Northern or Southern birth, whether he was of the 'solid men of Boston,' or of the light men of Mississippi, has assailed me for the maintenance of these doctrines, I have sought to commune with his spirit, and to learn from him whether the thing in which I was engaged was well and worthily done. What a commentary upon the wisdom of man is given in this single fact, that fifteen years only after the death of John Quincy Adams, the people of the United

States, the people who hurled him from power and from place, are calling to the head of the nation, to the very seat from which he was expelled, Abraham Lincoln, whose claim to that seat is that he confesses the obligation of that higher law which the Sage of Quincy proclaimed, and that he avows himself, for weal or woe, for life or death, a soldier on the side of freedom in the irrepressible conflict between freedom and slavery. This, gentlemen, is my simple confession. I desire, now, only to say to you that you have arrived at the last stage of this conflict before you reach the triumph which is to inaugurate this great policy into the government of the United States. You will bear yourselves manfully. It behooves you, solid men of Boston, if you are here, and if the solid men are not here, then the lighter men of Massachusetts, to bear onward and forward, first in the ranks, the flag of freedom. But let not your thoughts or expectations be confined to the present hour. I tell you, fellow-citizens, that with this victory comes the end of the power of slavery in the United States. I think I may assume that a democrat is a man who maintains the creed of one or the other branch of the democratic party at the present day. Assuming that to be so, I tell you, in all sincerity, that the last democrat in the United States is born."

The results of the election were celebrated in Boston on the 9th of November, and the meeting was addressed by Gov. Andrew and others. The Governor distinctly declared that success at the election was the first step towards carrying out the anti-slavery programme, which had been announced.

On the 3d of December a meeting in honor of John Brown was called at the Tremont Temple by the leading partisans of his principles. This aroused the indignation of the citizens, and it was broken up. The Unionists in the hall passed the following resolution:

Resolved, That the people of this city have submitted too long in allowing irresponsible persons and political demagogues of every description to hold public meetings that disturb the public peace, and misrepresent us abroad; that they have become a nuisance which, in self-defence, we have determined shall henceforward be summarily abated.

A confederacy of the New England States as opposed to the Southern Confederacy was immediately projected, and plans emanating from Washington, were put in activity. January 5, 1861, Gov. Andrew despatched agents to Maine, Vermont, and Rhode Island, to present to the Executives of those States certain documents concerning the expediency of placing the militia of those States in condition for a prompt movement to the defence of the city of Washington, if a call should be made for troops for that purpose;—and also, (at the request of responsible gentlemen in Washington,) concerning organizing a national celebration of the anniversary of January 8th.

The agent sent to Maine and New Hampshire was A. G. Browne, jr., afterwards military sec-

retary to Gov. Andrew; and the Vermont agent was David W. Wardrop, of New Bedford, colonel of the first regiment detailed for service on the fall of Fort Sumter. At the same time, the first week in January, that these agents were despatched to the New England States, the volunteer militia of the State began active drilling nightly in their several armories. There were 5,000 men thus drilling; of them 3,000 were armed with the Springfield rifle musket, and the adjutant-general sent to the War Department for permission to draw 2,000 more rifled muskets from the Springfield armory in advance of the annual quota.

It would seem from the fact that Massachusetts could only at first arm 3,000 men, and was many months getting 10,000 into the field, that she was but little better prepared than the other Northern States for war; yet her usual vigor and energy finally triumphed over all obstacles, and she fully met the demands upon her for troops.

It is remarkable that on the same day on which the five commissioners to the peace conference were voted in the Massachusetts Legislature, Feb. 7, military orders were promulgated to the 1st division to hold itself ready for immediate service at the national capital.

Lieutenant-Colonel Harrison Ritchie, of my personal staff, said Governor Andrew, was sent by me to Washington, for the purpose of consulting with the General-in-Chief of the Federal army, and with other officers, civil as well as military, with reference to the despatch of troops by this Commonwealth for the defence of the City of Washington, in event of any emergency which would render the employment of militia for that purpose desirable. It is not deemed expedient to insert in this communication the report made by Colonel Ritchie of his mission. It is sufficient to state, that a satisfactory understanding was established with the General-in-Chief, and an arrangement effected, according to which, if it should be found necessary to despatch our troops, and their way between Philadelphia and Baltimore should be obstructed over land, they should be directed upon Baltimore by sea (landing under cover of its forts,) or upon Annapolis and from thence to Washington.

Thus the troops were drilled and equipped, and ready to start at a moment's notice. The Massachusetts Senators at Washington were persevering in urging upon the President the services of the Massachusetts men. When the expedition to Fort Sumter resulted in hostilities, Senator Wilson immediately telegraphed to Governor Andrew to send twenty companies to Washington. In the course of the same day the formal requisition of the department was received, and Col. Wardrop, at New Bedford, of the 3d Regiment, Col. Jones, at Lowell, of the 6th, Col. Packard, at Quincy, of the 4th, and Col. Munroe, at Lynn, of the 8th, were ordered to muster on the Common forthwith, and they appeared on the following day. On the 16th they began to arrive in Boston. The first companies came from Marblehead on the evening of the 15th, which was the same day the proclamation was issued. This town has the reputation of sending the first troops to Cambridge,

in 1775. Other companies arrived by the various railroads, all with full ranks. The excitement in the several towns whence they came was intense. The friends and neighbors of the soldiers in many instances raised \$1,000 and \$2,000 for the benefit of their families. They were cheered as they left home, and frequently addressed by clergymen, ex-governors, ex-members of Congress, and others. The general feeling expressed was that civil war with all its horrors was preferable to anarchy. On the 16th Senator Wilson again telegraphed for a brigade of four regiments. On the 17th Col. Wardrop with 11 companies, 8d Regiment, was ordered immediately to Fortress Monroe, followed by Col. Packard with the 4th. Col. Jones with 13 companies, comprising the 6th Regiment, was ordered to Washington forthwith via New York. This regiment was attacked in Baltimore, April 19, the anniversary of the battle of Lexington, 1775. On the receipt of the news in Boston, April 19th, of the attack on the military at Baltimore, the populace became almost frantic. The workmen left their shops and factories in their shirt sleeves and congregated in crowds, resolving to avenge the wrong at all cost. Bodies of men from all ranks were organizing and preparing to leave at the earliest moment, determined to redress the outrage with their lives.

On the 20th of April, F. B. Crowninshield was despatched to Europe to purchase 25,000 stand of arms, and was furnished with a credit of \$250,000 for that purpose. There were expended \$251,339 for English Enfield rifles, and \$23,617 for infantry equipments. The remainder of a sum of \$562,488 was expended. The balance was made up of American infantry equipments, ordnance, ordnance stores of every description, and wagons and caissons for the battery companies, freight, repairs, and the like. All regiments and companies, whether of infantry or artillery, both for three months and for three years service, furnished by the State to the General Government, with the exception of one battery, received all their armament from the Commonwealth. The horse equipments and sabres for cavalry were received from the United States. Of the troops in the three years' service, 14 regiments were armed with the Enfield rifled musket, 4 with the Springfield rifled musket, and 5 with the Springfield smooth-bored musket. The 15th and 21st regiments were at first provided with smooth-bores, which were afterwards replaced by rifled arms.

Massachusetts also loaned 2,000 Springfield guns to arm Western Virginia.

The State made a further contract for 5,000 Enfield rifles, of which 320 arrived before the affair of the Trent caused the interdict of the Queen of England against the further export of arms.

The troops continued to move forward rapidly, and 6 regiments three-months men, numbering 3,736, were up to the 3d of May forwarded.

At that date the President called for three-years volunteers. Of these there were forwarded 26,175 during the year, (of whom 4,337 only were from Boston and neighborhood,) making 30,736 men in addition to 2,900 Massachusetts men in independent and other organizations. There were also 11,000 men enlisted in the navy. From this number are to be deducted 1,622 men of other States enlisted in Massachusetts regiments. The following are the three-months regiments:

Regiments.	Colonels.	Men.
3d Infantry.....	D. W. Wardrop	444
4th "	A. B. Packard	636
5th "	S. C. Lawrence	823
6th "	E. F. Jones	685
8th "	T. Munroe	711
3d Rifles.....	Major C. Devens.....	322
Battery.....	A. M. Cook	115
Total.....		3,736

These were from every county in the State, Boston furnishing 352 men.

The three-years men were as follows:

Regiment.	Colonels.	Places.	Left.
1st.....	Rob. Cowdin	Boston.....	June 15
2d.....	S. H. Gordon	"	July 11
7th.....	J. H. Wheelock	"	July 8
9th.....	Thos. Cass	"	June 24
10th.....	Henry S. Briggs.....	Pittsfield	July 25
11th.....	W. Blaisdell	Boston.....	June 24
12th.....	Fletcher Webster.....	Marshfield.....	July 23
13th.....	S. H. Leonard.....	Boston.....	July 30
14th.....	W. B. Green.....	Haverhill	Aug. 7
15th.....	Charles Devens.....	Worcester	Aug. 8
16th.....	P. T. Wyman.....	Boston.....	Aug. 17
17th.....	T. C. Amory.....	U. S. A.	Aug. 23
18th.....	J. Barnes	Springfield.....	Aug. 24
19th.....	E. W. Hink.....	Lynn.....	Aug. 28
20th.....	W. R. Lee.....	Roxbury.....	Sept. 4
21st.....	A. Morse	Leominster	Aug. 22
22d.....	J. A. Gore	Concord, N.H.	Oct. 8
23d.....	J. Kurtz	Boston.....	Nov. 11
24th.....	J. G. Hevemer.....	N. York.....	Dec. 9

1st Battery.....	J. Porter.....	"	Oct. 3
2d "	O. F. Nims.....	"	Aug. 8
3d "	A. P. Martin.....	"	Oct. 7
4th "	C. H. Murray.....	"	Nov. 23
5th "	M. Eppendorf.....	"	Dec. 25

Thus, previous to the battle of Bull Run, Massachusetts had supplied but four regiments of three-years men to the war, notwithstanding the urgency with which the troops had been pressed upon the War Department early in January, and drilling and arming had been extensively carried on at a time when conciliation was generally attempted. In the same period of time, viz., from May 19 to July 12, New York had sent forward 42 regiments, 36,000 men.

The Massachusetts Legislature met in the first week in January, and Gov. Banks, in his valedictory address, Jan. 3, 1861, dwelt long on the importance of repealing the personal liberty bills, on account of their unconstitutional character, but repelled the idea of peaceable secession.

Gov. Andrew, in his Message to both Houses, sustained the personal liberty bill.

The Massachusetts Senate, Jan. 15, passed a resolution endorsing Mr. Buchanan's position in his last annual Message. In the House, on the same day, resolutions were passed by unanimous vote, tendering to the President aid in men and money to support the Federal authority, and declaring that the State of South Carolina had committed acts of war. A bill also passed to increase the volunteer military of the State.

Jan. 19, resolutions were passed establishing the office of Private Military Secretary to the Governor, and Mr. Brown, the agent to Maine for a military confederacy, was appointed.

Jan. 24, the Senate Committee on Federal Relations reported that a law to prevent search for runaway slaves in Massachusetts would be in violation of the Constitution of the United States. The same committee reported that the militia laws of the commonwealth were in conformity with the Federal laws.

The Committee on Federal Relations voted to report leave to withdraw on the several petitions for a law against slave-hunting in Massachusetts.

An order was introduced in the House looking to the enactment of laws for the protection of citizens travelling in the States, which was referred.

Gov. Andrew sent in a Message to the House enclosing a communication from Col. Jones, of the Sixth Regiment, tendering the services of the regiment to the Government; also, a similar offer from Major-General Sutton and staff. The light artillery, National Lancers, and numerous other efficient military corps of the city and State, voted nearly unanimously to respond to a call for active service.

April 5, the House of Representatives unanimously passed a resolution on the petition of fifty-four mercantile houses trading with Hayti, instructing the Massachusetts Senators and Representatives in Congress to use their influence to obtain the recognition of Haytian independence.

The Rhode Island boundary question, which had been pending many years, was settled, finally, by the adoption of a new line, which transfers Pawtucket and part of Seekonk, Mass., to Rhode Island; and Fall River, R. I., to Massachusetts.

On the 24th of January, amidst the public anxiety, the Massachusetts Anti-Slavery Society announced its annual sittings in the Tremont Temple, where the John Brown meeting had been attempted. This it was declared would not be suffered, and the aid of the Mayor was invoked. The Mayor replied that "he knew nothing of the character of the meeting, or of the threats to 'summarily abate such assemblies as a nuisance,' but if the originators of the meeting and the trustees of the Tremont Temple thought that any thing would be said during the sessions against the Government, or likely

to peril the peace of the city, they would be responsible for any disturbances which might follow!" He also said that "since in the present excited state of the public mind, it was evident an anti-slavery meeting could not be held in Boston without serious and perhaps violent opposition, we ought not to hold one; and if it was held, and such opposition was provoked, he should arrest those who called and conducted the meeting, as the aggressors upon the public peace!"

There was an attempt to hold the meeting, and Mr. Wendell Phillips began to speak amidst great uproar, and the Mayor finally closed the place. About 200 citizens went to the house of Phillips, in Essex street, with the design to destroy it, but it was protected by the police.

An attempt was made in the Legislature in consequence, to take from the Mayor the control of the police, and place it with the Governor, but the attempt failed.

The Tremont Temple, the Melodeon, and the rooms in the Mercantile Library Building, were refused to the Anti-Slavery Society for its annual May meeting.

In February, petitions from Boston with 22,000 signatures in favor of the Crittenden compromise were forwarded to Washington.

February 5, the Governor of Massachusetts appointed seven commissioners to the convention at Washington, in accordance with the action of the Legislature. An immense Union meeting was held at Faneuil Hall by all parties, and the most extraordinary earnestness for the preservation of peace was manifested. Resolutions were passed appealing to the Border States to remain faithful, and conceding the equal rights of the States in the territories of the United States, and approving of the Crittenden compromises. A meeting was held at the Board of Trade rooms in favor of a petition for compromise, which was as follows:

Your memorialists humbly pray that such measures may be speedily adopted by Congress for the pacific settlement of our present difficulties, as will embrace substantially such a plan of compromise as may be deemed expedient to restore tranquillity and peace to our distracted country.

This was signed by an immense number of names. Similar petitions were largely circulated, and in some cases obtained as many local names as there were voters. A committee, composed of Ed. Everett, R. C. Winthrop, Chief-Justice Lemuel Shaw, E. S. Toby, Amos A. Lawrence, the Union candidate for Governor, C. L. Woodbury, went to Washington with the Union memorial of the city to Congress, and on the 29th it was presented to that body. It contained 14,127 signatures of legal voters. The vote of the city at the last election had been 19,000. Two days were required to obtain the signatures, which were those of persons of all political parties. The petition was carried to the clerk's desk, enveloped in the flag of the Union, amid the applause of a large number of the representatives and of the spectators.

The Legislature adjourned April 13, the day of the attack on Fort Sumter, having been in session 100 days. The events which immediately followed, made an extra session necessary, and it was convened May 14. A law was passed, May 21, creating a sinking fund to redeem the war debt by applying to it moneys that may be received from the United States, and a tax of one-tenth per cent. of the balance over such sums.

On the same day was passed an "act for the maintenance of the Union and the Constitution." This ratified the proceedings of the Governor in relation to the war, and invested him with power to arm, equip, and officer troops, and fix their rank and pay, and to adjust accounts with the United States. It created the "Union Fund," and authorized the issue of \$3,000,000 in scrip, bearing 6 per cent. coupons, payable after 10 years or at 30 years.

A supplemental act empowered the Governor to issue scrip for \$7,000,000 6 per cent. to be loaned to the United States, and expended in treasury notes.

On the 23d was passed an act "in aid of the families of volunteers." It empowered towns and cities to raise money for soldiers' families. A bill for organizing the home guard was also passed.

On the 23d the Legislature adjourned. Many of the members made a donation of their pay to the volunteer fund, and the session closed by singing the "Star-Spangled Banner," and other patriotic songs.

Sept. 30, over \$1,200,000 were bid at and above par for the new Massachusetts 6 per cent. State loan for \$1,000,000.

The Republican State Convention, fully attended, was called to order at Worcester, Oct. 1. Gov. Andrew was nominated by acclamation. The resolutions adopted declared that the maintenance of the Constitution transcends any other question, and demands the life and property of all citizens; expressed a desire for the union of all the friends of the country against its pretended friends and open enemies; declared that no rights secured to loyal citizens shall be endangered, and that disloyal citizens have no rights adverse to those who are loyal; approved the acts of the Administration; recognized the devotion of the volunteers; endorsed the acts of Governor Andrew, and recommended the exercise of great care in nominating subordinate officers.

Resolutions were also offered, declaring that the people of the State would rejoice, when the time should come, in the wisdom of the Government, to remove slavery, and to free all slaves within the lines of the Federal armies, compensating loyal owners.

This resolution was laid on the table, and the motion to adjourn was carried without acting upon it.

The vote at the election for Governor was:

1860.....	Andrew, 104,527;	opposition, 65,007
1861.....	" 65,261;	" 31,264

On the 24th of November the San Jacinto

arrived with Messrs. Mason, Slidell, and suite, who were incarcerated in Fort Warren. A committee of the city government waited on Commander Wilkes, who was entertained at the expense of the city.

There are in Massachusetts some 250 joint stock companies for different manufacturing purposes. The capital of these in 1861 was \$16,055,800, and paid in \$12,387,651.36.

The receipts and expenditures of the treasury of the State of Massachusetts for 1861 were :

Cash, January 1, 1861	\$154,841.53
Revenue receipts	1,133,986.08
	<hr/> \$1,298,827.56
Ordinary expenses	1,163,742.56
	<hr/> \$135,085.00
Cash, December 31, 1861	
Received for several funds :	
Union fund loan	\$2,217,500.00
Sale of State scrip	300,000.00
From U. S. reimbursements	984,376.00
Emergency fund	3,201,547.00
	<hr/> \$6,708,423.00
Total military	1,141,375.00
Other expenses	
	<hr/> \$7,844,798.00
Arming troops	3,343,694.41
Repaid banks	2,780,500.00
Sinking fund	984,376.15
Other expenses	631,302.44
	<hr/> \$7,739,933.00
Cash on hand	104,865.00

MATTHIAS POINT, on the south or right bank of the Potomac, was early made the site for a battery by the Confederate troops. It is about fifty miles below Washington and is formed by a change in the course of the river suddenly to the northward, thence sharply to the south. The channel of the river is within the range of ordinary cannon from the point.

It was here that Capt. James H. Ward, of the gunboat Freeborn, was killed, on the 27th of June. A landing was made in the morning, and the Confederate pickets driven in by Lieut. Chaplin with two boats' crews from the Pawnee and one from the Freeborn, containing between thirty and forty men.

Finding preparations for the erection of a Confederate battery there, it was determined to throw up breastworks and mount guns thereon to give the enemy a warm reception, should they attack the crews, who were about to clear the point by cutting down the woods. Accordingly, the men were set to work, under cover of the Freeborn's guns, at throwing up a sand-bag breastwork, and succeeded in working four hours and a half, and got their works completed about five in the evening. They then went to the boats to go on board for guns to mount on the work, when, as they were embarking, they were surprised by the Confederates, estimated at one thousand strong, who poured in a heavy and continuous fire of musketry upon them from the bushes near by.

Under cover of the guns of the Freeborn the crews precipitately made for the steamer, leaving a few of the men on shore, the guns of the Freeborn meanwhile opening with activity and precision apparently upon the enemy, who were concealed by the underbrush. Some ten

shells were thrown among them, with what effect could not be seen.

Captain Ward behaved with coolness, standing by the guns and directing the fire. When his gunner received a wound in the thigh, which disabled him, Capt. Ward immediately took his place, and was sighting the gun, when he received a Minié musket ball in the abdomen, which caused his death a few hours after.

The men left on the shore by the boats in their retreat swam out to the Freeborn—one of the men carrying on his back a wounded comrade named Bess, who had four musket balls into him. Only three men of the boats were wounded, and the only life lost was that of Capt. Ward, who, the moment the enemy were discovered, blew the signal for the crews to come aboard, and instantly opened on the foe with his heavy guns.

While the crews were engaged on the breastworks, a slave approached the shore with a white flag on a pole, and getting aboard the Freeborn, informed Capt. Ward that the enemy were in the underbrush near by, one thousand strong. Still the work was continued, and made ready, as the event turned, for the Confederates to occupy it with guns.

McKENZIE, WILLIAM LYON, a Canadian politician, and leader of the rebellion in 1837, born about 1800, died near Toronto, August 26, 1861. In Dec. 1837, after the capture by the English general, Sir John Colborne, of the village of St. Eustatie had quelled the revolutionary spirit of Lower Canada, but only imparted new vigor to that of the upper province, William Lyon McKenzie, then a prominent politician and popular advocate of Upper Canada, led a body of insurgents to Toronto, and demanded from Sir Francis Head, the governor-general of Canada, his consent to the calling of a convention for the settlement of the difficulties between the people and the Government. Sir Francis refused, and the insurgents prepared to commence hostilities, but were compelled, from want of means, to retreat to Navy Island on the Niagara River. A body of 500 American sympathizers, under the leadership of Mr. Van Rensselaer, a graduate of West Point, reinforced them, and McKenzie established a provisional government, and issued a proclamation offering, in the name of the new government, 300 acres of land and \$100 to all volunteers to the army on Navy Island, and a reward of £500 for the apprehension of Sir Francis Head, the governor-general. The introduction of salutary reforms in Canada by the British Government, and the indifference and unsympathizing position of the citizens of the United States except those immediately on the border, disheartened the insurgents. McKenzie, having been arrested and held to bail in Buffalo, and subsequently having, with his little force, been cannonaded by a large force of royalists at Navy Island for several days, abandoned the island with his followers and escaped. He was not captured, though

a "true bill" was found against him. He remained in the United States for ten years, connected for a considerable time with the daily press of New York City, and at one time made himself quite notorious by the publication of a collection of private letters of some prominent political actors of the time, of which he had in some way obtained possession. In 1849 the British Government pardoned him, and he returned to Canada, where the people raised a sum sufficient to purchase him a homestead and small annuity, on which he maintained himself until his death.

McLEAN, JOHN, LL. D., an American jurist and statesman, born in Morris County, N. J., March 11, 1785, died at Cincinnati, April 4, 1861. When he was four years of age his father removed to the West and settled, first at Morgantown, Virginia, subsequently at Nicholasville, Ky., and finally, in 1799, on a farm in Warren Co., Ohio. Young McLean, at the age of 18, went to Cincinnati to study law, and entered the office of Arthur St. Clair, then an eminent lawyer. While studying his profession, he supported himself by writing in the office of the clerk of the county. In the autumn of 1807 he was admitted to the bar, and commenced practice at Lebanon, Warren Co., O. In Oct. 1812, he was elected to Congress from his district, which then included Cincinnati, by the democratic party, and advocated the war with England and supported the Administration of President Madison. In 1814 he was unanimously reelected to Congress, in 1815 declined a nomination to the United States Senate, and in 1816 was elected Judge of the Supreme Court of the State, in which position he continued till 1822, when President Monroe appointed him Commissioner of the General Land Office. In July, 1823 he was appointed postmaster-general, and by his energetic administration made that department as remarkable for order, efficiency, and economy, as it had previously been for the reverse. The salary of the office was raised from \$4,000 to \$6,000 by an almost unanimous vote of both Houses of Congress during his administration. In 1829 President Jackson offered him the War and the Navy Departments, but he declined both, and resigning the post of postmaster-general, accepted the appointment of Associate Justice on the bench of the Supreme Court of the United States, and entered upon his duties in January, 1830. He continued in this office till his death. Several of his charges, opinions, and decisions, have become historical. In Dec. 1838, he delivered a charge on "Aiding or favoring unlawful military combinations by our citizens against any foreign government or people with whom we are at peace," having special reference to the Canadian insurrection and its American abettors. His opinion in the Dred Scott case, in which he dissented from that of Chief-Justice Taney, is still more celebrated. It was the first distinct enunciation from a member of that bench, of the doctrine that "Slavery was con-

trary to right, and was in our country only the creature of local law." Judge McLean's name was prominent among the candidates for the presidency in 1856 and 1860. His health was infirm during the January term of 1861, and after his return home his disease rapidly increased till his death.

METALS. *Lake Superior Copper Mines.*—The "Annual Review," of Messrs. Dupee, Beck & Sayles of Boston, for 1861, says: "In relation to the mining interests of Lake Superior, the year just now closed, will be long remembered as having witnessed the most extraordinary fluctuations in the prices of ingot copper, producing thereby the extremes of adversity and prosperity. This metal was sold, in July, at seventeen cents per pound, cash, the lowest price in the market since 1850. To-day (Jan. 1862) holders refuse twenty-seven cents, cash. Before the present stock has passed into the hands of the manufacturers, and, consequently, before the profits of mining in 1861 can be accurately ascertained, the prices may have advanced to figures exceeding the maximum of 1857, or thirty cents per pound, payable in four months. These fluctuations in prices have not been the result of speculation, but have been caused by the disturbances of trade all over the world. The ordinary consumption of copper in the United States has usually been estimated at twelve thousand tons per annum. Lake Superior produced, in 1860, six thousand tons. The remainder was obtained principally from Tennessee, Canada, and Chili. The opening of the lake navigation, in May last, brought upon the market, already, in consequence of the civil war, overstocked with foreign copper, the accumulated product of the previous six months. The necessities of several companies required immediate sales, reducing the price, in one instance, to the low rate named above. But the disastrous prices were, after all, followed by positively beneficial results to the mining interests. A most rigid system of economical management has been inaugurated, so that every manager can give an estimate, closely approximating to the truth, of the cost, per pound, of ingot copper produced by his mine. A new impulse has been given to the study of the machinery for profitably reducing the lower grades of stamp work, railways have in many cases been substituted for hand-barrows underground, and heavy chain work been introduced. On the other hand, the low prices of copper in the American markets induced enormous shipments to the markets of Europe, especially to those of the continent, where its peculiar qualities of ductility and toughness procured for it the preference in the finer manufactures. In Rotterdam, Antwerp, Havre, and Paris, the brands of the several American smelting works are as well known as in Boston and New York. The exportation of copper continued until the price rose to twenty-one or twenty-two cents, (November.) Large purchases by the Federal Government

caused a rapid advance to twenty-five, (December,) and American copper was actually re-shipped from Havre to New York.

Since the tariff of August last, importations from Chili, the main source of the supply of copper from abroad, have gradually declined, and such is the derangement of foreign commerce, that the supplies from that country must be comparatively small for many months hence. From all these premises there will be a short supply, unless considerable lots can be returned from abroad free of duty till the opening of navigation in May, 1862.

Looking back upon the past year as the most disastrous financially, since 1837, those interested in the mines of Lake Superior may congratulate themselves that but few of the adventures have been suspended, that but few calls have been made upon the shareholders, and that nearly all the mines now in progress are earning dividends, or, at least, are self-sustaining. A careful inspection of the published reports of the principal companies shows that the cost of production, including every item down to the charges of the commission merchants, need not exceed thirteen and a half cents per pound at the richer mines, nor more than eighteen, or, possibly, nineteen cents, at the poorer mines. Yet the business of mining at Lake Superior is but in its infancy. The same energy which has developed successfully the lead, iron, coal, silver, and gold of the United States, will yet solve, with a similar measure of success, the problem of mining for copper in the richest and most extensive deposits of that metal yet discovered in the world.

The statistics, down to the end of the year 1861, are presented in the following tables:

Years.	Tons.	Average price per ton.	Value.
Total production of ingot copper to close of 1857.....	18,954	\$500	\$9,477,000
Shipments of 1858.....	3,500	460	1,610,000
" 1859.....	4,200	460	1,932,000
" 1860.....	6,000	420	2,520,000
" 1861.....	7,400	420	3,108,000
Total.....	40,054		\$18,647,000

The production of the several mines for the last three years in rough copper, as shipped, was as follows, the weights of the barrels being deducted, and the results given in tons of 2,000 lbs. and tenths:

Copper in the puddling furnace.—In the "American Journal of Science," for Jan. 1861, is an abstract of a paper by Dr. C. List, on the effect of copper in the puddling furnace. It is generally believed by German iron masters that pig-iron containing copper cannot be puddled, it having even been asserted that when one puddler wishes to annoy another, he will sometimes throw a bit of copper (a small coin, for example) into the furnace, so that the iron cannot be made to "rise." Without fully crediting this opinion, Dr. List mentions two cases observed by him tending to confirm it. In one case 400 lbs. of pig-metal placed in the furnace melted in half-an-hour, at which time a sample taken out was perfectly white, but the usual evolution of carbonic oxide and swelling up, or "rising," of the mass of scales about the iron did not ensue; and by the time the balling together of the iron should have commenced, it became evident that the charge could not be worked off. It was therefore removed, after remaining about three-quarters of an hour, and in flowing out, emitted numerous beautiful blue sparks, which were also produced by stirring the metal in the furnace, and were regarded

by the workmen as an indication of the presence of copper. Only 240 lbs. of iron remained, the rest having been lost in the scales and slag. Analysis showed the original pig-iron to contain 1·82 per cent. silicon, 0·28 sulphur, 3·56 manganese, and 0·35 copper, and that removed from the furnace 0·20 sulphur, 0·48 manganese, and 0·57 copper, showing that none of the copper was removed by the puddling.

Malleable Iron.—The same number contains an abstract of the experiments made in 1857 by H. Tissier, director of the aluminium works at Amfreville, in France, on the action of carbonate of soda on cast-iron. He found that malleable iron, heated with it alone, suffered no change, while cast-iron lost its carbon and silicon, and was converted into malleable iron; and suggests that the process of annealing or the conversion of cast into malleable iron, now accomplished by heating the articles for a long time with substances rich in oxide of iron, might be replaced by a heating with carbonate of soda, with the advantage that the metal may be withdrawn from time to time to watch the progress of the conversion into steel or malleable iron. He was in hopes of being able, in this way, to obtain large masses of malleable iron, such as heretofore have been obtained only by forging; but the length of time required, and the porosity of the iron obtained, demand some further modifications of the process. With smaller castings, however, the action, even when superficial, imparts great toughness, removing the liability to fracture.

Copper in Canada.—M. Gauldrée Boileau, French consul at Quebec, states, in a despatch dated Jan. 1861, that new discoveries of copper continued to be made between Richmond and Quebec, and that it appeared every day more evident that the beds at Acton were not isolated, but constituted part of a vast copper-bearing formation, the outcrops of which have already been exposed at many points, as at St. Flavien, in the county of Lothinière, at Melbourne, and in the immediate vicinity of Richmond. He states the ores to contain enough silver to render its extraction advantageous, and says that the establishment of works for the treatment on a large scale of the ores of Acton, Richmond, &c., has been projected at Longueil, opposite Montreal. To this would be attached sulphuric acid works, so as to make use of the gases produced.

Zinc.—A very interesting paper on the impurities of commercial zinc was contributed to the Memoirs of the American Academy of Arts and Sciences (vol. viii.) by Messrs. C. W. Eliot and Frank H. Storer. The specimens examined were, 1st, Silesian, 2d, Vieille Montagne, 3d, New Jersey, 4th, Pennsylvanian, (from Penn. and Lehigh Works, Bethlehem,) 5th, Vieille Montagne, (such as used at United States Mint,) 6th, a sample bought in Paris, labelled "zinc pur," 7th, of unknown origin, 8th, 9th, 10th, and 11th, "English zinc," from different

works in Wales. The chief impurity of all these proved to be metallic lead, of which No. 1 contained 1·46 per cent., 2d, 0·292, 3d, 0·079, 4th, none, 5th, 0·494, 6th, 0·106, 7th, 1·297, and the English ones, 1·192, 0·823, 1·661, and 1·516 respectively. Minute traces of cadmium and tin were found in several samples, but never amounting to $\frac{1}{2}$ of 1 per cent., except No. 3, which gave decided indications of tin. Copper was found only in No. 3, which contained 0·1298 per cent. The occurrence of iron generally forming less than 0·2 per cent. having before been shown, Messrs. Eliot and Storer did not investigate particularly. No. 3 contained 0·2088 per cent. Nickel, cobalt, and manganese, which have been asserted to sometimes occur in zinc, they are of opinion are never to be found, unless accidentally, and then in very minute quantity. Carbon seems either not to occur at all, or only in infinitesimal quantity. The presence of sulphur in extremely minute but appreciable quantity, was ascertained in every sample examined. But the most important though somewhat unexpected result obtained, was that much of the zinc of commerce is free from arsenic, or, at least, contains too small a quantity to be detected by the most delicate tests known, and that in many cases its supposed detection by Marsh's test has arisen from the impurity of the acids used—a result of the highest importance to persons engaged in the examination of cases of alleged arsenical poisoning. Some specimens of the Vieille Montagne and Pennsylvania zincs gave no trace after the current of gas had been maintained for more than one hour in the very delicate apparatus employed, which was proved by direct experiment to be capable of detecting arsenic when forming only one ten-millionth of either the zinc or the liquid. Inferior samples of both, as well as those from Silesia and Paris, yielded, after long trial, exceedingly minute traces. The New Jersey and English specimens yielded very considerable indications of arsenic. The authors conclude their paper with a comparative view of the origin and probable impurities of the principal varieties of zinc, of which the Silesian and Belgian alone enter extensively into foreign commerce, the French, English, and American being used at home.

The Silesian is for the most part made from the silicate and carbonate of zinc, and these ores furnish metal of great purity; but whenever ores containing blende, or the impure oxide of zinc from other metallurgic processes, are mixed with them, arsenic, &c., may be expected. In German zinc generally, previous researches, confirmed by those of Messrs. E. and S., had shown lead to be the principal impurity, with frequently a little cadmium, and they found, even in the best samples, traces of sulphur and arsenic. The Belgian is also made from silicate and carbonate, and when made with care from selected ores, contains very little lead and no arsenic, but differs a good deal, probably from imperfect picking of the ores. The Eng-

lish is, in great part, made from blende, and is consequently among the most impure, containing more lead than any except the Silesian, and more arsenic than any, except perhaps the New Jersey. The Pennsylvanian is made from silicate of zinc, and appears to be the purest produced, in most cases containing absolutely no impurity, except a trace of cadmium. The impurities in some of this zinc appear to arise from the fact that the crust from the furnaces for making the white oxide, in which less carefully selected ores are used, has occasionally been worked into spelter. The New Jersey is made from the red oxide of zinc, and has hitherto been supposed to be especially pure, but proved to be just the reverse, containing very appreciable quantities of copper and arsenic, as well as sulphur, carbon, and tin, but less lead than any except the Pennsylvanian. The authors were unable to detect the source of the copper, and seem to suspect that, though in considerable quantity, it may prove to be accidental; but arsenic was found in both the red oxide and the associated Franklinite, as well as in white oxide manufactured from them.

Iron and Anthracite of Pennsylvania.—The “*Annales des Mines*” for June, 1861, contains a report from M. de la Fosse, French consul in Philadelphia, on the progress of the manufacture of iron with anthracite in Pennsylvania. He states that 1,800,000 tons of iron ore are annually smelted with it, much of which, owing to foreign competition, could not have been used if only bituminous coal or charcoal had been obtainable; that in Pennsylvania 91, and in New York, New Jersey, and Maryland 29 blast furnaces are worked with anthracite, producing 500,000 tons of cast-iron, worth in Philadelphia and New York at least \$10,000,000. He institutes a comparison between the anthracite iron, costing \$20 a ton, the charcoal iron of Eastern Pennsylvania, worth \$26, the iron made with coke in Western Pennsylvania, which he considers, from the cost of transport and inferiority of quality, can seldom compete with either of the others, as well as with the English iron, then costing \$22, including duty, but which he thinks would soon reach \$26, if England, in addition to her present supply, had to furnish the 500,000 tons now made with anthracite. He considers this to be the best iron made with mineral fuel, being applicable to most purposes for which charcoal iron was formerly used, and ascribes this superiority to the small quantity of sulphur in the coal, and the more complete volatilization of foreign ingredients by the intense heat obtained by a pressure of air nearly three times as great as in coke furnaces. From 1845 to 1855 most of the furnaces had blowing machines capable of throwing in 4,000 cubic feet of air per minute at a pressure of 4 lbs. to the square inch, which gave with furnaces 40 to 50 feet high about 5,000 tons annually. Since that time more powerful ones have been introduced, giving 10,000 cub. ft. per minute, at a pressure of 8 or 9 lbs.

to the square inch, and with these, a furnace 60 feet high will yield 10,000 tons per annum. The combustible necessary for this production is 12,000 to 15,000 tons, while formerly 25,000 to 30,000 tons of charcoal would have been required. The cost of labor has also been considerably reduced. He states that the arrangements for burning the gases, heating the boilers and the blast, are the same as those used in France, and that the air is generally introduced at a temperature of 600° F.

Production of Pig-Iron in Scotland.—The number of blast furnaces in operation in Scotland in 1861 is stated to have been 123, and the product of pig-iron as 1,050,000 tons. The shipments to the United States were 54,482 tons, those of 1860, 77,632 tons. Scotch pig-iron is largely employed in iron foundries throughout the country, and is highly esteemed, not so much on account of its superior quality when used alone, as for the excellent product of its mixture with our own much stronger pig-irons. No other irons can be obtained in such large quantities, of so uniform a character, and so well adapted for foundry purposes. A large portion of the product is consumed in Scotland, much of it in the construction of iron steam-ships and steam machinery. This business is carried on to a great extent on the river Clyde, where, in 1861, 86 iron steamers were built. Nearly 100,000 tons of pig-iron are exported to Germany, and about 60,000 tons to France.

Heat of melted Cast-Iron and some other Metals and Alloys.—The “*Annales des Mines*” also contains an account of a series of experiments undertaken by MM. Minary and Resal on the degree of heat required to fuse cast-iron, the metal employed being a gray iron made with coke at the furnace of Rans, and composed of iron 0.9450, silicium, 0.0195, carbon, 0.0309, loss, &c., 0.0046. The calorimeter employed was a vessel of sheet iron containing a weighed quantity of water. The melted iron was poured into a pan supported on legs under the surface of the water, and the temperature of the calorimeter at the beginning and end, the temperature of the air, and the weight of the water and iron, being known, the quantity of heat corresponding to one kilogramme of iron can be calculated. When the iron was at its lowest temperature of perfect fusion, a very slight crust beginning to appear on the surface, the heat developed was from 250.07 to 257.72 units of heat. Very hot iron gave 292.04 units. Iron nearly solid gave 224.93. Iron cooled sufficiently to become somewhat granular and coherent, 215.2. These results are but little less than those which should theoretically be produced by the quantity of fuel used. Similar experiments with other metals gave for a white cast-iron, also from Rans, at the lowest temperature of perfect fusion, 246 to 248 units, though this result seems to be subject to doubt; for copper, very hot 182.0, only just fluid 139; for tin, at a red heat 47.5, just fluid 26.0; for

lead, at a red heat 38·7, just fluid 16·7; for zinc, high red heat 105·0, just fluid 63·5; bell-metal, containing 20 per cent. of tin, 159·5 and 117·0; gun metal, containing 10 per cent. of tin, at a high temperature, 173·0, pasty, 127·0; brass, with 30 per cent. of zinc, at a high temperature, 159·5, pasty, 119·5. The agreement between the results obtained by experiment in the last three cases, and those calculated from the numbers given by their respective constituents is such that the authors conclude that the total quantity of heat necessary to melt an alloy, may be considered to differ very little from the sum of the quantities of heat necessary to melt its constituent parts.

Improvement in Iron and Steel.—The year 1861 has been remarkable for the progress made in the processes of manufacture, for the number of new or improved applications, and for the light shed upon the true nature of iron and steel. Mr. Fairbairn, in his address as President of the British Association for 1861, thus sums up some of these: "A consecutive series of chemical researches into the different processes, from the calcining of the ore to the production of the bar, carried on by Dr. Percy and others, has led to a revolution in the manufacture of iron; and although it is at the present moment in a state of transition, it nevertheless requires no very great discernment to perceive that steel and iron of any required tenacity will be made in the same furnace, with a facility and certainty never before attained. This has been effected, to some extent, by improvements in puddling; but the process of Mr. Bessemer affords the highest promise of certainty and perfection in the operation of converting the melted pig direct into steel or iron, and is likely to lead to the most important developments in this manufacture. I must not, however, pass over in silence the valuable light which chemistry has recently thrown upon the composition of iron and steel. Although Despretz demonstrated many years ago that iron would combine with nitrogen, yet it was not until 1857 that Mr. C. Binks proved that nitrogen is an essential element of steel, and more recently M. Caron and M. Fiemy have further elucidated this subject; the former showing that cyanogen, or cyanide of ammonium, is the essential element which converts wrought iron into steel; the latter combining iron with nitrogen through the medium of ammonia, and then converting it into steel by bringing it, at the proper temperature, into contact with common coal gas. There is little doubt that in a few years these discoveries will enable Sheffield manufacturers to replace their present uncertain, cumbrous, and expensive process by a method at once simple and inexpensive, and so completely under control as to admit of any required degree of conversion being obtained with absolute certainty. Mr. Crace Calvert also has proved that cast-iron contains nitrogen, and has shown that it is a definite compound of carbon and iron, mixed with various propor-

tions of metallic iron, according to its nature." Among the new or improved applications may be enumerated the use of steel for bells, cannon, railway bars, car axles, and even for covering vessels, while iron has been employed on a great scale for plating vessels of war, and for cannon of unprecedented size. Much has also been added to our knowledge of the alterations to which iron is subject, when exposed to vibrating action, as in suspension bridges, locomotive axles, &c., as well as of its other physical properties. A report made by Mr. J. A. Roebling, the engineer of the Niagara suspension bridge, is especially full of information on these subjects, and valuable reports have also been made by Fairbairn in England, Schimmelbach at Liège, and Bourville in Austria.

Gold in Nova Scotia.—A range of clay slates and quartz rocks along the southern coast, extending about 250 miles in length, and stretching inland in some places 20 to 30 miles, whose geological place appears to be the lower part of the Lower Silurian, and consequently about the same age as the auriferous and cupriferous rocks of Lower Canada, has, within the last year, been found to be in many places rich in gold. The first gold found was at Tangier, 40 miles east of Halifax, in 1860, but the quantity found was small, and it was not until the spring of 1861 that any discoveries of importance were made. In March, 1861, a man, stooping to drink at a brook near the mouth of the Tangier River, saw a lump of gold among the pebbles, and on searching found others. As this was in a locality eminently favorable to mining operations, being within half a mile of navigation, a considerable number of persons flocked to the locality, and lots of 50 feet by 20 were leased by the Government. The greatest depth reached, at the time of the Hon. Mr. Howe's report, was 45 feet, and the largest nugget \$300. The metal is found in scales and jagged pieces in quartz veins, very little having yet been obtained by washing. The discoveries at Tangier were followed by others at Musquodoboit, Lunenburg, and at Wine Harbor, 50 miles east of Tangier, over a total length of 130 miles, from S. W. to N. E.; and in all probability gold will be found to pervade the rocks over the whole extent of the formation. It has also been reported from the inland districts of Eastern and Middle Pictou, in quartz veins running through Upper Silurian slates, but the quantity found seems to have been small. Mr. O. C. Marsh visited the gold region in Aug. 1861, and states that, though the metal is mostly found in the quartz veins, he noticed it in one instance in the clay slate. The associated minerals are chiefly mispickel and iron pyrites, the latter being itself auriferous. A few perfect crystals of gold were found. Copper pyrites, galena, magnetic iron, and hematite were also found in small quantities. At Tangier about 700 men were working claims, but at least one-third of the gold was lost by the rude methods employed. At

Lunenburg, though gold occurs in the quartz veins, most of the product has been obtained from the sand of the beach, and a "dredging company" has been formed to explore the bottom of the harbor. Mr. Marsh's analysis of a specimen of gold from Tangier shows it to be of almost unequalled purity, containing 98.13 per cent. of gold, 1.76 silver, 0.05 copper, and a trace of iron. It seems impossible to ascertain how much gold has been obtained up to the present time in this region, as the miners were generally unwilling to give such information. 2,400 dollars were said to have been taken from one claim at Tangier, \$1,300 from another, and \$480 from a third, and at Lunenburg \$250 were taken from a single pocket. At Sable Island, which is more than a hundred miles from the coast, a small quantity of gold has been found in the sand, appearing to indicate that the gold-bearing strata extend for a considerable distance beneath the Atlantic.

Researches on the Platinum Metals.—In the "American Journal of Science," Jan. 1861, is a portion of a valuable paper on these metals, by Dr. Wolcott Gibbs, who has for several years devoted much time to their investigation. The material used was obtained chiefly from the New York Assay Office and the Mint, and included also a considerable quantity of Siberian osmiridium. The samples obtained from the Mint at various times, and which had been subjected to different preliminary processes, varied greatly in appearance. In some cases the ore was in distinct scales, rather whiter than the Siberian osmiridium; in a sample of this kind Dr. Genth detected distinct crystals, belonging to the rhombohedral system. Other specimens resembled a fine gray metallic sand, while others again (derived from the sweepings of the Assay Office) presented a heavy gray powder. Nearly all the ores contained more or less iron mechanically mixed, which could be extracted by the magnet, or dissolved out by acids. Nitro-muriatic acid acted powerfully upon many specimens, dissolving portions of the platinum metals as well as iron, and even so far attacking the osmiridium itself as to occasion a distinct evolution of free osmic acid. In California the ore is almost always associated with gold, from which it is of course impossible to separate it by washing. At the Assay Office the gold is melted with twice its weight of silver, and the osmiridium allowed to settle. When the gold alloy is poured off, there remains a mass containing nearly all the osmiridium mixed with gold. This mass is fused repeatedly with silver, and the last traces of silver and gold are finally removed by treatment with nitric and nitro-muriatic acid and washing. The osmiridium is sold to the manufacturers of gold pens, who extract from it the excessively hard particles which serve for the points of pens; the rest is returned to the Assay Office. The amount of osmiridium obtained in this way does not exceed a few ounces in many millions of dollars, and many samples of gold

are entirely free from it. It cannot, however, be doubted that large quantities of the ore will be obtained whenever important practical applications of the metals contained in it shall create a demand. The density of different Californian samples varied very much; one specimen, in large dull white plates, but slightly acted on by nitro-muriatic acid, having a specific gravity = 19.352. It is probable that this arises from differences of composition in the separate scales. G. Rose gives the density of the Siberian ore at 19.3 to 21.1. Dr. Torrey has found among the Californian scales some which could be flattened under the hammer, and were probably platin-iridium. In general, however, the scales are not malleable; some of a lead-gray or bluish tint being with great difficulty cut by the emery dust employed by the gold pen-makers. In color the scales vary from nearly silver-white to dark gray. To this part of the paper Dr. Torrey has added the following notes on the Californian osmiridium: "For the first year or two after the establishment of the United States Assay Office, the proportion of osmiridium in the California gold did not exceed half an ounce to the million of dollars. Afterwards, the proportion rapidly increased till the average was seven or eight ounces to the million of gold. Then, for a year or more, the quantity diminished, but for the last year it has been as large as ever. These differences depend upon the variable composition of the native gold, and the constant discovery of new diggings. The grains of osmiridium, suitable for pens, are roundish and solid, not liable to exfoliate when struck or heated. They seem to have a different composition from the compressed and tabular crystals. The proportion of them is usually not more than a tenth of all the alloy, but it is sometimes as large as one-fifth. The carefully-selected grains used by the gold pen-makers are so minute that from 10,000 to 15,000 of them are contained in a single ounce. The very best are worth at least \$250 an ounce, and a cubic inch, which would be equal to about eleven ounces, is worth \$2,750." The purely chemical part of the paper, though of the highest interest, hardly admits of condensation, as its value mainly consists in its minute details of necessary precautions to be observed in the treatment of the ore. The process recommended is essentially that of Claus, with some modifications rendered necessary by the peculiar composition of the Californian ore, which, according to Dr. Gibbs, contains more ruthenium than the Siberian.

Dimorphism of Arsenic, Antimony, and Zinc.—In the "American Journal of Science," for March, 1861, Prof. J. P. Cooke, of Cambridge, describes a series of experiments tending to prove that, besides the rhombohedral forms of crystallization of these metals, they are also capable of crystallizing in regular octahedral and other forms belonging to the cubic system. Arsenic was stated by Elsner, in 1841, to have been obtained in octahedra, by subliming a

mixture of arsenious acid and charcoal powder; but by repeating the experiment Prof. Cooke found these crystals to be merely arsenious acid, colored by particles of metallic arsenic in mechanical mixture, like the sand in the crystals of Fontainebleau sandstone. But when rhombohedral crystals of arsenic prepared by sublimation in the usual way, afterwards kept under water deprived of air by boiling, and just before using dried in a current of hydrogen, were sublimed in a flask filled with hydrogen, the crust produced was found to be studded with distinct octahedral crystals, having a grayish color and a bright metallic lustre, but of microscopic dimensions. These were satisfactorily ascertained to belong to the cubic system; and the absence of arsenious acid was also proved by experiment. The mirror obtained by the reduction of arseniuretted hydrogen gas in a current of hydrogen gave similar results. Microscopic octahedral crystals of antimony, frequently modified by the faces of the cube, and in one case at least by those of the rhombic dodecahedron, were obtained by reducing antimoniuiretted hydrogen in the same way; and Prof. Cooke is of opinion that in the mirrors of arsenic and antimony obtained by Marsh's test these metals are always in the octahedral modification. The best crystals were obtained by resubliming the metallic mirrors in a slow current of hydrogen, in which way the crystals could be entirely isolated on the surface of the glass tube. As to zinc, the only described crystals of the pure metal belonging to the cubic system are some alleged pentagonal dodecahedra obtained by M. Favre, of which, however, no measurements were made, and which have been doubted by Gustav Rose. The occurrence, however, of brass crystallized in regular octahedra, and the accidental production of brilliant octahedral crystals containing 81.18 per cent. of zinc and 18.82 arsenic, as a furnace product, seem to show that, even if incapable of crystallizing in such forms when alone, a small proportion of an octahedral metal alloyed with it will predispose it to assume them. Prof. Cooke remarks that a certain amount of impurity seems to favor the crystallization of metals, and instances the beautiful lead crystals containing a little antimony from Clausthal, and antimony crystals with a little lead, as well as similar facts in the case of bismuth.

On the amount of Lead in some Silver Coins.—Messrs. Eliot and Storer, finding in the course of their examination of the impurities of zinc, that the zinc employed in the U. S. Mint contained half of one per cent. of lead, were induced to examine the percentage of lead in American and foreign silver coin:

Kind of Coin.	Per cent. of Lead in Coin.
1 American half dollar of 1824.....	0.301
20 " five-cent pieces of 1853.....	0.209
10 " ten-cent pieces of 1854.....	0.228
2 " twenty-five cent pieces of 1858.....	0.231
Fine silver from U. S. Assay Office, New York, 1860.....	0.161
1 Spanish dollar of 1793, Carolus IV.....	0.056
1 Mexican dollar of 1829.....	0.043
2 English shillings of 1816.....	0.485
1 French five-franc piece of 1852, Napoleon III.....	0.428

In order to ascertain whether the zinc used in the reduction of the silver was the probable source of the lead in the American coin, the authors calculated the amounts which would be introduced by the use of the two qualities of Vieilla Montagne zinc analyzed by them, and from that the best would have given 0.158 per cent. of lead in the coin, and the second quality 0.268 per cent., between which limits all their analysis (except that of the half dollar of 1824) would fall. They are far, however, from affirming this to be the exclusive cause of this impurity, as some may probably be derived from the lead vats in which the chloride of silver is reduced, or from the sulphuric acid used. The process of separating lead and silver is said to have been less perfectly executed in the ages of antiquity than at present.

Alloys of Aluminum.—Alloys of aluminum have been lately prepared, which seem susceptible of many applications in the arts. The bronze, composed of 10 per cent. of aluminum and 90 per cent. of copper, which appears the most valuable, has a color near that of gold, and takes a polish equal to that of steel. Drawn into No. 16 wire, the breaking strain of copper was 418 lbs., of iron 616 lbs., and of aluminum bronze 955 lbs., a tenacity almost equal to the best steel wire. As regards hardness, a groove for the guide-box of a locomotive made of it was compared with one made of steel, and after six months' wear, gave equally good results. It rolls at all temperatures, from cold up to a bright cherry red, but best at as high a temperature as possible, short of fusion. In rolling it cold, if re-heated and then cooled by plunging in water, it works better than if simply re-heated, without dipping.

New Alloy.—A new alloy has been produced by M. Aich, of Brussels. It presents the advantage of working as well cold as hot; can be forged without losing its cohesion; melts very readily, and can be afterwards hammered, rolled, or punched. It is cheaper than brass or pure copper, and may advantageously supersede them for ship-building and many other purposes, as it is more tenacious and not so oxidizable. It consists of 60 parts copper, 38.2 parts zinc, and 1.8 parts iron.

METEORIC IRON. In the year 1846 a mass of iron of over 15 pounds (542 pounds avoirdupois) was found 7 versts (4.6 miles) from the station Mariinskoi (in the government of Tula) on the Moskaw-Tula road (54° 35' N. lat. and 37° 34' E. of Greenwich.) It was sold for 4 roubles (3 dollars) to the Myschega Iron Works in the neighborhood, where the greater portion of it was worked up into axles, wagonsprings, grappels, and other implements, until in 1857 Dr. Auerbach learned of its existence, and saved the remainder from destruction. He has given the first notice of it, and in a preliminary analysis of it found the mass to contain: iron, 93.5, nickel, 2.5, traces of tin, and 0.9 schreiber-

site. It yields sulphydric acid, when dissolved in chlorhydric acid, probably owing to the presence of pyrrhotine. Articles manufactured from this iron show after etching a beautifully damasked surface.

The second one was found on the right shore of the Missouri River, in Nebraska Territory, 25 miles west of Fort Pierre, 44° 19' N. lat., and 100° 26' W. of Greenwich, whence it was brought in 1857, and presented to the Academy of St. Louis in 1858. The original mass weighed 35 pounds, and the surface was hardly acted upon by rust. According to an analysis by Dr. H. A. Prout, it contains: iron, 94.288; nickel, 7.185; magnesium, 0.650; calcium, 0.350. Sulphur, trace. Total, 102.473; but not the least trace of cobalt, chrome, manganese, or any other constituent.

Two masses of meteoric iron, which for some years past have been known to exist at West-ernport, near Melbourne, in Australia, have recently been described as follows: The largest one weighs from 5 to 6 tons, the other about 1½ tons. They are buried in the earth, so that only their tops project above the surface. They are covered with a crust, containing cavities similar to those found in other meteoric irons, and have no polarity, except that resulting from the earth's magnetism; the lower ends of each being strong south poles, and the upper north poles. The longitudinal axis of the large piece, which is about 5 feet long, lies exactly in the magnetic meridian of the locality. It is intended to bring the smaller mass to Melbourne. In the same number of Sill. Journal is an account by Prof. J. Lang Cassels of two meteoric stones which fell Feb. 28th, 1857, near Parnallee, in the extreme south of Hindostan, the smaller of which weighed 37 pounds, and the larger three or four times as much, and both penetrating into the ground about 2½ feet. The noise of the fall is reported to have been heard 40 miles off. The stone is very remarkable for the amount of nickel it contains—nearly 17 per cent.—while the iron is only about 3 per cent., and disseminated in very small particles. The surface, when filed, shows countless points of metallic reflection, the nickel being almost in a spongy state like silver reduced from its chloride by zinc.

In the "American Journal of Science" for March, 1860, Prof. J. Lawrence Smith describes two masses of meteoric iron: one discovered in 1860, in Oldham Co., Ky., and the second found near Cooperstown, Robertson Co., Tenn. The first weighed 112 pounds, was 20 inches long, 10½ broad, and 6½ thick, was elongated and flattened, and had a specific gravity of 7.89. The second weighed 37 pounds, was 10 inches long, 9½ broad, and 5½ thick, wedge-shaped, with a specific gravity of 7.85. It contained a nodule of sulphuret of iron, about ¼ inch in diameter. Analysis gave

MEXICO. The Confederacy, or United States of Mexico, is situated between the parallels of north latitude 16° and 42°, and longitude 87° and 124° west. It is bounded on the north by the United States, on the east by the United States and the Gulf of Mexico; on the south by Central America, and west by the Pacific Ocean. The length is nearly 2,000 miles, and the breadth varies from 150 to 1,200 miles. The area, in English square miles, and population of each State, according to the most recent returns, are as follows :

STATES.	Area.	Population.
Chiapas.....	18,697	144,070
Chihuahua.....	100,250	146,600
Coahuila.....	56,570	75,340
Durango.....	48,489	162,218
Guanajuato.....	12,618	718,588
Guerrero.....	32,002	270,000
Jalisco.....	48,596	774,461
Mexico.....	19,585	973,697
Michoacan.....	22,998	491,679
Nueva Leon.....	16,687	188,361
Oajaca.....	81,822	625,101
Puebla.....	12,042	530,000
Querataro.....	2,444	184,161
San Louis Potosi.....	29,486	368,120
Sonora.....	123,466	139,374
Sinaloa.....	35,721	160,000
Tabasco.....	15,609	63,580
Tamaulipas.....	30,334	100,064
Vera Cruz.....	26,595	264,725
Yucatan.....	52,847	680,943
Zacatecas.....	80,507	356,024
Federal District.....	89	200,000
Tlaxcala.....	1,943	80,071
Colima.....	3,019	61,243
Lower California.....	60,662	12,000
Total.....	838,023	7,665,420

The district of Mexico is by far the most densely populated, and Querataro and Puebla are the next. The cities are none of them large, with the exception of Mexico, the capital, which has a population of 185,000; Puebla has 70,000, and Guadalajara has 68,000.

The inhabitants are composed of many distinct races—Creoles, Indians, Negroes, Mulattoes, Zambos, &c. Under the Spanish rule, the policy of keeping up the distinctions of race was adopted, and privileges were granted some, and disabilities laid upon others. Since the independence of the country, all political distinctions have been done away with, but the natural ones remain. 1. Creoles, or native whites, Spaniards born in the country; (European Spaniards were expelled.) 2. Native Indian races, which continue to occupy large portions of the country in spite of the whites. They are nominally Catholics, and are quiet and indolent. 3. Negroes, freed by a law abolishing slavery. They are not numerous. 4. Mestizoes, descendants of whites and Indians. 5. Mulattoes, mixture of white and negro. 6. Zambos, mixture of negroes and Indians. The whites are mostly found on the central table-land, where are also most of the Indians. The mixed races occupy the low countries of the coast.

The trade of the country has consisted mostly in the export of the metals in exchange for textile fabrics, and other manufactures. It is chiefly carried on by foreigners.

The amount of the trade up to the year of the last official publication, was as follows:

	Imports.	Exports.
1856.....	\$17,720,582	\$8,942,988
1857.....	11,224,415	11,354,765
1858.....	10,033,569	2,915,576

The number of those who took out their permits for residence, or letters of security, from the Ministry of Foreign Affairs, during the year 1855, was as follows:

Old Spaniards.....	5,141	Americans.....	444
French.....	2,048	Other nations.....	405
English.....	615		
Germans.....	581	Total.....	9,234

Since the States of Mexico, under Iturbide, threw off the control of Spain, the country has rarely enjoyed a year of repose. Its industry has therefore languished, and its resources, which are very great, have never been developed. Its principal industry is the mining of silver; but the disturbed state of the country has prevented its prosecution on a large scale, and the annual production is barely 10 per cent. of the yield under the Spanish dominion. The yield of silver, as reported at the mint in Mexico, since 1800, and at the ten tributary mints, since their establishment, has been, in value, \$781,000,000. This is the amount of money coined and reported in bills of lading for exportation or for exchange from one mint to the other, or from the mints to places of traffic and trade. Those who are at all acquainted with Mexican affairs, must know that the contraband trade of late years has not been on the decrease. The proportion of silver and gold smuggled out of the country may be taken at 20 per cent., which will make \$156,304,012 more. The largest year of coinage at the mint was 1805, when the amount was \$27,175,888. The produce of the mines of Mexico, which has been turned into the channels of commerce, to the year 1856, on the retirement of Comonfort, will, therefore, stand as follows:

Booty of the conquerors.....	\$380,000
Results of Spanish mining to 1799.....	1,974,327,283
Coinage of the mint of Mexico from 1800 to 1856.....	418,294,468
Coinage of tributary mints to 1856.....	863,225,596
Contraband since 1800 to 1856.....	156,304,012
Total.....	\$2,912,531,359

These figures are the nearest possible to the correct point. They are lower, however, than the estimates of many writers who have devoted much time and labor in trying to give to the world reliable data.

The enormous amount of money which Mexico has given to the world is but a fraction of what she could give, were the country to be for a period established in peace. There can be no doubt but the richest mineral districts of Mexico are yet to be worked. Sonora, Chihuahua, and Durango are very rich in gold, silver, and copper. But, rich as they are, there is reason to believe that the real El Dorado of America is in the State of Chiapas. Guerrero is rich in gold, as also is Oajaca in gold and silver. These parts have been but imperfectly ex-

plored, and the civil turmoils of the country have entirely discouraged individual enterprise in those quarters. Even the mineral districts worked by the Spaniards are now more than half abandoned. The cause of this is to be found in the general insecurity of every thing in Mexico, owing to the inability of the people to rest in peace. Never before now has the country been so completely prostrated, with so little hope of rising by internal strength.

Since the independence of the country, the Government of Mexico has exhibited only a constant succession of military rulers, each of whom seized the government to be in his turn deposed by a more successful combination. The continued strife demoralized the people, and gradually undermined all security for life and property. None of the governments, if they had the will, seemed to possess the ability to protect their own citizens, or those foreigners by whom trade and industry were carried on. The table on the following page gives a brief view of the many laws, plans, constitutions, &c., which have formed the pivots upon which the many governments of independent Mexico have turned.

The constituent Congress of Mexico, which adjourned on the 17th of February, 1857, adopted a constitution and provided for a popular election. This took place in the following July, (1857,) and General Comonfort was chosen President almost without opposition. At the same election a new congress was chosen, whose first session commenced on the 16th of September, (1857.) By the Constitution of 1857 the presidential term was to begin on the 1st of December, (1857,) and continue for four years. On that day General Comonfort appeared before the assembled congress in the city of Mexico, took the oath to support the new Constitution, and was duly inaugurated as President. Within a month afterwards he was driven from the capital, and a military rebellion had assigned the supreme power of the republic to General Zuloaga. The Constitution provided that, in the absence of the President, his office should devolve upon the chief-justice of the Supreme Court; and General Comonfort having left the country, this functionary, General Juarez, proceeded to organize, at Guanajuato, a constitutional government. Before this was officially known, however, at the capital, the government of Zuloaga had been recognized by the entire diplomatic corps, including the Minister of the United States, as the *de facto* Government of Mexico. The constitutional President nevertheless maintained his position with firmness, and was soon established, with his cabinet, at Vera Cruz. Meanwhile, the government of Zuloaga was earnestly resisted in many parts of the republic; and even in the capital, a portion of the army having pronounced against it, its functions were declared terminated, and an assembly of citizens was invited for the choice of a new President. This assembly elected General

Miramon, who represents the Church party; but that officer repudiated the plan under which he was chosen, and Zuloaga was thus restored to his previous position. He assumed it, however, only to withdraw from it; and Miramon became, by his appointment, "president substitute."

In the mean time, the most atrocious excesses were continually recurring. Outrages upon persons and property were committed with impunity, under the plea on the part of the Government, that they were the crimes of individuals, and not chargeable upon the Government. Peaceful Americans, and other foreign residents, occupying their rightful possessions, were suddenly driven from the country, in defiance of treaties, and by the mere force of arbitrary power. Even the course of justice was not safe from control, and a decree of Miramon permitted the intervention of Government in all suits where either party was a foreigner. Vessels of the United States were seized without law, and a consular officer who protested against such seizure was fined and imprisoned for disrespect to the authorities. Military contributions were levied, in violation of every principle of right, and the American who resisted the lawless demand, had his property forcibly taken away, and was himself banished. The wholesale massacre of Crabbe and his associates, without trial, in Sonora, as well as the seizure and murder of four sick Americans who had taken shelter in the house of an American, upon the soil of the United States, was communicated to the Thirty-sixth Congress. Murders of a still more atrocious character were committed in the very heart of Mexico, under the authority of Miramon's government. In April, 1859, by order of General Marquez,

three American physicians, who were seized in the hospital at Tacubaya, while attending upon the sick and the dying of both parties, and without trial, as without crime, were hurried away to speedy execution. Little less shocking was the fate of Ormond Chase, who was shot in Tepic on the 7th of August, 1859, by order of the same Mexican general, not only without a trial, but without any conjecture by his friends of the cause of his arrest.

While life was so little respected, property was still less so. Duties that were paid in one place were enforced a second time. Forced loans, seizures, and confiscations were ruthlessly resorted to, and the President of the United States asked Congress for power to send a force thither for the protection of citizens. The war continued to rage between the parties, and the Government of the United States sent Mr. McLane to recognize the government of Juarez, if circumstances should justify it on his arrival. He presented his credentials to President Juarez, and was cordially received at Vera Cruz. April, 1859, Mr. McLane negotiated a treaty with the constitutional government on terms very agreeable to the United States. This was laid before Congress, but was not ratified.

In the mean time, trade fell into ruin; the alternate exactions of the Church party and the Liberal party were destructive of property. The Liberal party issued paper as a resource. This was receivable for customs at par, but fell to 40 and 60 per cent. discount. When duties were thus paid, goods were again assessed with new duties. The *conductas* with silver on the way to the ports for shipment were seized by both parties when they could get them. The claims of British people on Mexico amounted

to some \$50,000,000, on which were many years' arrears of interest due. Juarez being in possession of Vera Cruz, and Miramon of the capital, a British force demanded of the former payment. He gave bills on the capital, which were paid, and the coin, about \$1,000,000, lodged with the British Minister. The growing troubles compelled him to retire, and he left the money in charge of the consul, from whom it was speedily taken by force by the Government. Towards the close of 1860 the constitutional party gradually had become the strongest, and Miramon, being defeated, left the country, and Juarez was sent for to the capital. The war was supposed to be at an end. President Juarez seems to have been more disinterested than many or most of his predecessors, and in matters concerning general interest has shown laudable activity, though that activity has been paralyzed by the incessant wars in which the Clerical party has involved him. Thus, he has signed a treaty of commerce with Belgium, in which a guarantee of religious liberty is stipulated to Belgian residents; and he has effected a reduction in the budget which, from fourteen millions, has been brought to nine, owing to the suppression of numerous abuses in the Administration. He is exerting himself to open outlets to the productive activity of the interior, by signing contracts for the establishment of regular communication with the West, New York, and Panama.

Here surely is manifest evidence of good intentions; and it is quite possible that, if time were given to him, the present Mexican Government might be brought into such a condition as would satisfy the wishes of industrious nations, which, like England and France, have always regretted to see that region, from the nature of its government, so inhospitable and ill-disposed to accept the doctrine and practice of European commerce.

Miramon, on his defeat, retired to Spain, for the purpose of enlisting sympathy with the Church party, so called, mostly because it respected church property, which the Liberals did not.

The new Administration of the United States in 1861 sent Thomas Corwin, of the State of Ohio, to represent that Government at the capital of Mexico. He negotiated an extradition treaty, and has undertaken the modification of that treaty made by Mr. McLane, and which the Senate refused to ratify, and is conducting a postal treaty to its conclusion.

There are many large claims upon Mexico for various causes, and her liabilities are nearly as follows:

British bondholders' debt.....	\$60,621,843 00
Spanish convention.....	7,270,600 75
English-Spanish convention.....	5,000,000 00
French convention.....	263,490 00
American claims, at least.....	10,000,000 00
Total foreign debt.....	\$83,156,133 75

The existing Government has exerted itself to restore some order in the finances. A decree, fixing its disbursements, has been pub-

lished, dated the 16th of August, 1861. The annual expenses of the different departments are thus fixed:

Foreign relations.....	\$210,840 00
Interior.....	1,191,880 00
Justice.....	537,050 00
Fomento.....	69,119 00
Finance.....	1,578,624 00
War.....	4,745,395 41

Total expenses.....\$3,827,418 04

To cover this disbursement, the Minister of Finance reports the following resources:

Customs duties.....	\$5,500,000
Contributions.....	400,000
Sealed paper.....	250,000
Custom-house of the district.....	1,200,000

Total receipts.....\$7,350,000

From this statement it will be seen that the annual disbursement will exceed the annual receipts of the Government by \$977,418 04. To cover this deficit a contingent is imposed upon the revenues of States and territories, amounting to twenty per cent.

On the 23d of August a decree was issued imposing a tax of 10 per cent. upon all fortunes exceeding \$2,000. This was a ruinous burden, more especially upon foreign residents, and this became a new source of complaint to the powers of Europe. At this time ex-President Miramon was at Madrid, and was present at a review in general's dress, and formed a part of the cortege of the queen. It was a public manifestation of the understanding which reigned between the Clerical party in Mexico and the Spanish Government, and the O'Donnell Cabinet was threatening to undertake an expedition against Mexico in favor of the Church party.

This project now began to take shape and consistence, but the interference of a European power on the continent of America was in direct contravention of the traditional policy of the American Government in respect to the Monroe doctrine, as contained in the Message of Mr. Monroe, December, 1823, laying down the principle that the American continents ought not hereafter to be the field for European colonization; and that all attempts on the part of European nations to extend their system to any part of this hemisphere must be considered dangerous to the peace and security of the United States. Also, that the United States would not see any European intervention with the object of oppressing or controlling the destiny of an American nation, under any other aspect than that of a manifestation of hostility towards the United States.

This doctrine has been rigidly adhered to through all succeeding administrations, but the question of the intervention of the foreign powers being submitted to the Government of Mr. Lincoln, he was not in a condition to resist it with that vigor and energy implied in the declarations of Mr. Monroe, in consequence of the war with the Confederate States, but he insisted that it did not seem to be necessary to carry intervention in Mexico further than to

guarantee the security of the respective nationalities, and to assure the payment of arrears.

The condition of the country continued most deplorable. The defeated Church party constantly endeavored to upset the existing government at any cost, and without any regard to the means employed. A prominent method was to stir up the people against foreigners. At the same time the roads throughout the country, and even the streets of the capital, were infested by plunderers whom the leaders of the Church party did not hesitate to call their friends. The murders and torturings which took place were the work of men led by Marquez, a noted partisan and the chief hope of the priests, and the same who murdered the American physician at Tacubaya. When the Clerical party exercised power, exactions, arbitrary acts, and failures were the order of the day in Mexico. Spain, nevertheless, entered no complaint, and made no effort to provoke intervention against Miramon and his friends, who made forced levies of Spanish subjects for military service, with a view to compel them to purchase their liberty by paying a ransom. To-day it is on Miramon she relies, and it is by the aid of the Clerical party she wishes to open access to the country.

That party, out of power, encouraged the turbulence and anarchy which were the basis of those complaints that form the bond of the alliance against the existing liberal Government; and it is an extraordinary fact that the United States Administration, having recognized Juarez as the constitutional President, and made treaties with him, with the full knowledge and understanding that he is exerting himself to restore order and, in a manner more personally disinterested than any former ruler of Mexico, to extend trade and develop the national resources, should, by mere internal circumstances arising out of its own political affairs, be obliged to practically abandon the Monroe doctrine, and yield its acquiescence to a coalition to overthrow that constitutional Government, in the interest of that Church party, to the barbarism and superstition of which are owing nearly all the evils that afflict that unhappy country.

The American Government, itself struggling for constitutional existence, must witness the onslaught upon a neighboring constitutional government, and in derogation of that principle cherished in every American bosom.

The immediate causes of complaints on the part of the three nations may be summed up thus: England and France had specially to make good their money claims, and to protest against the decree of the 23d of August last, imposing a tax of 10 per cent. on all fortunes exceeding a capital of \$2,000. France had besides to ask satisfaction for an attack on the person of her *Chargé d'Affaires*, M. Dubois de Saligna. The Mexican Government replied that, as regards that unfortunate affair, it set on foot an inquiry as soon as the fact of the violence was com-

municated to it by the foreign Ministers, and that it was ready to communicate with the parties interested concerning the results of the inquiry.

On her part, Spain claimed to have been attacked in the person of several of her subjects, who were assassinated, without the Mexican Government having taken measures to punish the murderers; but she did not state whether the blame of the killing or maltreating of her subjects lay at the door of the present Government or the one that preceded it.

England, juster in her legitimate resentment, does not saddle Juarez with the responsibility of the appropriation by Mexican generals of moneys under convoy, to the detriment of England's own agents; but, like France, she confines herself to claiming proper treatment for the foreigners resident in Mexico, the efficacious protection of the local authorities, and the payment of arrears.

The three Governments, being in accord as to their claims and determination respecting them, and having escaped all former difficulties in the way, growing out of the rights and interests of the United States, proceeded to form an alliance. A European journal, on Sept. 27, remarked: "It will be said that these three European powers have taken advantage of the dissensions of the North American Union to carry out plans which verge upon a violation of the Monroe doctrine. For years, it will be argued, the Mexicans have been cheating, and insulting, and robbing Englishmen, but as long as the United States existed in their integrity, and a quick-tempered democracy was on the watch for an excuse for a quarrel with England, we abstained from avenging ourselves. But now that the hands of the Americans are turned against each other in a fratricidal contest, the league which Lord Aberdeen and M. Guizot were foiled in making sixteen years ago is revived, and "the American balance of power" is sought to be established by a joint expedition of the monarchies of Europe.

"This is a plausible objection, but it has no solid basis. The full assent of the American President has been given to the expedition."

The negotiation of the three powers proceeded, but it was not until the 21st of October that the treaties were signed. These were as follows:

Convention between Her Majesty, the Queen of Spain, and the Emperor of the French, relative to combined operations against Mexico.

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Her Majesty the Queen of Spain, and His Majesty the Emperor of the French, feeling themselves compelled, by the arbitrary and vexatious conduct of the authorities of the Republic of Mexico, to demand from those authorities more efficacious protection for the persons and properties of their subjects, as well as a fulfillment of the obligations contracted towards their Majesties by the Republic of Mexico, have agreed to conclude a convention, with a view to combine their common action, and, for this purpose, have named as their Plenipotentiaries, that is to say:

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, the Right Hon. John, Earl Russell, Viscount Amberley of Amberley and Arusalia, a Peer of the United Kingdom, a member of Her Britannic Majesty's Privy Council, Her Majesty's Principal Secretary of State for Foreign Affairs;

Her Majesty the Queen of Spain, Don Xavier de Isturiz y Montero, Knight of the Illustrious Order of the Golden Fleece, Grand Cross of the Royal and Distinguished Order of Charles III., of the Imperial Order of the Legion of Honor of France, of the Orders of the Conception of Villaviciosa and Christ of Portugal, Senator of the Kingdom, late President of the Council of Ministers, and First Secretary of State of Her Catholic Majesty, and her Envoy Extraordinary and Minister Plenipotentiary to her Britannic Majesty;

And His Majesty the Emperor of the French, His Excellency the Count de Flahault de la Billarderie, Senator, General of Division, Grand Cross of the Legion of Honor, His Imperial Majesty's Ambassador Extraordinary to Her Britannic Majesty;

Who, after having reciprocally communicated their respective full powers, found in good and due form, have agreed upon the following articles:

ARTICLE 1. Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Her Majesty the Queen of Spain, and His Majesty the Emperor of the French, engage to make immediately after the signature of the present Convention, the necessary arrangements for despatching to the coast of Mexico combined naval and military forces, the strength of which shall be determined by a further interchange of communications between their Governments, out of which the total shall be sufficient to seize and occupy the several fortresses and military positions on the Mexican coast.

The commanders of the allied forces shall be, moreover, authorized to execute the other operations which may be considered, on the spot, most suitable to effect the subject specified in the preamble of the present Convention, and specifically to insure the security of foreign residents.

All the measures contemplated in this article shall be taken in the name and on account of the high contracting parties, without reference to the particular nationality of the forces employed to execute them.

ART. 2. The high contracting parties engage not to seek for themselves, in the employment of the coercive measures contemplated by the present Convention, any acquisition of territory, nor any special advantage, and not to exercise in the internal affairs of Mexico any influence of a nature to prejudice the right of the Mexican nation to choose and to constitute freely the form of its Government.

ART. 3. A Commission, composed of three Commissioners, one to be named by each of the contracting Powers, shall be established, with full authority to determine all questions that may arise as to the application or distribution of the sums of money which may be recovered from Mexico, having regard to the respective rights of the three contracting parties.

ART. 4. The high contracting parties desiring, moreover, that the measures which they intend to adopt should not bear an exclusive character, and being aware that the Government of the United States, on its part, has, like them, claims to enforce upon the Mexican Republic, agree that immediately after the signature of the present Convention, a copy thereof shall be communicated to the Government of the United States; that the Government shall be invited to accede to it; and that in anticipation of that accession their respective Ministers at Washington shall be at once furnished with full powers for the purpose of concluding and signing, collectively or separately, with the plenipotentiary designated by the President of the United States, a Convention, *identica*, save the suppression of the present article, with that which they sign this day. But as by delaying to put into execution Articles 1 and 2 of the present Convention, the high contracting parties would incur a risk of failing in the object which they desire to attain, they have

agreed not to defer, with the view of obtaining the accession of the Government of the United States, the commencement of the above-mentioned operations beyond the time at which their combined forces can be assembled in the neighborhood of Vera Cruz.

ART. 5. The present Convention shall be ratified, and the ratifications thereof shall be exchanged at London within fifteen days.

In witness whereof the respective Plenipotentiaries have signed it, and have affixed thereto the seal of their arms.

Done at London, in triplicate, the 31st day of the month of October, in the year of our Lord 1861.

FLAHAULT.

It is proper to add that the existence of additional secret articles, to which France and Spain are parties, to the exclusion of England, has been mentioned repeatedly in European journals, but lacks confirmation.

On the 13th of November the Spanish queen, at the opening of the Cortez, remarked in her speech:

Gentlemen Senators and Deputies: You will be happy to learn that our difference with Venezuela has ended in a satisfactory manner. A just reparation has been made to our country for offences perpetrated against it, and important guarantees will prevent the repetition of similar misdeeds.

Disorder and excess have reached their height in the unfortunate country of Mexico. Treaties having been violated and rights forgotten, my subjects having been exposed to serious attacks and continual dangers, it became indispensable at length to make an example of salutary rigor.

With this object my Government has made the necessary preparations, when two great nations found that they had to complain of acts of violence on the part of the Mexican authorities. Our wrongs were common; our action should be joint. My Government desired as much. Proper steps for this purpose were at first favorable; but the result did not correspond with the desires of the other two nations.

Subsequently France, England, and Spain arranged together to obtain that satisfaction which was due to them; and to prevent the repetition of offences which scandalized the world and outraged humanity. Thus the designs will be accomplished, the execution of which has been the constant object of my Government. At the proper time an account will be rendered to you of the Convention which, with this object, has been signed by the representatives of the three powers.

The plan of operations was announced to be as follows:

"The three allied powers have no intention whatever of wasting powder and shot by waging territorial war upon Mexico. To land a military force and advance upon the capital is altogether out of their contemplation. Their intention is to send a combined naval force into the Gulf of Mexico. This force will blockade, and will temporarily occupy, the principal ports up the Gulf, such as Vera Cruz, Tampico, and one or two others. The plan agreed upon for the satisfaction of the outstanding claims is this: The allied powers will sequester the custom revenue of the ports in question. They will charge their consuls jointly to collect these revenues at the different ports, and these consuls acting together will form an international commission constituted for the purpose at each port. No ship will be allowed to enter or clear at

the ports of Vera Cruz, Tampico, &c., without the authority of the consuls, who will themselves receive the customs dues on such entrances and clearances. They will throw the proceeds into a common treasury of their own at each port. They will retain 5 per cent., and will pay over 50 per cent. to the Mexican customs revenue. The Gulf is very large. The above arrangements will continue until all claims shall have been discharged. A ship of war in the roadsteads in each of these ports will secure the maintenance of the authority of the allied consuls. If the Mexican Government should unexpectedly set the three allied powers at defiance, an effective blockade would be instantly established."

The force contributed by each power was as follows:

The only British ships-of-war sent specially for service in the expedition against Mexico were the *Conqueror*, (99,) *Donegal*, (99,) *Sanspareil*, (70,) and *Phæton*, (51.) Nevertheless, the whole British squadron on the North American and West Indian station, including the vessels named, were placed under the orders of Sir Alexander Milne. The entire naval force thus at his command consisted of 29 vessels, carrying 836 guns, and manned by 9,623 men.

The English sent out no exclusive military branch to their Mexican expedition. The only force, in addition to the usual number of sailors and marines on board war ships consisted of a detachment of royal marines, (infantry and artillery,) numbering some 800 officers and men.

The French part of the expedition was under the command of Admiral De La Graviere. All the vessels left Toulon and Brest on Nov. 20th. The military portion embarked at Algerian ports. The *Massena*, flagship, took 500 Zouaves at Oran. The number of vessels was 14, carrying 314 guns, and 4,058 men.

The French military branch of the Mexican expedition consisted of 1 battalion 2d Regiment Zouaves; 1 mounted company 2d Regiment Chasseurs d'Afrique; a detachment of artillery; a detachment of engineers. These troops were all taken from the army in Algeria. They were embarked in the *Aube* and *Massena* on the 19th and 20th of November.

Number in all.....	3,000
Add sailors and marines	4,058

Total men.....	7,058
----------------	-------

The first division of the Spanish fleet sailed from Havana for Vera Cruz on the 28th of November; the second division on the 1st of December, and the third on the second. They preceded the Commander-in-Chief, Gen. Prim, who left Cadiz in the *Ulloa* on the 22d of November. The transports employed by the Spanish Government to convey troops to Mexico included some 20 vessels. The naval portion of the Spanish part of the expedition consisted of 18 vessels, carrying 461 guns and 5,250 men.

The military branch of the Spanish expedi-

tion consisted of 2 battalions of Chasseurs; 1st battalion of the infantry regiment Naples; 1st battalion of the infantry regiment of Cuba; 4 companies of the 1st battalion of Naples; 4 companies of the 2d battalion del Rey.

Total military force.....	6,000
Add sailors and marines.....	5,250

Total	11,250
-------------	--------

The question of the future of Mexico was discussed early in September, and a rumor prevailed that Don Juan de Borbon was to be selected as the future sovereign. This rumor induced that gentleman to publish a card declining the proposed honor.

The expedition being ready, all the Spanish fleet left Havana, and at 11 o'clock, December 8th, arrived off Vera Cruz. On the 12th two officers had an interview with the Governor, who replied that, in obedience to orders received from his Government, he had published that morning a proclamation requiring that all the forces should abandon the city and the forts; that no resistance would be offered to the entry of the expeditionary army, nor to the occupation of the city. Notwithstanding this he desired to reply officially within the twenty-four hours given him.

Accordingly on Sunday, the 15th, he replied that he was abandoning the place and retiring with his troops.

On the 17th, in the morning, taking advantage of some hours of calm weather, Brigadier-General Don Carlos Vargas, second in command of the expeditionary forces, who had been appointed Civil and Military Governor of the city, disembarked with Captain Joaquin Ibanez and the second officer of the frigate *Petronila*, two aids and some officers of the staff, engineers and artillery. All were cordially received by the multitude, which crowded the wharf, and by a committee of the city government. Captain Don Rafael Arias was appointed Governor of San Juan d'Ulloa. The following proclamation was issued:

PROCLAMATION TO THE PEOPLE OF VERA CRUZ.

VERA CRUZANS: The Spanish troops that occupy your city do not come for conquest nor interested motives. The duty of demanding satisfaction for the non-fulfilment of treaties and violence committed against our countrymen, as well as the necessity for guarantees that such outrages shall not be repeated, alone bring them. Until these objects have been attained, here and wherever events may lead it, the Spanish army, with its rigorous discipline, will know how to preserve public tranquillity, at whatever cost; to protect peaceful inhabitants, and chastise, with severity, the disturbers of order, subjecting them to the military committee which shall be appointed to proceed against all classes of delinquents.

Vera Cruzans, you have nothing to apprehend. You know the Spanish soldier, and your very attitude has just proven it to me. Devote yourselves, therefore, to your business, and confide in what will be the greatest satisfaction for this army, after having fulfilled the mission with which the Queen has intrusted it, to return to their country in the assurance of having deserved your friendship.

MANUEL GASSETT,
Commander-in-Chief of the Spanish Forces.

VERA CRUZ, Dec. 17, 1861.

On the same day the city was declared under martial law.

In the mean time the Mexicans in the interior had been expecting the allied fleet at Vera Cruz and Tampico. The general feeling throughout the country seemed to be a spirit of hatred and defiance to Spain. All the usual factions and feuds in the nation appeared to be giving way to the sentiment of united resistance to their common enemy; and their frequent remark was, that if the Spaniards came alone they would be heartily welcomed. No resistance would be made at Vera Cruz. In fact, San Juan d'Ulloa was dismantled and her guns taken inland. Apparently a most determined opposition would be made to any Spanish invasion of their country.

On the 12th of December the Mexican General issued the following:

PROCLAMATION OF THE MEXICAN GENERAL URAGA.

HEAD-QUARTERS, VERA CRUZ, Dec. 12, 1861.

Considering that a foreign armed force has appeared in the waters of the Gulf, and that the Mexican soil may be invaded at any moment; that, in such an event, the supreme Government has ordered the evacuation of the city of Vera Cruz and Fortress of Ulloa; that it is the duty of every Mexican to rush to the defence of the independence and integrity of the territory, I have resolved to decree:

ARTICLE 1. From the moment the foreign armed force disembarks, of whatever nation it may be, all communication is forbidden the citizens of this place, whether from without, inwards, or *vice versa*, unless with a passport from these head-quarters.

2. The transgressors of this regulation shall be considered and treated as spies, and their goods confiscated.

3. Communication with the points occupied by the invaders is also forbidden. The individual who shall be apprehended between the lines of operations shall likewise be treated as a spy.

4. Those who should transgress, for the purpose of furnishing victuals or other succor to the enemy, shall be considered as traitors to the country, forfeiting whatever may be found in their possession, all other property of theirs besides being confiscated.

5. It being ordered that cattle and all other kinds of animals be withdrawn immediately from whatever point a foreign force may occupy, all objects of that nature, which may be found within a radius of eight leagues twenty-four hours after the occupation of said point, shall be considered as public property, seized by the national forces, and sent to the nearest Government storehouse, without the responsibility incurred by the owner for his disobedience being interfered with.

6. Within the period of twenty-four hours after the publication of this decree, the owners of horses in this city shall send them inward to a distance of eight leagues from the coast, or those who prefer shall present themselves to the Chief of the Treasury Department that he may purchase them for the national service. Those who allow the twenty-four hours to elapse without having done one or the other, shall be punished in conformity with the laws and their horses taken from them.

7. Within the period of twenty-four hours owners of mules shall present themselves in the Mayor's office to give a statement of the number of beasts they have in the city, and the places wherein they are kept. Those who act contrary to this regulation shall be subject to the same penalties as stated in the preceding article.

8. The Mexican citizen who, failing in his duty, shall not take arms in defence of his country, but remain in the enemy's ranks, shall be considered as a traitor.

JOSE LOPEZ URAGA.

On the 27th of December four vessels of the French portion of the expedition arrived. They

were the screw ship-of-the-line *Massena*, with Vice-Admiral M. Julien de la Gravière and troops on board, and the frigates *La Guerrière*, *L'Ardente*, and *L'Astrée*. There was a rumor that the English, in anticipation of a war with the United States, would withdraw from all active participation in the affairs of Mexico. The apprehended difficulty with the United States was, however, adjusted.

The Spaniards remained in possession of Vera Cruz to the close of the year, when the French and English fleets made their appearance. Most of the insurgent chiefs, except Marquez, submitted to the Government. General Gassett confined himself to Vera Cruz, and Uraga promised that he would not attack him there, but that he must not attempt to move inland.

MICHIGAN, one of the northern interior States of the American Union, admitted in 1837, is situated between lat. 41° 40' and 48° 20' N., and long. 82° 25' and 90° 34' W. from Greenwich. Its land area is 56,243 square miles, or 35,995,520 acres. Population in 1860, 749,112. It is bounded N. by Lake Superior, which separates it from British America; E. by St. Mary's Strait or River, Lake Huron, St. Clair River, Lake St. Clair, Detroit River, and Lake Erie; S. by Ohio and Indiana, and W. by Lake Michigan, the Menominee and Montreal rivers, and the chain of lakes lying between their head-waters. It is divided into 73 counties. The valuation of the real and personal property of its citizens in 1850 was \$59,787,255; in 1860, \$257,163,983.

The Legislature of the State met on the 2d of January, 1861, and the retiring Governor, Wisner, delivered his annual Message to both Houses, in which he took strong ground against the right of secession, charged the President of the United States with misrepresenting the principles of the Republican party, and attributed the present sectional excitement to misrepresentation by the northern democratic press, as to the intentions and designs of that party.

In relation to the Personal Liberty laws of this State, he said, if they were unconstitutional and in conflict with the Fugitive Slave law, they should be repealed; but said: "These laws are right, and speak the sentiments of the people, are in strict accordance with the Constitution, and ought not to be repealed. Let them stand. This is no time for timid and vacillating counsel, while the cry of treason is ringing in our ears."

On the 3d of January Gov. Blair, the newly elected governor, delivered his inaugural, and maintained substantially the same views as his predecessor.

In discussing national affairs he denied the right of secession, and in alluding to the present condition of South Carolina, said: "If it could properly be done, I presume the country generally would be willing to let that restless little nation retire from the confederacy forever; but that cannot be without admitting the

right of secession to exist in all the States, and no government then remains to us but only a voluntary association of States, dissolvable at the pleasure of any of them.

"If South Carolina may of right secede, then may also New York and Louisiana, thus cutting off the free right of way of the entire Northwest to the ocean in both directions. The doctrine cannot be admitted. Self-preservation, if no other reason, would compel us to resist."

He claimed that the Constitution of the United States is not a compact or league between independent sovereign States; on the contrary, that it is the foundation of a government established by the people of the United States as a whole, perpetual in its character, and possessing all the elements of a sovereign power and nationality. He denied that the Personal Liberty laws have had the effect to prevent the execution of the Fugitive Slave law in a single instance, but whenever an appeal had been made to the Courts to enforce that law, it has been done in good faith.

He invited judicial scrutiny into the legislation of the State, and was willing to abide by the result, but was not willing that the State should be humiliated by compliance with the demand to repeal these laws, accompanied by threats of violence and war. He concluded by recommending that, at an early day, the Legislature should make it manifest to their representatives in Congress, and to the country, that Michigan was loyal to the Union, the Constitution and the laws, and would defend them to the uttermost, and proffer to the President of the United States the whole military force of the State for that purpose.

The Legislature acted upon this recommendation, and on the 2d of February passed the following resolutions:

Whereas certain citizens of the United States are at this time in open rebellion against the Government, and by overt acts threaten its peace and harmony, and to compass its final overthrow; therefore,

Resolved, That the Government of the United States is supreme, with full inherent powers of self-protection and defence.

Resolved, That Michigan adheres to the Government as ordained by the Constitution, and, for sustaining it intact, hereby pledges and tenders to the General Government all its military power and material resources.

Resolved, That concession and compromise are not to be entertained or offered to traitors, while the rights and interests of Union-loving citizens should be regarded and respected in every place and under all circumstances.

Resolved, That his Excellency the Governor be requested to forward a copy of these resolutions to our Senators and Representatives in Congress, and to the Governors of our sister States.

The same day a resolution which had been offered in the Senate, authorizing the Governor to appoint five commissioners to the Peace Convention at Washington, was rejected—yeas 15, nays 15.

On the 11th of March, after an animated debate, the House of Representatives indefinitely postponed the consideration of the bill

for the repeal of the Personal Liberty law: yeas 48, nays 24.

The call of the President for troops on the 15th of April met with a hearty response from the people of Michigan. On the 17th inst., the venerable Gen. Cass made a vigorous and earnest speech in favor of the war, and the maintenance of the Union and the Constitution. In every part of the State men and means were promptly offered. On the 25th of April the Governor issued his proclamation for an extra session of the Legislature to meet on the 7th of May. Five regiments had then been offered to him, and nine were forming. The Legislature met at Lansing on the 7th of May. Governor Blair's Message recommended that the law of last session, providing for raising two regiments, should be amended to authorize four more, with power to raise ten if needed; that volunteers, while in service of the State preparatory to being mustered into service of the United States, should be paid the same rate as they were entitled to after being mustered into that service; also that all subsequent enlistments should be for three years, unless sooner discharged. To meet every exigency, he favored a loan of not less than one million of dollars, bonds to be issued in small amounts, in which case he believed the whole would be taken by citizens of this State; and he also recommended the Legislature to enact a law authorizing townships to levy taxes for the support of families of volunteers.

The Legislature adjourned on the 11th, having first passed the military, volunteer relief, and loan bills, by a unanimous vote. The first provided that new regiments could be enrolled as directed by the Governor, and be transferable at the President's order into the Federal service. The loan bill provided for \$1,000,000 loan, by the issue of bonds running 25 years, and drawing seven per cent. interest.

The quota of Michigan, under the call for three-months men, was only a single regiment, and only one was enlisted for that time; all subsequent enlistments being for three years. On the 1st of January, 1862, the State had raised, and sent into the field, besides this regiment, according to the report of Adjutant-General Robertson, the following troops:

Infantry regiments	17
Cavalry regiments (in service)	3
Lancers' regiment (organizing)	1
Engineer regiment	1
Sharpshooters, companies	6
Artillery, companies	7
Horseguard, battalion	1

The foregoing is composed of the following number of men:

Commission officers	663
Enlisted men	20,885
Companies organized in Michigan, and gone into service in other States	1,679
Men enlisted in other States	778
Total	24,000
Quota required from Michigan	19,500
Excess	4,500

The first regiment was ready and equipped with arms and ammunition on the 19th of April, four days after the call of the President, and left Detroit under order of the War Department on the 13th of May, being the first regiment which arrived at the seat of war from any State west of the Alleghany Mountains. The second regiment was ready on the 29th of April.

Michigan has 799 miles of completed railway in her territorial limits, and 605 more in progress. Her completed roads have cost for construction and equipment \$32,296,379.

Congress had granted lands in aid of certain railroads in Michigan, and, in consequence of the difficulties of the times, they had not been able to fulfil all the conditions of the donation.

The last Legislature of Michigan, therefore, not only passed a law extending the time for completing the land-grant railroads the full time allowed by the act of Congress making the grant, but also one giving them two hundred and forty sections as soon as they shall complete twenty continuous miles of road; provided that the Lansing, Amboy, and Traverse Bay Road shall be completed to Lansing City from Owosso before being entitled to the additional one hundred and twenty sections. This last law, it is confidently asserted, will enable the companies to make such negotiations as are alone required to finish these important roads.

The upper peninsula has the finest copper mines in the world, and iron in vast abundance; and, since 1839, that portion of the lower peninsula, lying along the Saginaw River, has proved to be extremely rich in salt. In 1860 ten artesian wells were sunk near the Saginaw, at distances of two to fifteen miles from each other; and in 1861 these wells yielded brine equal to the daily production of 7,500 bushels of salt of excellent quality, for which Chicago and St. Louis furnished a ready market at high prices. The cheapness of fuel and of barrels at this point greatly reduces the cost of manufacture, which is stated not to exceed 75 to 80 cents per barrel. The discovery of the existence of an accessible brine of great strength at this point was due to the geological survey of the State, which has established the fact of an extensive stratum of salt rock within a thousand feet of the surface.

The Lake Superior metalliferous belt extends within the limits of Michigan alone, as measured on the range, 160 miles, averaging five miles in breadth, and is divided into three districts, viz.: the Ontonagon, the most northern; the Keweenaw Point, the most eastern; and the Portage Lake, lying mostly below and partly between the range of the two. In the first are situated the Minnesota, the Rockland, the National, and a multitude of other mines of lesser note, profit, or promise. In the second are the Cliff, the Copper Falls, and others. In the last are the Pewabic, Quincy, Isle Royale, Portage, Franklin, and numerous others. Each district has some peculiarities of product,

the first developing more masses, while the latter are prolific in vein rock, the copper being scattered throughout the rock.

Active operations were first commenced in 1845, but it was not until 1851 that mining was properly begun. It was then difficult to approach the region, on account of the rapids of St. Mary's River. The means of subsistence, every tool for work, and all machines were required to be carried hundreds of miles frequently on the backs of men and beasts to the scene of labor. The opening of the St. Mary's ship canal and the entrance into Portage Lake, removed the difficulties and gave a great impetus to the mining interests.

There have been, since 1845, no less than 116 copper mining companies organized under the general law of the State. The amount of capital invested and now in use, or which has been paid out in explorations and improvements, and lost, is estimated by good judges at \$6,000,000. The nominal amount of capital stock invested by all the companies which have charters would reach an indefinite number of millions.

The copper is smelted chiefly in Detroit, Cleveland, and Boston, the works in Detroit being the largest. There is one establishment at Pittsburg, which does most of the smelting for the Cliff mine; one at Bergen, New Jersey, and one at New Haven, Connecticut. Prior to the erection of these works the mineral was shipped to London, being taken over as ballast in packet ships at low rates.

The aggregate debt of the State of Michigan is \$2,316,328 94. This is composed mostly of an old debt of "\$5,000,000 loan," so called, contracted with the United States Bank, and the instalments on which due the State were not paid by the institution. The debt was subsequently adjusted, and the new bonds form the chief part of the existing debt, and are due in 1862. There are also \$100,000 of canal bonds guaranteed by the State. The 7 per cent. war loan was mostly negotiated in New York, and bearing 7 per cent. interest, commanded a premium in the market. The expenses of the State are, in round number, \$720,000, and are nearly met by the revenues derived from a tax of 1 mill per dollar on real and personal property, that amounts in the aggregate to \$275,762,771. There are several trust funds derived from sales of land granted by the General Government, and appropriated by the Constitution of the State for educational purposes.

An amendment to the State Constitution was adopted in 1860 by the people, which provides that "the officers and stockholders of every corporation for banking purposes issuing bank notes or paper credits, to circulate as money, shall be individually liable for all debts contracted during the term of their being officers or stockholders of such corporation or association equally and ratably to the extent of their respective shares of stock in any such corporation or association." For operations of banks, *see* BANKS.

MINNESOTA, one of the younger States of the Union, admitted in 1858, and lying in the extreme northwest of the States east of the Rocky Mountains, is bounded north by British America, east by Lake Superior and Wisconsin, south by Iowa and Missouri Territory, and west by Nebraska Territory. The territory of the State is the most elevated tract of land between the Gulf of Mexico and Hudson's Bay; from its central heights, its waters flow to every point of the compass. It abounds in lakes of every size, from those of forty miles in extent to small ponds of less than a mile in circuit. There are two outlets for the products of the country: one by way of the Mississippi Valley, and one by way of Lake Superior through the Lake and the east. The great export of the State is lumber. The population in 1850, was 6,077; in 1860 it had increased to 171,793 white and 229 free colored. The ratio of increase during the previous ten years, was 2,745.19 white. The vote of the State at the presidential election in 1860 was: Lincoln, 22,069; Douglas, 11,920; Breckinridge, 748; Bell, 62. The qualifications are: that they be free white males, twenty-one years of age, who are, or have declared their intention of becoming, citizens of the United States, and who have resided in the United States one year, and in the State four months next preceding. Indians and persons of mixed white and Indian blood, who have adopted the language, customs, and habits of civilization, are also allowed to vote in any district in which they have resided for the ten days next preceding. The Legislature consists of thirty-seven Senators, elected for two years, and eighty Representatives, elected for one year. The Governor is elected for two years. The present Governor is Alexander Ramsey. The people of the State, by a large majority, were opposed to the movements in favor of secession in the Southern States, and were determined to uphold the Government under all circumstances.

The Legislature, on the 26th of January, passed the following resolutions, expressive of their views on the impending troubles of the country:

1. *Resolved*, That one of the vital and necessary principles which form the basis of all free government is, that the constitutional majority must always rule; and therefore, the right of the people of any State to withdraw from the Union, thereby hazarding the liberties and happiness of the millions composing this Confederacy, can never be acknowledged by us under any circumstances. We regard secession upon the part of any State as amounting directly to revolution, and precipitating civil war, with all its sad train of consequences.

2. *Resolved*, That the people of the State of Minnesota reiterate their unalterable devotion to the Constitution of the United States; and that if its provisions are strictly observed, it will, in its own words, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity.

3. *Resolved*, That Abraham Lincoln and Hannibal Hamlin, having been constitutionally and legally elected President and Vice-President of the United States, at a general election fully and freely participated in,

on the same day, by the people of every State of the Union, south as well as north, any attempt to dissolve or destroy the Union on account thereof is without excuse or justification, and should receive the condemnation of every patriot in the land.

4. *Resolved*, That we have heard with astonishment and indignation of the recent outrages perpetrated at Charleston, South Carolina, by firing upon an American steamer, sailing under the flag of our country, and that we expect of the General Government the strongest and most vigorous effort to assert its supremacy, and to check the work of rebellion and treason. Fully impressed with our duty to make every possible effort to uphold the Union, and to maintain the authority of the General Government, we hereby tender to the President of the United States for that purpose, through the Governor of this State, aid in men and money to the extent of our ability. When one or more States erect the standard of disunion, and place themselves in military array against the Government bequeathed to us by our ancestors, we can discover no other honorable or patriotic resource than to test, both on land and on ocean, the full strength of the Federal authority under our national flag.

5. *Resolved*, That we declare to each State of this Union our sincere desire to secure a renewal of that fraternal feeling which ought always to exist between citizens of a common country, and which distinguished the history of the nation for more than half a century. Especially do we express to those patriotic citizens of the Southern States, who have nobly and manfully exerted their utmost efforts to prevent the catastrophe of dissolution, our sincere gratitude and highest admiration.

6. *Resolved*, That the most sincere thanks of the nation are justly due to that distinguished patriot and veteran, Lieutenant-General Winfield Scott, for the prompt and decisive steps he has taken to stay the tide of revolution, and for the determined spirit he has evinced in maintaining the honor of our Government.

7. *Resolved*, That we never will consent or submit to the obstruction of the free navigation of the Mississippi River, from its source to its mouth, by any power hostile to the Federal Government.

The call for volunteers by the Federal Government, was responded to with ardor by the people of the State. Her troops were early in the field, and ranked among the bravest. Four full regiments of infantry, three companies of cavalry, and one of artillery, numbering 4,400 men, were raised for the war during the year, and the formation of a fifth regiment was commenced. The Governor, in his Message to the Legislature after the close of the year 1861, says: "The State now sends to the protection of the Union a greater number of men than her whole population in 1850."

MISSISSIPPI, one of the Southern States, is bounded north by Tennessee, east by Alabama, south by the Gulf of Mexico and Louisiana, and west by the Pearl and Mississippi rivers, which separate it from Louisiana and Arkansas. Cotton is the great staple of the State. The population in 1860 was 353,969 whites, 731 free colored, 436,696 slaves. Total 791,396. The ratio of increase during the previous ten years was 19·70 white, 21·40 free colored, and 40·93 slave. The Governor of the State is elected by the people once in two years. The Governor in 1861 was John J. Pettus. The Senate consists of thirty-two members, elected for four years, and the House of ninety-two members, elected for two years.

It had been an object with the people of the State, since the commencement of the anti-slavery agitation, to attach the border States to the extreme South as strongly as possible; or, rather, to make it as much as possible their interest to resist abolition. For this purpose, as early as 1833, the Legislature endeavored to cut off the market of the border States for their slaves by prohibiting the introduction of them as merchandise, or for sale, within the limits of the State. They further designed by these prohibitions to prevent the condensation of slavery in the extreme South. Similar restrictions were recommended to the Legislature by Governor Pettus at the session in November, 1860. Judge Harris, of the Supreme Court of the State, in the case of William Mitchell vs. Nancy Wells, gives the following as one of the reasons for adopting those restrictions at an early day:

"It was feared that if these border States were permitted to sell us their slaves, and thus localize the institution, they too would unite in the wild fanaticism of the day, and render the institution of slavery, thus reduced to a few Southern States, an easy prey to its wicked spirit."

The recommendations of Gov. Pettus, however, met with little favor. They were rejected by a unanimous vote of the Legislature.

A session of the Legislature was held at Jackson early in November, 1860, for the purpose of making the preliminary arrangements for a State Convention. It passed an act calling such Convention on the 7th of January, and fixed the 20th of December as the day upon which an election should be held for members. The measures were passed unanimously. The following resolutions were also adopted unanimously:

Resolved, That the Governor be requested to appoint as many Commissioners as in his judgment may be necessary to visit each of the slaveholding States, and designate the State or States to which each Commissioner shall be commissioned, whose duty it shall be to inform them that this Legislature has passed an act calling a Convention of the people of this State to consider the present threatening relations of the Northern and Southern sections of the Confederacy, aggravated by the recent election of a President upon principles of hostility to the States of the South, and to express the earnest hope of Mississippi that those States will co-operate with her in the adoption of efficient measures for their common defence and safety.

Resolved, That, should any Southern State not have convened its Legislature, the Commissioner to such State shall appeal to the Governor thereof to call the Legislature together, in order that its coöperation be immediately secured.

One of the members, Mr. Lamar, advocated separate secession of the State, and recommended that the Senators and Representatives in the Federal Congress from the Southern States should withdraw and form a Congress of a new republic, and appoint electors for President of a Southern Confederacy. The Legislature adjourned on the 30th of November, 1860.

The people of the State were divided on the question of secession. At Canton, on the 3d

of December, 1860, a meeting of citizens was held, at which the following resolutions were adopted with much unanimity:

Resolved, That we, the people here assembled, are opposed to the election to the State Convention of any man to represent Madison County, who will not pledge himself to oppose the secession of the State of Mississippi, unless such proposition shall first receive the direct sanction of the people at the ballot-box.

Resolved, That we have no word of advice to give to any Southern State, but if any such State should regard it as necessary to the safety of its people to withdraw from the Union, and any attempt should be made by the General Government to coerce her back—that in such case it would, in the opinion of this meeting, be the duty, as doubtless it would be the pleasure, of all the Southern people to coöperate in sustaining the withdrawing State, until the North should do full justice, repeal its obnoxious State laws, and give undoubted guarantees that the slavery question shall be forever settled on principles consistent with the Constitution and the rights and safety of the South.

At the largest public meeting ever held in Adams County, two delegates were nominated to the State Convention, who were opposed to separate State secession, and in favor of waiting for coöperation. At the same time a large meeting was held at Jackson which was addressed by some of the most distinguished men in the State. All the speakers were in favor of resistance, but of firm, decided, and temperate action. Some were in favor of staying in the Union if sufficient guarantees should be given for the protection of the rights of the South. A consultation and conference with the slaveholding States were desired. At Columbus a public meeting was also held, at which two of the resolutions unanimously adopted were as follows:

Resolved, That it is the opinion of this meeting that the State Convention about to assemble, ought to declare that Mississippi resumes the powers and functions delegated by her to the Federal Government, and absolves herself from every obligation thereto, to take effect on the 4th day of March, A. D. 1861, unless prior to that time the non-slaveholding States shall repeal all their odious, offensive, and unconstitutional legislation to defeat the rendition of fugitives from labor, restore the Federal Constitution to its original purity and design, and afford positive security for our domestic peace and property rights in the Union; provided that such a number of the slaveholding States shall coöperate with Mississippi as in the judgment of said Convention will justify her action.

Resolved, That the Legislature of this State be requested to procure in the mean time, as far as possible, the coöperation of the slaveholding States.

Arguments like the following were also urged with much eloquence: "There is no wrong if we are united that we cannot remedy under the Constitution, and no right that it cannot protect. Our safety, our existence, now depends upon the integrity of that instrument. The moment we throw off the restraints of the Constitution, surrendering to the North our rights in the territories, our interests in the public domain—in our courts, our navy and our army, and our Federal Treasury—that moment we are doomed to destruction. Secession can afford no palliation for our wrongs; it can only precipitate."

itate us into greater evils, as we must forfeit all our rights under the Constitution when we leave the Union and give to our Northern foes all they need to render their aggressive policy more effective."

The election of members of the State Convention took place on the 20th of December. The number of members to be elected was ninety-nine. Of these more than one-third were cooperationists. This distinction into cooperationists and secessionists only referred to the manner of proceeding which the States should adopt. The latter advocated immediate and separate secession, the former preferred consultation and cooperation with the other slaveholding States. The ultimate object of each was the same, as expressed in the following language by one of the citizens: "These are household quarrels. As against Northern combination and aggression we are united. We are all for resistance. We differ as to the mode; but the fell spirit of abolitionism has no deadlier and we believe no more practical foes than the cooperationists of the South. We are willing to give the North a chance to say whether it will accept or reject the terms that a united South will agree upon. If accepted, well and good; if rejected, a united South can win all its rights in or out of the Union."

The State Convention organized on the 7th of January, and immediately appointed a committee to prepare and report an ordinance of secession with a view of establishing a new confederacy to be comprised of the seceded States.

The committee duly reported the following ordinance, and it was adopted on the 9th—ayes 84, noes, 15:

The people of Mississippi, in Convention assembled, do ordain and declare, and it is hereby ordained and declared, as follows, to wit:

Sec. 1. That all the laws and ordinances by which the said State of Mississippi became a member of the Federal Union of the United States of America be, and the same are hereby repealed, and that all obligations on the part of the said State, or the people thereof, be withdrawn, and that the said State does hereby resume all the rights, functions, and powers which by any of the said laws and ordinances were conveyed to the Government of the said United States, and is absolved from all the obligations, restraints, and duties incurred to the said Federal Union, and shall henceforth be a free, sovereign, and independent State.

Sec. 2. That so much of the first section of the seventh article of the Constitution of this State, as requires members of the Legislature and all officers, both legislative and judicial, to take an oath to support the Constitution of the United States be, and the same is hereby abrogated and annulled.

Sec. 3. That all rights acquired and vested under the Constitution of the United States, or under any act of Congress passed in pursuance thereof, or any law of this State, and not incompatible with this ordinance, shall remain in force, and have the same effect as if the ordinance had not been passed.

Sec. 4. That the people of the State of Mississippi hereby consent to form a Federal Union with such of the States as have seceded or may secede from the Union of the United States of America, upon the basis of the present Constitution of the United States, except such parts thereof as embrace other portions than such seceding States.

Delegations from South Carolina and Alabama were invited to seats in the Convention, and were greeted with much applause. Efforts were made to postpone action, but these were voted down, and only fifteen voted nay on the final passage of the measure. The vote was subsequently made unanimous. The first aggressive movement was made by Governor Pettus on the 12th of January, when he ordered a piece of artillery to Vicksburg to hail and examine boats passing on the Mississippi. Movements were at the same time commenced to complete the organization of the military of the State. Judge Gholson, of the United States Court, resigned. South Carolina was recognized by the Convention as sovereign and independent, and steps were taken to cut asunder every tie to the United States, excepting the postal arrangements. The subsequent movements were reported to the Legislature by the Governor in a Message on the 15th of January. He says:

"As soon as I was informed that the Governor of Louisiana had taken the arsenal at Baton Rouge, I sent Col. C. G. Armstead with a letter to Gov. Moore, requesting him to furnish Mississippi with ten thousand stand of arms on such terms as he might deem just. Col. Armstead informs me that his Excellency has responded to my request by ordering eight thousand muskets, one thousand rifles, and six twenty-four pound guns, with carriages, and a considerable amount of ammunition, to be delivered to him, which will be shipped to Mississippi as soon as possible.

"I have drawn from the Treasury, on account of the appropriation, for the purchase of arms, ammunition, &c., \$38,311 21. Contracts for a considerable amount of arms and munitions of war have been made, which have not as yet been complied with, the arms not having been received or paid for. After paying all contracts now made or authorized to be made, there will be a considerable balance of the appropriation of \$150,000 made at the last regular session of the Legislature.

"Patriotic citizens in various portions of the State have extended to me pecuniary aid in arming the State. Hon. A. G. Brown sent me a bill on New York for \$500. Col. Jeff. Davis and Hon. Jacob Thompson have guaranteed the payment, in May or June, of twenty-four thousand dollars for the purchase of arms.

"We have embarked upon a stormy sea, and much of the peril which attends our voyage is to be apprehended from the thoughtlessness and passions of her new crew. Law and order must prevail, or there is no safety for the ship."

In the Convention, a resolution was offered on the 9th of February condemning the reformation of the Union, as follows:

Resolved, by the people of the State of Mississippi in Convention assembled, That the reconstruction of the Union of the United States of America is impracticable and unadvisable, and that hereafter Mississippi ought

to confederate only with States having similar domestic institutions to her own.

It was laid on the table by a vote of ayes 45, noes 20.

To prepare for any emergency, the Legislature, which had re-assembled to provide for the execution of the secession ordinance, levied an additional tax of fifty per cent. upon the amount of the then existing State tax, and also authorized the Governor to borrow two millions of dollars at ten per cent., payable in one, two, and three years, out of the State revenues.

At this time there existed much dissatisfaction among the wealthy and substantial citizens of the State. There was before them a prospect of heavy taxation, and of no benefits under the new order of affairs which they could not expect under the Union.

The State Convention, after an adjournment, now re-assembled on the 25th of March. On the same day the Permanent Constitution of the Confederate States was taken up and referred to a special committee. A resolution was also offered, as a test question, to instruct that committee to report an ordinance referring the Constitution directly to the people at the ballot-box for ratification or rejection. On the next day a motion to lay this resolution on the table was rejected by—ayes 37, noes 40. An ordinance was then offered, as a substitute, providing for the election of delegates by the people to ratify in Convention the Permanent Constitution; a motion to lay this substitute on the table was adopted—ayes 45, noes 30.

The committee then submitted an ordinance that the Constitution be ratified by the Convention.

Mr. Yerger submitted an ordinance which, after stating that any imperfections ought to be amended in the mode prescribed in the Constitution rather than bring the Confederacy into danger by delay, provided that the Convention adopts, assents to, and ratifies the Constitution, upon condition that the people of Mississippi reserve to themselves the right of peaceful secession, and that the Constitution shall not be held to bind the people of the State until it and the ordinance be submitted to them for ratification or rejection.

Mr. Wood next submitted an ordinance to submit the Constitution to the people of the State for ratification or rejection.

Mr. Fontaine introduced a substitute to provide for the assembling of another convention to ratify the Constitution.

The debate on the ratification of the Constitution was very spirited and able on the part of the advocates of the power of the Convention to ratify, as well as of those who contended for the right of the people to pass judgment on the Constitution under which they were to live. The vote on these various propositions was as follows:

Mr. Fontaine's ordinance, calling another convention to consider the Constitution, was rejected—ayes 28, noes 57.

Mr. Gholson offered a substitute for Mr. Wood's ordinance submitting the Constitution to a vote of the people; lost—ayes 32, noes 53.

Mr. Yerger's minority report, reserving to the State the right of secession, was lost; yea 13, noes 68.

Mr. Rogers offered a substitute for the majority report, which was laid on the table; yea 53, noes 28.

The majority of the committee had reported this ordinance:

Be it ordained by the people of Mississippi, in Convention assembled, and it is hereby ordained by the authority of the same, That the Constitution adopted by the Congress at Montgomery, in the State of Alabama, in the year of our Lord one thousand eight hundred and sixty-one, for the Permanent Federal Government of the Confederate States of America be, and the same is hereby adopted and ratified by the State of Mississippi, acting in its sovereign and its independent character; and the State of Mississippi hereby accedes to and becomes a member of the Confederacy provided for by said Constitution.

The vote on this ordinance was—ayes 78, noes 7. The large minority of thirty-two voted persistently in favor of referring the Constitution to the people for ratification until it was evident that their policy could not prevail; and, with the exception of the seven members referred to above, they then voted with the majority to give to the action of the State, as it appears, all the moral influence of a united vote.

On the next day an ordinance was adopted so amending the State Constitution as to make it consistent with the connection between the State and the Confederacy.

A resolution was also adopted, transferring the marine hospital at Vicksburg to the Confederate States.

The chairman of the Committee on the Coat of Arms and Flag of the State, who had previously made a report on the subject, having stated that the seal had been the subject of much criticism, pro and con, suggested that the "eagle's nest and serpent" be omitted therefrom. An ordinance was adopted, changing the seal in accordance with this suggestion.

The Convention soon after adjourned *sine die*.

The entire State seemed to take up arms upon the call for troops by the Confederate Government. That ardent and fiery people entered into the first movements of the struggle against the North with their whole soul. Women, even, urged their husbands, sons, and brothers, to volunteer, and they were almost unanimous for resistance. As early as the 14th of May notice was given that a sufficient number of companies to fill any probable requisition for troops by the Government of the Confederate States on the State of Mississippi had been tendered, and no more companies would be received until a further call should be made. One requisition for five regiments was filled in six days.

On the 25th of June the Legislature assem-

bled in extra session. The Governor, in his Message, congratulated the members that "the revolution inaugurated last fall had so far been prosperous and successful. The call to arms was responded to in a manner unknown to modern times. The call for means to support the volunteers was answered with such liberal devotion to the cause as to gratify the heart of the patriot." The object of the extra session he states in these words: "To enable a people thus willing and anxious to aid in the successful prosecution of this just and necessary war with the least injury to themselves, and to make some effort to prevent the ruinous sacrifice of the property, at forced sales, of those against whom constables and sheriffs now have executions in their hands, and of a much more numerous class against whom suits have been and will be instituted, I have again called you into extra session."

He suggested to them, as a means of retaliation on the Northern people, and, at the same time, of relieving the people of Mississippi from a part of the expenses imposed by the war, whether it would not be expedient and just to confiscate all the property of alien enemies within the limits of the State. In referring to the public arms and military stores, and the equipment of volunteers, he reported as follows: "About sixteen thousand stand of arms for infantry and cavalry have been brought to the State during my administration. This number has not, by thousands, supplied the demands of volunteers willing and anxious to receive them, and all the efforts heretofore made by the military board and myself have failed to procure a sufficient number; and to supply the deficiency we are now collecting the rifles and double-barrelled shot-guns throughout the State, to be used until better can be procured. Ten companies of cavalry and ten of artillery have been organized, and will soon be armed and equipped, ready for the field."

He also recommended a tax of one-fourth of one per cent. on land and slaves, which would add \$279,544 to the produce of the taxes. He suggested also a tax of three-tenths of one per cent. on all moneys "owned by any inhabitant of the State, or controlled by such inhabitant, loaned or employed in the purchase of notes, bills, stocks, or securities, for the payment of money without the limits of the State, or kept from use or circulation within the same, at any time during the year."

He also recommended that a law should be passed postponing for twelve months the sales of property under all judgments obtained in any court, and prohibiting the issuing of executions on all judgments which might be rendered, until the expiration of twelve months after the adjournment of the next regular session of the Legislature. Among the inducements to this measure he urged that the people, thus relieved from the necessity of keeping a large portion of their cotton crop, would be at liberty to loan it to the Government until the war closed.

He said that the State had made large advances to the Confederate Government. The quartermaster-general had been sent to Richmond with instructions to receive these advances and invest them in heavy winter supplies for the Mississippi troops in the field.

In regard to the defenses of the Mississippi Sound, Gov. Pettus reported that an agreement had been entered into with the Governors of Louisiana and Alabama by which they shared among them the expense of manning and arming small steamers for that service. There were also ordered to the coast a company of field-artillery and four companies of Mississippi Volunteers.

The Legislature, at this and a subsequent session, adopted measures to provide sufficient funds for all State purposes. An act was passed authorizing an advance of treasury notes, not to exceed the sum of \$5,000,000, to the planters of the State upon the hypothecation of cotton valued at twenty-five dollars a bale. The Senate proposed to pledge the faith of the State for their redemption—a feature which was stricken out by amendments to the bill going to the Lower House. These notes were to be received in payment of all State taxes and dues, and it was contemplated to obtain the consent of Congress for the Confederate collector to take them in payment of the national war tax, which the State determined to assume.

Another act was passed, the object of which was to relieve the indigent families of volunteers, of levying thirty per cent. in addition to the regular tax, which was to be distributed to the various counties, in proportion to the number of soldiers furnished.

The Legislature, on the 19th Dec., passed a bill requiring the banks to receive the State Treasury notes in payment of debts, and that the notes of the banks shall be receivable for all public dues except the Confederate war tax.

At the annual election, Jacob Thompson, Secretary of the Interior during the administration of President Buchanan, was chosen Governor of the State by a majority of about 1,400 over Governor Pettus.

Renben Davis, Israel Welch, H. C. Chambers, O. R. Singleton, E. Barksdale, John J. McRae, and J. W. Clapp were chosen Representatives to the Confederate Congress at Richmond. Albert G. Brown and James Phelan, Senators.

The following plan was adopted to secure a sufficient number of volunteers under an act of the Legislature:

"After providing for a thorough organization into companies of all able-bodied men between the ages of eighteen and fifty years, it is made the duty of each company commander, immediately after the organization of his command, to prepare a number of tickets, equal to the number of his company, one-third of which shall be numbered 'one,' one-third numbered 'two,' and one-third numbered 'three.' They are then to be placed in a box or hat, and be

drawn by the members of the company. Those drawing number 'one' shall constitute the first class, and shall be transferred into active service first, and the second class next, and the third next. Any person who furnishes a substitute must take the place of the substitute in the class from which he was taken. A like classification is to be made annually, and no man shall be required to serve in the regular service for more than twelve months."

The position of Mississippi in the southwestern part of the country protected her from any important hostile attack by the Federal troops. On the north were the States of Tennessee and Kentucky, and on the east Alabama, Georgia, &c. The State is accessible by water only at its southern point on the Gulf of Mexico. Here an attack was made, and the town of Biloxi captured on the 31st of December. This pleasant watering-place, visited by citizens of Mobile and New Orleans during the summer, is about ninety miles from the latter city. It is located on a part of the shore which projects into Biloxi Bay or Mississippi Sound. Its population is about 400, which is largely increased in the summer. In front of the town is a light-house, near which a sand-battery had been erected, which mounted two 6-pounders. The expedition consisted of the gunboats Water Witch, Lieut. A. K. Hughes, New London, Lieut. A. Reed, and the Lewis, Lieut. McKean Buchanan, with forty-five marines from the Niagara and Massachusetts, and two boats' crews from the Massachusetts, the whole under the command of Capt. Melancthon Smith. The expedition got under way from Ship Island at 7 o'clock in the morning, and arriving before the place, the vessels came to anchor. Commander Smith landed with a few men without opposition, the authorities surrendered the town, the guns were taken on board one of the vessels, and the expedition returned on the same evening.

The number of troops furnished to the Confederate service, including those recruited, but not sent out of the State, was about twenty thousand men. A portion of them were classed among the flower of the Confederate army.

In foreign commerce nothing was done during the year. The internal trade of the State on the Mississippi with the Confederate States was without restraint, but reduced to the smallest extent in consequence of the stagnation elsewhere, and the excitement in military affairs.

The vote for President in 1860 was: Douglas 3,283, Breckinridge 40,797, Bell 25,040.

MISSOURI, one of the largest States of the Union, and the first State formed wholly west of the Mississippi River, is bounded on the north by Iowa, on the east by the Mississippi River, on the south by Arkansas, and on the west by Kansas, Nebraska, and the Indian Territory. It is about 285 miles in its greatest length and 280 miles in width from north to south, and contains an area of 67,380 square miles. The population of the State in 1860 was

1,064,369 whites, 2,983 free colored, and 114,965 slaves; total, 1,182,317. The vote of the State for President in 1860 was: Lincoln 17,028, Douglas 58,801, Breckinridge 31,317, Bell 58,372. The Governor is elected for four years. The Senators are elected for four years, and the Representatives for two years.

Missouri is the only slaveholding Border State west of the Mississippi River. It had been so deeply and closely involved in the troubles in Kansas that the entire subject of conflict between the North and the South had, in fact, been developed within her limits. The public sentiment of the citizens was doubtless accurately expressed by Gov. Stewart in his valedictory Message to the Legislature on the 3d of January: "Our people would feel more sympathy with the movement, had it not originated amongst those who, like ourselves, have suffered severe losses and constant annoyances from the interference and depredations of outsiders. Missouri will hold to the Union so long as it is worth the effort to preserve it. She cannot be frightened by the past unfriendly legislation of the North, or dragged into secession by the restrictive legislation of the extreme South."

On the next day his successor, Governor Jackson, was inaugurated. In his Message, he insisted that Missouri must stand by the other slaveholding States, whatever course they may pursue. Missouri, however, was in favor of remaining in the Union so long as there was a hope of maintaining the guarantees of the Constitution. He was opposed to coercion in any event, but recommended the calling of a State Convention to ascertain the will of the people.

The question of holding a State Convention was brought before the Legislature, and the Senate passed the bill on the 16th of January, in favor of holding it, by a vote of yeas 31, nays 2. The clause, submitting the acts of the proposed Convention to the vote of the people, was in these words:

"No act, ordinance, or resolution shall be valid to change or dissolve the political relations of this State to the Government of the United States, or any other State, until a majority of the qualified voters of the State shall ratify the same."

The Convention was required to assemble at the capital on the 28th day of February.

The proclamation stated that the object of the Convention was "to consider the relations between the Government of the United States, the people and Governments of the different States, and the Government and people of the State of Missouri, and to adopt such measures for vindicating the sovereignty of the State and the protection of its institutions as shall appear to them to be demanded."

At the time when this election for delegates was held, the public sentiment of the State had unquestionably settled in favor of a continuance of Missouri within the Union, and in hostility

to secession, except to resist coercion. Mr. Seward and Mr. Cameron had made their conciliatory speeches in the Senate; a loud voice was heard all over the central States calling for the immediate adoption of measures for the salvation of the Union and the adjustment of all questions of difference between the contending sections; assurances of Crittenden and Douglas were made that an adjustment would take place; and the general belief out of Congress was that in less than ninety days all the difficulties would be honorably settled, unless the extreme Republicans should defeat all concessions, or unless South Carolina should determine to bring about a war by making an attack upon the forts or forces of the United States.

The result of the election of delegates to the State Convention was the choice of a large majority of Union men by a large majority in the popular vote.

The Convention met at Jefferson City on the 28th of February and organized by the choice of a temporary chairman and committees on credentials, and a permanent organization, and adjourned to the next day. The report of the Committee on Rules was unanimously adopted. It included a rule requiring the officers of, and the delegates to, the Convention to take an oath to support the Constitution of the United States and of the State of Missouri. A motion was made to go into secret session, which was almost unanimously defeated.

A long and warm discussion ensued on a motion to reconsider the vote on the adoption of the rule to take the oaths, after which the Convention adjourned to meet in St. Louis.

On the 4th of March the Convention assembled at St. Louis, and, by a vote of 63 ayes to 53 noes, consented to hear Mr. Glenn, the Commissioner from the State of Georgia.

Mr. Glenn was then introduced to the Convention. He read the articles of secession adopted by Georgia, after which he made a speech, stating the causes which induced her to sever her connection with the Federal Government, and strongly urged Missouri to join his State in the formation of a Southern Confederacy.

His remarks were greeted with hissing and hooting from the lobby, which the Chairman failed to suppress.

On the next day resolutions were adopted providing that a committee be appointed to wait on the Commissioner from Georgia, and inform him that Missouri dissented from the position taken by that State, and very kindly, but emphatically, declined to share the honors of secession with her.

On the 6th various resolutions were referred, declining cooperation with Georgia in the secession movement, &c. One, offered by ex-Governor Stewart, declared that no overt act by the Government justifying secession or revolution had been committed. One, by Judge Orr, said that "Ours is the best government in the world, and we intend to preserve it."

A great number of resolutions were offered and referred on the next day. Among the most important of them was one providing for a committee to confer with the Border States as to the best means of keeping the Western States in the Northern Confederacy; another, declaring that secession was a dangerous political heresy; that the Constitution had never failed to confer the blessings intended by its founders; that the Southern States had no excuse for seceding, and asking the Northern States to repeal all acts making the rendition of fugitive slaves difficult or impossible; another, that, believing there was no excuse for coercion, Missouri will furnish neither men nor money for that purpose, and that a National Convention be called, making the Crittenden compromise resolutions the basis of action; another, that the General Government be requested to yield up the custom-houses and other offices in the seceded States to the people, and withdraw the Federal officers and forces occupying them.

The report of the Committee on Federal Relations was made on the 9th of March by the Chairman, Gov. Gamble. It made an explanation of all the circumstances surrounding the position and affecting the interests of Missouri; recounted the evils of which the South might rightfully complain; admonished the North that the hostile feelings towards Southern institutions manifested by a large number of the people of that section were productive of evil, and expressed the hope that a better knowledge of the subject would remove their prejudices. It did not assume a threatening attitude towards either extreme section of the country, but pointed out the errors of both, and concluded with a series of resolutions declaring that there was no cause to compel Missouri to dissolve her connection with the Federal Union. That the people of the State earnestly desired a fair and amicable adjustment of difficulties and the Union perpetuated; that the Crittenden resolutions afforded a basis of adjustment that would forever remove the cause of the difficulties from the arena of politics; that a National Convention to amend the Constitution would promote the peace and quiet of the country; that the employment of military force by the Federal Government to coerce the seceding States, or the employment of force by the seceding States to assail the Government of the United States would inevitably plunge the country into civil war, and thereby extinguish all hope of an amicable settlement of the issues impending. They therefore earnestly entreat the Federal Government, as well as the seceding States, to stay the arm of military power, and on no pretence whatever bring upon the nation the horrors of civil war.

The minority report from two of the committees was presented the next day. This report opposed the National Convention recommended by the majority report, and proposed a convention of the Border Slave States in-

stead, to be held at Nashville, to decide upon such amendments to the Constitution as might be satisfactory to them. It also recommended the Crittenden propositions to the Nashville Convention, without, however, making an ultimatum, and advised the appointment of Commissioners to Delaware, Maryland, Virginia, Kentucky, Tennessee, North Carolina, and Arkansas, to secure the coöperation of those States to the movement.

Afterwards, Mr. Birch called attention to a communication in the "Republican" print of that day, hinting at a secret conspiracy to force Missouri out of the Union, and offered a resolution to appoint a committee to investigate the subject, and, if possible, ascertain the names of the conspirators; which passed, 52 to 30.

In the Convention, on the 17th of March, the following was proposed as an amendment to one of the resolutions reported by the committee:

"And, further, believing that the fate of Missouri depends upon the peaceable adjustment of our present difficulties, she will never countenance or aid a seceding State in making war upon the General Government; nor will she provide men and money for the purposes of aiding the General Government in any attempt to coerce a seceding State."

It was rejected—ayes 30, noes 61. Several amendments to the report of the committee, favoring secession, were laid on the table by decided votes.

On the 19th the Convention proceeded to vote on the report of the committee. The first resolution, declaring that there was no cause for Missouri to dissolve her connection with the Federal Union, passed unanimously; the second, that the people of the State earnestly desired a fair and amicable adjustment of difficulties and the Union perpetuated, it was proposed to amend by adding thereto the following: "That, wishing to restore peace to our country, we desire the Federal Government to withdraw the troops from the forts now occupied by them in the seceded States."

This amendment was laid on the table, and the resolution was then adopted with but one dissenting vote.

The third, that the Crittenden resolutions offered a basis for adjustment, was then adopted; and also the fourth, urging a National Convention to amend the Constitution. The fifth resolution was amended, so as to read as follows:

"That the Convention cherish an earnest desire to prevent civil war, and that this would be promoted by the withdrawal of the Federal troops from those forts where there is danger of collision, and that the Convention recommend the adoption of this policy."

In this form the resolution was passed; yeas 89, nays 6.

The last act of the Convention, previous to adjournment, was to elect seven delegates to the proposed Border States Convention.

On the 27th, in the State Legislature, the Committee on Federal Relations in the House reported the following joint resolution, which was passed by a vote of 62 to 42:

Resolved, That it is inexpedient for the General Assembly to take any steps for a National Convention, to propose any amendments to the Constitution, as recommended by the State Convention.

The excitement occasioned by the events of the latter part of April soon passed over. A more rational and hopeful view of affairs was entertained. The ill temper, and the disposition to hurry the State into rash and indefensible measures, were less apparent in Missouri than many other States. She was not, indeed, in a condition to commit herself to any distinct line of policy.

On the 20th of April the arsenal at Liberty was seized and garrisoned by a hundred men. The arms and cannon were distributed in the county. The Governor, at this time, declared his policy to be in favor of peace, saying that he convened the Legislature only for the purpose of more perfectly organizing the militia, and putting the State in a proper attitude of defence. He urged the President of the State Convention not to call that body together for the passage of a secession ordinance; he was in favor of retaining the present status of the State, leaving it to time and circumstances as they might arise to determine the best course for Missouri to pursue.

He thought the President, in calling out troops to subdue the seceded States, threatened civil war, and he pronounced the act unconstitutional, and as tending towards the establishment of a consolidated despotism. He recommended ample preparations against aggressions by all assailants. He appealed to the Legislature to do nothing imprudently or precipitately, but endeavor to unite all for the preservation of the honor of the State, the security of property, and the performance of the high duties imposed by their obligations to their country and to their God.

The news of the surrender of Camp Jackson was received at Jefferson City on the evening of the 10th, between five and six o'clock, and produced a great panic in the Legislature, then in session. The despatch was read, and the military bill, which was pending, passed within fifteen minutes afterwards, and was sent into the Senate, and likewise passed that body. This act took effect on its passage:

A military fund was created, for the purpose of arming and equipping the militia. To this was to be appropriated all the money then in the Treasury, or afterwards to be received on the assessments for 1860-'61, as well as the proceeds of the special tax of one mill on the hundred dollars levied to secure the completion of certain railroads, or from other sources, except a sufficiency to carry on the State Government, and support its penal and benevolent institutions.

The Governor was authorized to receive a

loan of \$500,000 from the banks, at any rate of interest not exceeding ten per cent.

Fifteen cents on the hundred dollars of the assessed value of taxable property in all the counties were ordered to be collected during the years 1861, 1862, 1863, in addition to the tax levied by law.

The Governor was authorized to purchase arms and munitions of war, and to issue \$1,000,000 in bonds, payable respectively in February, 1862, 1863, and 1864, in sums of not less than ten or more than five hundred dollars, to be received in payment of taxes.

That portion of the general revenue laws appropriating one-fourth of the two mill tax for the purpose of education was suspended until the year 1863; and any funds in the State Treasury, or which might come into the hands of the Treasurer, from the two mill tax, was placed to the credit of the military fund.

The military were put under the command of the Governor, and required to take an oath to obey him alone. Every able-bodied man in the State was made subject to do military duty.

During this time another despatch was received, stating that it was the battery of the southwest expedition which had been demanded and surrendered. This put a different phase on the matter, and was quite generally received as the true version of the affair.

The telegraph was then taken possession of by the Governor, and every thing remained in uncertainty, but the excitement began to decrease. The two Houses met at half-past seven, and continued in session until half-past nine. Peaceably-disposed citizens retired to rest, but shortly after twelve o'clock the whole town was roused by the ringing of bells and the shouts of men calling the members of the Legislature. A tremendous thunder-storm prevailed at the time, and continued for two or three hours, and the hurrying of citizens through the streets on foot and horse, the vivid lightning and heavy thunder, produced a scene not soon to be forgotten. The members hurried to the Capitol, (having first to pass sentinels who had been stationed about the building,) and immediately went into secret session, which continued until half-past three o'clock.

The cause of this unusual commotion was a despatch, which was received late at night, stating that two thousand troops would leave St. Louis at eleven o'clock for Jefferson City. Before the two Houses adjourned, however, news was received that the Osage bridge had been burned, and it was pretty well settled that if the troops were on their way they could hardly get through before ample preparations could be made to receive them. In consequence of this despatch, 12,000 kegs of powder were at once loaded into wagons and sent off into the country, and the State treasure was also removed to some place for safe keeping.

The next day matters became more quiet, and the true state of affairs was made known. The surrender of Camp Jackson and the killing

of citizens in St. Louis, as before reported, were confirmed. (*See St. Louis.*)

Under the influence of the despatches bills were introduced and passed both Houses after one o'clock on Sunday morning, giving the Governor more perfect control over St. Louis; also, the most ample power for suppressing riots and insurrectionary movements throughout the State. On the 15th the Legislature adjourned until September. On the same day Gen. Harney, who had arrived at St. Louis and resumed the charge of his military department, issued a proclamation to the people of the State. He described the military bill of the Legislature as a secession ordinance, and stated the purposes of the Federal Government in regard to Missouri. He said:

It is with regret that I feel it my duty to call your attention to the recent act of the General Assembly of Missouri, known as the military bill, which is the result, no doubt, of the temporary excitement that now pervades the public mind. This bill cannot be regarded in any other light than an indirect secession ordinance, ignoring even the forms resorted to by other States. Manifestly its most material provisions are in conflict with the Constitution and laws of the United States. To this extent it is a nullity, and cannot and ought not to be upheld or regarded by the good citizens of Missouri. There are obligations and duties resting upon the people of Missouri under the Constitution and laws of the United States which are paramount, and which, I trust, you will carefully consider and weigh well before you will allow yourselves to be carried out of the Union, under the form of yielding obedience to this military bill, which is clearly in violation of your duties as citizens of the United States.

It must be apparent to every one who has taken a proper and unbiased view of the subject, that, whatever may be the termination of the unfortunate condition of things in respect to the so-called "Cotton States," Missouri must share the destiny of the Union. Her geographical position, her soil, productions, and, in short, all her material interests point to this result. We cannot shut our eyes against this controlling fact. It is seen, and its force is felt throughout the nation. So important is this regarded to the great interests of the country, that I venture to express the opinion that the whole power of the Government of the United States, if necessary, will be exerted to maintain Missouri in her present position in the Union. I express to you, in all frankness and sincerity, my own deliberate convictions, without assuming to speak for the Government of the United States, whose authority, here and elsewhere, I shall at all times, and under all circumstances, endeavor faithfully to uphold.

On the 20th a plan was agreed upon between Gens. Harney and Price for the maintenance of peace and the avoidance of conflicts between the Federal and State Governments. Gen. Price pledged the whole power of the State to maintain order among the people, and Gen. Harney declared that, this being answered, he had no wish to make any further military movement in the State. They mutually enjoined upon the people to attend to their civil business, and expressed the hope that the elements which had so seriously threatened the public peace would soon subside.

This plan, however, proved unsuccessful, and on the 11th of June Gen. N. Lyon, Col. Frank P. Blair, and Major H. A. Conant, on

the part of the Government, and Gov. Jackson, Gen. Price, and Thomas L. Snead, on the part of the State, had a four hours' interview at St. Louis, which resulted in no pacific measures being adopted. Gov. Jackson demanded that no United States forces should be quartered or marched through the State.

General Lyon laid down his views, as a servant of the Government, somewhat to this effect: That if the Government withdrew its forces entirely, resort would be made to secret and subtle measures to provide arms and effect organizations which, upon any pretext, could put forth a formidable opposition to the General Government, and even while arming, combinations would doubtless form in certain localities to oppress and drive out loyal citizens, to whom the Government was bound to give protection, but which it would be helpless to do, as also to repress such combinations, if its forces could not be sent into the State. A large aggressive force might be formed and advanced from the exterior into the State, to assist it in carrying out the secession programme, and the Government could not, under the limitation proposed, take posts on these borders to meet and repel such force. The Government could not shrink from its duties nor abdicate its corresponding rights; and, in addition to the above, it was the duty of its civil officers to execute civil process, and in case of resistance to receive the support of military force. The proposition of the Governor would at once overturn the Government's privileges and prerogatives which he (Gen. Lyon) had neither the wish nor authority to do. In his opinion, if the Governor and the State authorities would earnestly set about to maintain the peace of the State, and declare their purposes to resist outrages upon loyal citizens of the Government, and repress insurrections against it, and, in case of violent combinations, needing cooperation of the United States troops, they should call upon or accept such assistance, and in case of threatened invasion, the Government troops took suitable posts to meet it, the purposes of the Government would be subserved, and no infringements of the State's right or dignity committed. He would take good care, in such faithful cooperation of the State authorities to this end, that no individual should be injured in person or property, and that the utmost delicacy should be observed towards all peaceable persons concerned in these relations. Upon this basis, in Gen. Lyon's opinion, could the rights of both the General and State Governments be secured and peace maintained.

After the interview the Governor returned to Jefferson City, and on the 12th issued his proclamation calling into active service fifty thousand of the State militia, "for the purpose of repelling invasion, and for the protection of the lives, liberty, and property of the citizens." He thus describes the events which had thus far occurred:

A series of unprovoked and unparalleled outrages

have been inflicted upon the peace and dignity of this Commonwealth, and upon the rights and liberties of its people, by wicked and unprincipled men, professing to act under the authority of the United States Government; the solemn enactments of your Legislature have been nullified; your volunteer soldiers have been taken prisoners; your commerce with your sister States has been suspended; your trade with your own fellow-citizens has been and is subjected to the harassing control of an armed soldiery; peaceful citizens have been imprisoned without warrant of law; unoffending and defenceless men, women, and children have been ruthlessly shot down and murdered; and other unbearable indignities have been heaped upon your State and yourselves.

To all these outrages and indignities you have submitted with a patriotic forbearance, which has only encouraged the perpetrators of these grievous wrongs to attempt still bolder and more daring usurpations.

It has been my earnest endeavor, under all these embarrassing circumstances, to maintain the peace of the State, and to avert, if possible, from our borders the desolating effects of a civil war. With that object in view, I authorized Major-General Price, several weeks ago, to arrange with General Harney, commanding the Federal forces in this State, the terms of an agreement by which the peace of the State might be preserved. They came, on the 21st of May, to an understanding, which was made public. The State authorities have faithfully labored to carry out the terms of that agreement.

The Federal Government, on the other hand, only manifested its strong disapprobation of it, by the instant dismissal of the distinguished officer who, on his part, entered into it; but it at once began, and has unintermittingly carried out a system of hostile operations, in utter contempt of that agreement, and the reckless disregard of its own plighted faith. These acts have latterly portended revolution and civil war so unmistakably, that I resolved to make one further effort to avert these dangers from you. I therefore solicited an interview with Brigadier-General Lyon, commanding the Federal army in Missouri. It was granted, and, on the 10th instant, waiving all questions of personal and official dignity, I went to St. Louis, accompanied by Major-General Price.

We had an interview on the 11th instant, with General Lyon and Col. F. P. Blair, jr., at which I submitted to them this proposition: That I would disband the State Guard and break up its organization; that I would disarm all the companies which had been armed by the State; that I would pledge myself not to attempt to organize the militia under the military bill; that no arms or munitions of war should be brought into the State; that I would protect all citizens equally in all their rights, regardless of their political opinions; that I would repress all insurrectionary movements within the State; that I would repel all attempts to invade it, from whatever quarter and by whomsoever made; and that I would thus maintain a strict neutrality in the present unhappy contest, and preserve the peace of the State. And I further proposed that I would, if necessary, invoke the assistance of the United States troops to carry out these pledges. All this I proposed to do upon condition that the Federal Government would undertake to disarm the Home Guard, which it has illegally organized and armed throughout the State, and pledge itself not to occupy with its troops any localities in the State not occupied by them at this time.

Nothing but the most earnest desire to avert the horrors of civil war from our beloved State, could have tempted me to propose these humiliating terms. They were rejected by the Federal officers.

They demanded not only the disorganization and disarming of the State militia, and the nullification of the military bill, but they refused to disarm their own Home Guards, and insisted that the Federal Government should enjoy an unrestricted right to move and station its troops throughout the State whenever and wherever that might, in the opinion of its officers, be

necessary either for the protection of the "loyal subjects" of the Federal Government, or for the repelling of invasion, and they plainly announced that it was the intention of the Administration to take military occupation, under these pretexts, of the whole State, and to reduce it, as avowed by General Lyon himself, to the "exact condition of Maryland." The acceptance by me of these degrading terms would not only have sullied the honor of Missouri, but would have aroused the indignation of every brave citizen, and precipitated the very conflict which it has been my aim to prevent. We refused to accede to them, and the conference was broken up.

He thus closes :

While it is your duty to obey all the constitutional requirement of the Federal Government, it is equally my duty to advise you that your first allegiance is due to your own State, and that you are under no obligation whatever to obey the unconstitutional edicts of the military despotism which has enthroned itself at Washington, nor to submit to the infamous and degrading sway of its wicked minions in this State. No brave and true-hearted Missourian will obey the one or submit to the other. Rise, then, and drive out ignominiously the invaders who have dared to desecrate the soil which your labors have made fruitful, and which is consecrated by your homes.

It is asserted in this proclamation that Gen. Harney's removal showed the disapprobation of the Federal Government with the arrangement concluded between that officer and Gen. Price. The arrangement was made on the 21st of May, but the order of removal was dated May 16th. This order was not served on Gen. Harney until May 29th or 30th, the same day that the General served a final answer in the case of Emmett McDonald, (*see* HABEAS CORPUS.) In the proclamation of Gen. Lyon, dated June 17th, five days after that of Gen. Jackson, there is a copy of an order from the War Department, directed to Gen. Harney, "commanding Department of the West, St. Louis," and dated May 27th. This is eleven days after the date of the order for Gen. Harney's removal, and two or three days before the order was served upon him. That order was as follows :

ADJUTANT-GENERAL'S OFFICE, }
WASHINGTON, May 27, 1861. }

Brigadier-General W. S. Harney, Commanding Department West, St. Louis :

SIR: The President observes with concern that, notwithstanding the pledge of the State authorities to coöperate in preserving the peace of Missouri, loyal citizens in great numbers continue to be driven from their homes. It is immaterial whether these outrages continue from inactivity or indisposition on the part of the State authorities to prevent them. It is enough that they continue, and it will devolve on you the duty of putting a stop to them summarily by the force under your command, to be aided by such troops as you may require from Kansas, Iowa, and Illinois. The professions of loyalty to the Union by the State authorities of Missouri are not to be relied upon. They have already falsified their professions too often, and are too far committed to secession to be admitted to your confidence, and you can only be sure of their desisting from their wicked purposes when it is not in their power to prosecute them. You will, therefore, be unceasingly watchful of their movements, and not permit the clamors of the partisans and opponents of the measures already taken to prevent you from checking every movement against the Government, however disguised, under the pretended State authority. The authority of the United States is paramount, and

whenever it is apparent that a movement, whether by order of State authority or not, is hostile, you will not hesitate to put it down. L. THOMAS,

Adjutant-General.

The proclamation issued by Gen. Lyon on June 17th, five days after that of Gov. Jackson, was designed not only to counteract the impressions produced by the latter, but also to state the reasons for the measures about to be commenced. Gen. Lyon states that the Governor and Legislature sympathized with the secession movements, and adopted every means to effect a separation of the State from the Federal Government. The establishment of encampments at an unusual period of the year, and for an indefinite time, could have no other object than the concentration of a large military force, to be subjected to the provisions of the military law. This bill provided for an obligation to the State on the part of all persons enrolled under its provisions irrespective of any obligation to the United States. This, of itself, Gen. Lyon declares, was a repudiation of the authority of the Federal Government, and, coupled with the surrounding circumstances, would lead to direct hostilities. The agreement between Gen. Harney and Gen. Price was based on a repudiation of this military bill, and all efforts of the militia of the State under its provisions. But it failed to define specifically the terms of peace, and how far a suspension of the terms of the bill should form a part of it. Hence constant complaints had been made to him, and next to Washington, accompanied with appeals for relief by peaceful citizens from the exasperating hardships imposed under the bill. This relief Gen. Lyon conceived it to be the duty of a just Government to give. Its policy is found, he says, in the order to Gen. Harney of May 27th above mentioned. He then proceeds in these words :

It is my design to carry out these instructions in their letter and spirit. Their justice and propriety will be appreciated by whoever takes an enlightened view of the relations of the citizens of Missouri to the General Government. Nor can such policy be construed as at all disparaging to the rights or dignity of the State of Missouri, or as infringing in any sense upon the individual liberty of its citizens. The recent proclamation of Governor Jackson, by which he has set at defiance the authorities of the United States, and urged you to make war upon them, is but a consummation of his treasonable purposes, long indicated by his acts and expressed opinions, and now made manifest. If, in suppressing these treasonable projects, carrying out the policy of the Government, and maintaining its dignity as above indicated, hostilities should unfortunately occur, and unhappy consequences should follow, I would hope that all aggravation of those events may be avoided, and that they may be diverted from the innocent, and may fall only on the heads of those by whom they have been provoked.

In the discharge of these plain but onerous duties, I shall look for the countenance and active coöperation of all good citizens, and I shall expect them to discountenance all illegal combinations or organizations, and support and uphold, by every lawful means, the Federal Government, upon the maintenance of which depend their liberties and the perfect enjoyment of all their rights.

N. LYON,

Brig.-General U. S. Volunteers, Commanding.

The movement of troops now immediately commenced. On the 13th the steamer *Iatan* left St. Louis with the second battalion of the First Regiment Missouri Volunteers, one section of Totten's Light Artillery, and two companies of regulars, and the steamer *J. C. Swan*, with the first battalion of the First Regiment, under Col. Blair, and another section of Totten's battery, and a detachment of pioneers, and General Lyon and staff, numbering fifteen hundred men, for Jefferson City. Horses, wagons, and all necessary camp equipage, ammunition, and provisions for a long march, accompanied the expedition.

On the 15th they arrived at Jefferson City. Five companies of Missouri Volunteers, under Lieut.-Col. Andrews, and a company of regular artillery under Captain Totten, all under Gen. Lyon, disembarked and occupied the city. Gov. Jackson and the officers of the State Government, and many citizens, had left on the 13th.

A company of regulars, under Major Conant, thoroughly searched the country for contraband articles, and found some wheels and other parts of artillery carriages. No violence was offered, but, on the contrary, the boats containing the Federal troops were received with cheers by a large concourse of the citizens.

On the next day Gen. Lyon left for Booneville. Previously, however, he placed Colonel Henry Boernstein, of the Second Missouri Volunteers, in command, and, on the next day, the 17th of June, he issued a proclamation declaring that he acted in the absence of the regular State authorities, who had fled, to prevent anarchy and lawlessness. The proclamation was as follows:

HEAD-QUARTERS CAPITAL, }
JEFFERSON CITY, June 17. }

To the Citizens of Cole County and the adjoining counties of Missouri:

CITIZENS: I have been appointed by the commanding General commander of this place, with the view to extend my authority over Cole and the adjacent counties, in order to preserve the peace and tranquillity of all citizens, and assist the authorities in the maintenance of the Government and of the Union, the enforcement of the constitutional laws of the country.

By the precipitate flight of Gov. C. F. Jackson and others, you have been left without State authority and without a government. This state of things would have produced lawlessness and anarchy and all their consequent evils. It has therefore been deemed necessary to supply this lack by appointing a commander of this place, having surveillance over the city and its vicinity. I therefore call upon the city authorities, as well as the authorities of this county, to continue the legal exercise of their official duties, and I will be always ready to lend them my assistance for the enforcement of the constitutional laws of the country. I do not wish to interfere with their official business, neither do I intend to meddle with the private business of the citizens. Your personal safety will be protected and your property will be respected. Slave property will not be interfered with by any part of my command, nor will slaves be allowed to enter my lines without written authority from their masters; and notwithstanding we are in times of war, I shall endeavor to execute my instructions with moderation and forbearance, and at the same time shall not suffer the least attempt to destroy the Union and its Government by the performance of any unlawful act. I shall prosecute

and deliver up to the proper authorities all traitors and their accomplices, aiders, and abettors.

I call upon all friends of the Union, and upon all good citizens, to form themselves into companies of Home Guards for the protection of the Union; to arm themselves and to drill. I will be very glad to have them, as far as possible, instructed by my officers, and to contribute with all my power to their military education. Every citizen who has business with the commander of the place, or intends to bring some complaint before him, will have free access to my head-quarters from 10 to 12 o'clock.

All my soldiers will observe the strictest discipline, and I hope that the support of all good citizens will enable me to keep this city and vicinity in perfect peace and order, and to keep far from them the terror and devastation of the war.

HENRY BOERNSTEIN,

Col. Commanding 2d Regiment Mo. Volunteers.

Meantime Governor Jackson, on leaving Jefferson City, summoned the State troops to his support at Booneville, which is situated on the south bank of the Missouri River, and forty-eight miles northwest of Jefferson City. Several companies from the adjacent counties joined him, under Col. Marmaduke.

Leaving Jefferson City on the 16th, Gen. Lyon proceeded on the steamers *A. McDowell*, *Iatan*, and *City of Louisiana*, up the river, and stopped for the night about one mile below Providence. Early in the morning he started with his force, and reached Rochefort before six o'clock, when he learned that a small force of the State troops was a few miles below Booneville, and preparing to make a vigorous defence. Proceeding on, they discovered, about six miles from Booneville, on the bluffs, a battery, and also scouts moving. A landing was made about 7 o'clock two miles lower down, on the south bank of the river; the troops began to move on the river road to Booneville. Following it about a mile and a half to the spot where it begins to ascend the bluffs, several shots announced the driving in of the enemy's pickets. On the summit of the bluffs the enemy were posted. The Federal force advanced and opened the engagement by throwing a few nine-pounder shells, while the infantry filed to the right and left, and commenced a fire of musketry. The enemy stood their ground manfully for a time, then began to retire, and withdrew in order. The Federal force was two thousand, only a small portion of which was engaged, and its loss was two killed and nine wounded. The number of the State troops was small. They admitted ten as killed, and several as having been taken prisoners. Some shoes, guns, blankets, &c., were taken by the Federal troops. This was the first hostile collision in the State like a skirmish or battle between those representing the authority of the United States and any of the officers of the State Government or forces under them. Gen. Lyon, therefore, deemed it necessary to issue the following proclamation:

BOONEVILLE, June 18, 1861.

To the People of Missouri:

Upon leaving St. Louis, in consequence of war made by the Governor of this State against the Government

of the United States, because I would not assume on its behalf to relinquish its duties, and abdicate its rights of protecting loyal citizens from the oppression and cruelty of the secessionists in this State, I published an address to the people, in which I declared my intention to use the force under my command for no other purpose than the maintenance of the authority of the General Government, and the protection of the rights and property of all law-abiding citizens.

The State authorities, in violation of an agreement with Gen. Harney on the 2d of May last, had drawn together and organized upon a large scale the means of warfare, and, having made a declaration of war, they abandoned the capital, issued orders for the destruction of the railroad and telegraph lines, and proceeded to this point to put into execution their hostile purposes towards the General Government. This devolved upon me the necessity of meeting this issue to the best of my ability, and accordingly I moved to this point with a portion of the force under my command, attacked and dispersed the hostile forces gathered here by the Governor, and took possession of the camp-equipage left, and a considerable number of prisoners, most of them young and of immature age, and who represent that they have been misled by frauds, ingeniously devised and industriously inculcated by designing leaders, who seek to devolve upon unreflecting and deluded followers the task of securing the object of their own false ambition.

Out of compassion for these misguided youths, and to correct the impressions created by unscrupulous calumniators, I liberated them upon the condition that they will not serve in the impending hostilities against the United States Government.

I have done this in spite of the well-known facts that the leaders in the present rebellion, having long experienced the mildness of the General Government, still feel confident that this mildness cannot be overtaxed even by factious hostilities, having in view its overthrow; but lest, as in the case of the late Camp Jackson affair, this clemency shall still be misconstrued, it is proper to give warning that the Government cannot always be expected to indulge in it to the compromise of its evident welfare.

Hearing that those plotting against the Government have falsely represented that the Government troops intended a forcible and violent invasion of Missouri for purposes of military despotism and tyranny, I hereby give notice to the people of this State that I shall scrupulously avoid all interference with the business, right, and property of every description recognized by the laws of the State, and belonging to law-abiding citizens. But it is equally my duty to maintain the paramount authority of the United States with such force as I have at my command, which will be retained only so long as opposition makes it necessary, and that it is my wish, and shall be my purpose, to visit any unavoidable rigor arising in this issue upon those only who provoke it.

All persons, who, under the misapprehensions above mentioned have taken up arms, or who are preparing to do so, are invited to return to their homes and relinquish their hostilities towards the Federal Government, and are assured that they may do so without being molested for past occurrences.

N. LYON,
Brigadier U. S. Army, Commanding.

On the 18th Governor Jackson was at Syracuse, about twenty-five miles south of Booneville, with about five hundred men. Property was taken from Union citizens, also the rolling stock of the railroad by the force, when they further retired to Warsaw, destroying the La-moine bridge, a costly structure, six miles west of Syracuse. On the same day a skirmish took place near the town of Cole, between a force

of Union Home Guards and State troops from Warsaw and that region, in which the former were put to flight.

Military affairs now progressed so rapidly that the force concentrated in the State reached 10,000 men, 2,500 of whom were stationed at Herman and Jefferson City, 3,200 at Rolla, the terminus of the southwest branch of the Pacific Railroad, 1,000 on the North Missouri Railroad, and 1,000 at Bird's Point, opposite Cairo. In addition to this there was a force of 2,500 remaining at St. Louis, which could be increased to 10,000 in a few hours by accessions from the neighboring camps in Illinois. These troops held the entire portion of the State north of the river, the southeast quarter lying between the Mississippi and a line drawn southward from Jefferson City to the Arkansas border, thus giving to the Federal Government the important points of St. Louis, Hannibal, St. Joseph, and Bird's Point as a base of operations, with the rivers and railroads as a means of transportation.

On the 24th the State Treasurer, the Auditor, and Land Register, who had retired with the Governor, returned to Jefferson City and took the oath of allegiance, and entered upon their duties.

The Home Guard of the capital were furnished with arms, and drilled under the direction of Col. Boernstein, and intrenchments for the defence of the place against attacks were erected. Several expeditions were sent by Gen. Lyon to various parts of the State where collections of secessionists were reported, but the latter succeeded in getting away before the arrival of the Federal troops.

In the latter part of June Gen. Fremont was ordered to take command of the Department of the West. Since Gen. Harney had been ordered to another post, Capt. Lyon, who had been promoted to a brigadier-generalship, had been in command. (See LYON.)

On the 5th of July a sharp engagement took place between some of Gen. Lyon's troops, under Col. Siegel, assisted by Col. Salomon, and a body of State troops under Gen. Rains and Col. Parsons, at a place called Carthage, in Jasper County, in Southwestern Missouri. (See CARTHAGE.) This movement of Gen. Lyon up the Missouri River, and through the central part of the State, had the effect to restrain the secessionists, and prevent them from organizing a formidable force.

On the 3d of July Gen. Lyon with his forces left Booneville for the southwestern counties of the State, intending to proceed as far as Springfield. Gen. Sweeney was in the meanwhile at Springfield with a small Union force, and on the 4th of July he issued the following proclamation, which explains in a few words the state of affairs in that quarter of the State:

HEAD-QUARTERS SOUTHWEST EXPEDITION, {
SPRINGFIELD, Mo., July 4, 1861. }

To the Citizens of Southwest Missouri:

Your Governor has striven to cause the State to withdraw from the Union. Failing to accomplish this

purpose by legislative enactment, he has already committed treason by levying war against the United States. He has endeavored to have you commit the same crime. Hence he has called for troops to enter the military service of the State, not to aid, but to oppose the Government of the United States.

The troops under my command are stationed in your midst by the proper authority of our Government. They are amongst you not as enemies, but as friends and protectors of all loyal citizens. Should an insurrection of your slaves take place, it would be my duty to suppress it, and I should use the force at my command for that purpose. It is my duty to protect all loyal citizens in the enjoyment and possession of all their property, slaves included. That duty shall be performed.

I require all troops and armed men in this part of the State now assembled, and which are arrayed against the Government of the United States, to immediately disperse and return to their homes. If this shall not be done without delay, those hordes of armed men will be taken prisoners or dispersed. I request every citizen who acknowledges he owes allegiance to the United States to aid me to prevent the shedding of blood and to restore peace and quiet to this portion of the State.

Those who have manifested a want of loyalty, either by word or act, towards the Government of the United States, are requested to appear before me, or any officer in command of any post or any detachment of troops under my command, and take an oath of allegiance to our Government. Gross misrepresentations of the oath which has already been administered to many of your most respectable citizens have been made. No loyal citizen will decline to take such an oath. It is the duty of every good citizen to bear allegiance to the Government and to support the Constitution of the United States, not to encourage secession by word or act, and to obey all legal orders emanating from the constituted authorities of the land. No loyal citizen will bear arms against his Government or give aid and support to the enemies of the country. Such, in brief, are the obligations required.

I assure you the Government of the United States will deal leniently yet firmly with all its citizens who have been misled, and who desire to maintain and preserve the best Government ever devised by human wisdom.

T. W. SWEENEY, U. S. A.,
Brigadier-General Commanding.

On the 16th Gen. Lyon reached Springfield, his command being then ten miles north of the town, and having been increased by the addition of the force under Gen. Sturgis. On the 20th orders were given to Gen. Sweeney with twelve hundred men, to break up a secession camp located at Forsyth, about fifty miles south of Springfield. The troops consisted of two companies of dragoons, a section of a battery, a part of the First Iowa and the Second Kansas regiments, and some mounted Kansas Volunteers. They reached their destination at two p. m. on Monday, just in time to see the enemy rapidly retreating. Blankets, rifles, provisions, and a large quantity of lead were captured.

On the 1st of August Gen. Lyon ordered his entire command, with the exception of a small guard, to rendezvous at Crane's Creek, ten miles south of Springfield. The command was composed as follows: five companies First and Second regiments Regulars, Major Sturgis. Five companies First Regiment Missouri Volunteers, Lieut.-Col. Andrews. Two companies Second Regiment Missouri Volunteers, Major Osterhaus. Three companies Third Regiment Mis-

souri Volunteers, Col. ——. Fifth Regiment Missouri Volunteers, Col. Salomon. First Regiment Iowa Volunteers, Col. J. F. Bates. First Regiment Kansas Volunteers, Col. Deitzler. Second Regiment Kansas Volunteers, Col. Mitchell. Two companies First Regular Cavalry, Captains Stanley and Carr. Three companies First Regular Cavalry, (recruits,) Lieut. Lathrop. Captain I. Totten's battery Regular Artillery, six guns, six and twelve-pounders. Lieut. Dubois' battery Regular Artillery, four guns, six and twelve-pounders. Captain Shaeffer's battery Missouri Volunteer Artillery, six guns, six and twelve pounders.

Brigadier-Generals Sweeney, Siegel, and Major Sturgis were intrusted with the most important subsidiary commands.

The march commenced that afternoon, and the camp reached about ten o'clock that night. The next morning the march was resumed, and about five o'clock that afternoon a body of the enemy were overtaken, when a brisk interchange of shots between the skirmishers took place. Upon this, a body of the enemy's infantry, about five hundred in number, approached, apparently with the design of cutting off an advanced body of the Federal infantry. Several volleys were interchanged, when a charge was made by a body of regulars. The enemy's ranks were thus broken, and they retreated. The place of this skirmish was Dug Springs. The march was continued as far as Curran, twenty-six miles from Springfield, but the heat of the weather, shortness of provisions, and the fact that a strong Confederate force was posted in front, and a large division had also moved in the direction of Sarcoux, while it was necessary that communication should be kept open to Springfield, led Gen. Lyon to determine to return to that town.

State troops under Gen. Price were collected in the southwestern counties, and encountered Gen. Lyon at Wilson's Creek, where a battle was fought, in which he lost his life, on the 10th of August. Gens. McCulloch and Price commanded the State troops and some Confederate forces from Arkansas. The locality of this battle is near Springfield, and it is called both Wilson's Creek and Oak Hill. (*See WILSON'S CREEK.*)

In the northern counties of Missouri there was the same division of sentiment, which was rapidly arousing a hostile spirit. Squads of troops from Illinois were soon stationed at important places, while State troops gathered to oppose them. The destruction of property and bloody skirmishes soon followed. At Monroe station, thirty miles west of Hannibal, an attack was made by secession troops, on July 11th, on the railroad station-house, which was burned with six passenger and eighteen freight cars. A portion of the railroad track was torn up on each side of the town. On the same night the bridge of the Hannibal and St. Josephs Railroad was burned. On the 15th Brig.-Gen. Hurlburt, in command of the volunteer

force, issued a lengthy proclamation to the people of the northeastern counties, warning them that the men or body of men who venture to stand in defiance of the supreme authority of the Union, endangered their lives.

On the 16th a skirmish took place at Millville, about thirty miles above St. Charles, on the North Missouri Railroad. About eight hundred Union troops had reached this point, when the track was torn up, and they were fired upon by a secession force, and an engagement followed, in which a small number were killed and wounded on each side.

A little further south, near Fulton, in Callo-way County, about twenty-three miles north-east of Jefferson City, a skirmish took place on the 17th, between Col. McNeil, with about 600 men, and Gen. Harris, with a considerable force, in which the latter were routed with a loss of several as prisoners. On the 19th Gen. Pope, who had been assigned to the command in Northern Missouri, issued the following proclamation:

ST. CHARLES, MO., July 19.

To the People of North Missouri:

By virtue of power and authority I have assumed command of North Missouri. I appear among you with a force strong enough to maintain the authority of the Government, and too strong to be resisted by any means in your possession usual in warfare. Upon your own assurances that you would respect the laws of the United States, and preserve the peace, no troops have hitherto been sent in your section of the country. The assurances for the last ten days, however, have plainly exhibited your lack of either the power or inclination to fully carry out the pledges, and the Government has therefore found it necessary to occupy North Missouri with a force powerful enough to impel obedience to the laws. As soon as it is made manifest that you will respect its authority and put down unlawful combinations against it, you will be relieved of the presence of the forces under my command, but not until then. I therefore warn all persons taking up arms against the National authority, who attempt to commit depredations upon public or private property, or who molest unoffending and peaceful citizens, that they will be dealt with in a most summary manner, without waiting civil process.

JOHN POPE,
Brigadier-General U. S. A., Commanding.

He had previously proceeded from St. Louis to St. Charles, where his head-quarters were established, in order to take charge of that department. His command in North Missouri was seven thousand strong, and so posted that Jefferson City, Booneville, Lexington, and all the principal points in the northern parts of the State were within easy striking distance.

About the same time that Gen. Lyon left St. Louis for Jefferson City, June 15, other troops, consisting of ten companies, left for Rolla, which is the termination of the southwest branch of the Pacific Railroad, and 113 miles from St. Louis. This force was increased subsequently, and active operations took place in that section of the State.

Such is a brief notice of the actual skirmishes and battles which took place in the State during the month of July, and including the events at Dug Springs and Wilson's Creek, in the month of August. They afford a very faint indi-

cation of the excitement, the uncertainty, and the division of sentiment which existed at that time. The majority of the people, however, were evidently warm Union men, and the decided action of the State Convention secured their adhesion to the support of the Federal Government.

Meanwhile, on the 6th of July, the following call was issued for the assembling of the State Convention:

ST. LOUIS, July 6, 1861.

We, the undersigned, being a majority of the Committee of the Convention of the State of Missouri, charged with the duty of convening said Convention, at such time prior to the third Monday of December, 1861, and at such place as they may think the public exigencies require, do hereby notify the said Convention to assemble and meet at Jefferson City in the State of Missouri, on the 22d day of July, in the year of our Lord eighteen hundred and sixty-one.

R. WILSON,
J. W. MCCLURE,
THOMAS T. GUNTT,
J. T. TINDALL,
JAMES R. MCCORMAC.

On the 22d of July the State Convention re-assembled. New questions were presented for its consideration, of which there were no precedents. The Governor, legally chosen, had gone from the capital after initiating against the National Government a military demonstration that had resulted in disaster to himself and his adherents. The Lieutenant-Governor, who, of right, should have succeeded the Governor, was a self-condemned exile from the State, and was believed to be engaged in schemes which incapacitated him for a proper discharge of the executive functions in a loyal commonwealth. Nor was the President pro tem. of the Senate present to take the place of the Lieutenant-Governor, nor the Speaker of the House to take the place of the President pro tem. Thus the Executive Department was without a head, and the important functions of Governor remained undischarged.

In the State Convention the first business was to declare the seat of Gen. Price, as President of the Convention, vacant. A committee of seven was appointed, to whom were referred several resolutions relative to the state of affairs. On the 25th the committee presented their report. It alluded at length to the unparalleled condition of affairs, the reckless course of the recent Government, and flight of the Governor and other State officers from the capital. It declared the offices of Governor, Lieutenant-Governor, and Secretary of State vacant, and provided that their vacancies should be filled by the Convention, the officers so appointed to hold their positions till August, 1862, at which time it recommended a special election by the people. It proposed to repeal the ninth section of the sixth article of the Constitution, and that the Supreme Court of the State should consist of seven members; and that four members, in addition to the three comprising the court, should be appointed by the Governor chosen by the Convention, to hold

office till 1862, when the people would decide whether the change shall be permanent. It proposed to abolish the State Legislature, and ordain that in case before the 1st of August, 1862, the Governor chosen by the Convention should consider that the public exigencies demanded, he should order a special election for members of the State Legislature. It recommended the passage of an ordinance repealing the following bills, passed by the Legislature in secret session in the month of May previous: the military fund bill, the bill to suspend the distribution of the school fund, and the bill for cultivating friendly relations with the Indian tribes. It proposed to repeal the bill authorizing the appointment of one major of the Missouri militia, and revive the militia law of 1859. The report was adopted.

The act relative to the school fund directed the Superintendent of Schools to postpone its apportionment for the year, and to let it remain in the Treasury, subject to the order of the General Assembly. This fund consisted of twenty-five per cent. (about \$200,000) of the general revenue; the dividends on the State's stock in the Bank of the State of Missouri, and other amounts, the proceeds of fines and forfeitures, the whole amounting to about \$250,000 per annum. This sum had for years been apportioned to the common schools of the State, and had been the chief support of those schools, rendering efficient service in the cause of education. The report of this committee was adopted. At the same time a resolution was passed that a committee of seven be appointed by the President of the Convention to prepare an address to the people of the State.

The report of the State Treasurer, in accordance with the instructions of the Convention, was made. The amount of money in the Treasury on the 24th of July was a little over \$57,000. The disbursements since the adjournment of the last session of the Legislature, had been over \$600,000.

A resolution was offered that there was no excuse, either in the present or future condition of the State, for default of payment of the interest on the State debt, and that it was pre-eminently her duty to pay it. After a lively discussion, several substitutes were offered, when the matter was referred.

On the 30th of July the Convention declared vacant the offices of Governor, Lieutenant-Governor, and Secretary of State by a vote of 56 to 25. The seats of the members of the General Assembly were also declared vacant by a vote of 52 to 28. On the next day the following officers were elected: Hamilton R. Gamble, Provisional Governor; Willard P. Hall, Lieutenant-Governor; Mordecai Oliver, Secretary of State. These officers were at once inaugurated, amid general rejoicing.

The first Monday in November was fixed as the day for the election by the people of State officers.

After the transaction of some unimportant

business, and the presentation of an address to the people of the State by the Convention, it adjourned until the third Monday in December, unless sooner called together by the new Government, if the public safety demanded it.

The address to the people of the State by the Convention, which was adopted on the 31st of July, states the action of the Convention and the necessity that existed for it, and closes with a vindication of its lawful power to perform what it had done. The necessity for its action arose out of the condition of affairs, which is thus described:

We have assembled in Jefferson under circumstances widely different from those that existed when the Convention adjourned its session at St. Louis.

We find high officers of the State Government engaged in actual hostilities with the forces of the United States, and blood has been spilt upon the soil of Missouri. Many of our citizens have yielded obedience to an ill-judged call of the Governor, and have assembled in arms for the purpose of repelling the invasion of the State by armed bands of lawless invaders, as the troops of the United States are designated by the Governor in his proclamation of the 17th day of June last.

We find that troops from the State of Arkansas have come into Missouri for the purpose of sustaining the action of our Governor in his contest with the United States, and this at the request of our Executive.

We find no person present, or likely soon to be present, at the seat of Government, to exercise the ordinary functions of the Executive Department, or to maintain the internal peace of the State.

We find that throughout the State there is imminent danger of civil war in its worst form, in which neighbor shall seek the life of neighbor, and bonds of society will be dissolved, and universal anarchy shall reign. If it be possible to find a remedy for existing evils, and to avert the threatened horrors of anarchy, it is manifestly the duty of your delegates, assembled in Convention, to provide such a remedy; and, in order to determine upon the remedy, it is necessary to trace very briefly the origin and progress of the evils that now afflict the State.

It is not necessary that any lengthy reference should be made to the action of those States which have seceded from the Union. We cannot remedy or recall that secession. They have acted for themselves, and must abide the consequences of their own action. So far as you have expressed your wishes, you have declared your determination not to leave the Union, and your wishes have been expressed by this Convention.

Any action of any officer of the State in conflict with your will, thus expressed, is an action in plain opposition to the principle of our Government, which recognizes the people as the source of political power, and their will as the rule of conduct for all their officers. It would have been but a reasonable compliance with your will, that after you had, through this Convention, expressed your determination to remain in the Union, your Executive and Legislative officers should not only have refrained from any opposition to your will, but should have exerted all their powers to carry your will into effect.

We have been enabled to ascertain by some correspondence of different public officers, accidentally made public, that several of these officers not only entertained and expressed opinions and wishes against the continuance of Missouri in the Union, but actually engaged in schemes to withdraw her from the Union, contrary to your known wishes.

After the adjournment of your Convention, which had expressed your purpose to remain in the Union, Governor Claiborne F. Jackson, in a letter addressed

to David Walker, President of the Arkansas Convention, dated April 19, 1861, says: "From the beginning, my own conviction has been that the interest, duty, and honor of every slaveholding State demand their separation from the non-slaveholding States." Again, he says: "I have been, from the beginning, in favor of decided and prompt action on the part of the Southern States, but the majority of the people of Missouri, up to the present time, have differed with me." Here we have the declaration of his opinion and wishes, and the open confession that a majority of the people did not agree with him.

But he proceeds: "What their future action (meaning the future action of the people) may be, no man with certainty can predict or foretell; but my impression is, judging from the indications hourly occurring, that Missouri will be ready for secession in less than thirty days, and will secede if Arkansas will only get out of the way and give her a free passage."

It will presently be seen, by an extract from another letter, what the Governor means by being ready for secession; but it is very remarkable that he should undertake not only to say that she would be ready to secede in thirty days, but further, that she will secede, when in fact your Convention, at that time, stood adjourned to the 3d Monday of December next. His declaration that the State would secede is made, doubtless, upon some plan of his own, independent of the Convention.

Nine days after this letter to the President of the Arkansas Convention, he wrote another, addressed to J. W. Tucker, Esq., the editor of a secession newspaper in St. Louis. This letter is dated April 28, 1861. The writer says: "I do not think Missouri should secede to-day or to-morrow, but I do not think it good policy that I should so openly declare. I want a little time to arm the State, and I am assuming every responsibility to do it with all possible despatch."

Again he says: "We should keep our own counsels. Everybody in the State is in favor of arming the State; then let it be done. All are opposed to furnishing Mr. Lincoln with soldiers. Time will settle the balance. Nothing should be said about the time or the manner in which Missouri should go out. That she ought to go, and will go, at the proper time, I have no doubt. She ought to have gone last winter, when she could have seized the public arms and public property and defended herself."

Here we have the fixed mind and purpose of the Governor, that Missouri shall leave the Union. He wants time—a little time to arm the State. He thinks secrecy should be preserved by the parties with whom he acts, in keeping their counsels. He suggests that nothing should be said about the time or the manner in which Missouri should go out; manifestly implying that the time and manner of going out, which he and those with whom he acted, proposed to adopt, were some other time and manner than such as were to be fixed by the people through their Convention. It was no doubt to be a time and manner to be fixed by the Governor and the General Assembly, or by the Governor and a military body to be provided with arms during the little time needed by the Governor for that purpose.

There have been no specific disclosures made to the public of the details of this plan, but the Governor expresses his strong conviction that at the proper time the State will go out.

This correspondence of the Governor occurred at a time when there was no interference by soldiers of the United States with any of the citizens, or with the peace of the State. The event which produced exasperation through the State, the capture of Camp Jackson, did not take place until the 10th of May. Yet, the evidence is conclusive, that there was at the time of this correspondence a secret plan for taking Missouri out of the Union without any assent of the people through their Convention.

An address to the people of Missouri was issued by Thomas C. Reynolds, the Lieutenant-Governor, in

which he declares that in Arkansas, Tennessee, and Virginia, his efforts have been directed unceasingly, to the best of his limited ability, to the promotion of our interests, indissolubly connected with the vindication of our speedy union with the Confederate States. Here is the second executive officer of Missouri avowedly engaged in travelling through States, which he must regard, while Missouri remains in the Union, as foreign States, and those States endeavoring, as he says, to promote the interests of our State.

The mode of promoting our interests is disclosed in another passage of the address, in which he gives the people assurance that the people of the Confederate States, though engaged in a war with a powerful foe, would not hesitate still further to tax their energies and resources at the proper time, and on a proper occasion in aid of Missouri. The mode of promoting our interests, then, was by obtaining military aid, and this while Missouri continued in the Union. The result of the joint action of the first and second executive officers of the State, has been that a body of military forces of Arkansas has actually invaded Missouri, to carry out the schemes of your own officer, who ought to have conformed to your will, as you had made it known at elections, and had expressed it by your delegates in Convention.

Still further to execute the purpose of severing the connection of Missouri with the United States, the General Assembly was called, and when assembled, sat in secret session, and enacted laws which had for their object the placing in the hands of the Governor large sums of money, to be expended in his discretion for military purposes, and a law for the organization of a military force, which was to be sustained by extraordinary taxation, and to be absolutely subject to the orders of the Governor, to act against all opposers, including the United States. By these acts, schools are closed, and the demands of humanity for the support of lunatics are denied, and the money raised for the purposes of education and benevolence may swell the fund to be expended in war.

Without referring more particularly to the provisions of these several acts, which are most extraordinary and extremely dangerous as precedents, it is sufficient to say that they display the same purpose to engage in a conflict with the General Government, and to break the connection of Missouri with the United States, which had before been manifested by Gov. Jackson. The conduct of these officers of the Legislative and Executive Departments has produced evils and dangers of vast magnitude, and your delegates in Convention have addressed themselves to the important and delicate duty of attempting to free the State from these evils.

On the same day, Lieut.-Gov. Reynolds issued a proclamation at New Madrid, addressed to the people of Missouri. He said: "I return to the State to accompany in my official capacity, one of the armies which the warrior statesman whose genius now presides over the affairs of our half of the Union, has prepared to advance against the common foe." His view of the posture of affairs, and the measures which should be adopted, is thus stated:

To provide for this very condition of things, our General Assembly, in May last, passed an act, by which, in view of the rebellion in St. Louis and the invasion of our State, the Governor was "authorized to take such measures as in his judgment he may deem necessary or proper to repel such invasion or put down such rebellion."

As that rebellion and invasion have been sanctioned by the Government and people of the North, one of the most proper measures to protect our interests is a dissolution of all connection with them. In the present condition of Missouri, the Executive is the only constitutional authority left in the free exercise of legitimate power within her limits. Her motto, "*Salus populi*

suprema lex esto," should be his guide; to him "let the people's welfare be the highest law." Under existing circumstances it is his clear duty to accept the actual situation of affairs, and simplify the real issues, by making, under the statute above mentioned, and subject to the future control of the General Assembly and the people, a provisional declaration, in the name and on behalf of the people of Missouri, that her union with the Northern States has been dissolved by their acts of war upon her, and that she is, and of right ought to be, a sovereign, free, and independent State.

The conviction that the decision of this question can be safely left to the patriotism of Governor Jackson, and would more properly emanate from the regular executive of the State, is the only ground for my not exercising the powers of Governor temporarily in me invested, and at once issuing a formal declaration to that effect. But in order that my position, both as a citizen and officer of Missouri's Government, may be distinctly understood, I deem it proper to declare that, disregarding forms and looking to realities, I view any ordinance for her separation from the North and union with the Confederate States, as a mere outward ceremony to give notice to others of an act already consummated in the hearts of her people; and that, consequently, all persons coöperating with the expedition I accompany will expect that, in the country under its influence, no authority of the United States of America will be permitted, and that of Missouri, as a sovereign and independent State, will be exercised with a view to her speedy regular union with her Southern sisters.

He further states that the forces of the Confederate States, under the command of Gen. Pillow, had entered Missouri on the invitation of Gov. Jackson, "to aid in expelling the enemy from the State," and thus adds:

By virtue of the powers vested in the Governor by the act before mentioned, approved May, 1861, entitled "An act to authorize the Governor of the State of Missouri to suppress rebellion and repel invasion," I do hereby, as acting Governor of Missouri, in the temporary absence of Governor Jackson, authorize, empower, and request General Pillow to make and enforce such civil police regulations as he may deem necessary for the security of his forces, the preservation of order, and discipline in his camp, and the protection of the lives and property of the citizens. By virtue of the same act I also extend like authority to Brigadier-General Thompson, from whose military experience and spirit brilliant services are confidently expected, in his command of the Missouri State Guard in this district.

THOMAS C. REYNOLDS,
Lieutenant-Governor of Missouri.

On the next day, August 1st, Brig.-Gen. Thompson followed with his proclamation to the people of Missouri, of which the following is an extract:

Come now, strike while the iron is hot! Our enemies are whipped in Virginia. They have been whipped in Missouri. General Hardee advances in the centre, Gen. Pillow on the right, and Gen. McCulloch on the left, with 20,000 brave Southern hearts to our aid. So leave your ploughs in the furrow, and your oxen in the yoke, and rush like a tornado upon our invaders and foes, to sweep them from the face of the earth, or force them from the soil of our State! Brave sons of the Ninth District, come and join us! We have plenty of ammunition, and the cattle on ten thousand hills are ours. We have forty thousand Belgian muskets coming; but bring your guns and muskets with you, if you have them; if not, come without them. We will strike your foes like a Southern thunderbolt, and soon our camp fires will illuminate the Merrimac and Missouri. Come, turn out!

JEFF. THOMPSON,
Brigadier-General Commanding.

After the State Convention had closed its labors, and previous to the separation of its members, Gov. Gamble and Lieut.-Gov. Hall were inaugurated, and made addresses. This was on the first day of August. On the 3d, Governor Gamble issued a proclamation to the people, in which, after stating that a most unfortunate and unnatural condition of feeling among citizens, amounting to actual hostility, and leading often to scenes of violence and bloodshed, existed in many parts of the State; also, that it was believed many citizens in arms had responded to the call of the Governor in June from a sense of obligation to obey the State authority, &c., he thus expresses the special object of his proclamation:

Now, therefore, I, Hamilton R. Gamble, Governor of the State of Missouri, in view of the foregoing facts, do hereby strictly charge and enjoin upon all sheriffs and other magistrates who are conservators of the peace, to use all the powers conferred upon them by law in arresting and bringing to punishment all persons who disturb the public peace, by using violence against any of their fellow-citizens, and especially are you charged to bring to justice all who combine to practise violence against other persons on account of their political opinions; and if force should be employed to resist you in the discharge of your duties to an extent that you cannot overcome by the means provided by law, you are charged to make known that fact to this Department, that proper measures may be taken in such case.

It is enjoined upon all citizens that they perform the duty of giving information of deposits of munitions of war belonging to the State, that they may come to the possession of the State without being captured by the troops of the United States.

It is further enjoined upon all citizens of suitable age to enroll themselves in military organizations, that they may take part in the defence of the State.

All citizens who are embodied under the act of the last session of the General Assembly, popularly called the "Military Law," are notified that the law has been abrogated, the troops disbanded, the commissions issued under it, as well as the commission under the act of the same session for the appointment of a Major-General, have been annulled, and all soldiers and officers are enjoined to cease action in a military capacity.

The officers and their troops belonging to the Confederate States, who have invaded Missouri, are notified that it is against the will of the people of Missouri that they should continue upon the soil of this State, and that their continuance in Missouri will be considered an act of war, designed to bring upon our State the horrors of war, which Missouri desires to avoid. They are therefore notified to depart at once from the State.

Given under my hand as Governor, and under the great seal of the State of Missouri, at Jefferson City, this 3d day of August, 1861.

HAMILTON R. GAMBLE.

Since the Governor's proclamation was written the following despatch has been received:

M. OLIVER, Secretary of State.

WASHINGTON, Aug. 8, 1861.

To His Excellency, H. R. Gamble, Governor of Missouri:

In reply to your message addressed to the President, I am directed to say that if, by a proclamation, you promise security to citizens in arms who voluntarily return to their allegiance and become peaceable and loyal, this Government will cause the promise to be respected.

I have the honor to be, &c.,
SIMON CAMERON, Secretary of War.

Two days after, on the 5th, Gov. Jackson,

who had hastily returned from Richmond, issued a provisional declaration of the independence of the State, and her separation from the Union. The reasons given to justify a separation of the State from the Federal Union, which had emphatically bought her territory and nurtured her institutions, were as follows:

In repeated instances, the Government and people of the States now remaining in that Union have grossly violated, in their conduct towards the people and State of Missouri, both the Constitution of the United States and that of Missouri, as well as the general, great, and essential principles of liberty and free government. Their President, Abraham Lincoln, in avowed defiance of law and the Constitution of the United States, and under the tyrant's plea of necessity, has assumed to regulate commerce with foreign nations and among the several States, stopping by violence our trade with our Southern neighbors, and depriving our citizens of the right secured to them by a special, solemn compact with the United States, to the free navigation of the Mississippi River. He has usurped powers granted exclusively to Congress, in declaring war against the Confederate States; to carry on this unholy attempt to reduce a free people into slavish subjection to him, he has, in violation of the Constitution, raised and supported armies, and provided and maintained a navy.

Regardless of the right reserved to the States respectively, of training the militia and appointing its officers, he has enlisted and armed, contrary to law, under the name of Home Guards, whole regiments of men, foreigners and others, in our State, to defy the constitutional authorities and plunder and murder our citizens. By armed force and actual bloodshed he has even attempted to deprive the people of their right to keep and bear arms, in conformity to the State laws, and to form a well-regulated militia necessary to the security of a free State. With his sanction, his soldiers have been quartered in houses without the consent of the owners thereof, and without any authority of law. The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, has been habitually and grossly violated by his officers, acting under his orders. He has utterly ignored the binding force of our constitutional State laws, and carried his insolence to such an extent as to introduce, from other States, free negroes into our midst and place them in positions of authority over our white citizens.

He has encouraged the stealing of our slave property. In these and other proceedings the Government and people of the Northern States have unmistakably shown their intention to overturn the social institutions of Missouri, and reduce her white citizens to an equality with the blacks. In the execution of his despotic wishes, his agents, without even rebuke from him, have exhibited a brutality scarcely credible of a nation pretending to civilization. Even women and children of tender age have fallen victims to the unbridled license of his unfeeling soldiery. He has avowedly undertaken to make the civil power subordinate to the military; and with the despicable and cowardly design of thus protecting himself and his accomplices, by binding the consciences of the unhappy victims of his tyranny, he has exacted from peaceful citizens, guilty of no crime, an oath to support his detestable Government. To crush out even peaceful and lawful opposition to it, he has forcibly and unconstitutionally suspended the privilege of the writ of *habeas corpus*, and abridged the freedom of speech and of the press by subjecting innocent citizens to punishment for mere opinion's sake, and by preventing the publication of newspapers independent enough to expose his treason to liberty.

The Governor further states that the acts of President Lincoln had been endorsed by the

Congress and people of the Northern States, and the war thus commenced by him had been made the act of the Government and nation over which he ruled, &c. He thus concludes:

Now, therefore, by virtue of the authority in me vested by said act, I, Claiborne F. Jackson, Governor of the State of Missouri, appealing to the Supreme Judge of the world for the rectitude of my intentions, and firmly believing that I am herein carrying into effect the will of the people of Missouri, do hereby, in their name, by their authority, and on their behalf, and subject at all times to their free and unbiased control, make and publish this provisional declaration, that by the acts of the people and Government of the United States of America, the political connection heretofore existing between said States and the people and government of Missouri is, and ought to be, totally dissolved; and that the State of Missouri, as a sovereign, free, and independent republic, has full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which independent States may of right do.

Published and declared at New Madrid, Missouri, this fifth day of August, in the year of our Lord eighteen hundred and sixty-one.

CLAIBORNE F. JACKSON,
Governor of Missouri.

On the 26th of July Gen. Fremont arrived at St. Louis to take command of the Western Department. Military preparations were immediately commenced with great vigor. Troops from the adjoining States poured into St. Louis and were encamped there, or were sent into the interior or to Cairo. At the same time Confederate forces were concentrating in Southwestern Missouri in large numbers. Early in August they advanced towards Springfield, where Gen. Lyon was encamped.

St. Louis was the prize before them, and its ultimate possession would transfer the entire State to the Confederate Government. The force of Gen. Lyon was the first obstacle to be removed.

The battle at Wilson's Creek had in its effects proved quite disastrous to Gens. McCulloch and Price. It not only served to check their progress, but discouraged many lukewarm sympathizers. Although a proclamation was issued by the former on the 12th, and by the latter on the 20th, boasting of a great victory, Gen. Pillow remained quiet at New Madrid, and Gen. Hardee at Greenville. Meanwhile, the accumulation and organization of Union troops at St. Louis and other points, added to the strength of Gen. Fremont. Stringent regulations were adopted by Gen. Pope on August 13th, under which the navigation of the Missouri River was kept open for traffic.

Near the close of August, however, the Confederates had acquired such strength as to become very bold. Recruiting for them had been successful in the western part of the State. In the border counties bodies of men were organizing to cooperate with McCulloch in his still contemplated advance. A lack of provision was the chief embarrassment to the Confederate force at this time. Gen. Pillow was also at this time contemplating a movement, and also Thompson, who was near Benton in Scott

County, while the former was at New Madrid. Amid these exciting circumstances Gen. Fremont issued the following proclamation, with its accompanying special military order:

HEAD-QUARTERS OF THE WESTERN DEPARTMENT, }
ST. LOUIS, August 31, 1861.

Circumstances, in my judgment, of sufficient urgency, render it necessary that the Commanding General of this Department should assume the administrative powers of the State. Its disorganized condition, the helplessness of the civil authority, the total insecurity of life, and the devastation of property by bands of murderers and marauders, who infest nearly every county of the State, and avail themselves of the public misfortunes and the vicinity of a hostile force to gratify private and neighborhood vengeance, and who find an enemy wherever they find plunder, finally demand the severest measures to repress the daily increasing crimes and outrages which are driving off the inhabitants and ruining the State.

In this condition the public safety and the success of our arms require unity of purpose, without let or hindrance, to the prompt administration of affairs.

In order, therefore, to suppress disorder, to maintain, as far as now practicable, the public peace, and to give security and protection to the persons and property of loyal citizens, I do hereby extend and declare established martial law throughout the State of Missouri.

The lines of the army of occupation in this State are for the present declared to extend from Leavenworth by way of the posts of Jefferson City, Rolla, and Ironton, to Cape Girardeau, on the Mississippi River.

All persons who shall be taken with arms in their hands within these lines, shall be tried by court-martial, and if found guilty, will be shot.

The property, real and personal, of all persons, in the State of Missouri, who shall take up arms against the United States, or who shall be directly proven to have taken an active part with their enemies in the field, is declared to be confiscated to the public use, and their slaves, if any they have, are hereby declared free men.

All persons who shall be proven to have destroyed, after the publication of this order, railroad tracks, bridges, or telegraphs, shall suffer the extreme penalty of the law.

All persons engaged in treasonable correspondence, in giving or procuring aid to the enemies of the United States, in fomenting tumults, in disturbing the public tranquillity by creating and circulating false reports or incendiary documents, are in their own interests warned that they are exposing themselves to sudden and severe punishment.

All persons who have been led away from their allegiance are required to return to their homes forthwith; any such absence, without sufficient cause, will be held to be presumptive evidence against them.

The object of this declaration is to place in the hands of the military authorities the power to give instantaneous effect to existing laws, and to supply such deficiencies as the conditions of war demand. But it is not intended to suspend the ordinary tribunals of the country, where the law will be administered by the civil officers in the usual manner, and with their customary authority, while the same can be peaceably exercised.

The Commanding General will labor vigilantly for the public welfare, and in his efforts for their safety hopes to obtain not only the acquiescence, but the active support of the loyal people of the country.

J. C. FREMONT, Major-General Commanding.

SPECIAL MILITARY ORDER.

HEAD-QUARTERS, WESTERN DEPARTMENT, }
ST. LOUIS, August 30, 1861.

The Commanding General sincerely regrets that he finds it necessary to make any reproach to the patriotic

army under his command. He had hoped that the rigid enforcement of discipline and the good example of the mass of the enlightened soldiery which he has the honor to lead, would have been sufficient to correct in good time the irregularities and license of the few who have reflected discredit upon our cause and ourselves.

But the extension of martial law to all the State of Missouri, rendered suddenly necessary by its unhappy condition, renders it equally imperative to call the army to good order and rigorous discipline. They are reminded that the power to inflict the extraordinary severities of the now governing law is rigidly confined to few, who are to be held strictly accountable for its exercise. They are also reminded that the same necessity which requires the establishment of martial law, demands also the enforcement of the military law, which governs themselves with the same sudden severity.

The Commanding General therefore strictly prohibits all vexatious proceedings calculated unnecessarily to harass the citizens, and also unauthorized searches, seizures, and destruction of property, except in cases of military necessity, and for which the officer authorizing or permitting it will be held strictly and personally responsible.

All officers commanding districts, posts, or detachments, are enjoined to use the utmost prudence and circumspection in the discharge of their duties. Under the circumstances, a strict obedience to orders, close attention to duties, and an earnest effort to protect and to avoid harassing innocent persons, is requested and expected everywhere from officers and men.

The Commanding General trusts that he will find few occasions to reproach the troops. He hopes and believes that he will find many to admire and commend them.

J. C. FREMONT,
Major-General Commanding.

This proclamation, so far as it related to the manumission of slaves, was subsequently modified by President Lincoln. (See SLAVES.)

On the 12th of September another proclamation was issued by Gen. Fremont, carrying into effect that provision of the former proclamation relating to slaves. It was as follows:

HEAD-QUARTERS, WESTERN DEPARTMENT, }
ST. LOUIS, Sept. 12, 1861.

The Major-General commanding the Western Department, having satisfactory evidence that Thomas L. Snead, of the city and county of St. Louis and State of Missouri, has been taking active part with the enemies of the United States, in the present insurrectionary movements against its Government; and the Military Commission, now in session at the arsenal in this city, having reported the fact to these head-quarters as the result of its deliberations, the Major-General commanding has executed and ordered to be published the following deeds of manumission:

HEAD-QUARTERS, WESTERN DEPARTMENT.

Whereas Thomas L. Snead, of the city and county of St. Louis, State of Missouri, has been taking active part with the enemies of the United States, in the present insurrectionary movement against the Government of the United States; now, therefore, I, John Charles Fremont, Major-General commanding the Western Department of the Army of the United States, by authority of law and the power vested in me as such commanding General, declare Frank Lewis, heretofore held to "service or labor" by said Thomas L. Snead, to be free, and forever discharged from the bonds of servitude, giving him full right and authority to have, use, and control his own labor or service, as to him may seem proper, without any accountability whatever to said Thomas L. Snead, or any one to claim by, through, or under him. And this deed of manumission shall be respected and treated by all persons and in all courts of justice, as the full and complete evidence of the freedom of said Frank Lewis.

In testimony whereof this act is done, at Headquarters of the Western Department of the Army of the United States, in the city of St. Louis, State of Missouri, on the twelfth day of September, A. D. eighteen hundred and sixty-one, and is evidenced by the departmental seal, hereto affixed by his order.

J. C. FREMONT,
Major-General Commanding.

HEAD-QUARTERS, WESTERN DEPARTMENT.

Done at the office of the Provost-Marshal, in the city of St. Louis, this twelfth day of September, A. D. one thousand eight hundred and sixty-one, at nine o'clock in the evening of said day. Witness my hand and seal of office hereto affixed. J. MCKINSTRY,
Brigadier-General Provost-Marshal.

A similar deed was given at the same time to Hiram Reed, another slave belonging to Thos. L. Snead.

Under the operation of martial law, Provost-Marshal McKinstry, on the 31st of August, issued orders peremptorily forbidding any person to pass beyond the limits of the county without a special permit from his office, and railroad, steamboat, ferry, and other agents were prohibited from selling tickets to any one not holding a pass from the provost-marshal. The order was aimed specially to reach parties leaving the city for the purpose of communicating information to the enemy. (See MARTIAL LAW.)

The month of September was passed by the Federal commander chiefly in making preparations for future movements. His plan appears to have been to advance on the southwestern part of the State with such an overwhelming military force as would compel the Confederate commanders to evacuate Missouri and to retire to the adjoining States for defence. A large army from the northwest was therefore gathered at St. Louis, and at the same time a line of fortifications was commenced around it. The object of this work was not to protect the city in consequence of any danger, at the time, of capture by the enemy, but because, with such a line of redoubts, redans, and lunettes, garrisoned by a few hundred or a thousand troops, and mounted with heavy artillery, the larger part of the army could be spared for the southwest expedition. Thus Gen. Fremont could assume an aggressive position.

The capture of Lexington and Col. Mulligan's troops by Gen. Price, on the 21st of Sept., was the most important affair to the Confederates which occurred in the State. (See LEXINGTON.) It doubtless caused Gen. Fremont, on Sept. 27th, to hasten from St. Louis to Jefferson City. On the 3d of October the Confederates abandoned Lexington, and as the Union force concentrated at Jefferson City, Gen. Price retired to Springfield and still further south. His force was variously estimated at this time at twenty thousand men and upwards. The original purpose of Gen. Price had been to move from Lexington northward and destroy the railroad, and then attack the Federal forces in Northwestern Missouri, but the approach of Fremont prevented its accomplishment. No one of the Confederate generals sustained his position so well as Gen. Price, with the slender resources

at his command. It was necessarily, therefore, a part of his system of operations to avoid a doubtful conflict. Retiring produced no discouragement upon his men. At the same time, by retiring, he came nearer to Arkansas, from whence he could expect supplies and reinforcements, whilst the Federal force, on advancing, would be removed further and further from its chief source of supplies. The advance of Gen. Fremont, in the southwest, was made in five divisions, under Gens. Hunter, Pope, Siegel, Asboth, and McKinstry. Each division was subdivided, and was composed of cavalry, artillery, and infantry, ambulances, &c., and whatever was necessary to enable it to act independently. Gen. Fremont accompanied the advance with Gens. Siegel and Asboth.

On the 14th of October he arrived at Warsaw on the Osage River, sixty-five miles southwest of Jefferson City, where he prepared to cross by means of bridges. On the opposite bank was a considerable Confederate cavalry force at the time of his arrival, which was dispersed by canister-shot. The bridge was finished about the 21st, and on the 26th the troops reached Bolivar. Gen. Fremont left on Sunday with Gen. Siegel by forced marches, for Springfield. Gen. McKinstry still continued at Warsaw with the reserve, and Gen. Pope was on the other side of the Osage. Gen. Hunter was with the right wing advancing, and Gen. Sturgis with the left. On the 27th Gen. Fremont arrived at Springfield, where the national flag was displayed by the people with every demonstration of joy. On the 25th the brilliant charge was made by Major Zagonyi with a hundred and fifty of Gen. Fremont's Body Guard upon a force of the enemy about half a mile west of the town, by which the enemy were dispersed. (See SPRINGFIELD.)

The retreat of Gen. Price had been steadily in advance of the Union troops. On the 13th he was at Clintonville, Cedar County, twenty-five miles south of Papinsville, on the Carthage road. His entire army had passed the Osage. On the 17th he was expected by the Union general to make a stand, and again on the 19th. On the 24th he was at Nesho, in Newton County, and had united with Gen. McCulloch. The Legislature of the State had convened here at this time. Only a small number of members were present. In Northwestern Missouri, Col. Morgan, on the 19th, with 220 of the Eighteenth Missouri had a skirmish with a larger Confederate force at Big Harrison Creek in Carrol County. Fourteen of the enemy were reported to have been killed, and eight were taken prisoners. The Federal loss was two killed and fourteen wounded. On the 21st the Confederate garrison at Fredericktown was surprised by a portion of the First Missouri Regiment, and the town recaptured.

In Southwestern Missouri, a skirmish took place near Lebanon on the 13th of October between two companies of mounted men under Major Wright and a small body of secession

cavalry, in which the latter were surprised and routed with a small loss. On the 17th a skirmish took place near Pilot Knob, and on the 22d another at Fredericktown. (See FREDERICKTOWN.) Several other skirmishes of small importance, otherwise than as showing the activity of both Federal and secession troops, occurred during the month of October.

On the 1st of November an agreement was entered into between Gens. Fremont and Price that a joint proclamation should be signed by both, and issued, which should provide for certain objects therein specified, as follows:

To all peaceably disposed Citizens of the State of Missouri, greeting: Whereas, a solemn agreement has been entered into by and between Major-Generals Fremont and Price, respectively commanding antagonistic forces in the State of Missouri, to the effect that in future, arrests or forcible interference by armed or unarmed parties of citizens within the limits of said State, for the mere entertainment or expression of political opinions shall hereafter cease; that families, now broken up for such causes, may be reunited, and that the war now progressing shall be exclusively confined to armies in the field. Therefore be it known to all whom it may concern:

1. No arrests whatever on account of political opinions, or for the merely private expression of the same shall hereafter be made within the limits of the State of Missouri; and all persons who may have been arrested and are held to answer on such charges only, shall be forthwith released. But it is expressly declared, that nothing in this proclamation shall be construed to bar, or interfere with any of the usual and regular proceedings of the established courts under statutes and orders made and provided for such offences.

2. All peaceably disposed citizens who may have been driven from their homes because of their political opinions, or who may have left them for fear of force or violence, are hereby advised and permitted to return, upon the faith of our positive assurances that, while so returning, they shall receive protection from both armies in the field whenever it can be given.

3. All bodies of armed men acting without the authority or recognition of the Major-Generals before named, and not legitimately connected with the armies in the field, are hereby ordered at once to disband.

4. Any violation of either of the foregoing articles shall subject the offender to the penalty of military law, according to the nature of the offence. In testimony whereof, the aforesaid Major-General John C. Fremont, at Springfield, Mo., on the 1st day of November, A. D. 1861, and Major-General Sterling Price, at Cassville, on this 5th day of November, A. D. 1861, have hereunto set their hands, and hereby mutually pledge their earnest efforts to the enforcement of the above articles of agreement, according to their full tenor and effect, to the best of their ability.

JOHN C. FREMONT,

Major-General Commanding U. S. A.

STERLING PRICE,

Maj.-General Commanding Missouri State Guards.

After the removal of Gen. Fremont, the command devolved on Gen. Hunter, who, on the 7th of November, addressed a letter to Gen. Price, in which he recapitulated the agreement, and said: "As General commanding the forces of the United States in this Department, I can in no manner recognize the agreement aforesaid, or any of its provisions, whether implied or direct, and I can neither issue, nor allow to be issued, the 'joint proclamation' purporting to have been signed by yourself and

Major-General Fremont, on the 1st day of November, A. D. 1861."

Some of the objections of Gen. Hunter to this agreement, were that it would render the enforcement of martial law impossible, that it would practically annul the confiscation act of Congress, &c.

On the 2d day of November, Gen. Fremont, at Springfield, received the order for his removal from the command of the Department of the West. He had arrived there only a few days previous at the head of an army, and was then in the act of marching on after a retiring enemy. Although not altogether unexpected, it occasioned much excitement in the army, and many officers were disposed to resign, declaring that they would serve under no other commander. Gen. Fremont, however, issued a patriotic farewell address, urging the army to cordially support his successor, and expressing regret to leave on the eve of a battle they were sure to win. The following is his address:

HEAD-QUARTERS, WESTERN DEPARTMENT. }
SPRINGFIELD, NOV. 2, 1861.

Soldiers of the Mississippi Army: Agreeably to orders received this day, I take leave of you. Although our army has been of sudden growth, we have grown up together, and I have become familiar with the brave and generous spirits which you bring to the defence of your country, and which makes me anticipate for you a brilliant career. Continue as you have begun, and give to my successor the same cordial and enthusiastic support with which you have encouraged me. Emulate the splendid example which you have already before you, and let me remain as I am, proud of the noble army which I have thus far labored to bring together.

Soldiers, I regret to leave you. Most sincerely I thank you for the regard and confidence you have invariably shown me. I deeply regret that I shall not have the honor to lead you to the victory which you are just about to win; but I shall claim the right to share with you in the joy of every triumph, and trust always to be personally remembered by my companions in arms.

JOHN C. FREMONT,
Major-General.

So much complaint had been made relative to the management of the Western Department by General Fremont, that the Secretary of War proceeded to St. Louis for the purpose of investigation. An interview with Gen. Fremont took place at Tipton, and when about to return from St. Louis to Washington, the Secretary issued the following order:

ST. LOUIS, Oct. 14, 1861.

GENERAL: The Secretary of War directs me to communicate the following as his instructions for your government:

In view of the heavy sums due, especially in the Quartermaster's Department in this city, amounting to some \$4,500,000, it is important that the money which may now be in the hands of the disbursing officers, or be received by them, be applied to the current expenses of your army in Missouri, and these debts to remain unpaid until they can be properly examined and sent to Washington for settlement; the disbursing officers of the army to disburse the funds, and not transfer them to irresponsible agents—in other words, those who do not hold commissions from the President, and are not under bonds. All contracts necessary to be made by the disbursing officers. The senior Quartermaster here has been verbally instructed by the Secretary as above.

It is deemed unnecessary to erect field-works around this city, and you will direct their discontinuance; also those, if any, in course of construction at Jefferson City. In this connection, it is seen that a number of commissions have been given by you. No payments will be made to such officers, except to those whose appointments have been approved by the President. This, of course, does not apply to the officers with volunteer troops. Col. Andrews has been verbally so instructed by the Secretary; also, not to make transfers of funds, except for the purpose of paying the troops.

The erection of barracks near your quarters in this city to be at once discontinued.

The Secretary has been informed that the troops of Gen. Lane's command are committing depredations on our friends in Western Missouri. Your attention is directed to this, in the expectation that you will apply the corrective.

Major Allen desires the services of Capt. Turnley for a short time, and the Secretary hopes you may find it proper to accede thereto.

I have the honor to be, very respectfully, your obedient servant,
L. THOMAS, Adjutant-General.

Major-General J. C. FREMONT,

Commanding Department of the West, Tipton.

Gen. Fremont immediately surrendered his command to Gen. Hunter, and returned to St. Louis, where he arrived on the 8th of November, and found a large assemblage gathered to greet him. He immediately proceeded to his head-quarters, and soon after a procession bearing torches, preceded by music, and surrounded by a vast concourse of citizens, arrived there. A committee previously appointed entered and delivered the following address and resolutions:

Major-General John C. Fremont:

Sir: We are instructed by the citizens of St. Louis to welcome you to our city, and perform the duty imposed upon us, with mingled feelings of sorrow and pleasure. While we deeply regret the occasion of your presence among us, we rejoice in the unmistakable manifestation of the unflinching sympathy of the people. They have witnessed with astonishment and indignation the event, unprecedented in history, of your removal from the command, while in active pursuit of the enemy, and on the very eve of reaping the fruits of your incessant and successful labors. The true causes which led to your recall are well understood and appreciated. You have risen too fast in popular favor. The policy announced in your proclamation, although hailed as a political and military necessity, furnished your ambitious rivals and enemies with a welcome weapon for your intended destruction.

The harbingers of truth will ever be crucified by the Pharisees.

We cannot be deceived by shallow and flimsy pretexts, by unfounded and slanderous reports.

We entertain no doubt of your ability to speedily confound and silence your traducers. The day of reckoning is not far distant, and the people will take care that the schemes of your opponents shall in the end be signally defeated.

As loyal citizens, we follow your example in yielding due obedience to the edicts of the powers that be.

With you we join in the hope that the enthusiasm with which you have imbued the army created by, and devoted to you, may lead them to victory, even in the absence of their legitimate leader. Should we meet with reverses, no fault will be charged upon you; should victory perch on our banners, the wreath of triumph will be placed on your brow by the verdict of the country.

Permit us to assure you that when the smoke of battle shall have passed away, and peace shall be restored to us, an appeal to the people from the action of its servants will be triumphantly sustained.

In pursuance of our instructions, we take pleasure in presenting to you a copy of resolutions unanimously adopted by the citizens of St. Louis, in mass meeting assembled.

Resolutions.—We, the citizens of St. Louis, of German extraction, in mass meeting assembled to give expression of our sentiments towards Major-General John C. Fremont, have solemnly and unanimously resolved:

1. That we recognize in John C. Fremont the embodiment of our patriotic feeling and political faith.

2. That, notwithstanding many paralyzing circumstances, he has performed his arduous and responsible task with all possible energy and honesty.

3. That we admire his impartiality and sagacity in selecting his military counsellors, without national prejudices, from among such men as he considered true and worthy of his confidence.

4. That we will stand by him as long as he shall prove true to himself.

5. That while we submit to the action of the Government, as behooves loyal citizens, we regret to be deprived at the present moment of his services in conquering the rebel enemy, and believe we recognize in this event a wise Providence, which may have reserved him for a still wider sphere of action in future times.

Gen. Fremont with much emotion replied:

GENTLEMEN: I wish to say to you that your kind and affectionate—I may say affectionate—reception of me moves my heart. It cheers me and strengthens my confidence—my confidence, already somewhat wavering—in our republican institutions. I felt all day as we passed through the country—I feel emphatically, to-night—that the faithful servant of the people, honestly laboring in the public cause, will not be allowed to suffer undeserved, and I feel stronger.

Since I left you a few weeks ago, many accusations have been rained on my defenceless head—defenceless because my face was turned to the public enemy. What I see and hear to-night, the address you have just read to me, and the approving multitude below, show me that I was not wrong in leaving my defence with you. In regard to the baser charges made against me, I will say nothing now. You do not require it; to speak of them would jar upon the generous feelings with which you come here to-night. Others have been already answered by my brave soldiers at Springfield: and others, of gross incompetency and a weak and aimless administration, to all of these I will adopt your address and the shouts of the grand multitude below as my answer. And, for all this, gentlemen, to you and to them, I renew my thanks with all my heart, which, to-night, is roused to full sensibility by the hearty and unqualified expression of your confidence and approbation, so valuable and grateful to me in my actual position.

I shall soon have occasion, for I shall make occasion, to answer all these charges more definitely. Until then, I will rely upon this evening for my defence.

The crowd outside becoming impatient, he presented himself, but the high wind prevailing rendered it impossible for him to address them. Subsequently, a committee appointed by the U. S. House of Representatives to investigate the management of affairs at St. Louis, as well as other matters, made a report containing statements which seriously detract from the fitness of the Commanding General for the position which he held, but do not affect his personal honor.

On the 11th of October the State Convention re-assembled at St. Louis. The Governor, in his Message to that body, asked for a simple and more efficient military law, and recommended measures to provide means to carry on

the State Government, and to meet the present emergencies.

An ordinance was adopted to postpone the State election until the first Monday in November, 1862, and providing for the continuance of the Governor, Lieutenant-Governor, and Secretary of State in office until their successors should be duly appointed. Another ordinance was passed providing for the abolition of certain offices, reducing salaries, &c., which contained a section providing that all persons taking the oath prescribed by the ordinance, within thirty days after its passage, should be exempt from arrest or punishment for taking up arms against the Provisional Government of the State, or giving aid and comfort to its enemies in this civil war; and the Governor was directed to request the President, in the name of the people of Missouri, by proclamation, to exempt all persons taking the said oath from all penalties incurred by taking up arms against the United States, or giving aid and comfort to the enemy in the present civil war.

The objects before the Convention having been accomplished by providing sufficient funds, and authorizing the State officers to continue until their successors were appointed, the Convention adjourned to the first Monday in November, 1862.

The Federal force in Missouri at this time was estimated at 27,000 men, of whom 5,000 were under the command of Gen. Hunter, 4,000 under Gen. Sigel, 4,500 under Gen. Asboth, 5,500 under Gen. McKinstry, 4,000 under Gen. Pope, under Gen. Lane 2,500, and under Gen. Sturgis 1,000.

On the 6th of November the army was in good spirits at Springfield. Gen. Fremont had left, and no battle was then soon expected. The chief command was held by Gen. Hunter, the oldest officer in the field, who expected soon to be superseded by Gen. Halleck. Gen. Price fell back near the State line, and remained until the Federal army began to recede, about the 15th. They were accompanied by long trains of emigrant wagons containing Union refugees. As they retired, Gen. Price followed up after them. The advance of Gen. Price was made in three divisions, and with the intention of moving upon Kansas, and making that the field of future operations. The opinion in the Confederate States was that Gen. Price never had any difficulty to procure men. His only obstacle had been the want of arms.

On the 30th of November his right wing, 6,000 strong, was at Stockton. The left wing held position near Nevada under Gen. Rains, 4,000 strong. The centre, under Gen. Price, 5,000 strong, was near Monticello.

In Boone County, on the 3d, Gen. Prentiss broke up a secession camp, with some loss on both sides.

On the 18th of November Gen. H. W. Halleck arrived at St. Louis, and took command of the Western Department. Gens. Sturgis and Wyman arrived on the same day. The di-

visions of Gen. Hunter and Pope had reached different points on the Pacific Railroad, there to await the orders of Gen. Halleck. About the 20th the divisions of Gens. Sigel and Asboth arrived at St. Louis.

The plan of Gen. Price now, was to approach the borders of Kansas, and supply his forces with arms, destroy the track of the Northern Railroad, and thus cut off the communication with St. Louis. This, however, was defeated by the strategical combinations of Gen. Halleck, and on the 25th of December almost a clean sweep had been made of the country between the Missouri and Osage rivers, and Gen. Price was cut off from all supplies and recruits from Northern Missouri, and in full retreat for Arkansas.

In the last two weeks of December, the Federal army captured 2,500 prisoners, including seventy commissioned officers, 1,200 horses and mules, 1,100 stand of arms, two tons of powder, 100 wagons, and an immense amount of commissary stores and camp equipage. Several skirmishes took place during these operations. On the 22d of November the town of Warsaw was burned by incendiaries, to prevent its further occupation by Union troops. At Salem a skirmish took place on the 3d of December, between a small Federal force and a body of State Guards. Several were killed and wounded on both sides. At Shawnee Mound, on the 18th of December, Gen. Pope captured 150 Confederate prisoners, with wagons, tents, and baggage. At Milford, on the 18th, a body of the enemy were surrounded, and surrendered. Thirteen hundred prisoners were taken, including three colonels and seventeen captains, and one thousand stand of arms, one thousand horses, sixty-five wagons, and a large quantity of tents, baggage, and supplies.

A list of all the battles and skirmishes is given on the following page.

This close of military operations in the State at the approach of winter left Gen. Halleck free to use a large part of his army in Western Kentucky. The struggle in the State during the year was vigorous and active, especially on the part of Gen. Price, under the contracted resources at his command.

It was stated at Richmond, Va., that after the capture of Mulligan, Gen. Price intended to attack Gen. Fremont before he could concentrate his army, but was prevented by a lack of ammunition from executing his design. When Lexington surrendered he had but 2,000 percussion caps in his whole command. He sent to Gen. Hardee and to Gen. McCulloch for a supply, but for some reason it was not sent. It was thought at that time in Richmond that if Gen. Price had been zealously and efficiently seconded, he would soon have driven the Federal force from Missouri, and thus have secured to the Confederacy one of the most important Western States. A consequence of such an acquisition would involve the destinies of Kansas, the Indian Nation, Arizona, and New Mexico. The

Battles and Skirmishes in Missouri in 1861.

possession of the vast countries which lie to the west and southwest was the occasion of the contest made by the Confederate States in Missouri.

So popular had Gen. Price become in the Western States of the Confederacy, that when there was a report in Memphis, Tennessee, on the 9th of December, that he had been superseded in his command in the Department of Missouri and Arkansas by Gen. Heath, it occasioned so much discussion as to lead to a communication with Richmond, which caused the following telegraphic despatch:

To Major W. A. Broadwell:

The rumor that Gen. Price will be superseded is false, if not malignant. I have not received a tender of Missouri troops, and consequently have no power to make appointments for them, or control their organization.

JEFF. DAVIS.

On the 21st of November, after Gen. Halleck had taken command, he issued, at St. Louis, an order, setting forth that, as important information respecting the numbers and condition of his forces had been conveyed to the enemy by fugitive slaves, no such persons should thereafter be permitted to enter the lines of any camp, nor of any forces on the march. On the 9th of December he issued an order directing the Mayor of St. Louis to require all municipal officers immediately to take the oath of allegiance prescribed by the State Convention, and also directing the provost-marshal to arrest all State officers who had failed to subscribe the oath within the time fixed, and subsequently attempted to exercise authority.

On the night of December 20, some men who had returned from Gen. Price's army destroyed about 100 miles of the Missouri Railroad, or rendered it useless. Commencing eight miles south of Hudson, they burned the bridge, wood piles, water tanks, ties, and tore up the rails for miles, bent them, and destroyed the telegraph. It was a preconcerted and simultaneous movement of citizens along the road.

On the 23d, Gen. Halleck issued an order fixing the penalty of death on all persons engaged in destroying railroads and telegraphs, and requiring the towns and counties where it is done to repair the damages and pay expenses.

On the 25th he issued the following order, declaring qualified martial law:

In virtue of authority conferred on me by the President of the United States, martial law is hereby declared, and will be enforced in and about all the railroads in this State.

It is not intended by this declaration to interfere with the jurisdiction in any court which is loyal to the Government of the United States, and which will aid the military authorities in enforcing order and punishing crimes.

About the same time an order was issued levying a tax of \$10,000 on certain citizens of St. Louis who were sympathizing with the Southern Confederacy. This money was designed to support and assist Union refugees in the city. (See St. Louis.)

On the 28th of December the negroes in confinement at St. Louis as runaways were discharged by order of the provost-marshal. The effect of the order was only to deliver them from confinement and subsequently from sale, on the presumption that they were slaves. Gen. Halleck stated that this order would not debar any one from enforcing his legal rights to the services of the negroes. Such rights, if any existed, would be enforced through the loyal civil tribunals of the State, whose mandates would always be duly respected by the military authorities of the Department. Military officers cannot decide upon the rights of property

or claims to service, except so far as may be authorized by the laws of war or acts of Congress. When not so authorized, they would avoid all interference with such questions.

The Legislature, which assembled at Neosho, finally obtained a quorum by the appointment of proxies.

There were 23 members in the upper, and 77 in the lower House. An act passed unanimously on Nov. 2d, to ratify an arrangement between certain Commissioners of the State and the Confederate Government, by which Missouri was to become a member of the Confederacy. That agreement was as follows:

Whereas, it is the common desire of the State of Missouri and the Confederate States of America, that said State should become a member of the Confederacy; and whereas, the accomplishment of their purpose is now prevented by an armed invasion of the territory of said States by the United States; and whereas, the interests of both demand that they should make common cause in the war waged by the United States against the liberties of both; now, therefore, for these most desirable objects, the Executive power of the State of Missouri has conferred full powers on Edward Carrington Cabell and Thomas L. Snead, and the President of the Confederate States of America, on R. M. T. Hunter, their Secretary of State, who, after having exchanged their said full powers in due and proper form, have agreed to the following articles:

ARTICLE 1. The State of Missouri shall be admitted into said Confederacy, on an equal footing with the other States composing the same, on the fulfilment of the conditions set forth in the second section of the act of the Congress of the Confederate States, entitled "An act to aid the State of Missouri in repelling invasion by the United States, and to authorize the admission of said State as a member of the Confederate States of America, and for other purposes," approved August 20, 1861.

ART. 2. Until said State of Missouri shall become a member of said Confederacy, the whole military force, material of war, and military operations, offensive and defensive, of said State shall be under the chief control and direction of the President of the Confederate States, upon the same basis, principles, and footing, as if said State were now and during the interval, a member of said Confederacy, the said force, together with that of the Confederate States, to be employed for their common defence.

ART. 3. The State of Missouri will, whenever she becomes a member of said Confederacy, turn over to said Confederate States all the public property, naval stores, and munitions of war, of which she may then be in possession, acquired from the United States, (excepting the public lands,) on the same terms and in the same manner as the other States of said Confederacy have done in like cases.

ART. 4. All expenditures for the prosecution of the existing war incurred by the State of Missouri, from and after the date of the signing of this convention, shall be met and provided for by the Confederate States.

ART. 5. The alliance hereby made between the said State of Missouri and the Confederate States, shall be offensive and defensive, and shall be and remain in force during the continuance of the existing war with the United States, or until superseded by the admission of said State to the Confederacy, and shall take effect from the date thereof, according to the provisions of the third section of the aforesaid act, approved August 20, 1861.

In faith whereof, we, the Commissioners of the State of Missouri and of the Confederate States of America, have signed and sealed these presents.

Done, in duplicate, at the city of Richmond, on the

31st day of October, in the year of our Lord one thousand eight hundred and sixty-one.

E. C. CABELL.

THOS. L. SNEAD.

R. M. T. HUNTER.

The same body elected as Senators to the Confederate Congress John B. Clark and R. L. Y. Peyton, and Thomas A. Harris, Casper W. Bell, A. H. Conad, Thomas Freeman, George Vest, Dr. Hyer, of Dent, and William M. Cooke, of St. Louis, Representatives in the Congress at Richmond.

MONROE, FORTRESS. This is the only fortress in the United States. It was constructed for the defence of the important navy yard at Gosport, and the city of Norfolk. The United States have expended upon it, thus far, the sum of \$2,500,000. The area embraced by its outer works is about 65 acres. Within is a fine parade ground of 25 acres in extent, regularly laid out and finely shaded by live oak trees. It is a bastioned work, an irregular heptagon in plan. The walls are chiefly of granite and 35 feet in height. The embankment backing the walls is of sand and clay, and of such great thickness that it can hardly be breached. The casemates are bomb-proof and shot-proof. The embrasures are of a size to admit the largest columbiads. A moat faced with dressed granite surrounds the whole work, through which, when the gates are open, the tide ebbs and flows. The water is, according to the state of the tide, from 8 to 15 feet deep, and from 75 to 150 feet across.

The water battery which faces the sea is built of stone, and of sufficient thickness and solidity to defy the heaviest shot. Its embrasures are of the most substantial character. They are forty-two in number, and have the same number of 42-pounders. The slope of the battery is covered with a green turf, and is a favorite promenade. A redoubt leads from the northern extremity of this battery, round to the points of the bastion near the principal magazine. In the centre of this redoubt is a sally-port or postern, leading to an outer work for the protection of the land side of the fort. The only continuous land approach to the fort is a strip of sandy beach not exceeding 40 rods in width, which might be readily cut through. A full armament of the fortress is 371 guns, consisting of mortars, columbiads, and smaller guns. Its possession has been of immense importance to the United States during the year, and it has been made the final headquarters from which all the military and naval expeditions on the coasts took their departure. Its possession has also given the Federal Government the entire control of the waters of Virginia, and relieved it in a great degree from the necessity of maintaining a blockade. It can control the commerce of Richmond, Norfolk, Alexandria, Washington, and Baltimore. Situated on the extremity of Old Point Comfort, the peninsula of land which is between the York and James rivers, it protects for

the Federal Government the route by sea to Annapolis.

On the 20th of August, Gen. Wool took command of the post. It had been for a short time previous under the command of Gen. B. F. Butler, who was then placed in command of the volunteer forces of the department. The usual communication between the North and South during the year was by a flag of truce from Fortress Monroe, which met one from the other side in James River.

The necessity of a seizure of the fortress was often proclaimed at Richmond by ex-Governor Wise. A garrison, however, sufficient to defend it against any attack which might at the time be made, has always been kept there by the Federal Government, and after the secession of Virginia it was fully reinforced, and there has been no time since when it could be captured by the Confederate States.

In his Message to the Legislature of Virginia, on the 2d of December, Gov. Letcher thus alludes to the situation of Fortress Monroe: "It is to be regretted that Fortress Monroe is not in our possession; that it was not as easily captured as the navy yard and Harper's Ferry. As far back as the 8th of January last, I consulted with a gentleman whose position enabled him to know the strength of that fortress, and whose experience in military matters enabled him to form an opinion as to the number of men that would be required to capture it. He represented it to be one of the strongest fortifications in the world, and expressed his doubts whether it could be taken, unless assailed by water as well as by land, and simultaneously. He stated emphatically and distinctly, that with the force then in the fortress it would be useless to attempt its capture without a large force, thoroughly equipped and well appointed. At no time previous to the secession of Virginia had we a military organization sufficient to justify an attempt to take it, and events since that occurrence demonstrate very clearly that with our military organization since, and now existing, it has not been deemed prudent to make the attempt."

MUNFORDSVILLE is the capital of Hart County, Kentucky, and situated on the south bank of Green River, one hundred miles southwest of Frankfort. The river is navigable for small steamboats during part of the year. It was near here that a sharp action took place on the 17th of December. The precise position was on the south bank of the river, near the iron bridge of the Louisville and Nashville Railroad. This bridge had been partially destroyed by the Confederate troops, to prevent the passage of the Federal force, but a temporary structure had been thrown over the river. Four companies of the Thirty-second Indiana Regiment, under command of the lieutenant-colonel, had crossed, and were thrown out as pickets in squads of eight or ten upon an open meadow at the distance of about one hundred yards from the river bank. At the Munfords-

ville depot there was a battery of three guns, and another of an equal number about a mile distant, in a southerly direction. A belt of timber skirted the position of the Indiana companies.

Some Confederate soldiers being espied in the wood, two companies were ordered to advance and effect their dislodgement. They retreated half a mile to their main body without firing a shot, and the two companies advanced stealthily as skirmishers. A body of cavalry, consisting of Texan rangers, then made a dash upon the companies, who returned the fire from their shot-guns with a galling effect. When the batteries opened, the rangers made a charge for the timber, and about the same time an order was given for the Federal infantry to rally upon the same point. The Indians executed the order under a galling fire from the batteries. They thus reached the wood, and, under cover of the trees, did fearful execution in the ranks of the Confederate cavalry.

The loss sustained by the Indians was incurred under the effect of the first fire. The rangers dashed in among their ranks before the troops had found time to form. Once formed, however, they gallantly advanced to the wood.

The fight, for a few minutes, is described by an eye-witness as a desperate encounter. The Indians resorted to their sabre-bayonets, forcing a hand-to-hand combat upon their enemies so long as the Confederates could be induced to stand up. When the Indians finally gained the wood and opened a fire upon the rangers, they fled, leaving their dead upon the field, including the body of Col. Terry, who was killed by a musket-ball. His body was sent back afterwards under a flag of truce.

The Confederate loss was considerable. There were found upon the field sixty-three dead bodies, and the bodies of twelve or fourteen horses. In addition, a large number are known to have been wounded. The Federal loss was thirteen killed and an equal number wounded.

Two regiments of Federal troops, the Thirty-sixth Indiana and the Sixteenth Ohio, came promptly up to the relief of the four companies from the Thirty-second Indiana, but the fight was not renewed.

MURRAY, NICHOLAS, D. D., an American clergyman born in Ireland, Dec., 1803, died at Elizabethtown, New Jersey, Feb. 4, 1861. He came to America in 1818, and entered the printing establishment of Messrs. Harper & Brothers as an apprentice. Having after a time become a Protestant he united with the Brick Presbyterian church, then under the pastoral care of Dr. Gardiner Spring, and commenced a course of study in preparation for the ministry. He graduated at Williams College in 1826, studied theology at Princeton, and in 1829 was settled as pastor of a Presbyterian church in Wilkesbarre, Penn. He was called in 1834 to the pastorate of the First Presbyterian church in Elizabethtown, N. J., where he remained till his death. In 1849 he was elected Moderator of the Presbyterian

General Assembly, O. S. He acquired considerable reputation by his "Letters to Right Rev. John Hughes, Roman Catholic Bishop of New York," published under the signature of "Kirwan," in 1848, in which he controverted with shrewdness and tact some of the doctrines and practices of the Roman Catholic Church. He published afterwards several other controversial works with the same signature. In 1853 he visited Europe, and again, in 1860, the last time for his health, as he was suffering

from a disease of the heart. Besides the "Kirwan Letters," Dr. Murray published: "Notes, Historical and Biographical, concerning Elizabethtown, N. J.," Elizabethtown, 1844; "Romanism at Home," N. Y., 1852; "Men and Things as I saw them in Europe," N. Y., 1853; "Parish, and other Pencilings," N. Y., 1854; "The Happy Home," 1859; "Preachers and Preaching," N. Y., 1860, and a series of letters to the New York "Observer" during his last visit to Europe.

N

NAPOLEON, the capital of Desha County, Arkansas, is situated on the Mississippi River, at the mouth of the Arkansas River, about 125 miles, by land, southeast of Little Rock. It has been a place of active business, and is the point where a fine marine hospital was built by the United States. This was at once seized by the military upon the secession of Arkansas, with supplies amounting in value to nearly nine thousand dollars. They consisted of one hundred and thirty boxes containing small-arms and ordnance stores destined for the troops stationed on the frontiers of Texas and Arkansas, solely for protecting the whites from incursions of the Indians. A line of a thousand miles there was usually guarded by two thousand regular troops.

NAVY OF THE UNITED STATES. The committee appointed by act of Congress on the 9th of January, 1861, to report, among other subjects, upon the ships of the U. S., where stationed, in what command, and under what orders, presented the following list of vessels comprising the whole naval force of the country in commission on the 16th of January, 1861, those in actual service, and those lying unavailable in port:

List of the vessels of the United States Navy, in commission on the 16th of January, 1861.

East India Squadron.—Hartford, steam sloop, Captain Chas. Lowndes; John Adams, sloop, Commander J. M. Berrien; Dacotah, steam sloop, Commander William Radford; Saginaw, steamer, Commander J. F. Schenck—cruising on the East India station. Vandalia, sloop-of-war, Commander P. Lee—on the way to the station.

Brazil Squadron.—Congress, frigate, Captain L. M. Goldsborough; Seminole, steam sloop, Commander E. R. Thomson; Pulaski, steamer, Lieutenant Commander W. H. Macomb—cruising on the station.

Pacific Squadron.—Lancaster, steam sloop, Captain John Rudd; Saranac, steamer, Captain Robert Ritchie; Wyoming, steam sloop, Commander J. K. Mitchell; Cyane, sloop-of-war, Commander S. B. Bissell; St. Mary's, sloop-of-war, Commander W. D. Porter—at Panama, 3d January. Narragansett, steam sloop, Commander T. A. Hunt—on the South American coast. Levant, sloop-of-war, Commander William E. Hunt—at Hilo, 3d September.

Mediterranean Squadron.—Richmond, steam sloop, Captain D. W. Ingraham; Susquehanna, steam sloop, Captain George W. Hollins; Iroquois, steam sloop, Commander J. S. Palmer—cruising on the station.

African Squadron.—Constellation, sloop-of-war, Captain J. S. Nicholas; Portsmouth, sloop-of-war, Commander John Calhoun; San Jacinto, steam sloop, Captain T. A. Dornin; Mystic, steamer, Lieutenant

Commanding William E. Le Roy; Sumter, steamer, Lieutenant Commanding J. F. Armstrong; Mohican, steam sloop, Commander S. W. Godon; Saratoga, sloop-of-war, Commander Alfred Taylor—cruising on the coast of Africa.

Home Squadron.—Cumberland, sloop-of-war, Captain J. Marston; Powhatan, steam sloop, Captain S. Mercer; Pocahontas, steam sloop, Commander S. F. Hazard—at Vera Cruz. Pawnee, steam sloop, Commander S. C. Rowan—at Philadelphia. Brooklyn, steam sloop, Captain W. S. Walker—at Hampton Roads. Sabine, frigate, Captain H. A. Adams; St. Louis, sloop-of-war, Commander Charles H. Poor—under orders to Pensacola. Macedonia, sloop-of-war, Captain James Glynn—on way to Pensacola. Mohawk, steamer, Lieutenant Commanding T. A. M. Craven; Crusader, steamer, Lieutenant Commanding J. N. Maffit; Wyandotte, steamer, Lieutenant Commanding O. H. Berryman—supposed to be on their station, the coast of Cuba.

Storeships.—Falmouth, sloop-of-war, Lieutenant Commanding Charles Thomas—stationed at Aspinwall. Warren, sloop-of-war, Lieutenant Commanding J. J. Boyle—stationed at Panama. Fredonia, Lieutenant Commanding J. M. Watson—stationed at Valparaiso. Supply, Commander H. Walker—sailed from Pensacola, 12th January, for Vera Cruz. Release, Lieutenant Commanding J. M. Frailey—returning from Mediterranean. Relief, Commander John De Camp—at New York.

Special Service.—Niagara, screw frigate, Captain William W. McKean—special service to Japan.

Receiving Ships.—Ohio, ship-of-the-line, Commander William Smith—Boston. North Carolina, ship-of-the-line, Commander J. H. Ward—New York. Princeton, steamer, Commander H. K. Hoff—Philadelphia. Alleghany, steamer, Commander W. W. Hunter—Baltimore. Pennsylvania, ship-of-the-line, Commander A. Sinclair—Norfolk. Independence, razee—Mare Island, California.

There were also in the ports of the United States, dismantled and unfit for immediate service, the following vessels belonging to the navy:

At Portsmouth, New Hampshire: Santee, frigate, 50 guns; Dale, sloop, 16 guns; Marion, sloop, 16 guns.

At Boston: Colorado, steam frigate, 40 guns; Minnesota, steam frigate, 40 guns; Mississippi, steamer, 11 guns; Vermont, ship-of-the-line, 84 guns; Vincennes, sloop, 20 guns; Preble, sloop, 16 guns; Bainbridge, brig, 6 guns.

At New York: Wabash, steam frigate, 40 guns; Roanoke, steam frigate, 40 guns; Potomac, frigate, 50 guns; Brandywine, frigate, 50 guns; Savannah, sloop, 24 guns; Perry, brig, 6 guns.

At Philadelphia: Pawnee, sloop-of-war, 6 guns; Water Witch, steamer, 3 guns; St. Lawrence, frigate, 50 guns; Jamestown, sloop, 22 guns.

At Washington: Pensacola, steam sloop.

At Norfolk: Merrimac, steam frigate, 40 guns; Plymouth, sloop, 22 guns; Germantown, sloop, 22 guns; Raritan, frigate, 50 guns; Columbia, frigate, 50 guns; United States, frigate, 50 guns.

At Annapolis: Constitution, frigate, 50 guns.

From the evidence furnished the committee by the naval department, of which the above is a summary, it appears that the entire naval force available for the defence of the whole Atlantic coast consisted of the steamer Brooklyn of 25 guns, and the store ship Relief of 2 guns. The former was of too great draught to enter Charleston harbor with safety, except at spring tides, and the latter was under orders to the coast of Africa with stores for the African squadron. The committee called attention to the extraordinarily defenceless state in which the coast was thus left, stating that the number of ships lying in port dismantled and unfit for service was 28, mounting in the aggregate 874 guns; that none of these could be repaired and put under sail short of several weeks' time, and many of them would require for this purpose at least 6 months; and also that no orders had been issued to put any of them in readiness.

Between the 11th of November, 1860, and the 24th of January, 1861, 56 officers of the navy had resigned, including 11 from the Naval Academy. Notwithstanding the urgent appeal made by the committee, and the very alarming state of national affairs, Congress adjourned without making any unusual appropriations for naval purposes, and without ordering the recall of the vessels at distant stations. Such was the condition of affairs when the new Administration came into power on the 4th of March. At that time, according to the report made by the Secretary of the Navy on the 4th of July, the total number of vessels of all classes belonging to the navy was 90, carrying, or designed to carry, about 2,415 guns. Excluding vessels on the stocks, those unfinished, those used as stationary storeships and receiving ships, and those considered inexpedient to repair, the available force was:

1 ship-of-the-line.....	84	guns.
8 frigates.....	400	"
20 sloops.....	406	"
3 brigs.....	16	"
3 storeships.....	7	"
6 steam frigates.....	212	"
5 first-class steam sloops.....	90	"
4 first-class side-wheel steamers.....	46	"
8 second-class steam sloops.....	45	"
5 third-class screw steamers.....	28	"
4 second-class side-wheel steamers.....	8	"
2 steam tenders.....	4	"
69	1,346	

Of this force, the following were in commission, the remainder being in ordinary, dismantled, &c.

2 frigates.....	100	guns.
11 sloops.....	232	"
3 storeships.....	7	"
1 screw frigate.....	12	"
5 first-class steam sloops.....	90	"
3 side-wheel steamers.....	35	"
8 second-class steam sloops.....	45	"
5 third-class screw steamers.....	28	"
3 side-wheel steamers.....	5	"
1 steam tender.....	1	"

These vessels had a complement, exclusive of officers and marines, of about 7,600 men, and nearly all of them were on foreign stations. The home squadron consisted of twelve vessels, carrying 187 guns and about 2,000 men. Of this squadron, only four small vessels, carrying twenty-five guns and about 280 men, were in northern ports.

On the 23d of March, the sloop-of-war Cumberland, flag-ship of Commodore Pendergrast, of the home squadron, arrived in the Chesapeake, and was detained by the Secretary of the Navy at Norfolk, to await events that were gradually developing in Virginia and the adjoining States. The navy yard at Norfolk was at that time filled with arms and munitions, and several ships were in the harbor dismantled and in ordinary, and in no condition to be moved, had there been men to move them. Any attempt to withdraw these vessels, moreover, without a crew, was at that time deemed injudicious, as likely to arouse a more disturbed state of feeling at the South. The commandant at the yard, Commodore McCauley, however, was, early in April, cautioned to extreme vigilance and circumspection; and on the 10th of April, he was ordered, without giving needless alarm, to put the shipping and public property in condition to be moved and placed beyond danger whenever this might be necessary. A commander and two engineers were detailed to proceed to Norfolk and put the machinery of the steam-frigate Merrimac in order, that she might move herself and tow out some of the other ships; and on the 12th of April, the department directed that this vessel should be prepared to proceed to Philadelphia with the utmost despatch. It was stated in reply that four weeks would be required to put the engine in working order. The engineer-in-chief was then ordered at once to Norfolk, and the commandant was directed to lose no time in placing an armament on board the Merrimac, and removing her, together with the Plymouth, Dolphin, and Germantown, away from Norfolk, with as much of the public property, ordnance stores, &c., as could be saved. The engineer-in-chief reported the Merrimac as ready to be moved on the 17th, but Commodore McCauley at that time refused to have her fired up. The fires were, however, started early the next morning, the engines were working, and the engineers, firemen, and sufficient men were on board, but the commandant still refused to permit her to be moved, and in the afternoon gave directions to draw the fires. The Secretary of the Navy states that the cause of his refusal to move the Merrimac, has no explanation other than that of misplaced confidence in his junior officers who opposed it. Commodore Paulding was then immediately ordered to Norfolk with such officers and marines as could be obtained, and with directions to take command of all the vessels there, and at all hazards prevent the ships and public property from passing into the hands of the secessionists. With troops just ar-

rived at Fortress Monroe from Massachusetts, and others, he reached Norfolk on the evening of Saturday the 20th, where he found that the powder magazine had already been seized, and that an armed force under Gen. Taliaferro had commenced throwing up batteries in the vicinity of the navy yard. The commandant of the yard, hopeless of extricating the ships, had just ordered them to be fired; and he also destroyed as much public property in the yard as he was able to do with his limited force. The Cumberland was then taken in tow, and the vessels returned with her down the river, notwithstanding the obstructions that had been sunk in the channel for the purpose of preventing her removal. By this disaster, the disabled vessels of the navy yard, about 2,000 cannon, 300 of which were of the Dahlgren pattern, together with a great quantity of powder, were left in possession of the Confederates.

In view of these acts, and of similar hostile demonstrations occurring at the same time in Baltimore, the Government was impelled to hasten at once the completion of all public armed vessels, and, moreover, to issue orders to the commandants of the navy yards in Boston, New York, and Philadelphia, to purchase or charter and arm, equip, and man such steamers as might be found suitable for the public service. The whole naval force was required to carry into effect the proclamations declaring an embargo or blockade of the Southern ports which resisted the execution of the national laws; and on account of the great extent of nearly 3,000 miles of the coast along which these ports were situated, the force was divided into two squadrons, one for the Atlantic and one for the Gulf of Mexico. At Hampton Roads, notice was given of this blockade on the 30th of April by Flag-officer Pendergrast, in command of the home squadron; and it was soon afterwards made effective by Flag-officer Stringham, who arrived in Hampton Roads on the 13th of May, with his flag-ship, the Minnesota. The Niagara arrived at Boston from Japan on the 24th of April, and soon after proceeded off Charleston harbor, and thence to the Gulf of Mexico, to intercept, if possible, large shipments of arms and munitions of war from Europe destined for the Gulf States. The Gulf squadron was under the command of Flag-officer William Mervine, who arrived in the Gulf on the 8th of June, in the steamer Mississippi, in advance of his flag-ship, the Colorado.

The Secretary of the Navy, in his report of July 4th, presented the following statement of the vessels at that time in service:

"Of the 69 vessels, carrying 1,346 guns, mentioned as available for service on the 4th of March last, the sloop *Levant* has been given up as lost in the Pacific; the steamer *Fulton* was seized at Pensacola; and one frigate, two sloops, and one brig were burnt at Norfolk.

These vessels carried 172 guns. The other vessels destroyed at Norfolk were considered worthless, and are not included in the list of available vessels.

"These losses left at the disposal of the department 62 vessels, carrying 1,174 guns, all of which are now, or soon will be in commission, with the exception of the

	Guns.
Vermont, ship-of-the-line.....	84
Brandywine, frigate.....	60
Decatur, sloop, at San Francisco.....	16
John Hancock, steam tender, at San Francisco.....	3

"There have been recently added to the navy, by purchase, 12 steamers, carrying from 2 to 9 guns each, and 3 sailing vessels. There have been chartered 9 steamers, carrying from 2 to 9 guns each. By these additions, the naval force in commission has been increased to 82 vessels, carrying upwards of 1,100 guns, and with a complement of about 13,000 men, exclusive of officers and marines. There are also several steamboats and other small craft which are temporarily in the service of the department.

"Purchases of sailing ships have been made for transporting coals to the steamers that are performing duty as sentinels before the principal harbors. * * *

"The squadron on the Atlantic coast, under the command of Flag-officer S. H. Stringham, consists of 22 vessels, 296 guns, and 3,800 men.

"The squadron in the Gulf, under the command of Flag-officer William Mervine, consists of 21 vessels, 282 guns, and 3,500 men.

"Additions have been made to each of the squadrons, of 2 or 3 small vessels that have been captured and taken into the service. The steamers *Pawnee* and *Pocahontas*, and the flotilla under the late Commander Ward, with several steamboats in charge of naval officers, have been employed on the Potomac River, to prevent communication with that portion of Virginia which is in insurrection. Great service has been rendered by this armed force, which has been vigilant in intercepting supplies, and in protecting transports and supply-vessels in their passage up and down the Potomac.

"The flotilla, on the 27th ultimo, met with a serious and sad loss in the death of its gallant commander, James H. Ward, who died at his post, while covering the retreat of his men from the assault of an overpowering number of rebel enemies. In the death of Commander Ward the navy has lost a brave officer, who has enriched it by military and scientific contributions, served it faithfully in varied spheres, and promised much for it in the future.

"The squadron in the Pacific, under the command of Flag-officer John B. Montgomery, consists of 6 vessels, 82 guns, and 1,000 men.

"The West India squadron is under the command of Flag-officer G. J. Pendergrast, who has been temporarily on duty, with his flag-ship, the *Cumberland*, at Norfolk and Hampton Roads, since the 23d of March. He will, at an early day, transfer his flag to the steam-frigate

Roanoke, and proceed southward, having in charge our interests on the Mexican and Central American coasts, and in the West Indian Islands.

"The East India, Mediterranean, Brazil, and African squadrons, excepting one vessel of each of the two latter, have been recalled.

"The return of these vessels will add to the force for service in the Gulf and on the Atlantic coast, about 200 guns and 2,500 men."

He also stated in his report that 259 officers of the navy had resigned their commissions, or been dismissed from the service, since the 4th of March; for which reason many of the vessels were necessarily sent to sea without a full complement of officers. Many, however, who had retired to civil pursuits, had promptly come forward in this time of their country's need, and voluntarily tendered their services, while many masters and masters' mates were also appointed from the commercial marine. So promptly did seamen present themselves at the naval rendezvous of all the principal seaports, under the authorized increase and abbreviated

term of enlistment, that only one or two ships experienced any detention for want of a crew, and none beyond two or three days. Never, as the Secretary states, has the naval force had so great and rapid an increase, and never have our seamen come forward with more alacrity and zeal to serve the country.

In the need of a substantial class of vessels suitable for performing continuous duty off the coast in all weathers, the department contracted for the building of 23 steam gunboats, each of about 500 tons burden, and made preliminary arrangements for several larger and fleetier vessels, in addition to taking measures for carrying out the order of Congress of the preceding session for the construction of 7 sloops of war, with the addition of one more. At each of the Northern navy yards, Portsmouth, Boston, New York, and Philadelphia, two of this last class were directed to be built.

The following table comprises a summary of the vessels purchased for naval service during the year 1861:

CLASS OF VESSELS.	No.	Number of guns to each.	Total number of guns.	Tonnage of each.	Total tonnage.	Cost of each.	Total cost.
Side-wheel steamers.....	36	1 to 10	160	123 to 1,800	26,680	\$12,000 to 200,000	\$2,418,103
Screw steamers.....	42	1 to 9	170	65 to 2,100	19,985	5,000 to 172,500	2,187,587
Auxiliary steam bark.....	1	5	418	27,500
Ships.....	13	1 to 8	52	334 to 1,375	9,998	7,000 to 40,000	313,503
Barks.....	17	2 to 6	78	265 to 888	8,136	11,500 to 32,000	343,400
Barkantine.....	1	296	16,000
Schooners.....	25	1 to 4	50	53 to 349	5,458	6,000 to 18,000*	241,790
Brigs.....	2	2	4	196 to 264	490	9,000 to 10,000	19,000

Of side-wheel steamers, 9 were first-class steamships, all of them costing from \$85,000 to \$200,000 each, except one, the *Alabama*, which was bought for \$23,000. Among the steamers were 18 ferry-boats and tug-boats, the former purchased from the Brooklyn and New Jersey companies. The Navy Department also purchased, after August 18th, a large number of old vessels, for the purpose of loading them with stone and sinking them at the entrance of the ports of the Confederate States. These consisted of 20 ships, 22 schooners, 16 barks, and 1 brig, and their total cost was \$160,205. A considerable number of vessels, mostly large steamers, were also chartered for the use of the navy, for which, between the middle of April and the middle of September, the department paid the sum of \$39,305 05.

The armed vessels were almost exclusively ordered, on entering into the service, to proceed to the Southern ports, for the purpose of enforcing their blockade, and the result of their operations is shown in the following summary of vessels, captured and destroyed from April 23 to November 15. These are 7 ships, 12 barks, 9 brigs, 115 schooners, 8 sloops, and 7 miscellaneous, the last including the steamer *Salvor*, loaded with arms, from Havana, and bound to Tampa Bay. Most of these vessels contained valuable cargoes, and three of them

were privateers. A few were recaptured prizes, and were restored to their owners. The table on the next page presents a list of the vessels constructed at the navy yards, and contracted for the navy during the year 1861.

Iron-clad Vessels.—At the close of the following table three vessels are introduced, belonging to a new class of war steamers. The year 1861 will always be famous in naval history for the material change then first fairly established in the construction of vessels of war, by rendering them as nearly impenetrable as possible to the heaviest shot, by means of a coating of iron plates. The superiority of a few guns of the heaviest calibre to the large batteries of the older ships was then first generally appreciated, and the whole system of ship-building in the navies of France and England, as also of some of the minor naval powers of Europe, underwent a more complete change than had followed the introduction of steam. The building of wooden vessels was entirely abandoned, except in some special cases where they were to be covered with plates of iron, and the day of old wooden frigates and line-of-battle ships was looked upon as having passed. But steam floating-batteries were then no new invention. They were recommended as long ago as 1813 by Robert Fulton, and one was built for the U. S. Government after his plans, and completed soon after the close of the war with Great Britain. An account of this and of other steam-batteries

* One schooner named the *Chotauck*, formerly the privateer *Savannah*, prize to the *Perry*, was purchased at marshal's sale for \$1,250.

used by the English and the French in the Crimean war is given in the article **BATTERY**, in vol. ii. of the "New American Cyclopædia." The French were the first to fully appreciate the immense advantage to the naval power possessing the largest number of the strongest batteries of this class, and in 1860 engaged largely in their construction; launching in that year the battery named *La Gloire*, a wooden screw-steamer of 900 horse power, 253 feet long, 55 feet broad, and drawing 27½ feet of water. To some depth below her load-water line her sides are covered with iron plates, 2

feet wide and 4½ inches thick. Her armament consists of thirty-four 54-pounders on her main deck, and two heavy shell guns forward, under an iron screen. Her ports are brought down within 6 or 7 feet of the water. So well approved was the plan that in 1861 the Government had as many as 20 batteries of this character upon the stocks or launched. The English, in order to maintain the superiority of their navy, were compelled to engage with great vigor in the same enterprise. In the course of the year 1861, they conducted a series of expensive experiments in firing from and upon an iron cupola, constructed upon a floating battery. Finding that it stood the most complete hammering with the heaviest shot without injury, the Admiralty decided upon

* About 1,200 tons each, carrying about 7 guns each.

† About 500 tons each, carrying about 4 guns each.

‡ About 700 tons each, carrying about 4 guns each.

§ About 4,600 tons altogether, carrying 2, 12, and 18 guns.

the construction of a double cupola, carrying two guns. There were also built and afloat before the close of the year, the following iron-cased ships :

VESSELS.	Tons.	Guns.	Horse power.
Warrior.....	6,100	40	1,250
Black Prince.....	6,100	40	1,250
Defence.....	..	22	600
Resistance.....	3,668	22	600
Hector.....	4,000	32	800

There were also building the Achilles, of 6,100 tons, 36 guns, 1,250 horse power, and the Valiant, of 4,000 tons, 32 guns, 800 horse power. Three others, of 60 guns each, were ordered, and three more were soon to be built, cased either with $4\frac{1}{2}$ -inch iron on a teak wood backing, or built of $6\frac{1}{2}$ -inch iron slabs without a wooden backing, the choice to be determined by the greater resistance to shot on trial made at Shoeburyness. Besides these 18 ships of iron, the construction of 5 wooden ships, expressly designed for being plated with iron, was rapidly pushed forward. The armament of each of these will consist of 40 guns of the heaviest calibre. The estimated cost of these 18 vessels is £8,000,000, or \$39,000,000. The following is the general description of the Warrior, the first one completed of these vessels. She is a screw-steamer, 380 feet long between perpendiculars, (420 feet over all,) of 58 feet beam, $41\frac{1}{2}$ feet depth from spar-deck to keel, 26 feet draught of water, and of 6,177 tons burden, builder's measurement. She is built of iron throughout, and 205 feet of her length are protected by $4\frac{1}{2}$ -inch plates of solid iron, backed with two layers of teak timber, one of 10 inches next the iron, and the inner one of 8 inches. The protection extends 9 feet below load-water line. At each end of this protected portion, iron bulkheads, $4\frac{1}{2}$ inches thick, backed with 18 inches of teak timber, complete the protection for the centre of the ship, and inner bulkheads extend all around this portion within $3\frac{1}{2}$ feet of the sides. The enclosed space is divided into 6 water-tight compartments, one being devoted to each of the two boilers. Her main-deck ports are about $8\frac{1}{2}$ feet above water at load-water line, and are $15\frac{1}{2}$ feet apart. She is bark-rigged with the spars and sails of an 80-gun ship. Her guns are 68-pounders for the main-deck, ten Armstrong 70-pounders on the spar-deck, and two pivot Armstrong 100-pounders, one at each end, in all 48 guns, which may be considerably added to.

Mr. Donald McKay, the American ship-builder, in calling the attention of our people to these startling facts in a letter from London of Dec. 3d, 1861, alludes to the inferiority of our navy, which ranks hardly with that of second-rate European powers, and to our unquestioned ability to build and man a first-class fleet. He remarks: "It would be easy for us to build in one year, a fleet of 500 to 600 men-of-war ships, from a gunboat to the largest class of iron-cased frigates. It is a well-known

fact that we built in one year, the astonishing number of 2,034 vessels and steamers of all classes, measuring together 583,450 tons. * * * We would be able in our merchant yards alone to turn out in one year 583 ships of 1,000 tons each. In our six navy yards, where the choicest materials are stocked for building a fleet of 100 ships, 60 more might be built in one year, making a total of 643 men-of-war ships of all classes, varying in their armament from 3 to 60 guns. More than a hundred of our greatest engineering firms would complete all the machinery necessary to be put in these ships in less than a year. Our capabilities and facilities of building ships have not in the least suffered by the loss of the seceded States, which have never built one per cent. of the sea-going ships of the United States." As an evidence of the entire change that is taking place in the views of practical men as to the future character of vessels of war, Mr. McKay recommends, that in any great emergency our navy could be rendered much more efficient for defence by cutting down all our line-of-battle ships one or two decks, casing them with 5-inch iron plates, and arming them with 30 or 40 guns of the heaviest calibre. Our heavy frigates might be made shell-proof with iron plates, and the armament on the upper deck be dispensed with on account of the additional weight. Our merchant steamers and large clipper ships may readily be transformed into frigates, sloops, and gunboats of great efficiency and speed superior to that of any men-of-war ships yet built. A very large number of our barks and brigs are well adapted for receiving an armament of from 8 to 20 guns, and more than a thousand large coasting schooners of 28 to 30 feet breadth of beam, of a class unsurpassed for speed by any sailing vessels, and having great stability and strength, can soon be transformed into men-of-war schooners, armed with a pivot gun, or a mortar of the heaviest description placed amidships, and two to four 22-pounders at the ends. The subject came before Congress in 1861, and on the 3d of August an act was approved, directing the Secretary of the Navy "to appoint a board of three skillful naval officers to investigate the plans and specifications that may be submitted for the construction or completing iron-clad steamships or steam-batteries, and on their report, should it be favorable, the Secretary of the Navy will cause one or more armored, or iron or steel-clad steam-ships or floating steam-batteries to be built; and there is hereby appropriated, out of any money in the treasury not otherwise appropriated, the sum of \$1,500,000." Commodores Joseph Smith and H. Paulding, with Capt. C. H. Davis, were appointed this board, and their report was presented of the date of Sept. 16. While considering iron-clad ships as without doubt formidable adjuncts to coast and harbor fortifications, the board questioned their advantages and ultimate adoption as cruising vessels, chiefly on account of the enormous

weight added to the vessel by the armor, which involved greater power to propel her, and at the same time largely increased the cost of construction. To meet the immediate demand for vessels as far as practicable invulnerable to shot, and adapted by their light draught of water to penetrate our shoal harbors, rivers, and bayous, the board recommended "that contracts be made with responsible parties for the construction of one or more iron-clad vessels or batteries, of as light a draught of water as practicable consistent with their weight of armor." They also advised the construction in our own dock-yards, of one or more of these vessels upon a large and more perfect scale when Congress shall see fit to authorize it. The report concludes with a synopsis of the propositions and specifications submitted, amounting to 17 in number, the terms of construction for the different vessels ranging from \$32,000 to \$1,500,000. Three only of these were selected as worthy of recommendation, the others being put aside, either owing to too great cost or for other reasons. The three proposals recommended were those of J. Ericsson, New York; Merrick & Sons, Philadelphia; and C. S. Bushnell & Co., New Haven, Conn. Of these the remarks of the board are as follows:

"J. Ericsson, New York.—This plan of a floating battery is novel, but seems to be based upon a plan which will render the battery shot and shell-proof. It is to be apprehended that her properties for sea are not such as a sea-going vessel should possess. But she may be moved from one place to another on the coast in smooth water. We recommend that an experiment be made with one battery of this description on the terms proposed, with a guarantee and forfeiture in case of failure in any of the properties and points of the vessel as proposed. Price, \$275,000; length of vessel, 174 feet; breadth of beam, 41 feet; depth of hold, 11½ feet; time, 100 days; draught of water, 10 feet; displacement, 1,245 tons; speed per hour, 9 statute miles.

"Merrick & Sons, Philadelphia.—Vessel of wood and iron combined. This proposition we consider the most practicable one for heavy armor. We recommend that a contract be made with that party, under a guarantee, with forfeiture in case of failure to comply with the specifications; and that the contract require the plates to be 15 feet long and 36 inches wide, with a reservation of some modifications, which may occur as the work progresses, not to affect the cost. Price, \$780,000; length of vessel, 220 feet; breadth of beam, 60 feet; depth of hold, 23 feet; time, 9 months; draught of water, 13 feet; displacement, 3,296 tons; speed per hour, 9½ knots.

"S. C. Bushnell & Co., New Haven, Conn., propose a vessel to be iron-clad, on the rail and plate principle, and to obtain high speed. The objection to this vessel is the fear that she will not float her armor and load sufficiently high,

and have stability enough for a sea vessel. With a guarantee that she shall do these, we recommend on that basis a contract.

"Price, \$235,250; length of vessel, 180 feet; breadth of beam — feet; depth of hold, 12½ feet; time, 4 months; draught of water, 10 feet; displacement, — tons; speed per hour, 12 knots."

The recommendation was adopted by Congress, and the 3 vessels ordered to be built are the last three on the list given above.

The contract made with Capt. Ericsson stipulated for the completion of his battery within 100 days from the signing of the contract, which was Oct. 5th, 1861, and the extraordinary provision was introduced, that the test of the battery, upon which its acceptance by the U. S. Government depended, should be its withstanding the fire of the enemy's batteries at the shortest ranges, the United States agreeing to fit out the vessel with men, guns, &c. The following is a general description of the vessel as completed and delivered to the U. S. Government for trial, March 5, 1862. The hull is formed by two distinct parts, a lower and upper, both of which are flat-bottomed; the lower one built of ¾-inch iron, 124 feet long, 34 feet wide at the top, and 6½ feet deep. The sides incline at an angle of about 51° with a vertical line, and terminate in sharp ends, the bow projecting and coming to a point at an angle of 80°. The upper hull is 174 feet long, 41 feet 4 inches wide, with perpendicular sides 5 feet high. It juts over the lower hull on each side 3 feet 7 inches, and at each end 25 feet. The sides of this portion are built of white oak, 2½ feet thick, covered with 6 inches of iron plates on the outside, and a ½-inch plating of iron within; the object of the latter being to arrest splinters in case of a ball penetrating the sides. The top is covered with a bomb-proof flat deck unprotected by any railing or bulwark. This deck consists of oak beams, 10 inches square and 26 inches apart, covered with 8-inch plank, and this with 2 layers of iron, each an inch thick. The draught of water is 10 feet, leaving only 18 inches above the surface. The projecting ends of the upper hull serve as a cover for the propeller and rudder in the stern and the anchor in the bow. The former are entirely out of reach of shot; and the latter is carried in the upper hull, from which it is readily lowered, and into which it is hoisted again by men working below, without any exposure or sign of their movements on the outside. The lower hull is so situated beneath the upper, that it can only be reached by a ball after this has passed through at least 25 feet of water, and the inclination of the sides would then prevent its penetration; and the upper is impregnable in its 6 inches of iron, backed with 30 inches of white oak and the inner lining of ½-inch iron. The prominent object upon the deck in the middle of the boat is the turret or castle, a cylinder of 20 feet diameter within, and 9 feet high, built of 8 thicknesses of 1-inch plates, bolt-

ERICSSON'S BATTERY--THE MONITOR.

ed securely one over another with overlapping joints, and lined with an additional layer of iron an inch thick, thus making 9 inches in all. The weight of the turret is about 100 tons, and its support is a circular bed plate of composition metal firmly secured to the deck. Upon this it is supported except in time of action, when the weight is taken by a vertical central shaft of iron, with which it is made to revolve as desired, the motive power being a steam engine specially designed for this service, as also for working the blowers for the fires, and for ventilation. On the top, the turret is covered with iron beams and perforated iron, shell-proof. This, while it affords protection, admits the circulation of air necessary in working the guns. Small sliding iron hatchways are also provided to afford an entrance for the men through this portion. The turret is constructed for two heavy guns, which constitute the whole armament of the battery. They are placed precisely parallel with each other, and both are directed out the same side of the turret. Those selected for the first trial were 11-inch Dahlgren smooth-bore guns, carrying 168 lb. round shot. Some wrought-iron shot were provided for the first encounter, but their use was forbidden for fear of their bursting the guns, by reason of their weight, being 15 lbs. greater than that of the shot used in proving the guns. The portholes are circular openings, 3 feet above the deck, just large enough to admit the muzzle of the gun, and kept closed by a sliding shutter, managed on the inside, and removed only when the gun is run out to be fired. The gun-carriages are of wrought iron and run on slides very accurately constructed. The sighting of the guns was designed to be not over their line through the portholes; but four holes were pierced through the turret at the height of the eye for telescopes, and just outside of the holes reflectors were fixed, which bent the ray of light coming in a direction parallel with the guns through the axis of the telescope. In action, however, the ordinary mode of sighting was adopted. The turret is caused to revolve to the right or left, by the movement of a small wheel which controls the action of the steam, and is turned by the gunner or his assistants, and a scale is provided by which the elevation of the guns is also adjusted. When ready for firing, the shutter is triced up by the gunner, the piece is run out, fired, and instantly returns by the recoil, a friction clamp upon the sides of the ways arresting it at any desired point. On this side of the turret is an additional thickness of iron plating of about 3 inches. The pilot or wheel-house, as originally constructed, was a square box formed of bars or beams of wrought iron, 9 inches by 12, interlocked at the corners, and covered with heavy plating. Elongated horizontal apertures at the sides afford the only lookout for the helmsman. These apertures may also be used as loopholes for musketry if desirable. In the place of chimneys, bomb-proof gratings are set in the

deck, and through these the smoke of the fires is driven out by the blowers; low temporary chimneys are however provided, which are removed in time of action. The deck is thus entirely free of all incumbrances, and the men who work the vessel and handle the guns, are all entirely out of sight beneath the invulnerable plating. All access into the interior is securely shut off, so that if the battery were boarded, the men could not be reached and no harm could be done to the vessel itself. Its sharp and powerful iron prow will enable it to sink with ease any wooden vessel it can reach, and its light draught allows of its running into shoal waters either for offensive operations or to retire, if necessary, to a distance from more powerful vessels of deeper draught. Her complement of men consists of 60 in all, of whom 11 are officers. The battery is evidently designed for harbor and river operations, and not for encountering heavy seas.*

* The important services soon performed by this vessel, and the immense consequences following the first encounter between iron-clad vessels, will justify us in presenting in this form a short sketch of her voyage, and of the battle in which she was immediately afterwards engaged, although the events properly belong to the year succeeding that to which this volume is particularly devoted. The Monitor was taken in tow from New York harbor by a steam-tug on the 6th of March, 1862, and propelled by her own steam-power also, was hurried towards Hampton Roads, to be in readiness, if possible, for the threatened descent upon our shipping of the frigate Merrimac, which the Confederates had covered with a heavy plating of iron, and with a roof forward formed of bars of railroad iron. In case of encountering storms, the original plan was to make a harbor, and thus avoid the dangers to which a vessel of this character would be subjected. The voyage, however, was performed through a heavy gale of wind and rough seas, which the vessel happily weathered, although the waves rolled over the top of the turret, and the water was driven with violence through the apertures necessarily left for ventilation, for the escape of smoke, &c. This threatened several times to extinguish the fires, and caused the engines to work so feebly, that they were incompetent to expel the noxious gases, or pump out the water. Several of the men and officers were rendered senseless by the suffocating fumes from the fires, and were only restored by being brought up into the turret, and exposed to the fresh air. In the height of the gale the tiller rope was thrown off the wheel, and but for the strong hawser connecting the battery with the tug-boat ahead, the former must have foundered before her movements could have been brought under any control. During the night, when these dangers were most imminent, no means whatever were available for signalling to the tug-boat the need of seeking protection nearer the shore, from which direction the wind came, and all on board were thus kept in constant alarm.

To those upon whom rested the responsibility of the great trial, upon which they were about to enter, no sleep was afforded after Friday morning the 7th of March. On Saturday evening the Monitor entered Hampton Roads as the engagement of the day was terminating between the Confederate ships—the iron-plated Merrimac, the Jamestown, and the Yorktown, with the United States vessels—the sloop-of-war Cumberland, the frigate Congress, and the steam-frigate Minnesota, the two former of which had already been destroyed, the one by the terrible battering power of the Merrimac, and the other by her heavy broadsides of shot and shell. During the night the Merrimac lay at anchor near Sewall's Point, and the Monitor remained near the Minnesota, which was fast aground between Fortress Monroe and Newport News. Early on Sunday morning the Merrimac was seen advancing towards the Minnesota, to renew the work of destruction she had so successfully prosecuted the day before. When within range, her shot were discharged at the frigate aground without any heed being paid to the apparently insignificant stranger within a mile of which she was passing. At this distance, those on board the Merrimac must have been astonished as one of the 11-inch Dahlgrens from the curious little tower upon the raft-like structure opened upon the ship with its hundred and sixty-eight pound shot. From that time the attack upon

Stevens Battery.—In November an act was passed by Congress, directing the Secretary of the Navy to appoint a committee to examine the Stevens Battery at Hoboken, N. J., and report upon the expediency of its being completed by the Government. This board consisted of Commodore Stringham, Commander William Inman, Captain T. A. Dornin, and Chief Engineer A. C. Stimers, all of the United States Navy, and Prof. Joseph Henry, of the Smithsonian Institute, who met at the navy yard in Brooklyn, on the 1st of December, and proceeded to the investigation of the subject, with which they were charged. The report of the board, made Dec. 24th, was unfavorable for the completion of the ship, Prof. Henry, however, not fully concurring in the conclusion arrived at by the naval officers.

The ship is described as a long, slender iron vessel, evidently intended for high speed in smooth water, and but partially completed. Her length is 420 feet, and extreme breadth 53 feet. Her sides are built of $\frac{1}{2}$ -inch iron, riveted to ribs of angle iron 6 inches deep, 3 inches wide, and $\frac{1}{2}$ inch thick, spaced two feet apart throughout the entire length. The bottom is strengthened with floor timbers of plate iron,

the Minnesota was abandoned, and attention was directed only to this new antagonist. The vessels soon came into close action, and no effect resulting from the shot of the Merrimac striking the Monitor, an attempt was made by the former to run down and crush or sink the smaller vessel. Five times the two vessels struck each other, and each time one of the guns of the Monitor was discharged directly against the plated sides of the Merrimac. The Minnesota directed her fire against the Merrimac, and two of her balls struck the Monitor, without, however, inflicting any damage. After the contest had raged for some hours, the Monitor, entirely unharmed, withdrew to some distance for the purpose of hoisting more shot into her turret; which being done, the fight was immediately re-commenced. The Merrimac soon appeared to be in a disabled condition, and gradually worked away towards the batteries at Sewall's Point. As afterwards ascertained, the heavy iron prow, projecting six feet from the stem of the Merrimac, was so wrenched by the concussion against the side of the Monitor, that the timbers of the frame were started, causing the vessel to leak badly. It is not known that the shot of the Monitor penetrated the sides of her opponent; but it has been reported and denied that the timbers behind the iron plating were shattered by the tremendous force of the blows. The Merrimac received some injury, and loss of life was incurred from the shot of the Minnesota, but to what extent is not known. During the fight, the first officer of the Monitor, Capt. A. H. Worden, took his station in the pilot-house, and directed the firing by signals to the First Lieutenant, S. Dana Greene, by whom the guns were trained and fired. One of the last shots of the Merrimac struck the pilot-house near the aperture through which Captain Worden was looking at the instant. The blow, which was so heavy as to break one of the great wrought-iron beams of the pilot-house, stunned this officer, seriously injuring his eyes and face. On the retiring of the Merrimac, the second officer, now taking charge of the vessel, knowing that another shot striking the pilot-house would be likely to complete its destruction, and render the vessel unmanageable by disabling the steering apparatus; and acting under positive orders which restricted the Monitor to a defensive course, except so far as might be necessary to protect the Minnesota, declined to pursue the Merrimac, and remained by the Minnesota. Excepting the damage to the pilot-house, the Monitor received no injury in this naval battle. Two men leaning against the inner wall of the turret were knocked down and stunned for a short time by a shot striking the opposite side against them, but no other inconveniences were experienced by the officers and crew. Many marks of shot were found upon the sides, turret, and deck of the Monitor, the deepest penetration of which was on the vertical sides, amounting in one instance to $4\frac{1}{2}$ inches. On the tower the deepest depression was $1\frac{1}{2}$ inches, and on the deck $\frac{1}{2}$ inch.

secured to a heavy box keelson, running from stem to stern, and the plating over this portion is $\frac{5}{8}$ of an inch thick. Five tubular boilers on each side, occupying 80 feet of the length of the vessel, are secured to the iron keelson, and immediately abaft these are the 8 main engines, nearly completed, and occupying 58 feet length of the vessel.

Four engines, of 1,000 horse power each, are connected with each of the two propeller shafts, which are worked quite independently of each other, so that the propellers, revolving in different directions, if desired, may be used to turn the ship round, or they may be used as a substitute for the rudder. Forward of the boilers are two pumping engines, and pumps for feeding the boilers, and two engines for running a large fan-blower for furnishing fresh air throughout the ship, drawn down through gratings in the bomb-proof deck above. This will cause a powerful draught in the furnace fires, independently of the height of the chimney. The lower deck, at the height of 14 feet above the bottom, is planned to extend forward and abaft the machinery, beneath which will be coal, water-tanks, and powder-magazines, and upon it provisions and shell rooms and other water tanks. The object of the tanks is for containing sea-water, which it is designed to admit to the extent of 1,100 tons, if necessary, in time of action, for the purpose of partially submerging, and thus better protecting, the vessel. At 21 feet from the bottom is the next deck, rendered bomb-proof forward and abaft the machinery, but over which it is to be of ordinary material. The portion of the ship protected by heavy armor is that occupied by the machinery, extending altogether 120 feet in length. From 3 feet outside the vessel, the sides against this portion are to be carried up on a slope of about 27° with the horizon, to 14 feet inboard, giving an upper deck 7 feet above the 21-foot deck, with the width of 23 feet amidships. The forward and after ends of this deck are formed like the sides, and slope down to the bomb-proof deck. The inclined armor is to be of 7 thicknesses of plate iron, making altogether $6\frac{1}{2}$ inches, supported upon iron beams 8 inches deep, and filled in between with locust, and locked with locust planks 6 inches thick. The upper deck is made bomb-proof by 3 layers of iron of 2 inches thickness, including wooden planking 6 inches thick. A light deck continues this platform fore and aft over the quarters of the men and officers. From the lower edge of the inclined armor at the 21-foot line, which is the load water-line, a strong protection of oak timbers, covered with iron plates, extends down the sides of the vessel to the depth of 6 feet. This protection is extended the whole length of the ship.

These arrangements will be better understood by reference to the accompanying cuts and explanations.

The armament, to be constructed especially for this battery, consists of 5 fifteen-inch guns,

DESCRIPTION OF THE STEVENS BATTERY.

FIG. 1, longitudinal section. All parts below the heavy line representing the armor, are protected from shot and shells.

- A, Boilers.
B, Engines.
C, Blowers.
D, Pumping Engines.
EE, Stowage.
F, one of the Steam-loading Cylinders.
H, Steam Machinery for training the guns.
I, Helm.

FIG. 2, Deck Plan. The light part under the guns is the top of the casemates, and is level with the rest of the upper deck.

FIG. 3, half cross-section, 54 feet aft the centre, through the engines.

FIG. 4, half cross-section, 40 feet forward the centre, through the boilers.

THE HULL.

Length over all, 420 feet.

Breadth over all, 53 feet.

Depth from upper or gun deck, 28 feet.

Draft of water, without coal or stores, 17 feet 2 inches.

Draft of water, with coal and stores, 20 feet 6 inches.

Fighting draft, 22 feet 6 inches.

THE ENGINES AND BOILERS.

Number of screw-propellers, 2.

Number of engines, 8.

Diameter of cylinders, 3 feet 9 inches.

Length of stroke, 3 feet 6 inches.

Number of boilers, 10.

Horse power, 8,600.

capable of throwing round shot of 425 lbs. weight, and 2 ten-inch rifled guns. They are to rest on wrought-iron shot-proof carriages, each of the 15-inch guns, with its carriage, weighing 60,000 lbs., and each of the 10-inch guns, with its carriage, 40,000 lbs. The weight of broadside thrown by these guns is 2,200 lbs., far exceeding that of any other war vessel in the world. The weight of broadside of all the guns of the *Warrior* is 1,564 lbs, and of the *Minnesota*, unprotected by armor, is 1,122 lbs. The original plan was to depend upon the immense weight and strength of these guns for their protection against the shot of the enemy, and it was supposed that they might themselves be sufficient defence to the single man required upon deck to each one for sighting it; but a covering of wrought iron is also devised for their further security in their exposed situation *en barbette*. The whole arrangement for loading and training them is of an exceedingly novel character, designed to be conducted entirely by men below the deck, and with steam machinery, under the direction of the gunner in charge of each gun. The loading is performed by depressing the muzzle into an opening in the deck at an angle of about 20°. The bore is thus brought in line with the steam cylinder, below which it has, upon the outer and upper extremity of its piston-rod, a compound sponge and rammer. On admitting steam to one side and the other of this piston, the gun is sponged out, and the ammunition being placed in a position near the muzzle, is rammed home by the steam rammer, after which the piece is elevated, trained upon the enemy, and fired. The recoil is received by springs of india rubber disks, making a pile on each side 40 inches long, which throw the piece forward into position again, similar springs in front checking the return movement in that direction.

The total expenditure upon the vessel has been \$728,435.87, of which the Government has paid \$500,000 and Mr. Edwin A. Stevens the remainder. The amount required to complete the vessel is estimated at \$554,858.13, making the total cost \$1,283,294. The following were the principal objections found by the board in the construction and equipment of the ship: her great length compared with the transverse strength rendering her unsafe in a heavy sea, while for harbor service alone, she would be inconvenient on account of her length and draught of water; the exposure of the quarters of the men and officers to be flooded by shot-holes in the unprotected sides near the water-line when the ship is submerged below the 21-foot deck; a want of sufficient strength above the 14-foot line for the support of the heavy armor; the inefficiency of the side armor forward and abaft the central protected part; the danger to the light deck when the heavy guns are fired nearly on a line with the keel. This last objection, however, was withdrawn after the board had witnessed some experiments made by Mr. Stevens in firing a 10-inch gun over a deck

temporarily arranged on the same plan. The others also have been ably answered by Mr. Stevens in a memorial he addressed to the Senate and House of Representatives in February, 1862, in which he fully explained the peculiarities in the construction of the vessel, presented the opinions of experts thoroughly acquainted with the construction of iron steamships, who reported unanimously their opinions in favor of the great strength and safety of the vessel, and her great capacity of speed, &c., which is estimated at not less than 17 nautical or 20 statute miles an hour.

This memorial, which forms a large printed pamphlet, contains much valuable information respecting iron-clad ships, the history of their earliest designs, and offers an interesting explanation of the fact of the French preceding all other European governments in adopting this class of war vessels, their first idea on the subject being derived from an eminent person, who, when an exile, became aware of some of the author's experiments. On the 31st of December Mr. Stevens having made preparations for a series of experiments at Hoboken, upon a large scale, invited the board appointed to examine the battery, together with a large number of gentlemen, officials and others, to witness their results. On the day appointed, Jan. 4, a large company assembled at Hoboken, where they were shown the battery in its incomplete state, and the models and plans according to which it was to be finished. After this the following experiments were made: a 10-inch gun, procured from the Navy Department, weighing 9,883 pounds, was mounted with India rubber buffers behind the trunnions. This gun was loaded with a full service charge, 11 pounds of powder, and a solid spherical ball weighing 124 pounds, and was fired at a target exactly representing a section of the armor of the battery, and anchored in the river, 220 yards from the gun. The target was composed of layers of plate iron from five-eighths to two inches thick, making 6½ inches in all. It was 4 feet broad, 8 feet long, and set at an angle of 27½ degrees with the horizon.

The iron was backed with two layers of locust timbers seven inches thick each. In the lower layer were imbedded wrought-iron beams six inches high, four feet long, and two feet apart, weighing forty-six pounds to the yard.

Beneath the wood was a half-inch iron plate, making the entire thickness twenty-one and one-fourth inches. The upper and lower plates were fastened to the wood by wood screws fifteen inches apart, and the side edges of the upper plates were battened by iron, one inch thick and three inches wide, and riveted together.

This target rested on a raft, so as to have no support except at the edges, the lower part of it was 18 inches under water.

After a few experimental shots, the gun was pointed at the target, and the first shot struck it 21 inches above the water, and within nine

inches of the right edge of the target. Its effect was to make an indentation and deflection, which together were $1\frac{3}{4}$ inches deep in the deepest place, and which ran out to the surface or diminished to nothing in a distance of 13 inches measured on the line of flight without cracking any of the plates. The second shot passed to the right of the target, and the third went over it. The fourth shot struck the target on its left side, 13 inches from the edge, and 11 inches above the water, with the same effect as that of the first shot, except that the depression was $1\frac{1}{4}$ inches deep. The figure of this indentation was similar to that of the first. The recoil of the gun was $7\frac{1}{2}$ inches, and did no injury to the carriage or buffers.

This gun was loaded by steam-power, the muzzle being depressed so as to bring the bore parallel with a steam cylinder situated below a platform made to represent the deck of the battery. The platform was composed of white pine planks, $2\frac{1}{2}$ inches thick, resting on pine beams 5 inches square and 2 feet apart from centre to centre, and caulked and pitched in the usual manner. The piston-rod of this steam cylinder was the ramrod of the gun. Upon the upper end of this ramrod was a swab, which also answered the purpose of a rammer. The cartridge and ball were attached to a *sabot* and placed on a scoop, arranged so as to lift the ball to its proper position between the rammer and the muzzle of the gun, when steam being admitted to the cylinder, the ball was forced home. The gun was then elevated, sighted, and fired.

The deck above described was $3\frac{1}{2}$ feet below the line of fire. Upon examination after the firing, no injury or change could be perceived in the deck or its caulking.

A Parrott rifled gun having a $6\frac{1}{4}$ -inch bore, and weighing about 9,300 lbs., was then fired at the target with 10 lbs. of powder and an elongated shell weighing 100 lbs. Several of these shots were fired, and one struck the target 4 feet 6 inches from the water, and 6 inches from the right side, making a depression one inch deep and running out to the surface at a distance of 8 inches without doing other injury to the plates. This shot grazed the edge of the batten, displacing the corner to the depth of half an inch. The mounting of this gun was such that temporary sights had to be used, which accounts for the inaccuracy of its aim.

The experiments of settling and raising a vessel and of turning her on her centre were tried with the iron steamboat Naugatuck. She is 100 feet long by 20 feet beam and 7 feet depth of hold, and is arranged with apartments at the ends and on deck for receiving the water to depress her. The water was pumped into the compartments and on deck, depressing the vessel 2 feet $10\frac{1}{2}$ inches, and submerging the deck 6 inches in 15 minutes. The water was then pumped out in 8 minutes, restoring the vessel to her original draft. The vessel was turned end for end in $1\frac{1}{2}$ minutes, by reversing one of

her two screw propellers. These experiments were repeated several times with substantially the same results.

On the 11th further experiments were made in the presence of General Scott, General Anderson, Colonel Delafield, and other officers, engineers, and citizens. The 10-inch gun, mounted as before described, was loaded by steam with 11 pounds of powder and a 124-pound ball, and fired four times with the same charge; the entire time occupied by the four shots being 189 consecutive seconds, and the average time being $34\frac{1}{4}$ seconds. The quickest time was 25 seconds. The average was increased by the failure of a friction primer to go off. A 225-pound elongated shot was afterwards fired with 4 pounds of powder, having been loaded with the same rapidity as the 124-pound shots, and the recoil being less. The raft on which the target was secured, having been carried away by the floating ice in the river, it could not be replaced in time for this experiment.

The energies of the navy were severely tested during the year, in maintaining the blockade of an immense line of sea coast. So successful was this effort that the governments of Europe acknowledged its efficiency, and refrained from any interference. The other operations may be briefly stated. On the 12th of April, upon the receipt of orders from Secretary Welles conveyed by Lieutenant Worden, the commander of the fleet off Pensacola harbor, Captain Adams, prepared to reinforce Fort Pickens, and the same night the troops under Captain Vodge, and the marines under Lieutenant Cash were landed. No opposition was made, and no accident or disorder occurred. The expedition was under the command of Commander Charles H. Poor, assisted by Lieutenants Smith, Lewis, Newman, and Belknap.

On the 31st of May, the gunboat Freeborn, supported by the Anacosta and Resolute, made a serious cannonade upon the Confederate batteries at Aquia Creek. The firing continued for two hours, and the three lower batteries of the enemy were silenced. The action was recommenced on the next day, a higher tier of batteries being engaged, and continued for five hours, from half-past eleven A. M. to half-past four P. M. The gunboat Pawnee was engaged on the second day. Some damage was done to the vessels, but no one was killed.

On the 5th of June, the steamer Harriet Lane opened fire upon the Confederate battery at Pig Point. This was for the purpose of ascertaining the strength of the battery. Thirty rounds of shot and shell were thrown from the steamer, and about fifty from the battery. The vessel was somewhat injured, but no lives were lost. (*See* PIG POINT.)

On the 3d of June the brig Perry captured the privateer Savannah. (*See* PRIVATEERS.)

On the 26th of June the Freeborn and Reliance, gunboats, made an attack on the Confederate batteries at Matthias Point, and were

repulsed, with the loss of Commander Ward, killed, and four wounded. (*See* WARD, and MATTHIAS POINT.)

On the 21st of July, a battalion of marines, under the command of Major John G. Reynolds, was present and took part in the battle of Bull Run. (*See* BULL RUN.)

On the 25th of July, Lieutenant Crosby, with five launches and four boats from Fortress Monroe, proceeded up Back River, a small stream, not far from the fortress, and destroyed ten vessels. They also brought back a schooner heavily laden with corn, provisions, and other articles.

On the 10th of August, Galveston, in Texas, was bombarded by Commander Alden. (*See* GALVESTON.)

On the 15th of August, the gunboats Reliance and Resolute were despatched to make a reconnaissance of Matthias Point. A boat was sent with a small party to capture another boat seen on the Virginia shore. As the former approached the shore they were fired on from the bushes, and three of the boat's crew were instantly killed and one wounded. The gunboats opened fire upon the covert and drove the enemy out, when the boat's crew was brought off by assistance from one of the vessels.

On the 26th of August, the naval and military expedition to Hatteras Inlet sailed from Hampton Roads. (*See* EXPEDITIONS.)

On the 10th of September, the gunboat Conestoga, Lieutenant S. E. Phelps, opened fire on a Confederate battery at Lucas Bend, a few miles below Cairo on the Mississippi River. There were sixteen pieces of field artillery and one heavy piece in the battery. Some of the guns were rifled. In a short time the gunboat Lexington, under Commander Stembel, arrived. The guns of the battery constantly changed their position on the shore, and the boats moved up or down in like manner. As the former were silenced at one spot they reappeared at another until they were finally silenced. Several shots were also fired at a Confederate gunboat, which retired to Columbus. The object of the movement of the gunboats was to accompany a body of troops marching down the Missouri side of the river.

On the 13th of September, the schooner Judah was destroyed as she lay at the Pensacola navy yard. (*See* PENSACOLA.)

On the 14th of September, the fort on Beacon Island, at Ocooke Inlet, was destroyed and twenty-two guns disabled.

On the 16th of September, a naval force under Commander Melancthon Smith occupied Ship Island.

On the 5th of October, the gunboat Monticello, Lieutenant D. L. Braine, shelled a Confederate force on Hatteras Island and the steamers from which they had landed. (*See* HATTERAS ISLAND.)

On the 5th of October, an attempt was made to cut off two boats and twenty-three men belonging to the steamer Louisiana, which had

been sent to destroy a schooner at Chincoteague Inlet, Virginia. The schooner was destroyed, and four of the Federal force were wounded. The injury to the Confederates is unknown.

On the 11th of October, a large schooner was destroyed in Quantico (or Dumfries) Creek by a Federal force in two launches under Lieutenant A. D. Harrall. It was dark at the time, and the attacking party was fired upon by a considerable Confederate force on the shore.

On the 11th of October, a Confederate battery at Lynnhaven Bay was silenced by the propeller Daylight, Commander Samuel Lockwood. The battery had opened fire upon an American ship, which, during a gale, had dragged within reach of its guns.

On the 13th of October, the affair at the Passes of the Mississippi took place. (*See* LOUISIANA.)

On the 21st of October, a skirmish at long range took place between the steamer Massachusetts, Captain Smith, and a Confederate steamer of light draft and great speed, in Mississippi Sound. The Massachusetts was struck by a 68-pounder shell, but continued the engagement until her ammunition was exhausted.

On the night of October 27, a boat expedition from the steamer Louisiana destroyed a schooner at Swan's Bug Creek, near Chincoteague Inlet, Virginia.

About October 30, Lieutenant Phelps with three companies of an Illinois regiment in the gunboat Conestoga, attacked a Confederate force at Eddyville, up the Tennessee River, 62 miles from Paducah. Forty-four prisoners were taken, and also stores.

On the 7th of November, the batteries at Port Royal were captured. (*See* EXPEDITIONS.)

On the 9th of November, the gunboats Taylor, Commander Walke, and Lexington, Commander Stembel, participated in a disastrous attack on the batteries at Belmont on the Mississippi River. On the same day a schooner was burned at Curritowan Creek, Va., by a force from the gunboat Cambridge, Commander W. A. Parker.

On the 14th of November, the gunboat Corwin had a conflict with a Confederate steamer at Hatteras Inlet.

A number of exploits were performed before the close of the year by the gunboats of the navy.

NEW HAMPSHIRE is one of the New England States, and one of the original members of the Confederation. It is situated between lat. 42° 41' and 45° 11' N., and long. 70° 40' and 72° 28' W. from Greenwich. Its length from north to south is 176 miles; extreme breadth, 90 miles; average breadth, 45 miles; area, 9,280 square miles, or 5,939,200 acres. The population in 1860 was—whites, 325,622; free colored, 450; total, 326,072. It is bounded north by Lower Canada, east by Maine and the Atlantic, south by Massachusetts, and west by Vermont, from which it is separated by the Connecticut River. It is divided into ten counties,

The valuation of the real and personal property of its citizens in 1850, was \$103,652,835; in 1860, \$156,310,860. The vote at the presidential election in the same year was as follows: Lincoln, 37,519; Douglas, 25,881; Breckinridge 2,112; Bell, 441. At the presidential election in 1856 the vote was as follows: Fremont, 38,345; Buchanan, 32,789; Fillmore, 422. The State had, on the 1st of January, 1862, 684 miles of railway completed and in progress, of which 658 miles, constructed and equipped at a cost of \$22,676,234, were open for traffic.

The State responded promptly to the call for troops in April, and the Governor issued the following proclamation:—

CONCORD, April 16, 1861.

SIR: The President of the United States having, in pursuance of the act of Congress approved February 28, 1795, called upon the State of New Hampshire for a regiment of militia, consisting of ten companies of infantry, to be held in readiness to be mustered into the service of the United States for the purpose of quelling an insurrection and supporting the Government, I, Ichabod Goodwin, Governor of New Hampshire, command you to make proclamation, calling for volunteers from the enrolled militia of this State to the number required, and to issue from time to time all necessary orders and instructions for enrolling and holding in readiness to be mustered into service said volunteer corps, agreeable to the aforesaid requisition. ICHABOD GOODWIN.

To the Adjutant-General N. H. Militia.

On the 8th of May the first regiment was ready, and it left Concord for the seat of war on the 25th of May.

The election for State officers had taken place on the second Tuesday of March, and the republican candidate, Nathaniel S. Berry, was elected, receiving a majority of 4,496 votes over his opponent, George Stark. The new Governor was not inaugurated till the session of the Legislature on the 5th of June. In his Message delivered the next day, he urged immediate attention to such measures as were necessary to aid the General Government in the war which was made upon it by a portion of the States, and trusted that New Hampshire would be behind none of her sister States in the appropriation of men and money for the purpose. He recommended the organization of at least one regiment for every county in the State, to be thoroughly drilled and equipped for service at the call of the Legislature.

To these recommendations the Legislature responded most cordially. During the session of thirty days, resolutions were reported declaring the war now in progress to be solely for the maintenance of the Government and the suppression of rebellion; declaring against the right of secession; asserting that neither the President nor Congress can constitutionally entertain any proposition which had for its object the dismemberment of the Government or the dissolution of the Union; and finally declaring that the State of New Hampshire pledged her resources for the integrity of the Union, the support of the Constitution, and the enforcement of the laws of the General Government. When

these resolutions were put to the vote, the members all rose and gave a unanimous aye. A militia bill was passed, authorizing the Governor to raise three regiments, to each of which he might add a company of artillery, cavalry, and riflemen. One million of dollars was also appropriated for recruiting, arming, and equipping troops for the service of the United States. Eight regiments were raised and sent forward during the year: one for three months, mustered into service on the 7th of May, 1861; which returned and was mustered out of the service on the 9th of August, 1861; and seven regiments for three years or during the war; and one battery of artillery, three companies of sharpshooters, and four companies of cavalry. The whole number of enlistments, since the first requisition by the President, was 9,197 men. The sums paid for recruiting and equipping the several regiments and companies amounted to \$893,333 26.

In November, the Secretary of the Treasury, Mr. Chase, wrote to the Governor as follows:

Will you inform me, at the earliest practicable period, whether the authorities of New Hampshire will assume and pay the amount of direct tax apportioned to that State by the existing law; and also whether, in case of any change in the law by which a different and perhaps larger amount shall be apportioned to the State, the authorities will probably assume and pay it?

I am, very respectfully,

S. P. CHASE, Sec. of the Treasury.

NATHANIEL S. BERRY, Governor, &c.

To this inquiry the Governor replied as follows:

In answer, I would say that, in order that our State may avail itself of the advantages of said act, you are hereby notified and assured that it is the intention of the authorities of this State to assume and pay such direct tax into the Treasury of the United States, agreeably to the provisions of said act. And, in case of any change by which even a larger amount shall be apportioned to this State, it will probably be assumed and paid, as aforesaid.

I respectfully suggest that it may be the wish of our State, if agreeable to the Department, to allow, in the form of a just and reasonable set-off against said tax, such just debts and claims as may be due and owing from the General Government to the Treasurer of this State, lawfully created and advanced, to furnish troops, agreeably to the acts of Congress on that subject. We also with pleasure assure you that New Hampshire will, by her men and money, furnish her full proportion of the means requisite to crush out this unholy rebellion, at such times and occasions as the General Government shall demand.

Very respectfully,

NATHANIEL S. BERRY.

To S. P. CHASE, Secretary of Treasury.

The banking capital in the State is \$5,131,000, which was reduced during the year by \$102,000, on the part of some of the banks. There are twenty-seven savings institutions in the State, with an aggregate of assets amounting to \$5,860,229; the amount due to depositors was \$5,653,585, and the surplus \$206,943. The State debt on the 1st of June, 1861, was \$31,668, which was considerably reduced during the remainder of the year.

NEW JERSEY. The State of New Jersey was one of the original thirteen, and is one of the Middle States. It is almost entirely surrounded by navigable waters, being separated from Pennsylvania and Delaware on the west and south by the river and bay of Delaware, and on the east having the Atlantic Ocean, Staten Island Sound, the Kills, and the Hudson River. The northeastern boundary, which separates it from New York, is a line drawn from 40° on the Hudson, to a point on the Delaware 41° 21' north latitude. The greatest length of the State, from Cape May to Carpenter's Point, is 166 miles. Its breadth varies from 40 to 75 miles, and the surface is 7,276 square miles.

The population of the State of New Jersey is, by the census of 1860, 672,024. In 1850, it was 489,319 whites, and 236 slaves. A number of legal slaves still exist in the State; but being mostly the attached servants of old families, are not regarded in the light of slaves. The progress of population in the State has been very rapid in the last ten years by accessions from New York. The soil of New Jersey is good, and, by the valuation of the census, it ranks higher than that of any other State.

The number of the electoral votes of the State is seven, and it was the only Northern vote not given entirely to Mr. Lincoln. There were cast three for Mr. Douglas.

The Governor is elected for three years. The Senate consists of twenty-one members, elected for three years; and the House of sixty, elected for one year. The Governor is Chas. S. Olden.

The city of Newark has a population of 72,000; and the census shows its annual manufactures at \$23,264,313, of which \$18,000,000 found a market at the South.

The people of New Jersey were apparently alive to the dangers which threatened the country through the course of events. A State Union Convention was called to meet at Trenton on the 11th of December, 1860, the same day on which the South Carolina Senators withdrew from Congress.

The following is the call for the Convention:

The undersigned respectfully invite the people of New Jersey to assemble in mass Convention at Trenton on Tuesday, the 11th instant, at 12 o'clock, at the State House, to consider the condition of national affairs, and to concert such measures as may be deemed advisable under the present crisis of our Republic. All national men in favor of constitutional Union measures are invited to attend.

The call was signed by representatives of all the national parties in the State by thousands.

The Convention assembled on the day appointed, amidst a vast concourse of people at Trenton.

The following preamble and resolutions were adopted:

Whereas, history records that to New Jersey is due the credit of having given such instructions to her Commissioners, which met at Annapolis in 1786, to adopt measures for a more perfect union of the States, which led to the assembling of the Convention of 1787, which formed that admirable Constitution that, under the blessing of God, has conferred such inestimable

benefits on the people of the United States; and whereas, New Jersey has always faithfully abided by the compacts and agreements to which she assented when she accepted and adopted the Constitution of the United States; and whereas, that Constitution was the result of generous and magnanimous concession and compromise, and New Jersey is now, as formerly, willing to make any proper concession, or give any proper additional guarantees which wisdom and patriotism may require for its promotion; and whereas, from the foregoing consideration, it is evidently proper that New Jersey should interpose, and by her conservative voice invite her sister States, as well as all extremists of all parties and sections, to pause and deliberate, and consent to make one more patriotic effort in the preservation of the Union which Washington pronounced the "palladium of our liberty;" therefore be it

Resolved, That there is imminent danger of the dissolution of the United States.

Resolved, That the cause of the present portentous crisis is the actual and threatened interference on the part of the Northern agitators with the rights and property of the people of fifteen States of this Union.

Resolved, That we see no remedy for this deplorable state of public affairs unless the North, in the most prompt and explicit manner, shall avow its determination to remove all political agitation for the abolition of slavery: shall repeal all acts designed to nullify or embarrass the faithful execution of the fugitive slave law; shall consent to the citizen of the South enjoying the services of his domestic while temporarily sojourning here on business or pleasure; and shall accord to the South all the rights of property guaranteed by the Constitution and the laws, and the decisions of the Supreme Court in pursuance thereof.

Resolved, That it is no valid objection to the concession or compromises which we have suggested that they are compromises of political principles; for the Constitution was only made by concession and compromise of political principles, and in all its parts we trace the evidence of the mutual surrender and compromise of political principles.

Resolved, That five delegates from this Convention be appointed to confer with our sister States, and urge upon them the necessity of the measures which we have suggested as indispensable to the restoration of amity between the States and the preservation of the Union.

The following extracts, from letters addressed to friends in Washington, by two among the distinguished Jerseymen who participated in the proceedings of the Convention, give an idea of the prevailing sentiment:

From Commodore Stockton.—If the South will only give us time, we will bring the North in entire and honorable fraternity with the South. We will save the Union if they (the South) will postpone action until the spring. I have no doubt that the sentiment of the North will be practically in accord with our address.

From Samuel J. Bayard.—We had a great Convention yesterday in Trenton. A more respectable or imposing body of men for character, property, gravity, and every element of importance, never assembled in New Jersey. The public mind is becoming much alarmed in New Jersey in spite of all attempts to make light of current events.

The Legislature assembled January 8th, and the conservative feeling was strong. A spirit of conciliation and compromise, blended with anxiety for the Union and national honor, was paramount among the people of the State, and was strongly reflected in the tone of the Message of the Governor. He remarked: "Unwilling to abandon the cause, and clinging to the hope that the Committee of Congress, appointed for that purpose, will agree on measures of com-

promise, we anxiously await the result. If it should appear that their views cannot be harmonized, then I earnestly recommend that (unless some more approved plan is proposed) without delay you adopt a resolution inviting all the States to appoint delegates, in such manner as can be most speedily and satisfactorily done, who shall meet and endeavor to agree upon terms by which our Union may be saved. We cannot believe it possible that such a Convention would fail to agree on terms acceptable to a majority in all sections of the country, and these terms could be presented to Congress as the united wish of the people of the States."

In accordance with this disposition, January 15th, the Committee on National Affairs in the Legislature reported joint resolutions, endorsing the Crittenden compromise, and instructing Senators, and requesting Representatives to support them in Congress, also to call upon Congress for a National Convention. The resolutions were adopted by the Legislature and laid before Congress. They were as follows:

Joint Resolutions on the state of the Union, passed by the Legislature of New Jersey.

Whereas the people of New Jersey, conforming to the opinion of "the Father of his Country," consider the unity of the Government, which constitutes the people of the United States one people, a main pillar in the edifice of their independence, the support of their tranquillity at home and peace abroad, of their prosperity, and of that liberty which they so highly prize; and properly estimating the immense value of their national Union to their individual happiness, they cherish a cordial, habitual, and immovable attachment to it as the palladium of their political safety and prosperity; therefore,

1. *Be it resolved by the Senate and General Assembly of the State of New Jersey,* That it is the duty of every good citizen, in all suitable and proper ways, to stand by and sustain the Union of the States as transmitted to us by our fathers.

2. *And be it resolved,* That the Government of the United States is a National Government, and the union it was designed to perfect is not a mere compact or league; and that the Constitution was adopted in a spirit of mutual compromise and concession by the people of the United States, and can only be preserved by the constant recognition of that spirit.

3. *And be it resolved,* That however undoubted may be the right of the General Government to maintain its authority and enforce its laws over all parts of the country, it is equally certain that forbearance and compromise are indispensable at this crisis to the perpetuity of the Union; and that it is the dictate of reason, wisdom, and patriotism, peacefully to adjust whatever differences exist between the different sections of our country.

4. *And be it resolved,* That the resolutions and propositions submitted to the Senate of the United States by Hon. John J. Crittenden, of Kentucky, for the compromise of the question in dispute between the people of the Northern and of the Southern States, or any other constitutional method of settling the slave question permanently, will be acceptable to the people of the State of New Jersey, and the Senators and Representatives in Congress from New Jersey be requested and earnestly urged to support these resolutions and propositions.

5. *And be it resolved,* That as the union of these States is in imminent danger, unless the remedies before suggested be speedily adopted, then, as a last resort, the State of New Jersey hereby makes application, according to the terms of the Constitution, to the Con-

gress of the United States, to call a Convention (of the States) to propose amendments to said Constitution.

6. *And be it resolved,* That such of the States as have in force laws which interfere with the constitutional rights of citizens of the other States either in regard to their persons or property, or which militate against the just construction of that part of the Constitution that provides that the "citizens of each State shall be entitled to all the privileges and immunities of citizens in the several States," are earnestly urged and requested, for the sake of peace and the Union, to repeal all such laws.

7. *And be it resolved,* That his Excellency, Charles S. Olden, Peter D. Vroom, Robert F. Stockton, Benjamin Williamson, Joseph F. Randolph, Frederick T. Frelinghuysen, Rodman M. Price, Thomas J. Stryker, and William C. Alexander, be appointed commissioners to confer with Congress and our sister States, and urge upon them the importance of carrying into effect the principles and objects of the foregoing resolutions.

8. *And be it resolved,* That the commissioners above named, in addition to their other powers, be authorized to meet with those now or hereafter to be appointed by our sister State of Virginia, and such commissioners of other States as have been or may hereafter be appointed, to meet at Washington on the 4th of February next.

On the 24th of January these resolutions passed the Senate, 11 to 6. The affirmative being 10 Democrats and 1 National Union. On the 25th they passed the House, 31 to 11.

Those Republican members who supported Mr. Lincoln adopted the following preamble and resolutions:

Resolutions of the Republican members of the New Jersey Legislature, on the present state of the Union.

Whereas the Democratic majority of the Legislature of New Jersey, now in session, have, by a strictly party vote, passed certain resolutions, indorsing the Crittenden compromise resolutions and propositions, and declaring the same to be acceptable to the people of New Jersey, and we, the friends and supporters of Lincoln and Hamlin, representing in said Legislature one-half of the people of New Jersey, totally dissent from the resolutions passed by the Democratic majority, and it is proper that the views of ourselves and our constituents should be formally made known to the whole country; therefore,

Resolved, That we adhere to the following resolutions, presented in our behalf and supported by us unanimously in our respective places in the Senate and General Assembly of New Jersey, to wit:

1. *Be it resolved,* That the Constitution of the United States was ordained and established, as set forth in the preamble, by the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to themselves and their posterity; and if the people of any State in the Union are not in the full enjoyment of all the benefits intended to be secured to them by the said Constitution; if their rights under it are disregarded, their tranquillity disturbed, their prosperity retarded, or their liberties imperilled, by the people of any other State, full and adequate redress can, and ought to be, provided for such grievances through the action of Congress, and the other proper departments of the National Government.

2. *And be it resolved,* That while the people of New Jersey can make no concessions to, or compromise with traitors, levying war against the Government, seizing its fortresses and revenues, and firing upon its flag, yet they admire the patriotic fidelity of those true friends of the Union who are fighting an unequal battle in the Southern States, and they pledge them their cooperation in all measures needful for their welfare, security, and happiness within the

Union and under the Constitution; that they cannot surrender their love of liberty and their cherished principles, yet they are willing, if acceptable to them, to unite in establishing a policy which shall be final and conclusive in its settlement of existing difficulties, upon the basis of the following propositions:

I. A sacred guarantee that neither Congress nor any branch of the Federal Government shall interfere in any manner with the peculiar systems of labor or domestic institutions of any of the States.

II. A prompt repression of all armed invasions of any State or Territory, and the speedy and sure punishment of all persons engaged in such lawless attempts.

III. A faithful execution of that clause of the Constitution which provides "that no person held to service or labor in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on the claim of the party to whom such service or labor may be due," and all laws passed in pursuance thereof, and the repeal of all State laws, the purpose and intent of which are to prevent their faithful execution, and also the faithful execution of those equally important clauses of the Constitution which requires that "the citizens of each State shall be entitled to all the privileges and immunities of citizens in the several States," that "the rights of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated," and that "no person shall be deprived of life or property, without due process of law."

IV. An enabling act, providing that all that portion of the territory of the United States in which slavery was not prohibited by the Missouri compromise, passed in 1820, comprising all south of the parallel of 36° 30' north latitude, and now constituting the Territory of New Mexico, shall be formed into a State which shall be admitted into the Union upon an equal footing with the other States, with or without slavery as the people shall decide: *Provided*, That in all the territory belonging to the United States, north of the parallel aforesaid, slavery or involuntary servitude, except for crime, shall be forever prohibited.

3. *And be it resolved*, That the Government of the United States is a National Government; and the Union it was designed to create is not a mere compact or league, but is indissoluble by any authority except the whole people of the United States; and the Government and the Union thus established it is the duty of every good citizen to maintain and defend at all hazards.

4. *And be it resolved*, That the Constitution of the United States contains all the powers necessary to the maintenance of its authority, and it is the solemn and most imperative duty of the Government to adopt and carry into effect whatever measures may be necessary to that end; and the faith and the power of New Jersey are hereby pledged to the support of such measures, in any manner and to any extent that may be required of her by the constituted authorities of the United States.

The first sentence in this preamble is hardly explicit. The Republicans had ten members in the Senate, yet only six voted against the resolution. In the House there were 24 Republicans, 13 of whom did not oppose the resolutions adopted by the Legislature; nevertheless their action would have been of a soothing character, had it not had an appearance of factious dissent from the majority of the Legislature.

On the 27th of January a joint committee was appointed to reconstruct the legislative districts in accordance with the new census.

Much of the session was passed in discussion upon railroad bills, that were respectively urged by the Camden and Amboy Railroad, and by

the N. J. Railroad. Just previous to the adjournment all those desired by the former company were passed.

The Legislature having adjourned, the people waited with anxiety for the result of affairs at the South, when, on the 15th of April, they were startled by the news of the fall of Fort Sumter.

The military board immediately assembled at Trenton. On the arrival of the detailed call for troops from Washington, orders were issued to the major-generals at the head of the four military divisions of the State to raise in each division one regiment. The uniformed companies, called by law the active militia, in the several divisions, were first enrolled, and the residue filled up from the reserve militia.

The city of Trenton was quite excited. Gov. Olden ordered Company A. of the City Battalion to the State arsenal, under apprehensions that the arms would be taken away, although such apprehensions were utterly groundless.

Meanwhile tenders of services were made from all quarters of the State.

On the 17th of April Governor Olden issued a formal proclamation, calling for the four militia regiments, one from each division, to number 780 men each, and ordering them to rendezvous at Trenton, the capital of the State.

The enthusiasm was now great, although many Unionists were annoyed by parties who sought to fasten unpopular suspicions on them by compelling them to make public demonstration of sentiments from which they had never wavered.

The Trenton Bank and the Mechanics' Bank tendered loans of \$25,000 each to the Governor to aid the regiments. A national salute was fired from the State arsenal in honor of the Boston troops passing through. Meetings and assemblages were common in all parts of the State.

April 20. Gen Runyon's regiment at Newark was nearly ready to move, and the Common Council of Newark voted \$100,000 to provide for the families of volunteers, and \$5,000 for their equipment.

Gov. Olden called an extra session of the Legislature of the State, to meet on Tuesday, April 30, at 12 o'clock noon, at the State House in Trenton, to provide means for the exigencies of the future, and manifest their patriotic devotion to the Federal Government.

Major-General Theodore Runyon was appointed commander of the New Jersey forces, and the movement of troops began. They started in 12 propellers by canal to Bordentown, thence down the Delaware to land at Annapolis. The whole brigade, armed with Minié muskets, with its four pieces of artillery, arrived at Annapolis May 5. The 14 transports with a strong convoy, made a splendid appearance steaming in two lines down the Chesapeake.

The extra session of the Legislature convened by the Governor to prepare for the crisis, met at Trenton, April 30. All the Senators were

present, but seven members of the House were absent.

The Governor's Message was received and read. He recommended a loan of \$2,000,000 at 7 per cent., and a State tax of \$100,000; also the repair of State arms, the purchase of 10,000 stand of arms, field-pieces and munitions, also the raising of four regiments for State service, to be held subject to the call of the General Government; also provision for the defence of the southern part of the State by fortified posts or an intrenched camp.

The Legislature immediately proceeded to work and, having completed their business, adjourned May 10. The bills passed were to authorize the four regiments for State service, asked for by the Governor; an act appropriating to the families of married volunteers \$6 a month, and to unmarried volunteers \$4 a month; to authorize the city of Newark to borrow money to aid the families of volunteers mustered into the service of the United States; similar bills for Trenton, Jersey City, Rahway, Camden, and Bordentown; also to authorize a loan of \$2,000,000 and a State tax of \$100,000; (the bonds were to be of the denomination of \$1,000, \$5,000, and \$10,000, bearing 6 per cent. interest, payable semi-annually, and exempt from taxation. They are reimbursable to the amount of \$100,000 in January of each year from 1865 to 1869, and issued of the denomination and time of payment, as far as practicable, to suit the purchasers.) Bills were also passed, as requested by the Governor, authorizing the purchase of 10,000 stand of arms, artillery, and munitions of war, and equalizing the military divisions of the State.

Resolutions thanking the Governor for the energy and activity he had displayed in raising the quota of troops for the State, pledging New Jersey to use all her power to maintain the Union and Constitution, and thanking the President for the energy displayed in defence of the Union, passed the Senate by a unanimous vote, and also passed the House.

The mustering of troops, and the issuing of contracts for the supplies now proceeded with the utmost vigor.

The dulness of business, and the large pay of the soldiers stimulated patriotism, and volunteers were offered in large numbers.

Gov. Olden issued a proclamation, commanding all persons holding official positions, and all citizens of the State, to be on the alert "for the detection of any violation of the laws against treason or misprision of treason, and to take measures to bring to justice any person who shall be concerned in enlisting men, or providing arms or munitions for the enemy.

There remained in the service at the close of the year eight regiments of infantry, one of riflemen, and two artillery companies, numbering 9,850 men holding their organization from the State; and two regiments, one of cavalry and one of infantry, raised independently of it. These, with those who have joined military or-

ganizations in other States, show a total of at least 17,000 Jerseymen enlisted in the cause of the Union.

The amount expended in equipping the 13 regiments furnished for the war is \$665,303.81. Of this there was expended in the first requisition for four regiments of militia—three-months men—\$167,817.21. On the second requisition for three regiments for the war—\$170,015.40, and on the third requisition, also for three-years regiments—\$318,417.20. Besides this, the State has furnished extra clothing to her men, amounting to \$18,914.09—making the total \$685,217.90. The amount is less than is allowed by the Government contracts by \$30,000.

NEWPORT NEWS is a postal village in Warwick County, Virginia. It is near the mouth of James River, and about ten miles from Fortress Monroe. On the 27th of May an intrenched camp, consisting of twenty-five hundred men, was formed there. One object was to command Sand Island, which is about midway in, and completely guards the entrance to James River. This camp was quietly occupied throughout the year by a considerable force of Federal troops.

NEW YORK, one of the Middle States of the Union, and the most populous, is bounded on the north by Lake Ontario, the St. Lawrence and Canada East; on the east by Vermont, Massachusetts, and Connecticut; on the south by the Atlantic Ocean, New Jersey, and Pennsylvania; west by Pennsylvania, Lake Erie, and Niagara River. Its extreme length from east to west is about 335 miles, and its greatest breadth from north to south about 303 miles, containing an area of 47,000 square miles. The population in 1860 was 3,838,457 whites, 49,085 free colored; total, 3,887,542. The increase in the white population during the previous ten years was 25.69 per cent. (*See NEW AMERICAN CYCLOPEDIA.*)

The situation of the State of New York in respect of the Western States, has had a great influence upon its prosperity. With the completion, in the year 1824, of the Erie Canal, which opened the navigation of the lakes to tide water, a great impetus was given to the trade of the cities. The competition of the rich lands of the west with those of the river counties caused a migration to the more fertile sections of the Genesee valley and the west, and improved the aggregate wealth of the State through a greater yield for the same amount of labor bestowed. As the States that border the great western waters began to develop their resources, and pour upon the bosom of the lakes their annually increasing produce, the prosperity of New York received a new impulse, and its wealth accumulated more rapidly. The construction of the great lines of railroads, the Erie and the Central, was followed by a more rapid increase of population and of wealth. This is manifest in the taxable valuations for each county in 1846, when the through lines

began to operate, and in the present year, from the official returns, as follows:

Taxable Valuation of the State of New York.

Yates.....	4,106,549		
	\$616,824,955	\$1,419,297,520	\$1,441,767,480

The increase in valuation is \$824,922,475, or 133 per cent. more than the whole valuation in 1846; of this increase \$372,000,000 is in the city of New York. The whole presents a most unexampled development of wealth. A large portion of it is due to the operation of the railroads, the business of which has greatly increased within a few years. The number of

tons freight carried on the Erie and Central railroads, and on the canals, for a number of years, is as follows:

YEAR.	Railroads.	Canals.	Total tons.
1855.....	1,512,121	4,092,617	5,604,738
1856.....	1,719,387	4,116,082	5,835,469
1857.....	1,816,854	3,844,061	5,660,915
1858.....	1,582,371	3,665,192	5,247,563
1859.....	1,708,391	3,751,684	5,459,075
1860.....	2,167,727	4,650,214	6,817,941
1861.....	2,420,720	4,507,681	6,928,401

The increase has been large, or 30 per cent. in quantity, mostly on vegetable food, coming from other States. The freights paid to the railroads, and the tolls and freight on the canals have been as follows:

YEAR.	Erie R. R.	Central R. R.	Canal Freight.	Canal Toll.	Total.
1855.....	\$2,587,214	\$1,888,580	\$4,189,166	\$3,204,728	\$11,769,988
1856.....	3,369,590	2,479,820	3,009,289	2,778,566	11,636,265
1857.....	8,653,002	8,189,608	3,036,848	2,505,077	12,644,025
1858.....	4,545,782	4,328,041	3,825,013	2,743,212	15,437,048
1859.....	4,097,610	4,559,276	1,830,359	2,045,641	12,532,886
1860.....	8,843,811	8,700,270	2,391,688	2,110,754	12,046,519
1861.....	8,195,870	8,337,148	1,941,061	1,728,945	10,198,024
1860.....	8,946,410	4,095,934	5,039,858	3,009,597	16,091,794
1861.....	4,851,464	4,664,449	5,460,593	3,908,785	18,885,291

These figures show the amount of charge on merchandise, east and west, for transportation, and indicate the progress of business. In the last year the rise of freights consequent upon the sudden increase of produce sent east through the closing of the western rivers, added much to the cost of transportation. The great lines of through travel are marked by the most rapid growth of wealth and population. The latter has uniformly a western tendency. The natives of New York would seem to move west, and their places to some extent be supplied with immigrants. The nativities of the population of the State were reported as follows by the census of 1855:

New York State.....	1,925,156
New York County.....	297,164
Other United States.....	806,423
England.....	102,286
Wales.....	8,557
Scotland.....	27,523
Ireland.....	469,753
France.....	18,566
Germany.....	218,997
Switzerland.....	8,498
Other European countries.....	40,946
Canada.....	47,943
Total.....	3,466,212

The number of votes cast in 1860 was 675,156, or an increase of 178,670 over 1856, when, as appears from the census, there were 651,000 voters in the State.

The vote of the State of New York has been generally democratic, having been as follows for several presidential elections:

YEAR.	Whig.	Democratic.	Republican.
1844.....	Clay.....232,482	Polk.....237,588	Birney.....15,812
1848.....	Taylor.....218,551	Cass.....114,592	Van Buren.....128,519
1852.....	Scott.....294,882	Pierce.....262,083	Hale.....25,329
1856.....	Fillmore.....124,604	Buchanan.....195,878	Fremont.....276,004
1860.....	..	Douglas.....803,329	Lincoln.....353,804

The result of the presidential election in 1860 was followed by the action which the Southern leaders had determined on as soon as the sentiment of the North should have been shown by an election to be, as they conceived, abidingly hostile to the South. The Northern vote was 1,831,180 for Mr. Lincoln, and 1,564,151 for the other candidates, and secession was at once inaugurated.

The Legislature of the State of New York was convened amidst considerable alarm for the safety of the Union on the part of all, except the leaders of the Republican party, who truly declared that nothing had as yet been done inimical to the rights of the South. The overtures of the Border States for settlement were regarded by some as political tricks, and not serious efforts to avert a real danger.

The State election had resulted as follows :

The Legislature: { Senate... Republicans, 23; Democrats, 9.
House... Republicans, 93; Democrats, 35.

The Governor, however, in his Message to the Legislature, which met on the 2d of January, urged the duty of all national Legislatures to act with moderation and conciliation, saying :

"Let New York set an example in this respect; let her oppose no barrier, but let her Representatives in Congress give ready support to any just and honorable settlement; let her stand in hostility to none, but extend the hand of friendship to all; live up to the strict letter of the Constitution, cordially unite with the other members of the Confederacy in proclaiming and enforcing a determination, that the Constitution shall be honored and the Union of the States be preserved." He recommended the repeal of the personal liberty bill, and also suggested that other States should repeal their similar laws.

These views of the Governor were not responded to by the members. They were, on the other hand, disposed to be defiant.

In the Assembly on the 3d Jan., Mr. Robinson introduced a resolution to the effect, that all the territories should be divided into two States, and that the question of slavery should be left with the people. The Democrats, so largely in the minority in the House, held a caucus, and agreed warmly to support the resolution. The majority of the House had, however, widely different views.

On Jan. 11 a series of resolutions was prepared and passed. There was but one negative vote in the Senate, and two in the lower House. The spirit animating them is manifested in the preamble and first resolution :

Whereas the insurgent State of South Carolina, after seizing the post-offices, custom-house, moneys, and fortifications of the Federal Government, has, by firing into a vessel ordered by the Government to convey troops and provisions to Fort Sumter, virtually declared war; and, whereas the forts and property of the United States Government in Georgia, Alabama, and Louisiana have been unlawfully seized, with hostile intentions; and, whereas their Senators in Congress avow and maintain their treasonable acts; therefore—

Resolved, That the Legislature of New York is profoundly impressed with the value of the Union, and

determined to preserve it unimpaired; that it greets with joy the recent firm, dignified, and patriotic special Message of the President of the United States, and that we tender him, through the Chief Magistrate of our own State whatever aid in men and money may be required to enable him to enforce the laws and uphold the authority of the Federal Government; and that, in the defence of the Union, which has conferred prosperity and happiness upon the American people, renewing the pledge given and redeemed by our fathers, we are ready to devote our fortunes, our lives, and our sacred honor.

The following despatch was immediately sent to the President :

ALBANY, Jan. 11, 1861.

To His Excellency, James Buchanan, President of the United States, Washington City :

SIR : In obedience to the request of the Legislature of the State, I transmit herewith a copy of the concurrent resolutions of that body adopted this day, tendering the aid of the State to the President of the United States, to enable him to enforce the laws, and to uphold the authority of the Federal Government. I have the honor to be

Your Excellency's obedient servant,
(Signed) EDWIN D. MORGAN.

The resolution was ordered to be communicated to the Governors of each of the States. The defiant tone of the resolution was very unfavorable in its effects. The tender of men and money to the Administration was received with great indignation in Virginia and Georgia. The formidable nature of this tender was subsequently shown in a report of the Senate Committee on Military and Public Defence. This certainly could not have flattered the State pride, and, compared with the resolution, at the time, must have occasioned many a quiet smile. It appeared that the twenty thousand men in the State who were uniformed, well drilled, and nominally equipped, had only eight thousand muskets or rifles fit for immediate service. The remaining twelve thousand, if called into action at once, would not have been prepared to go. The State was nearly as destitute of cannon as of muskets. About one hundred and fifty field-pieces were all she could command. But New York has since vindicated her military reputation.

The alarm in the public mind was daily becoming more intense. The fact that the resolutions of the Legislature were received as defiant, induced more conciliatory action on the part of the people, and a compromising memorial received an immense number of signatures, without distinction of party, and was forwarded on Jan. 12 to Congress. The following is an extract containing its sentiment :

We judge, that an agreed explanation of any uncertain provisions of the Constitution, a clearer definition of the powers of the Government on disputed questions, and an adaptation of it, in its original spirit, to the enlarged dimensions of the country, would satisfy all the honest differences among our countrymen.

Therefore, we pray leave to suggest, that the assurance coupled with any required guarantees, of the rights of the States to regulate, without interference from any quarter, the matter of slavery in their borders, of the rights secured by the Constitution to the delivery of fugitives, the readjustment of the laws bearing on these subjects, which are in possible con-

flict with it, and some adjustment of the rights of all the States of the Union in the new territory acquired by the blood and treasure of all, by an equitable division, in the immediate organization of it into States, with a suitable provision for the formation of new States in their limits, or otherwise, would embrace all that is claimed on any part, and could be arranged without concession of principle on any part.

Your memorialists humbly pray, that such measures, either of direct legislation or of amendment of the Constitution, may be speedily adopted, as will accomplish the objects above stated—which they are assured will restore peace to their agitated country.

This memorial, carrying with it the names of the leading capitalists of the country, as well as the State, the men on whom ultimately the Government was to depend for its means and support, was forwarded to Washington by a large delegation.

Immediately following this memorial, was a call of the merchants to meet at the Chamber of Commerce on the 18th January. The meeting took place according to the call, was very largely attended, and the following memorial to Congress was almost unanimously adopted :

To the Senate and House of Representatives of the United States of America in Congress :

The memorial of the subscribers, citizens of the State of New York, respectfully sheweth : That, while sharing in common with our fellow-citizens, the general solicitude at the dangers which are now threatening the peace and unity of our country, they desire to give their urgent and emphatic expression of the necessity which seems to exist for mutual conciliation and compromise, and without discussion as to the merits of the various questions at issue, believing that the perpetuity of the Union of the United States as one nation is of vastly more importance than the establishment or rejection of this or that subject of controversy, and that the people of the North will approve of the general outline of the plan of compromise agreed upon by the Senators and Representatives of the Border States :

Your memorialists humbly pray that such measures may be speedily adopted by Congress, for the settlement of our present difficulties, as will embrace substantially the plan of compromise so recommended by the Representatives of the Border States, and which, they believe, will restore tranquillity and peace to our own distracted country.

The following resolutions were then offered and unanimously adopted :

Resolved, That a committee be appointed to circulate the foregoing memorial for signatures, and to have the city, and as far as practicable, the State canvassed for that purpose.

Resolved, That a committee of our most influential citizens, irrespective of party, be appointed, with power to add to their number, to take charge of the memorial when signed, and forward or present the same at Washington, in such manner as they may deem most judicious, using their influence for the settlement of the existing national difficulties.

Resolved, That a copy of this call and the proceedings of this meeting be forwarded to each of the Senators and Representatives of this State in Congress, and also to each of the Senators and Representatives in our State Legislature.

These endeavors, added to demonstrations in other parts of the State, with those of the citizens of other States, produced many and earnest efforts at compromise at the seat of Gov-

ernment. Among the efforts was that of the Border States for a Peace Convention.

On the 24th Jan., the Governor of New York received resolutions passed by the General Assembly of Virginia, inviting such States as would "unite with her in the earnest effort to adjust the unhappy controversies, in the spirit in which the Constitution was originally formed, and consistently with its principles, so as to afford adequate guarantees to the slave States for the security of their rights, to appoint commissioners to meet hers on the 4th of the following month, in Washington, to consider and agree, if practicable, upon some suitable adjustment."

The Governor accordingly recommended the appointment of five citizens of the State, to meet those of Virginia and other States. On Feb. 1, the Legislature, after many discussions and delays, selected commissioners to the Peace Conference, but they were required to take no part in the proceedings unless a majority of the non-slaveholding States were represented.

The Convention met Feb. 4, at Washington, and on the 1st March agreed to a plan of compromise. (*See PEACE CONFERENCE.*)

The news of the result of the deliberations of the Peace Conference at Washington created much excitement at Albany. Despatches were received, announcing the result, and saying that a general feeling of joy and satisfaction existed in Washington. This feeling was, however, not participated in by the Legislature at Albany, and one of the delegates, Mr. Field, was much blamed for not being present, and giving the casting vote of the delegation against the measure.

While the debates in relation to the appointment of commissioners to the Peace Convention were proceeding, an immense Union meeting was held Jan. 28, at the Cooper Institute, New York. The speakers were among the most eminent orators of both parties, and resolutions were passed as follows :

Resolved, That the people of New York send three Commissioners to the Conventions of the people of South Carolina, Georgia, Florida, Alabama, Louisiana, and Mississippi; and that such commissioners be instructed to proceed immediately to such States, and to confer with the delegates of the people of said States in regard to the measures best calculated to restore the peace and integrity of this Union. And to report to the people of this city at the earliest practicable moment.

The question was loudly called for and carried unanimously. The following gentlemen were then named as Commissioners, and ratified by the unanimous cheers of the audience : James T. Brady, Cornelius K. Garrison, Appleton Oaksmit.

At nearly the same time, when all parties were striving to do something to avert the evils that were impending over the country, a call was made by the Democratic State Central Committee for a Convention, of four delegates from each Assembly, to be held at Albany on the 31st of January.

The Convention met pursuant to the call, on

the 31st of January, at 11 A. M., in Albany, and was very fully attended. The Chairman, in the course of his remarks on the objects of the meeting, said: "The people of the State demand the peaceful settlement of the questions that have led to disunion. They have a right to insist that there shall be conciliation, concession, compromise. While yet the pillars of our political temple lie scattered on the ground, let them be used to reconstruct the edifice. The popular sentiment is daily gathering strength, and will overwhelm in its progress alike those who seek to stem it on the frail plank of party platforms, and those who labor to pervert it to mere party advantage.

"If those who are intrusted with political power will not act in accordance with this pervading public sentiment, let them, at least, submit the question to a direct vote of the people. Their voice will be omnipotent here, and if it be raised in time it may be effectual elsewhere."

The meeting was addressed by the venerable ex-Chancellor Walworth, ex-Governor Seymour, A. Belmont, late U. S. Minister to the Hague, and other most noted public men of the State. The following were some of the resolutions unanimously approved:

1. *Resolved*, That the crisis into which the country has been thrown by the conflict of sectional passions, and which has already resulted in the declared secession of six States, and the threatened coöperation of nearly all the other States of the South with them, the seizure of Government property and of the Federal defences—the confronting of the disaffected States and of the Federal Government in the attitude and with the armament of Civil War—is of such a nature as, raising all patriotic citizens above the considerations of party, should impel them to the sacrifices by which alone these calamities may be averted or their further progress arrested.

2. *Resolved*, That, in the opinion of this Convention, the worst and most ineffective argument that can be addressed by the Confederacy or its adhering members to the seceding States, is civil war. *Civil war will not restore the Union, but will defeat, forever, its reconstruction.*

3. *Resolved*, That we can look for the restoration of the Union, and the reinvigoration of the Constitution, only to the continuance of that spirit of conciliation and concession in which they were founded; and that there is nothing in the nature of pending difficulties which does not render it proper to adjust them by compromises such as, by the practice of our Government, have been resorted to in the settlement of disputed claims, even with foreign nations. That while our Government, believing its title to the territories in the northeastern and northwestern portions of the Union, which were given up to Great Britain, was clear and unquestionable, yet for the purpose of saving the people from the evils of war, surrendered a portion of our original territory and also a part of the Louisiana purchase, exceeding in value all the domain which the South demands, in joint occupation—having conceded thus much to a foreign nation in the interest of peace—it would be monstrous to refuse to settle claims between the people of our own land, and avert destruction from our common country by a similar compromise.

4. *Resolved*, That, whereas it is obvious that the dissolution of this Union can only be prevented by the adoption of a policy which shall be satisfactory to the Border States, it is our duty to support them in their patriotic efforts to adjust those controversies. And inasmuch as these questions grow out of the acquisition

of territories not provided for by the Constitution; and in regard to which the people of the South believe that they are entitled to a joint occupancy, in person and property, under the Constitution and by the decision of the Courts; while on the other hand, the dominant party at the North claim that they should be excluded therefrom, it is eminently fit that we should listen to the appeals of loyal men in the Border States, to dispose of this question by one of those measures of compromise in the spirit of which the Constitution was founded, and by which all territorial questions have from time to time been settled.

5. *Resolved*, That inasmuch as the political convulsions which threaten the destruction of the country, were not contemplated at the time of the last election, and their continuance will be more disastrous to the interests of our citizens, involving the ruin of our commercial and laboring classes, and possibly carrying the desolation of civil war into the homes of our citizens, we hold that it is their right to be heard in regard to the adjustment of these difficulties, (which, in our opinion, can at present best be settled by the adoption of the Crittenden proposition or some other measure acceptable to the Border States,) and that a committee of five be appointed, to prepare, in behalf of this Convention, a suitable memorial to the Legislature, urging them to submit the Crittenden compromise to a vote of the electors of the State, at the earliest practicable day.

Early in February, the delegation appointed at the merchants' meeting, Jan. 17, proceeded to Washington, with a monster petition from New York, with 40,000 signatures, praying for a settlement of the difficulties, and in a number of ways the people manifested their earnest anxiety for peace.

The desire to avoid every semblance of irritation and ill-feeling was manifested in an extraordinary manner in several parts of the country. This was by discountenancing those persons through whose agency the Northern sentiment had acquired the appearance of a hostility to the South, incompatible with its continuance in the Union.

At Syracuse, Jan. 30, a meeting was held in Convention Hall to denounce slavery, but was turned into a Union meeting for the support of the Constitution and the Government, expressing the opinion that by peace only the Union could be preserved, and the Abolitionists were driven from the Hall.

On the 3d of February, the Hon. Ira Harris was elected United States Senator, in place of Mr. Seward, who was appointed to the Cabinet.

On the 21st of March, the Governor received from the President an authenticated copy of the joint resolution adopted by Congress proposing an amendment to the Constitution of the United States, which, when ratified by three-fourths of the State Legislatures, should become a part of that instrument, in the following language: "No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service, by the laws of said State."

This amendment, if it had been cordially adopted by three-fourths of the States, would have shown a desire to conciliate, although it was of no practical value whatever.

Inasmuch, however, as no State passed it at that time, it rather confirmed the sentiment of hostility than modified it. Public feeling was, however, in favor of some mode of compromise.

On the 22d of March the police of New York seized 38 boxes of muskets, shipped for Savannah on the steamer Monticello, in New York, and deposited them in the State arsenal in New York City. On Saturday, the 2d of February, Messrs. D. C. Hodgkins & Sons, of Macon, citizens of Georgia, produced at the Executive office satisfactory evidence that 200 of said guns belonged to them as their individual property, (the others were said to belong to Alabama,) and claimed of Governor Brown the protection of the State, of which they were citizens, against the seizure. The Governor immediately wrote to Governor Morgan, and telegraphed the letter, demanding the immediate delivery of the guns thus seized to G. B. Lamar, of New York, whom he named as his agent to receive them. The Governor waited till the following Monday evening, and still received no reply to his demand. He then telegraphed the operator of the line at Albany, N. Y., to know whether his despatch to Governor Morgan had been received and delivered to him. The operator replied that it had. Gov. Brown then waited till half-past nine o'clock Tuesday night, and still received no response from Gov. Morgan.

He then determined upon reprisals, and therefore issued to Col. Jackson the following order, directing the seizure of the vessels named:

EXECUTIVE DEPARTMENT, {
MILLEDGEVILLE, GA., Feb. 5, 9 P. M.

I have demanded of the Governor of New York the prompt delivery to my agent, for D. C. Hodgkins & Sons, citizens of this State, of their guns, seized by the police of New York, on board the Monticello, and deposited in the arsenal of that State. The demand has been delivered to him. He has had a reasonable time and has made no reply. I am determined to protect the persons and property of the citizens of this State against all such lawless violence, at all hazards. In doing so I will, if necessary, meet force by force. I feel it my duty in this case to order a reprisal. You will therefore direct Colonel Lawton to order out sufficient military force and seize and hold, subject to my order, every ship now in the harbor of Savannah, belonging to citizens of New York. When the property of which our citizens have been robbed is returned to them, then the ships will be delivered to the citizens of New York, who own them.

JOSEPH E. BROWN.

Col. H. R. JACKSON, Aide-de-Camp, Savannah, Ga.

In obedience to this order there were seized the barks *Adjuster* and *D. Colden Murray*; brigs *W. R. Kibby* and *Golden Lead*, and schooner *Julia A. Hallock*.

A reply, sent by Gov. Morgan, was received by Gov. Brown after the seizure of the vessels. Meantime the owners of the ships seized made application to Gov. Morgan for redress. He replied as follows:

STATE OF NEW YORK, EXECUTIVE DEPARTMENT, {
ALBANY, February 9, 1861.

GENTLEMEN: I received, this morning, a telegraphic despatch from you, stating that your "barque *Adjuster* had been seized in Savannah by order of the Government of Georgia, on account of arms detained

in New York," and asking to be informed "how to proceed, under the circumstances, in order to avoid loss and detention."

In answer to your inquiry, I can only say that your remedy is through the United States Courts, or, if you so elect, through the Courts of the State of Georgia, within whose limits the offence of which you complain, is stated to have been committed. In a case of this kind the executive authority of New York can render you no assistance, for the obvious reason that no law of this State has been infringed; and because the wrong was not perpetrated within its jurisdiction. If, as you state, officials or citizens of Georgia have detained your vessels as a measure of retaliation for the alleged seizure of certain arms by the officers of the police of New York, the tribunals of that State, or of the United States, it must be presumed, will determine the acts as entirely unjustifiable, and will afford you ample redress for any loss by detention or otherwise which you may suffer. If your vessel is delayed for any other reason than that suspected by you, it is but fair to assume that the Courts of Savannah will examine into the facts with that impartiality which should characterize all judicial proceedings.

It is but proper to add that if the detention of the *Adjuster* is the deliberate act of the constituted authorities of Georgia, it is equally unjustifiable, and there can be no doubt that, at no distant day, the Federal authorities will obtain full reparation for you for any damages you may sustain; if not, then the General Government itself, which owes you protection in return for your allegiance, is thereby under the fullest obligation to indemnify you.

Very respectfully yours, E. D. MORGAN.

Messrs. FUNCH & MEIDCHE, New York.

On the same day, however, the following despatch was sent:

NEW YORK, Feb. 9, 1861.

To his Excellency, Gov. BROWN:

The arms have been put at the command of the owners here; please release all vessels.

G. B. LAMAR.

Upon the receipt of the above despatch the Governor immediately issued the following order to Col. Jackson:

EXECUTIVE DEPARTMENT, {
MILLEDGEVILLE, Feb. 9, 9 P. M.

I have just received a despatch from G. B. Lamar, my agent in New York, stating that the arms have been put at the commands of the owners. The object for which the seizure was made having been accomplished, and the rights of the citizens of this State having been vindicated, you will order the vessels seized to be immediately released.

JOSEPH E. BROWN.

To Col. HENRY R. JACKSON, Savannah, Ga.

Governor Brown then returned to Mr. Lamar, at New York, the following despatch:

EXECUTIVE DEPARTMENT, {
MILLEDGEVILLE, Feb. 9, 9 P. M.

The object of the seizure having been accomplished, and the rights of our citizens having been vindicated, I have ordered the release of the vessels.

JOSEPH E. BROWN.

To G. B. LAMAR, New York.

The crisis was now at hand. The new Administration at Washington had been five weeks in power, and had made no movement. The congressional elections of Connecticut and Rhode Island had taken place on the 1st of April, and the Democrats had gained four members. The elections elsewhere were giving indications of reaction. The garrison at Fort Sumter was nearly exhausted of supplies, and a surrender, until the national affairs should be adjusted, or forcible reinforcement

could no longer be deferred. An armament left New York early in April, and the crisis came on the 15th.

On the fall of Fort Sumter the Governor received the proclamation of the President, calling for 75,000 militia. The quota of New York was 13,000. He immediately communicated it to the Legislature, and in a few hours an act was passed, which conferred large powers on the Governor, and authorized the enrolment of 30,000 men, for two years instead of three months, and appropriated \$3,000,000.

The Governor issued a proclamation for the troops to rendezvous at Elmira and New York City. One of the board of officers went to Washington, and obtained the acceptance of the surplus 21 regiments, and marching orders were sent on the 16th to the regiments in New York to proceed to Washington. Large contracts were immediately made for supplies.

April 24, an agent of the State left for Europe with a letter of credit for \$500,000, with which to purchase arms. 19,000 Enfield rifles were landed in New York at a cost of \$375,000. On the 25th of May the authorized 30,000 men had been raised, and by the 12th of July they had been organized into 38 regiments, officered, and despatched to the seat of war.

Orders and rules were immediately issued, placing under the control of the military board of the State the regimental and field-officers, and parts of regiments were thereby consolidated, or transferred to complete the commands of officers by whom they had not been raised.

There were accepted, in addition, from the Union Defence Committee in New York, 10 regiments. By the 1st of July, the New York troops in the field numbered as follows:

Three-months Militia	8,300
Three-years Militia	3,400
Two-years Volunteers	30,000
Three-years Volunteers	5,000
Total New York troops	46,700

The battle of Bull Run gave a new impetus to the demand for troops, and the Governor, without additional authority from the Legislature, which was not in session, issued a proclamation for 25,000 three-years troops. The Federal Government was to supply the money necessary to raise and equip them. October 1, the quota of the State was raised to 100,000, and Nov. 6 to 120,000 men. September 7, there was paid by the State Paymaster, General Van Buren, to 40 regiments, \$287,490.63 for services between the mustering of the regiments into the State service and their transfer to that of the United States.

It is due to the State of New York, and also to the city of New York, to say there was no relaxation in their efforts to meet the necessities of the Government. The civil authorities, private associations, and individuals were as ready and prompt in their measures at the close of the year as when the war commenced. The drain upon their resources for men and money had apparently made no diminution.

The aggregate number of volunteers furnished up to January 1, 1862.

ARM OF SERVICE.	Batteries.	Battalions.	Regiments.	Strength
Militia regiments enlisted for 3 months	11			7,334

The following is a statement of the ordnance and small-arms in the hands of the troops, and in the arsenals of the State, on the 1st day of January, 1862:

DESCRIPTION.	In the hands of the troops.	In the Arsenals of the State.	Total belonging to the State.
Nine-pounder	5	2	7
Carriage	5	2	7
Limber	4	2	6
Caisson	2	2	4
Six-pounder	70	4 iron 33bra	107
Carriage	69	94	163
Limber	70	94	164
Caisson	39	92	131
Twenty-four pound howitzer	1		1
Carriage	1		1
Limber	1		1
Caisson			
Twelve-pound howitzer	4	4	8
Carriage	4	4	8
Limber	4	3	7
Caisson	2	2	4
Mountain howitzer	8	7	15
Carriage, limber and caisson	8	14	22
Twenty-pound Parrott's rifled cannon		10	10
Battery wagons		21	21
Forges		21	21
Ten-pounder Parrott's rifled cannon		13	13
Carriages, twelve pounds		10	10
Limber		10	10
Caisson		10	10
Artillery sabres	502	45	547
Artillery swords	666	102	768
Non-commissioned officers' swords		1,505	1,505
Cavalry sabres	926	372	1,298
Carbines	171	4	175
Percussion muskets and bayonets	11,014	13,149	24,163
Flint muskets and bayonets	464	324	788
Flint rifles	145	45	190
Percussion rifles	1,917	5,924	7,841

Of the New York troops who entered the field, there were killed in battle up to January, 1862 ..	270
Died from natural causes	350
Made prisoners of war	550
Honorably discharged	2,700
Discharged by error in United States muster	1,500
Discharge by court-martial	140
Absent without leave, and desertions	3,300
Unaccounted for	900
Discharged by expiration of time of service (three-months militia)	7,344
In the field December 31, 1861	89,034

If there be added to the latter the volunteers

still in the State, an available force of 103,307 is shown.

It was estimated that, in addition to the foregoing aggregate, at least 2,500 men were drawn from New York and mustered into organizations not enumerated above.

This force was scattered over nine States, in 43 different brigades, and under 12 generals of division.

The New York troops have taken part in every engagement on land during the year, east of the Alleghanies and south of Washington. They have enriched the soil of six States with their blood.

To aid the immense work of organizing and forwarding the troops, General Wool moved his head-quarters, April 21, from Troy to the Astor House. On the 28th of April he was peremptorily ordered back to Troy, on the singular plea of his infirmities, although he held official command at Fortress Monroe long afterwards.

May 8, Gen. J. A. Dix was appointed major-general, and May 15 James S. Wadsworth, of Genesee, was appointed major-general—a gentleman of large wealth, great public spirit and energy, but without military experience. He had been, in July, 1860, tendered the nomination as Governor of New York, but declined in favor of Governor Morgan, and he was made one of the two major-generals of New York.

At the close of the year it became apparent, that, although all the States had been very active in mustering troops into the service of the Government, the means of payment must come from New York. In making requisitions for the men, the calls were necessarily proportioned to the population or number of fighting men in each State. In this number are comprised all between the ages of 18 and 45. The census compiled at Washington furnished the number of the people, and also the number of those of the military age. If the whole is compared with the number in service reported by the Secretary of War, the result is as follows:

	Population.	18—45	In arms.
New York.....	3,887,542	766,344	113,027
Other States north.....	15,435,138	3,033,656	527,610
Total.....	19,322,680	3,800,000	640,637

This levy is a very large one, no less than every sixth able-bodied man. The mustering of men was, however, but a small part of the undertaking, since it is very evident, where the population is composed in great numbers of mechanics and manufacturers, who are thrown out of employment by the fact of war, that to employ these is a great advantage, and no real hardship beyond the cost of blood. The pay in the army, \$13 per month, in addition to the allowance to families, and other provisions by States, towns, and counties, was such as to make it a change for the better in a pecuniary sense for a considerable number of the men. In some cases, the pay over rations amounted to more than \$20 per month. It is evident, that where a State has a large number of men in the field, drawing pay from the Federal Govern-

ment, which pay is remitted to the families and friends, that it becomes a source of wealth, although not so beneficial as when those persons are actually producing wealth at home. The great question was the means of payment. Who was to advance the money to pay all these troops? these \$2,000,000 per day estimated by the department? At the close of the year the Secretary reported that he had borrowed in the course of the year:

Loans	\$280,000,000
Advanced by New York.....	210,000,000

Without this advance of the capitalists of New York, there had been no movements of troops or purchase of arms. The perils of the operation were well appreciated. Foreign capitalists withdrew their confidence on the ground that the future payment of the debt was doubtful. If, said they, the Union is dissolved, who is to pay? If it is restored, will the ten millions southern and the eight millions western farmers vote to tax themselves and their children forever to repay this money to certain capitalists?

Boston reduced the quota of its advance from 30 to 20 per cent. New York had no doubts or hesitation. Its devotion was superior to all, and it took not only its own, but that which Boston had rejected.

On the 14th of October, the nation was startled and surprised at the receipt of a circular from the Secretary of State, advising the placing of New York in a state of defence against foreign enemies. Governor Morgan immediately responded, and was referred to the Chief of Engineers, with whom a correspondence on the subject was opened.

In October, the Bark Helen Augusta sailed from New York for Hayti with 113 black emigrants, of whom one half had been born in the States. Their object was to become cotton cultivators there.

The Fall elections of the State of New York presented no very animated feeling. The one absorbing sentiment of the public was in relation to the war, in the prosecution of which there was no division of opinion. But the public displeasure was manifest against the most demonstrative of those who opposed all settlement.

The vote for State officers was as follows in November, 1861:

STATE OFFICERS.	Fusion.	Democratic.
Secretary of State	Ballard.....297,428	Jones.....189,716
Comptroller.....	Robinson.....296,856	Scott.....187,408
Attorney-General	Dickinson...295,609	Champlin...188,361
Treasurer.....	Lewis.....296,769	Williams...188,774

Canal Commission'r's Vacancy	Bruce.....179,691	Wright....198,583

NEW YORK CITY. The city of New York, which mainly through its geographical position has become the metropolis of the country, has risen to be the first city of the New World, and has developed a growth more rapid than even

the marvellous increase of the whole nation. The population of the city proper has quadrupled in thirty years, and in so doing has spread northerly upon Manhattan Island. The

numbers in each ward, by the National census for each decade, and by the State census for each five intermediate years, have been as follows:

POPULATION OF NEW YORK CITY.

WARDS.	1830.	1835.	1840.	1845.	1850.	1855.	1860.				Popula- tion.

							Pop. of New York County.....				813,662

The following table gives the population of the city embracing Brooklyn, as compared with the numbers of the whole white population of the Union during the present century, from official returns:

YEARS.	Whole White Population.	New York.	Proportion of New York.
1800.....	4,412,911	63,737	1-70th.
1810.....	6,045,450	100,775	1-60th.
1820.....	8,100,067	180,881	1-62d.
1830.....	10,857,887	215,049	1-50th.
1840.....	14,575,998	343,943	1-40th.
1850.....	19,538,063	643,165	1-30th.
1860.....	27,280,070	1,087,702	1-25th.

The influence of railroads has been to cause the extension of dwellings very rapidly into the

surrounding counties during the past ten years; hence great numbers who are daily engaged in business in New York, and form part of its commercial activity, are carried to their homes within a circle of thirty miles' radius, and are, consequently, not numbered in the city population. Nevertheless, the proportion that does reside in the city has been carried up from one-seventieth of all the white population in the Union to one-twenty-fifth in 1860. This increase of population is an index to the great increase of wealth in the city, which, according to the official returns for 1860, holds the following proportion to the whole wealth of the country and State:

RATIO OF ASSESSMENTS.		Real.	Personal.	Total.
United States assessed values.....		\$37,006,756,555	\$4,081,661,050	\$41,088,417,635
New York State " ".....		1,069,658,080	320,806,558	1,390,464,638
" City " ".....		395,533,619	178,697,636	574,230,656

The proportion of wealth in the city is thus larger than the proportion of population, which has undergone so great an increase in the last ten years.

The progress of the wealth and population of the city up to 1830 was such as to make it evident, with the large command of business which the city possessed, and the abundant supplies of water, fuel, and food which were cheaply brought to it, that it must soon occupy the whole of the island.

The dwellings of the population spread

towards the upper wards, while the lower were more devoted to business purposes. What were formerly the aristocratic resting places of the Knickerbockers, have become occupied by substantial warehouses, and the farms and country seats of these old residents have become sites for blocks of palaces, the centres of fashion and display. By this process, the owners of moderate farms became the landed millionaires of the city. This evident tendency promoted attention to "up-town" lots, and in 1830 there commenced that season of real estate spec-

ulation which carried property in the upper part of the island to exorbitant prices in 1836. The reaction then commenced, and the year 1843 gave the lowest point for real estate values. The general business of the city then began to recover, and the course was upwards with a steady progress. The foreign famine of 1847-'48 gave a great impulse to business, and was followed by a large immigration and the successive opening of railroads, each adding to the commerce, which new lines of steamboats still further helped to concentrate in New York. With the growth of business the population overflowed into Brooklyn, Williamsburgh, New Jersey, and the river counties. By this operation, the value of personal property in the city was checked, since persons living out of its limits were not easily reached. The gold discoveries

gave a new impulse to business, and the Crystal Palace of 1853 also lent its aid; while, in the same year, the introduction of railroads in the streets at once, as it were, gave the means of spreading up town, and the upper part of the island was rapidly peopled. The Central Park added to the attraction in that direction. The dwellings of the wealthy portion of the population have migrated as regularly as the means of doing so have been extended. Thirty years ago only 11,000 persons were to be found above Fourteenth street, and the real estate valuation above that line was but \$3,664,980. If we now divide the island into three districts, viz.: below Canal street; between Canal and Fourteenth street; and above Fourteenth street, and take the population and valuation of each district, we have results as follows for many periods:

YEAR.	Below Canal Street.		Canal to Fourteenth Street.		Above Fourteenth Street.		Total.	
	Population.	Valuation.	Population.	Valuation.	Population.	Valuation.	Population.	Valuation.
1836.....	79,574	\$84,284,119	170,078	\$91,620,517	24,437	\$57,837,667	270,089	\$233,742,302
1843.....	91,797	71,908,306	225,708	73,829,609	53,728	19,212,599	871,233	164,950,514
1850.....	107,367	99,734,878	294,668	95,407,149	113,359	57,044,726	515,394	252,186,753
1855.....	94,718	112,920,377	263,210	94,580,899	271,882	120,524,590	629,810	386,975,866
1860.....	96,110	125,290,532	301,550	110,719,891	423,423	162,523,196	821,113	398,538,619

With the year 1836, as above stated, the values of real estate culminated, and then declined over the whole island to 1843. From that time improvement again was manifest. The immigration from abroad rapidly increased, filling the up-town wards. In the five years ending with 1855 a remarkable change took place in the population. Below Fourteenth street, and above Canal, there was a reduction of 31,458 in the population, which, facilitated by the railroads, went up town. Below Canal street

there was a reduction of 13,000, attracted to Brooklyn, Staten Island, New Jersey, and other neighboring localities. In the five years up to 1860, in which immigration continued large, the numbers have again increased in all the sections, but mostly above Fourteenth street. The railroads have continued the facilities for cheap and prompt transportation, as well in the city as in Brooklyn. The number of passengers carried on these roads was as follows:

RAILROAD LINE.	1859.	1860.	Receipts.	Expenses.	Dividends.
	Passengers.	Passengers.			
Brooklyn City.....		10,477,984	\$520,855 18	\$409,959 33	\$80,000
Eighth Avenue.....	7,389,997	7,775,040	385,750 20	274,121 84	120,000
Ninth Avenue.....		1,984,341	99,217 07	70,958 72
Second Avenue.....	5,162,011	5,190,602	263,061 73	233,862 43	52,000
Sixth Avenue.....	6,479,129	7,398,903	369,945 40	261,698 64	90,000
Third Avenue.....	9,974,101	12,109,417	610,597 17	445,241 53	122,850
Total.....	44,942,492	\$2,252,426 75	\$1,695,842 54	\$464,850
Total, 1861.....	49,444,490	2,269,774 65	1,809,466 00	1,339,311

Thus there were in round numbers 25,000,000 people conveyed to and from their business in New York by the railroads in 1861, in addition to the transportation by the omnibuses. These large numbers of the people have not yet covered half the area of the island. The official reports give the following. (See table A.)

The construction of the Central Park, magnificent ornament as it is to the city, took from the supply of house-lots a space equal to the occupation of 72,000 persons, according to the density of the population between Canal and Fourteenth streets. The density of that section in a belt crossing the island from North to East rivers, has been largely increased, and tenement houses there abound, some on improved plans, by which all "the modern improvements" are supplied to the occupants of rooms on reason-

able terms. A late report of the Sanitary Association gives the following facts in relation to the occupancy of houses:

"Three years since, (1857,) the number of buildings of all descriptions in this city was some 53,000. The city is divided into twenty-two wards. In 1856, nineteen of these wards contained a population of 536,027 inhabitants, divided into 112,833 families, averaging a little less than five souls in each family. For the accommodation of these 112,833 families, residing in nineteen wards, there were 36,088 dwellings, averaging about three and one-half families occupying an entire house. There are but 12,717 of these families occupying an entire house; 7,148 of these dwellings contain two families; 4,600 contain each three families. Thus while 24,465 of these dwellings shelter but 36,213

TABLE A.

TABLE showing the number of Lots improved and unimproved in the different Wards, during the years 1860 and 1861.

WARDS.	1860.		1861.	
	Improved.	Unimprov.	Improved.	Unimprov.
1.....	2,033	24	2,087	20

12 "	277	24 "	58	36 "	1	53 "	1

There are many single blocks of dwellings containing twice the number of families residing on the whole of Fifth Avenue, or than a continuous row of dwellings similar to those on the Fifth Avenue three or four miles in length. There is a multitude of these squares, any of which contains a larger population than the whole city of Hartford, Conn., which covers an area of seven miles.

There are in Brooklyn 4,483 houses, which, according to the report of the Superintendent of the Police, have from three to one hundred persons each.

The increase of the population of the city in the last ten years, and the rise which has simultaneously taken place in the value of the land, combined with the influx of foreigners who were, to some extent, accustomed to the

crowded condition of foreign cities, led to the construction of the tenement houses on more extended scales. The more so, that it was found that capital so invested paid enormously. In many cases not less than 35 per cent. Some idea of the magnitude of these dwellings may be gathered from one, which is 50 feet front by 250 feet deep. It has an alley running the whole depth on each side of it. These alleyways are excavated to the depth of the cellars, arched over, and covered with flag stoops, in which, at intervals, are open gratings to give light below; the whole length of which space is occupied by water-closets, without doors, and under which are open drains communicating with the street sewer.

This building is occupied mostly by foreigners. It is calculated for 126 families, each having a room in which they cook, eat, sleep, and sit. The only ventilation is by a window which opens against a dead wall eight feet distant, and to which rises the vapor from the vault below. Such buildings are, many of them, provided with gas and water, and they vary in the degree of ventilation and sanitary regulation. The importance they occupy in this metropolis is manifest in the fact, that the population of the city of New York was, in 1861, 810,000; of which one-half lived in tenement houses.

The whole number of dwellings of all descriptions in the city is 55,000, which includes stores, churches, &c. In 1860, the population was 805,000, or 161,000 families. Of these, 15,000 only occupy entire houses; 9,120 dwellings contain two families; and 6,100 contain three families. Thus 30,200 dwellings contain 71,540 families.

The supervision of the police has gone a great way towards improving the condition of these houses, and consequently the health of the people.

The number of aliens is large, and it is this population that swells so largely the number of occupants of tenement houses, particularly in the Tenth, Eleventh, and Seventeenth wards. It is not to be inferred, however, that it is poverty only that causes such dense settlement, since a spirit of economy and frugality manifests itself among these people, which forbids too much expenditure for the high rents charged in the city or for much riding on railroads. The rapid increase of the population in the city not only caused a progressive rise in the value of land, but also raised rents through the demand that existed for houses, requiring large capital to be invested in them; and also through the increase of taxes, which have nearly doubled every five years, and have fallen mostly upon real property, to be repaid in rents. That large class of population, therefore, which is engaged in manufacturing operations, and which can spare the time less than the money, requisite to go long distances between their homes and their occupations, necessarily diminish their rents by occupying less room. The economy in this respect adds to their comforts in others.

The evidence of this is found in the savings banks, the deposits in which have shown such marvellous increase.

The savings in these institutions underwent a rapid increase—in the aggregate, twenty millions in four years. The return for 1858 does not, however, show an increase; neither does it show a reduction. The fact that no increase of deposits is apparent, is due to the panic of 1857, which threw such large numbers out of employ in the winter of 1857-58, and compelled them to resort to their savings for support. The war in 1861 was still more disastrous. In New York and Brooklyn more than one-fourth of the whole population are depositors in the savings banks, being nearly half the adult population. The terrible effects of the war are manifest in the operations of the banks of New York State for the year 1861:

YEARS.	No. of Accounts.	Due Depositors.	Amount Deposited.	Withdrawn.
1860.....	300,693	\$67,440,397	\$34,934,271	\$28,308,414
1861.....	300,511	64,053,119	27,439,855	33,675,078
Decrease..	182	\$3,387,278	\$7,494,416	
Increase..	\$5,369,659

Thus there were nearly 7½ millions less added to the savings, and \$5,369,659 more drawn upon

for necessities. This reduction appears to have taken place in the first half of the year to a greater extent than subsequently, since up to July the deposits declined \$2,267,353. It was inferred that the deposits were withdrawn to invest in Government securities. But inasmuch as the Government had not issued its small denominations of notes until after the deposits had been withdrawn, that reason is not very tenable. It is probable, however, that in the eagerness with which the people of New York responded to the call of the President for troops, much was withdrawn from the savings banks to aid their departure. The seven largest of the city institutions reduced their deposits \$4,137,077; some of the smaller ones, and those of the interior towns, increased their deposits. The result, however, shows how fearfully the war has told upon the producing classes of the metropolis, even in its first year, and before the taxes which the expenditure makes necessary fall upon the real estate and consumable articles, to swell their expenses while it destroys their incomes. By this double process those large saving accumulations may gradually melt before the exigencies of the Government.

The aggregate property of the city, and the rate of taxation for a series of years, are represented in the following table:

YEAR.	Value of Real Estate.	Value of Personal Estate.	Total Real and Personal.	Amount raised by Tax.	Population.	Percentage of Taxation to Property.	Total Population of United States.
1826.....	\$64,804,050	\$42,434,981	\$107,238,931	\$383,759	163,000	.86	11,388,000
1827.....	72,617,770	39,594,156	112,211,926	437,092	172,000	.89	11,729,000
1828.....	77,183,820	36,879,653	114,019,533	455,751	182,000	.43	12,092,000
1829.....	76,180,430	35,672,636	111,808,066	507,107	192,000	.45	12,471,000
1830.....	87,603,580	37,634,938	125,238,518	509,173	202,589	.41	12,866,020
1831.....	95,594,335	41,966,194	137,560,529	572,104	212,000	.42	13,241,000

1861.....	408,955,665	174,634,306	583,589,971	11,390,040	844,000	1.95	32,412,000
				\$113,054,734			

The progress of taxation is large. In 1826 it was \$2½ per head; in 1846, \$6 per head; in 1856, \$10½ per head; in 1861, \$13½ per head. On the other hand, the value of property per

head has not increased. It was \$700 average in 1827, and is about the same now. The taxes imposed for the year 1861 were not, however, all for city purposes, but were composed as follows:

For the use of the State of New York, for Canals, Schools, and general purposes.....	\$2,108,685 82
For County purposes, including Police.....	2,675,057 00
For the Corporation of the City of New York.....	6,297,230 19
To supply deficiencies in the product of the tax hereby imposed.....	809,117 92

Total tax for 1961 authorized by the Legislature..... \$11,890,040 43
[This does not include any of the sums raised for war purposes, such sums having to be obtained by loans.]

Over the State tax—\$2,108,635 32—the local authorities have no control whatever, although the quota of State tax imposed upon the city has increased during the past ten years from \$160,000 to more than \$2,000,000. It is alleged, however, that great injustice is done to the city of New York by the system which prevails of undervaluing property in the agricultural districts of the State, by means of which a disproportionate burden is thrown upon the large cities; and through the exaction of large sums of money yearly from the city for the benefit of the schools of the interior of the State, in view of the fact that \$1,300,000 are annually required for the public schools of the city.

County Tax—\$2,675,059.—The principal item of expenditure for county purposes is that for the Metropolitan Police, amounting to about \$1,700,000.

City Tax—\$6,297,230.—It has been customary for the Board of Supervisors to levy such amounts for the use of the corporation of the city as is suggested by the Common Council, and sanctioned and directed by the Legislature of the State. Of the amount, \$1,000,000 is for salaries, and \$1,012,000 for interest on the debt; \$1,300,000 for schools.

The war taxes are still to come, and under the direct tax law will be nearly \$1,500,000 for New York City. Inasmuch as the population of the city is one-twentieth of that of the Northern States, it must pay that proportion of the proceeds of the new tax bills, which are estimated to give \$160,000,000, which will give a proportion of \$8,000,000 per annum for New York, or, with the local taxes, \$19,400,000, being nearly \$20 per head.

The debt of the city is as follows:

[illegible]

Total amount redeemable from Sinking Fund. \$19,874,139

Funded City Debt, redeemable from taxation, August 1, 1861, viz.:

5 per cent. Public Education Stock, payable in 1873.....	\$154,000
5 per cent. Public Building Stock, No. 8, payable in 1861-66.....	300,000
5 per cent. N. Y. City Stocks for Docks and Slips, payable in 1867-76.....	500,000
6 per cent. Tompkins Market Stock, payable in 1862-69.....	136,000

Total redeemable from taxation.....	\$1,090,000
-------------------------------------	-------------

Total amount of funded debt.....	\$20,964,189
----------------------------------	--------------

5 per cent. War Loan.....	\$1,000,000
5 " " "	500,000

Amount of sinking fund for redemption of city debt, Sept. 1, 1861.....	\$5,440,488 69
--	----------------

In the past year the city contracted two loans for war purposes. When the fall of Fort Sumter startled the North and aroused it to action, previous to the resolutions of the great meeting at Union Square, the Common Council, April 22, passed an ordinance, entitled, "An ordinance making an appropriation in aid of the defence of the National Union, and authorizing the borrowing of money for that purpose," approved April 26, 1861, in pursuance of which the "Union Defence Fund Bonds," \$1,000,000, payable May 1, 1862, were issued. Subsequently, and in order to aid the families of volunteers, a loan of \$500,000 was made, payable July 1, 1862.

The population of the city of New York, which numbers one-twentieth of the whole population of the free States, has politically been largely democratic. This is expressed in its vote for presidential electors in a series of periods:

Whigs.		Democrats.		Republicans.	
1840	Harrison, 20,955	V. Buren,	21,935	Birney,	153
1844	Clay, 26,383	Polk,	21,296	Fillmore,	11,111
1848	Taylor, 23,056	Cass,	19,198	V. Buren,	5,166
1852	Scott, 29,115	Pierce,	34,226	Hale,	506
1856	Fillmore, 19,922	Buchanan,	41,918	Fremont,	17,771
1860		Douglas,	62,293	Lincoln,	33,290
Total votes, 119,436			207,561		57,093

The election of Gen. Taylor, a Mexican soldier and Southern slaveholder, was less a party vote than a tribute to a military hero, and he was nominated not as representing any of the old principles which had so long divided the great parties of the country, but on the mere ground of availability. So little then remained of old party animosities against persons, since the principles contended for had been settled, that the possible nomination of Clay by the Democrats was much discussed. The nomination of Mr. Cass, however, led to the separation of the Free Soil element, which had lain dormant since the Missouri Compromise, as a means of defeating Mr. Cass by dividing the vote of New York. The plan was successful, although the city of New York lent but little support to the movement. The example, however, was not lost upon parties, and the question then inaugurated became the basis of a new party.

The great city of New York, the centre of all the financial and commercial operations of the country; the point to which produce tends for sale directly, or if exported from other ports, to which the bills drawn against it come for negotiation; the great reservoir to which capital from every point comes for employment, and to which all securities, public and private, tend for negotiation; the fountain of capital which pours its vivifying stream into every and the remotest sections, animating industry, facilitating production, and cheapening transportation; which counts in every town and hamlet its debtors, and which is the agent, so to speak, of the national commerce in its foreign transactions, was preëminently conservative in its views, and patriotic in its sentiments. This great national heart throbbed with the utmost solicitude for the general welfare. It marked with earnest solicitude the gathering clouds which lowered over the political future; earnestly and actively urged compromise by every honorable means, which should allay surging passions, and restore the bonds of union while yet union was possible. When, however, the smoke of war enveloped the National flag, and the seat of Government resounded with the clang of arms, New York, holding the purse-strings, without which no great movement can be undertaken, came forward promptly to save the Government from a fall.

The idea that the gathering difficulties were only a political threat, was by many circulated. On the 22d December a meeting in the city was addressed by Mr. Seward, Secretary of State, in which he remarked:

I need not say to you that I do not think it (secession of South Carolina) is likely to be followed by many other States on this continent, or to be persevered in long, because it is manifestly very much inferior to the system that already exists. The State of South Carolina desires to go out. Just at this moment I am going back to Washington for the purpose of admitting the State of Kansas in; and I venture to say that for every State on this continent that will go out of the Union, there stand already waiting at least two States that will be glad to come in, and take their place.

Let South Carolina, let Alabama, let Louisiana—let any other State go out, and while they are rushing out you will see Canada and all the Mexican States rushing in to fill up the vacuum. It is the wisdom discovered by our fathers which is all concentrated in these three words of such pregnant meaning—*E Pluribus Unum*.

They do not humbug me with their secession; and I do not think they will humbug you. And I do not believe that, if they do not humbug you and me, they will much longer succeed in humbugging themselves. Now, fellow-citizens, this is the ultimate result of all this business. These States are always to be together—always shall. Talk of striking down a star from that constellation. It is a thing which cannot be done. I do not see any less stars to-day than I did a week ago, and I expect to see more all the while. The question then is, what in these times—when people are laboring under the delusion that they are going out of the Union, and going to set up for themselves—ought we to do in order to hold them in. I do not know any better rule than the rule which every good father of a family observes. It is this: If a man wishes not to keep his family together, it is the easiest thing in the world to place them apart.

If we keep entirely cool, and entirely calm, and en-

tirely kind, a debate will ensue which will be kindly in itself, and it will prove very soon either that we are wrong—and we shall concede to our offended brethren—or else that we are right, and they will acquiesce, and come back into fraternal relations with us.

I believe that secession was stronger on the night of the 6th of November last, when a President and Vice-president, who were unacceptable to the Slave States were elected, than it is now. That is now some fifty days since, and I believe that every day's sun which set since that time, has set on mollified passions and prejudices, and that if you will only give it time, sixty days' more suns will give you a much brighter and more cheerful atmosphere.

During the session of Congress which closed March 4, while State after State of the South was withdrawing its members from Congress and seceding from the Government, citizens of New York were exerting themselves to procure, through the aid of the Border States still represented, some plan of compromise which might be at least satisfactory to those States, thereby retaining them in the Union, and through their affinity with the extreme South ultimately bringing all again together in harmony and renewed national prosperity. The New York capitalists and merchants were particularly active. Monster petitions for the several plans of compromise proposed in Congress were opened, and circulated among all classes. These were forwarded in great numbers to Washington, but without any effect on Congress. New York then foresaw and calmly awaited the coming storm, the burden of which was to fall upon her shoulders.

The States of the South continued to secede. The property of the Federal Government was seized, armies were mustering at the South; a new Government forming, and every sign of approaching dissolution was manifest. Mr. Stanton, of Ohio, offered in the House a bill, granting the necessary powers for the Executive to use force in maintaining the authority of the Government; even this was not passed, and the Congress finally came to an end. The new President was inaugurated. No one could understand if coercion was to be used or not. But on the 1st of April, while the Government was making appeals to New York for money, an expedition was there fitted out to supply Fort Sumter peaceably or by force. The response to that expedition was the thunder of those guns which roused the North, and made plain the future. The reverberation had not died away, when the voice of the President in his proclamation was heard calling for 75,000 men to be sent "to recover and re-possess the property." The appeal went home to the heart of the people, and that New York which had so long striven against this policy, now threw itself upon the altar of the country, and offered up its vast wealth to sustain the Government.

The proclamation of the President and the news of the fall of Fort Sumter reached the city on the 15th of April, causing an intense excitement. All shades of opinion seemed to vanish before the one great fact that the country was

in danger and must be saved. Citizens of all classes breathed but one spirit of patriotism, and the Mayor of the city issued the following :

MAYOR'S OFFICE, NEW YORK, April 15, 1861.

To the People of the City of New York :

As Chief Magistrate, representing the whole people, I feel compelled at this crisis to call upon them to avoid excitement and turbulence. Whatever may be or may have been individual positions or opinions on questions of public policy, let us remember that our country now trembles upon the brink of a precipice, and that it requires a patriotic and honest effort to prevent its final destruction. Let us ignore the past, rising superior to partisan considerations, and rally to the restoration of the Constitution and the Union, as they existed in the days and in the spirit of our fathers. Whether this is to be accomplished by fratricidal warfare, or by concession, conciliation, and sacrifice, men may differ ; but all will admit that here at least harmony and peace should prevail. Thus may we, under the guidance of Divine Providence, set an example of peace and good will throughout our extended country. In this spirit and with this view, I call upon the people of New York, irrespective of all other considerations or prejudices, to unite in obedience to the laws, in support of the public peace, in the preservation of order, and in the protection of property.

FERNANDO WOOD, Mayor.

The allusions in this proclamation to mob violence were in consequence of persons seizing the moment of excitement to incite the mob to make many newspapers show the Union flag. All citizens were now decorated with the national emblem in every variety of form, while from store, dwelling, church, and public buildings, signs, and lamp posts fluttered the Stars and Stripes in every variety of form and in the greatest profusion.

Instantly the military were in motion ; every drill room and armory was alive with active officers calling for and enrolling men. On the 16th several regiments were already partly equipped. The 1st National Guard, Col. Allen, the 7th Regiment, 79th Highlanders, the 71st, the Fire Zouaves of Ellsworth, the 70th, the 55th, the 12th, and others were rapidly organizing to march. On the 17th the 6th Massachusetts, Colonel E. J. Jones, arrived in New York on its way to Washington, and met the most enthusiastic reception. It made a triumphal march through the city on the 17th of April.

The intelligence that the favorite New York regiment, the 7th, would leave for Washington on the 19th, created an immense excitement. Although it was announced that the departure would not be before 3 p. m., the streets were thronged at an early hour of that day. Lafayette Place, where the regiment was to form previous to marching, was very attractively dressed—a huge flag being displayed from the Astor Library, with many others from private buildings. The aspect of Broadway was very gay. The Stars and Stripes were floating everywhere, from the costliest silk, 20, 30, 40 feet in length, down to the homelier bunting, and the few inches of painted calico. But the gayest and, in this respect, the most remarkable thoroughfare was Cortlandt street, which showed a

gathering of flags, a perfect army of them. They were not, in that comparatively brief space, from Broadway to the Jersey City Ferry, to be numbered by dozens or by scores : every building seemed like "Captains of Fifties," flag over flag waving. From every window, from the first floor to the roof, from every doorway, they waved responsive to the fluttering banners that were held in every hand.

Through this gay and expectant throng marched the 8th Massachusetts, Col. Timothy Monroe, accompanied by Gen. B. F. Butler, who had been the Breckinridge candidate for Governor at the election in November, and was now leading the Massachusetts troops. The regiment was presented with colors on the way. This, which would have been an absorbing ceremony at another time, merely filled a portion of the time until the 7th came.

They formed in Lafayette Place about 4 p. m., in the presence of an immense crowd, each window of each building being filled with applauders. Before moving, the excitement of the crowd was made wild by the news of the attack upon the 6th Massachusetts in Baltimore, and there were served out to the 7th forty-eight rounds of ball-cartridge. Once in line, they proceeded through Fourth street to Broadway, down that great thoroughfare to Cortlandt street, and across the ferry, in boats provided for the purpose, to Jersey City. The line of march was a perfect ovation. Thousands upon thousands stood on the sidewalks. The regiment was escorted by a band of Zouaves, who volunteered for the occasion. Their gay uniform and peculiar step revived the excitement that had begun somewhat to droop among the crowd that had waited for hours, as the regiment did not reach the Park till half-past five. After the Zouaves came a strong body of police, and after the police the regiment. The officers were Col. M. Lefferts, Lieut.-Col. W. A. Pond, Major A. Shaler.

The public bodies at once began to adopt measures to supply and move the troops. An immense mass meeting, without distinction of party, was called for, April 20, in Union Square. It proved one of the largest and most enthusiastic ever held. It was addressed by J. A. Dix, Secretary of the Treasury under Mr. Buchanan, D. S. Dickinson, Senator Baker of Oregon, Robert J. Walker, formerly Secretary of the Treasury, Mayor Wood, Ex-Governor Hunt, James T. Brady, John Cochrane, Hiram Ketchum, D. S. Coddington, Esq., and a number of Irish and German citizens, all breathing the one unanimous sentiment of ignoring the political opinions of the past, and standing by the Government with their whole heart, regardless of who might administer it for the time. The fortunes and lives of the citizens were pledged to that end.

A meeting of the merchants of New York city was held at the Chamber of Commerce, April 19th. The proceedings were characterized by the utmost harmony and unanimity.

Resolutions upholding the Federal Government, and urging a strict blockade of all ports in the secession States, were unanimously adopted. It being announced that several of the regiments needed assistance to enable them to leave—on motion, a committee was appointed to receive donations, and in ten minutes the subscription had reached over \$21,000. What was still more important was the appointment of a large committee of the most influential capitalists, to use their exertions to secure an immediate taking of the \$9,000,000 remaining of the Government loan.

On Monday, April 22, the Mayor of the city of New York recommended, and the Board of Aldermen voted, \$1,000,000 to aid in the defence of the Government.

At a meeting of the whole New York Bar on the same afternoon, the announcement was received with enthusiastic cheers, and the Bar raised \$25,000 on the spot.

Each day now presented its military pageant. The city appropriated the Park to the erection of extensive barracks for the entertainment of the troops, which from North and East made New York their halting place *en route* for the capital. The Worcester Rifles, the 1st Regiment of Rhode Island, per steamer Osceola, passed through on Sunday, the 21st, and on the same day departed the 6th, 12th, and 71st New York State Militia.

The people were early astir on that day, and by 10 o'clock every available spot where a human being could stand, was occupied, through the entire length of Broadway; and from near Canal street to Grace Church, not only the sidewalks, but the whole of the street, was densely thronged. Every window, door, stoop, balcony, and housetop was alive with human beings, of every age, sex, and condition, in expectation of this most novel and exciting scene. From almost every housetop and store, from the windows of almost every private dwelling, from the masthead of every ship, from the flagstaff of every manufactory, from all the public buildings, from the Roman Catholic Cathedral, from the lofty spire of Trinity Church, from St. Paul's Church, the national ensign was flying. The other streets were thronged as on a gala day. On all coats were pinned the red, white, and blue cockade, and in every lady's bonnet ribbons of the same colors were tastefully tied. In the Park, cannons were booming at different times during the day. At the arsenal, regiments, just raised, were formally organized and equipped.

At the armories of the 6th, 12th, and 71st, from early dawn all was bustle and animation, preparing for the afternoon departure. At the rendezvous of the several regiments, the character of the day was ignored, and the maxim realized that in war times there are no Sundays.

At the wharves great steamers were alive with the bustle of preparation for conveying large numbers of troops. In the stream at anchor

was the steamer Osceola, with troops from Rhode Island. At the railroad depot in Jersey City the greatest activity prevailed, and means of transportation were being got in readiness for moving as many regiments as might present themselves.

Young men in uniforms, with knapsacks strapped, were seen leaving luxurious homes in aristocratic parts of the town, prepared to rough it with the roughs in defence of the country. Firemen were gathered at their engine-houses, and busy in doing what they could to help off companions who had enrolled themselves in Ellsworth's regiment of Firemen Zouaves.

At noon the 6th, 12th, and 71st regiments, comprising 3,000 men, marched down Broadway, fully armed and equipped. The occasion was without hardly a parallel, and the march a complete ovation. The 6th embarked in the steamer Columbia, the 12th in the steamer Baltic, and the 71st in the steamer R. R. Schuyler. A Massachusetts battalion, and some regulars went on board the Ariel. As the fleet left, the harbor was a scene of great excitement. The piers, landings, and housetops of the city, Jersey City, Hoboken, and Brooklyn were crowded. The Battery was covered with people, and thousands of boats saluted the steamers crowded with the troops. Flags were dipped, cannons roared, bells rang, steam-whistles shrilly saluted, and thousands upon thousands of people sent up cheers of parting.

On the same Sunday many congregations mingled practical patriotism with piety, and took occasion to make contributions for the outfit of volunteers, or for the support of their families. In a church in Brooklyn a letter was read from the 13th Regiment N. Y. S. M., asking for uniforms for recruits, and the response was a collection of about \$1,100 for that patriotic purpose. In the Broadway Tabernacle, the pastor preached a sermon in the evening on "God's Time of Threshing." The choir performed "The Marseillaise" to a hymn composed for the occasion by the pastor. A collection was taken for the Volunteers' Home Fund amounting to \$450, to which a member of the congregation afterwards added \$100. Dr. Bethune's sermon was from the text: "In the name of our God we will set up our banners." In Dr. Bellows' church the choir sang "The Star-Spangled Banner," which was vigorously applauded by the whole house. At Grace Church (Episcopal) Dr. Taylor began by saying, "The Star-Spangled Banner has been insulted." At Dr. McLane's Presbyterian church, Williamsburgh, "The Star-Spangled Banner" was sung. Dr. T. D. Wells (Old School Presbyterian) preached from the words: "He that hath no sword, let him buy one." Dr. Osgood's text was: "Lift up a standard to the people."

On Monday, the march of troops continued through the city, and on the 23d again New York was alive with excitement to witness the

departure of the 8th, 13th, and 69th regiments. The 8th, 1,000 strong, Col. Geo. Lyon, formed in 16th street, and at 4 o'clock proceeded, amidst the cheering citizens, to pier No. 36, North River, where they embarked on board the steamer Alabama. The 69th Irish, Col. Corcoran, assembled at their armory, No. 42 Prince street, at 3 o'clock. They received the order to march, and they proceeded down Broadway amidst such greetings as the excited Irish citizens alone could demonstrate. At 6½ they left in the James Adger. The 13th, Col. Abel Smith, left on board the Marion. Thus through more than two months the living stream of troops went out of New York to support the Government. The record was nearly as follows:

ping the men, but furnishing the money, and lending large sums to the Government in addition.

The action of New York in response to the call of the President may be thus summed up, showing the number of men and the amount of money furnished. The calls of the Government for loans were as follows:

Borrowed in February	\$7,243,500
" " April	7,814,890
" " May	7,310,000
" " July	12,000,000
New York City advanced in April	2,155,000
" " May	1,500,000
" advanced by corporations and individuals	2,000,000
" Banks loaned in August, October, and December	105,000,000

Approximate sum advanced.....\$145,023,390

Besides these sums, \$1,000,000 more may be put down as the contribution made by families towards the more comfortable outfit and equipment of such of their members as took arms in defence of the National flag. Thus much for the supply of means, which comparatively could be obtained nowhere else, but which New York poured forth with such lavish hand. The calls for troops up to the meeting of Congress were as follows:

First call, Militia, 3 months	75,000
Second call, Volunteers, 3 years	42,000
Regulars for the Army	36,000
Navy	23,000

Total

New York contained 160,000 able-bodied men; of these, governmental departments estimate 60,000 as ordinary laborers; of whom 39,000 men marched with the city-regiments, making nearly one-fourth of all the men summoned. New York thus, in three months, sent in round numbers 40,000 men and \$150,000,000 to sustain the Government under the difficulties brought upon it.

The first difficulty encountered by the mustering troops was to obtain the means of moving. When this was understood, the purses of all parties were open; and on the 18th of April, thirty-seven gentlemen subscribed \$3,100 to aid the Seventh Regiment, about to march, and the amount was raised to \$6,140 on the following day. Numerous other offers were made, and \$7,000 were subscribed for the Fifth Regiment. The amount collected by the Chamber of Commerce Committee in a few days, was raised to \$118,899. The patriotic citizens raised \$11,110, and other committees obtained large sums. It was then determined to organize the Union Defence Committee, which was to take charge of the whole movement, the other committees being merged into it. April 23d, the Committee opened its offices at 30 Pine street—Gen. John A. Dix, Chairman; Simeon Draper, Vice-President; J. Depau, Treasurer. The Common Council, April 23d, passed an ordinance appropriating \$1,000,000, which was placed in the hands of this committee for disbursement, and they proceeded with their

During that period of time New York continued to pour out an average, in round numbers, of 1,000 men per day at the call of the Government, not only supplying and equip-

trust, which was of great importance and well discharged. They equipped and forwarded troops, supplied guns, aided organizations, purchased arms and munitions, and extended aid to the families of the soldiers. The first ambulances sent to the seat of war were by this committee.

A very great decline took place in the number of passengers that arrived in this port in the past year, as follows:

Arrivals for the past eleven years.

YEARS.	Foreign Arrivals.	Passengers, Foreign.	Passengers f'm California.
1851.....	3,888	299,181	13,207
1852.....	3,122	310,335	12,153
1853.....	4,105	299,425	15,517
1854.....	4,173	331,509	15,929
1855.....	3,391	152,234	13,400
1856.....	3,569	159,284	11,925
1857.....	3,902	203,499	11,205
1858.....	3,433	97,632	8,960
1859.....	4,027	101,320	16,749
1860.....	4,451	266,627	10,710
1861.....	5,122	80,790	9,117

The increase of crime in the city is not so great as the circumstance of the continued flow of foreign population into it might indicate. Among the arrivals are large numbers of ignorant and vicious persons, who, in a strange country, are thrown upon evil courses as a matter of necessity to live. It is therefore not surprising that a considerable proportion of the arrests are among that class:

The amount of property reported lost by robberies, was.....	\$183,679 96
The amount recovered.....	79,822 11

Total loss.....\$58,857 85

Among the incidental duties of the police, the following summary casts a singular light upon the transactions of a great city. The police find lodgings for such poor persons as are houseless from any cause of vice or poverty:

There were, in 1861, of such persons lodged.....	119,348
Lost children sent to central office.....	8,731
“ “ restored to parents.....	3,470
Sick and taken to hospital.....	1,386
Horses and cattle restored to owners.....	2,066
Horses and vehicles “.....	247
Stores found open and closed.....	1,723
Dwellings “ “.....	1,151
Number of fires.....	408
“ “ extinguished by police.....	144
Rescued from drowning.....	133
Foundlings sent to office.....	104
Money restored to lodgers and others.....	\$142,593
Violations of Sunday laws.....	24,370

The enormous quantity of butchers' meat stated in the annexed table, gives an average of 337 lbs. per head per annum to each individual in the city, or \$25.27 per annum at the rate which the butchers pay the drovers; about \$50 actually, at the retail prices.

	1861. Head.	Net lbs. each.	Lbs.	Cost.	Value.
Bullocks.....	223,594	725	165,723,400	74c.	\$12,843,563
Hogs.....	559,421	140	78,313,940	6	4,699,154
Sheep & Lambs.....	512,366	45	23,056,470	8	1,844,517
Calves.....	32,868	75	2,357,100	8	188,563
Total.....	1,338,159		269,455,910		\$19,575,783

The total number of butchers' animals sold in the city markets in eight years, has been:

Bullocks.....	1,551,152	Sheep and Lambs.....	4,034,450
Milch cows.....	83,351	Swine.....	3,039,513
Calves.....	352,590		
Total.....			9,061,566

Of the bullocks sold, 1,128,396 head have been at the regular weekly market, held every Tuesday and Wednesday. Prices have ranged in that time from 5 to 14 cents a pound for the meat, according to quality, but seldom below 8 cents a pound for such as is considered first quality.

The sources of this large supply are indicated in the 191,684 head which were sold at the Forty-ninth street market-place, corner of Fifth Avenue. These came from the following States:

Illinois.....	79,479	Virginia.....	1,117
Ohio.....	35,435	Connecticut.....	596
New York.....	23,044	New Jersey.....	460
Indiana.....	15,080	Wisconsin.....	120
Iowa.....	11,565	Massachusetts.....	67
Kentucky.....	8,799	Texas.....	59
Michigan.....	5,298	Cherokee Nation.....	100
Missouri.....	3,827	Canada.....	1,423
Pennsylvania.....	1,187		

The increase of railroad transportation has not only increased the quantity brought, but greatly improved the condition in which they arrive. They are no longer foot-sore and fevered from long journeys, but come in upon the railroads in good condition and healthy. In 1861 they were brought as follows:

By	Bullocks.	Swine.	Weekly average B'lsks. Swine.
Eric Railroad.....	37,582	169,225	1,684 3,254
Hudson River Railroad.....	65,449	251,425	1,250 4,835
New Jersey Cen. Railroad.....	18,182	125,919	350 2,423
Harlem Railroad.....	32,213	620
Camden and Amboy R. R.....	7,119	137
On boats.....	16,447	816
On foot.....	2,152	41

It is to be borne in mind, that while the supplies have been as large as ever, the number of consumers has been less. Fifty thousand able-bodied men left the city at the call of the Government, and the effect upon consumption was material.

The consumption of flour in the city is about 1,000,000 barrels per annum. There are no means of ascertaining the quantity of farm produce brought into the city from the surrounding country, and sold in the markets.

The deliveries in this city of some of the leading articles of domestic produce have been as follows:

	1860.	1861.
Flour, bbls.....	3,913,686	5,013,053
Wheat, bush.....	19,689,384	23,749,909
Corn, bush.....	13,005,938	23,169,469
Rye, bush.....	143,997	659,363
Barley, &c., bush.....	1,175,163	1,742,895
Oats, bush.....	4,867,490	4,081,895
Beef, tierces and bbls.....	126,556	116,794
Pork, bbls.....	104,502	144,566
Bacon, &c., packages.....	75,685	106,631
Lard, packages.....	182,883	182,166
Cheese, packages.....	547,410	965,140
Butter, packages.....	490,000	556,523

The quantities of unhealthy matter removed from the city limits during the year, under the action of the City Inspector, were as follows:

Cheese, unsound.....	24,666	lbs.
Vanison, ".....	628	"
Sausages, ".....	2,805	"
Tripe, ".....	11,225	"
Swine, ".....	11,807	"
Poultry, ".....	17,759	"
Fish, ".....	48,000	"
Mutton, ".....	16,050	"
Veal, ".....	17,229	"
Beef, ".....	37,088	"
Other meats ".....	7,174	"
Offal, barrels.....	61,823	"
Dogs, and small animals, No.....	15,065	"
Hogs, dead,.....	1,728	"
Goats, ".....	59	"
Cows, ".....	247	"
Horses, ".....	2,735	"
Night soil, loads.....	45,266	"
Sinks, &c., cleaned, No.....	9,368	"
Nuisances abated,.....	8,183	"

The removal of these nuisances from the city is necessary in the highest degree to its health, and it is also an evidence of the waste which occurs in the sustaining a large city. This cannot, however, be considered large, in view of the immense number of people to be fed, and also in view of the fact that the quantities brought in are not calculated nor governed by any red tape or protective principle, but are adjusted by the exercise of the free judgment of the sellers. It is a marvel that supplies of perishable matter are so closely applied to the wants of the people.

The distress in which a large portion of the emigrants arrive in the city is a fruitful source of mortality, and this becomes conspicuous when the operations of the five dispensaries of the city are contemplated. These supplied in the year 135,235 persons, of whom 60 per cent. were foreigners. The number of children that died in 1861 was 13,614; the parentage of 9,437 was given, of whom 8,339 were of foreign parents.

The marriages in the city of New York for the year 1861, distinguishing color and condition in life, were as follows:

Monthly Return of Marriages in the City of New York for 1861.

NORFOLK, a city in Norfolk County, Virginia, is situated on the right or north bank of Elizabeth River, eight miles from Hampton Roads, thirty-two miles from the sea, and one hundred and sixty miles, by water, or one hundred and six miles, by land, southeast of Richmond. The river, which is here seven-eighths of a mile wide, separates it from Portsmouth. Next to Richmond, Norfolk is the most populous city of Virginia, having about 14,000 inhabitants. It has more foreign commerce than any other place in the State, and, together with Portsmouth, has been the most important naval station in the Union. The entrance to the harbor is defended by Forts Calhoun and Monroe. The navy-yard was located at Gosport, a suburb of Portsmouth, on the side of the river opposite Norfolk. This is accessible to the largest ships. A naval hospital and a large dry-dock were also located there.

At the time of the secession of Virginia, April 18th, the marines and Government forces at the yard numbered not less than eight hundred men. The vessels of war there at that time were as follows:

Ships-of-the-Line.—Pennsylvania, 120 guns; Columbus, 80; Delaware, 84; New York, (on stocks), 84. *Frigates.*—United States, 50 guns; Columbus, 50; Raritan, 50. *Sloops-of-War.*—Plymouth, 22 guns; Germantown, 22. *Brig.*—Dolphin, 4 guns. *Steam frigate.*—Merrimac, 40 guns.

As to their condition, there was the liner Columbus, useless; liner Delaware, useless; liner New York, never launched; frigate Columbus, out of order; frigate Raritan, out of order; steam frigate Merrimac, needing full repairs; corvette Germantown, almost ready for sea.

The force of the Government within a short distance of the yard, not to mention Fortress Monroe, was the flag ship Cumberland, 300 men; receiving ship Pennsylvania, 350; marines at the barracks, 70; steamer Pocahontas, 60; total, 780.

Upon the first excitement, a party of men, without any authority, had seized the light-boats, and floating them to the shallowest point

at the mouth of the harbor, had sunk them, to prevent the removal of the vessels of war from the navy-yard.

On the 19th Gen. Taliaferro and staff arrived at Norfolk. He had command of all the Virginia troops in that section, and was waited on shortly after his arrival by the captains of the several military companies of the city and vicinity for the purpose of reporting their strength, condition, &c., and receiving orders.

On Saturday, the 20th, the greatest excitement prevailed in the city. It was reported that the Cumberland was about to sail from the navy-yard, and preparations were made to prevent her. At twelve o'clock an officer came from the yard bearing a flag of truce, and was conducted to Gen. Taliaferro's head-quarters, where a consultation was held, which resulted in a promise from Com. Macauley, the commandant of the yard, that none of the vessels should be removed, nor a shot fired except in self-defence.

This quieted the excitement; but it was renewed at a later hour, when it was ascertained that the Germantown and Merrimac had been scuttled, and that the heavy shears on the wharf at which the Germantown was lying had been cut away and allowed to fall midships across her decks, carrying away the main topmast and yards. It was also perceived that the men were busily engaged in destroying and throwing overboard side and small arms, and other property, and boats were constantly passing between the Pennsylvania, Cumberland, and other vessels. (*See NAVY, U. S.*)

About midnight a fire was started in the yard. This continued to increase, and before daylight the work of destruction extended to the immense ship-houses known as A and B, (the former containing the entire frame of the New York, 74, which had been on the stocks, unfinished, for some thirty-eight years,) and also to the long ranges of two-story offices and stores on each side of the main gate of the yard. The flames and heat from this tremendous mass of burning material were set by a southwest wind directly towards the line of vessels moored on the edge of the channel opposite the yard, and nearly all of these, too, were speedily enveloped in flames.

The scene, at this time, was grand and terrific beyond description. The roar of the conflagration was loud enough to be heard at miles' distance; and to this were added occasional discharges from the heavy guns of the old Pennsylvania, ship-of-the-line, as they became successively heated.

When the destruction of the ship-houses was certain, the Pawnee, which arrived on Saturday, and had been kept under steam, was put in motion, and, taking the Cumberland in tow, retired down the harbor, out of the reach of danger, freighted with a great portion of valuable munitions from the yard, and the commodore and other officers. The ships proceeded as far down as the barricades at the

narrows, where the Cumberland was left at anchor, and the Pawnee continued on to Fortress Monroe. The Cumberland subsequently passed out.

It afterwards appeared that the ship Pennsylvania was burnt, and the Merrimac, Columbus, Delaware, and Raritan, Plymouth, and Germantown were scuttled and sunk, and a vast amount of the machinery, valuable engines, small-arms, chronometers, &c., had been broken up and rendered entirely useless. Besides the ship-houses and their contents, the range of buildings on the north line of the yard, (except the Commodore's and Commander's houses), the old marine barracks, and some workshops were burnt. Much of value, however, was not destroyed. The great dry-dock was uninjured. The large number of 2,500 cannon, of all kinds and sizes, fell into the hands of the State of Virginia; also shot, shell, and other warlike missiles to a very large amount. Besides these, the machinery of the yard was generally uninjured. A collection of ship-building and outfitting material, large and valuable, including a number of steel plates and iron castings, was found ready for use, and capable of being turned to account.

Old Fort Norfolk, used as a magazine, was taken by the Virginia authorities without resistance. Within were three thousand barrels of powder, containing three hundred thousand pounds; also, a large number of shells and other missiles, loaded, and for that reason necessary to be kept in magazines.

The value of the property destroyed was estimated at several millions. The cost of the immense and magnificent ship-houses and their contents formed a considerable item in the account, and so did that of the Pennsylvania. "It brings tears into our eyes," said a citizen of Norfolk, "when we realize the destruction of this noble ship, so long the ornament of our harbor and the admiration of thousands from all parts of the country who visited our waters." That splendid specimen of naval architecture, the new and beautiful frigate Merrimac, and four or five other vessels, were given to the flames, or with their valuable armament to the deep.

On the same day an order was issued by Gen. Taliaferro, prohibiting the collector of the port from accepting any draft from the United States Government, or allowing the removal of deposits, or any thing else, from the custom-house. The collector, being informed that on his refusal to obey the order a file of men would be sent down to occupy the premises, acquiesced.

To relieve the pecuniary embarrassment, and to provide an equivalent for cash for immediate purposes, the City Council immediately issued a considerable amount of small notes. The lowest denomination authorized was twenty-five cents.

On the 20th the Richmond Grays, a fine company numbering one hundred rifle muskets,

arrived. They brought with them fourteen pieces of rifle cannon of large size, one of the pieces weighing 10,000 pounds, and three box cars filled with ammunition of various kinds, to be distributed to the patriotic companies by the way side.

On the night previous, four companies of Petersburg riflemen and infantry, numbering in all four hundred men, reached Norfolk. They were followed by two additional companies of one hundred each.

On the 22d, three companies of troops from Georgia arrived in the express train from Weldon; the Light Guards, from Columbus, numbering eighty men; the Macon Volunteers, eighty men; and the Floyd Rifles, from Macon, eighty men. The first and last commands marched immediately to the naval hospital.

About the same time the hull of the old ship United States, in which Com. Decatur captured the Macedonian, was taken possession of at the navy-yard by an efficient crew and towed down to the narrow part of the channel, a mile below Fort Norfolk, where she was moored across the channel and sunk. Only a few feet brought her in contact with the bottom. Any naval force that might attempt to pass up the harbor must remove the hulk, while, in the mean time, the shot and shells from the two forts above—one on the right and the other on the left—would be poured into them.

Norfolk thus was occupied by Confederate troops, who remained in undisturbed possession through the year.

NORTH CAROLINA, one of the original thirteen States, is bounded north by Virginia, east and southeast by the Atlantic, south by South Carolina and Georgia, and west by South Carolina and Tennessee. The population in 1860 was 631,489 whites, 30,097 free colored, and 331,081 slaves. Total 992,667. The Governor holds his office for two years. John W. Ellis, whose term of office ceased in January, 1863, died in 1861, and was succeeded by the Lieutenant-Governor Clark. The Senate is composed of fifty members, elected for two years, and the House of Commons, as it is called, of one hundred and twenty members, elected for two years. The vote at the presidential election in 1860 was as follows: Lincoln —, Douglas 2,701, Breckinridge 48,539, Bell 44,990. The staple productions of the State are Indian corn, tobacco, and sweet potatoes. Lumber, pitch, tar, and turpentine, with some rice and cotton, are articles of export from the State.

The Legislature of the State being in session in December, 1860, previous to the meeting of the State Convention in South Carolina, a series of resolutions were offered proposing to appoint Commissioners to the South Carolina Convention for the purpose of urging that body to await a general consultation of the slaveholding States, and to provide also that the Commissioners should attend the Conventions in other States. They were made a special order, but

did not pass. On the same day, in the House of Commons, the following resolution was adopted by a vote of 50 in favor, to 43 against it:

Be it resolved, That the following message be signed by the Speakers of both Houses of this Legislature, and sent by mail to the President of the South Carolina Convention:

Gentlemen of the South Carolina Convention: Will your State confer with our State, or all of the Southern States, or all of the States of the Union, in Convention or otherwise, in order that some honorable adjustment of the present difficulties between the States may be effected whereby a Constitutional Union may be preserved?

In Pasquotank County, in the northeastern part of the State, nearly half the population of which are slaves, the following resolution was adopted at a general meeting, about Dec. 20, 1860:

Whereas some diversity of opinion exists in the State of North Carolina as to the policy to be pursued by the State in the present alarming crisis in our political affairs, therefore be it

Resolved, By the people of Pasquotank County, in general meeting assembled, that no sufficient cause at present exists for a dissolution of the Union; and that, while such is our opinion, we take this occasion to express our disapprobation of the precipitate course pursued by the people of South Carolina, and our determination to resist any encroachment upon our rights, in the Union, let it come from whatever quarter it may.

A strong Union sentiment was shown in the State during the session of the Legislature, but it was in favor of requiring additional guarantees. The public sentiment at this time, being the first of January, has been described in these words:

"The general feeling of North Carolina is conservative. She would respond to any fair proposition for an equitable adjustment of present national difficulties, but will insist on her rights at all hazards."

On the 8th of January Forts Caswell and Johnson were occupied by unauthorized persons, who presented themselves with some show of force and demanded their surrender. Governor Ellis ordered them to be immediately restored to the proper authority. In a letter to President Buchanan, on the 12th of January, he thus describes his action:

SIR: Reliable information has reached this Department, that, on the 8th instant, Forts Johnson and Caswell were taken possession of by State troops and persons resident in that vicinity, in an irregular manner.

Upon receipt of this information, I immediately issued a military order requesting the forts to be restored to the authorities of the United States, which order will be executed this day.

My information satisfies me that this popular outbreak was caused by a report, very generally credited, but which, for the sake of humanity, I hope is not true, that it was the purpose of the Administration to coerce the Southern States, and that troops were on their way to garrison the Southern ports and to begin the work of subjugation. This impression is not yet erased from the public mind, which is deeply agitated at the bare contemplation of so great an indignity and wrong; and I would most earnestly appeal to your Excellency to strengthen my hands in my efforts to preserve the public order here, by placing it in my power to give public assurance that no measures of force are contemplated towards us.

Your Excellency will pardon me, therefore, for asking whether the United States forts will be garrisoned with United States troops during your Administration.

This question I ask in perfect respect, and with an earnest desire to prevent consequences which I know would be regretted by your Excellency as much as myself.

Should I receive assurance that no troops will be sent to this State prior to the 4th of March next, then all will be peace and quiet here, and the property of the United States will be fully protected as heretofore. If, however, I am unable to get such assurances, I will not undertake to answer for the consequences.

The forts in this State have long been unoccupied, and their being garrisoned at this time will unquestionably be looked upon as a hostile demonstration, and will in my opinion certainly be resisted.

To this communication the Secretary of War replied on the 15th, as follows:

Your letter of the 12th instant, addressed to the President of the United States, has by him been referred to this Department, and he instructs me to express his gratification at the promptitude with which you have ordered the expulsion of the lawless men who recently occupied Forts Johnson and Caswell. He regards this action on the part of your Excellency as in complete harmony with the honor and patriotic character of the people of North Carolina, whom you so worthily represent.

In reply to your inquiry, whether it is the purpose of the President to garrison the forts of North Carolina during his administration, I am directed to say that they, in common with the other forts, arsenals, and other property of the United States, are in charge of the President, and that if assailed, no matter from what quarter or under what pretext, it is his duty to protect them by all the means which the law has placed at his disposal. It is not his purpose to garrison the forts to which you refer at present, because he considers them entirely safe, as heretofore, under the shelter of that law-abiding sentiment for which the people of North Carolina have ever been distinguished. Should they, however, be attacked or menaced with danger of being seized or taken from the possession of the United States, he could not escape from his constitutional obligation to defend and preserve them. The very satisfactory and patriotic assurance given by your Excellency justifies him, however, in entertaining the confident expectation that no such contingency will arise.

The bill for calling a State Convention was under debate a number of days; so, also, was the resolution proposing the appointment, on the part of North Carolina, of Commissioners to a Peace Conference at Washington, as proposed by Virginia. The Convention bill finally passed on the 24th of January.

Ultimately, the Legislature seconded the movement of Virginia, by appointing several eminent men, of both parties, to represent the State in the National Conference at Washington. Commissioners were also appointed to represent the State in the Southern meeting at Montgomery, Alabama, the avowed purpose of which was to establish a Provisional Government over a Southern Confederacy, but with instructions adopted by a vote of 69 to 38 in the Commons, that they were "to act only as mediators to endeavor to bring about a reconciliation." This vote was hailed as an unmistakable sign that North Carolina was not prepared for disunion and a Southern Confederacy.

The Convention bill, as it finally passed the

Legislature, provided for putting the question to the people at the time of electing delegates; Convention or no Convention.

It further provided that the election should be held on the 28th of January, and that ten days should be allowed the sheriffs to make their returns. If a majority of the people voted for the Convention, the Governor should issue his proclamation fixing the day for the meeting. If the Convention was called, its action should be submitted to the people for ratification or rejection. If a majority of the people voted against the Convention, the Governor should make known the fact by proclamation. The action of the Convention was required to be confined to Federal matters, and the members would be sworn to that effect.

A more guarded and restricted form could hardly have been adopted and permit any liberty of action to the Convention.

On the 4th of February a resolution was passed unanimously in the House, declaring that, in case reconciliation fails, North Carolina goes with the slave States. The military bill passed in the House, authorized the arming of ten thousand volunteers, and provided for the entire reorganization of the militia.

The election for members of the State Convention resulted in the choice of a considerable majority who were in favor of the Union, and opposed to secession. As expressed at the time, "They, as Unionists, would not submit to the administration of the Government on sectional principles, but they were anxious to preserve the Union on a constitutional basis, and to obtain such guarantees as would lead to a permanent reconstruction of it."

The official vote of the State on the question of Convention or no Convention, including the vote of Davie and Heywood counties, which were reported, was: for Convention, 46,672; against a Convention, 47,323. Majority against a Convention, 651. The vote of the State was smaller by about twenty thousand than at the election in August previous.

Of the whole number of delegates, eighty-two were constitutional Union men and thirty-eight secessionists. The Union majority, therefore, was rather more than two to one.

After this election, the Governor determined not to call the Legislature of the State together in extra session unless something more urgent than was known should occur.

No events of unusual interest occurred until the attack upon Fort Sumter and the call by the President for troops. To the requisition of the Secretary at War, the Governor immediately replied by telegraph as follows:

RALEIGH, April 15, 1861.

Your despatch is received, and, if genuine—which its extraordinary character leads me to doubt—I have to say, in reply, that I regard the levy of troops made by the Administration, for the purpose of subjugating the States of the South, as in violation of the Constitution and a usurpation of power. I can be no party to this wicked violation of the laws of the country, and to this war upon the liberties of a free people. You

can get no troops from North Carolina. I will reply more in detail when your call is received by mail.

JOHN W. ELLIS,
Governor of North Carolina.

HON. SIMON CAMERON, Secretary of War.

The county of Pasquotank, which passed such a strong Union resolution on the 20th of December, as above stated, now, on the 23d of April, assembled in mass meeting at the county town, and adopted the following:

Whereas war exists between the North and the South upon an issue involving the moral, social, and political existence of the South; and whereas it becomes all good citizens and loyal subjects of North Carolina to defend her honor, and preserve her independence; therefore,

Resolved, That we, the people of Pasquotank County, in general meeting assembled, disregarding party affiliations, ignoring the political lines which heretofore have divided us as a people, forgetting and forgiving the animosities which may have been engendered by former political contests, and laying them all a willing sacrifice upon the altar of our common mother, North Carolina, do this day solemnly form a political brotherhood, whose object shall be a united resistance to common wrongs—its bond of union, the honor of North Carolina.

The forts in the State which had been once seized on a popular outbreak and restored by the Governor, were once more seized, and at this time by his orders. Guns and ammunition were obtained in Charleston for use at Fort Macon and Fort Caswell. An extra session of the Legislature was immediately summoned to assemble on the 1st of May.

The proclamation of Gov. Ellis convening that body was as follows:

Whereas by proclamation of Abraham Lincoln, President of the United States, followed by a requisition of Simon Cameron, Secretary of War, I am informed that the said Abraham Lincoln has made a call for seventy-five thousand men, to be employed for the invasion of the peaceful homes of the South, and the violent subversion of the liberties of a free people, constituting a large part of the whole population of the late United States, and whereas this high-handed act of tyrannical outrage is not only a violation of all constitutional law, utter disregard of every sentiment of humanity and Christian civilization, and conceived in a spirit of aggression unparalleled by any act of recorded history, but is a direct step towards the subjugation of the entire South, and the conversion of a free Republic inherited from our fathers, into a military despotism to be established by worse than foreign enemies, on the ruins of the once glorious Constitution of equal rights;

Now, therefore, I, John W. Ellis, Governor of the State of North Carolina, for these extraordinary causes, do hereby issue this my proclamation, notifying and requesting the Senators and Members of the House of Commons of the General Assembly of North Carolina, to meet in special session at the capital in the city of Raleigh, on Wednesday, the 1st day of May. And I furthermore exhort all good citizens throughout the State to be mindful that their first allegiance is due to the sovereignty which protects their homes and dearest interests, as their first service is due for the sacred defence of their hearths, and of the soil which holds the graves of our glorious dead.

United action in defence of the sovereignty of North Carolina, and of the rights of the South, becomes now the duty of all.

Given under my hand and attested by the great seal of the State. Done at the city of Raleigh, the 17th day of April, A. D. 1861, and in the eighty-fifth year of independence.

JOHN W. ELLIS.

A call was also issued by the Governor, for the enrolment of thirty thousand men, to be held in readiness to march at a day's notice.

On the 1st of May the Legislature convened in special session. In his Message, the Governor recommended that, in view of the secession of North Carolina from the Northern Government, and her union with the Confederate States, at as early a period as practicable, a Convention of the people be called with full and final powers. The powers of the Convention should be full because the sovereignty of the people must be frequently resorted to during the war, and it therefore became necessary that it should be temporarily reposed in the Convention. The action of the Convention should be final, because of the importance of a speedy separation from the Northern Government, and the well-known fact that upon this point the people were as a unit.

He also recommended "the raising and organization of ten regiments, to serve during the war, and that appropriate bounties be offered to all persons thus enlisting."

The Governor farther said that the Northern Government was concentrating a large force in the District of Columbia, ostensibly to protect the seat of Government. But such a force cannot be allowed to remain within the limits of Maryland and on the borders of Virginia without seriously endangering the liberties of the people of those States. If they be conquered and overrun, North Carolina would become the next prey for the invaders. Policy, then, as well as sympathy, and a feeling of brotherhood, engendered by a common interest, required them to exert their energies in the defence of Maryland and Virginia. Every battle fought there would be a battle in behalf of North Carolina. The Legislature met at 12 o'clock m., and at 1 p. m. both Houses had unanimously passed a bill calling an unrestricted Convention, whose action was to be final. The election of delegates took place on the 13th of May, and the Convention met on the 20th.

The Legislature unanimously repealed the section of the Revised Code, which required all officers in the State to take an oath to support the Constitution of the United States before entering upon their duties. The act further provided that it should not be lawful to administer any such oath or affirmation to any officer, civil or military.

After a session of eleven days, the Legislature adjourned, to meet again on the 25th of June. Among other measures, it passed a stay law, to take effect immediately, and authorized the Governor to raise ten thousand men, to serve during the war, and also appropriated \$5,000,000 for the use of the State, giving the Treasurer power to issue Treasury notes to the amount of \$500,000, in bills ranging from five cents to two dollars, and with a conditional clause, authorizing the issue of a larger amount if necessary. An act was also passed which thus defined treason:

Treason shall consist only in levying war against this State, or in adhering to its enemies, giving them aid and comfort; or in establishing, without the authority of the General Assembly, any government within its limits separate from the existing Government; or in holding or executing in such usurped government any office, or professing allegiance or fidelity thereto, or assisting the execution of the laws under color of authority from such usurped government; and such treason, if proved by the testimony of two witnesses to the same overt act, or by confession in open Court, shall be punished with death.

The forces of the State, under orders of the Governor, seized the Federal forts on the coast, and took possession of the mint at Charlotte, and the arsenal at Fayetteville, gaining, by the seizure of the latter, 37,000 stand of arms, 3,000 kegs of powder, and an immense supply of shells and shot. Of course, these acts placed the State in the same category with the seceded States, and the ports of North Carolina were, therefore, included in the blockade ordered by the Government.

The State Convention assembled on the 20th of May, the eighty-sixth anniversary of the Mecklenberg Declaration of Independence.

On the 21st the ordinance of secession was passed by the State Convention, as follows:

We, the people of the State of North Carolina, in Convention assembled, do declare and ordain, and it is hereby declared and ordained, that the ordinance adopted by the State of North Carolina, in the Convention of 1789, whereby the Constitution of the United States was ratified and adopted, and also all acts and parts of acts of the General Assembly, ratifying and adopting amendments to the said Constitution, are hereby repealed, rescinded, and abrogated.

We do further declare and ordain that the Union now subsisting between the State of North Carolina and the other States, under the title of the United States of America, is hereby dissolved, and that the State of North Carolina is in the full possession and exercise of all those rights of sovereignty which belong and appertain to a free and independent State.

Done at Raleigh, 20th day of May, in the year of our Lord 1861.

The following ordinance was also passed:

We, the people of North Carolina, in Convention assembled, do declare and ordain, and it is hereby declared and ordained, that the State of North Carolina does hereby assent to and ratify the Constitution for the Provisional Government of the Confederate States of America, adopted at Montgomery, in the State of Alabama, on the 8th of February, 1861, by the Convention of Delegates from the States of South Carolina, Georgia, Florida, Alabama, Mississippi, and Louisiana, and that North Carolina will enter into the federal association of States upon the terms therein proposed, when admitted by the Congress or any competent authority of the Confederate States.

Done at Raleigh, 20th day of May, in the year of our Lord 1861.

Military preparations were immediately commenced, and as early as the 15th of June the State had raised a force of twenty thousand volunteers.

The following delegates to the Confederate Congress were elected by the Convention: For the State at large, W. W. Avery and George Davis; 1st district, W. N. H. Smith; 2d, Thomas Ruffin; 3d, T. D. McDowell; 4th, A. W. Venable; 5th, John M. Morehead; 6th, R.

C. Puryear; 7th, Burton Craige; 8th, A. D. Davidson.

The flag agreed upon for the State was said to be handsome. The ground was a red field, with a single star in the centre. On the upper extreme was the inscription, "May 20, 1775," and at the lower, "May 20, 1861." There were two bars, one of blue and the other of white.

On the 15th of August the Legislature convened in extra session. The stay law of the previous session had been pronounced unconstitutional by the Supreme Court. The Senators elected to the Confederate Congress were George Davis and Wm. T. Dortch. Mr. Davis was one of the delegates at large from the State to the Provisional Congress, having been chosen by the Convention. Mr. Dortch was one of the Commoners from the county of Wayne, and also Speaker of the House of Commons of the State. Mr. Davis belonged to the Whig organization, and Mr. Dortch to the Democratic, in former years.

The sixth ballot in the House of Commons, on the 11th September, was as follows: Dortch 39; Bragg 15; Person 30; Outlaw 7; Avery 22; Davis 13; Clingman 26; Graham 30; Scattering 11.

After a session of forty days, the Legislature adjourned, *sine die*. A militia bill was passed, also an amended stay law, a revenue bill, and also bills for paying the soldiers of the State, providing means to carry on the war. An additional sum of one million in Treasury notes was authorized to be issued.

The Governor now set to work to place the means of coast defence in a satisfactory condition. At the same time troops were sent forward to the Confederate army as fast as they could be equipped. No notice was taken by the Secretary of War of the request for a few well drilled regiments for the coast defence, although the Governor offered fresh levies in their place. The State, like South Carolina and others, was expected to defend herself. The capture of the forts at Hatteras Inlet occasioned intense excitement, and although the work of the expedition extended no farther than to "take and hold" those positions, it revealed such a degree of weakness to resist any naval attack, that it awakened the first serious apprehensions among the people for the cause of the Confederacy.

A Union movement was set on foot soon after the capture of the forts at Hatteras Inlet, by a small number of persons in Hyde County. Although insignificant at first, it nevertheless awakened the apprehensions of the State authorities, which led to its speedy suppression. It was feared that more than half the counties of the State would become Union if the movement was suffered. This movement consisted in a meeting of some citizens of the county on the 12th of October, who passed a series of resolutions, and adopted a declaration of independence of the State Government. On the

18th of November a convention assembled, composed, as it was reported, of delegates and proxies representing forty-five counties of the State. It passed an ordinance declaring vacant all State offices, and appointed a Provisional Governor, &c. An election for members of the Federal Congress was ordered by the Provisional Governor, but the person reported elected was not allowed to take his seat.

In September, when the scarcity of arms began to be known in the Confederate States, a large force was set at work at the armory in Fayetteville to alter the old flint lock guns to percussion. There were several thousand of these guns then remaining in the United States arsenal. When they could not be altered to advantage they were repaired and furnished with new flints, and found to make very serviceable guns. Hall's breech-loading rifles were also altered to carbines, making a good gun for cavalry service. Subsequently, two horizontal high-pressure steam engines were made at Richmond and sent to Fayetteville, when the manufacture of new arms was commenced under the charge of an officer named Burkart, once a master armorer in the United States service.

On the 1st of November the contributions of the State for war purposes had reached the sum of \$2,044,522 96. The records of the passport office at Richmond showed at this time that in the contributions of clothing and money to her troops, the generosity of North Carolina had much exceeded that of wealthier and more populous States.

At this time the State had sent to the seat of war in Virginia, fully armed and equipped, 83,000 volunteer troops, infantry and riflemen,

and a regiment of cavalry, numbering one thousand and ninety-four men. There were six thousand troops on the State coast, and camps of instruction established at Raleigh, Ridgeway, and Gareysburg, and the number of volunteers still offering was so great that General Martin, commander-in-chief of the State forces, under orders of the Governor, issued a proclamation informing the people that no further troops were needed or could be received.

The Representatives from the States to the Confederate Congress were W. N. H. Smith, Robert Bridges, Owen B. Keenan, J. D. MacDowell, Thomas S. Ashe, Archibald Arrington, Robert McLean, William Lander, R. S. Garther, A. S. Davidson.

The commerce of the State during the year was so restricted by the blockade as not to furnish an estimate of any importance. The fact most worthy of notice in the agricultural productions of the State, was a crop of tea, consisting of about ten bushels, raised by Shelly Spencer in Hyde County. It was well spoken of as a beverage.

Battles and Skirmishes in North Carolina in 1861.

Swan's Cry Creek ‡..	Oct. 28

O

OBITUARIES, AMERICAN.—*Jan. 1.*—SONNTAG, AUGUST, an astronomer of Swedish birth, but for some years resident in the United States. He accompanied Dr. Hayes in his Arctic expedition, and while on a journey to endeavor to obtain dogs for the sledges of the expedition, he fell through the ice, and though rescued from drowning, perished from cold in a few hours.

Jan. 4.—KENT, WILLIAM, an American jurist, son of the distinguished Chancellor Kent, born in 1802. He was for many years an eminent lawyer in New York City, and was appointed Judge of the Circuit Court of New York by Gov. Seward. After some years' service he resigned, and accepted the professorship of law in Harvard University, which he did not long hold, but returned to New York, where he was constantly employed as a referee. His residence for some years past has been at Fishkill, where he died.

Jan. 5.—ANTHON, HENRY, D. D., died in New York, aged 69 years. He was a native of New York, and son of G. C. Anthon, Esq., who was a native of Germany, but emigrated

early to this country; brother of Charles Anthon, eminent as a classical scholar, and of John Anthon, distinguished as a lawyer. He entered the ministry in the Protestant Episcopal Church at an early age, and was distinguished for his evangelical sentiments and for his amiable and genial character.

Jan. 5.—WHITE, JOSEPH L., a prominent and enterprising business man, formerly a member of Congress from Indiana, but of late years a resident of New York City, and connected with the enterprise of the Nicaragua Transit Co. He was shot at Nicaragua by an American named Gavitt, and subsequently died of his wounds.

Jan. 10.—HACKLEY, REV. CHARLES W. (*See HACKLEY.*)

Jan. 17.—CHURCH, PHILIP, died at Belvidere, Alleghany Co., N. Y., aged 83. He was a grandson of Gen. Schuyler, and a nephew of

*The Federal gunboats fired upon the Confederate force on shore.

†Shots exchanged with Confederate steamer.

‡Three vessels destroyed.

Alex. Hamilton. He took a deep interest in all public improvements, and was the projector of the Erie Railroad.

Feb. 4.—MURRAY, REV. NICHOLAS, D. D. (See MURRAY.)

Feb. 8.—FRANCIS, JOHN WAKEFIELD, M. D. (See FRANCIS.)

Feb. 11.—ROCKWELL, JOHN ARNOLD, died at Washington, (D. C.), aged 59. He graduated at Yale College in 1822, and in 1837 represented his native State, Connecticut, in Congress. In the recent presidential campaign he was an active friend of Bell and Everett. Of late years he has practised law in Washington, and was employed in the New Almaden Quicksilver Mine cases.

Feb. 13.—WRIGHT, JOHN C. He was a resident of Ohio, and had been a member of Congress from 1823 to 1829. He was selected by Gov. Dennison as one of the commissioners from Ohio to the Peace Congress in Washington in Feb. 1861, and though in his 78th year, accepted the appointment, but was taken sick soon after his arrival in that city and died in about a week. He was much respected and beloved in Ohio.

Feb. 15.—ADAMS CHARLES, died at Burlington, Vt., aged 74 years. He was the historian of the "Patriot War."

Feb. 20.—LAWRENCE, CORNELIUS VAN WYCK, a prominent citizen of New York, born at Flushing, Feb. 28, 1791. He was a Representative in Congress from 1832 to 1834, Mayor of New York from 1834 to 1836, President of the Electoral College in 1836, and for 20 years President of the Bank of the State of New York. In 1856 he retired to his estate in Flushing, where he died.

March 21.—ITURBIDE, MADAME HECATE DE. (See ITURBIDE.)

March 21.—WHITEMORE, REV. THOMAS. (See WHITEMORE.)

March 25.—GIBBS, PROF. JOSIAH WILLARD. (See GIBBS.)

March 26.—ROBBINS, REV. ROYAL, D. D., a native of Connecticut, born in 1788, educated at Yale College, and settled as a Congregational clergyman for nearly 50 years in Kensington parish, in the town of Berlin in that State. Dr. Robbins was a man of high intellectual culture, and was the author of several works of high reputation. His "World Displayed" was a very successful attempt at popularizing the general facts of history, and his "Outlines of History" has long been a popular text-book.

March 30.—SHAW, LEMUEL, Chief Justice of Massachusetts. (See SHAW.)

March 30.—WHITE, DANIEL APPLETON, LL. D., was born at Methuen, Mass., Jan. 7, 1776, and graduated at Harvard in 1797. He commenced the practice of law in Salem, Mass., and was for many years Judge of Probate for Essex Co., and for a term a Representative of that county in Congress. He died in Salem.

April 10.—BUCKINGHAM, HON. JOSEPH T., a distinguished printer, editor, and antiquarian,

born at Mansfield, Conn., Dec. 21, 1779. He learned the printing business at Walpole, N. H., and went to Boston in 1800, where he published successively "The Polyanthos," "Ordeal," "New England Galaxy," and "Boston Courier," editing the last from 1821 to 1848. During this period he also published the "New England Magazine." He published two volumes of "Reminiscences" of his own life and times. He was a member, at different times, of both Houses of the State Legislature, and one of the most eminent laborers for the completion of the Bunker Hill monument.

April 13.—HUMPHREY, HEMAN, D. D., late president of Amherst College, born at Simsbury, Conn., March 26, 1779. He graduated at Yale College in 1805; was pastor of Cong. church in Fairfield, Conn., 1807-17, pastor of Cong. church Pittsfield, Mass., 1817-23; president Amherst College, 1823-45; and resigned and returned to Pittsfield the latter year, where he resided till his death. He was the author of "Tour in France, &c.," 2 vols., "Domestic Education," "Letters to a Son in the Ministry," "Life and Writings of Prof. W. Fiske," "Life, &c., of T. H. Gallaudet," and "Sketches of the History of Revivals."

April 13.—EVANS, DR. JOHN. (See EVANS.)

April 14.—MCLEAN, HON. JOHN. (See MCLEAN.)

April 30.—ONDERDONK, BENJAMIN TREADWELL, D. D. (See ONDERDONK.)

May 24.—ELLSWORTH, COL. E. E. (See ELLSWORTH.)

May 27.—BALLOU, REV. HOSEA, 2d, D. D. He was a native of Massachusetts and a relative of the Rev. Hosea Ballou, distinguished as one of the fathers of Universalism in this country. He was educated at Brown University, and subsequently entered the ministry in the Universalist Church. He early distinguished himself as a preacher and writer, and in 1844 received the honorary degree of D. D. from Harvard University. He was active in the establishment of Tufts College, at Medford, Mass., the principal collegiate institution of his denomination, and in 1853, a year after its organization, was elected its President, which office he filled with decided ability till his death. He edited for several years the "Universalist Quarterly Review."

June 3.—DOUGLAS, STEPHEN ARNOLD. (See DOUGLAS, S. A.)

June 5.—GARLAND, GEN. JOHN. (See GARLAND, JOHN.)

June 10.—GREBLE, JOHN T. (See GREBLE.)

June 10.—WINTHROP, THEODORE. (See WINTHROP.)

June 14.—STRONG, REV. DR., a clergyman of the Reformed Protestant Dutch Church.

June —.—ROORBACH, ORVILLE A., a publisher and bookseller for many years in New York and Charleston. In 1852, he published the Bibliotheca Americana, a work intended to give the title, and, so far as known, the author, publisher, price, and date of publication of every American work published from 1820 to 1852.

June 25.—STORRS, WILLIAM LUCIUS, Chief-Justice of Connecticut. (See STORRS.)

June 26.—PRENTISS, Col. JOHN H., formerly a prominent democratic editor in the State of New York, died at his residence in Coopers-town, aged 77 years. He represented his district in Congress from 1837 to 1841. He was a man of extensive influence, and highly esteemed by the community in which he lived.

June 27.—WARD, Com. JAMES HARMAN. (See WARD.)

July 14.—APPLETON, NATHAN. (See APPLETON.)

July 15.—GARNETT, Gen. ROBERT T. (See GARNETT.)

July 16.—RAWLINGS, T. EDWARD, an artist and reporter for one of the illustrated papers of New York, and a writer of decided ability. He was killed by a party of Confederate soldiers in ambush, near Newport News.

July 21.—BEE, Gen. BERNARD E., a brigadier-general of the Confederate army from South Carolina, killed at the battle of Bull Run.

July 21.—BARTOW, Gen., a brigadier-general of the Confederate army from Georgia, killed at the battle of Bull Run.

July 21.—CAMERON, Col. JAMES, born at Maytown, Lancaster Co., Penn., March 1, 1801. In youth he engaged in various occupations, and at 19 years of age entered the printing office of his brother Simon, at Harrisburg. In 1827 he removed to Lancaster and assumed the editorship of the "Political Sentinel," studying law in the mean time in the office of the late President, James Buchanan. During the Mexican war, he accompanied the volunteers of his State as sutler, in January, 1847. When the present war broke out he was living in retirement upon his estate on the banks of the Susquehanna, but upon urgent entreaty accepted the appointment of colonel of the Seventy-ninth Highland Regiment of the New York State militia, and from his election devoted himself assiduously to the duties of his position. In the battle of Bull Run, when his regiment was driven back before the terrible fire of the enemy, he would lead them up again and again with the shout, "Scots, follow me!" until he fell in the deadly charge.

July 21.—SLOCUM, Col. JOHN S., born in the town of Richmond, R. I., Nov. 1, 1824. At the commencement of the Mexican war he obtained a commission in the army, and at Contreras received the brevet rank of captain for meritorious conduct. At the beginning of the present war Gov. Sprague appointed him colonel, and authorized him to raise a second regiment, which he speedily accomplished and again marched to the seat of war. At the battle of Bull Run his regiment led the advance of the division which crossed Cob Run and reached Bull Run at Sudley's Ford, on the extreme left of the enemy's line. Here he bravely led on his regiment through the woods, and opened

that terrible engagement, but fell almost in the beginning of the action.

July 21.—BALLOU, Major SULLIVAN, of the Second Rhode Island Regiment of Volunteers, killed at the battle of Bull Run. He was born at Smithfield, R. I., March 28, 1829. In 1846 he entered Phillips' Academy at Andover, Mass., and subsequently Brown University. After remaining two years at the latter, he proceeded to the National Law School at Ballston, N. Y. In 1853 he was admitted to the Rhode Island bar, and practised his profession with little interruption in Smithfield and Providence until he left with his regiment for the seat of war. He was clerk of the House of Representatives of Rhode Island during the years 1854, 1855, and 1856, and the following year was Speaker of the House. In 1861 he held the office of Judge Advocate of the Rhode Island militia. He joined the army from a patriotic sense of duty, and his military career, though short, won him distinguished honor.

July 21.—TOWER, Capt. LEVI, killed at the battle of Bull Run. Born in the village of Blackstone, Mass., August 18, 1835. He took a thorough classical course in the University Grammar School in Providence, and in due time entered Brown University, which he was subsequently compelled to leave in consequence of ill health. He was a member of the Pawtucket Light Guard, and with it joined the First Regiment of Rhode Island Volunteers.

July 21.—TILLINGHAST, Capt. OTIS H., born at Homer, Cortland Co., N. Y., March 6, 1823. In 1847 he graduated with honor at the military academy at West Point, and was immediately appointed brevet second lieutenant in the Third Artillery, and joined Sherman's Battery, under Gen. Taylor, at Saltillo, Mexico. In 1848 he was associated with the Mexican Boundary Commission, and in 1856 was appointed regimental quartermaster, and stationed in Florida. Soon after he was ordered to Fort Moultrie, where he remained until about the time of the insurrection. In July, 1861, Lieut. Tillinghast was appointed chief-quartermaster to Gen. McDowell's army, and attached himself to the division commanded by Col. Porter. Though his duties did not require him to take part in the battle, he entered with alacrity into the field, and fell early in the engagement, mortally wounded.

July 22.—KENNEDY, Col. WILLIAM D., commander of the "Tammany" Regiment of N. Y. Volunteers. He was a prominent democrat of New York City, and a man of great energy and ability. He died at Washington of congestion of the brain.

Aug. 4.—TRUMBULL, JOSEPH, ex-Governor of Connecticut, died at Hartford, aged 78 years. He was born in Lebanon, Conn., December 7, 1782, graduated at Yale College in 1801, and was admitted to the bar in Windham in 1803. He settled in Hartford in 1804, and in 1827 retired from the practice of law and

became the President of the Hartford Bank. He represented the town of Hartford repeatedly in the Legislature, was a member of Congress for two terms, from 1838 to 1842, and was elected Governor of the State in 1849.

Aug. 10.—LYON, GEN. NATHANIEL. (See LYON.)

Aug. 14.—MANGUM, WILLIE PERSON. (See MANGUM.)

Aug. 14.—FARNHAM, COL. NOAH L., born at Haddam, Conn., June 6, 1829. At 18 years of age he became a member of the New York "City Guard," and was on active duty at the time of the "Astor Place Riot." In 1857 he was elected second sergeant in the "Seventh Regiment," in which he was a recruit. When the "Seventh" left for Washington, Farnham was acting as first lieutenant, but upon Ellsworth's arrival at Washington with his regiment, he prevailed upon Farnham to accept the office of lieutenant-colonel of the Zouaves, and upon the death of Ellsworth he became colonel. When his regiment received orders to move on to Manassas he was confined to a sick bed, but rose, and, placing himself at the head of his men, hastened to the scene of action. Col. F. fought gallantly, but early in the engagement received a wound in his head, which, in his exhausted state, soon terminated fatally.

Sept. 10.—LOWE, COL. JOHN WILLIAMSON, of the Ohio Volunteers, killed at Carnifex Ferry. He was born in New Brunswick, N. J., Nov. 15, 1809. When the Mexican war broke out, having some military knowledge, and feeling that his country needed his services, he accepted the command of the Fourth Ohio Regiment and went to the seat of war, serving until it was disbanded in 1848. When the rebellion began, he once more offered himself to his country. The Twelfth Regiment was organized and he was unanimously chosen its colonel, and, united to the Cox Brigade, they advanced up the Kanawha River. The only battle necessary to clear the Kanawha valley of the rebels was fought by the Twelfth, under Col. Lowe's command.

Sept. 12.—BRIGGS, GEORGE NIXON. (See BRIGGS.)

Sept. 15.—WASHINGTON, JOHN A., colonel in the Confederate army, shot in a skirmish. He was a collateral descendant of the Washington family, and had been the proprietor of Mount Vernon, but sold it for \$200,000 to the Mount Vernon Association.

Sept. 17.—JOHNSTON, COL., an officer of the Confederate army, killed in battle in Missouri.

Sept. 28.—BROWNELL, J. SHERMAN, a prominent leading politician of New York City, and for some years a judge of the Police Court.

Oct. 5.—BINGHAM, KINSLEY S. (See BINGHAM.)

Oct. 8.—HOUSTON, SAM., Governor of Texas. (See HOUSTON.)

Oct. 8.—IVES, ELI, M. D., an American physician born in New Haven, Feb. 7, 1779. He graduated at Yale College in 1799, was rector

of the Hopkins Grammar School for the next two years, studying his profession meanwhile with his father, who was a physician, and Dr. Eneas Monson, and in 1801 commenced practice with his father. Two or three years later he attended medical lectures at Philadelphia, and received the private instruction of Drs. Rush and Wooster, of that city. His intimacy with Dr. Monson, as well as his own tastes, led him to cultivate the study of medical botany, and he early became more thoroughly familiar with the *Materia Medica*, and especially with our native vegetable remedies, than any physician of the time. In every department of medical study and practice he was a hard student and a keen and careful observer. At an early age he was more extensively called in consulting practice than any physician of his native city, and in the constantly widening circle of his practice, he had the reputation of a remarkably skilful and successful practitioner. In 1813, in connection with Prof. Silliman, he secured the establishment of the medical department of Yale College, and upon its organization became Professor of *Materia Medica*. He filled this chair from 1813 to 1829, when, on the death of Prof. Nathan Smith, he was chosen professor of the theory and practice of medicine, and discharged the duties of that professorship till 1852, when he resigned on account of his advanced age. During the lecture session of 1841-'2, after the resignation of Dr. Tully, he delivered the lectures on theory and practice, and also those on *Materia Medica*. Dr. Ives was greatly honored and esteemed by the members of the medical profession throughout this country and Europe. He was President of the State Medical Society and of the National Medical Association, and received diplomas in abundance from foreign medical and scientific societies. He was active, also, in his advocacy of temperance, education, emancipation, and other causes of active benevolence. He was extremely fond of horticulture, and not only did he have an almost infinite variety of plants and fruits in his own garden, but encouraged others to cultivate fruits and plants. He was the founder and for many years the president of both the Horticultural and Pomological Societies. Rare as his attainments were, he published very little, less than his friends desired. A few essays and pamphlets were all the printed records he left behind him.

Oct. 15.—DUGGAN, PETER PAUL, an American artist born in New York. He early developed a taste for high art, and qualified himself, though very young, for an art professorship in the New York Free Academy soon after its opening. For ten years before his death he had been an invalid, suffering from hemorrhage of the lungs, and had resided for some years in the vicinity of London. In May, 1861, he removed to Paris, and was for a time in better health, but was attacked by an inflammation of the lungs early in October, which soon proved fatal.

Oct. 19.—**WILDEY, THOMAS**, the founder of the order of Odd Fellows in this country, died at his residence in Baltimore. He was a native of England, but came to this country at an early age. He was the first Grand Sire of the Grand Lodge of the United States, serving in that capacity from 1825 to 1833, and received every honor it was in the power of its members to bestow. His funeral, which took place on the 22d, was attended by delegations of the order from all sections of the country which could reach Baltimore in season to participate in the services.

Oct. 20.—**WOODBIDGE, WILLIAM**, ex-Governor of Michigan, died at his residence in Detroit aged 84. He was a native of Connecticut, but had resided in Michigan about 50 years. He was elected Governor of the State in 1840, and in 1842 United States Senator for 6 years. At the close of his senatorial term he returned to his home in Detroit, where he subsequently lived in quiet and retirement. He was a man of many estimable qualities.

Oct. 21.—**BAKER, General EDWARD D.** (*See BAKER.*)

Oct. 22.—**PUTNAM, WILLIAM LOWELL**, a lieutenant of volunteers in the United States army, born in Boston, July 9, 1840, the grandson of Rev. Dr. Charles Lowell and Judge Samuel Putnam, educated partly in France, where he resided from 1851 to 1858, and subsequently trained in law and science in Harvard University; entered the Twentieth Regiment of Massachusetts Volunteers in 1861; was called to the field in Sept., and on the 21st of Oct., at the disastrous battle of Ball's Bluff, received a mortal wound while leading on his battalion to the rescue of a wounded officer. When borne to the hospital tent he declined the surgeon's assistance, bidding him go to those whom his services could benefit, as his life could not be saved. He died from his wound the next day. He was a young man of extraordinary genius, and of most lovely and blameless life, and the vast assembly who gathered in Boston to do honor to his last remains, responded most feelingly to the eloquent and touching portrayal of his character by his pastor, Rev. Dr. Bartol, and Rev. James Freeman Clarke.

Oct. 23.—**DICKENS, ASBURY**, aged 83, for many years Secretary of the Senate of the United States.

Nov. 18.—**CHETWOOD, JOHN J.**, an eminent lawyer of New Jersey, born at Elizabeth, N. J., Jan. 18, 1800. He was a descendant of Judge Chetwood, one of the early judges of the N. J. Supreme Court, and was for 14 years surrogate of Essex Co., the first prosecutor of Union Co., and a member of the Council before the adoption of the present Constitution of the State. He was identified with the great railroad enterprises of New Jersey, and active in the promotion of education and in the support of religious institutions. He was a man of generous and genial disposition. He died at Elizabeth.

Nov. 18.—**SNYDER, Capt. GEORGE W.**, died at

Washington, D. C., aged 28 years. He was born in 1836, in New York. In 1852 he was appointed from the State of New York a cadet in the Military Academy at West Point, where he graduated with high honor, holding the rank of first captain. On leaving the academy he was appointed a second lieutenant of engineers, the highest promotion accessible to a recent graduate. He was attached in 1859 to the board of engineers under the presidency of Col. Thayer, of Boston. In the following year he was acting assistant professor of military and civil engineering at West Point. When trouble was anticipated at Charleston he was sent to that station as first engineer, assistant to Capt. Foster, and through the hardships consequent upon the siege of Fort Sumter, contracted the disease which ultimately proved fatal.

Dec. 10.—**JACKSON, JOHN P.**, Vice-President and Superintendent of the New Jersey Railroad and Transportation Company, died at Newark, N. J., aged 56. Mr. Jackson was connected with that company from its organization to the time of his death. He was educated for the bar and held a high position in the legal profession; was twice elected to the Legislature of the State, and twice elected clerk of the county of Essex, a very lucrative office.

After his connection with the company, he abandoned active participation in the pursuits of political life, and devoted all his energies and talents to its service. He was distinguished for his benevolence and charity, as well as for integrity and honesty of purpose.

Dec. —.—**WILLIAMS, THOMAS SCOTT.** (*See WILLIAMS.*)

Dec. 13.—**WENDELL, JOHN L.**, died at Hartford, Conn. He was a native of New York, born in 1784, and for many years a resident of Albany, and a member of the Albany bar. He was for a long time the reporter of the Supreme Court, and the author of the long series of law reports bearing his name.

Dec. 14.—**WILKINSON, Commodore JESSE**, United States navy, died at his family residence near Norfolk, Va., aged 77 years. He was a native of Virginia, and entered the navy July 10, 1805. He was in the service of the Government fifty-four years and five months.

Dec. 17.—**RUFFNER, Rev. MENY, D. D., LL. D.**, died at his residence in Kanawha, Va., in the 73d year of his age. He was for many years President of Lexington College, Va., and was distinguished for his learning and logical ability. His last published work was a pamphlet issued from the press last autumn, arguing against the continuance of slavery in Virginia.

Dec. 21.—**TURNER, Rev. SAMUEL H., D. D.**, an American clergyman and professor, born in Philadelphia, Jan. 23, 1791. He graduated at the University of Pennsylvania in 1807, studied theology under Bishop White, ordained deacon in 1811, became rector of the Episcopal church at Chestertown, Md., in 1812, left Maryland on account of his health in 1817, and in 1818 was appointed professor of historic theology in the

General Theological Seminary at New York. In 1821 he was appointed professor of Biblical Learning and Interpretation of the Scriptures in the same seminary, and continued to fulfil the duties of these professorships, and, since 1831, the added labors of professor of Hebrew in Columbia College, until his death. He was also the author of a number of commentaries and other works illustrative of the subjects of his instructions, which were highly esteemed for their critical scholarship and their catholic spirit.

Dec. 22.—SCOTT, Rev. WILLIAM M., D. D., professor in the N. W. Theological Seminary of the Presbyterian Church at Chicago, died at Princeton, N. J. He was born in Ohio in 1817, graduated at Jefferson College, Penn., studied law in Kentucky for a year, and then entered Princeton Theological Seminary, where he graduated in 1846. In 1847 he was elected professor of languages in Centre College, Danville, Ky., and subsequently pastor of the First Presbyterian church in that place. In 1856 he was called to the pastorate of the Seventh Presbyterian church in Cincinnati, and on the organization of the new Theological Seminary in the Northwest in 1859, was chosen by the General Assembly one of its professors.

Dec. 26.—COCKE, Gen. PHILIP ST. GEORGE, an officer of the Confederate army, died in Richmond, Va., aged 53 years. Holding the State rights views of some of the leading men of Virginia, at the commencement of the present war he volunteered his services in the Confederate army of the Upper Potomac, and served as captain, colonel, and general. Upon the field of Bull Run he was commander of the Fifth Confederate Brigade. After a campaign of eight months he returned to his home, shattered both in mind and body, and in a paroxysm of insanity put an end to his life.

Dec. 26.—VAN WYCK, THEODORE C., an eminent New York physician, died at his residence in Bloomingburgh, N. Y., aged 74 years.

Dec. 27.—McCLURE, WILLIAM B., a distinguished Pennsylvanian jurist, born at Carlisle, but removed to Pittsburgh, where he died. For ten years past he had been President Judge of the Court of Common Pleas and Quarter Sessions of Alleghany Co., Penn. Few men in the State were more widely known or respected.

Dec. 28.—LEGRAND, JOHN C., late Chief Justice of Maryland, died in Baltimore.

—RUSSELL, DAVID, a native of Massachusetts, died at his residence in Salem, Washington County, N. Y., in the 81st year of his age. He was appointed District Attorney of the northern district of the State in 1814, and was elected to the Assembly the next year, and subsequently reelected. He was a member of the Twenty-fourth, Twenty-fifth, and Twenty-sixth Congresses, where, during several sessions, he was Chairman of the Committee of Claims, and has fulfilled many other important public trusts.

—SCRANTON, GEORGE W., died at his residence in Scranton, Luzerne County, Penn., aged about 50. He was a native of Madison, Connecticut, but removed to New Jersey and afterwards to Pennsylvania, engaging in his business of iron manufacturer in the heart of the coal and iron region, where a large town has grown up which will perpetuate his name. In 1858 he was elected to Congress by a large majority, and being reelected in 1860, served until his death.

—WATMOUGH, JOHN G., died at his residence in Philadelphia. He was born in Delaware Dec 6, 1793, and educated at the University of Pennsylvania. He served in the army as a lieutenant of artillery in the war of 1812-14, and was wounded at the battle of Erie. He afterwards served as aid to General Gaines, whom he accompanied to the Southern frontier. In 1830 he was elected to Congress, and served for two terms as the representative of the then third district of Pennsylvania. He was subsequently high sheriff of Philadelphia City and County, and surveyor of the port in 1841.

—TILTON, Commander EDWARD G., of the United States navy, died in Washington. He entered the service in 1822 as a midshipman, and was commissioned as a commander in 1853. His last cruise was in command of the sloop-of-war *Saratoga*, in the home squadron, from which he returned in April, 1857. Subsequently, he was assigned to duty as a member of the Light-house Board, in which capacity he was engaged at the time of his death.

—MAY, WILLIAM, commander of the United States navy, died at his home in Maryland, aged 46 years. He was a native of Washington, D. C. In May, 1831, he entered the navy. He was an officer of the exploring expedition to the South Sea, and was wrecked at the Navigator Islands while surveying its dangerous reefs, narrowly escaping with his life. Com. May was engaged in the battle with the *Fiji Islanders* after the murder of our seamen and navy officers. He was the executive officer of the brig *Porpoise* during the Mexican war, and saved the vessel, when thrown upon its beam ends by a violent storm off Vera Cruz. He was at the capture of *Tobasco* by Com. Perry in the Mexican war, and from his wounds, received at that time, never entirely recovered. His last cruise was as first lieutenant of the frigate *Congress*, and through his arduous duties in midwinter he contracted a fatal disease of the lungs.

—CONDUCT, SILAS, died in Newark, N. J., aged 84. He held, during the course of his life, numerous offices of importance, having been a member of the State Legislature, a Representative in Congress from 1831 to 1833, and a member of the Convention which formed the present Constitution of New Jersey, and an elector on the Fillmore ticket in 1856. He was a man of unblemished private character.

OBITUARIES, FOREIGN.—*Jan. 1.*—FREDERICK WILLIAM IV. (*See* FREDERICK WILLIAM IV.)

Jan. 3.—BERTHOLD, ARNOLD ADOLPH, a German naturalist, born Feb. 26, 1803, at Soest, in Westphalia. He was professor at Göttingen, councillor royal of the Court of Hanover, and author of numerous works on natural history.

Jan. 4.—BAUR, FERD. CHRISTIAN. (*See* BAUR, F. C.)

Jan. 4.—FAIRBAIRN, SIR PETER, C. E., born at Kelso, Scotland, in 1799; was a distinguished civil engineer, a magistrate for Leeds, and mayor for that city in 1858–9, during the queen's visit, on which occasion he was knighted.

Jan. 6.—PYPER, DR. W, a distinguished professor in the University of St. Andrews, Scotland.

Jan. 13.—COUNT MONTEMOLIN, DON CARLOS LUIS MARIA FERNANDO DE BOURBON, prince of Asturia, born Jan. 31, 1818, at Madrid, son of Don Carlos and the Portuguese Princess Maria Francisca d'Assis. He attempted, but unsuccessfully, in April, 1860, to overthrow the Government of Spain, to the throne of which he pretended, on the ground of his father's claims. Defeated in this effort, and compelled to leave Spain, he and his brother, who had been associated with him, made a public retraction at Cologne, in June, 1860. The count and his countess died at Trieste, within two days of each other.

Jan. 13.—JOHN ELPHINSTONE FLEMING, Baron Elphinstone, of the county of Stirling, Scotland, a lieutenant-colonel in the English army, born Dec. 11, 1819, succeeded his first cousin, Baron Elphinstone of Elphinstone, in the peerage of Scotland, July 19, 1860.

Jan. 14.—JODELL, SIR RICHARD PAUL, born in Marylebone, 1781, graduated at Magdalen College, Oxford, 1804; was called to the bar at Lincoln's Inn, 1803; was deputy-lieutenant of Derbyshire and of Norfolk.

Jan. 14.—MONTEZ, LOLA, MARIA DOLORES PORRIS Y MONTEZ, Countess of Landsfeld, a woman of remarkable career and adventures, born in Limerick, Ireland, in 1824, died in New York. She was partially educated in England; when very young married an officer named James, who took her to India, but, treating her cruelly, she left him and returned to England. In 1840 she appeared as a dancer at a theatre in Paris, became the mistress of Dujarrier, editor of the *Presse*, and, after his death in a duel, appeared as a witness in the trial which ensued; found her way to Munich; appeared as a *danceuse*, and fascinated King Louis, over whom she exerted a powerful influence, occasioning the overthrow of his ministry. The king, in 1846, made her Countess of Landsfeld, but she soon became involved in difficulties, and was obliged to leave the country. She next went to England and married an Englishman by the name of Heald, but her first husband being alive, she was prosecuted for bigamy, and es-

caped to Spain. In 1850, James and Heald having both deceased, she was freed from the danger of prosecution. In 1852 she came to the United States, and performed in the Eastern States, and subsequently in California and Australia, as a dancer, and on her return to the United States and England, lectured on a variety of subjects. In 1859 she came again to New York, and soon after was affected with partial paralysis. She was the author of three works of no great ability.

Jan. 17.—EXETER, Very Rev. THOMAS HENRY LOWE, Dean of, born Dec. 21, 1781, graduated at Oxford, appointed Dean of Exeter in 1839.

Jan. 17.—SCOVELL, Gen. SIR GEORGE, born in London, 1774; entered the army in 1798; received a cross and clasp for his services at Vittoria, Pyrenees, Nivelle, Nive, and Toulouse; was at Waterloo, for his services at which battle he received the order of St. Vladimir, 4th class; was appointed Governor of the Military College at Sandhurst, 1837, resigned in 1856; was colonel of the Fourth Dragoons from 1848 to his death; received the rank of general in 1854.

Jan. 20.—PARSONS, Rear-Admiral ROBERT W., born in 1783.

Jan. 21.—HALL, SIR JOHN, born at Stannington, Yorkshire, 1779; was appointed, in 1807, consul and agent for the maritime seignior of Papenburg and East Friesland. In 1809 was made chairman for regulating convoys, and for the protection of British commerce and navigation to and from the ports between the Elbe and Calais; in 1816 appointed consul-general for Hanover in the United Kingdom; in 1817 was high sheriff of Essex; was a deputy-lieutenant and magistrate of Middlesex and of Essex; honorary treasurer and secretary of the Society of London Merchants, and secretary to the St. Katharine's Dock Company.

Jan. 21.—PLAYFAIR, SIR HUGH LYON, born at Meikle, Angusshire, 1786; educated at the Dundee Grammar School, University of St. Andrews, and at Woolwich; served for several years as an officer of the Bengal Artillery, which corps he entered in 1805; retired from the service in 1834; was provost of St. Andrews from 1842 until his death.

Jan. 21.—RADFORD, Rear-Admiral SAMUEL, born in 1784.

Jan. 21.—CHAPPELL, Rear-Admiral SIR EDWARD, born August 10, 1792.

Jan. 22.—TIEDEMANN, FRIEDRICH, an eminent German physiologist and anatomist, born in Hesse Cassel, Aug. 23, 1781, died at Munich.

Jan. 23.—LINDSAY, THOMAS, an English landscape painter in water colors, born in 1793.

Jan. 24.—MÜLLER, HIERONYMUS, a German classical scholar and writer on education, born June 7, 1785.

Jan. 24.—WELSH, Gen. JAMES, an officer of the Indian army, born in 1774, promoted general in 1854.

Jan. 25.—LE BAS, Rev. C. W., formerly principal of Haileybury College.

Jan. 29.—GORE, Mrs. CATHARINE GRACE, (FRANCIS), an English authoress, born in 1799 in Nottinghamshire. She received a superior education, but did not commence her career as writer till 1822, the year of her marriage to Capt. Charles Gore. Her first work, "Therese Marchmont, or the Maid of Honor," is said to have been written in a week. In 1824 this was followed by "The Bond," in 1827 by the "Lettre de Cachet," in 1828 by the "Hungarian Tales," and in 1830 by "Women as they are," and "Mothers and Daughters." Within the following thirty years she published more than fifty distinct works, all, with four or five exceptions, either novels or dramas, and most of them possessing superior merit. The best of her works are "Women as they are," "Mrs. Armytage, or Female Domination," "The Woman of the World," "Cecil, or the Adventures of a Coxcomb," "Greville, or a Season in Paris," "The Banker's Wife," "Self," and "The Queen of Denmark."

Jan. 29.—GUILFORD, Rev. FRANCIS NORTH, Earl of, born 1772; educated at St. Mary Hall, Oxford, where he graduated 1797; was rector of Alresford and St. Mary's, Southampton; was master of St. Cross hospital, Winchester, from 1808 to the time of his death.

Jan. 30.—BURFORD, ROBERT, an English painter, the introducer of panoramas, born 1792.

Jan. 30.—PICKERSGILL, H. W., R. A., an eminent English portrait painter.

Feb. 5.—DE LA MOTTE, Gen. PETER, C. B., born 1781, made Companion of the Bath, 1831; general in the Indian army, 1860.

Feb. 6.—OWEN, Sir JOHN, born at Pembroke about 1776; was called to the bar at the Inner Temple, 1800; was lord-lieutenant of Pembroke, and governor of Milford Haven; was M. P. for Pembrokeshire from 1806 to 1841, and sat for the Pembroke district from 1841 to the time of his death.

Feb. 9.—MUNDY, Admiral Sir GEORGE, born at Shipley Hall, in the parish of Heanor, Derbyshire, 1777; became admiral of the red in 1857; served at the taking of Corsica, and distinguished himself in the battles of St. Vincent, the Nile, &c.; represented Boroughbridge in parliament from 1819 to 1831.

Feb. 9.—DANBY, FRANCIS, A. R. A., an eminent English historical painter, born near Wexford, Nov. 16, 1793. His paintings rank among the best in their class of the painters of our time. He died at Exmouth.

Feb. 10.—DONALDSON, JOHN WILLIAM, D. D., an English philologist born in 1811; was for many years head master of the Grammar School of Bury St. Edmunds, and subsequently removed to Cambridge, where he acted as private tutor. He was the author of "The New Cratylus," "Varronianus," &c.

Feb. 12.—LESLIE, Lieutenant-General JOHN, an English army officer, born in 1790; attained the rank of lieutenant-general, 1858.

Feb. 13.—ATCHINSON, Vice-Admiral ROBERT, an English navy officer born in 1797.

Feb. 16.—CLERKE, Sir WILLIAM HENRY, born in London, 1793; high sheriff of Flintshire, 1848; entered the army in 1811; served with the Fifty-second in the Peninsula, and was also at Waterloo; retired from the army with the brevet of major in 1858.

Feb. 16.—BURNETT, Sir WILLIAM, M. D., K. C. B., K. C. H., born at Montrose, Scotland, in 1779; entered the navy as assistant-surgeon in 1795; was promoted to the rank of surgeon in 1799; appointed physician and inspector of hospitals to the Mediterranean fleet in 1810; became medical commissioner of the navy in 1822, and in 1832 was appointed director-general of the medical department of the navy, which post he held till his death. He was physician in ordinary to William IV. He served in the Goliath, 74, in the battles of Cape St. Vincent and the Nile; and in the Defiance in the action off Ferrol and in the battle of Trafalgar, and received four war medals for his meritorious conduct in these battles.

Feb. 18.—MÜGGE, THEODORE, a German novelist and editor, born at Berlin, Nov. 8, 1806. He was the founder and for 12 years editor of the *National Zeitung* or *Gazette*. He was the author of twenty-four or five novels, one of which, *Afraga*, was well known in this country.

Feb. 20.—DYSON, Gen. JERRY F., an officer of the East Indian army.

Feb. 20.—Ogilvy, Sir WILLIAM, born 1810; claimed the baronetcy of Banff, a Scotch peerage created in 1642, and dormant since the death of William, eighth baron, in 1808.

Feb. 20.—SCRIBE, EUGÈNE. (See SCRIBE, EUGÈNE.)

Feb. 21.—HEIDEGGER, KARL WILHELM, a distinguished Bavarian general, died at Munich at the age of 73 years.

Feb. 21.—MODENA, GUSTAVO, an Italian sculptor, died at Turin, aged 58 years.

Feb. 22.—BRAYBROOKE, RICHARD CORNWALLIS NEVILLE, fourth Baron of, born March 17, 1820, educated at Cambridge, and prosecuted with great zeal archæological investigations, for which he inherited a strong predilection from his father. He was hereditary visitor of Magdalene College, Cambridge, and high steward of Wokingham.

Feb. 27.—ARENBERG, PROSPER LUDWIG, Duke of, born at Schlosser, in Hennegau, April 23, 1785, died at Brussels.

Feb. 27.—RIETSCHEL, ERNST, an eminent German sculptor, born in Pulsnitz, Saxony, Dec. 15, 1804. He entered the Academy of Arts in Dresden in 1820, and after a brief course of study executed a statue of Neptune, which was reproduced in iron and excited general admiration. In 1826 he repaired to Berlin and became a student under Rauch, and in 1827 the Saxon Government furnished him the means of visiting Italy. After a year's sojourn there, he returned to Dresden and executed a colossal statue of Frederic Augustus II.,

king of Saxony. In 1832 he was appointed professor in the Dresden Academy. Since that time he has produced numerous statues and groups of high merit, and has received titles and orders in abundance from most of the crowned heads of Europe. His "Mary weeping over the body of Christ," "Love taming a Panther," "Love borne by a Panther," and "The Four Hours of the Day," are his most celebrated works.

Feb. 28.—CROSS, JOHN, an English historical painter.

Feb. 28.—COUPER, SIR GEORGE, born 1788; was principal equerry and comptroller of the household to the Duchess of Kent; accompanied the Earl of Durham to Canada in 1838; attained the rank of colonel in the army in 1837.

Feb. 28.—SUTHERLAND, GEORGE GRANVILLE SUTHERLAND LEVESON GOWER, Duke of, born Aug. 8, 1786, in London. The duke was from one of the oldest families of Scotland, which had been raised to the peerage in 1703, under the title of the barons of Gower. In his youth he was known as Lord Gower Stafford, and under that title was educated at Oxford, from which university he received, in 1841, the honorary degree of D. C. L. From 1815 to 1820 he held a seat in the House of Commons, and in 1826, during the lifetime of his father, was called to the House of Lords as Baron Gower, and succeeded his father in the dukedom in 1833, and his mother in the titles of Earl Gower and Baron Strathnaver in 1839. He was lord-lieutenant and keeper of the rolls of Shropshire till 1845, when he resigned; lord-lieutenant of Sutherlandshire till his death. He was a liberal patron of science and literature, and President of the British Institution and of Kings College Hospital for many years. In 1841 he was created Chevalier of the Garter. On his vast estates in Scotland he had introduced all the improvements of the age in agriculture, and was especially distinguished among agriculturists for his efforts to improve the breeds of his cattle and sheep.

March 3.—BISCHOFF, CHRISTIAN HENRY ERNST, a German medical professor and author, born at Hanover, Sept. 14, 1781, died at Bonn.

March 4.—CHYZANOWSKI, ADALBERT, an exiled Polish general, died at Paris aged 72 years; born in the palatinate of Cracow, was educated in the military school at Warsaw, and served as an artillery officer of the French army in most of Napoleon's great battles. On his return to his own country he was appointed lieutenant in the new Polish army, and attached for eight years to the staff of the Russian General d'Auveray. In 1828 he was on the staff of Gen. Diebitsch in the Turkish campaign of that and the following year; distinguished himself at Varna, and was sent to announce the peace to the Grand Duke Constantine at Warsaw. In 1830 he joined in the revolutionary movement, commanded the fortress of Mödlin, and was afterwards made chief of the general staff by

Skryznecki, the Polish generalissimo. He defended the passes of Wierpz against the Russians; defeated Gen. Thiemann at Kotz; checked the advance of Rudiger in Podolia; won the battle of Minsk, July 14, 1831, and made a masterly retreat from Zamosk to Warsaw. For his services he was made general of division, but having lost his confidence in the success of the revolution, he was suspected of sympathy with the Russians, and while Governor of Warsaw took such measures as paralyzed the defence of the city by the Poles. After the entry of the Russians into Warsaw he continued to reside there unmolested for several months, and finally went to Paris, where he was received with disfavor by the Polish emigrants. He lived in obscurity until 1849, when he was called to Italy by Charles Albert and intrusted with the re-organization of the Piedmontese army, but was again suspected of treason, though not punished, for the defeat at Novara, which was believed to have been partially caused by his misconduct. In May, 1850, he left Turin and renounced the rest of his life in Paris.

March 4.—MADRAS, Right Rev. THOMAS DEALTRY, third Bishop of; born at Knottingley, near Pontefract, 1795; graduated at Catharine Hall, Cambridge, in 1828; created archdeacon of Calcutta in 1835; and held that office until consecrated Bishop of Madras, 1849; had published sermons on various occasions.

March 9.—MACLAINE, SIR ARCHIBALD, born 1783; entered the army in 1795; served in several important battles and at the capture of Seville; was knighted for his defence of Fort Matagorda for 55 days with only 155 men against Marshal Soult, who had a force of 8,000 men under his command; received the Order of Charles III. of Spain in 1816; became general in the army in 1855.

March 11.—LOVELL, Gen. SIR LOVELL BENJAMIN, entered the army in 1805; attained the rank of major-general in 1854; was appointed colonel of the Twelfth Dragoons 1856; served at the taking of Monte Video, and subsequently in the peninsula, including ten general actions, forty minor affairs, and seven sieges.

March 14.—PROCTER, Admiral SIR WILLIAM BEAUCHAMP, an officer of the British navy, born at Langley Park, Eng., Oct. 14, 1781; succeeded his father as baronet in 1827; served in the expedition to Egypt; was at the bombardment of Havre in 1804; in the naval campaign of 1808 in the East Indies, and attained the rank of admiral in 1857.

March 15.—LILFORD, THOMAS ATHERTON POWYS, third Baron of, born Dec. 2, 1801; succeeded his father in 1825; educated at Christ Church, Oxford; was a lord in waiting to the queen; resigned Sept. 1841.

March 16.—KENT, DUCHESS OF. (See KENT.)

March 19.—HAY, SIR JAMES DALRYMPLE, born at Dunragit, Scotland, 1789; was a deputy-lieutenant of Wigtonshire.

March 19.—PYM, SIR WILLIAM, born at Pinley, Warwickshire, 1776; served in the Thirty-

fifth and Seventieth regiments and in a light infantry battalion in the West Indies during the expedition under Sir Charles Grey, and on the staff in Gibraltar, Malta, and Sicily; was appointed inspector-general of army hospitals in 1816; was knighted by William IV. on his return from Gibraltar in 1823, where he had volunteered his services during the prevalence of a destructive fever; was the author of a treatise on yellow fever.

March 22.—VERNON, GEN. HENRY CHARLES EDWARD, an English officer of engineers, born Sept. 28, 1779; made Companion of the Order of the Bath in 1831, and attained the rank of general in 1859.

March 28.—STAUDIGL, JOSEPH, eminent as a bass singer, born in 1807. He had also distinguished himself as a painter and chemist. He died in the lunatic asylum in Vienna.

March 31.—BARRINGTON, SIR MATTHEW, an Irish baronet, born in Limerick, Ireland, May 21, 1788; was crown solicitor for the province of Munster from 1832 to the time of his death.

March 31.—BURY, LADY CHARLOTTE, an English authoress, born in 1775. She was the daughter of the fifth Duke of Argyll. Her first husband was Colonel John Campbell, to whom she was united in 1796, and who died in 1809. In 1818 she married Rev. Edward John Bury, who died in 1832. It was not until her second widowhood that she commenced writing to any considerable extent for the press. Her principal works, all of which have met with remarkable success, and have mostly been translated into French and German, are: "Marriage in High Life," 1836; "Memoirs of a Peeress, or the Days of Fox," 1837; "The Divorced," 1837; "Love," 1838; "Family Records," 1841, &c., &c.

April 2.—TAYLOR, J. J., an English civil engineer, born in 1804.

April 4.—ANDERSON, SIR JAMES CALEB, born in Waterford, Ireland, July 21, 1792.

April 4.—KOLOWRAT, LIEBSTENSKY, FRANZ ANTON, Duke of, an Austrian statesman, born in Prague, Jan. 31, 1778. In the early part of this century he was a prominent nobleman and officer of the Government in Bohemia, and founded, in 1818, the Bohemian National Museum at Prague. In 1826 he was called to Vienna, where he became a Minister in the Metternich Cabinet, and was active in the promotion of education in the empire for many years. His library of 40,000 volumes he bequeathed to the Bohemian National Museum with an endowment for its preservation and increase.

April 4.—ROBERTSON, Rear-Admiral WILLIAM, an officer of the English navy born in 1786, entered the service in 1803; attained the rank of rear-admiral in 1857.

April 10.—VICAT, LOUIS JOSEPH. (See VICAT, L. J.)

April 12.—BERWICK, RICHARD NOEL, NOEL HILL, fifth baron, born at Betton, Salop, Eng., Nov. 21, 1800; educated at Rugby.

April 14.—APLIN, Vice-Admiral JOHN G., an officer of the English navy, born 23d April, 1790, entered the service in 1801; attained the rank of vice-admiral in 1860.

April 19.—PASLEY, GEN. SIR CHARLES WILLIAM, born 1780; entered the army as second-lieutenant in the artillery, 1797; changed to the engineers, 1798; served at the defence of Gaeta, 1806; at the battle of Maida, at the siege of Copenhagen, and at Corunna; was twice wounded before Flushing, in 1809; was chief engineer in the Marquis of Huntly's division; became a lieutenant-general in 1851, and colonel commandant of royal engineers, Dec. 1853; created D. C. L., Oxford, 1844; received the peninsular medal; was inspector-general of railways; invented some improvements in pontoon bridges, and was the author of a treatise on "Military Instruction," and "An Essay on the Military Policy and Institutions of the British Empire."

April 19.—REPINGTON, GEN. CHARLES A. A. COURT, C. B., an officer of the British army, born 17th June, 1785; entered the service in 1801; made Companion of the Order of the Bath in 1831; obtained the rank of general in 1856.

April 22.—BAKER, MISS ANNE ELIZABETH, an English topographer and archæologist, born in 1787.

April 23.—CUBBON, Lieutenant-General SIR MARK, an officer in the East India Company's service; created knight in 1856; was lieutenant-general in the Indian army, and commissioner for the government of the Mysore.

April 24.—WILLIAMSON, SIR HEDWORTH, born at Whitburn, Nov. 1, 1797; succeeded his father as baronet in 1810; was educated at St. John's College, Cambridge, where he graduated M. A.; in 1819 was deputy-lieutenant of Durham; was elected mayor of Sunderland for 1841-'2, and again for 1847-'8, and member of parliament for Sunderland from 1847 to 1852.

April 28.—SHAW, Lieut.-Gen. SAMUEL, an officer of the East Indian army, born in 1786; entered the service in 1804 in the presidency of Bengal; obtained the rank of lieutenant-general in 1859.

May 2.—JACKSON, SIR GEORGE, born in 1785; was attached to the mission at Berlin in 1802; made secretary of legation there, 1806; secretary to special mission to Spain, 1808; secretary of legation at Berlin, 1813; commissioner at Washington, 1823; commissary judge at Sierra Leone, 1828; and subsequently in the same capacity at Rio de Janeiro, Surinam, and Loanda.

May 6.—BRETT, Major-General RICHARD R. W., an officer in the British army, born in 1798; entered the service in 1813; became major-general in 1858.

May 8.—SCOTT, Rear-Admiral EDWARD H., an officer in the British navy, born in 1788; entered the service in 1798; attained the rank of rear-admiral in 1857.

May 8.—TELEKI COUNT LADISLAS, or LÁSZLÓ, a Hungarian patriot, born in Pesth, Feb. 11, 1811, committed suicide in the same city at the above date. He was educated at Pesth and Patak, and gained a high reputation as a writer and scholar. In 1843 he commenced his political career, and soon took strong ground for Hungarian independence. In 1848 he was sent as envoy of the Hungarian Government to Paris to urge the recognition of the Hungarian nationality. The close of the war found him an exile, under sentence of death. He resided abroad for 11 years, but visiting Dresden in 1860, he was arrested by the Saxon police and delivered to the Austrian Government, but conditionally pardoned by the emperor, Franz Joseph. He entered the Hungarian Diet in April, 1861, and commenced his opposition to the emperor anew, but probably his scruples of honor concerning his pledged word of honor to the emperor induced his suicide.

May 9.—HUNTER, REV. JOSEPH, an English archaeologist, born in 1783.

May 14.—BEDFORD, FRANCIS RUSSELL, seventh Duke of, born May 13, 1788; succeeded his father in 1839; graduated at Trinity College, Cambridge, 1808; was summoned to the House of Lords as Baron of Howland in 1832; was previously a member of the House of Commons; appointed special deputy-warden of the stannaries, 1852; was elder brother of Earl Russell, late Lord John.

May 16.—HENSLOW, REV. J. S., professor of botany in Cambridge University, born in 1796.

May 18.—AMMEN, FRIEDRICH AUGUST VON, physician in chief to the king of Saxony, and a distinguished medical writer, born at Göttingen, Sept. 20, 1799, died at Dresden.

May 21.—ORLOFF, PRINCE ALEXIS FEODOROVITSH. (See ORLOFF.)

May 23.—CARDWELL, EDWARD, principal of St. Alban's Hall, Oxford, and Camden professor of ancient history in that university, born in 1788.

May 26.—MOORSOM, VICE-ADMIRAL CONSTANTINE R., an officer of the British navy, born Sept. 22, 1792; entered the service in 1809; attained the rank of vice-admiral in 1857.

May 29.—MACLEAN, SIR GEORGE, born at Dysart, Fifeshire, Scotland, 1795; educated at Edinburgh; entered the commissariat service, 1812, serving in the Peninsula and south of France until the close of the campaigns of 1813 to '14; was subsequently employed in Canada, the West Indies, and Africa; was made a commissary-general in 1849; served in that capacity during the Kaffir war of 1852, and subsequently at Constantinople and in the Crimea, for which services he was created K. C. B., and Commander of the Sardinian order of St. Maurice and St. Lazarus.

May 30.—GORTCHAKOFF, PRINCE MIHAIL. (See GORTCHAKOFF.)

June 3.—DUNDAS, HON. SIR RICHARD SAUNDERS, an English vice-admiral, born at Melville

Castle, April 11, 1802; educated at Harrow, and at the royal naval college, Portsmouth; entered the navy in 1815; became vice-admiral of the blue in 1858; was private secretary to his father, Viscount Melville, when first lord of the admiralty in 1828-30, and to the Earl of Haddington when in the same office, 1845-'6; was engaged in the early part of the Chinese war in 1841, and was created C. B. for his services; was superintendent of Deptford dockyard in 1851-'2; lord of the admiralty for 1852 to 1855, when he was appointed commander-in-chief of the Baltic fleet, and in that capacity attacked and captured Sweaborg; lord of the admiralty in 1857; created K. C. B. after the close of the Russian war, and received the honorary degree of D. C. L. from Oxford, and the grand cross of the Legion of Honor from the French emperor.

June 3.—STEWART, ADMIRAL JAMES P., an officer of the British army, born about 1786; entered the navy in 1797; made C. B. in 1815; attained the rank of rear-admiral in 1860—admiral in 1861.

June 12.—LARPENT, SIR ALBERT JOHN DE HÔCHEPIED, born at East Sheen, Surrey, March 18, 1816; succeeded his father in 1855.

June 14.—BISHOP, GEORGE, an English astronomer, born in 1784.

June 14.—CAVOUR, COUNT. (See CAVOUR.)

June 17.—CONRADY, JOHANN WILHELM HEINRICH, professor of medicine at Göttingen, born at Marburg, Sept. 22, 1780, died at Göttingen.

June 18.—HODGKINSON, EATON, an eminent English civil engineer, born in 1789.

June 19.—DE ROS, REAR-ADMIRAL JOHN FREDERICK FITZ-GERALD, born March 6, 1804; became a rear-admiral in 1857; published a volume of "Travels in the United States."

June 19.—LEIGH, SAMUEL SOTHEBY, an English antiquarian, virtuoso, and author, born in 1806. He published, just before his death, "Rambles in Elucidation of the Autograph of John Milton."

June 21.—PELHAM, REAR-ADMIRAL FREDERICK THOMAS, born 1808; was private secretary to the first lord of the admiralty in 1852; commanded the Blenheim, 60 guns, in the expedition to the Baltic, 1854; was naval aide-de-camp to the queen from 1856 to 1858; a lord of the admiralty from Nov. 1857 to March 1858; became rear-admiral of the blue in 1858.

June 21.—PRELLER, LUDWIG, a German archaeologist and classical critic born at Hamburg, Sept. 15, 1809; died at Weimar.

June 23.—CAMPBELL, JOHN LORD. (See CAMPBELL.)

June 24.—ABINGER, ROBERT CAMPBELL SCARLETT, second baron, born at Abinger Hall, county of Surrey, Eng., Sept. 5, 1794; studied and practised law; in 1844 succeeded his father, Sir James Scarlett, Baron of the Exchequer, and first Lord Abinger. In Dec., 1858, was appointed British Minister at Florence, but

on the annexation of Tuscany to the kingdom of Italy, in 1861, returned to England. He has been succeeded by his son William Frederick Scarlett.

June 25.—**ABDUL MEDJID KHAN.** (See **ABDUL MEDJID.**)

June 28.—**PATTERSON, Right Hon. Sir John,** born at Coney-Weston, Suffolk, 1790; was educated at King's College, Cambridge; graduated 1813; called to the bar at the Middle Temple, 1821; was one of the Judges of the Court of King's Bench from 1830 to 1852; was knighted on his appointment, and made a privy councillor on resigning.

June 29.—**BROWNING, ELIZABETH BARRETT.** (See **BROWNING, E. B.**)

July 4.—**GRAINGER, RICHARD,** an English architect, born in 1798.

July 6.—**PALGRAVE, Sir Francis,** born in London in 1788; was called to the bar at the Inner Temple, 1827; was deputy-keeper of Her Majesty's records, and was one of the municipal corporation commissioners; received the honor of knighthood for his general services, and his attention to constitutional and parliamentary literature. He was originally a Jew, and bore the name of Cohen, but on becoming a Christian, he petitioned for and received liberty to change his name to Palgrave.

July 6.—**IBBETSON, Sir Charles Henry,** born July 14, 1814; was a cornet in the Yorkshire Hussars; was appointed captain of the Fifth West York militia in 1834.

July 13.—**THOMAS, Sir Godfrey John,** an English baronet, born June 16, 1824, at Bodiam, Sussex; succeeded to the baronetcy in 1852.

July 15.—**WILLS, Mrs.,** an English female painter of celebrity.

July 15.—**CZARTORYSKI, Prince Adam.** (See **CZARTORYSKI.**)

July 20.—**NITZSCH, Gregory Wilhelm,** a German philologist born in Wittenberg, Nov. 22, 1790; died at Leipsic.

July 21.—**D'EYN COURT, Right Hon. Charles Tennyson,** born July 20, 1784. He was a member of the queen's privy council from 1832.

July 22.—**HARRIS, Lieut.-Gen. Joseph,** an officer of the East Indian army, born in 1780; entered the service in 1803; attained the rank of lieutenant-general in 1859.

July 23.—**MELVILLE, Sir James Cosmo, K. C. B.,** an English baronet born at Guernsey, June 8, 1792; entered the civil service of the East India Company in Feb. 1808; appointed auditor of India accounts in 1824; financial secretary to the East India Company, 1834, and secretary to that body in 1836; retired in 1858; received the Order of the Bath for his services; was made commissioner of lieutenant for the city of London in 1849.

July 26.—**PRÉNY, Dr.,** an African explorer, died of fever in E. Central Africa about the latitude of 3° 40' N., while endeavoring to find the sources of the White Nile.

July 27.—**BARKER, Col. Sir George R., K. C. B.,** an English baronet born in 1817, received the order of Knight Commander of the Bath in 1859.

July 28.—**PELLEW, Admiral Sir Fleetwood Broughton Reynolds,** born Dec 13, 1789; entered the navy when very young; was engaged at the destruction of the Dutch naval force in the Indian seas; continued on the East Indian station till the reduction of Java, in 1811, and especially distinguished himself at Semanap, in the Batavia roads, and near Samarang; assisted at the capture of a French convoy in Port d'Auzo in 1813; served on the Mediterranean station from 1818 to 1822; appointed to command the Indian station in 1852; was recalled in 1854; and became an admiral of the blue in 1858.

July 29.—**BUCKINGHAM AND CHANDOS, Richard Plantagenet Temple, Nugent Brydges Chandos Grenville,** second Duke of, born in Pall Mall, Feb. 11, 1797. He was educated at Oxford, and succeeded his father as duke in 1839; he sat in parliament as representative of the county of Bucks from 1826 to 1839; was lord privy seal from Sept. 1841 to Feb. 1842. He is the author of "Memoirs of the Court and Cabinets of George III." He has been succeeded by his son Richard Plantagenet Campbell, Marquis of Chandos.

Aug. 2.—**TRAQUAIR, Charles Stuart,** eighth Earl of; born in Peebleshire, Scotland, Jan. 31, 1781; succeeded his father in 1827.

Aug. 2.—**HERBERT, Sidney, Baron Herbert of Lea.** (See **HERBERT, Sidney.**)

Aug. 3.—**HOSKING, William,** an English architect, born in 1800.

Aug. 3.—**REYNOLDS, Admiral Sir Barrington,** born at Penair, near Truro, Eng., in 1785; entered the navy in 1795; served in the action in Queberon Bay in 1800, and accompanied the expedition against Ferrol; was promoted to a lieutenantancy for his conduct at the cutting out of a privateer; assisted in the expedition against Java in 1811; served at the bombardment of Beyrout in 1840; was commander-in-chief on the Cape and Brazil station from 1848-52; appointed vice-admiral of the red 1857, and was deputy-lieutenant for Cornwall.

Aug. 4.—**HERBERT, Vice-Admiral Sir Thomas,** born at Cahirname, Co. Kerry, Ireland, in 1793; entered the navy in 1803; became vice-admiral of the blue in 1857; was senior lieutenant of the Euryalus in 1813; was nominated a Knight Commander of the Bath for his services as senior captain in command at the destruction of the Chinese forts in 1841; appointed commodore on the southeast coast of America in 1846; was high sheriff of Kerry in 1829; was lord of the admiralty in 1852, and M. P. for Dartmouth from 1852 to 1857.

Aug. 7.—**HINRICHS, Hermann Friedrich Wilhelm,** a German philosopher and political writer, born at Karlseck, in the Grand Duchy of Oldenburg, April 22, 1794, died at Fried-

richsrode in Thuringia. He graduated at the University of Strasburg in 1812; was appointed assistant professor of philosophy at Breslau, and in 1824 professor *ordinarius* of philosophy at Halle.

Aug. 8.—FORBES, Major-General JOHN, a British officer, entered the service in 1811; attained the rank of major-general in 1860.

Aug. 9.—DURHAM, Right Rev. CHARLES THOMAS LONGLEY, D. D., Bishop of, born at Boley Hill, Rochester, in Kent, 1794; was educated at Westminster school, and elected to Christ Church, Oxford, as a student in 1812; was public tutor of Christ Church, Oxford, from 1818 to 1828; rector of West Tytherly, Hants, from 1827 till 1829; head master of Harrow School from 1829 to 1836, when he was appointed the first Bishop of Ripon; translated to this see on the resignation of Bishop Maltby in 1856.

Aug. 9.—NOVELLO, VINCENT, an eminent English musical composer, born in 1781, resided most of his life in London.

Aug. 11.—PASSAVANT, JOHANN DAVID, a German writer on art, born in 1787 at Frankfort-am-Main; studied painting at Paris under David and Gros, and afterwards spent much time in art studies in Italy and other cities of Europe, and on his return to Frankfort was appointed inspector of the gallery of the Stædel Institute. M. Passavant is the author of "Essays upon the Fine Arts," 1820; "Artistic Voyage to England and Belgium," 1833; "Raphael of Urbino," 1839; "Christian Art in Spain," 1853; &c., &c. He also obtained considerable distinction as a painter.

Aug. 11.—HAYES, CATHARINE, an Irish cantatrice, born at Limerick about 1820. She early manifested a decided taste for music, and, under the care of the Bishop of Dublin, was put under the instruction of Professor Sapio, of Dublin. After obtaining some reputation as a concert singer, she became a pupil of Garcia at Paris, and subsequently of Ronconi in Milan. She first appeared at Marseilles in the opera of The Puritans, in 1845, and subsequently sung with great success in the principal cities of Europe, visited the United States in 1851, California in 1852-'3, and the Sandwich Islands in 1854, and Australia and India the same year. Returning to England she was engaged in 1855-'6 at Covent Garden, and from thence returned, in 1857, to America, and spent some years in California; but in 1860 made her residence in Sydenham, England, where she died.

Aug. 15.—ATKINSON, THOMAS WITLAM. (See ATKINSON, T. W.)

Aug. 20.—QUEKETT, JOHN, F. R. S., F. L. S., professor of histology at the Royal College of Surgeons of England, and conservator of the Hunterian Museum. He was born in 1815. He was esteemed the ablest of English microscopists, and had published two treatises of high reputation: "Lectures on Histology," in 2 vols. 8vo., and "Practical Treatise on the Use of the Microscope," 8vo. He died at Pangborne,

Berks, whither he had gone for the benefit of his health.

Aug. 22.—OASTLER, RICHARD, an English political writer, born in 1789.

Aug. 22.—MOORE, GEN. FRANCIS, an officer of the English army, born in 1768; entered the service in 1787; obtained the rank of general in 1830.

Aug. 26.—MCKENZIE, WILLIAM LYON. (See MCKENZIE, W. L.)

Aug. 30.—FRANCIS, JOHN, an English sculptor, born in 1780.

Sept. 1.—TODD, GEN. SÆTONIUS H., an officer of the East Indian army; entered the service in 1798; became lieutenant-general in 1851, and general in 1860.

Sept. 3.—MOUNT EDGEcombe, ERNEST AUGUSTUS EDGEcombe, Earl of, born at Richmond Hill, 1797; was aide-de-camp to the queen; was colonel of the First Cornwall Rifle Militia, but resigned 1857; has published extracts from journals kept during the Revolution at Rome and Palermo 1849; appointed special deputy-warden of the stannaries, 1852.

Sept. 4.—CUNNINGHAM, Major-General DAVID, an officer of the East Indian army, stationed in Borneo, born in 1802; entered the service in 1816; became major-general in 1854.

Sept. 14.—FORTESCUE, HUGH, second earl, born in London, 1783; died at his residence in London, Sept. 14, 1861. His family were elevated to the hereditary peerage as Barons of Fortescue in 1746, and his father was created Earl Fortescue and Viscount Ebrington in 1789. The late earl was educated at Brasenose College, Oxford, where he graduated B. A. in 1803, and M. A. in 1810. He entered the House of Commons as member for Barnstaple in 1804, and continued to represent that borough till 1807. In 1820 he was elected for Tavistock, which he represented till 1831, and North Devon from 1831 to 1839, when he was called to the House of Peers as Baron Fortescue. In 1841 he succeeded his father in the earldom. Under Lord Melbourne's Administration in 1839 he was made lord-lieutenant of Ireland, which office he held till Sept. 1841. Since 1839 he has been one of the privy council, and was lord steward of the queen's household from 1846 to 1850. He was also lord-lieutenant and vice-admiral of Dover; lord high steward of Barnstaple and South Molton. He published, some years ago, a collection of the speeches and writings of Lord King, with a memoir.

Sept. 19.—HERBEET, GEN. DENNIS, an officer of the English army, born in April, 1771; entered the service in 1794; attained the rank of general in 1854.

Sept. 20.—NICCOLINI, GIOVANNI BATTISTA, an Italian sculptor, born near Pisa, Oct. 31, 1782. His statues possess high merit. Those best known are, "Arnold of Brescia," "Ludovicus the Moor," "Rosa Munda," and "Filippo Strozzi."

Sept. 22.—CHÉRI, ROSE MARIA CÍZOS, usually

called simply *Rose*, a French actress born at Etampés about 1824. She was the daughter of an actor who had assumed the name of *Chéri*, (dear.) She commenced her career as an actress at the age of six years, performing the child parts of some favorite dramas. In 1842 she was called to act as a substitute for Nathalie, then a popular actress, and acquitted herself so well as to obtain immediately a lucrative engagement. Her success from this time was uninterrupted. She played the principal part in all the best dramas of the French stage, and was without a rival in most of them. In 1845 she married M. Lemoigne Montigny, at that time director of the Gymnasium Theatre in Paris.

Sept. 22.—DASHWOOD, SIR GEORGE, born at Kirtlington Park, Sept. 17, 1786; succeeded his father in 1828; was a deputy-lieutenant of Oxfordshire.

Sept. 22.—ZWIRNER, ERNST F. (See ZWIRNER.)

Sept. 23.—LEGEY, Admiral GEORGE, a British naval officer, born March 20, 1777; entered the service in 1791; was made vice-admiral in 1855, and admiral in 1861.

Sept. 24.—FARREN, WILLIAM, an English actor born in 1787; entered upon an actor's career in 1806 at Dublin, played for many years in leading parts at Covent Garden, Haymarket, and the Olympic theatres in London, and was manager of the two latter. He retired from the stage in 1855.

Sept. 24.—SCHLOSSER, F. C. (See SCHLOSSER.)

Sept. 25.—BLAIRIE, SIR THOMAS, born at Aberdeen, Scotland, in 1802; educated at the Aberdeen Grammar School and Marischal College; a merchant; had been elected provost of Aberdeen five times.

Sept. 25.—CUSACK, J. W., an eminent English surgeon, born in 1787.

Sept. 25.—MAUDSLAY, JOSEPH, an English civil engineer, born in 1800.

Sept. 28.—LEIGH, CAPEL HANBURY, lord-lieutenant of Monmouthshire, born Oct. 6, 1776; appointed lord-lieutenant in 1836.

Sept. 28.—PUJOL, ABEL DE, a French painter, born in 1785.

Sept. 28.—RIDDELL, SIR JAMES, born at Shaw Park, Clackmannanshire, Scotland, June 3, 1787; succeeded his grandfather as baronet in 1797; was educated at Christ Church, Oxford, where he graduated B. A. in 1807; was deputy-lieutenant of Argyshire.

Sept. 30.—CUNNINGHAM, Rev. J. W., an English poet and theologian, died at Harrow. He was born in 1780; educated at St. John's College, Cambridge; appointed vicar of Harrow in 1811. He was the author of "A World without Souls," &c.

Oct. 2.—STANLEY, Rear-Admiral WILLIAM P., an officer of the British navy, born 1784; entered the service in 1798; attained the rank of rear-admiral in 1857.

Oct. 2.—PONSONBY, WILLIAM, third baron,

born at Hampstead, Eng., in 1816; succeeded his uncle in the barony in 1855.

Oct. 4.—VANDENHOFF, JOHN, a celebrated English actor, born in 1790.

Oct. 4.—EGLINTON, EARL. (See EGLINTON.)

Oct. 9.—AUSTIN, HENRY, an English civil engineer.

Oct. 10.—WILLIAMS, SIR JAMES HAMLYN, born in Devonshire in 1790; succeeded his father as baronet in 1829; was member of parliament for Carmarthenshire in 1831, and again from 1835 to 1837; lieutenant-colonel East Dover militia in 1846; high sheriff of Carmarthenshire in 1848; and deputy-lieutenant of Dover in 1852.

Oct. 12.—CUBITT, SIR WILLIAM, an English civil engineer, born in Norfolk in 1785, and at an early age he displayed a remarkable genius for mechanical invention. Being apprenticed to a joiner, he soon became a superior workman, and gave attention first to making agricultural implements, then to the construction of millers' machinery, and soon after invented the self-regulating windmill sails now generally used. He became connected, about 1812, with Messrs. Ransome and Son, of Ipswich, in the manufacture of agricultural implements, and after a time engaged in all kinds of engineering work, the construction of gas-works, &c. About this time he invented the treadmill for the use of gaols and houses of correction. In 1826 he removed to London, and found at once abundant employment in the construction of docks, canals, railroads, port, harbor, and river improvements. He superintended the construction of the London Crystal Palace in 1851, and was knighted for his services to the country in connection with it.

Oct. 13.—SIBTHORP, GERVASE, T. W., M. P.

Oct. 16.—MURRAY, SIR WILLIAM KEITH, born at Ochertyre, 1801; was appointed a deputy-lieutenant of Perthshire in 1846; was lieutenant-colonel of militia of that county, but resigned in 1846.

Oct. 17.—CRAWFORD, SHARMAN, an English political writer.

Oct. 21.—WADE, SIR CLAUDE MARTINE, born in Bengal, 1794; entered the military service of the East India Company in 1809; appointed diplomatic agent at Lodianna, 1823; placed in charge of the British relations with Runjeet Singh, and the States across the Indus; on a special mission to Peshawar in 1838, to join the Sikh army with Shah Zada-Timon, and was the first to force the Khyber pass; became lieutenant-colonel in 1839; was knighted the same year for his services at the Court of Lahore for 17 years; received permission in 1841 to wear the order of the Dooranee Empire, conferred for services in Candahar, Cabul, and at the capture of Ghuznee, and also received the Star of the Punjab; in 1848 was political agent at Malwa, Central India; in 1855 received the local rank of colonel in the East Indies.

Oct. 25.—GRAHAM, SIR JAMES R. G. (See GRAHAM.)

Oct. 27.—SIEBOLD, EDWARD KARL KASPAR JAKOB JOSEPH VON, an eminent German physician, and writer on obstetrics, born at Wurzburg, March 19, 1801.

Oct. 29.—SHAKESPEAR, COL. SIR RICHMOND CAMPBELL, born 1809; entered the military service of the East India Company in the Bengal Artillery, 1827; distinguished himself greatly at the attack on Gwalior, in Dec. 1843, in the operations against the Sikhs in 1848-'9, and was wounded at the battle of Goojerat; received the brevet rank of lieutenant-colonel in the army of the East Indies in 1849, and the honor of knighthood for his services at Khiva in reconciling the Khan to the Emperor of Russia, and in putting an end to the slavery of Europeans in that country.

Oct. 29.—BRIDGES, SIR HENRY, born at Ewell, Eng., 1786; received the honor of knighthood from George IV.

Oct. 30.—MILLER, SIR WILLIAM, born in Edinburgh in 1815; was educated at Eton, and was for some years an officer in the Twelfth Lancers; was appointed magistrate for Ayreshire, 1838, and afterwards a deputy-lieutenant; was made a Knight-Commander of the Order of the Temple, Jan. 1846.

Nov. 8.—BUTLER, SIR THOMAS, born at Carlow, Ireland, 1783, was a deputy-lieutenant of Carlow.

Nov. 9.—DOUGLAS, SIR HOWARD. (See DOUGLAS, SIR H.)

Nov. 9.—HAWKINS, SIR JOHN CÆSAR, born Feb. 9, 1782; was educated at Christ Church, Oxford, where he received the honorary degree of M. A., 1802. He succeeded his brother as third baronet in 1793. He died at the residence of his sister, Frenchay, Gloucestershire.

Nov. 12.—PEDRO V., king of Portugal. (See PEDRO V.)

Nov. 13.—CLOUGH, ARTHUR HUGH, an English poet and scholar, died at Florence, aged 42 years. At an early age he entered the Rugby School, and gained the only scholarship open for literary competition. He was afterwards elected a fellow of Baliol College, Oxford, and filled the place with dignity and fidelity. While engaged in his duties here, he wrote the poem entitled "Bothie of Topee na Fuosich," which excited much attention; and, in 1849, published a little volume of great merit, entitled "Ambarvalia." In 1848-'9 he visited Italy, and soon after came to the United States, with the intention of making this a permanent home, and was warmly received in the literary circles of Boston and Cambridge. In 1852 he engaged in the arduous task of translating anew "Plutarch's Lives." In 1853 he was recalled to England by an appointment to the educational branch of the privy council, which important post he held until his death. To his many duties he added those of private secretary to Florence Nightingale, and there is little doubt that in the multitude of his labors he overtasked himself, and thus hastened his death.

Nov. 13.—DUNSCOMBE, THOMAS SLINGSBY, a

member of the British House of Commons, died at Lancing, Sussex.

Nov. 13.—FORBES, SIR JOHN, M. D., born at Cuttclbrae, Scotland, 1787; received his medical education at the University of Edinburgh, where he graduated in 1817; was a fellow of the Royal College of Physicians; served several years in the medical department of the navy; was flag-surgeon to the commander-in-chief in the West Indies, 1814-15; physician in ordinary to the late Duke of Cambridge, 1830; physician extraordinary to the Prince Consort, 1840; physician to the queen's household, 1816; was an honorary member of the principal medical societies of Europe and America. In 1821 he introduced to English practitioners the great discovery of auscultation by translating Laennec's treatise, following up the subject by an original work of his own in 1824; was one of the editors of the "Cyclopedia of Practical Medicine;" proprietor of the "British and Foreign Medical Review" from 1836 to 1847; and author of several other valuable works.

Nov. 14.—SCHOEDDE, SIR JAMES HOLMES, born Oct. 27, 1787; served in the Egyptian campaign of 1801, and in the Peninsula from 1808 to the end of the war; received a medal for his conduct at Neville; was created a K. C. B. for his services in the first Chinese war; was appointed aide-de-camp to Her Majesty, and received the thanks of both Houses of Parliament; became a major-general in 1854, and colonel of the Fifty-fifth Foot in 1857.

Nov. 25.—FINCH, Lieut.-Gen. JOHN, an English army officer, son of the fourth earl of Aylesford, born 13th March, 1793; entered the army in 1809; was military secretary to Lord Combermere in India; became lieutenant-general in 1855; colonel Twenty-fourth Foot in 1856.

Nov. 26.—MUNDT, DR. THEODORE, a German writer, one of the chiefs of the "Young Germany" school, born Sept. 9, 1808, at Potsdam; educated at the University of Berlin, and resided in that city till his death, except in 1848-50, when he was professor at Breslau. He was librarian of the University of Berlin from 1850 till his death. His works, which were very numerous, were almost equally divided between fiction, history, and biography, and political topics. Few or none of them have been republished in this country.

Dec. 10.—SMITH, THOMAS SOUTHWOOD, M. D., an English medical writer and philanthropist, born in 1790. Besides numerous works on medicine, and several on theological topics, he devoted much attention to the subject of sanitary science, and was employed by the Government on the "Health of Towns Commission." His writings on this subject have had the effect to modify beneficially the systems of drainage, sewerage, and ventilation, and an eminent authority declared, before his death, that Dr. Smith's labors had been the means of saving more than a million of lives. He died at Florence.

Dec. 14.—ALBERT, PRINCE. (See ALBERT.)

Dec. —.—LACORDAIRE, JEAN BAPTISTE HENRI. (See LACORDAIRE.)

Dec. —.—KILLALOE, Right Rev. LUDLOW TONSON, D. D., Bishop of, born at Lisnagar, Rathcormac, 1784; graduated at Trinity College, Cambridge, 1805; consecrated 1837; in 1848, succeeded his elder brother in the barony of Riversdale, an Irish peerage originally conferred on William Tonson, M. P.

OHIO. One of the Western States, formed out of the northwestern territory ceded by Virginia, was admitted to the Union in 1802, is bounded on the north by Michigan and Lake Erie, on the east by Pennsylvania and Virginia, south by Virginia and Kentucky, from which it is separated by the Ohio River, and west by Indiana. It is about two hundred miles in length from north to south, and one hundred and ninety-five in extreme width from east to west. The population in 1860 was, 2,303,374 whites, and 36,225 free colored. The ratio of increase during the previous ten years had been 17.82 white and 43.30 colored. The vote for President in 1860 was for Lincoln 231,610; Douglas, 187,232; Breckinridge 11,405; Bell 12,194. The Governor of the State is elected for two years. The Senate consists of thirty-five members, and the House of one hundred, each elected for two years. The Legislature meets biennially, at Columbus, 1862, 1864, &c., on the first Monday of January. The composition of the last Legislature was: Senate, 25 Republicans, 10 Democrats; House, 58 Republicans, 46 Democrats, 1 Independent. The United States Senators are Benjamin Wade, a native of Massachusetts, whose term expires March 4, 1863, and John Sherman, elected in place of Mr. Chase, who became Secretary of the Treasury. Mr. Sherman's term expires March 4, 1867.

Gov. Tod succeeded Gov. Dennison, whose term expired Jan. 1862. The Legislature met on the first Monday of Jan. 1861, amidst the generally pervading excitement growing out of the state of the Union. The Message of Gov. Dennison explained, at some length, the course he had pursued in refusing to surrender, on the requisition of the Governors of Kentucky and Tennessee, the persons accused of aiding the escape of fugitive slaves. He denied the right of secession as a general principle, and affirmed the loyalty of Ohio to the Union. He suggested the repeal of the obnoxious features of the fugitive slave law, and that the repeal of any personal liberty bills subversive of the fugitive law would thus be secured; but, at the same time, he said "the Southern States should repeal their laws in contravention of the constitutional rights of citizens of free States, who cannot be satisfied with less, and who will insist upon their constitutional rights in every State and Territory of this Confederacy. These they cheerfully accord to citizens of the Southern States. Determined to do no wrong, they will not contentedly submit to any wrong.

They demand the employment of all the constitutional powers of the Federal Government to maintain and preserve the Union."

The allusion to the "constitutional rights of citizens of free States" meant that the South should recognize "free blacks" as citizens of the United States, although, according to the Constitution, as expounded by the Supreme Court, and the practice of the Government since its formation, colored persons are not citizens of the United States. The State of Ohio itself had uniformly acted on the same principle. At the formation of the State Government, laws were enacted forbidding blacks to come into the State, and imposing fines and penalties upon their introduction. These laws were only repealed in 1849. Indiana and Illinois still have such laws, and in 1854 the U. S. Court decided that blacks are not citizens of the United States. The Ohio laws do not now recognize them as citizens, since the militia and other laws passed at the last session, all apply to white males only.

The Legislature, on Jan. 12, 1861, passed a series of joint resolutions, of which the following is a synopsis:

1st. The people of Ohio believe that the preservation of this Government is essential to the peace, prosperity, and safety of the American people.

2d. The General Government cannot permit the secession of any State without violating the bond and compact of Union.

3d. The power of the National Government must be maintained, and the laws of Congress enforced in the States and Territories, until their repeal by Congress, or they are adjudged to be unconstitutional by the proper tribunal. All attempts by State authority to nullify the Constitution and laws of Congress, or resist their execution, are destructive of the wisest government in the world.

4th. The people of Ohio are opposed to meddling with the internal affairs of other States.

5th. The people of Ohio will fulfil in good faith all their obligations under the Constitution of the United States, according to their spirit.

6th. Certain offensive laws in some of the States are rendered inefficient by the Constitution and laws of the Federal Government, which guarantee to the citizens of each State the privileges and immunities of the several States. The several State Governments should repeal these offensive laws, and thus restore confidence between the States.

7th. All Union men condemn the secession ordinances.

8th. The power and resources of Ohio are pledged to the maintenance of the civil authority, Constitution, and laws of the General Government.

9th. Copies of these resolutions shall be furnished to the Senators and Representatives of both Houses of Congress.

On the 14th the Legislature passed the following:

Resolved, That we hail with joy the firm, dignified, and patriotic Message of the President, and pledge the entire power and resources of the State for a strict maintenance of the Constitution and laws by the General Government, by whomsoever administered.

On March 21st a resolution, requesting Congress to call a National Convention, passed both Houses of the Legislature.

On April 10th about 30 boxes of arms and accoutrements of various kinds, in transit to

Fort Smith, Arkansas, and re-shipped at Cincinnati, attracted the notice of the people. A crowd assembled, and insisted on preventing their shipment. For the safety of the arms the Mayor took possession of them. They were not seized, but were held to prevent seizure, and perhaps destruction.

On April 12, an act to enroll the militia of the State became a law. The following is a synopsis:

1st. Assessors to prepare lists of all persons subject to military duty, and file the lists with the auditor, who shall furnish a copy to the adjutant-general, and an abstract shall by him be forwarded annually to the War Department at Washington before Jan. 1 in each year. There shall also be a militia of the reserve; when 40 or more persons enroll themselves, the adjutant may issue commissions. When public service requires more force than "the active militia," this "militia of the reserve" shall be called into service.

On the same day was passed an act to secure the safe keeping of arms in the hands of volunteer companies.

Sec. 1. Provides that each man shall receive \$5.

Sec. 2. The commanders to report lists of members.

Sec. 3. The commanders to report all delinquencies in the company.

Sec. 4. The delinquents to be marked off by the adjutant-general, and the delinquents not to receive the \$5.

Sec. 5. The aggregate not to exceed 6,000 men.

On the 18th the following law was passed to amend the militia law of 1859. It provided for carrying into effect the new military division of the State.

Sec. 5. That the commander-in-chief may, if he shall deem the same advisable, order a camp of instruction to be held, once a year, for four days, during the period of legal encampments, at which time the officers of the volunteer militia, or the officers and all other members of said militia, shall be drilled in the school of the soldier and the details of their respective duties, and section 3 of the act entitled "an act for the further discipline of the militia and volunteer militia," passed March 23, 1859, and providing a camp of instruction for officers only, is hereby repealed.

On the 15th of April the requisition of the President had been received for 75,000 men. The Governor issued the following proclamation:

To the People of Ohio:

You are called upon to meet the gravest responsibilities, and it may be sacrifices, to preserve your free institutions and your national independence.

The attempt of your Government to supply a beleaguered garrison with provisions, has been met by open war, and the reduction of the garrison by force of arms. Your national flag has been insulted, and the constitutional authorities of the Union treasonably defied.

At such an hour, rising above all party names and party bias, resolute to maintain the freedom so dearly purchased by our fathers, and to transmit it unimpaired to our posterity, let the people assert their power.

Your voice will be heard; your actions, giving hope to the overawed and oppressed in the rebellious districts, will strengthen the hands and animate the hearts of the loyal thousands in the Border States, and will bring back peace and order to the nation, with a new assurance of the perpetuity of its priceless blessings. The General Assembly, by acts just passed, opens to you the method of testifying your devotion to our beloved State, to the Union as it is, and those free in-

stitutions which have been alike the foundation and pledge of our national and individual prosperity.

The general orders issued through the proper department assert that method, and invite your response. Let us all be thankful to Almighty God for past mercies, imploring His pardon for our many shortcomings, and trusting with Him the destinies of our country, forget all but the pressing duty to cast aside the distinctions that have been the basis of transient differences, and demonstrate to the world that we are worthy sons of great ancestors, fit to be intrusted with the liberties we inherit.

W. DENNISON.

The Legislature on the same day passed a law regulating the troops to be mustered into the service of the United States; the companies were not to number less than 70 men, cavalry 60 men, artillery 100 men each. The Governor was to organize and officer the brigades.

On the 18th was passed a law to provide for the defence of the State, and for the support of the Federal Government:

SECTION 1. Appropriates \$450,000 to arm and equip the militia.

SEC. 2. Appropriates \$500,000 to carry into effect any requisition of the President.

SEC. 3. Places a contingent of \$50,000 at the control of the Governor.

SEC. 4. Authorizes a loan of \$750,000.

SEC. 5. Authorizes the issue of certificates at 6 per cent., five years to run, not subject to any tax.

SEC. 6. Levies a tax of 7-20 of a mill on the dollar of taxable valuation, to meet the interest of the loan.

On May 7th an act was passed, by which a tax of half a mill on the dollar of taxable property was levied, to be applied to the relief of families of volunteers in each county. The relief was to be continued one year after the death of the volunteer, if he died in service.

The Legislature also passed a bill for leasing the public works of the State:

In compliance with the provisions of this "act to provide for leasing the Public Works of the State," passed May 8th, 1861, and after due advertisement, as required by the act, the works, "consisting of the Miami and Erie Canal, Ohio Canal, Walbonding Canal, Hocking Canal," so much of the "Sandy and Beaver Canal," as is owned by the State, "Muskingum Improvement, and Western Reserve and Maumee Road, and all appertaining thereto, and owned by the State, for the purpose of being used in connection therewith, with the right to have additional surplus water," were, by the Governor, Auditor and Treasurer of State, at public auction, in the rotunda of the State House, in the city of Columbus, on the 29th of May, 1861, offered for a term of ten years, to the person or persons, who, in consideration of the tolls, fines, water-rents and revenues to be derived therefrom, should bid to pay the highest annual rent therefor, to be paid in semi-annual payments in advance, in each year during the term of said lease; and were let, to Kent Jarvis, Joseph Cooper, Arnold Medway, Mr. Brown, Thomas Moore, and W. J. Jackson, for the annual rent of \$20,075, and they came into possession June, 1861. In 1861, the expenses were \$64,362 more than the revenue.

The joint resolution passed by Congress, proposing an amendment to the Constitution of the United States, guaranteeing slavery in the States where it now exists, was taken up and passed by the constitutional majority.

A bill defining and punishing treason also became a law.

On the 26th of April was passed "an act to

provide more effectually for the defence of the State against invasion. The appropriation in this act amounted to \$2,000,000; to meet which, the commissioners of the sinking fund were empowered to borrow the amount. The same act authorized the Governor to call out nine regiments of infantry and eight of cavalry:

The Constitution of the State, Sec. 1, Article VIII., limits the power of the State to contract debts to cases of "casual deficits or failures in revenues, or to meet expenses not otherwise provided for, but the aggregate of such debts, direct and contingent, whether contracted by one or more acts of the General Assembly, or at different periods of time, shall never exceed seven hundred and fifty thousand dollars."

Section 2 of the same article provides that "In addition to the above limited power, the State may contract debts to repel invasion, suppress insurrection, defend the State in war, or to redeem the present outstanding indebtedness of the State." The loan authorized by the Act of April 18, 1861, is clearly within the powers granted in the Constitution. That authorized by the Act of April 26, is one of graver character, not only in the amount, but in the circumstances which would bring it within the powers conferred in the Constitution upon the General Assembly, and the Commissioners.

This difficulty was overcome by the Governor, who decided that "Ohio is in danger of invasion," and therefore that the debt is legal. The Constitution does not specify who shall decide on the danger of invasion.

The President, in his proclamation of April 15, had allowed the Confederates twenty days in which to disperse. On the expiration of this notice, the following general order was issued at Columbus, the capital of Ohio. The order explains clearly the manner of proceeding to raise companies for a reserve force of 100,000 men, the number of companies to which each county is entitled, and other matters pertaining to the organization of this immense "Home Army:"

GENERAL HEAD-QUARTERS, ADJ'T-GENERAL'S OFFICE, }
COLUMBUS, OHIO, May 6, 1861. }

The twenty days' limit for the dispersion of rebels now in arms against the United States has expired. Whether the struggle for vindication of the imperilled Union shall be brief or protracted, the result is certain. The destinies of all nations are interwoven with that of America, and the issue is made up. Ohio will meet the crisis firmly and fulfil her part. The more decided her action, the sooner will peace succeed war, and loyalty supplant treason.

To give force and system to her action, the following general order is promulgated:

I. The militia is divided into the "active army of operation" and the "militia of the reserve." The nine regiments now encamped, (additional to the thirteen mustered into the United States service,) and such further regiments as the General Assembly shall authorize, will be mustered into the State service, and placed under strict discipline, for immediate service.

II. The enrolled militia, between the ages of eighteen and forty-five, exceeds 300,000 men. This force is divided into the First, Second, and Third Reserve Corps.

The able-bodied force of other ages retired from service, but fully competent to meet any demand that the exigencies of the Union may require, exceeds 200,000 men, and will constitute the Fourth and Fifth Reserve Corps.

The First Reserve Corps will be organized forth-

with, and be subject to immediate transfer into the "active army of operation." Applications, however, for the organization of militia of the reserve will not be limited to this quota, but the companies composing it will receive the post of honor and the first assignment to active duty in case the country require their service.

VI. As a general rule, public arms will not be issued to the militia of the reserve, but a proximate estimate of the number of private rifles in the possession of men expert in their use, shows that, with proper exercises, nearly or quite the entire first contingent of 100,000 men can be armed, and disciplined in hours of leisure, postponing their draft upon the State until they are transferred to the active corps.

H. B. CARRINGTON, Adjutant-General.
By order of the Commander-in-Chief.

The people of Toledo, Dayton, and Zanesville, Ohio, subscribed large sums of money for the support of the volunteers and their families; at the latter place, large property holders agreed to give houses rent free to families of volunteers during their absence.

In September, the Federal Government refunded to the State \$900,000 of the amount of \$2,100,000 it had expended in forwarding troops, which began speedily to move forward. The First Ohio, McCook, 1,000 men, and the Second Ohio, Wilson, 1,000 men, arrived in Washington May 23d.

The Ohio troops were organized under Geo. B. McClellan, formerly a distinguished army officer, but who was the General Superintendent of the Ohio and Mississippi Railroad. He was made major-general of the State forces, and up to June 1st, the following troops had been mustered for three months: 1st Regiment, Colonel McCook; 2d, Wilson; 3d, Marrow; 4th, Andrews; 5th, Dunning; 6th, Buckley; 7th, Tyler; 8th, De Puss; 9th, McCook; 10th, Lytle; 11th, Harrison; 12th, Lowe; 13th, Platt; 14th, Steadman; 15th, Andrews; 16th, Irvine; 17th, Connell; 18th, Stanley; 19th, Beatty; 20th, Morton; 21st, Norton; 22d, Gilmore.

The whole number of troops organized by Ohio for the war was, to December 31st, 1861, as follows:

In camps in the State:	
Thirty-five regiments infantry.....	26,146
Four regiments cavalry.....	4,485
Seventeen batteries artillery.....	1,228
Total.....	31,679

Amount of Ohio force in three years' service, December 31st, 1861:

Infantry.....	67,546
Cavalry.....	7,270
Artillery.....	8,028
Total.....	77,844
To which add twenty-two full regiments for three months.....	22,000
Two companies of cavalry.....	180
Two sections artillery.....	80
One battery.....	120

Grand total..... 100,224

The expenses paid by Ohio were as follows:

COLUMBUS, OHIO, August 1, 1861.

It is hereby certified that the costs, charges, and expenses, properly incurred by the State of Ohio, for enrolling, subsisting, clothing, supplying, arming, equipping, and transporting its troops employed in aiding to

suppress the present insurrection against the United States, exceed the sum of the following items, viz.:

Enrolment.....	\$20,000
Incidental expenses.....	80,000
Subsistence.....	300,000
Clothing.....	600,000
Barracks, camp equipage, medical supplies, ammunition, &c.....	250,000
Arms.....	400,000
Equipping troops.....	350,000
Transportation.....	150,000

Two million one hundred thousand dollars... \$2,100,000

W. DENNISON, Governor of Ohio.

R. W. TAYLER, Auditor of State.

In the month of July the troops were transferred to the United States, and the State thus relieved from their payment.

The Ohio Democratic State Convention met at Columbus, August 10, and nominated H. J. Jewett for Governor, and John Scott Harrison for Lieutenant-Governor. A series of resolutions were adopted. The third recommended the legislatures of the States to call a National Convention for settling the present difficulties and restoring and preserving the Union. The sixth resolution condemned the President's attempt to suspend the writ of *habeas corpus*.

The public debt of the State of Ohio is \$13,685,233; add for war purposes \$1,212,037; total, \$14,897,273. This is an increase on the year of \$647,039—some old debts having been paid off.

The valuation of State property for 1861—number of acres 25,871,275—is, real estate in the country, \$494,064,639; in towns and cities, \$149,818,913; personal property, \$248,966,532. Total, \$892,850,084.

Taxes for State purposes, 4.55 mills, \$4,056,379; for local purposes, \$7,014,748. Total taxes, \$11,071,127.

The payments in counties, in 1861, on account of the Common School Fund, were \$1,205,107.

The number of horses in the State is 730,427; value, \$36,211,355. Cattle, 1,837,938; value, \$19,734,330. Mules, 11,155; value, \$601,479. Carriages, 299,012; value, \$2,931,449. Watches, 84,465; value, \$1,571,699. Pianos, 9,264; value, \$1,650,798. Value of merchants' stock, \$24,724,844; manufactures, \$9,385,665. Credits, accounts, &c., \$55,545,191.

The number of acres in wheat, 1,844,677; bushels, 23,640,356. In corn, 2,397,639; bushels, 91,588,704. In oats, 830,104; bushels, 25,127,724.

During 1861, there were 22,251 marriages in Ohio, which is 1 in each 105 of population, the highest ratio among civilized nations. The number in 1859 was 420 greater. When Ohio sent 100,000 males, or 20 per cent. of the active male population, into the army, it affected the result.

During 1861, there were 11,233 naturalizations, of whom 5,349 were Germans; 2,108 Irish; the residue English, Welsh, Scotch, French, &c. Of the whole number, 8,970 were naturalized in the Probate Courts, and 2,263 in the Courts of Common Pleas. The number naturalized in 1860 was 10,479. In the last

three years, 30,705, or 10,000 a year—indicating a total increase for 1859-60-61, of 30,000 persons. Of the whole number of naturalized persons, 19,159 were Germans.

In times of peace, the commission of crimes is remarkably uniform from year to year. The number of indictments for 1861 was 2,827; convictions, 1,374; of which 724 were crimes against persons, 597 against property. Crimes against society, 1,422.

The number of violent deaths returned for 66 counties in 1861, were 621, 100 more than were returned for 62 counties in 1860—up to July 1st—each year. The number of homicides in 1861 was 12 less than in 1860; of suicides 16 more; and of casualties 94 more. It is remarked that suicide has been increasing of late years, owing to disturbing causes in the commercial world, and the war. Casualties—particularly serious railroad accidents—increased. Homicides have been caused chiefly by intemperance.

The new structures which have been built in Ohio during the last four years, are as follows:

		Value.
In 1858.....	10,458	\$5,012,054
In 1859.....	7,812	4,972,645
In 1860.....	8,100	3,655,513
In 1861.....	9,831	4,463,042
Average.....	9,060	\$4,800,000

Rather more than two-thirds are dwelling-houses and stores. Of the foregoing, 25,000 were of these classes. This would indicate an increase of population of 372,000 in ten years. The increase shown by the census was 360,000.

The total number of paupers of all classes, lunatics, &c., is 35,900; or 1 in 70 in the whole population who belong to the dependent class. A large number in fact, but small relatively compared with other nations.

On the subject of debt, the Commissioner of Statistics assumes that three-fourths of the debts due in this State from any source are known, without doubt—including the State, municipal, bank, record, and judgment debts. The commercial and private unrecorded debts then remain to be ascertained. The latter must be small, because only small sums are loaned without security. All other debts by loan are either in the form of mortgage, judgment liens, or endorsed notes discounted in banks. The commercial debt, however, is large. The debt of importers cannot exceed more than half the imports, and the imports cannot materially exceed the exports. The export value of domestic produce and of manufactures of domestic materials and labor does not vary materially from \$60,000,000 per annum. Many sales are made for cash, and credit rarely exceeds six months, and therefore half the value of exports is sufficient to allow for the debts of wholesale merchants. The same amount is sufficient allowance for consumers and retailers. The commercial debt of the State in ordinary times is not over \$60,000,000. But in these extraordinary times it will be safe to say

it does not exceed two-thirds of that amount. The private debts are the only really uncertain debts in the State. Ten millions is a large estimate for them. But the ascertained and estimated debts of the whole State, and of all corporations and persons, &c., will stand thus :

State debt.....	\$14,250,000
Municipal debts.....	9,650,000
Judgment debt (1861).....	8,928,166
Recorded mortgages (1861).....	29,734,966
Railroad debt (1861).....	56,000,000
Bank debt.....	15,500,000
Commercial debt.....	40,000,000
Private debt.....	10,000,000

Aggregate.....\$154,063,132

The life of a mortgage is slightly over two years. There will always be outstanding two years of mortgage debts, so that, adding to the above the mortgage debt of 1860—being \$28,738,998; also two years' judgment, being \$9,903,854 for 1860, it makes a general aggregate debt of \$222,705,982.

The following will show the heights, weight, circumference around the chest, complexion, color of the hair and eyes, of 239 native Americans of Athens, Butler, Highland, Montgomery, and Washington counties. The persons were taken indiscriminately. The average height per man is a fraction under five feet ten and a half inches; circumference of chest 38.02. The complexions of 136 were light; 67 were dark; 109 had light, 89 dark hair; 139 light, 76 dark eyes. The average weight was 169 pounds. Highland County showed the tallest and heaviest men. Twenty-one who were weighed averaged 182 pounds. In Athens 119 averaged 154 pounds; 42 in Butler averaged 168 pounds; 33 in Montgomery averaged 165.1 pounds; and 24 in Washington averaged 176 pounds. The average height for the State is 5 feet 10.57 inches. An inch is deducted for boot-heels, so as to reduce the standard to 5 feet 9½ inches, which is regarded as the natural height of the present men of Ohio.

The average height of Belgian men, given by Quetelet, (8,500 men measured,) is 5 feet 5½ inches. Of 979 recruits in the British army, in the London District, 1838-'9, the height was 5 feet 6 9-10. Eleven regiments of Scotch Highlanders measured 5 feet 7 8-10 inches.

It thus appears that the average height of Ohio men in the above table is 4 inches above that of the Belgians, 2½ above that of the English recruits, and 1½ inches above that of the Highlanders.

The maximum heights of men in the above counties, show that there were at and above 6 feet in height :

In Athens County, of 119.....	21
Butler " of 42.....	11
Highland " of 21.....	9
Montgomery " of 83.....	8
Washington " of 24.....	10

Of the whole number, 59, or one-fourth, were 6 feet and over. More tall men may be found in the Ohio Valley than in any other locality. The comparison of measurement about the chest is as follows :

Men of Ohio.....	89.02 inches.
English (London recruits).....	82.06 "
Scotch Highlanders.....	89.02 "

The Scotch appear stouter in the chest than Americans, but no other race is.

Fair complexions predominate in Ohio. There are few of olive brunette, or dark complexion. The great majority are light or sanguine. The eyes are light in the proportion of 3 to 2—including blue and gray in the light class, black and hazel in the dark. The hair is the only feature, among Americans, and especially in Ohio, which approaches the characteristics of the dark nations. Even in this, the majority have what may be fairly called light hair—including most of the brown hair. The weight given in the above figures is very heavy—an average of 169 pounds. In making a comparison, ten pounds are allowed for clothing.

Measurements of 238 men, in different villages in Ohio, taken from the Smithsonian Institute, show an average height of 5 feet 9½ inches, weight, 157 lbs.; average age, 32. Bell Center showed the largest proportions: 24 men, averaging 30 years of age, show an average of 5 feet 11 inches, weighing 168 lbs. In New Lisbon, 24 men, 5 feet 10 inches, weighed 172 lbs.

The proportion of males in Ohio over 18 years of age, is 49 per cent. The whole number of males in the State is 1,169,799. The number of females over 18 years of age, 573,202. The whole number of males capable of bearing arms, according to established rules, is 523,566.

ONDERDONK, Right Rev. BENJAMIN TREADWELL, D. D., LL. D., late bishop of the diocese of Eastern New York, born in New York City in the year 1791, died in the same city April 30, 1861. Bishop Onderdonk graduated at Columbia College and received priest's orders in 1813, and was immediately appointed assistant minister of Trinity Church. He rapidly attained distinction as a preacher and was greatly beloved by his people. On the occurrence of a vacancy in the post of Secretary of the Diocesan Convention, he was elected to that office, and on the death of Bishop Hobart, in 1830, was at once selected as his successor. In this new position he labored indefatigably and with great success for a number of years; the number of churches as well as the revenues of the diocese were greatly increased, and at his request, it was deemed necessary to divide the diocese, and he retained the Eastern section. In 1844, serious charges were made against him affecting his ministerial character and reputation, and causing great scandal. A trial was had before the House of Bishops of the Episcopal Church, and though the worst charges were not proved, yet the Convention deemed him guilty of such indiscretions that they suspended him from the exercise of his episcopal functions, on the 3d of January, 1845. Bishop Onderdonk himself never admitted the truth of the accusations against him, and his numerous friends made strenuous but unsuccessful efforts to have him

restored to his former position. The Diocesan Convention in 1859 adopted a petition to that effect in 1859, and it was passed by a large vote in the lower house of the General Convention, but failed in the House of Bishops. Since his suspension, Bishop Onderdonk has lived in retirement, and the duties of the episcopate have been performed by a provisional bishop.

ORLOFF, PRINCE (or COUNT) ALEXEI FEODOREWITCH, a Russian general and statesman, an illegitimate son of Duke Feodor Orloff, born in 1787, died on his estate near St. Petersburg, May 21, 1861. He entered the army at an early age, and after participating in the war between Russia and France, became aide-de-camp to Alexander I. and afterwards adjutant on the staff of the Grand Duke Constantine, and finally colonel of a regiment of Horse Guards. At the insurrection of Dec. 1825, at the time of the accession of Nicholas I. to the throne, he saved his imperial master, and quelled the revolt by putting himself at the head of the squadrons which remained faithful, and charging with terrible fury on the insurgents. Nicholas evinced his gratitude for this act of bravery and fidelity by bestowing upon him for thirty years his confidence in a greater degree than he permitted any other subject to enjoy; and Orloff was devoted to his sovereign's interests as no other subject in the Empire could be. In 1828, he fought against the Turks, and in the following year attained a high reputation as a diplomatist by his negotiation of the peace of Adrianople. He was sent immediately after the peace, as Minister Plenipotentiary to Constantinople. In 1830-31, during the Polish Revolution, he was appointed to inspect the conduct of the generals at the

siege of Warsaw, and was, as there is now reason to believe, unjustly accused of being privy to, and probably the cause of, the death of Marshal Diebitsch and the Grand Duke Constantine by poison. In 1832, he was sent as ambassador to London to sustain the rights of Holland against Belgium. In 1833, he visited Turkey, as commander of the Russian troops sent to protect the Sultan against Ibrahim Pacha, and signed the treaty of Unkiah-Skelessi between Russia and Turkey, which gave to Russia the key of the Dardanelles. On his return, the Czar bestowed upon him the Order of St. Andrew, made him member of the Council of State—bestowed a large estate upon him and appointed him General of Cavalry. He was the companion of the emperor in all his visits to other European courts—and attended the coronation of the Emperor Ferdinand of Austria, as Russian Envoy. In 1844, he was appointed to the charge of the secret police of Russia, which he managed for ten years with extraordinary skill and success. In 1854, at the opening of the war between Russia and the Allies, he was sent to Vienna to secure the support or at least the neutrality of Austria, but failed fully to secure either. In 1856, he represented Russia as first plenipotentiary at the Congress of Paris, and aided in negotiating the treaty of March 18. On the 17th of April, 1856, he was appointed by the Czar Alexander II. president of the Grand Council of the Empire, which position he held to his death. He was also prince of the Empire, and had received almost all the orders of nobility in Europe. Few men of his time possessed a more elegant and yet unpretending address, or more quiet and refined manners.

P

PADUCAH is the capital of McCracken County, Kentucky. It is on the Ohio River, below the mouth of the Tennessee River, and 340 miles below Louisville. The name of the town was derived from an Indian chief who once resided in the vicinity. It has been the most important place of business on the Lower Ohio. The town was occupied by Union troops at about eight o'clock on the morning of September 6. The Ninth Illinois regiment, Major Phelps, the Twelfth Illinois, Col. McArthur, with four pieces of artillery, left Cairo for Paducah on the previous evening. Upon their arrival the disembarkation was quickly performed. Every place of business was closed.

At the railroad depot it appeared that all the rolling stock had been sent off. A large quantity of contraband supplies, marked for towns in the Confederate States, was found in the depot, and immediately seized. They were marked for Fort Gibson, Memphis, Union City, and New Orleans. The whole value of the seizure was over twenty thousand dollars.

On the next day, part of the Eighth Regiment, the Forty-first Illinois, and the American Zouaves, from Cape Girardeau, poured in, increasing the force to about 5,000 effective men.

By the occupation of Paducah, there were a fleet and two flanking armies to assail the Confederate position in the Southwest. The character of the back country was quite favorable, and the line to the Southwest was shorter, and less exposed than from Missouri. It had been regarded as the proper point for the departure of an expedition down the Mississippi. Gen. Polk, it was supposed, intended to seize Paducah, but was barely anticipated by Gen. Grant. It was necessary for him as a defence for the rear of his positions on the Mississippi. He advanced as far as Mayfield two or three times with a large force, but his prudence caused him to retreat.

Paducah is fifty miles above Cairo, and is connected by railway with all the Southern railroads. By the railroads alone, many car-loads of flour and bacon had daily gone to the South-

ern States, for some time previously to the Federal occupation of the town. Other military stores, ammunition, equipments and clothing, had been sent over the same route. The place also commands the mouth of the Tennessee River, up which a large commerce had passed to the South. The surface of the country on the south presents no point of any considerable strength. A force could be sent down the line of the railroad, and also up the Tennessee River.

PATENTS. An act changing the patent law in many essential particulars, passed Congress near the close of the session which ended March 4, 1861. Patents granted in future were to remain in force seventeen years, and all extensions are prohibited.

The act provides, where extensions are now applied for, in cases of existing patents, for compulsory process for witnesses, in order to make a thorough investigation of the merits of the case. It gives the Commissioner of Patents a larger salary, as it imposes additional duties and responsibilities. It provides for certain additional examiners. It allows the commissioner to refuse to recognize patent agents who have been guilty of misconduct. It enlarges the right to patent in relation to moulding, casting, electrotyping, &c. It cuts off all patents not prosecuted within two years after filing. It requires labels on patented articles. It enables the commissioner to dispose of models of rejected applications, and to dispense with models when he thinks the design can be sufficiently represented by a drawing. It allows the commissioner to require the printing of papers in certain cases.

The number of patents issued during the year exceeded three thousand. The engrossing nature of the events which transpired during 1861 so occupied public attention, that the vast and most important field of mechanical industry was comparatively overlooked. Many ingenious and valuable inventions were made, which, with suitable illustrations, will find a place in a subsequent volume of this work.

PEACE CONFERENCE. The proposition for a conference or convention of five commissioners from each State on the condition of affairs, was first brought forward and adopted by the Legislature of Virginia. It was her measure, undertaken in good faith, for a settlement of all difficulties and the preservation of the Union. For the resolutions for this purpose, adopted by her, see page 178.

The measure was laid before President Buchanan, and by him communicated to Congress with a special Message, expressing his approbation in these words: "I confess I hail this movement on the part of Virginia with great satisfaction. From the past history of this ancient and renowned commonwealth we have the fullest assurance that what she has undertaken she will accomplish, if it can be done by able, enlightened, and persevering efforts."

The plan immediately attracted attention in other States. In North Carolina and New

Jersey it was immediately brought before the Legislature; in Massachusetts it was spoken of as justifying "considerable hope that a new turn would be given by it to the troubled state of affairs." It was further said, "Massachusetts can consistently accept such an invitation. Her doing so might have a good effect, as evincing her readiness to confer with her sister States, and her desire to provide for the return of harmony." Private correspondents from South Carolina wrote: "We look with hope to the movement just announced as having been started in the Virginia Legislature. Virginia will be listened to despite all the press can say. Four-fifths of our people will agree to any arrangement that shall guarantee our rights and be acceptable to the other Southern States."

The Convention assembled at Washington on the 4th of February. The delegates appointed from the States respectively were as follows:

Maine.—William P. Fessenden, Lott M. Morrill, Daniel E. Somes, John J. Perry, Ezra B. French, Freeman H. Morse, Stephen Coburn, Stephen C. Foster.

New Hampshire.—Amos Tuck, Levi Chamberlain, Asa Fowler.

Vermont.—Hiland Hall, Levi Underwood, H. Henry Baxter, L. E. Chittenden, B. D. Harris.

Massachusetts.—John Z. Goodrich, Charles Allen, George S. Boutwell, Theophilus P. Chandler, Francis B. Crowninshield, John M. Forbes, Richard P. Waters.

Rhode Island.—Samuel Ames, Alexander Duncan, William W. Hopkin, George H. Browne, Samuel G. Arnold.

Connecticut.—Roger S. Baldwin, Chauncey F. Cleveland, Charles J. McCurdy, James T. Pratt, Robins Battell, Amos S. Treat.

New York.—David Dudley Field, William Curtis Noyes, James S. Wadsworth, James C. Smith, Amariah B. James, Erastus Corning, Francis Granger, Greene C. Bronson, William E. Dodge, John A. King, John E. Wool.

New Jersey.—Charles S. Olden, Peter D. Vroom, Robert F. Stockton, Benjamin Williamson, Joseph F. Randolph, Frederick T. Frelinghuysen, Rodman M. Price, William C. Alexander, Thomas J. Stryker.

Pennsylvania.—James Pollock, William M. Meredith, David Wilmot, A. W. Loomis, Thomas E. Franklin, William McKennan, Thomas White.

Delaware.—George B. Rodney, Daniel M. Bates, Henry Ridgely, John W. Houston, William Cannon.

Maryland.—John F. Dent, Reverdy Johnson, John W. Crisfield, Augustus W. Bradford, William T. Goldsborough, J. Dixon Roman, Benjamin C. Howard.

Virginia.—John Tyler, William C. Rives, John W. Brockenbrough, George W. Summers, James A. Seddon.

North Carolina.—George Davis, Thomas Ruffin, David S. Reid, D. M. Barringer, J. M. Morehead.

Tennessee.—Samuel Milligan, Josiah M. Anderson, Robert L. Caruthers, Thomas Martin, Isaac R. Hawkins, A. W. O. Totten, R. J. McKinney, Alvin Cullom, William P. Hickerson, George W. Jones, F. K. Zollcoffer, William H. Stephens.

Kentucky.—William O. Butler, James B. Clay, Joshua F. Bell, Charles S. Morehead, James Guthrie, Charles A. Wickliffe.

Missouri.—John D. Coalter, Alexander W. Doniphan, Waldo P. Johnson, Aylett H. Buckner, Harrison Hough.

Ohio.—Salmon P. Chase, William S. Groesbeck, Franklin T. Backus, Reuben Hitchcock, Thomas Ewing, V. B. Horton, C. P. Wolcott.

Indiana.—Caleb B. Smith, Pleasant A. Hackleman, Godlove S. Orth, E. W. H. Ellis, Thomas C. Slaughter.

Illinois.—John Wood, Stephen T. Logan, John M. Palmer, Burton C. Cook, Thomas J. Turner.

Iowa.—James Harlan, James W. Grimes, Samuel H. Curtis, William Vandever.

Kansas.—Thomas Ewing, jr., J. C. Stone, H. J. Adams, M. F. Conway.

The Convention was organized by the unanimous election of John Tyler, of Virginia, as Chairman, and S. C. Wright, of Ohio, as Secretary. On taking the chair, Mr. Tyler thus eloquently addressed the members:

"GENTLEMEN: I fear you have committed a great error in appointing me to the honorable position you have assigned me. A long separation from all deliberative bodies has rendered the rules of their proceedings unfamiliar to me, while I should find in my own state of health, variable and fickle as it is, sufficient reason to decline the honor of being your presiding officer. But in times like these one has but little option left him. Personal considerations should weigh but lightly in the balance. The country is in danger; it is enough; one must take the place assigned him in the great work of reconciliation and adjustment.

"The voice of Virginia has invited her co-States to meet her in council. In the initiation of this Government that same voice was heard and complied with, and the results of seventy odd years have fully attested the wisdom of the decisions then adopted. Is the urgency of her call now less great than it was then? Our godlike fathers created; we have to preserve. They built up through their wisdom and patriotism monuments which have eternized their names. You have before you, gentlemen, a task equally grand, equally sublime, quite as full of glory and immortality. You have to snatch from ruin a great and glorious Confederation, to preserve the Government, and to renew and invigorate the Constitution. If you reach the height of this great occasion your children's children will rise up and call you blessed. I confess myself to be ambitious of sharing in the glory of accomplishing this grand and magnificent result. To have our names enrolled in the Capitol, to be repeated by future generations with grateful applause, this is an honor higher than the mountains, more enduring than the monumental alabaster.

"Yes, Virginia's voice, as in the olden time, has been heard. Her sister States meet her this day at the council board. Vermont is here, bringing with her the memories of the past, and reviving in the memories of all her Ethan Allen and his demand for the surrender of Ticonderoga in the name of the Great Jehovah and the American Congress. New Hampshire is here, her fame illustrated by memorable annals, and still more lately as the birthplace of him who won for himself the name of Defender of the Constitution, and who wrote that letter to John Taylor which has been enshrined in the hearts of his countrymen. Massachusetts is not here." [Some member said she is coming.] "I hope so," said Mr. Tyler, "and that she will bring with her her daughter Maine. I did not believe it could well be that the voice which

in other times was so familiar to her ears had been addressed to her in vain. Connecticut is here, and she comes, I doubt not, in the spirit of Roger Sherman, whose name with our very children has become a household word, and who was in life the embodiment of that sound practical sense which befits the great lawgiver and constructor of governments. Rhode Island, the land of Roger Williams, is here, one of the two last States, in her jealousy of the public liberty, to give in her adhesion to the Constitution and among the earliest to hasten to its rescue. The great Empire State of New York, represented thus far but by one delegate, is expected daily in fuller force to join in the great work of healing the discontents of the times and restoring the reign of fraternal feeling. New Jersey is also here, with the memories of the past covering her all over. Trenton and Princeton live immortal in story, the plains of the last encircled with the heart's blood of Virginia's sons. Among her delegation I rejoice to recognize a gallant son of a signer of the immortal Declaration, which announced to the world that thirteen provinces had become thirteen independent and sovereign States. And here too is Delaware, the land of the Bayards and the Rodneys, whose soil at Brandywine was moistened by the blood of Virginia's youthful Monroe. Here is Maryland, whose massive columns wheeled into line with those of Virginia in the contest for glory, and whose State-House at Annapolis was the theatre of a spectacle of a successful commander, who, after liberating his country, gladly ungirded his sword and laid it down upon the altar of that country. Then comes Pennsylvania, rich in revolutionary lore, bringing with her the deathless names of Franklin and Morris, and I trust ready to renew from the belfry of Independence Hall the chimes of the old bell, which announced freedom and independence in former days. All Hail to North Carolina, with her Mecklenburg Declaration in her hand, standing erect on the ground of her own probity and firmness in the cause of the public liberty, and represented in her attributes by her Macon, and in this assembly by her distinguished sons at no great distance from me. Four daughters of Virginia, also, cluster around the council board on the invitation of their ancient mother—the eldest, Kentucky, whose sons, under that intrepid warrior, Anthony Wayne, gave freedom of settlement to the territory of her sister Ohio. She extends her hand daily and hourly across *la belle rivière*, to grasp the hand of some one of kindred blood of the noble States of Indiana, and Illinois, and Ohio, who have grown up into powerful States, already grand, potent, and almost imperial. Tennessee is not here, but is coming—prevented from being here only by the floods which have swollen her rivers. When she arrives she will wear the badges on her warrior crest of victories won, in company with the great West, on many an ensanguined plain, and standards torn from the hands of the

conquerors at Waterloo. Missouri and Iowa, and Michigan, Wisconsin, and Minnesota still linger behind, but it may be hoped that their hearts are with us in the great work we have to do.

"Gentlemen, the eyes of the whole country are turned to this assembly in expectation and hope. I trust that you may prove yourselves worthy of the great occasion. Our ancestors probably committed a blunder in not having fixed upon every fifth decade for a call of a General Convention to amend and reform the Constitution. On the contrary, they have made the difficulties next to insurmountable to accomplish amendments to an instrument which was perfect for five millions of people, but not wholly so as to thirty millions. Your patriotism will surmount the difficulties, however great, if you will but accomplish one triumph in advance, and that is, a triumph over party. And what is party when compared to the task of rescuing one's country from danger? Do that, and one long loud shout of joy and gladness will resound throughout the land."

The Conference then proceeded to organize in detail, by the appointment of officers, the adoption of rules, &c. The mode of voting adopted was by States, each State giving only one vote.

The resolutions adopted by the respective States to be considered by the Conference were laid before it by the delegates from those States. They possess much interest as expressing the views of those bodies at the commencement of 1861, on the most important questions before the country.

Massachusetts authorized the Governor and Council to appoint seven commissioners to proceed to Washington "to confer with the General Government, or with the separate States, or with any association of delegates from such States, and to report their doings to the Legislature at its present session; it being expressly declared that their acts shall be at all times under the control, and subject to the approval or rejection of the Legislature."

Rhode Island appointed her commissioners, "to meet such commissioners as may be appointed by other States, in the city of Washington, on the 4th day of February next, to consider, and, if practicable, agree upon some amicable adjustment of the present unhappy national difficulties, upon the basis and in the spirit of the Constitution of the United States."

New York resolved that, in thus acceding to the request of Virginia, "it is not to be understood that this Legislature approves of the propositions submitted by the General Assembly of that State, or concedes the propriety of their adoption by the proposed Convention. But while adhering to the position she has heretofore occupied, New York will not reject an invitation to a conference, which, by bringing together the men of both sections, holds out the possibility of an honorable settlement of our national difficulties, and the restoration of peace and harmony to the country."

New Jersey declared that the resolutions and propositions submitted to the Senate of the United States by John J. Crittenden of Kentucky for the compromise of the questions in dispute between the people of the Northern and of the Southern States, or any other constitutional method that would permanently settle the question of slavery, "will be acceptable to the people of the State of New Jersey, and the Senators and Representatives in Congress from New Jersey be requested and earnestly urged to support these resolutions and propositions."

The Legislature of Pennsylvania expressed the opinion that no reasonable cause existed for the extraordinary excitement pervading some of the States, in relation to their domestic institutions, and declared that "while Pennsylvania still adheres to, and cannot surrender, the principles which she has always entertained on the subject of slavery, this Legislature is willing to accept the invitation of Virginia and unite with her in an earnest effort to restore the peace of the country, by such means as may be consistent with the principles upon which the Constitution is founded." That body also resolved that, in their opinion, "the people of Pennsylvania do not desire any alteration or amendment of the Constitution of the United States, and any recommendation from this body to that effect, while it does not come within its appropriate and legitimate duties, would not meet with their approval; that Pennsylvania will cordially unite with the other States of the Union in the adoption of any proper constitutional measures adequate to guarantee and secure a more strict and faithful observance of the second section of the fourth article of the Constitution of the United States, which provides, among other things, that 'the citizens of each State shall be entitled to all privileges and immunities of citizens of the several States,' and that 'no person held to service or labor in one State under the law thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on the claim of the party to whom such service or labor may be due.'"

Delaware declared that, in the opinion of "this General Assembly, the people of Delaware are thoroughly devoted to the perpetuity of the Union, and that the commissioners appointed, are expected to emulate the example set by the immortal patriots who formed the Federal Constitution, by sacrificing all minor considerations upon the altar of the Union."

The views of the Legislature of Ohio were expressed in these words: "While we are not prepared to assent to the terms of settlement proposed by Virginia, and are fully satisfied that the Constitution of the United States as it is, fairly interpreted and obeyed by all sections of our country, contains ample provisions within itself for the correction of all evils complained of, yet a disposition to reciprocate the patriotic spirit of a sister State, and a sincere desire to

have harmoniously adjusted all differences between us, induce us to favor the appointment of the commission as requested."

The State of Indiana required her delegates to take no action that would commit the State until nineteen of the States are represented, nor without first having communicated with the General Assembly in regard to such action, and having received the authority of the same to commit the State. Like Ohio, she declared that while she was not prepared to assent to the terms of settlement proposed by the State of Virginia, and was fully satisfied that the Constitution, if fairly interpreted and obeyed, contained ample provision within itself for the correction of the evils complained of, "still, with a disposition to reciprocate the patriotic desire of the State of Virginia, and to have harmoniously adjusted all differences existing between the States of the Union, this General Assembly is induced to respond to the invitation of Virginia, by the appointment of the commissioners herein provided for; but as the time fixed for the Convention to assemble is so near at hand that the States cannot all be represented, it is expected that the commissioners on behalf of this State will insist that the Convention adjourn until such time as the States shall have an opportunity of being represented."

Illinois declared that her acceptance of the invitation of Virginia was not an expression of opinion on the part of the State that any amendment of the Federal Constitution was requisite to secure to the people of the slaveholding States adequate guarantees for the security of their rights, nor an approval of the basis of settlement of our difficulties proposed by the State of Virginia, but it is an expression of our willingness to unite with the State of Virginia in an earnest effort to adjust the present unhappy controversies in the spirit in which the Constitution was originally formed, and consistently with its principles.

Kentucky was of the opinion that the propositions embraced in the resolution of her Senator, Crittenden, so construed that the first article proposed as an amendment to the Constitution of the United States should apply to all the territory of the United States now held or hereafter acquired south of the latitude 36 deg. and 30 min., and provide that slavery of the African race should be effectually protected as property therein during the continuance of the Territorial Government; and the fourth article should secure to the owners of slaves the right of transit with their slaves between and through non-slaveholding States and Territories, constituted the basis of such an adjustment of the unhappy controversy which divided the States of this Confederacy, as would be acceptable to the people of that Commonwealth.

Missouri sent her delegates "to endeavor to agree upon some plan of adjustment of existing difficulties, so as to preserve or to reconstruct the Union of these States, and to secure the honor and equal rights of the slaveholding States. Said commissioners shall always be

under the control of the General Assembly, except when the State Convention shall be in session, during which time they shall be under the control of the Convention."

The plan of adjustment suggested by the Legislature of Tennessee was the same as that proposed by that body to a convention of delegates from slaveholding States, and embraced several points. First: that African slaves as held under the institutions of the slaveholding States shall be recognized as property and entitled to the status of other property in the States where slavery exists, in all places in those States under the exclusive jurisdiction of Congress, in all the territories south of 36 deg. 30 min., in the District of Columbia, in transit and whilst temporarily sojourning with the owner in non-slaveholding States and Territories north of 36 deg. 30 min., and when fugitives from the owner in the several places above named, and in all places under the exclusive jurisdiction of Congress in the non-slaveholding States. Second: that in all territory now owned or hereafter acquired south of 36 deg. 30 min., African slavery should be protected by all the departments of the Federal and Territorial Governments, and in all north of that line it shall not be recognized; and, States formed south of that line shall be admitted to the Union as slave States, and those formed north of that line shall be admitted as free States. Third: that Congress shall have no power to abolish slavery in places under its exclusive jurisdiction, in slaveholding States. Fourth: that Congress shall have no power to abolish slavery in the District of Columbia while it exists in either of the adjoining States, nor without the consent of the inhabitants, nor without just compensation to the owners; nor prohibit the officers of the Federal Government or members of Congress from bringing their slaves within the District, and holding them there during their sojourn. Fifth: that Congress shall have no power to hinder the transportation of slaves from one State to another, whether by land, navigable rivers, and the seas. Sixth: that when a fugitive slave is not surrendered, the State so failing to deliver, shall pay the value of the slave and damages. Seventh: that no future amendment of the Constitution should affect the six preceding articles, or give to Congress any power to abolish or interfere with slavery in any slaveholding State. Eighth: that slave property shall be secure in transit in non-slaveholding States or Territories, and in the District of Columbia. Ninth: an amendment to the effect that all fugitives shall be deemed to be those offending the laws within the jurisdiction of the State, and that it is the duty of each State to suppress armed invasions of another State.

Such were the views represented by the delegates to this Convention. The subject before the Convention was to declare some common ground upon which all could agree, and which would be acceptable to the people of the United

States, and thus heal the divisions existing through the country.

The regular order of business was commenced by a motion on the part of James Guthrie, of Kentucky, that the following resolution be adopted:

Resolved, That a committee of one from each State be appointed by the Commissioners thereof, to be nominated to the President, and to be appointed by him, to whom shall be referred the resolutions of the State of Virginia, and the other States represented, and all propositions for the adjustment of existing difficulties between States, with authority to report what they may deem right, necessary, and proper to restore harmony and preserve the Union, and that they report on or before Friday.

The committee appointed under this resolution was composed of the following delegates:

New Hampshire, Asa Fowler; Vermont, Hiland Hall; Rhode Island and Providence Plantations, Samuel Ames; Connecticut, Roger S. Baldwin; New Jersey, Peter D. Vroom; Pennsylvania, Thomas White; Delaware, Daniel M. Bates; North Carolina, Thomas Ruffin; Kentucky, James Guthrie; Ohio, Thomas Ewing; Indiana, Caleb B. Smith; Illinois, Stephen T. Logan; Iowa, James Harlan; Maryland, Reverdy Johnson; Virginia, James A. Seddon; Missouri, A. W. Doniphan; Tennessee, F. K. Zollicoffer; New York, David Dudley Field; Massachusetts, Francis B. Crowninshield; Maine, Lot M. Morrill.

On the 15th of February, the committee laid before the Convention a report and the following amendments to the Constitution:

ARTICLE 1. In all the territory of the United States, not embraced within the limits of the Cherokee treaty grant, north of a line from east to west on the parallel of 36 degrees 30 minutes north latitude, involuntary servitude, except in punishment of crime, is prohibited whilst it shall be under a Territorial Government; and in all the territory south of said line, the status of persons owing service or labor as it now exists shall not be changed by law whilst such territory shall be under a Territorial Government; and neither Congress nor the Territorial Government shall have power to hinder or prevent the taking to said territory of persons held to labor or involuntary service, within the United States, according to the laws or usages of the State from which such persons may be taken, nor to impair the rights arising out of said relations, which shall be subject to judicial cognizance in the Federal Courts, according to the common law; and when any territory north or south of said line, within such boundary as Congress may prescribe, shall contain a population required for a member of Congress, according to the then Federal ratio of representation, it shall, if its form of government be republican, be admitted into the Union on an equal footing with the original States, with or without involuntary service or labor, as the constitution of such new State may provide.

ART. 2. Territory shall not be acquired by the United States, unless by treaty; nor, except for naval and commercial stations and depots, unless such treaty shall be ratified by four-fifths of all members of the Senate.

ART. 3. Neither the Constitution, nor any amendment thereof, shall be construed to give Congress power to regulate, abolish, or control, within any State or territory of the United States, the relation established or recognized by the laws thereof touching persons bound to labor or involuntary service therein, nor to interfere with or abolish involuntary service in the District of Columbia without the consent of Maryland and without the consent of the owners, or making the owners who do not consent just compensation; nor the power to interfere with or prohibit representatives and others from bringing with them to the city of

Washington, retaining, and taking away, persons so bound to labor; nor the power to interfere with or abolish involuntary service in places under the exclusive jurisdiction of the United States within those States and Territories where the same is established or recognized; nor the power to prohibit the removal or transportation, by land, sea, or river, of persons held to labor or involuntary service in any State or Territory of the United States to any other State or Territory thereof where it is established or recognized by law or usage; and the right during transportation of touching at ports, shores, and landings, and of landing in case of distress, shall exist. Nor shall Congress have power to authorize any higher rate of taxation on persons bound to labor than on land.

ART. 4. The third paragraph of the second section of the fourth article of the Constitution shall not be construed to prevent any of the States, by appropriate legislation, and through the action of their judicial and ministerial officers, from enforcing the delivery of fugitives from labor to the person to whom such service or labor is due.

ART. 5. The foreign slave trade and the importation of slaves into the United States and their Territories, from places beyond the present limits thereof, are forever prohibited.

ART. 6. The first, second, third, and fifth articles, together with this article, of these amendments, and the third paragraph of the second section of the first article of the Constitution, and the third paragraph of the second section of the fourth article thereof, shall not be amended or abolished without the consent of all the States.

ART. 7. Congress shall provide by law that the United States shall pay to the owner the full value of his fugitive from labor, in all cases where the marshal or other officer, whose duty it was to arrest such fugitive, was prevented from so doing by violence or intimidation, or when, after arrest, such fugitive was rescued by force, and the owner thereby prevented and obstructed in the pursuit of his remedy for the recovery of such fugitive.

Two or three members of the committee submitted individual reports, as Mr. Baldwin, of Connecticut, Mr. Seddon, of Virginia. Mr. Wickliffe, of Kentucky, presented a preamble and resolutions, and Mr. Tuck, of New Hampshire, offered an address and resolutions. Subsequently the report of the committee was taken up by sections, and each discussed and amended until the entire report was thus revised. This occupied the Convention until the afternoon session of the 26th, when Mr. Guthrie moved the adoption of the first section. It had been so modified as to read as follows:

SECTION 1. In all the present territory of the United States, north of the parallel of thirty-six degrees and thirty minutes of north latitude, involuntary servitude, except in punishment of crime, is prohibited. In all the present territory south of that line, the status of persons held to involuntary service or labor, as it now exists, shall not be changed; nor shall any law be passed by Congress or the Territorial Legislature to hinder or prevent the taking of such persons from any of the States of this Union to said territory, nor to impair the rights arising from said relation; but the same shall be subject to judicial cognizance in the Federal Courts, according to the course of the common law. When any territory north or south of said line, within such boundary as Congress may prescribe, shall contain a population equal to that required for a member of Congress, it shall, if its form of government be republican, be admitted into the Union on an equal footing with the original States, with or without involuntary servitude as the constitution of such State may provide.

The vote on the adoption of the section was as follows:

AYES.—Delaware, Kentucky, Maryland, New Jersey, Ohio, Pennsylvania, Rhode Island, Tennessee—8.

NOES.—Connecticut, Illinois, Iowa, Maine, Massachusetts, Missouri, New York, North Carolina, New Hampshire, Vermont, Virginia—11.

So its adoption was not agreed to.

A reconsideration of this vote was called for by the delegates from Illinois and agreed to, 14 to 5. On the next day the question was again taken on the adoption of the section, with the following result:

AYES.—Delaware, Illinois, Kentucky, Maryland, New Jersey, Ohio, Pennsylvania, Rhode Island, Tennessee—9.

NOES.—Connecticut, Iowa, Maine, Massachusetts, North Carolina, New Hampshire, Vermont, Virginia—8.

Thus the section was adopted.

It was stated by the members from New York, when the State was called, that one of their number, D. D. Field, was absent and the delegation was divided. Thus New York, Indiana, and Kansas were divided.

The adoption of the second section was then moved; it was as follows:

SECTION 2. No territory shall be acquired by the United States, except by discovery, and for naval and commercial stations, depots, and transit routes, without the concurrence of a majority of all the Senators from States which allow involuntary servitude, and a majority of all the Senators from States which prohibit that relation; nor shall territory be acquired by treaty, unless the votes of a majority of the Senators from each class of States hereinbefore mentioned be cast as a part of the two-thirds majority necessary to the ratification of such treaty.

The vote on this section was as follows:

AYES.—Delaware, Indiana, Kentucky, Maryland, Missouri, New Jersey, Ohio, Pennsylvania, Rhode Island, Tennessee, Virginia—11.

NOES.—Connecticut, Illinois, Iowa, Maine, Massachusetts, North Carolina, New Hampshire, Vermont—8.

New York and Kansas were divided.

The adoption of section three of the report, with the amendments, was next moved. The amended section was as follows:

SECTION 3. Neither the Constitution nor any amendment thereof shall be construed to give Congress power to regulate, abolish, or control, within any State, the relation established or recognized by the laws thereof touching persons held to labor or involuntary service therein, nor to interfere with or abolish involuntary service in the District of Columbia without the consent of Maryland and without the consent of the owners, or making the owners who do not consent just compensation; nor the power to interfere with or prohibit representatives and others from bringing with them to the District of Columbia, retaining and taking away, persons so held to labor or service; nor the power to interfere with or abolish involuntary service in places under the exclusive jurisdiction of the United States within those States and Territories where the same is established or recognized; nor the power to prohibit the removal or transportation of persons held to labor or involuntary service in any State or Territory of the United States to any other State or Territory thereof where it is established or recognized by law or usage; and the right during transportation, by sea or river, of touching at ports, shores, and landings, and of landing in case of distress, shall exist; but not the right of transit in or through any State or Territory, or of sale or traffic, against the laws thereof.

Nor shall Congress have power to authorize any higher rate of taxation on persons held to labor or service than on land.

The vote on the adoption of the section was as follows:

AYES.—Delaware, Illinois, Kentucky, Maryland, Missouri, New Jersey, North Carolina, Ohio, Pennsylvania, Rhode Island, Tennessee, Virginia—12.

NOES.—Connecticut, Indiana, Iowa, Maine, Massachusetts, New Hampshire, Vermont—7.

So the section was adopted. Kansas and New York were divided.

The adoption of the fourth section of the report, as amended, was then moved; it was as follows:

SECTION 4. The third paragraph of the second section of the fourth article of the Constitution shall not be construed to prevent any of the States, by appropriate legislation, and through the action of their judicial and ministerial officers, from enforcing the delivery of fugitives from labor to the person to whom such service or labor is due.

The vote on the adoption of this section was as follows:

AYES.—Connecticut, Delaware, Illinois, Indiana, Kentucky, Maryland, Missouri, New Jersey, North Carolina, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont, Virginia—15.

NOES.—Iowa, Maine, Massachusetts, New Hampshire—4.

Thus the section was adopted. Kansas and New York were divided.

The adoption of the fifth section of the report as amended was then moved; it was as follows:

SECTION 5. The foreign slave trade is hereby forever prohibited, and it shall be the duty of Congress to pass laws to prevent the importation of slaves, coolies, or persons held to service or labor into the United States and the Territories from places beyond the limits thereof.

The vote on the adoption of this section resulted as follows:

AYES.—Connecticut, Delaware, Illinois, Indiana, Kentucky, Maryland, Missouri, New Jersey, New York, New Hampshire, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont, Kansas—16.

NOES.—Iowa, Maine, Massachusetts, North Carolina, Virginia—5.

The section was thus adopted.

A motion was next made to adopt the sixth section as amended; it was as follows:

SECTION 6. The first, third, and fifth sections, together with this section of these amendments, and the third paragraph of the second section of the first article of the Constitution, and the third paragraph of the second section of the fourth article thereof, shall not be amended or abolished without the consent of all the States.

The vote on this section was as follows:

AYES.—Delaware, Illinois, Kentucky, Maryland, Missouri, New Jersey, Ohio, Pennsylvania, Rhode Island, Tennessee, Kansas—11.

NOES.—Connecticut, Indiana, Iowa, Maine, Massachusetts, North Carolina, New Hampshire, Vermont, Virginia—9.

New York was divided. So this section was adopted.

The motion was then made to adopt the seventh and last section as amended; it was as follows:

SECTION 7. Congress shall provide by law that the United States shall pay to the owner the full value of his fugitive from labor, in all cases where the marshal or other officer whose duty it was to arrest such fugitive, was prevented from doing so by violence or intimidation, from mobs or other riotous assemblages, or when, after arrest, such fugitive was rescued by like violence or intimidation, and the owner thereby deprived of the same; and the acceptance of such payment shall preclude the owner from further claim to such fugitive. Congress shall provide by law for securing to the citizens of each State the privileges and immunities of citizens in the several States.

The vote on this section was as follows:

AYES.—Delaware, Illinois, Indiana, Kentucky, Maryland, New Jersey, New Hampshire, Ohio, Pennsylvania, Rhode Island, Tennessee, Kansas—12.

NOES.—Connecticut, Iowa, Maine, Missouri, North Carolina, Vermont, Virginia—7.

Thus the last section was adopted. New York was divided.

The adoption of the following resolution was then moved by Mr. Franklin of Pennsylvania:

Resolved, As the sense of this Convention, that the highest political duty of every citizen of the United States is his allegiance to the Federal Government created by the Constitution of the United States, and that no State of this Union has any constitutional right to secede therefrom, or to absolve the citizens of such State from their allegiance to the Government of the United States.

It was moved to lay the resolution on the table. The vote was as follows:

AYES.—Delaware, Kentucky, Maryland, Missouri, New Jersey, North Carolina, Ohio, Tennessee, Virginia—9.

NOES.—Connecticut, Illinois, Indiana, Iowa, Maine, Massachusetts, New York, New Hampshire, Pennsylvania, Rhode Island, Vermont, Kansas—12.

Some amendments were then offered and laid on the table, when its indefinite postponement was moved and carried by the following vote:

AYES.—Delaware, Kentucky, Maryland, Missouri, New Jersey, North Carolina, Ohio, Rhode Island, Tennessee, Virginia—10.

NOES.—Connecticut, Illinois, Indiana, Iowa, Maine, Massachusetts, Pennsylvania—7.

New York was divided.

The following preamble was then offered by Mr. Guthrie, and agreed to:

To the Congress of the United States:

The Convention assembled upon the invitation of the State of Virginia to adjust the unhappy differences which now disturb the peace of the Union and threaten its continuance, make known to the Congress of the United States, that their body convened in the city of Washington on the 4th instant, and continued in session until the 27th.

There were in the body, when action was taken upon that which is here submitted, one hundred and thirty-three commissioners, representing the following States: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, Tennessee, Kentucky, Missouri, Ohio, Indiana, Illinois, Iowa, Kansas.

They have approved what is herewith submitted, and respectfully request that your honorable body will submit it to conventions in the States as an article of amendment to the Constitution of the United States.

Permission was then asked by Mr. Johnson to have placed in the journal of the Convention the following resolution:

Resolved, That while the adoption, by the States of South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas, of ordinances declaring the dissolution of their relations with the Union, is an event deeply to be deplored, and whilst abstaining from any judgment on their conduct, we would express the earnest hope that they may soon see cause to resume their honored places in this Confederacy of States; yet to the end that such return may be facilitated, and from the conviction that the Union being formed by the assent of the people of the respective States, and being compatible only with freedom and the republican institutions guaranteed to each, cannot and ought not to be maintained by force, we deprecate any effort by the Federal Government to coerce in any form the said States to reunion or submission, as tending to irreparable breach, and leading to incalculable ills; and we earnestly invoke the abstinence from all counsels or measures of compulsion towards them.

This permission was granted.

The result of the labors of the Convention was then laid before Congress, (*see CONGRESS, U. S.*) and the Convention adjourned.

PEDRO V., (late King of Portugal,) **PEDRO DE ALCANTARA MARIA FERNANDO MIGUEL RAPHAEL GABRIEL GONZAGA XAVIER JOÃO ANTONIO LEOPOLDO VICTOR FRANCISCO D'ASSIS JULIO ANEOLIO**, born at Lisbon, Sept. 16, 1837, died Nov. 24, 1861, in the same city. He was the son of Donna Maria II. de Gloria, and Fernando of Saxe Coburg Gotha, king consort. At the death of his mother he became king under his father's regency. He visited England in Nov. 1853, and France at the great exhibition in 1855, and subsequently Italy, Switzerland, and Belgium. He attained his majority (18 years) in Sept. 1855. During his father's regency, extradition treaties were made with France and Belgium, and treaties of navigation and commerce with the States of South America. On assuming the crown in 1855, he continued the ministry of the Duke de Saldanha, but the succeeding year that ministry fell before the opposition, and was succeeded for a year by the Luli Ministry, which in 1857 gave place to a still more progressive ministry, that of D'Avila. In 1859, this in turn was succeeded by that of Terceira Fontes. In May, 1858, Don Pedro married Stephanie, princess of Hohenzollern Sigmaringen, who died in July 1859, without issue. The king had a high reputation as an intelligent and enlightened ruler. He was attacked early in Nov. 1861, by a typhoid fever, which in a few days proved fatal, and from which one of his brothers also died. He was succeeded by his brother, Don Luis Philippe, who ascended the throne as Luis II.

PENNSYLVANIA, one of the Middle States, and the second in population, is bounded north by Lake Erie and New York, east by New York and New Jersey, south by Delaware, Maryland, and Virginia, and west by Virginia and Ohio. It is about 310 miles in length, and 160 in width, except at the northwest corner, where it is 175 miles, and contains an area of 46,000 square miles. The population in 1860 was 2,849,997 white; 56,373 free colored; total, 2,906,370. The ratio of increase during the previous ten years was 26.20 white, and 5.12 colored. The

vote of the State at the presidential election in 1856 was: Fremont 148,272; Buchanan, 230,772; Fillmore, 82,202. In 1860 the vote was: Lincoln, 268,030; Douglas, 16,765; Breckinridge, 178,871; Bell, 12,776.

In mineral wealth, especially coal and iron, Pennsylvania is the first State in the Union. (See ANTHRACITE.) In manufactures she ranks among the first States of the Union, and in agriculture and commerce, internal improvements and public institutions, she holds an equally prominent position. (See NEW AMERICAN CYCLOPEDIA.) The Governor is elected by the people for three years. Andrew G. Curtin was inaugurated as Governor on January 15, 1861. The Senate consists of thirty-three members elected for three years, and the House of Representatives of one hundred members elected annually.

The Governor upon his inauguration delivered an address, in which he stated his view of the affairs of the nation. He pledged himself to stand between the Constitution and all encroachments instigated by hatred, ambition, fanaticism, or folly. He said the election of the President had been made a pretext for disturbing the peace of the country by wresting from the Federal Government the powers which the people conferred on it when the Constitution was adopted. There had been nothing in the life or acts of Mr. Lincoln to warrant the excitement. Blinded in their judgment, a part of the people were precipitating themselves into a revolution.

He proposed the repeal of the personal liberty bill, if it contravened any Federal law, and said: "It is the first duty of the Federal Government to stay the progress of anarchy, enforce the laws, and Pennsylvania will give it a united, honest, and faithful support. The people mean to preserve the Union at every hazard."

On the 17th of January, the House passed a series of resolutions approbatory of the course of Major Anderson, and Governor Hicks of Maryland, and pledging to Maryland the fellowship and support of Pennsylvania.

As early as the 24th of January the Legislature adopted the following resolutions relative to the maintenance of the Constitution and the Union:

Whereas a convention of delegates assembled in the city of Charleston, in the State of South Carolina, did, on the 20th day of December, in the year of our Lord 1860, adopt an ordinance, entitled "An ordinance to dissolve the Union between the State of South Carolina and other States united with her under the compact entitled 'The Constitution of the United States of America.'"

1. *Resolved*, That if the rights of the people of South Carolina under this Constitution are disregarded, their tranquility disturbed, their prosperity retarded, or their liberties imperilled, by the people of any other State, full and adequate redress can, and ought to be, provided for such grievances through the action of Congress, and other proper departments of the National Government.

2. *Resolved*, That the people of Pennsylvania entertain and desire to cherish the most fraternal sentiments for their brethren of other States, and are ready now, as they have ever been, to cooperate in all measures

needful for their welfare, security, and happiness, under the Constitution which makes us one people. That while they cannot surrender their love of liberty inherited from the founders of their State, sealed with the blood of the Revolution, and witnessed in the history of their legislation; and while they claim the observance of all their rights under the Constitution, they nevertheless maintain now, as they have ever done, the constitutional rights of the people of the slaveholding States, to the uninterrupted enjoyment of their own domestic institutions.

3. *Resolved*, That we adopt the sentiment and language of President Andrew Jackson, expressed in his Message to Congress, on the 16th day of January, 1833: "That the right of the people of a single State to absolve themselves at will, and without the consent of the other States, from their most solemn obligations, and hazard the liberties and happiness of the millions composing this Union, cannot be acknowledged; and that such authority is utterly repugnant both to the principles upon which the General Government is constituted, and the objects which it was expressly formed to attain."

4. *Resolved*, That the Constitution of the United States of America contains all the powers necessary to the maintenance of its authority, and it is the solemn and most imperative duty of the Government to adopt and carry into effect whatever measures may be necessary to that end; and the faith and the power of Pennsylvania are hereby pledged to the support of such measures, in any manner and to any extent that may be required of her by the constituted authorities of the United States.

5. *Resolved*, That all plots, conspiracies, and warlike demonstrations against the United States, in any section of the country, are treasonable in their character; and whatever power of the Government is necessary to their suppression, should be applied to that purpose without hesitation or delay.

However the people of the State had been divided heretofore, in reference to political parties, they were unanimous in favor of the Union, the observance of the Constitution, and the enforcement of the laws. In Philadelphia a large public meeting was convened at this time, at which persons of all parties were present. Major Anderson had then just removed from Fort Moultrie, in Charleston Harbor, to Fort Sumter with his garrison. This meeting approved his conduct with a unanimous voice. In other parts of the State similar demonstrations were of almost daily occurrence. Nevertheless, so long as the people of the Southern States did not violate the laws, they had many sympathizing friends in Pennsylvania; but the seizure of Federal property and the open defiance of the Constitution was a shock to those friendly sympathies. The progress of affairs, however, was watched with intense interest. On the 9th of April the Governor sent a Message to the Legislature recommending, in view of the condition of national affairs, that measures be immediately adopted for remedying existing defects in the militia system of Pennsylvania. With a view to effecting this object he suggested that a military bureau be established at Harrisburg, that the militia laws be modified, and that a proper distribution of suitable arms be made to such citizens as should attach themselves to volunteer companies in the State.

Some of his views on the subject were thus expressed:

"The militia system of the State, during a

long period distinguished by the pursuits of peaceful industry exclusively, has become wholly inefficient, and the interference of the Legislature is required to remove its defects, and to render it available to the public service.

"Precautions such as I have suggested are wise and proper at all times in a Government like ours; but especial and momentous considerations, arising from the condition of public affairs outside the limits, yet of incalculable consequence to the people, and demanding the gravest attention of the Legislature of Pennsylvania, invest the subject to which your action is invited by this communication with extraordinary interest and importance.

"We cannot be insensible to the fact that serious jealousies and divisions distract the public mind, and that in portions of this Union the peace of the country, if not the safety of the Government itself, is endangered.

"Military organizations of a formidable character, which seem not to be demanded by any existing public exigency, have been formed in certain of the States. On whatever pretext these extraordinary military preparations may have been made, no purpose that may contemplate resistance to the enforcement of the laws will meet sympathy or encouragement from the people of this Commonwealth.

"Pennsylvania yields to no State in her respect for and her willingness to protect, by all needful guarantees, the constitutional rights and constitutional independence of her sister States, nor in fidelity to that constitutional Union whose unexampled benefits have been showered alike upon herself and them.

"The most exalted public policy and the clearest obligations of true patriotism, therefore, admonish us, in the existing deplorable and dangerous crisis of affairs, that our militia system should receive from the Legislature that prompt attention which public exigencies, either of the State or of the nation, may appear to demand, and which may seem in your wisdom best adapted to preserve and secure to the people of Pennsylvania and the Union the blessings of peace and the integrity and stability of our unrivalled Constitutional Government.

"The government of this great State was established by its illustrious founder 'in deeds of peace.' Our people have been trained and disciplined in those arts which lead to the promotion of their own moral and physical development and progress, and, with the highest regard for the rights of others, have always cultivated fraternal relations with the people of all the States devoted to the Constitution and the Union, and always recognizing the spirit of concession and compromise that underlies the foundation of the Government.

"Pennsylvania offers no counsel and takes no action in the nature of a menace. Her desire is for peace, and her object the preservation of the personal and political rights of citizens, of the true sovereignty of States, and the supremacy of law and order.

"Animated by these sentiments and indulging an earnest hope of the speedy restoration of those harmonious and friendly relations between the various members of this Confederacy which have brought our beloved country to a condition of unequalled power and prosperity, I commit the grave subject of this communication to your deliberation."

A bill, corresponding to those recommendations of the Governor, was immediately reported in the Legislature, which passed both Houses without amendment, and became a law on the 12th of April. It also appropriated half a million of dollars for the purpose of arming and equipping the militia. This gathering of the elements of the approaching contest, indicates that those who set them in motion knew what was at hand and were determined to be ready for the fearful contest. In the House the bill passed by a vote of ayes, 65; noes, 28.

Mr. Smith, a democratic member of the House, after despatches had been read announcing the commencement of hostilities at Charleston, changed his vote in order to urge forward this bill. In the Senate it was adopted by a vote of ayes, 26; noes, 6; and before eight o'clock that evening became a law by receiving the signature of the Governor.

On the next day a bill to define and punish treason passed the Senate. It forbid any citizen of the State to take a military commission from the enemies of the United States, or to engage in any plot or conspiracy, or traitorous correspondence, or furnish arms, under a penalty of two years' imprisonment, and a fine of five thousand dollars. Any person convicted of selling vessels to the enemy or fitting out privateers should be punished by five years' imprisonment and a fine of five thousand dollars. All officers of the Pennsylvania volunteers were required to take an oath of allegiance to the United States within thirty days; on refusal they should be at once deprived of their commissions. Two new regiments specially raised for the United States reported on this day as ready for immediate service. This was two days before the proclamation of the President calling out troops was issued. The Legislature, immediately after the passage of this bill, adjourned.

On the 15th of April the excitement in Philadelphia, the principal city in the State, and one of the largest in the Union, was great in consequence of the attack upon Fort Sumter, the proclamation of the President calling for volunteers, and the feeling of exasperation in the public mind caused by the presence in the city of persons who were suspected of sympathy with the secessionists. A large mob collected in the streets, which at one time numbered about ten thousand. The office of the "Palmetto Flag," a newspaper recently commenced for advertising purposes, was visited, and the demonstrations against it were of so decided a character as to call for the interference of the police. The proprietors were obliged to display the American flag, and Mayor Henry made a speech

deprecating violence, but giving assurances that no traitors should be tolerated in Philadelphia. The mob subsequently visited several other establishments and the houses of several citizens suspected of Southern sympathies. At one period it was feared that all control of the crowd would be lost by the police, and that more serious acts of lawlessness would occur. When, at the office of the "Palmetto Flag," the danger of the beginning of a riot seemed imminent, Mayor Henry appeared at one of the windows with the "Stars and Stripes" in his hands, and thus addressed the tumultuous crowd:

"Fellow-citizens: Lend me your ears as becoming good and loyal citizens—men loyal to your country and her honor. (Cheers.) My fellow-citizens, no traitor shall rear his head or have a foothold in the city of Philadelphia. (Great cheering.) With the help of Almighty God, treason shall not raise its destructive hand to tear down the flag of the Union. (Tremendous cheers.) I call upon you now and for the future to protect this flag at the point of the bayonet and at the cost of our lives. (Here he waved the American flag mid the most deafening yells.) Fellow-citizen while I conjure you to stand by the flag of the Union, do not forget the private rights of individuals; be calm and resolute, defend your flag against treason, but act with prudence, and do not invade the rights or property of individuals." (Great cheering.)

American flags were then displayed from the windows of the building and the crowd moved off.

In all sections of the city might be seen the American colors displayed, not merely on newspaper offices, the Custom House, Corn Exchange, manufactories and stores, but also upon private dwellings.

Throughout the city a Union pledge responding to the President's proclamation, and declaring an unalterable determination to sustain the Government, throwing aside all differences of political opinion, received the signatures of all classes of citizens.

On the 20th of April, the Governor issued a proclamation convening an extra session of the Legislature. It was as follows:

Whereas, An armed rebellion exists in a portion of the States of the Union, threatening the destruction of the National Government, periling public and private property, endangering the peace and security of this Commonwealth, and inviting systematic piracy; and

Whereas, Adequate provision does not exist by law to enable the Executive to make the military power of the State as available and efficient as it should be for the common defence of the State and the General Government; and

Whereas, An occasion so extraordinary requires prompt legislative power;

Therefore, I, Andrew G. Curtin, Governor of the Commonwealth, by virtue of the power vested in me, do hereby convene the General Assembly of this Commonwealth, and require the members of the Senate and House of Representatives to meet at their respective houses at Harrisburg, on Tuesday, 30th of April, at noon, there to take into consideration, and adopt such measures, in the premises, as the present exigency may demand.

The quota of Pennsylvania under the call of

the President was 14 regiments. This call was enthusiastically responded to by the people of the State. The first detachment of troops which arrived in Washington after the issue of the requisition by the Secretary of War consisted of 500 men from the brigade raised by Gen. W. P. Small of Philadelphia. They left that city on the night of the 17th, and arrived safely at Washington. At the same time companies and regiments commenced to move for Harrisburg from several counties of the State, which manifested a rivalry of each other in a prompt response to the call. Harrisburg became the military centre of the State. It is the capital, and situated on the east bank of the Susquehanna River, 100 miles west by north from Philadelphia, and 110 miles north by east of Washington. Early on the 21st of April soldiers were pouring into the city, and a vast camp was formed. Among them were troops of Ohio, who, in their eagerness to rescue Washington, had come forward in detachments of single companies. In one day there arrived the Cincinnati Zouaves, Pickaway Guards, Cleveland Grays, Cincinnati Rovers, Cincinnati Lafayette Guards, Urbana Rifles, Mansfield Independents. Each of these companies was over 80 strong, and many were in a fine state of discipline; also the Dayton Light Guards, 100 men; Zanesville Guards, 100 men; Steubenville Guards, 100 men, all from the State of Ohio.

The inhabitants of Harrisburg were in the streets that day to see this crowd of uniformed individuals in their unorganized, unmilitary condition. The burning of the bridges near Baltimore, thus cutting off their communication with Washington, added to the excitement. Military operations commenced at once. A body of 2,000 men were thrown forward, by the midnight train, to the first bridge on the way to Baltimore, which had been destroyed on the Baltimore and Harrisburg railroad. These 2,000 were followed by 300 regulars from Carlisle, and by a battery of flying artillery, and 1,000 more volunteers.

On the 27th of April at least 5,000 men had arrived at Camp Curtin in Harrisburg, 2,000 were encamped at Lancaster, and 5,000 were in readiness to march from Philadelphia.

On the 19th a request from the War Department had been sent to the Governor that the troops preparing in the State should be clothed, armed, equipped, subsisted, and transported by the State, in consequence of the inability of the Federal Government. 25 regiments, comprising 20,175 men were thus fitted out, and served for three months under the President's proclamation. On the expiration of their term 8,000 or 10,000 of the volunteers were returned to Harrisburg without any previous notice, and with neither cooked food or tents.

On the 30th of April the special session of the Legislature commenced, at which an act was passed authorizing the organization of a reserve corps to be armed, equipped, clothed, subsisted, and paid by the State, and drilled in

camps of instruction in anticipation. A loan of \$3,000,000 was authorized to defray the expenses of that and other military organizations. At the time of the passage of the act more than sufficient men to form 10 regiments had been accepted, and were under the control of the Governor. The force thus raised as a reserve corps was drilled in four camps in different parts of the State, until it was taken into the service of the United States.

On the 16th the Legislature passed unanimously the following resolutions:

Whereas, The States of South Carolina, Georgia, Alabama, Mississippi, Louisiana, Florida, and Texas are in armed and treasonable rebellion against the sovereign authority and Government of the United States, and have constituted, and are endeavoring to maintain, a treasonable and rebellious government, intended to subvert the Constitution and laws of the United States, and to dissolve their allegiance thereto, and have seized the revenues, forts, arsenals, navy yards, and such other exclusive property of the National Government as were within their power of seizure, and have coerced loyal citizens within their borders to unwilling submission to their authority, and have raised officers, equipped and assembled large armies and ships of war, with the avowed purpose to wage aggressive warfare against the Constitution and lawful authorities of the Union, and against the liberties of the people, and have besieged, attacked, and captured a fort in the actual and peaceable possession of the United States troops, and have made the garrison prisoners of war, whilst under the protection of the National flag and the Federal laws.

Resolved, That the faith, credit, and resources of the State, in both men and money, are hereby pledged to any amount and to every extent which the Federal Government may demand to subdue the rebellion; to punish the treason; to enforce the laws; to protect the lives, the liberties, and the property of the people; and to maintain inviolate the Constitution and the sovereignty of the nation.

Resolved, That the Governor be and is hereby directed to forward a certified copy of this preamble and resolution to the President of the United States.

Besides those of the troops of Pennsylvania which were sent forward to Washington, others were ordered to Chambersburg, an important town in the southern part of the State, and directly north of Hagerstown, Maryland, and Harper's Ferry, in Virginia. This continued until 20,000 troops had been concentrated there. They were put under the command of Gen. Patterson, by whom they were rapidly organized, and placed on an efficient footing. Excepting a regiment of U. S. regulars, and half a regiment of U. S. cavalry, the remainder were volunteers. Of these all were Pennsylvania troops, except one regiment from Michigan and one from Rhode Island. The force of artillery was 6 field-batteries of six guns each, and one or two howitzers. This force subsequently moved to Hagerstown, in Maryland, then to Harper's Ferry, and over the Potomac into Virginia, where they were stationed at the time of the battle at Bull Run. Subsequently it was withdrawn to the Maryland side of the Potomac, and placed under the command of Gen. Banks. Other troops were added, and it remained as a check upon the Confederate force on the Virginia side of the Potomac. Many skirmishes

ensued between the pickets and outposts of these two hostile forces, of which the most important was at Ball's Bluff. (*See BALL'S BLUFF.*)

Towards the close of July the whole reserve corps in the State was called for under a requisition, and taken into the Federal service. It comprised 15 regiments, and contained 15,856 men. The whole expense of this reserve corps, except transportation, to the State, was \$855,444. Further requisitions were made, until the number of regiments was 115. The force existing at the close of the year was as follows:

REGIMENTS IN SERVICE.

66 regiments of infantry, of which 6 were rifle regiments	71,279
11 regiments of cavalry	12,600
1 regiment of artillery	1,077
	<hr/> 84,956

COMPANIES IN SERVICE.

7 companies of infantry	707
6 " " cavalry	578
6 " " artillery	936
	<hr/> 2,221
	<hr/> 87,177
Enlistments in other than Pennsylvania organizations, estimated (the officers of which are in course of being commissioned)	6,400
Total in service	<hr/> 93,577

REGIMENTS PREPARING FOR SERVICE.

12 regiments of infantry	13,092
1 regiment of cavalry	1,136
1 regiment of artillery	1,077
	<hr/> 15,805

COMPANIES PREPARING FOR SERVICE.

1 company of cavalry	109
4 companies of artillery	624
	<hr/> 733
Total preparing for service	16,038
In service	<hr/> 93,577

Pennsylvania's contribution

109,615 exclusive of 20,175 three-months men disbanded.

At the same time the State had 62 pieces of artillery, of which 17 needed repairs; 26,753 muskets and rifles, some of which were in the hands of mechanics being repaired; 1,910 were in the hands of volunteer corps throughout the State; 1,930 in the possession of county commissioners, and 1,000 with the reserve corps of Philadelphia. In addition to this amount, the city of Philadelphia had 9 pieces of rifled artillery, and 4,976 muskets and rifles, and also 440 sabres and 826 pistols, with the necessary accoutrements for cavalry use. The State had also in the arsenal at Harrisburg 1,966 sabres and swords, and 1,957 pistols; together with a large amount of accoutrements and ammunition for artillery and small-arms. Thus her military contributions for the war showed a liberality and promptness equal to any other State.

Two vacancies having occurred during the year in the representation to Congress from the State, it became necessary to fill them. In the twelfth district the candidate nominated by the Democratic Convention accepted the nomi-

nation upon the condition that all other issues were to be set aside, but that of "the Constitution and the enforcement of the laws." Two days later the Republican Convention met, and nominated the same candidate. Thus rapidly had party issues here vanished from sight. In the second district the Republican Convention refused to set aside party issues and consult with the democrats by a vote of 13 to 20.

The debt of the State of Pennsylvania was mostly incurred for the construction of her great lines of canals connecting Philadelphia with the Ohio at Pittsburg. These cost over \$20,000,000, but did not yield, under State management, an adequate return, although they greatly aided the development of State commerce. The State recently has sold the whole line of works to the Pennsylvania Railroad Co. for \$11,081,000, the bonds of which, with other material, cancel an equal amount of the State debt, which consists of \$36,967,291 of 5 per cent. stock, \$400,630 of 6 per cent. stock, \$381,200 of 4½ per cent. stock, and \$100,000 of 4 per cent. stock, together \$37,849,421. This sum includes a loan of \$100,000, issued Nov. 1860, at 92.97 per cent. The State has also stock in incorporated companies, amounting to \$1,746,546. There is also a small unfunded debt, embracing \$99,402 of relief notes, a species of State circulation issued in 1837-39, at a period when the banks had suspended. On the occurrence of the war, the State issued a loan of \$3,000,000, to forward the troops and meet the first expenses of the campaign. For the purpose of organizing and equipping the first levies, the war act authorized the appropriation of \$500,000, and ordered the Governor to issue a 6 per cent. scrip, having one year to run, in order to raise the amount. The banks of the State suspended as a consequence of the war, but the authorities insisted upon as much specie as would meet the interest on the public debt. This payment is to be continued in specie.

There are in Pennsylvania a number of railroads in progress, which are designed to afford to the northwestern part of the State more prompt and intimate connection with Pittsburg and Philadelphia, and which will add to the freight of the great Pennsylvania line. The large tract, forming nearly one-fourth part of the whole State, bounded on the north by New York, south by the Pennsylvania railroad, west by Ohio, and east by the Alleghany, has hitherto been without communication by railroad.

PENSACOLA BAY. This fine bay is located in the northwest corner of Florida, and at the mouth of the Escambia River. On the bar, at the entrance from the Gulf of Mexico, there are twenty-one feet of water. The entrance is narrow, and is bounded by the extremity of Santa Rosa Island on the east side, and by the shore of the mainland on the west side. The breadth of the island at this point is about ¼ of a mile. On the east side of the entrance, and on the extremity of Santa Rosa Island, is Fort Pickens. Nearly opposite, being a little further outward

or seaward, is Fort McRea. Nearly opposite the entrance, on the farther side of the bay, is Fort Barrancas, and nearly one mile to the eastward, along the shore, is the navy yard. On the secession of Florida the Barrancas was abandoned, its guns spiked, and its munitions removed by Commandant Armstrong, of the navy; and on the 12th of January this fort and the navy yard were taken possession of by Florida and Alabama troops. The commandant having a force of about sixty men, and the opposing force consisting of nearly five hundred and fifty. Ultimately all the military positions came into the possession of the Southern troops, except Fort Pickens. They immediately mounted at the navy yard four Dahlgren long 32s, and at Fort Barrancas twenty-five 32s; at Fort McRea were four columbiads and a large number of heavy guns. This work was carried on until the guns were all mounted, additional batteries erected along the shore, and every thing made ready to attack Fort Pickens, or to resist any attack which might be made.

Lieut. A. J. Slemmer, who had been in command of the little Federal force in charge of the forts, took possession of Fort Pickens on the first indication of any thing like an attempt to seize it. It was the strongest and most important of all the fortifications of the bay. In this position he remained securely until relieved of his command. When the Federal Government determined to relieve Fort Sumter, it also resolved to reinforce Fort Pickens, and immediate arrangements were made for that purpose.

On the 7th of April, the steamer *Atlantic* sailed from New York with 450 troops on board, including two companies of light artillery, and a company of sappers and miners, under command of Col. Harvey Brown, together with sixty-nine horses and a large quantity of munitions of war and supplies. On the 13th she reached Key West, and took on board more troops and ordnance, &c., and arrived at Pensacola on the 16th, in the afternoon. With the assistance of the boats of the squadron then there, the larger portion of the officers and men were landed, and entered Fort Pickens before midnight. Between that time and the 23d the remaining troops, stores, &c., were all safely landed. Before the arrival of the *Atlantic*, and on the night of the 12th of April, reinforcements, consisting of one company of artillery, being 86 men and 115 marines, were sent to the fort. The old garrison consisted of 82 men and with this addition amounted to 283 men. The arrival of the *Atlantic* increased the number, and the steamer *Illinois* followed, until the garrison amounted to about 880 men.

Meantime, farther reinforcements were sent out, and a large amount of stores, while quite a fleet of vessels were stationed outside in the Gulf. The first volunteer troops sent, consisted of a New York regiment, under Col. Wm. Wilson. This regiment encamped on the

island near the fort. No serious conflict, however, took place, although the hostile forces were within a short distance of each other. Some daring exploits were performed by Federal troops, one of which, under Lieut. Russel's command, is thus described by a Confederate officer: "The enemy executed, last night, the most brilliant and daring act which has yet marked the history of the war. For some time past they have exhibited unmistakable indications of eagerness for a fight, and have grown more and more audacious. First they fired on one of our schooners. Next they burned the dry dock, and last night, Sept. 13, they made a most daring and reckless raid upon the navy yard. About three o'clock in the morning, five launches, containing about thirty men each, pulled across from Santa Rosa Island to the navy yard, a distance of about two miles. Each launch had in it a small brass howitzer on a pivot. Their main object seems to have been to burn the largest schooner of our harbor police, which was anchored near the wharf. They were led by an officer with the courage of forty Numidian lions, and their success was perfect. Under cover of the darkness, silently, with muffled oars they approached the wharf, and were not discovered until very near it. They then pulled rapidly to the schooner, and grappled to her, when their daring leader shouted, 'Board her,' leading the way himself with a cutlass in one hand, and a blazing fireball in the other. He threw the flambeau into the hold of the schooner, and feeling sure that she was on fire, he ordered his men to take to their launches and pull for life, as he said that a shower of grape would soon be rattling after them. They pulled off a short distance; but before going, they sent back a shower of grape from their howitzers, directed upon our men as they were forming. The darkness rendered the fire uncertain, and only two of our men were wounded. The schooner burned rapidly, and we had to cut her loose from the wharf to save it from destruction. She floated off on the tide, emitting a brilliant flood of light over the surrounding darkness of the scene." Such is the brief account of this very daring adventure.

Affairs continued quiet until the night of the 8th of October, when the enemy attempted a daring attack upon the forces on the island. They hoped to break up the encampment of the volunteer regiment. Early in the evening Col. Jackson visited the camp of the Fifth Georgia Regiment at Pensacola, and informed the troops that he required one hundred and fifty men for an important service, also twenty-seven from the Clinch Rifles, and nineteen from the Irish Volunteers. Every man who was willing to volunteer, was requested to shoulder arms, and every one did so. The captains were then ordered to select the men, who were put under the command of Lieut. Hallenquist. The expedition was accompanied by Col. Jackson. It consisted of twelve hundred men, under the command of Gen. Anderson. About two

o'clock in the morning they landed on the island, and marched upon the Zouave camp. They were first met by Major Vodges, with eighty-five men, some distance above the camp. The major was taken prisoner. The Zouaves were taken chiefly by surprise, but as soon as they recovered, fought desperately. The Confederates penetrated the camp, which was almost entirely destroyed. A number of prisoners were taken on both sides. The Confederate loss was severe. Of the Zouaves and regulars, fourteen were killed, and thirty-six wounded. The officers and men lost almost every thing.

In November, the force at the fort and on the island was thirteen hundred men, and it was supposed that upon the opposite side were near eight thousand, when Col. Brown, the commandant of Fort Pickens, determined to open fire upon the batteries occupied by the Southern troops.

Having invited Flag-officer McKean to coöperate in the attack, on the morning of the 22d of November, Col. Brown opened his batteries on the enemy, to which, in the course of half an hour, he responded from his numerous forts and batteries, extending from the navy yard to Fort McRea, a distance of about four miles, the whole nearly equidistant from Fort Pickens, and on which line he had two forts—McRea and Barrancas—and fourteen separate batteries, containing from one to four guns, many of them being ten-inch columbiads, and some twelve and thirteen-inch seacoast mortars, the distance varying from two thousand one hundred to two thousand nine hundred yards from Fort Pickens. At the same time Flag-officer McKean, in the Niagara, and Captain Ellison, in the Richmond, took position as near to Fort McRea as the depth of the water would permit, but which unfortunately was not sufficiently deep to give full effect to their powerful batteries. They, however, kept up a spirited fire on the fort and adjacent batteries during the whole day. The fire from Fort Pickens was incessant from the time of opening until it was too dark to see, at the rate of a shot for each gun every fifteen or twenty minutes, the fire of the enemy being somewhat slower. At noon the guns of Fort McRea were all silenced but one, and three hours before sunset this fort and the adjoining batteries ceased firing. The guns of batteries Lincoln, Cameron, and Totten were directed principally on the batteries adjacent to the navy yard, those of Battery Scott to Fort McRea and the lighthouse batteries, and those of Fort Pickens to all. They reduced very perceptibly the fire of Barrancas, entirely silenced that in the navy yard, and in one or two of the other batteries.

The next morning Col. Brown again opened about the same hour, the navy unfortunately, owing to a reduction in the depth of water, caused by a change of wind, not being able to get so near as on the day before; consequently the distance was too great to be effectual. The

fire of Fort Pickens, this day, was less rapid, and more efficient. Fort McRea did not fire. One or two guns of the enemy were entirely silenced, and one in Fort Pickens was disabled by a shot coming through the embrasure.

About three o'clock fire was communicated to one of the houses in Warrington, and shortly afterwards to the church steeple, the church and the whole village being immediately in rear of some of the Confederate batteries. Of the largest and most valuable buildings along the street, probably two-thirds were consumed. About the same time fire was discovered issuing from the back part of the navy yard, probably in Wolcott, a village to the north and immediately adjoining the yard, as Warrington does on the west. Finally it penetrated to the yard, and continued to burn brightly all night. Very heavy damage was also done to the buildings of the yard by the shot, shell, and splinters.

The steamer Time, which was at the wharf at the navy yard at the time, was abandoned on the first day. The fire was continued till dark, and with mortars occasionally till two o'clock the next morning, when the combat ceased.

Fort Pickens, at its conclusion, though it had received a great many shot and shell, was reported in every respect, save the disabling of one gun carriage and the loss of service of six men, as efficient as at the commencement of the combat. No serious damage was done to the frigates Niagara or Richmond. The report of Col. Brown, respecting this cannonade, concluded with the following observations relative to its results:

The bombardment of the 22d and 23d has elicited some facts that are of importance, and I notice them that I may in future benefit by them.

1. That with the most efficient guns of the largest calibre, and served in the best manner, no serious injury can be done to stone or brick walls, or to guns in sand batteries, or to troops serving them, unless probably by rifled guns, if properly protected, at a distance of from two thousand to three thousand yards.

2. The shells and hot shot are not to be depended on for firing even wooden buildings, unless having in them incendiary composition.

3. That pieces of port fire are nearly useless as such incendiary composition.

4. That brick buildings covered with slate cannot be fired by either shot or shells at the distance named, except by accident, unless the shells have rock fires.

5. That the trouble and expense incurred in protecting forts by sand bag traverses, &c., are far more than repaid by the saving of the lives of the defenders.

6. That no dependence is to be placed on James' rifle projectiles, either as it respects accuracy or range. If I had guns to be depended on I could have silenced the most of the enemy's sand batteries and the guns in Barrancas.

7. That ships with their present armament cannot for an hour contend against rifled guns, and that if our navy is not at once supplied liberally with good rifled guns it will be very likely to be disgraced.

8. That on service here, and I believe the remark applies with equal force to every river and harbor in the Gulf, a gunboat drawing six feet water and well armed with good rifled guns can do more and better service than a forty gun ship, or than such ships as the Niagara and Richmond.

9. That sail vessels are utterly useless in enforcing a blockade.

10. That Parrott's rifled guns are efficient, and that forts should be immediately supplied with them and with a full supply of ammunition.

I would strongly urge that a dozen of Parrott's thirty-pounders, or, if to be had, of larger calibre, be sent to this post, with a good supply of ammunition, as early as possible. I had one which I found to be excellent, but when the navy met with such a mishap on the Mississippi, I was compelled to let Flag-officer McKean have it and one of my twelve-pounder Parrott guns to put on one of his ships to save them from being driven out of the waters by a little steamer having a rifled gun on board.

PERRYVILLE, a village in Cecil County, Maryland, is on the east or left bank of the Susquehanna River at the head of the Chesapeake Bay, and opposite Havre-de-Grace. It is thirty-seven miles from Baltimore on the line of the Baltimore and Philadelphia Railroad. The first troops for Washington after the difficulty at Baltimore were transferred from the cars to the steamboat here and taken to Annapolis, thus avoiding Baltimore entirely.

PERSONAL LIBERTY LAWS. The Constitution of the United States provides that "no person held to service or labor in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor; but shall be delivered up on claim of the party to whom such service or labor may be due." At the session of Congress which commenced in December, 1849, a series of measures were adopted which were intended by the authors to be a final settlement of all disputes on the subject of slavery. One of these measures was known as the "Fugitive Slave Law." It was passed under the following title: "An Act to amend and supplementary to the act entitled 'An Act respecting fugitives from justice and persons escaping from the service of their masters,' approved Feb. 12, 1793." This act excited much disapprobation in many of the Northern States, and led to the passage by the respective Legislatures of certain acts which have been generally designated under the expression "Personal Liberty Bills." The portion of the act of Congress which was so unacceptable was the sixth section, and particularly its last clause as follows:

Sec. 6. And be it further enacted, that when a person held to service or labor in any State or Territory of the United States, has heretofore, or shall hereafter escape into another State or Territory of the United States, the person or persons to whom such service or labor may be due, or his, her, or their agent, or attorney, duly authorized by power of attorney, in writing, acknowledged and certified under the seal of some legal officer or court of the State or Territory in which the same may be executed, may pursue and reclaim such fugitive person, either by procuring a warrant from some one of the Courts, Judges, or Commissioners aforesaid, of the proper circuit, district or county, for the apprehension of such fugitive from service or labor, or by seizing and arresting such fugitive, when the same can be done without process, and by taking or causing such person to be taken forthwith before such Court, Judge, or Commissioner, whose duty it shall be to hear and determine the case of such claimant in a summary manner, and upon satisfactory proof being made, by deposition, or affidavit in writing, to be taken and certified by such Court, Judge, or Commis-

sioner, or by other satisfactory testimony, duly taken and certified by some Court, Magistrate, Justice of the Peace, or other legal officer authorized to administer an oath, and take depositions under the laws of the State or Territory from which such person owing service or labor may have escaped, with a certificate of such magistracy, or other authority, as aforesaid, with the seal of the proper Court or officer thereto attached, which seal shall be sufficient to establish the competency of the proof, and with proof, also by affidavit, of the identity of the person whose service or labor is claimed to be due, as aforesaid, that the person so arrested, does in fact owe service or labor to the person or persons claiming him or her, in the State or Territory from which such fugitive may have escaped as aforesaid, and that said person escaped, to make out and deliver to such claimant, his or her agent, or attorney, a certificate setting forth the substantial facts as to the service or labor due from such fugitive to the claimant, and of his or her escape from the State or Territory in which such service or labor was due, to the State or Territory in which he or she was arrested, with authority to such claimant, or his or her agent or attorney, to use such reasonable force and restraint, as may be necessary under the circumstances of the case, to take and remove such fugitive person back to the State or Territory whence he or she may have escaped as aforesaid. In no trial or hearing under this act shall the testimony of such alleged fugitive be admitted in evidence; and the certificates in this and the first section mentioned, shall be conclusive of the right of the person or persons in whose favor granted, to remove such fugitive to the State or Territory from which he escaped, and shall prevent all molestation of such person or persons, by any process issued by any Court, Judge, Magistrate, or other person whomsoever.

The Personal Liberty Laws passed for the purpose of diminishing the most objectionable features of the fugitive slave law, were regarded by a portion of the people in the slaveholding States as operating in such a manner as to infringe their rights under the Constitution. This was one of the instances brought forward to prove the aggression of the Northern States upon the rights of the Southern States, and to that extent was urged as one ground for the justification of the act of secession. Consequently unusual attention was attracted to the Liberty Laws during the former part of the year. The views of the Governors of many Northern States, expressed at that time, furnish the plainest indication of the views of the Northern people respecting them, and of the justice of the charge of aggression from this cause. Governor Morgan, of the State of New York, in his Message to the Legislature in January, 1861, expressed the following views:

"The Supreme Court of the United States, in the case of *Prigg* against the Commonwealth of Pennsylvania, decided that all State laws, even though subordinate to the Federal enactment, and favorable to the extradition of fugitives, were inconsistent with the Constitution of the United States, and therefore void; and so this statute of our State, which granted a trial by jury, became ineffective. It has been universally held to be obsolete by all our commentators and all our public authorities, although now improperly classed among what are technically called "personal liberty laws," and made occasion for exciting jealousies and

discontents. I therefore recommend its repeal.

"In this connection, and while disavowing any disposition to interfere with what exclusively pertains to the individual States, and in a spirit of fraternal kindness, I would respectfully invite all those States which have upon their statute-books any laws of this character, conflicting with the Federal Constitution, to repeal them at the earliest opportunity; not upon condition that a more equitable fugitive slave law be passed, nor upon any other condition, but relying for the proper modification of this enactment upon the justice and wisdom of the Federal authorities. Let the Free States fulfil all the obligations of the Federal Constitution and laws; then, with propriety, they may exact like obedience from all the other States."

The Governor of Maine, Israel Washburn, Jr., at the same time addressed the Legislature of that State as follows:

"As a general thing, I believe they (the personal liberty laws of the Free States) were intended in perfect good faith to accomplish two legitimate purposes: first, to prevent the kidnapping or illegal removal of free persons from the States; and, secondly, to bring their action into entire harmony with the line of constitutional power and obligation as laid down by the Supreme Court of the United States in the case of *Prigg* vs. The State of Pennsylvania. So far as this has been the case, and where the legislation of the State has not in fact transcended these limits, there can be no just cause of exception to what has been done. But if, passing this boundary, laws have been enacted which are in violation of the Constitution of the United States, or of any constitutional law of Congress, although they may be mere waste paper and void, and would be so declared by our courts, they ought not to remain on the statute-books."

In the State of Massachusetts, Governor Banks, then about to retire from office, thus addressed the Legislature:

"I cannot but regard the maintenance of a statute, whether constitutional or not, which is so unnecessary to the public service, and so detrimental to the public peace, as an unexcusable public wrong. I hope, by common consent, it may be removed from the statute-book, and such guarantee as constitutional freedom demands be sought in new legislation."

In Pennsylvania, Governor Packer, also about to retire from office, thus presented his views:

"The people of Pennsylvania are devoted to the Union. They will follow its stars and its stripes through every peril. But before assuming the high responsibilities now dimly foreshadowed, it is their solemn duty to remove every just cause of complaint against themselves, so that they may stand before high Heaven and the civilized world without fear and without reproach, ready to devote their lives and their fortunes to the support of the

best form of government that has ever been devised by the wisdom of man."

In Ohio, Governor Dennison suggested the repeal of the obnoxious features of the fugitive slave law, and the repeal of any personal liberty bills subversive of the fugitive law would thus be secured; at the same time he said, the Southern States should repeal their laws in contravention of the constitutional right of citizens of Free States, who cannot be satisfied with less, and who will insist upon their constitutional rights in every State and Territory of this Confederacy. These they cheerfully accord to citizens of Southern States."

Notwithstanding such a general expression of sentiment, no repeal of these laws took place in any States, except Rhode Island and Vermont. In the latter, the subject was referred to a committee in the Legislature, whose duty it was to report at a subsequent day. The report was made at the next session of the Legislature, during the latter part of the year, and the objectionable law was quietly got rid of. The law of Rhode Island, which was thus repealed, forbade the carrying away of any person by force out of the State; or any judge, justice, magistrate, or court from officially aiding in the arrest of a fugitive slave under the fugitive slave law of 1793 or 1850. It also forbade any sheriff or other officer from arresting or detaining any person claimed as a fugitive slave, and provided a penalty of five hundred dollars, or imprisonment not exceeding six months, for violating the act. It denied the use of the jails of the State to the United States for the detention of fugitive slaves.

The law of Vermont was a direct act of nullification. It declared that every person who might have been held as a slave, and who should, in any way, come into the State, should be free. By the several acts of 1843, 1850, and 1858, the State provided that no court, justice of the peace, or magistrate should take cognizance of any certificate, warrant, or process under the fugitive slave law; and that no officer, or citizen of the State should arrest, or aid, or assist in arresting any person for the reason that he was claimed as a fugitive slave; and that no officer or citizen should aid or assist in the removal from the State of any person claimed as a fugitive slave, with a penalty of one thousand dollars, or imprisonment five years in State prison, for violating this act. These provisions, however, should not be construed to extend to any citizen of the State acting as a Judge of the Circuit or District Court of the United States, or as Marshal or Deputy-Marshal of the District of Vermont, or to any person acting under the command or authority of said Courts or Marshal. The State's attorneys were required to act as counsel for alleged fugitives; the act provided for issuing habeas corpus, and the trial by jury of all questions of fact in issue between the parties, and ordained that every person who might have been held as a slave, who should come, or

be brought, or be in the State, with or without the consent of his or her master or mistress, or who should come, or be brought, or be involuntarily, or in any way, in the State, should be free. It was also provided that every person who should hold or attempt to hold, in the State, in slavery, or as a slave, any person mentioned as a slave in the section of the act relating to fugitive slaves, or any free person, in any form, or for any time, however short, under the pretence that such person was or had been a slave, should, on conviction thereof, be imprisoned in the State prison for a term not less than one year nor more than fifteen years, and be fined not exceeding two thousand dollars.

The nature of these laws in other States may be briefly stated. The laws of Maine provide that no sheriff, deputy-sheriff, coroner, constable, jailer, justice of the peace, or other officer of the State shall arrest or detain, or aid in so doing, in any prison or building belonging to this State, or to any county or town, any person on account of a claim on him as a fugitive slave, under a penalty not exceeding one thousand dollars, and make it the duty of all county attorneys to repair to the place where such person is held in custody, and render him all necessary and legal assistance in making his defence against said claim.

The law of New Hampshire declares that slaves, coming or brought into the State, by or with the consent of the master, shall be free; declares the attempt to hold any person as a slave within the State a felony, with a penalty of imprisonment not less than one nor more than five years; provided, that the provisions of this section shall not apply to any act lawfully done by any officer of the United States, or other person, in the execution of any legal process.

The law of Connecticut provides that every person who shall falsely and maliciously declare, represent, or pretend that any free person entitled to freedom is a slave, or owes service or labor to any person or persons, with intent to procure or to aid or assist in procuring the forcible removal of such free person from this State as a slave, shall pay a fine of five thousand dollars and be imprisoned five years in the Connecticut State prison; requires two witnesses to prove that any person is a slave or owes labor; denounces a penalty of five thousand dollars against any person seizing or causing to be seized any free person with intent to reduce him to slavery; depositions not to be admitted as evidence; witnesses testifying falsely, liable to five thousand dollars' fine and five years' imprisonment.

The first Personal Liberty Act of Massachusetts was passed in 1843. It was based upon the decision of the Supreme Court of the United States in the case of *Prigg vs. The Commonwealth of Pennsylvania*, pronounced in 1842 by Judge Story. In that case the Court decided that the right to legislate on the sub-

ject of the rendition of fugitive slaves is vested exclusively in Congress; that no State laws can constitutionally be enacted even to aid masters in the recovery of their slaves, much less to interfere with or hinder their recovery; and that all such State laws as well as all legislation by Congress contemplating any service by States in the rendition of slaves which the States are not willing to perform, are alike foreign to the plan of the Constitution; the power of legislation on the subject, as already stated, being vested exclusively in Congress.

At the next session of her Legislature, Massachusetts endorsed this interpretation of the Constitution, by the passage of the Personal Liberty Act of 1843, by which all State magistrates and officers were prohibited, under penalties, from performing the services imposed by the United States Fugitive Act of 1793. Subsequent to the passage by Congress of the Fugitive Act of 1850, and in the year 1855, the Legislature of the State passed another act under which commissioners were to be appointed by the Governor, whose duty it was made, on being informed of the arrest of any person as a fugitive slave, to "use all lawful means to protect and defend such alleged fugitive, and secure to him a fair and impartial trial by jury." The burden of proof was laid on the claimant, who must bring two credible witnesses to substantiate his claim; persons holding any place of honor or emolument under the Commonwealth were forbidden to issue any warrant or other process under the United States Fugitive Slave Act; jails of the State not to be used for the detention of fugitive slaves; commissioners to be appointed in every county to defend the cause of alleged fugitive slaves, &c. In the year 1858 judges of the State were forbidden to issue any writ under the United States Fugitive Slave Law of 1850.

In 1859, the statutes of the State were revised, and these three acts were expressly repealed and their substance incorporated in a new text. They thus continued substantially as before until the session of the Legislature in 1861, when an organization was formed under the auspices of prominent citizens of Boston, to procure signers to petitions for a repeal of the law. The subject was referred to a joint committee of the Legislature, who resolved to report a declaratory act to exclude any construction of the personal liberty laws which should contravene the Constitution or laws of the United States. They also recommended such changes as to make the writ of habeas corpus returnable only before a Justice of the Supreme Court, instead of Justices of the Superior Court as well as the Supreme Court; to provide that the militia may be lawfully called out to preserve the public peace in cases growing out of the rendition of a fugitive slave; to allow the evidence of the claimant in proof of his claim to the alleged fugitive.

In New York there is no law having reference to the Fugitive Slave Act of 1850. An

act passed in 1840, entitled "An Act to extend the right of trial by jury," has not been repealed, although it is regarded as obsolete. This act extends the trial by jury to the cases of persons arrested as fugitive slaves.

The State of New Jersey has no statutes bearing on this subject save those which enjoin on her State officers the duty of aiding in the recovery of fugitive slaves. Persons temporarily residing in the State are also permitted to bring with them and retain their domestic slaves.

In the State of Pennsylvania, the consolidated, revised, and amended Penal Laws, enacted on March 31st, 1860, contain the following provision:

No Judge of any of the Courts of this Commonwealth, nor any Alderman or Justice of the Peace of said Commonwealth, shall have jurisdiction or take cognizance of the case of any fugitive from labor from any of the United States or Territories under any act of Congress, nor shall any such Judge, Alderman, or Justice of the Peace of this Commonwealth issue or grant any certificate or warrant of removal of any such fugitive from labor, under any act of Congress; and if any Alderman or Justice of the Peace of this Commonwealth shall take cognizance or jurisdiction of the case of any such fugitive, or shall grant or issue any certificate or warrant of removal, as aforesaid, then, and in either case, he shall be deemed guilty of a misdemeanor in office, and shall, on conviction thereof, be sentenced to pay, at the discretion of the Court, any sum not exceeding one thousand dollars, the one-half to the party prosecuting for the same, and the other half to the use of this Commonwealth.

The States of Indiana and Illinois have no personal liberty laws, but negroes are not allowed to enter and settle within the limits of those States.

The law of Michigan requires all State attorneys to act as counsel for fugitive slaves; secures to persons arrested as fugitive slaves the benefits of the writ of habeas corpus and trial by jury; denies the use of State jails for detention of alleged fugitives; requires that identity of fugitive slaves shall be proved by two credible witnesses, or by legal evidence equivalent thereto, and provides a fine of not less than five hundred nor more than one thousand dollars, and imprisonment in the State prison for five years, for forcibly seizing, or causing to be seized, any free person, with intent to have such person held in slavery.

The law of Ohio possesses the same general features with that of Michigan; the identity of the fugitive must be shown, &c.

In Wisconsin the law requires the district attorneys to act as counsel for alleged fugitive slaves; secures to such persons the benefits of the writ of habeas corpus; provides for appeal to be taken to next stated term of the Circuit Court; secures trial by jury; enjoins a penalty of one thousand dollars and imprisonment of not more than five nor less than one year on all who "falsely and maliciously represent any free person to be a slave;" identity of alleged fugitive slave is to be proved by two credible witnesses; no deposition to be received in evidence. It is also provided that—

No judgment recovered against any person or persons for any neglect or refusal to obey, or any violations of, the act of Congress commonly termed the "Fugitive Slave Act," approved September eighteenth, one thousand eight hundred and fifty, or any of the provisions thereof, shall be a lien on any real estate within this State, nor shall any such judgment be enforceable by sale or execution of any real or personal property within this State; but all such sales shall be absolutely void; and in case of seizure or sale of any personal property, by virtue of any execution issued on such judgment, the defendant in said execution may maintain an action in replevin, or other action to secure possession thereof, in the manner provided by law for such actions, on affidavit filed as required by law, and a further statement therein that said execution issued in a judgment rendered under the provisions of the act of Congress aforesaid; and the provisions of this section shall also apply to judgments heretofore rendered.

In reference to this Personal Liberty law, the following resolutions were adopted by the Legislature of Wisconsin at its session in 1861:

Whereas the States of Kentucky and Maryland, whose citizens suffer more loss than those of any other States from the escape of their slaves, unmoved by any such pretexts, have lately declared their loyalty to the Constitution and the Union; and whereas the people of Wisconsin, inspired by such examples of patriotism, as well as actuated by a sense of their own duty, are ready at all times to meet fraternal advances in the spirit in which they are made, and to maintain, in good faith, any provision of the Federal Constitution; therefore,

Resolved by the Senate, the Assembly concurring, That the Judiciary Committee of the Senate and Assembly be directed to examine and revise the laws of this State relating to kidnapping, habeas corpus, and the rendition of fugitives from labor, so as to make the same in all things conform to the Constitution of the United States, if in any thing they conflict therewith.

The States of Iowa, Minnesota, California, and Oregon have passed no Personal Liberty laws.

The number of fugitive slaves from 1840 to 1850, is estimated in the census returns at 1,011; the number from 1850 to 1860 was, on the same authority, 803. Of this number very few have at any time been returned to their former owners.

PETROLEUM. The years 1860 and 1861 are memorable in the history of the oil trade for the extraordinary changes introduced by the development of the petroleum springs in the vicinity of the bituminous coal regions of N. W. Pennsylvania, Eastern Ohio and Kentucky, Western Virginia, and Canada. The supplies of petroleum or rock oil which first attracted the attention of the public, and led to extensive operations in Warren and Venango counties, Penn., in the former year, had increased to such an extent at its close, that by a moderate estimate, the product amounted to from 500 to 600 barrels daily, and, according to some published statements, even more than twice as much. This was raised to the surface chiefly by means of forcing pumps introduced into artesian wells, great numbers of which were sunk from 100 to 600 feet deep, along the valley of Oil Creek, and below Titusville. In these wells the oil rose to different heights,

rarely, however, flowing over the surface for any period after the outburst following the piercing of its subterranean reservoirs had subsided. The success of these operations led to extensive explorations wherever indications of oil were met with along the bottoms of the streams in that vicinity, and in the other States where similar geological formations occurred. Productive wells were opened along the valley of the Alleghany River below Tidioute in Warren County, to the Venango line. In Trumbull County, Ohio, at a place called Mecca, 50 miles from Cleveland and 21 from Erie, Penn., it is reported that there were 75 steam engines engaged in pumping oil about the close of the year 1860. In Virginia a promising district was found in Ritchie and Wirt counties, and preparations were there made for the prosecution of extensive operations. Another important oil region was discovered in the district of Enniskillen near Port Sarnia in Canada West, the oil being found in great abundance, but characterized by a most remarkable and peculiarly offensive garlicky odor.

The business of sinking new wells and pumping oil was prosecuted with great vigor, and with varying success, at different localities, the product continuing large, and the price of the crude article gradually falling from 40 cents to 20 cents, 10 cents, and even less, per gallon. On the whole, the supplies continued to increase, and thousands of barrels, at different localities, were lost for want of the necessary means of collecting and saving it. The whale oil trade was seriously affected, and with it the prosperity of those towns in New England that depended upon it. Manufactories for refining the petroleum sprung up in many towns in the vicinity of the oil region, and on the line of communication to the coast, and at the principal shipping ports, and arrangements were everywhere made for a large export trade, as also for supplying the oil to all parts of the western country. In Pittsburgh and its vicinity it is reported that there are some 50 or 60 of these manufactories.

In the spring and summer of 1861 wells were opened which exhibited the remarkable phenomenon of a continuous flow of oil in enormous quantities, so that in several instances it flowed away, and was lost in the creek. Wells of this character increased in such numbers that the value of the oil rapidly deteriorated to less even than that of the barrels in which it was packed for exportation. This increase of oil continued through the year, and the supply so far exceeded the demand and the means available for collecting and transporting the oil to market, that the business was completely overdone; and the product was either almost worthless at the wells, or was sold at the rate of 50 cents per barrel of 40 gallons, at which rate it has still continued. In New York the actual value of the crude oil, after paying all expenses of transportation, commissions, &c., is rated at about 12½ cents a gallon. Extensive arrange-

ments have been made for the exportation of the product; and in the first 4 months of 1861 there were exported from New York alone 73,837 gallons. From January 1, 1862, to May 28, the exports from New York amounted to 2,854,515 gallons; from Boston, to the 24th of April, to 152,894 gallons; from Philadelphia, 781,930 gallons; and from Baltimore, 10,850 gallons. The great bulk of these exportations is to London and Liverpool, but large quantities have also been sent to Havre, Australia, Cuba, &c. The character of the crude oil preferred in market is of the density of 40° to 43° Baumé when obtained by pumping, or of 45° to 50° of oil from flowing wells. The standard refined oil is of 44° to 45° B. Another test recently introduced is the temperature at which the oil ignites on the close approach of flame, and that is preferred which thus takes fire when heated to 100° to 120° F. A convenient instrument for applying this test has lately been invented. Oils of light color continue to be preferred for domestic use, although the darker colored possess higher illuminating properties, and are sold at lower rates. The value of the best refined is from 20 to 25 cents per gallon.

Several interesting circumstances have attended the opening of the wells of Oil Creek and vicinity. The oil, when first struck, has in several instances been known to burst forth with great violence from a depth of 400 or 500 feet, and be projected like a fountain high into the air, covering the trees and the surface around; and it is now a necessary precaution to construct beforehand large vats where there is a strong probability of striking the oil. These, however, are often overflowed, and much oil is lost before the current can be controlled. A well of this character, $6\frac{1}{2}$ miles above the mouth of Oil Creek, after running for some time, was gauged in March, 1862, by noting the time it took to fill a vat of the capacity of 260 barrels, and it was found to yield at the rate of 3,740 barrels a day. To prevent the oil running to waste, means were adopted, at this as well as at other wells of the same character, of checking the flow by stopcocks; and for 3 months after gauging, no perceptible diminution has been observed in the product of this well when it was allowed to flow. Its depth is 470 feet. The outburst of oil has in several instances been attended with disastrous explosions from the ignition of the oily vapors and carburetted gas accompanying them, on reaching the flames of the fires under the steam-boilers near the wells. The danger of this is so imminent, that all fires immediately around are now instantly extinguished on the outburst of an oil well.

The probable duration of the supplies of petroleum, and consequently of the great business it has suddenly called into existence, is a question of no little interest and importance. The experience of the only known similar regions in other parts of the world, as that of Rangoon in

Burmah, and of Bakoo in Georgia, on the borders of the Caspian, which for many centuries have continued to furnish inexhaustible supplies of natural oil, encourages the expectation that the American supplies will also prove permanent; and it may be added, that the result of the operations carried on upon a gigantic scale up to the present time, favors the same conclusion. Various estimates have been prepared at different times, representing the probable production of the several oil districts; but while little dependence can be placed upon the figures presented, the inference may be drawn from them that single wells, from a variety of causes, fluctuate in their yield; and that a considerable decrease has taken place from the enormous production of the flowing wells. The entire failure of these would no doubt prove a benefit to the region, as it would tend to equalize the production, and place the great mass of the operators upon the same footing, as all would then depend alike upon pumping for their supplies. The business is now chiefly concentrated on Oil Creek, within 10 miles from its mouth, where nearly 500 wells have been sunk, of which about 75 are flowing. In a carefully-prepared statement of 118 wells in this district, brought down to June 2, 1862, their total product is estimated at 1,032,100 barrels, with a present daily capacity of 5,037 barrels. Fifty of these wells are rated as producing nothing, and the highest present yield of any one is 1,000 barrels. Only 3 are rated as being of this capacity, and only 1 other as high as 800 barrels. Their total capacity, when they commenced to flow, was estimated at 26,480 barrels per day. The amount of oil in store is said to be 67,700 barrels. The present product would be much greater, were not the yield of most of the flowing wells checked by stop-cocks, the proprietors finding it for their interest to wait for more remunerative prices.

The applications of petroleum are chiefly limited to purposes of illumination, and lubricating machinery, and for the latter purpose the consumption is already large upon railroads. Naphtha, separated by distillation from the petroleum, is employed to a considerable extent as a substitute for spirits of turpentine by the manufacturers of patent leather, in the preparation of paints and varnishes, and as a solvent for india-rubber, &c. A novel use of the crude article has lately been introduced, under an order from the United States Government, for filling bomb-shells; its effect, when these are exploded, being similar to that of the ancient Greek fire. The greatest impediment in the use of the oil for domestic purposes, has been the difficulty of obtaining lamps in which it could be consumed without the use of a chimney. Many inventors have been experimenting, with the object of providing such lamps, and this seems at last to have been attained in several of novel construction and great ingenuity.

PHILIPPI is the capital of Barbour County, Virginia. It is situated on Tygart's Valley River, about 210 miles N. W. from Richmond. The first serious encounter of the war took place here. A camp of Confederate troops in the neighborhood were completely surprised by Union troops, consisting of Virginia and Indiana Volunteers under Cols. Kelly and Dumont, and both under the command of Brigadier-Gen. Morris. On the morning of the 2d of June, five regiments, formed in two divisions, left Grafton, Virginia, for an attack on this Confederate force. The first division consisted of the First Virginia, part of the Sixteenth Ohio, and the Indiana Seventh, under Col. Kelly; the other consisted of the Indiana Ninth, and the Ohio Fourteenth, accompanied by Col. Lander, formerly engaged against the Western Indians. The division under Col. Kelly moved eastward by railroad to Thornton, five miles from Grafton, and thence marched to Philippi, a distance of twenty-two miles. The Indiana Ninth, uniting at Webster with the Fourteenth Ohio, forming the second division, pushed on to Philippi, twelve miles distant, on foot. The march of both divisions was performed on the night of the 2d, through rain and mud. The division under Col. Dumont arrived on the hill across the river from and below Philippi early on the morning of the 3d. They at once planted two pieces of artillery on the brow of the hill, and prepared to open on the enemy as soon as four o'clock should arrive. This division was to attack the enemy in front, while the other, under Col. Kelly, made an attack in the rear; but the darkness of the night and the violence of the rain so impeded the march as to render it impossible for the division to arrive before Philippi at the appointed hour. The artillery of the division, under Col. Lander, opened fire soon after four o'clock, when the enemy began to retire at once, leaving their camp behind. At this moment Col. Kelly, with the division, came up across the river, and below the camp. At the same time Col. Dumont's force rushing down the hill and over the bridge to unite in the attack, the retreat of the enemy became a complete rout, and he fled, leaving seven hundred stand of arms, a number of horses, and all his camp equipage and provision. The loss on both sides was small. Among the badly wounded was Col. Kelly; he, however, subsequently recovered from the wound. The town was occupied by the Federal force.

PIERS. A pier recently erected at Southport, Lancashire, England, by Mr. H. Hooper, has been described to the Institution of Civil Engineers. It was constructed at right angles to the line of promenade facing the sea, on an extensive tract of sand reaching to low water, a distance of nearly one mile. Its length was 1,200 yards, and the breadth of the footway 15 feet. At the seashore there was an oblong platform, 100 feet long by 32 feet wide, at right angles to the line of footway. The superstructure was supported upon piers, each consisting

of 3 cast-iron columns, and each column was in 3 lengths. The lowest length, or pile proper, was sunk into the sand to the depth of 7 feet or 9 feet. These piles were provided at their bases with circular discs, 18 inches diameter, to form a bearing surface. A gas tube was passed down the inside of each pile, and was forced 4 inches into the sand: when a connection was made with the Water Company's mains, a pressure of water of about 50 lbs. to the inch was obtained, which was found sufficient to remove the sand from under the discs. There were cutters on the under side of the discs, so that, on an alternating motion being given to the pile, the sand was loosened. After the pressure of water had been removed about 5 minutes, the piles settled down to so firm a bearing, that, when tested with a load of 12 tons each, no signs of settlement could be perceived. The upper lengths of the columns had cast-iron bearing-plates, for receiving the ends of the longitudinal lattice girders, each 50 feet long and 3 feet deep. The centre row of girders having double the duty of the outside ones, top and bottom plates were added. The weight of wrought-iron work in each bay was 4 tons 5 cwt., and of cast-iron work 1 ton 17 cwt. The second bay from the shore was tested by a load of 35 tons, equally distributed, when the mean deflection of the 3 girders, in 24 hours, was $1\frac{1}{2}$ inch, and there was a permanent set of half an inch on the load being removed.

The advantages claimed for this mode of construction were: 1. Economy in first cost, especially in sinking the piles, which did not amount to more than $4\frac{1}{2}$ d. per foot. 2. The small surface exposed to the action of wind and waves. 3. Similarity of parts, thus reducing the cost to a minimum. 4. The expeditious manner of obtaining a solid foundation—an important matter in tidal work. Two hundred and thirty-seven piles were thus sunk in six weeks.

The estimated cost of the pier and approaches was 10,400*l*. The work had been completed for 9,619*l*., being at the rate of 7*l*. 15*s*. 9*d*. per lineal yard.

PIG POINT is a projection or point of land on the James River, nearly opposite Newport News, in Virginia. A Confederate battery was located here to guard the entrance of the river, which was attacked by the steam cutter Harriet Lane, on the 5th of June. The cutter was proceeding up the river to reconnoitre and look out for batteries. She soon observed a large and heavy one planted upon the point, and about five miles distant from Newport News. The cutter opened fire, which was briskly returned by the batteries, for nearly a half hour. It was found that but one gun of the cutter could reach the battery, the guns of which being heavier easily reached the former, and several shot struck her. These were supposed to come from a rifled 32-pounder. Several shells were thrown into the battery by the gun

from the cutter. There were five injured on board the Harriet Lane.

PORT ROYAL. (*See* ST. HELENA PARISH.)

PRISONERS, EXCHANGE OF. When the hostile armies of the country met in conflict, it became a matter of certainty that prisoners would be taken on both sides, and the question at once presented itself, what was to be the disposition of them? To "hang those captured by the Northern arms as rebels taken in the act," as was suggested by the more zealous, clearly could not be tolerated, for the reason that the Confederates had ample means of terrible retribution; and a system of bloody retaliation would cause the war to degenerate into a contest as savage as that waged by the Africans before the market opened by slave dealers taught the black chiefs that it was more profitable to sell than to slay. There was no recourse but to exchange, according to the laws of war. This the Federal Government hesitated to comply with, for the reason that it might be construed into acknowledging belligerent rights on the part of the Confederates. The necessity of exchange became urgent, and the friends of prisoners were clamorous that something should be done for their relief. The Administration practically ignored the question, being impressed with the idea that it would derogate from the dignity of its position to accept any interchange, of courtesy. The question was, however, practically solved, when the Confederates declared that they had selected a number of Bull Run prisoners to hang, in case the privateers of the Savannah should be so dealt with. It would seem to have been far better to have entered frankly into an exchange, as did the mother country with her revolted colonies, than to have been drawn from a declared purpose by threats of retaliation, and then to leave the question of exchange to the various commanders under flags of truce, while the Government appeared to shut its eyes. It is clear that some general and definite arrangement should have been concerted on this important point, to the end that equal and exact justice might be done to all who were in arms for the defence of the same cause. It is not just that those serving in one department should, under the different rulings of the several military commanders, enjoy rights and privileges denied to others whose misfortune it is to have lost their liberty while equally upholding the honor of the flag in another direction.

By according to the Confederate States the rights of belligerents, at least to the extent of exchanging prisoners, no rights of sovereignty are conceded. There is a well-defined distinction between the two, recognized by the United States courts. By exchanging prisoners nothing is conceded or admitted, except what is patent to the world—that actual war exists, and that a Christian people should at least conduct it according to the usages of civilized nations. Up to the battle of Bull Run, the number of prisoners on either side was not large. By that

disaster the Confederates captured some 1,400 Northern troops, a fact which put an end to questions of punishment. The Confederates released numbers at different points, on parole, and the matter was compromised in various ways. Thus, fifty-seven wounded soldiers were voluntarily released from Richmond and sent home. In response, twenty Confederate soldiers, mostly North Carolinians, were released from Bedloe's Island, New York, and sent to Fortress Monroe, to be discharged on taking the oath not to bear arms. In this informal manner numbers were, from time to time, discharged. At Washington, the oath was administered to thirty-seven prisoners of war who were confined in the military prisons. The entire number took an oath not to bear arms against the United States, or in any way aid or abet the Confederates during the war. The following is the oath:

"I, ———, do solemnly swear (or affirm) that I will not take up arms against the United States, or serve in any military capacity whatever against them, until regularly discharged according to the usages of war from this obligation.

"Sworn to and subscribed before me this ——— day of ———, A. D. 1861. ———, J. P."

On the 3d of September an interchange of prisoners took place between General Pillow and Colonel Wallace of the United States army. This was followed by a proposition from the Confederate General Polk, to General Grant of the United States army, in terms as follows:

HEAD-QUARTERS FIRST DIVISION, }
WESTERN DEPARTMENT, Oct. 12, 1861. }

To the Commanding Officer at Cairo and Bird's Point:

I have in my camp a number of prisoners of the Federal Army, and am informed there are prisoners belonging to the Missouri State troops in yours. I propose an exchange of these prisoners, and for that purpose send Captain Polk, of the Artillery, and Lieutenant Smith, of the Infantry, both of the Confederate States Army, with a flag of truce, to deliver to you this communication, and to know your pleasure in regard to my proposition.

The principles recognized in the exchange of prisoners effected on the third of September, between Brigadier-General Pillow, of the Confederate Army, and Colonel Wallace, of the United States Army, are those I propose as the basis of that now contemplated.

Respectfully, your obedient servant,
L. POLK,
Major-General Commanding.

To which communication General Grant forwarded the following reply:

HEAD-QUARTERS DEPARTMENT SOUTHEAST }
MISSOURI, CAIRO, Oct. 14, 1861. }

GENERAL: Yours of this date is just received. In regard to an exchange of prisoners, as proposed, I can of my own accord make none. I recognize no "Southern Confederacy" myself, but will communicate with higher authorities for their views. Should I not be sustained, I will find means of communicating with you.

Respectfully, your obedient servant,
U. S. GRANT,
Brigadier-General Commanding.

To Maj.-Gen. Polk, Columbus, Kentucky.

The following correspondence shows the manner in which an exchange was effected from Cairo:

BRIGADE HEAD-QUARTERS, CAMP CAIRO, {
Oct. 23, 1861. }

Colonel N. B. Buford, Commanding Twenty-Seventh Illinois Volunteers:

SIR: You are hereby intrusted with a delicate, and, in a political aspect, a highly responsible mission.

A. A. Woodward, Lewis Young, and Frederick Penny were captured in the affair at Charleston, Mo., on the 20th of last August, and have since been detained at this post as prisoners of war. You will take them in charge on a Government steamer, and, under the protection of a flag of truce, proceed to Columbus, in Kentucky, and there making known your mission to the commanding officer, will deliver them to such persons as he may authorize to receive them.

When you have fulfilled your mission, you will ask of the commander of the camp safe conduct therefrom, and immediately return to this post.

In your conversation with the commandant or with his representatives, you will avoid all discussion upon the rights of belligerents, and place my action herein simply on the ground of humanity, and a desire to relieve the unhappy war now waged between kindred, of peculiar and aggravating difficulties.

Beyond this limit I do not deem it advisable for you to go.

Yours, &c.,

JOHN A. MCCLERNAND,
Brigadier-General Commanding.

BRIGADE HEAD-QUARTERS, CAMP CAIRO, {
Oct. 23, 1861. }

To the Commanding Officer at Columbus, Ky.:

SIR: The chances of the present unhappy war having left in my hands a number of prisoners who have been detained at this post for some time past, I have, for special reasons, as well as in obedience to the dictates of humanity, determined, unconditionally, to release them.

The prisoners alluded to are A. A. Woodward, Lewis Young, and Edward A. Penny—all taken by a party of United States troops in the affair at Charleston, Mo., on the 20th of August last.

Col. N. B. Buford, of the Twenty-seventh Regiment of Illinois Volunteers, is charged by me for the delivery of said prisoners, to such person as you may authorize to receive them, and for that purpose visits your camp under the protection of a white flag. You will please receive him in the specific character with which he is clothed and, after the completion of his mission, give him safe conduct from your camp.

I have the honor to be yours, &c.,

JOHN A. MCCLERNAND,
Brigadier-General Commanding.

CAMP MCCLERNAND, CAIRO, Oct. 23, 1861.

*Brigadier-General J. A. McClelland.**

SIR: I had the honor this day to convey your despatch with a flag of truce on board the steam-tug Sampson, to Major-General Polk, commanding at Columbus, Kentucky. I was received by the General with true military courtesy, and delivered to him, with your despatch, three prisoners who had been captured by our forces at Charleston, Mo. He desired to discuss with me the question of an exchange of prisoners, but upon my exhibiting to him my orders from you, and informing him that I should confine myself strictly to them, that sentiments of humanity alone had prompted your action, he ceased to press the discussion, but went on to inform me that he held sixteen of your troops as prisoners of war, and that he would immediately liberate them unconditionally.

The General received my suite, Captain Dresser, of the Artillery; Lieutenant Sheldon, of the Twenty-seventh Regiment Illinois Volunteers; Surgeons Simmons and Brenton, of the U. S. Army; and W. Chapman, my Secretary, with cordiality; and we were introduced to General Pillow, Captains Black and Polk of his staff, and many other officers. He remained on the steamer Charm, with our tug alongside, for four hours, while the prisoners were being got ready to be

delivered to me, during which time the most friendly conversation was enjoyed.

My party were hospitably entertained. I ventured to propose the sentiment, "Washington and his principles," which was repeated with hearty approbation.

Generals Polk and Pillow expressed a high appreciation of your character, and commended you for sending the tug on an errand of humanity. They deplore this unnatural war, but maintained that they should be separated irrevocably from the North. They professed to believe many things which I thought erroneous, which I combated with arguments and statements of facts. The conference ended without an unfriendly word or occurrence.

I left Cairo at twenty minutes past twelve, reached Columbus at two p. m., parted company with General Polk on the steamboat Charm at six p. m., and arrived at Cairo at eight o'clock p. m., happy in having been intrusted with a mission which has led to the liberation of nineteen captives.

Your obedient servant,

N. B. BUFORD,

Col. Twenty-seventh Reg't Illinois Volunteers.

P. S.—I herewith append a list of the prisoners liberated by General Polk.

HEAD-QUARTERS FIRST DIVISION, WESTERN DEPARTMENT, COLUMBUS, KY., Oct. 23, 1861. }

Brig.-Gen. J. A. McClelland, Commanding, Cairo:

SIR: I have received your note of this date, borne by Colonel N. B. Buford, of the Twenty-seventh Illinois Regiment, responding to the overture made by me to General Grant some days since, on the subject of an exchange of prisoners; and although your mode of accomplishing it waives the recognition of our claims as belligerents, I am not disposed to insist on an unimportant technicality when the interests of humanity are at stake.

I accept the release of the three prisoners tendered me, being, as your note implies, all of those of the Confederate Army in your possession.

In return, I have pleasure in offering you the sixteen of those of the Federal Army in my possession.

Hoping that, in the prosecution of the unhappy conflict in which we are engaged, we shall never lose sight of the claims of generosity on those who direct the operations of the armies of our respective Governments,

I have the honor to be, respectfully, yours,

LEONIDAS POLK.

Major-General Commanding.

BRIGADE HEAD-QUARTERS, CAMP CAIRO, {
Oct. 24, 1861. }

Capt. Chauncey McKeever, Assistant Adjutant-General, St. Louis, Mo.:

SIR: I am instructed by Brigadier-General McClelland, commanding at this post, to enclose—

1. Copy of his communication to the officer commanding the hostile forces at Columbus, Ky., accompanied by return of the persons therein named.

2. Copy of reply of Major-General Polk, accompanied by sixteen persons.

3. List of the persons thus received.

4. Copy of instructions given Colonel N. B. Buford, Twenty-seventh Regiment Illinois Volunteers.

Adding that the proceedings passed off without accident, and, as appears, with good effect.

Yours, &c.,

M. BRAYMAN,
Assistant Adjutant-General.

On the 8th of November, the correspondence was renewed between Gens. Grant and Polk. General Grant sent to request leave to care for his wounded left on the field by Major Webster, of the engineers. General Polk replied:

In your note, you say nothing of an exchange of prisoners, though you send me a private message as to your willingness to release certain wounded men and some invalids, taken from our list of sick in camp,

and expect in return a corresponding number of your wounded prisoners. My own feelings would prompt me to waive again the unimportant affectation of declining to recognize these States as belligerents, in the interests of humanity, but my Government requires all prisoners to be placed at the disposal of the Secretary of War. L. POLK, Major-General C. S. A.

Major Webster reported to General Grant as follows:

ENGINEER OFFICE, CAMP CAIRO, ILL., Nov. 9, 1861.

GENERAL: I have the honor to report the result of the expedition sent under a flag of truce to Columbus yesterday:

On our arrival in the vicinity of the place, a steamer carrying Captain Blake, assistant adjutant-general of General Polk, met us. I delivered to him your letter, and offered him, unconditionally, the sick and wounded whom I had in charge. He informed me that orders had been recently received by General Polk respecting the exchange of prisoners, and declined accepting those proffered until he could receive further instructions. He then left, saying that we had permission to bury our dead on the field of battle.

I placed a working party under command of Lieutenant Hart, of the Twenty-third Illinois Regiment, and sent them to the field, where they were employed, for the remainder of the day, in caring for the wounded, some of whom were found yet there, and in burying the dead.

It was near sunset when Captain Blake again came on board our boat, and handed in the communication from General Polk, which I gave you last night on my return. He informed me that a despatch had been sent to their Secretary of War, in regard to the exchange of prisoners, but that they had received no reply.

During the interval between the two visits of Captain Blake, several parties of the enemy visited our boat; General Cheatham among them. He informed me that he had directed four of our wounded to be brought to us, and asked if I would give four of theirs in exchange. I told them that I would give him four or any other number that he would accept unconditionally, but that I had no authority to negotiate an exchange, and that as to the four of ours which he sent on board, I would await the decision of General Polk.

Several more of our wounded had also been given into the care of our party in the field by Major Mason, quartermaster of Columbus.

These facts I mentioned to Captain Blake, and told him that those three put in our charge awaited his orders, as I wished to avoid any appearance even of doing any thing not in strict accordance with our obligations under the flag of truce. He replied that he did not wish to interfere with any arrangements made by others; and I thought, under this state of the case, it would be putting an unnecessarily fine point on the matter to decline to take back the wounded men so politely offered by General Cheatham and Major Mason. It is due to the latter gentleman, particularly, to say that his disposition to do every thing in his power to aid us in our mission of humanity, was conspicuous during our entire stay there, and certainly deserves our warmest appreciation.

At the second visit of Captain Blake to our boat, he received the sick and wounded prisoners, whom I again offered to him unconditionally, and they were put on board his boat.

The number of our wounded, as above stated from General Cheatham and Major Mason, and brought up by me, was thirteen.

Enclosed herewith is a list of our men in the hands of the enemy, given me by Captain Blake, which he thought to be nearly complete.

The number reported buried by them on the field yesterday was sixty-eight.

Very respectfully, your obedient servant,

J. D. WEBSTER, Major and Chief Engineer.

To Brig.-Gen. U. S. GRANT, Com. Div.

On the 1st of November, General Fremont made a treaty with General Price, of Missouri, among the provisions of which was one for the exchange of prisoners. Certain parties named "are authorized, whenever applied to for the purpose, to negotiate for the exchange of any and all persons who may hereafter be taken prisoners of war and released on parole; such exchanges to be made upon the plan heretofore approved and acted upon, to wit: "grade for grade, or two officers of lower grade as an equivalent in rank for one of a higher grade, as shall be thought just and equitable." This was signed by both parties. General Hunter, having succeeded General Fremont on the 7th of November, repudiated this treaty.

At the close of the year three commissioners were appointed by the Federal Government to proceed to the Confederate States and examine the condition of the Union prisoners there. They were refused admission within the Confederate territory, and thus the fate of prisoners was left to the discretion of each commander, who exchanged them at his will. But, while such were the terms on which exchanges were effected for those taken as prisoners on either side upon land, only an informal regulation had been established respecting the persons detained on a charge of piracy, because found waging war against Federal commerce on the high seas, and in retaliation for whose treatment the Confederate authorities imprisoned in the common jail a corresponding number of United States officers. (See CONFEDERATE STATES, page 151.)

PRIVATEERING. The question of employing privateers in time of war, has of late assumed a very important character, not only in consequence of the action of the nations of Europe in respect to it at the Paris Congress of 1856, but more immediately through the events of the present war. Captured privateers have been tried before American courts of law, and condemned as pirates. The condemnation was not on the general principles of privateering between acknowledged belligerents, but because the privateers bore commissions of a government not acknowledged. The fact, that they held the same position as Paul Jones, and other of our privateers in the Revolution, did not save them.

The war, conducted by the Allies against Russia, brought with it very important modifications of the old maritime law. Among those was the agreement between France and England, that both nations would waive their rights to confiscate enemy's goods, found on board neutral vessels. Also neutral goods, not contraband of war, found in enemies' vessels. This was practically a triumph for the old American principle of "free goods make free ships." On the return of peace in 1856, it was agreed to, in the Declaration of Paris, by Austria, France, Great Britain, Sardinia, Prussia, Russia, and Turkey, and by them also privateering was abolished. (See BLOCKADE, also DIPLOMATIC

(CORRESPONDENCE.) The declaration was then submitted to the American Government; and Mr. Marcy, Secretary of State to Mr. Pierce's Administration, approved of all, except the clause abolishing privateering; but Mr. Marcy made a counter proposition. "It is," said he, "not the policy of the United States to maintain vast standing armies and navies. When, unfortunately, we go to war, we depend upon our people to protect us on land, and on our ship-owners to defend us on the water." "If you will make all private property exempt from capture at sea, we will cease privateering; but why ask us to abolish it, while you maintain and send out your great ships of war, which are neither more nor less than privateers. They go forth to do exactly the same thing as the ships that we license in time of war, to burn, plunder, and destroy." "Make all private property exempt from capture at sea, and then we will agree that privateering shall cease." This offer was favorably received by France, Russia, and other maritime powers, but was rejected by the British Government. The election for the presidency took place in the autumn of 1856, and Mr. Buchanan was chosen the successor to Mr. Pierce. The question of international maritime law now underwent further discussion in the United States. It was contended that, in addition to the exemption of private property from capture when at sea, it should be free from molestation when entering or leaving a commercial port; that, in short, blockades should be restricted to naval arsenals and towns which were at the same time invested by an army on land. . . . In the course of these discussions, President Buchanan addressed a letter to the Chairman of the New York Chamber of Commerce, in which he said: "We must obtain the consent of the powerful naval nations that merchant vessels shall not be blockaded in port, but be suffered to pass the blockading squadron, and go out to sea." The consequence of this state of opinion was, that Mr. Dallas, the United States Minister at London, was, in 1857, instructed to suspend the negotiations which had been opened upon the basis of Mr. Marcy's proposition.

Thus the matter remained till the spring of 1859, when, on the breaking out of the war in Italy, a circular despatch was transmitted from Mr. Cass, President Buchanan's Secretary of State, to the representatives of the United States at the European capitals, suggesting still further reforms in international maritime law. "He considered the right of blockade, as authorized by the law of nations, was liable to very great abuse, and that the only case in which a blockade ought to be permitted, was, when a land army was besieging a fortified place, and a fleet was employed to blockade it on the other side; but that any attempt to intercept trade by blockade, or to blockade places which were commercial ports, was an abuse of the right that ought not to be permitted."

The British Government replied, that "the

system of commercial blockade is essential to our naval supremacy." (See BLOCKADE.)

If the proposal of the United States, to abolish commercial blockades, had been favorably received by the British Government, there can be no doubt, from the known tendency of other maritime powers, that it might have become a part of the law of nations, and in that case the commerce between England and the Southern States of the American Union would not have been interrupted by the present war—for the blockade is acknowledged by Europe only as a belligerent right, and not as the exercise of municipal authority. The Southern privateers would not have existed.

Thus, on the breaking out of the civil war, April 15, the old rule in relation to privateers prevailed in the United States. The most of the shipping and commerce belonged to the North; the South having, comparatively, little afloat. Hence, the proclamation of the President, April 15, 1861, calling for 75,000 troops, to "repossess the ports," was replied to by the President of the Confederate States, in a proclamation to grant letters of marque and reprisal. (See p. 137.) This was at once met on the part of President Lincoln, by a proclamation of blockade of the Southern ports, which closes as follows:

WASHINGTON, April 19, 1861.

And I hereby proclaim and declare, that if any person, under the pretended authority of said States, or under any other pretence, shall molest a vessel of the United States, or the persons or cargo on board of her, such person will be held amenable to the laws of the United States for the prevention and punishment of piracy. By the President,

ABRAHAM LINCOLN.

WILLIAM H. SEWARD, *Secretary of State*.

The proceeding of the Confederate President was followed on the 6th of May, by an act of the Confederate Congress, "recognizing the existence of war between the United States and the Confederate States, and concerning letters of marque, prizes, and prize-goods." (See p. 161.) The preamble sets forth the state of war: "Therefore the President of the Confederate States is authorized to use the whole land and naval forces of the Confederacy to meet the war thus commenced, and to issue letters of marque and reprisal against the vessels and property of the United States, and those of their citizens." The general provisions for privateers are the same as those involved in the proclamation of the President. It is further provided, "that the proceeds of all prizes shall be distributed among the owners, officers, and crews of the capturing vessels, according to any written agreement between them, half to the officers and crews, half to the owners. Prizes, before breaking bulk, must be carried into some port of the Confederate States, or of some friendly State, to be proceeded against before some competent tribunal, which may make restitution or decree damages; in case the capture shall have been made without probable cause, all persons found on board any captured vessel are to be placed in charge of the authorities of the Confedera-

tion, who are to take charge of their safe keeping and support. A bounty of \$20 is to be paid for every person on board any armed vessel of the United States, which shall be destroyed by any vessel of equal or inferior force, and \$25 for every prisoner brought into port; five per cent. upon all prizes to be retained by the Government, as a fund for the support of those disabled in action and the families of those who have been killed." Pursuant to this law, suitable instructions were issued. (See p. 138.)

The announcement of this privateering policy produced at the North, where there was so much at risk, a great sensation, after it was seen that the Confederates would be successful in obtaining vessels, and were determined to do all the injury possible to Northern commerce.

The following privateers took out papers at once; some of them were very unfortunate, while others made many prizes. Among the first was the *Petrel*, formerly the revenue-cutter *Aiken*, which had been surrendered to the Confederates in Charleston harbor, and the crew of which had volunteered under the new government. This vessel had run the blockade, but was no sooner at sea than she fell in, July 28, with the United States frigate *St. Lawrence*, and was captured. The captain of the *St. Lawrence* observed the Southern vessel in the distance, and immediately hauled down his heavy spars and closed his ports. Then, with the men below, the old frigate looked very much like a large merchant vessel, and the privateer bore down, hoping to take a good prize. The commander of the *Petrel*, William Perry, of South Carolina, gave the *St. Lawrence* a round ball over her bows and some canister over the stern, but the frigate sailed on as if trying to get away, when the *Petrel* gave chase, and when in fair range of the frigate the latter opened her ports and gave the *Petrel* a compliment of three guns, two of grape and one of round shot. The latter was a 32-pounder, and struck the *Petrel* amidships, below the water line, and she sunk in a few minutes. Four of the crew were drowned, and the rest, thirty-six in number, were rescued. Some of the men, when fished out of the water, were at a loss to know what had happened to them. The suddenness of the *St. Lawrence's* reply, the deafening roar of the guns, and the splinters and submerged vessel, were all incidents that happened apparently in a moment.

The *Calhoun*, a side-wheel steamer, of 1,058 tons, was built in New York in 1851. She is 175 feet long, 27 feet wide, 11 feet hold. She was commanded by Geo. N. Hollins, formerly of the United States navy. She carried one 24-pounder, and two 18-pounder Dahlgren guns. By the 27th of May, she had captured and sent into New Orleans two schooners, the *John Adams* and the *Mermid*, of Provincetown, and the brig *Panama*. Their united crews numbered 63 men, and they had on board 215 bbls. whale and sperm oil. She captured also the ship *Milan*, from Liverpool, with 1,500 sacks of salt,

worth \$20,000; the bark *Ocean Eagle*, from Rockland, Maine, with lime, worth \$20,000; and the schooner *Ida*, from Tampico, with fruit, worth \$5,000. The *Calhoun* was Commander Hollins's flag-ship when the attack on the Union fleet was made on the Mississippi, Oct. 11.

The schooner *William C. Atwater*, Capt. Allen, belonged to New Haven, and was in the service of the Government. The crew numbered eight men. Off Cedar Keys, Florida, on the 10th of May, she was captured by the steamer *Spray*, which had on board thirty-one men, armed with bowie-knives, revolvers, muskets with bayonets, &c. The captors took her to Appalachicola, where she arrived on the 13th of May.

The *Ivey*, a small steamer of 200 tons, was armed with two 8-inch rifled 32-pounder guns. She captured the ship *Marathon*, from Marseilles, in ballast, worth \$35,000; and the ship *Albino*, from Boston, with a cargo of ice, worth \$20,000. The armed steamer *Murie* captured the *Marshall Sprague*, of Providence, from Havre, in ballast, worth \$50,000; and the ship *John H. Jarvis*, from Liverpool, worth \$10,000.

The steamer *Wm. H. Webb* was formerly a towboat in New York, where she was built in 1856; she is 650 tons, draws 7 feet water, is 197 feet long, 31 feet beam, 12 feet hold, and was one of the strongest and largest boats of that class. A few years ago she was purchased by some of the New Orleans merchants for the purpose of towing the heavily laden ships to and from that city. She was converted into a gunboat. She seized three vessels laden with oil, on the 24th of last May; since which time she has remained quiet.

The *Dixie*, a schooner of about 150 tons burthen, was fitted out as a privateer in Charleston, from which place she ran the blockade on the 19th of July, and on the 23d encountered the bark *Glen*, of Portland, Maine, which she at once made a prize. On the 25th she captured the schooner *Mary Alice*, of New York, with a cargo of sugar, from the West Indies, bound to New York, and placed a prize crew on board; she was, however, retaken by the blockading fleet almost immediately after. On the evening of the 31st the *Dixie* came up with the *Rowena*, a bark laden with coffee, bound to Philadelphia; she was taken possession of, and the captain of the *Dixie* himself took the place of prize-master, and successfully reached Charleston on the 27th of August, after several narrow escapes from the vessels of the blockading fleet. She has since remained in Charleston harbor. The following were the officers of the *Dixie*: captain, Thomas J. Moore; first lieutenant, George D. Walker; second lieutenant, John W. Marshall; third lieutenant, L. D. Benton; gunner, Charles Ware; boatswain, Geo. O. Gladden; steward, C. Butcher. She had also twenty-two seamen and a cook, and her armament consisted of four guns.

The *Jeff. Davis*, early in June, appeared on the eastern coast, running in as near as the Nantucket Shoals, and making on her way prizes

that were roughly estimated at \$225,000. She was formerly the slaver *Echo*, that was captured about two years ago, and was condemned in Charleston harbor. She was a full-rigged brig, painted black on the outside, and had a rusty, dull appearance, that would not be likely to alarm any vessel of ordinary sailing qualities; crew 260 men. Her armament consisted of a 32-pounder gun, placed amidships, mounted on a pivot, so that it might be used in all directions, and on each side a 32-pounder and a 12-pounder, so as to equalize the strength of the broadside. Captain Coxetter was her commander. His first lieutenant, named Postel, was at one time a midshipman in the United States navy, and also held a position in the Savannah custom-house.

The Davis had previously taken three prizes; one of these, and the most valuable, was the *J. G. Waring*, captured within 200 miles of New York. The captain, mates, and two seamen, were taken out, and five of the Davis crew put on board. The colored steward, *W. Tillman*, was allowed to remain. The vessel then made for Charleston. On the 16th of July *Tillman*, aided by *McLeod*, a seaman, killed the prize-captain and mates, and made for New York, where he arrived with two prisoners of the prize-crew. *Tillman* was awarded salvage. The *Jeff. Davis* also took the ship *John Crawford*, from Philadelphia, for Key West, with arms and coal for the United States. She drew 22 feet water, and was burned.

In attempting, Aug. 17, to cross the bar at St. Augustine, Fla., the brig grounded on the North Breakers. This was about half-past six o'clock, Sunday morning. A small boat was sent ashore with *Dr. Babcock* and *Lieut. Baya*, and the prisoners landed. The officers and crew of the privateer then went ashore, and were greeted with the most enthusiastic demonstrations by the inhabitants. About half-past nine two lighter-boats went off to the brig, along with *Capt. Coxetter* and other officers. The starboard guns were thrown overboard to lighten the vessel, in order to clear her decks of water, and save as much as possible of the supplies on board the brig. Every effort was finally made to save every thing, but it was supposed that the guns when thrown overboard stove her in and caused her to bilge. The lighter boats, however, were filled with a large amount of provisions and baggage, and finally succeeded in saving all the small-arms on board. About two o'clock all hands left, and were conveyed to St. Augustine. The crew afterwards arrived at Charleston. The brig was a total loss.

The *Bonita*, a brig built in New York, 1853, is 276 tons burthen, and is 110 feet long, 25 feet wide, and 11 feet deep. She was formerly engaged in the slave-trade, but was captured on the coast of Africa. She was taken to Charleston, and afterwards to Savannah, where she was seized by order of Governor Brown, and converted into a vessel of war. She had always

borne the character of a fast sailer, and was in perfect order.

The *Sallie* was a fore-and-aft schooner of one hundred and forty tons burthen, mounted one long gun amidships, and had a crew consisting of forty men. She was formerly the schooner *Virginia*, of Brookhaven, and was built at Port Jefferson in 1856. Her dimensions were: length, 97 feet 6 inches; breadth, 29 feet 4 inches; depth, 10 feet. She was commanded by *Captain Libby*, formerly commander of the ship *Gondar*, of the city of Charleston. She ran out from Charleston and made several prizes, among them the *Betsey Ames*, and the brig *Granada*; both these vessels were sold in Charleston, under decree of Judge Magrath, of the Admiralty Court.

The *James Grey*, an iron steamer, was purchased by the State of South Carolina for the sum of \$33,000. She was built in Philadelphia, is 112 feet long, 22 feet beam, and 12 feet depth of hold. She had two engines of thirty-inch cylinder each, and was armed with one large 42-pounder columbiad, placed amidships. The gun was cast at the Tredegar Works, near Richmond, Va. This vessel had always remained near Charleston.

Up to the end of May, there were in New Orleans the following prizes:

SHIPS.		
Name.	Master.	Hail from.
Abelino.....	Smith.....	Boston.
Ariel.....	Delano.....	Bath, Maine.
American Union.....	Lincoln.....	Bath, Maine.
C. A. Farwell.....	Farwell.....	Rockland.
Express.....	Frost.....	Portsmouth, N.H.
J. H. Jarvis.....	Rich.....	Boston.
Marathon.....	Tyler.....	New York.
Marshall.....	Sprague.....	Providence.
Milan.....	Eustis.....	Bath, Maine.
Robert Harding.....	Ingraham.....	Boston.
State of Maine.....	Humphrey.....	Portland.
Toulon.....	Upsbur.....	New York.

BARKS.		
Chester.....	Bearse.....	Boston..
Ocean Eagle.....	Luce.....	Thomaston.

BRIG.	
Panama.....	Provincetown.

SCHOONERS.	
E. S. Janes.....	Townsend.....
Henry Travers.....	Wyatt.....
Ella.....	Howes.....
John Adams.....	Provincetown.
Mermaid.....	Provincetown.

The seizure of vessels made by the Confederate States, up to the latest accounts, is thus enumerated:

Off the different ports.....	13
In port.....	20
Steamers captured on the Mississippi.....	15
Total.....	58

These prizes were sold by the Confederate States under a decree of the Confederate Admiralty Court. In respect to some of them there were points raised, as to the legal boundary of "high seas;" but this was decided to be low water mark.

The following vessels were formerly United States revenue-cutters, but were taken possession of by the Confederate Government, and armed for its service:

Schooners: Lewis Cass, Savannah, 40 men, one 68-pounder pivot; Washington, New Orleans, 42-pdr. pivot; Pickens, Pensacola, 8-in. columbiad, four 24-in. carronades; Dodge, 100 tons, one long pivot; McClellan, Freshwood, one pivot, four side-guns.

Steamer: Bradford, formerly Ewing.

In addition to the above, the Navy Department of the Confederate Government purchased or fitted out the following vessels, which acted as privateers:

The Gordon was a small sea steamer of about 500 tons burthen, drawing from seven to nine feet of water, and making an average of twelve miles an hour. She was about ten years old, and the most of that time she had been running in and out of Charleston harbor. In 1859 she was purchased by the Florida Steamship Company, and ran on the line between Charleston and Fernandina as consort to the Carolina, a steamer of her own size and build. The Gordon was fitted out as a vessel of war. She was employed along the coast islands at Hatteras, in and out of Pamlico Sound via Hatteras Inlet, when it was occupied by Union troops. She succeeded in running the blockade at Charleston, with some vessels that she had made prizes of. She was armed with two guns, and was commanded by Captain Lockwood, who was formerly engaged on the New York and Charleston line of steamers. His last employment, previous to this position, was as commander of the Carolina, on the Charleston and Fernandina line of steamers. He had succeeded in running the blockade with his vessel seventeen times. The last feat of the Theodora, to which the name of the Gordon has been changed, was to carry to Cuba the ministers, Slidell and Mason.

The Coffee, a side-wheel steamer carrying 2 guns, the steamer Marion, and the schooner York were consorts of the Gordon in Hatteras Inlet. The Coffee was wrecked—a total loss.

The McRea, formerly the steamer Habana, plying between the ports of New Orleans and Havana, was a propeller of 500 tons burthen; she was built in Philadelphia in 1859, and was owned in New Orleans previous to her being used as a privateer. She carried a 64-pounder, mounted on a pivot, four 8-inch columbiads, and a rifled 24-pounder. She succeeded in running the blockade at the mouth of the Mississippi River.

The steamer Lady Davis was one of the first vessels prepared in Charleston, and was intended for the harbor defence. She was purchased by Gov. Pickens, at Richmond. She received her name in honor of the wife of Jeff. Davis. She was armed with two 24-pounders, regularly equipped, and commanded by Captain T. B. Huger.

The Nina, a small steam gunboat, mounts one light gun. She is employed in South Carolina.

The Jackson, steamer, 200 tons, armed with two 8-inch columbiads. She is commanded by Capt. Gwathmey.

The Incarora, steamer, carries one 8-inch columbiad, and a 32-pounder rifled cannon.

The little steamer, George Page, operating on Ocoquan River, and Quantico Creek, was famous for her boldness in running down to within gunshot of the Federal batteries, and occasionally throwing a shell into them, thereby keeping up continuous alarm.

The Judith, schooner, of 250 tons, armed with a heavy pivot-gun, and four broadside guns, was destroyed in Pensacola harbor, Sept. 13. The Union loss was 3 killed, 12 wounded.

The Yorktown was formerly used in the New York and Virginia line of steamers. She was a side-wheel steamer of 1,400 tons burthen, built in New York in 1859; length, 251 feet; breadth, 34 feet; depth, 18 feet. She had been completely fitted out at Norfolk, her sides having been plated with iron, and other means taken to strengthen her, and to render her formidable. She was commanded by Captain Parish, her old commander, and carried two pivots, and six broadside guns.

The Everglade was a small side-wheel steamer, purchased by the State of Georgia for the sum of \$34,000. She was made a gunboat, for the purpose of cruising as a coast-guard at the mouth of the Savannah River. Her officers, as at first appointed, were as follows: commander, J. McIntosh Kell; midshipmen, R. F. Armstrong, S. N. Hooper, J. A. Merriweather; chief engineer, Joshua Smith; assistant engineer, Norval Meeker; clerk, William J. Bennett.

The North Carolina steamer Winslow, Lieutenant Crossman commanding, captured off Cape Hatteras the schooner Transit, Knowles master, last from Key West. The prize was in ballast, having sailed from New York for Key West with provisions, shot, &c., about the 27th of May. Having landed her cargo safely at Key West, the Transit was upon her return north when captured. She was a fine schooner, of 195 tons burthen, and was built at a cost of \$13,000. She was copper-fastened up to 9 feet, and had galvanized iron fastenings above that. She belonged to New London, Conn. The prize was carried to Newbern, by Lient. Seawell. Lieutenant Crossman also captured off Cape Hatteras, the Hannah Balch, a hermaphrodite brig, which was captured previously off Savannah by the United States ship Flag, Lieutenant Sarton. She was just from Cardenas, and laden with 150 barrels of molasses.

The little schooner Savannah was formerly pilot boat No. 7, doing duty in Charleston harbor, 54 tons burthen. She carried one 18-pounder amidships, and was commanded by T. Harrison Baker, of Charleston, and had a crew of 20 men. On the 1st of June she captured the brig Joseph, of Maine, from Cuba, loaded with sugar, and sent her into Georgetown, S. C., in charge of eight men. On the 3d of June, off Charleston, she fell in with the U. S. brig Perry,

which she mistook for a merchantman, and immediately engaged, but was soon taken. Her crew were placed in irons on board the United States steamer *Minnesota*, and she was sent to New York, in charge of prize-master McCook. Her appearance created great interest among the people, on account of her being the first privateer captured, and crowds of people flocked to the Battery, off which she lay, to see the little craft. She was afterwards taken to the navy yard.

When the Confederate authorities proposed to issue letters of marque, but little attention was paid to it, under the supposition that they had neither the facilities to equip vessels, nor the power to break the blockade. The appearance of the vessels on the ocean soon dispelled such illusions, and the powers of Europe were called upon immediately to define their policy.

The proclamation of President Lincoln, threatening privateers with the punishment of piracy, came up before the House of Lords, May 16. The Earl of Derby said:

"He apprehended that if one thing was clearer than another, it was that privateering was not piracy, and that no law could make that piracy, as regarded the subjects of one nation, which was not piracy by the law of nations. Consequently the United States must not be allowed to entertain this doctrine, and to call upon Her Majesty's Government not to interfere. They must not strain the law so as to visit with the penalty of death, as for piracy, persons entitled to Her Majesty's protection. That was a question which could not be viewed with indifference, but must be seriously considered by the Government. It is quite right that the people of this country should be warned of the peril; but, on the other hand, it was essential that the United States should not be induced to deny the general interpretation of international law, and to inflict a punishment on privateering which was never inflicted by that law. He knew it was said that the United States treated the Confederate States of the South as mere rebels, and that as rebels these expeditions were liable to all the penalties of high treason. That was not the doctrine of this country, because we have declared that they are entitled to all the rights of belligerents. The Northern States could not claim the rights of belligerents for themselves, and, on the other hand, deal with other parties not as belligerents, but as rebels. These were the two points on which it was most desirable that no misunderstanding should exist between the Government of Her Majesty and the United States—that we would not recognize any thing but a clear and effectual blockade actually enforced, and that we would not recognize the doctrine that any declaration or law of the United States against the Southern States should have the power, as regarded others, of constituting privateering piracy, and visiting it with all the penalties attached to piracy."

"Lord Brougham said it was clear that privateering was not piracy by the law of nations,

however much it might be lamented that it was not so."

"Lord Chelmsford thought it might be as well to bring his noble and learned friend's opinion to a test. The Southern Confederation was admitted by the Government of this country to be a belligerent power. Now, he wanted to know whether his noble and learned friend meant to say that if an Englishman was commissioned by the Southern Confederation—it being recognized as a belligerent power—to fit out a privateer against the Federal Government, that that person, under those circumstances, would be guilty of piracy. That he ought to be, was the opinion of many judges. [The Lord Chancellor: 'No, No.'] Well, it was the opinion of many. Now, undoubtedly those persons would be answerable to their own Government for an infraction of the Foreign Enlistment Act; but it was clear, upon the question of international law, that they would not be liable to be treated as pirates. The warning given by the proclamation was very useful and most necessary; and if persons would engage in expeditions of this kind after the notice that the Government would not interfere, they must take the consequences they had drawn upon themselves. If the Southern Confederacy had not been recognized as a belligerent power, he agreed with his noble and learned friend, that, under those circumstances, if any Englishman were to fit out a privateer for the purpose of assisting the Southern States against the Northern States, he would be guilty of piracy."

"The Lord Chancellor said his noble friend, the President of the Council, had laid down the law upon this subject in a perfectly correct manner. There was no doubt that if an Englishman engaged in the service of the Southern States, he violated the laws of the country and rendered himself liable to punishment, and that he had no right to trust to the protection of his native country to shield him from the consequences of his act. But though that individual would be guilty of a breach of the law of his own country, he could not be treated as a pirate, and those who treated him as a pirate would be guilty of murder."

"Lord Kingsdown said, as to the state of the law there could be no doubt a privateer acting under a government was not a pirate. No doubt the United States did not put the extravagant proclamation they had issued upon the ground that privateers were pirates, because they themselves insisted upon the right of privateering. But they put it upon this ground, that they were dealing with rebels, and that they would hang them not, properly speaking, as pirates, but as persons who were guilty of high treason against the State to which they were subject. Of course it was a matter for their own consideration what was to be the operation of that proclamation. He believed that the enforcement of that doctrine would be an act of barbarity which would produce an outcry throughout the civilized world, but he

hoped that it was a mere *brutum fulmen*, and not intended to be carried out. But that being the case with regard to their own country, the case with England was quite different. We had recognized the Southern Confederacy, not as an independent State, but as a belligerent power; and, therefore, if the Federal Government should act upon the principle they had laid down as against British subjects, he apprehended that this Government might with perfect justice interfere, and under some circumstances they might, by the influence of public opinion, be compelled to interfere. Yet, at the same time, the offender could not as a right, having acted in violation of the feeling of his own country, and therefore of his own Government, call upon his Government to interfere."

On June 1, the English Government published an order, and a despatch was sent to the Governor-General of Canada to the effect: "In order to give full effect to this principle, (neutrality,) Her Majesty has been pleased to interdict the armed ships, and also the privateers of both parties, from carrying prizes made by them, into the ports, harbors, and roadsteads, or waters of the United Kingdom, or any of Her Majesty's colonies or possessions abroad."

The French Government decreed:

"No vessel of war or privateer of either of the belligerent parties will be allowed to enter or stay with prizes in our ports or roadsteads longer than 24 hours, excepting in case of compulsory delay. No sale of goods belonging to prizes is allowed in our ports and roadsteads. Every Frenchman is prohibited from taking a commission, or accepting letters of marque, or in any manner assisting in the arming of a privateer."

The Spanish Government issued a similar decree, forbidding "the building, arming, or equipping of privateers in Spanish ports. No privateer or prize to remain longer than 24 hours. No prizes to be sold, no arms or munition of war to be purchased." These regulations much circumscribe the Confederate action; but at Havana it was notified: "Vessels of the Confederate States are allowed to enter Cuban ports under their own flags, to discharge and take cargoes away, and do all other things of business necessity, with the same privileges as favored nations, but without recognition of the new nationality." The Confederates being recognized as belligerents by all the powers, their right to use privateers was not questioned under the existing law of nations. The United States Government, at this time, notified the English Government that it was now willing to adhere to all the conditions of the Paris Congress of 1856; providing the clause abolishing privateers might now apply to the Confederate States. The offer with the proviso was declined by France and England. (See DIPLOMATIC CORRESPONDENCE.) Subsequently the Confederate Congress adopted the Paris treaty. (See p. 164.)

The captain and the crew of the Savannah

were now, Oct. 23, to be tried as pirates under the proclamation of President Lincoln, of April 19. There had also been captured one of the crew of the Jeff. Davis, on board the schooner Enchantress, a recaptured prize. This individual was brought to trial in Philadelphia, before Judge Grier, the same day, Oct. 22, on which the Savannah's crew was tried in New York, before Judge Nelson, for piracy. On the capture of the crews, the Confederate President had addressed President Lincoln a letter, (see CONFEDERATE STATES, p. 150,) threatening to deal with Federal prisoners in the same manner in which the privateersmen should be dealt with. The prisoner, William Smith, was convicted after both Judges Grier and Cadwallader had charged the jury. The point of both arguments was that "they could not be regarded as privateers, because they acted under a government that had not been recognized," following apparently the view held by Judge Sprague, of Boston, on May 16, when in his charge to the grand jury he laid down the state of the laws with reference to the crime of piracy. After citing provisions from the laws of 1790, 1820, 1825, 1846, and 1847, as to what constitutes the general crime, with the different degrees of penalty, the judge remarked that these enactments were founded upon the clause in the Constitution which gives Congress the power to define and punish piracy. But the constitutional power to regulate commerce also afforded a basis for additional penal enactments, covering all possible aggressions and depredations upon our commerce. He then laid down the following principles:

"These statutes being enacted pursuant to the Constitution, are of paramount authority, and cannot be invalidated or impaired by the action of any State or States, and every law, ordinance, and constitution made by them for that purpose, whatever its name or form, is wholly nugatory, and can afford no legal protection to those who may act under it. But suppose that a number of States undertake by revolution to throw off the Government of the United States and erect themselves into an independent nation, and assume in that character to issue commissions authorizing the capture of vessels of the United States, will such commissions afford protection to those acting under them against the penal laws of the United States? Cases have heretofore arisen where a portion of a foreign empire, a colony, has undertaken to throw off the dominion of the mother country, and assumed the attitude and claimed the rights of an independent nation, and in such cases it has been held that the relation which the United States should hold to those who thus attempt and claim to institute a new government is a political rather than a legal question; that, if those departments of our Government which have a right to give the law, and which regulate our foreign intercourse and determine the relation in which we shall stand to other nations, recognize such new and self-con-

stituted government as having the rights of a belligerent in a war between them and their former rulers, and the United States hold a neutral position in such war, then the judiciary, following other departments, will to the same extent recognize the new nation.

"But if the legislative and the executive departments of the Government utterly refuse to recognize such new government, or to acknowledge it as having any belligerent or national rights, and instead of taking a neutral attitude, endeavor by force to suppress depredations on commerce by such assumed government as violating the rights and infringing the laws of the United States, then the judiciary will hold that such depredations are not to be considered as belligerent and entitled to the immunities of lawful war, but as robbery or other lawless depredations, subject to the penalties denounced by our laws against such offences. The judiciary certainly cannot adopt a more indulgent rule towards those who are in open rebellion against the authority of the United States, or towards aliens coöperating with and acting under the assumed authority of such rebels. While the other departments of the Government and the nation refuse to regard any State or associations of States as having the rights of a belligerent, or as carrying on legitimate war, and are exerting not only moral but physical force against them as rebels and lawless aggressors upon the United States and its citizens, the courts also must so regard them, and cannot admit that any legislation or assumption of power by such State or States can authorize acts in violation of the laws of the United States, or change the character of offences under them.

"There is another view. Mere rebellion absolves no man from his allegiance. Citizens of the United States, therefore, may not only be subject to the penalties of treason, but if they commit hostilities upon the commerce of the United States, under a commission from any foreign nation, even the oldest and best established, such as England or France, for example, they may be dealt with as pirates by the express enactments in the 9th section of the statute of 1790, which has already been referred to. And aliens, who are subjects or citizens of any foreign State with whom we have a treaty, such as is described in the statute of 1847, chapter 51, and who, in violation of such treaty, make war upon the United States, or cruise against our vessels or property, under a commission from any foreign government, however long acknowledged, may, by the clear provisions of that statute, be dealt with as pirates.

"If aliens, subjects of a nation with whom we have no such treaty, commit acts of hostility upon our commerce under the alleged authority or commission of a new and self-created government claiming to be independent, it may be material to inquire whether such government is to be regarded as having the immunities of a belligerent, or whether such aliens may be treated as robbers on the seas, and this inquiry will be

governed by the principles which I have already stated."

The trial of Capt. Baker and 14 of the crew of the Savannah, of whom 8 were foreigners, was had before Judges Nelson and Shipman. The judge instructed the jury that "by the general law of nations a pirate was one who roved the sea in an armed vessel without a commission from any sovereign State, on his own authority, and for the purpose of seizing by force, and appropriating to himself whatever vessels he might meet. But the evidence in this case showed that the design of the prisoners was to depredate upon the vessels of only one nation,—the United States—an offence that fell short of piracy under the laws of nations. But there were special laws of the United States, establishing and defining piracy. The particular law applying to this case was that of 1820, which says, 'If any person shall upon the high seas commit the crime of robbery in or upon any ship or vessel, or upon the ship's company of any ship or vessel, or the lading thereof, such person shall be adjudged to be a pirate, and upon conviction shall suffer death.' The commission issued by Mr. Davis could not be admitted as a defence, for the courts of the United States could not recognize such an authority until the Government had done so. The felonious intent, which is an essential element in the crime of robbery, consists in the taking of the property of another for the sake of gain. If this was wanting in this case, the offence, whatever it might be, was not that of piracy under the statute." The jury could not agree, and a new trial was ordered. The views of all the judges seemed to centre upon the one point, that these men were taken in arms against the Federal Government, and that inasmuch as the Federal laws did not recognize the authority under which the men acted, there was no recourse but to condemn them. The same rule applies, however, to all those who make war against the Federal Government upon land, and who, so far from being condemned as traitors and robbers, are daily exchanged, according to the rules of war, for other prisoners. When, however, the Federal Government pursued this course in relation to its maritime enemies, the Confederate Government, in accordance with the letter of Jefferson Davis to Mr. Lincoln, July 6, ordered the selection of a number of men from the Richmond prisons, by lot. The choice fell upon Col. Corcoran of the New York Sixty-ninth, and others, to be executed in the same manner that the privateersmen should be dealt with. These proceedings attracted much attention abroad, where belligerent rights had been accorded to the Confederates, and one of those rights was the use of privateers under the law of nations. The Federal Government under these circumstances relinquished its purpose of proceeding against the prisoners as pirates.

On the 21st of August, the Captain-General of Cuba issued a proclamation to the effect

that vessels with the Confederate flag would be admitted for the purpose of trade to the ports of the island, and be under the neutrality laws.

While these proceedings were transpiring, application was made to the United States Government for letters of marque. The following official reply indicates the action taken.

NAVY DEPARTMENT, WASHINGTON, Oct. 1, 1861.

SIR: In relation to the communication of R. B. Forbes, Esq., a copy of which was sent by you to this Department on the 16th ultimo, inquiring whether letters of marque cannot be furnished for the propeller *Pembroke*, which is about to be despatched to China, I have the honor to state that it appears to me there are objections to, and no authority for granting letters of marque in the present contest. I am not aware that Congress, which has the exclusive power of granting letters of marque and reprisal, has authorized such letters to be issued against the insurgents; and were there such authorization, I am not prepared to advise its exercise, because it would, in my view, be a recognition of the assumption of the insurgents that they are a distinct and independent nationality.

Under the act of August 5, 1861, "supplementary to an act entitled 'An act to protect the commerce of the United States and to punish the crime of piracy,'" the President is authorized to instruct the commanders of "armed vessels sailing under the authority of any letters of marque and reprisal granted by the Congress of the United States, or the commanders of any other suitable vessels, to subdue, seize, take, and, if on the high seas, to send into any port of the United States any vessel or boat built, purchased, fitted out, or held," &c. This allusion to letters of marque does not authorize such letters to be issued, nor do I find any other act containing such authorization. But the same act, in the second edition, as above quoted, gives the President power to authorize the "commanders of any suitable vessels to subdue, seize," &c. Under this clause, letters permissive, under proper restrictions and guards against abuse, might be granted to the propeller *Pembroke*, so as to meet the views expressed by Mr. Forbes. This would seem to be lawful, and perhaps not liable to the objections of granting letters of marque against our own citizens, and that too without law or authority from the only constituted power that can grant it.

I have the honor to transmit herewith a copy of a letter from Messrs. J. M. Forbes & Co. and others, addressed to this Department, on the same subject.

I am, very respectfully, your obedient servant,
GIDEON WELLES.

WM. H. SEWARD, Secretary of State.

Under all these operations of the privateers, the Northern merchants became very anxious. It was estimated that nearly 100 vessels, of a value, with their cargoes, of several millions, had been captured and destroyed, some of them in distant seas by the *Sumter* and the *Nashville*, which seemed to elude all pursuit, and to be so active in doing injury, that the protection of foreign flags was sought after—the more so, as United States vessels and cargoes were required to pay four or five per cent. more insurance than foreign vessels. In making application for a change of nationality of an American to a British vessel, most of those sold having been placed under that flag, it is required by the British law that the applicant shall make and subscribe a declaration that he is a native born subject, and has never taken the oath of allegiance to any foreign State, (or that he has been naturalized by act of parlia-

ment or by an ordinance of the proper legislative authority, and has since taken the oath of allegiance to Her Majesty,) and that no person or persons other than such as are by the Merchants Shipping Act in 1854 qualified to be owners of British ships, is entitled as owner, to any interest whatever, either legal or beneficial, in said ship. Upon this declaration a register or sea letter is issued, and the vessel at once placed beyond the reach of a return to the Federal flag, except by special act of Congress. The owner, if so disposed, can then carry out any tacit agreement or private understanding he may have had with his friends or former owners, and execute a mortgage or an agreement with them, by which they are made secure in the future possession of the vessel or her anticipated earnings. About sixty-five vessels with an aggregate tonnage of twenty thousand tons, have, it is estimated, been put under foreign flags since the commencement of trouble with the South.

Two of the Confederate sea-going ships were the *Sumter* and the *Nashville*. The latter steamer had an extra importance imparted to her on account of the report that gained currency that she had run the blockade at Charleston, having on board Messrs. Slidell and Mason, Ministers to France and England. She was a side-wheel steamer, of 1,220 tons burthen, and was built in New York in 1853. She was engaged on the Charleston line of steamers, and had the character of being a fast boat; and was retained by the Confederates and armed for a war vessel and privateer. She carried a crew of eighty men, had two long 12-pounder rifled cannon, and was commanded by Capt. Pegram. She left Charleston on the night of the 26th of October, at eleven o'clock, passing over the bar at twelve. When she started the weather was thick and cloudy, but as she was crossing the bar the weather cleared up, and the moon rose brightly, lighting up to full view to the eastward, distant about four miles, two steamers of the blockading squadron—one the United States frigate *Susquehanna*, of twelve guns, the other a powerful propeller gunboat. The *Nashville*, being in the shadow of the land, was not seen by them. She then encountered strong northeasterly winds and very heavy seas, but made the passage to Bermuda in three and a half days. On arriving there she received a pilot on board who took the vessel to the dockyard, stating that, in consequence of her length, she could not go into St. George's. The next day, Capt. Pegram, not being satisfied, obtained a second pilot from the dockyard, who took the *Nashville* safely round into St. George's, at which place the vessel coaled from private sources, the government refusing supplies. During their stay at Bermuda, the commander and officers were treated with the greatest hospitality and kindness, both by the citizens and the officers of the English army and navy stationed there, and every facility for getting stores, coal, &c., was afforded them by the in-

habitants. The Nashville sailed again from Bermuda on the 5th, and from the next day until the 17th she experienced a succession of gales from all points of the compass. Nothing of interest further transpired until the 19th, when she destroyed the United States merchant ship Harvey Birch. She then proceeded up the English Channel, and arrived at Southampton on the morning of the 21st.

Captain Robert B. Pegram, commander of the Confederate steamer Nashville, was formerly attached to the United States navy, in which he held the position of lieutenant. He was born in Virginia and appointed from that State. His original entry into the navy was in the month of February, 1829. His total sea service was about seventeen years, on shore about eight years, and the balance of his time was unemployed. He was in the navy nearly thirty-two years. He had been lately engaged on the coast survey. Lieutenant Pegram had won for himself the respect of the public at large, and of his fellow-officers, by the good qualities he had always shown and his cool courage. He had rendered himself popular by his connection with the affair of the Water Witch in the Paraguay waters, was with the Japan expedition, and was present during the war waged by the English and French in China. First Lieutenant Fauntleroy was aide-de-camp to General Johnston at the battle of Manassas. Second Lieutenant Bennett served there in the naval battery, while one youngster on board, named Cary, received his appointment as midshipman in the Confederate navy as a reward for distinguished gallantry in the same action.

The Government, under the impression that the Nashville had the Confederate commissioners, Mason and Slidell, on board, despatched the armed steamers Alabama and Augusta in pursuit. It turned out, however, that these gentlemen took their departure in the Theodora, to the West Indies, and then took passage in the British steamer Trent, whence, on the 8th of November, they were forcibly taken by the United States steamer San Jacinto, under circumstances which caused the United States Government to declare their detention illegal.

The most remarkable of the Confederate vessels is the Sumter, formerly the Marquis de la Habana, belonging to Gen. Miramon. She was captured by the United States, and taken to New Orleans. She was there taken possession of by the Confederate Government, fitted out and officered as follows: commander, Raphael Semmes; lieutenants, John Kells, R. F. Chapman, W. E. Evans, J. M. Stribling; paymaster, Henry Myers; passed assistant surgeon, Francis I. Golt; lieutenant of marines, Beckett K. Howell; midshipmen, R. F. Armstrong, Wm. A. Hicks, A. G. Hudgins, J. D. Wilson; first assistant engineer, acting as chief, M. J. Freeman; second assistant, W. P. Brooks.

She had a crew of 65 men and 25 marines. Her large gun ranged 2,000 yards. Her ap-

pearance when the smoke-stack was lowered, which sometimes was for disguise, was that of a clumsily rigged bark. Her commander possessed remarkable boldness and energy. She left the Mississippi on the morning of June 30, pursued by the United States steamer Brooklyn, but soon dropped her, and immediately commenced capturing prizes. On the 3d of July, off the Isle of Pines, she captured the ship Golden Rocket, 600 tons, belonging to Bangor, worth \$40,000. On the 4th, she captured the brigs Cuba and Machias, both of Maine, loaded with sugar, and sent them into Cienfuegos. On the 6th, she took the bark West Wind, the bark Louisa Kilham, and the brig Naiad, owned in New York, Rhode Island, and Massachusetts, and laden with sugar; they also were sent to Cienfuegos. The Sumter then ran in and asked leave for the prizes to remain until adjudicated. The Government took them in charge, until orders from the home Government should be received. The Sumter coaled and sailed on the 7th. On the 17th she again coaled at Curaçoa; on the 25th, she captured the Abby Bradford of Boston, and sent her to New Orleans. This vessel was recaptured August 30, by the United States steamer Powhatan. The letters found in her stated that the Sumter was to cruise in the Spanish main. Meantime the Sumter had captured the Joseph Maxwell, August 7, and sent her into Cienfuegos. The Sumter was recognized by the Dutch Governor of Curaçoa as a vessel of war, and he supplied her with coal. The Sumter then went under sail to Surinam, and sailed thence August 31, having obtained coal of an English merchant. On Sept. 16, she touched at and left Maranham where she had been received with great favor. The United States steamer Powhatan, in chase of the Sumter, was looked upon with a great distrust, and \$500 were offered to any one who would sink her. No information could be got as to the destination of the Sumter, and the United States vessel gave up the chase. In November, the Sumter made her appearance at Martinique, and requested coal, which the Governor refused to supply, but allowed her to go to St. Pierre, where she was supplied by English merchants. The United States gunboat Iroquois, Capt. Palmer, then made her appearance. The Governor interposed, however, to prevent any infraction of belligerent rights, and ordered the Iroquois either to anchor one marine league from shore while the Sumter was in port, or remain twenty-four hours after the departure of the Sumter. The citizens all sympathized with the Sumter, and she finally escaped—the rule of requiring one belligerent to remain twenty-four hours after the departure of another, enabled her to do so. She finally crossed the ocean and arrived at the port of Tangier in Africa, where a difficulty occurred between some of her officers and the American Consul, who caused the former to be seized, and sent them home. The vessel was subsequently sold.

PUBLIC DOCUMENTS.

MESSAGE of President Buchanan at the Second Session of the Thirty-Sixth Congress, December, 1860.

Fellow-Citizens of the Senate and House of Representatives:

Throughout the year, since our last meeting, the country has been eminently prosperous in all its material interests. The general health has been excellent, our harvests have been abundant, and plenty smiles throughout the land. Our commerce and manufactures have been prosecuted with energy and industry, and have yielded fair and ample returns. In short, no nation in the tide of time has ever presented a spectacle of greater material prosperity than we have done until within a very recent period.

Why is it, then, that discontent now so extensively prevails, and the union of the States, which is the source of all these blessings, is threatened with destruction. The long-continued and intemperate interference of the Northern people with the question of slavery in the Southern States, has at length produced its natural effects. The different sections of the Union are now arrayed against each other, and the time has arrived, so much dreaded by the Father of his Country, when hostile geographical parties have been formed. I have long foreseen and often forewarned my countrymen of the now impending danger. This does not proceed solely from the claim on the part of Congress or the Territorial Legislatures to exclude slavery from the Territories, or from the efforts of different States to defeat the execution of the Fugitive Slave Law. All or any of these evils might have been endured by the South without danger to the Union—as others have been—in the hope that time and reflection might apply the remedy. The immediate peril arises, not so much from these causes, as from the fact that the incessant and violent agitation of the slavery question throughout the North for the last quarter of a century has at length produced its malign influence on the slaves, and inspired them with vague notions of freedom. Hence a sense of security no longer exists around the family altar. This feeling of peace at home has given place to apprehensions of servile insurrection. Many a matron throughout the South retires at night in dread of what may befall herself and her children before the morning. Should this apprehension of domestic danger, whether real or imaginary, extend and intensify itself until it shall pervade the masses of the Southern people, then disunion will become inevitable. Self-preservation is the first law of nature, and has been implanted in the heart of man by his Creator for the wisest purpose; and no political union, however fraught with blessings and benefits in all other respects, can long continue, if the necessary consequence be to render the homes and firesides of nearly half the parties to it habitually and hopelessly insecure. Sooner or later the bonds of such a union must be severed. It is my conviction that this fatal period has not yet arrived; and my prayer to God is that He would preserve the Constitution and the Union throughout all generations.

But let us take warning in time, and remove the cause of danger. It cannot be denied that, for five-and-twenty years, the agitation at the North against slavery in the South has been incessant. In 1835 pictorial hand-bills and inflammatory appeals were circulated extensively throughout the South, of a character to excite the passions of the slaves; and, in the language of General Jackson, “to stimulate them to insurrection, and produce all the horrors of a servile war.” This agitation has ever since been continued by the public press, by the proceedings of State and county conventions, and by abolition sermons and lectures. The time of Congress has been occupied in violent speeches on this never-ending subject; and appeals in pamphlet and other forms, indorsed by distinguished names, have been sent forth from this central point, and spread broadcast over the Union.

How easy would it be for the American people to

settle the slavery question forever, and to restore peace and harmony to this distracted country!

They, and they alone, can do it. All that is necessary to accomplish the object, and all for which the slave States have ever contended, is to be let alone, and permitted to manage their domestic institutions in their own way. As sovereign States, they, and they alone, are responsible before God and the world for the slavery existing among them. For this the people of the North are not more responsible, and have no more right to interfere, than with similar institutions in Russia or in Brazil. Upon their good sense and patriotic forbearance I confess I still greatly rely. Without their aid, it is beyond the power of any President, no matter what may be his own political proclivities, to restore peace and harmony among the States. Wisely limited and restrained as is his power, under our Constitution and laws, he alone can accomplish but little, for good or for evil, on such a momentous question.

And this brings me to observe that the election of any one of our fellow-citizens to the office of President, does not of itself afford just cause for dissolving the Union. This is more especially true if his election has been effected by a mere plurality, and not a majority of the people, and has resulted from transient and temporary causes which may probably never again occur. In order to justify a resort to revolutionary resistance, the Federal Government must be guilty of a “deliberate, palpable, and dangerous exercise” of powers not granted by the Constitution. The late presidential election, however, has been held in strict conformity with its express provisions. How, then, can the result justify a revolution to destroy this very Constitution? Reason, justice, a regard for the Constitution, all require that we shall wait for some overt and dangerous act on the part of the President elect before resorting to such a remedy.

It is said, however, that the antecedents of the President elect have been sufficient to justify the fears of the South that he will attempt to invade their constitutional rights. But are such apprehensions of contingent danger in the future sufficient to justify the immediate destruction of the noblest system of government ever devised by mortals? From the very nature of his office, and its high responsibilities, he must necessarily be conservative. The stern duty of administering the vast and complicated concerns of this Government, affords in itself a guarantee that he will not attempt any violation of a clear constitutional right. After all, he is no more than the chief executive officer of the Government. His province is not to make, but to execute the laws; and it is a remarkable fact in our history, that, notwithstanding the repeated efforts of the anti-slavery party, no single act has ever passed Congress, unless we may possibly except the Missouri Compromise, impairing, in the slightest degree, the rights of the South to their property in slaves. And it may also be observed, judging from present indications, that no probability exists of the passage of such an act by a majority of both Houses, either in the present or the next Congress. Surely, under these circumstances, we ought to be restrained from present action by the precept of Him who spake as never man spake, that “sufficient unto the day is the evil thereof.” The day of evil may never come, unless we shall rashly bring it upon ourselves.

It is alleged as one cause for immediate secession that the Southern States are denied equal rights with the other States in the common Territories. But by what authority are these denied? Not by Congress, which has never passed, and I believe never will pass, any act to exclude slavery from these Territories; and certainly not by the Supreme Court, which has solemnly decided that slaves are property, and, like all other property, their owners have a right to take them into the common Territories, and hold them there under the protection of the Constitution.

So far, then, as Congress is concerned, the objection is not to any thing they have already done, but to what they may do hereafter. It will surely be admitted that this apprehension of future danger is no good

reason for an immediate dissolution of the Union. It is true that the Territorial Legislature of Kansas, on the 23d of February, 1860, passed, in great haste, an act, over the veto of the Governor, declaring that slavery "is, and shall be, forever prohibited in this Territory." Such an act, however, plainly violating the rights of property secured by the Constitution, will surely be declared void by the judiciary whenever it shall be presented in a legal form.

Only three days after my inauguration, the Supreme Court of the United States solemnly adjudged that this power did not exist in a Territorial Legislature. Yet such has been the factious temper of the times that the correctness of this decision has been extensively impugned before the people, and the question has given rise to angry political conflicts throughout the country. Those who have appealed from this judgment of our highest constitutional tribunal to popular assemblies, would, if they could, invest a Territorial Legislature with power to annul the sacred rights of property. This power Congress is expressly forbidden by the Federal Constitution to exercise. Every State Legislature in the Union is forbidden by its own Constitution to exercise it. It cannot be exercised in any State except by the people in their highest sovereign capacity when framing or amending their State Constitution. In like manner, it can only be exercised by the people of a Territory, represented in a convention of delegates, for the purpose of framing a Constitution preparatory to admission as a State into the Union. Then, and not until then, are they invested with power to decide the question whether slavery shall or shall not exist within their limits. This is an act of sovereign authority, and not of subordinate Territorial legislation. Were it otherwise, then, indeed, would the equality of the States in the Territories be destroyed, and the rights of property in slaves would depend, not upon the guarantees of the Constitution, but upon the shifting majorities of an irresponsible Territorial Legislature. Such a doctrine, from its intrinsic unsoundness, cannot long influence any considerable portion of our people; much less can it afford a good reason for a dissolution of the Union.

The most palpable violations of constitutional duty which have yet been committed, consist in the acts of different State Legislatures to defeat the execution of the Fugitive Slave Law. It ought to be remembered, however, that for these acts, neither Congress nor any President can justly be held responsible. Having been passed in violation of the Federal Constitution, they are therefore null and void. All the Courts, both State and National, before whom the question has arisen, have, from the beginning, declared the Fugitive Slave Law to be constitutional. The single exception is that of a State Court in Wisconsin; and this has not only been reversed by the proper appellate tribunal, but has met with such universal reprobation that there can be no danger from it as a precedent. The validity of this law has been established over and over again by the Supreme Court of the United States, with perfect unanimity. It is founded upon an express provision of the Constitution, requiring that fugitive slaves who escape from service in one State to another, shall be "delivered up" to their masters. Without this provision it is a well-known historical fact that the Constitution itself could never have been adopted by the Convention. In one form or other, under the acts of 1793 and 1850, both being substantially the same, the Fugitive Slave Law has been the law of the land from the days of Washington until the present moment. Here, then, a clear case is presented, in which it will be the duty of the next President, as it has been my own, to act with vigor in executing this supreme law against the conflicting enactments of State Legislatures. Should he fail in the performance of this high duty, he will then have manifested a disregard of the Constitution and laws, to the great injury of the people of nearly one-half of the States of the Union. But are we to presume in advance that he will thus violate his duty? This would be at war with every principle of justice and of Christian charity.

Let us wait for the overt act. The Fugitive Slave Law has been carried into execution in every contested case since the commencement of the present Administration; though often, it is to be regretted, with great loss and inconvenience to the master, and with considerable expense to the Government. Let us trust that the State Legislatures will repeal their unconstitutional and obnoxious enactments. Unless this shall be done without unnecessary delay, it is impossible for any human power to save the Union.

The Southern States, standing on the basis of the Constitution, have a right to demand this act of justice from the States of the North. Should it be refused, then the Constitution, to which all the States are parties, will have been wilfully violated by one portion of them in a provision essential to the domestic security and happiness of the remainder. In that event, the injured States, after having first used all peaceful and constitutional means to obtain redress, would be justified in revolutionary resistance to the Government of the Union.

I have purposely confined my remarks to revolutionary resistance, because it has been claimed, within the last few years, that any State, whenever this shall be its sovereign will and pleasure, may secede from the Union, in accordance with the Constitution, and without any violation of the constitutional rights of the other members of the Confederacy; that as each became parties to the Union by the vote of its own people assembled in convention, so any one of them may retire from the Union in a similar manner by the vote of such a convention.

In order to justify secession as a constitutional remedy, it must be on the principle that the Federal Government is a mere voluntary association of States, to be dissolved at pleasure by any one of the contracting parties. If this be so, the Confederacy is a rope of sand, to be penetrated and dissolved by the first adverse wave of public opinion in any of the States. In this manner our thirty-three States may resolve themselves into as many petty, jarring, and hostile republics, each one retiring from the Union, without responsibility, whenever any sudden excitement might impel them to such a course. By this process, a Union might be entirely broken into fragments in a few weeks, which cost our forefathers many years of toil, privation, and blood to establish.

Such a principle is wholly inconsistent with the history as well as the character of the Federal Constitution. After it was framed, with the greatest deliberation and care, it was submitted to conventions of the people of the several States for ratification. Its provisions were discussed at length in these bodies, composed of the first men of the country. Its opponents contended that it conferred powers upon the Federal Government dangerous to the rights of the States; while its advocates maintained that, under a fair construction of the instrument, there was no foundation for such apprehensions. In that mighty struggle between the first intellects of this or any other country, it never occurred to any individual, either among its opponents or advocates, to assert, or even to intimate, that their efforts were all vain labor, because the moment that any State felt herself aggrieved she might secede from the Union. What a crushing argument would this have proved against those who dreaded that the rights of the States would be endangered by the Constitution! The truth is, that it was not until many years after the origin of the Federal Government that such a proposition was first advanced. It was then met and refuted by the conclusive arguments of General Jackson, who, in his message of the 16th of January, 1833, transmitting the nullifying ordinance of South Carolina to Congress, employs the following language: "The right of the people of a single State to absolve themselves at will, and without the consent of the other States, from their most solemn obligations, and hazard the liberty and happiness of the millions composing this Union, cannot be acknowledged. Such authority is believed to be utterly repugnant both to the principle upon

which the General Government is constituted, and to the objects which it was expressly formed to attain."

It is not pretended that any clause in the Constitution gives countenance to such a theory. It is altogether founded upon inference—not from any language contained in the instrument itself, but from the sovereign character of the several States by which it was ratified. But is it beyond the power of a State, like an individual, to yield a portion of its sovereign rights to secure the remainder? In the language of Mr. Madison, who has been called the father of the Constitution, "it was formed by the States—that is, by the people in each of the States, acting in their highest sovereign capacity; and formed, consequently, by the same authority which formed the State Constitutions."

"Nor is the Government of the United States created by the Constitution less a Government in the strict sense of the term, within the sphere of its powers, than the governments created by the Constitutions of the States are within their several spheres. It is, like them, organized into legislative, executive, and judiciary departments. It operates, like them, directly on persons and things; and, like them, it has at command a physical force for executing the powers committed to it."

It was intended to be perpetual, and not to be annulled at the pleasure of any one of the contracting parties. The old Articles of Confederation were entitled, "Articles of Confederation and Perpetual Union between the States;" and by the thirteenth article it is expressly declared that "the articles of this Confederation shall be inviolably observed by every State, and the Union shall be perpetual." The preamble to the Constitution of the United States, having express reference to the Articles of Confederation, recites that it was established "in order to form a more perfect union." And yet it is contended that this "more perfect union" does not include the essential attribute of perpetuity.

But that the Union was designed to be perpetual appears conclusively from the nature and extent of the powers conferred by the Constitution on the Federal Government. These powers embrace the very highest attributes of national sovereignty. They place both the sword and the purse under its control. Congress has power to make war, and to make peace; to raise and support armies and navies, and to conclude treaties with foreign Governments. It is invested with the power to coin money, and to regulate the value thereof, and to regulate commerce with foreign nations and among the several States. It is not necessary to enumerate the other high powers which have been conferred upon the Federal Government. In order to carry the enumerated powers into effect, Congress possesses the exclusive right to lay and collect duties on imports, and in common with the States to lay and collect all other taxes.

But the Constitution has not only conferred these high powers upon Congress, but it has adopted effectual means to restrain the States from interfering with their exercise. For that purpose it has, in strong prohibitory language, expressly declared that "no State shall enter into any treaty, alliance, or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make any thing but gold and silver coin a tender in payment of debts; pass any bill of attainder, *ex post facto* law, or law impairing the obligation of contracts." Moreover, "without the consent of Congress, no State shall lay any imposts or duties on any imports or exports, except what may be absolutely necessary for executing its inspection laws;" and, if they exceed this amount, the excess shall belong to the United States.

And "no State shall, without the consent of Congress, lay any duty of tonnage; keep troops or ships-of-war in time of peace; enter into any agreement or compact with another State, or with a foreign Power; or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay."

In order still further to secure the uninterrupted exercise of these high powers against State interposi-

tion, it is provided "that this Constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, any thing in the Constitution or laws of any State to the contrary notwithstanding."

The solemn sanction of religion has been superadded to the obligations of official duty, and all Senators and Representatives of the United States, all members of State Legislatures, and all executive and judicial officers, "both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution."

In order to carry into effect these powers, the Constitution has established a perfect Government in all its forms, legislative, executive, and judicial; and this Government, to the extent of its powers, acts directly upon the individual citizens of every State, and executes its own decrees by the agency of its own officers. In this respect it differs entirely from the Government under the old Confederation, which was confined to making requisitions on the States in their sovereign character. This left it in the discretion of each whether to obey or to refuse, and they often declined to comply with such requisitions. It thus became necessary, for the purpose of removing this barrier, and "in order to form a more perfect Union," to establish a Government which could act directly upon the people, and execute its own laws without the intermediate agency of the States. This has been accomplished by the Constitution of the United States.

In short, the Government created by the Constitution, and deriving its authority from the sovereign people of each of the several States, has precisely the same right to exercise its power over the people of all these States, in the enumerated cases, that each one of them possesses over subjects not delegated to the United States, but "reserved to the States, respectively, or to the people."

To the extent of the delegated powers, the Constitution of the United States is as much a part of the Constitution of each State, and is as binding upon its people, as though it had been textually inserted therein.

This Government, therefore, is a great and powerful Government, invested with all the attributes of sovereignty over the special subjects to which its authority extends. Its framers never intended to implant in its bosom the seeds of its own destruction, nor were they at its creation guilty of the absurdity of providing for its own dissolution. It was not intended by its framers to be the baseless fabric of a vision which, at the touch of the enchanter, would vanish into thin air; but a substantial and mighty fabric, capable of resisting the slow decay of time, and of defying the storms of ages. Indeed, well may the jealous patriots of that day have indulged fears that a Government of such high powers might violate the reserved rights of the States; and wisely did they adopt the rule of a strict construction of these powers to prevent the danger! But they did not fear, nor had they any reason to imagine, that the Constitution would ever be so interpreted as to enable any State, by her own act, and without the consent of her sister States, to discharge her people from all or any of their Federal obligations.

It may be asked, then, are the people of the States without redress against the tyranny and oppression of the Federal Government? By no means. The right of resistance on the part of the governed against the oppression of their Governments cannot be denied. It exists independently of all constitutions, and has been exercised at all periods of the world's history. Under it old governments have been destroyed, and new ones have taken their place. It is embodied in strong and express language in our own Declaration of Independence. But the distinction must ever be observed, that this is revolution against an established Government, and not a voluntary secession from it by virtue of an inherent constitutional right. In short, let us look the

danger fairly in the face; secession is neither more nor less than revolution. It may or it may not be a justifiable revolution, but still it is revolution.

What, in the mean time, is the responsibility and true position of the Executive? He is bound by solemn oath before God and the country "to take care that the laws be faithfully executed," and from this obligation he cannot be absolved by any human power. But what if the performance of this duty, in whole or in part, has been rendered impracticable by events over which he could have exercised no control? Such, at the present moment, is the case throughout the State of South Carolina, so far as the laws of the United States to secure the administration of justice by means of the Federal judiciary are concerned. All the Federal officers within its limits, through whose agency alone these laws can be carried into execution, have already resigned. We no longer have a district judge, a district attorney, or a marshal in South Carolina. In fact, the whole machinery of the Federal Government, necessary for the distribution of remedial justice among the people, has been demolished; and it would be difficult, if not impossible, to replace it.

The only acts of Congress on the statute-book bearing upon this subject are those of the 28th February, 1795, and 3d March, 1807. These authorize the President, after he shall have ascertained that the marshal, with his *posse comitatus*, is unable to execute civil or criminal process in any particular case, to call forth the militia and employ the army and navy to aid him in performing this service; having first by proclamation commanded the insurgents "to disperse and retire peaceably to their respective abodes within a limited time." This duty cannot by possibility be performed in a State where no judicial authority exists to issue process, and where there is no marshal to execute it, and where, even if there were such an officer, the entire population would constitute one solid combination to resist him.

The bare enumeration of these provisions proves how inadequate they are without further legislation to overcome a united opposition in a single State, not to speak of other States who may place themselves in a similar attitude. Congress alone has power to decide whether the present laws can or cannot be amended so as to carry out more effectually the objects of the Constitution.

The same insuperable obstacles do not lie in the way of executing the laws for the collection of the customs. The revenue still continues to be collected, as heretofore, at the custom-house in Charleston; and should the collector unfortunately resign, a successor may be appointed to perform this duty.

Then, in regard to the property of the United States in South Carolina. This has been purchased for a fair equivalent, "by the consent of the Legislature of the State," "for the erection of forts, magazines, arsenals," &c., and over these the authority "to exercise exclusive legislation" has been expressly granted by the Constitution to Congress. It is not believed that any attempt will be made to expel the United States from this property by force; but if in this I should prove to be mistaken, the officer in command of the forts has received orders to act strictly on the defensive. In such a contingency, the responsibility for consequences would rightfully rest upon the heads of the assailants.

Apart from the execution of the laws, so far as this may be practicable, the Executive has no authority to decide what shall be the relations between the Federal Government and South Carolina. He has been invested with no such discretion. He possesses no power to change the relations heretofore existing between them, much less to acknowledge the independence of that State. This would be to invest a mere Executive officer with the power of recognizing the dissolution of the Confederacy among our thirty-three sovereign States. It bears no resemblance to the recognition of a foreign *de facto* Government, involving no such responsibility. Any attempt to do this would, on his part, be a naked act of usurpation. It is, therefore, my duty to submit

to Congress the whole question in all its bearings. The course of events is so rapidly hastening forward, that the emergency may soon arise when you may be called upon to decide the momentous question whether you possess the power, by force of arms, to compel a State to remain in the Union. I should feel myself recreant to my duty were I not to express an opinion on this important subject.

The question fairly stated is: Has the Constitution delegated to Congress the power to coerce a State into submission which is attempting to withdraw, or has actually withdrawn from the Confederacy? If answered in the affirmative, it must be on the principle that the power has been conferred upon Congress to declare and to make war against a State. After much serious reflection I have arrived at the conclusion that no such power has been delegated to Congress or to any other department of the Federal Government. It is manifest, upon an inspection of the Constitution, that this is not among the specific and enumerated powers granted to Congress; and it is equally apparent that its exercise is not "necessary and proper for carrying into execution" any one of these powers. So far from this power having been delegated to Congress, it was expressly refused by the convention which framed the Constitution.

It appears, from the proceedings of that body, that on the 31st May, 1787, the clause "authorizing an exertion of the force of the whole against a delinquent State" came up for consideration. Mr. Madison opposed it in a brief but powerful speech, from which I shall extract but a single sentence. He observed: "The use of force against a State would look more like a declaration of war than an infliction of punishment; and would probably be considered by the party attacked as a dissolution of all previous compacts by which it might be bound." Upon his motion the clause was unanimously postponed, and was never, I believe, again presented. Soon afterwards, on the 8th June, 1787, when incidentally adverting to the subject, he said: "Any Government for the United States, formed on the supposed practicability of using force against the unconstitutional proceedings of the States, would prove as visionary and fallacious as the Government of Congress," evidently meaning the then existing Congress of the old Confederation.

Without descending to particulars, it may be safely asserted, that the power to make war against a State is at variance with the whole spirit and intent of the Constitution. Suppose such a war should result in the conquest of a State: how are we to govern it afterwards? Shall we hold it as a province, and govern it by despotic power? In the nature of things we could not, by physical force, control the will of the people, and compel them to elect Senators and Representatives to Congress, and to perform all the other duties depending upon their own volition, and required from the free citizens of a free State as a constituent member of the Confederacy.

But, if we possessed this power, would it be wise to exercise it under existing circumstances? The object would doubtless be to preserve the Union. War would not only present the most effectual means of destroying it, but would banish all hope of its peaceable reconstruction. Besides, in the fraternal conflict a vast amount of blood and treasure would be expended, rendering future reconciliation between the States impossible. In the mean time, who can foretell what would be the sufferings and privations of the people during its existence?

The fact is, that our Union rests upon public opinion, and can never be cemented by the blood of its citizens shed in civil war. If it cannot live in the affections of the people, it must one day perish. Congress possess many means of preserving it by conciliation; but the sword was not placed in their hand to preserve it by force.

But may I be permitted solemnly to invoke my countrymen to pause and deliberate, before they determine to destroy this, the grandest temple which has ever been dedicated to human freedom since the

world began! It has been consecrated by the blood of our fathers, by the glories of the past, and by the hopes of the future. The Union has already made us the most prosperous, and ere long will, if preserved, render us the most powerful nation on the face of the earth. In every foreign region of the globe the title of American citizen is held in the highest respect, and, when pronounced in a foreign land, it causes the hearts of our countrymen to swell with honest pride. Surely when we reach the brink of the yawning abyss, we shall recoil with horror from the last fatal plunge. By such a dread catastrophe the hopes of the friends of freedom throughout the world would be destroyed, and a long night of leaden despotism would enshroud the nations. Our example for more than eighty years would not only be lost, but it would be quoted as a conclusive proof that man is unfit for self-government.

It is not every wrong—nay, it is not every grievous wrong—which can justify a resort to such a fearful alternative. This ought to be the last desperate remedy of a despairing people, after every other constitutional means of conciliation had been exhausted. We should reflect that under this free Government there is an incessant ebb and flow in public opinion. The slavery question, like every thing human, will have its day. I firmly believe that it has already reached and passed the culminating point. But if, in the midst of the existing excitement, the Union shall perish, the evil may then become irreparable. Congress can contribute much to avert it by proposing and recommending to the Legislatures of the several States the remedy for existing evils, which the Constitution has itself provided for its own preservation. This has been tried at different critical periods of our history, and always with eminent success. It is to be found in the fifth article providing for its own amendment. Under this article amendments have been proposed by two-thirds of both Houses of Congress, and have been "ratified by the Legislatures of three-fourths of the several States," and have consequently become parts of the Constitution. To this process the country is indebted for the clause prohibiting Congress from passing any law respecting an establishment of religion, or abridging the freedom of speech, or of the press, or of the right of petition. To this we are also indebted for the bill of rights, which secures the people against any abuse of power by the Federal Government. Such were the apprehensions justly entertained by the friends of State rights at that period as to have rendered it extremely doubtful whether the Constitution could have long survived without these amendments.

Again, the Constitution was amended by the same process after the election of President Jefferson by the House of Representatives, in February, 1803. This amendment was rendered necessary to prevent a recurrence of the dangers which had seriously threatened the existence of the Government during the pendency of that election. The article for its own amendment was intended to secure the amicable adjustment of conflicting constitutional questions like the present, which might arise between the Governments of the States and that of the United States. This appears from contemporaneous history. In this connection, I shall merely call attention to a few sentences in Mr. Madison's justly celebrated report, in 1799, to the Legislature of Virginia. In this he ably and conclusively defended the resolutions of the preceding Legislature against the strictures of several other State Legislatures. These were mainly founded upon the protest of the Virginia Legislature against the "alien and sedition acts," as "palpable and alarming infractions of the Constitution." In pointing out the peaceful and constitutional remedies—and he referred to none other—to which the States were authorized to resort on such occasions, he concludes by saying, "that the Legislatures of the States might have made a direct representation to Congress with a view to obtain a rescinding of the two offensive acts; or they might have represented to their respective Senators in Congress their wish that two-thirds thereof would propose an explanatory amendment to the

Constitution; or two thirds of themselves, if such had been their option, might, by an application to Congress, have obtained a convention for the same object."

This is the very course which I earnestly recommend in order to obtain an "explanatory amendment" of the Constitution on the subject of slavery. This might originate with Congress or the State Legislatures, as may be deemed most advisable to attain the object.

The explanatory amendment might be confined to the final settlement of the true construction of the Constitution on three special points:

1. An express recognition of the right of property in slaves in the States where it now exists or may hereafter exist.

2. The duty of protecting this right in all the common territories throughout their territorial existence, and until they shall be admitted as States into the Union, with or without slavery, as their constitutions may prescribe.

3. A like recognition of the right of the master to have his slave, who has escaped from one State to another, restored and "delivered up" to him, and of the validity of the fugitive slave law enacted for this purpose, together with a declaration that all State laws impairing or defeating this right are violations of the Constitution, and are consequently null and void.

It may be objected that this construction of the Constitution has already been settled by the Supreme Court of the United States, and what more ought to be required? The answer is, that a very large proportion of the people of the United States still contest the correctness of this decision, and never will cease from agitation and admit its binding force until clearly established by the people of the several States in their sovereign character. Such an explanatory amendment would, it is believed, forever terminate the existing dissensions and restore peace and harmony among the States.

It ought not to be doubted that such an appeal to the arbitrament established by the Constitution itself, would be received with favor by all the States of the Confederacy. In any event it ought to be tried in a spirit of conciliation before any of these States shall separate themselves from the Union.

When I entered upon the duties of the Presidential office, the aspect neither of our foreign nor domestic affairs was at all satisfactory. We were involved in dangerous complications with several nations, and two of our territories were in a state of revolution against the Government. A restoration of the African slave trade had numerous and powerful advocates. Unlawful military expeditions were countenanced by many of our citizens, and were suffered, in defiance of the efforts of the Government, to escape from our shores, for the purpose of making war upon the unoffending people of neighboring Republics with whom we were at peace. In addition to these and other difficulties, we experienced a revulsion in monetary affairs soon after my advent to power, of unexampled severity and of ruinous consequences to all the great interests of the country. When we take a retrospect of what was then our condition, and contrast this with its material prosperity at the time of the late Presidential election, we have abundant reason to return our grateful thanks to that merciful Providence which has never forsaken us as a nation in all our past trials.

The remaining portion of this Message, referring to the foreign relations of the country, and containing nothing of interest touching the events of the year 1861, is omitted.

MESSAGE on the condition of the country transmitted to both branches of the National Legislature on January 8th, 1861, by President Buchanan.
To the Senate and House of Representatives:

At the opening of your present session I called your attention to the dangers which threatened the existence of the Union. I expressed my opinion freely con-

cessing the original causes of those dangers, and recommending such measures as I believed would have the effect of tranquillizing the country, and saving it from the peril in which it had been needlessly and most unfortunately involved.

Those opinions and recommendations I do not propose now to repeat. My own convictions upon the whole subject remain unchanged.

The fact that a great calamity was impending over the nation was even at that time acknowledged by every intelligent citizen. It had already made itself felt throughout the length and breadth of the land. The necessary consequences of the alarm thus produced were most deplorable. The imports fell off with a rapidity never known before, except in time of war, in the history of our foreign commerce; the Treasury was unexpectedly left without the means which it had reasonably counted upon to meet the public engagements; trade was paralyzed; manufactures were stopped; the best public securities suddenly sunk in the market; every species of property depreciated more or less; and thousands of poor men, who depended upon their daily labor for their daily bread, were turned out of employment.

I deeply regret that I am not able to give you any information upon the state of the Union which is more satisfactory than what I was then obliged to communicate. On the contrary, matters are still worse at present than they then were. When Congress met, a strong hope pervaded the whole public mind that some amicable adjustment of the subject would speedily be made by the Representatives of the States and of the People which might restore peace between the conflicting sections of the country. That hope has been diminished by every hour of delay; and, as the prospect of a bloodless settlement fades away, the public distress becomes more and more aggravated. As evidence of this it is only necessary to say that the Treasury notes authorized by the act of 17th December last were advertised according to the law, and that no responsible bidder offered to take any considerable sum at par at a lower rate of interest than twelve per cent.

From these facts it appears that, in a government organized like ours, domestic strife, or even a well-grounded fear of civil hostilities, is more destructive to our public and private interests than the most formidable foreign war.

In my Annual Message I expressed the conviction, which I have long deliberately held, and which recent reflection has only tended to deepen and confirm, that no State has a right by its own act to secede from the Union, or throw off its Federal obligations at pleasure. I also declared my opinion to be that, even if that right existed and should be exercised by any State of the Confederacy, the Executive Department of this Government had no authority under the Constitution to recognize its validity by acknowledging the independence of such State. This left me no alternative, as the chief Executive officer under the Constitution of the United States, but to collect the public revenues and to protect the public property, so far as this might be practicable under existing laws.

This is still my purpose. My province is to execute, and not to make the laws. It belongs to Congress exclusively to repeal, to modify, or to enlarge their provisions to meet exigencies as they may occur. I possess no dispensing power.

I certainly had no right to make aggressive war upon any State; and I am perfectly satisfied that the Constitution has wisely withheld that power even from Congress. But the right and the duty to use military force defensively against those who resist the Federal officers in the execution of their legal functions, and against those who assail the property of the Federal Government, is clear and undeniable.

But the dangerous and hostile attitude of the States towards each other has already far transcended and cast in the shade the ordinary Executive duties already provided for by law, and has assumed such vast and alarming proportions as to place the subject entirely above and beyond Executive control. The fact cannot

be disguised that we are in the midst of a great revolution. In all its various bearings, therefore, I commend the question to Congress, as the only human tribunal, under Providence, possessing the power to meet the existing emergency. To them exclusively belongs the power to declare war, or to authorize the employment of military force in all cases contemplated by the Constitution, and they alone possess the power to remove grievances which might lead to war, and to secure peace and union to this distracted country. On them, and on them alone, rests the responsibility.

The Union is a sacred trust left by our Revolutionary fathers to their descendants, and never did any people inherit so rich a legacy. It has rendered us prosperous in peace and triumphant in war. The national flag has floated in glory over every sea. Under its shadow American citizens have found protection and respect in all lands beneath the sun. If we descend to considerations of purely material interest, when, in the history of all time, has a Confederacy been bound together by such strong ties of mutual interest? Each portion of it is dependent on all, and all upon each portion, for prosperity and domestic security. Free trade throughout the whole supplies the wants of one portion from the productions of another, and scatters wealth everywhere. The great planting and farming States require the aid of the commercial and navigating States to send their productions to domestic and foreign markets, and to furnish the naval power to render their transportation secure against all hostile attacks.

Should the Union perish in the midst of the present excitement, we have already had a sad foretaste of the universal suffering which would result from its destruction. The calamity would be severe in every portion of the Union, and would be quite as great, to say the least, in the Southern as in the Northern States.

The greatest aggravation of the evil, and that which would place us in the most unfavorable light both before the world and posterity, is, as I am firmly convinced, that the secession movement has been chiefly based upon a misapprehension at the South of the sentiments of the majority in several of the Northern States. Let the question be transferred from political assemblies to the ballot-box, and the people themselves would speedily redress the serious grievances which the South have suffered. But, in Heaven's name, let the trial be made before we plunge into armed conflict upon the mere assumption that there is no other alternative. Time is a great conservative power. Let us pause at this momentous point, and afford the people both North and South an opportunity for reflection. Would that South Carolina had been convinced of this truth before her precipitate action!

I therefore appeal through you to the people of the country to declare in their might that the Union must and shall be preserved by all constitutional means. I most earnestly recommend that you devote yourselves exclusively to the question how this can be accomplished in peace. All other questions, when compared with this, sink into insignificance. The present is no time for palliations. Action, prompt action, is required. A delay in Congress to prescribe or to recommend a distinct and practical proposition for conciliation, may drive us to a point from which it will be almost impossible to recede.

A common ground on which conciliation and harmony can be produced is surely not unattainable. The proposition to compromise by letting the North have exclusive control of the territory above a certain line, and to give Southern institutions protection below that line, ought to receive universal approbation. In itself, indeed, it may not be entirely satisfactory, but when the alternative is between a reasonable concession on both sides, and a destruction of the Union, it is an impatience upon the patriotism of Congress to assert that its members will hesitate for a moment.

Even now the danger is upon us. In several of the States which have not seceded the forts, arsenals, and magazines of the United States have been seized. This is by far the most serious step which has been taken

since the commencement of the troubles. This public property has been long left without garrisons and troops for its protection, because no person doubted its security under the flag of the country in any State of the Union. Besides, our small army has scarcely been sufficient to guard our remote frontiers against Indian incursions. The seizure of this property, from all appearances, has been purely aggressive, and not in resistance to any attempt to coerce a State or States to remain in the Union.

At the beginning of these unhappy troubles I determined that no act of mine should increase the excitement in either section of the country. If the political conflict were to end in a civil war it was my determined purpose not to commence it, nor even to furnish an excuse for it by any act of this Government. My opinion remains unchanged, that justice as well as sound policy require us still to seek a peaceful solution of the questions at issue between the North and the South. Entertaining this conviction, I refrained even from sending reinforcements to Major Anderson, who commanded the forts in Charleston harbor, until an absolute necessity for doing so should make itself apparent, lest it might unjustly be regarded as a menace of military coercion, and thus furnish, if not a provocation, at least a pretext for an outbreak on the part of South Carolina. No necessity for these reinforcements seemed to exist. I was assured by distinguished and upright gentlemen of South Carolina that no attack upon Major Anderson was intended, but that, on the contrary, it was the desire of the State authorities, as much as it was my own, to avoid the fatal consequences which must eventually follow a military collision.

And here I deem it proper to submit for your information the copies of a communication dated 28th December, 1860, addressed to me by R. W. Barnwell, J. H. Adams, and James L. Orr, "Commissioners" from South Carolina, with the accompanying documents, and copies of my answer thereto, dated 31st December.

In further explanation of Major Anderson's removal from Fort Moultrie to Fort Sumter, it is proper to state that, after my answer to the South Carolina Commissioners, the War Department received a letter from that gallant officer dated on the 27th December, 1860, the day after this movement, from which the following is an extract:

"I will add, as my opinion, that many things convinced me that the authorities of the State designed to proceed to a hostile act." (Evidently referring to the orders dated the 11th December, of the late Secretary of War.) "Under this impression I could not hesitate that it was my solemn duty to move my command from a fort which we could not probably have held longer than forty-eight or sixty hours to this one, where my power of resistance is increased to a very great degree."

It will be recollected that the concluding part of these orders was in the following terms:

"The smallness of your force will not permit you, perhaps, to occupy more than one of the three forts, but an attack on, or an attempt to take possession of, either one of them will be regarded as an act of hostility, and you may then put your command into either of them which you may deem most proper, to increase its power of resistance. You are also authorized to take similar defensive steps whenever you have tangible evidence of a design to proceed to a hostile act."

It is said that serious apprehensions are to some extent entertained, in which I do not share, that the peace of this District may be disturbed before the 4th of March next. In any event, it will be my duty to preserve it, and this duty shall be performed.

In conclusion, it may be permitted to me to remark that I have often warned my countrymen of the dangers which now surround us. This may be the last time I shall refer to the subject officially. I feel that my duty has been faithfully, though it may be imperfectly, performed; and, whatever the result may be, I shall carry to my grave the consciousness that I at least meant well for my country.

JAMES BUCHANAN.

WASHINGTON, January 8, 1861.

INAUGURAL ADDRESS of Abraham Lincoln, *on taking the Oath of Office as President of the United States, March 4, 1861.*

Fellow-Citizens of the United States:

In compliance with a custom as old as the Government itself, I appear before you to address you briefly, and to take in your presence the oath prescribed by the Constitution of the United States to be taken by the President "before he enters on the execution of his office."

I do not consider it necessary at present for me to discuss those matters of administration about which there is no special anxiety or excitement.

Apprehension seems to exist among the people of the Southern States that by the accession of a Republican Administration their property and their peace and personal security are to be endangered. There has never been any reasonable cause for such apprehension. Indeed, the most ample evidence to the contrary has all the while existed and been open to their inspection. It is found in nearly all the published speeches of him who now addresses you. I do but quote from one of those speeches when I declare that "I have no purpose, directly or indirectly, to interfere with the institution of slavery in the States where it exists. I believe I have no lawful right to do so, and I have no inclination to do so." Those who nominated and elected me did so with full knowledge that I had made this and many similar declarations, and had never recanted them. And more than this, they placed in the platform for my acceptance, and as a law to themselves and to me, the clear and emphatic resolution which I now read:

"Resolved, That the maintenance inviolate of the rights of the States, and especially the right of each State, to order and control its own domestic institutions according to its own judgment exclusively, is essential to the balance of power on which the perfection and endurance of our political fabric depend, and we denounce the lawless invasion by armed force of the soil of any State or Territory, no matter under what pretext, as among the gravest of crimes."

I now reiterate these sentiments; and, in doing so, I only press upon the public attention the most conclusive evidence of which the case is susceptible, that the property, peace, and security of no section are to be in any wise endangered by the now incoming Administration. I add, too, that all the protection which, consistently with the Constitution and the laws, can be given, will be cheerfully given to all the States, when lawfully demanded, for whatever cause—as cheerfully to one section as to another.

There is much controversy about the delivering up of fugitives from service or labor. The clause I now read is as plainly written in the Constitution as any other of its provisions:

"No person held to service or labor in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due."

It is scarcely questioned that this provision was intended by those who made it for the reclaiming of what we call fugitive slaves; and the intention of the law-giver is the law. All members of Congress swear their support to the whole Constitution—to this provision as much as any other. To the proposition, then, that slaves, whose cases come within the terms of this clause, "shall be delivered up," their oaths are unanimous. Now, if they would make the effort in good temper, could they not, with nearly equal unanimity, frame and pass a law by means of which to keep good that unanimous oath?

There is some difference of opinion whether this clause should be enforced by National or by State authority; but surely that difference is not a very material one. If the slave is to be surrendered, it can be of but little consequence to him, or to others, by which authority it is done. And should any one, in

any case, be content that his oath shall go unkept, on a mere unsubstantial controversy as to how it shall be kept?

Again, in any law upon this subject, ought not all the safeguards of liberty known in civilized and humane jurisprudence to be introduced, so that a free man be not, in any case, surrendered as a slave? And might it not be well, at the same time, to provide by law for the enforcement of that clause in the Constitution which guarantees that "the citizens of each State shall be entitled to all privileges and immunities of citizens in the several States"?

I take the official oath to-day with no mental reservations, and with no purpose to construe the Constitution or laws by any hypocritical rules. And while I do not choose now to specify particular acts of Congress as proper to be enforced, I do suggest that it will be much safer for all, both in official and private stations, to conform to and abide by all those acts which stand unrepealed, than to violate any of them, trusting to find impunity in having them held to be unconstitutional.

It is seventy-two years since the first inauguration of a President under our National Constitution. During that period, fifteen different and greatly distinguished citizens have, in succession, administered the Executive branch of the Government. They have conducted it through many perils, and generally with great success. Yet, with all this scope for precedent, I now enter upon the same task for the brief constitutional term of four years, under great and peculiar difficulty. A disruption of the Federal Union, heretofore only menaced, is now formidably attempted.

I hold that, in contemplation of universal law, and of the Constitution, the Union of these States is perpetual. Perpetuity is implied, if not expressed, in the fundamental law of all National Governments. It is safe to assert that no Government proper ever had a provision in its organic law for its own termination. Continue to execute all the express provisions of our National Constitution, and the Union will endure forever—it being impossible to destroy it, except by some action not provided for in the instrument itself.

Again, if the United States be not a Government proper, but an association of States in the nature of contract merely, can it, as a contract, be peaceably unmade by less than all the parties who made it? One party to a contract may violate it—break it, so to speak; but does it not require all to lawfully rescind it?

Descending from these general principles, we find the proposition that, in legal contemplation, the Union is perpetual, confirmed by the history of the Union itself. The Union is much older than the Constitution. It was formed, in fact, by the Articles of Association in 1774. It was matured and continued by the Declaration of Independence in 1776. It was further matured, and the faith of all the then thirteen States expressly pledged and engaged that it should be perpetual, by the Articles of Confederation in 1778. And, finally, in 1787, one of the declared objects for ordaining and establishing the Constitution was "to form a more perfect union."

But if destruction of the Union, by one, or by a part only, of the States, be lawfully possible, the Union is less perfect than before, the Constitution having lost the vital element of perpetuity.

It follows, from these views, that no State, upon its own mere motion, can lawfully get out of the Union; that resolves and ordinances to that effect are legally void; and that acts of violence, within any State or States, against the authority of the United States, are insurrectionary or revolutionary, according to circumstances.

I, therefore, consider that, in view of the Constitution and the laws, the Union is unbroken, and, to the extent of my ability, I shall take care, as the Constitution itself expressly enjoins upon me, that the laws of the Union be faithfully executed in all the States. Doing this I deem to be only a simple duty on my part; and I shall perform it, so far as practicable, un-

less my rightful masters, the American people, shall withhold the requisite means, or, in some authoritative manner, direct the contrary. I trust this will not be regarded as a menace, but only as the declared purpose of the Union that it will constitutionally defend and maintain itself.

In doing this there need be no bloodshed or violence; and there shall be none, unless it be forced upon the national authority. The power confided to me will be used to hold, occupy, and possess the property and places belonging to the Government, and to collect the duties and imposts; but, beyond what may be necessary for these objects, there will be no invasion, no using of force against or among the people anywhere. Where hostility to the United States, in any interior locality, shall be so great and universal as to prevent competent resident citizens from holding the Federal offices, there will be no attempt to force obnoxious strangers among the people for that object. While the strict legal right may exist in the Government to enforce the exercise of these offices, the attempt to do so would be so irritating, and so nearly impracticable with all, I deem it better to forego, for the time, the uses of such offices.

The mails, unless repelled, will continue to be furnished in all parts of the Union. So far as possible, the people everywhere shall have that sense of perfect security which is most favorable to calm thought and reflection. The course here indicated will be followed, unless current events and experience shall show a modification or change to be proper, and in every case and exigency my best discretion will be exercised, according to circumstances actually existing, and with a view and a hope of a peaceful solution of the national troubles, and the restoration of fraternal sympathies and affections.

That there are persons in one section or another who seek to destroy the Union at all events, and are glad of any pretext to do it, I will neither affirm nor deny; but if there be such, I need address no word to them. To those, however, who really love the Union, may I not speak?

Before entering upon so grave a matter as the destruction of our national fabric, with all its benefits, its memories, and its hopes, would it not be wise to ascertain precisely why we do it? Will you hazard so desperate a step while there is any possibility that any portion of the ills you fly from have no real existence? Will you, while the certain ills you fly to are greater than all the real ones you fly from—will you risk the commission of so fearful a mistake?

All profess to be content in the Union, if all constitutional rights can be maintained. Is it true, then, that any right, plainly written in the Constitution, has been denied? I think not. Happily the human mind is so constituted that no party can reach to the audacity of doing this. Think, if you can, of a single instance in which a plainly written provision of the Constitution has ever been denied. If, by the mere force of numbers, a majority should deprive a minority of any clearly written constitutional right, it might, in a moral point of view, justify revolution—certainly would if such right were a vital one. But such is not our case. All the vital rights of minorities and of individuals are so plainly assured to them by affirmations and negations, guarantees and prohibitions in the Constitution, that controversies never arise concerning them. But no organic law can ever be framed with a provision specifically applicable to every question which may occur in practical administration. No foresight can anticipate, nor any document of reasonable length contain, express provisions for all possible questions. Shall fugitives from labor be surrendered by National or by State authority? The Constitution does not expressly say. May Congress prohibit slavery in the Territories? The Constitution does not expressly say. Must Congress protect slavery in the Territories? The Constitution does not expressly say.

From questions of this class spring all our constitutional controversies, and we divide upon them into majorities and minorities. If the minority will not

acquiesce the majority must, or the Government must cease. There is no other alternative; for continuing the Government is acquiescence on one side or the other. If a minority in such case will secede rather than acquiesce, they make a precedent which, in turn, will divide and ruin them; for a minority of their own will secede from them whenever a majority refuses to be controlled by such minority. For instance, why may not any portion of a new Confederacy, a year or two hence, arbitrarily secede again, precisely as portions of the present Union now claim to secede from it? All who cherish disunion sentiments are now being educated to the exact temper of doing this.

Is there such perfect identity of interests among the States to compose a new Union, as to produce harmony only, and prevent renewed secession?

Plainly, the central idea of secession is the essence of anarchy. A majority held in restraint by constitutional checks and limitations, and always changing easily with deliberate changes of popular opinions and sentiments, is the only true sovereign of a free people. Whoever rejects it, does, of necessity, fly to anarchy or to despotism. Unanimity is impossible; the rule of a minority, as a permanent arrangement, is wholly inadmissible; so that, rejecting the majority principle, anarchy or despotism in some form is all that is left.

I do not forget the position assumed by some, that constitutional questions are to be decided by the Supreme Court; nor do I deny that such decisions must be binding, in any case, upon the parties to a suit, as to the object of that suit, while they are also entitled to very high respect and consideration in all parallel cases by all other departments of the Government. And while it is obviously possible that such decision may be erroneous in any given case, still the evil effect following it, being limited to that particular case, with the chance that it may be overruled, and never become a precedent for other cases, can better be borne than could the evils of a different practice. At the same time the candid citizen must confess that if the policy of the Government upon vital questions, affecting the whole people, is to be irrevocably fixed by decisions of the Supreme Court, the instant they are made in ordinary litigation between parties in personal actions the people will have ceased to be their own rulers, having to that extent practically resigned their government into the hands of that eminent tribunal.

Nor is there in this view any assault upon the Court of the Judges. It is a duty from which they may not shrink to decide cases properly brought before them, and it is no fault of theirs if others seek to turn their decisions to political purposes. One section of our country believes slavery is right, and ought to be extended, while the other believes it is wrong, and ought not to be extended. This is the only substantial dispute. The fugitive slave clause of the Constitution, and the law for the suppression of the foreign slave trade, are each as well enforced, perhaps, as any law can ever be in a community where the moral sense of the people imperfectly supports the law itself. The great body of the people abide by the dry legal obligation in both cases, and a few break over in each. This, I think, cannot be perfectly cured; and it would be worse in both cases after the separation of the sections than before. The foreign slave trade, now imperfectly suppressed, would be ultimately revived without restriction in one section; while fugitive slaves, now only partially surrendered, would not be surrendered at all, by the other.

Physically speaking, we cannot separate. We cannot remove our respective sections from each other, nor build an impassable wall between them. A husband and wife may be divorced, and go out of the presence and beyond the reach of each other; but the different parts of our country cannot do this. They cannot but remain face to face; and intercourse, either amicable or hostile, must continue between them. Is it possible, then, to make that intercourse more advantageous or more satisfactory after separation than before? Can aliens make treaties easier than friends can make

laws? Can treaties be more faithfully enforced between aliens than laws can among friends? Suppose you go to war, you cannot fight always; and when, after much loss on both sides, and no gain on either, you cease fighting, the identical old questions, as to terms of intercourse, are again upon you.

This country, with its institutions, belongs to the people who inhabit it. Whenever they shall grow weary of the existing Government, they can exercise their constitutional right of amending it, or their revolutionary right to dismember or overthrow it. I cannot be ignorant of the fact that many worthy and patriotic citizens are desirous of having the National Constitution amended. While I make no recommendation of amendments, I fully recognize the rightful authority of the people over the whole subject, to be exercised in either of the modes prescribed in the instrument itself; and I should, under existing circumstances, favor rather than oppose a fair opportunity being afforded the people to act upon it. I will venture to add that to me the convention mode seems preferable, in that it allows amendments to originate with the people themselves, instead of only permitting them to take or reject propositions originated by others, not especially chosen for the purpose, and which might not be precisely such as they would wish to either accept or refuse. I understand a proposed amendment to the Constitution—which amendment, however, I have not seen—has passed Congress, to the effect that the Federal Government shall never interfere with the domestic institutions of the States, including that of persons held to service. To avoid misconception of what I have said, I depart from my purpose not to speak of particular amendments so far as to say that, holding such a provision now to be implied constitutional law, I have no objection to its being made express and irrevocable.

The Chief Magistrate derives all his authority from the people, and they have conferred none upon him to fix terms for the separation of the States. The people themselves can do this also if they choose; but the Executive, as such, has nothing to do with it. His duty is to administer the present Government, as it came to his hands, and to transmit it, unimpaired by him, to his successor.

Why should there not be a patient confidence in the ultimate justice of the people? Is there any better or equal hope in the world? In our present differences is either party without faith of being in the right? If the Almighty Ruler of Nations, with his eternal truth and justice, be on your side of the North, or on yours of the South, that truth and that justice will surely prevail, by the judgment of this great tribunal of the American people.

By the frame of the Government under which we live, the same people have wisely given their public servants but little power for mischief; and have, with equal wisdom, provided for the return of that little to their own hands at very short intervals. While the people retain their virtue and vigilance, no Administration, by any extreme of wickedness or folly, can very seriously injure the Government in the short space of four years.

My countrymen, and all, think calmly and well upon this whole subject. Nothing valuable can be lost by taking time. If there be an object to hurry any of you, in hot haste, to a step which you would never take deliberately, that object will be frustrated by taking time; but no good object can be frustrated by it. Such of you as are now dissatisfied, still have the old Constitution unimpaired, and, on the sensitive point, the laws of your own framing under it; while the new Administration will have no immediate power, if it would, to change either. If it were admitted that you who are dissatisfied hold the right side in the dispute, there still is no single good reason for precipitate action. Intelligence, patriotism, christianity, and a firm reliance on Him who has never yet forsaken this favored land, are still competent to adjust, in the best way, all our present difficulty.

In your hands, my dissatisfied fellow-countrymen,

and not in mine, is the momentous issue of civil war. The Government will not assail you. You can have no conflict without being yourselves the aggressors. You have no oath registered in Heaven to destroy the Government, while I shall have the most solemn one to "preserve, protect, and defend it."

I am loth to close. We are not enemies, but friends. We must not be enemies. Though passion may have strained, it must not break our bonds of affection. The mystic chords of memory, stretching from every battlefield and patriot grave to every living heart and hearth-stone, all over this broad land, will yet swell the chorus of the Union, when again touched, as surely they will be, by the better angels of our nature.

MESSAGE of President Lincoln at the First, or Extra Session of the 37th Congress, July 4, 1861.

Fellow-Citizens of the Senate and House of Representatives:

Having been convened on an extraordinary occasion, as authorized by the Constitution, your attention is not called to any ordinary subject of legislation.

At the beginning of the present presidential term, four months ago, the functions of the Federal Government were found to be generally suspended within the several States of South Carolina, Georgia, Alabama, Mississippi, Louisiana, and Florida, excepting only those of the Post-Office Department.

Within these States all the forts, arsenals, dockyards, custom houses and the like, including the movable and stationary property in and about them, had been seized, and were held in open hostility to this Government, excepting only Fort Pickens, Taylor, and Jefferson, on and near the Florida coast, and Fort Sumter, in Charleston harbor, South Carolina. The forts thus seized had been put in improved condition, new ones had been built, and armed forces had been organized and were organizing, all avowedly with the same hostile purpose.

The forts remaining in the possession of the Federal Government in and near these States were either besieged or menaced by warlike preparations, and especially Fort Sumter was nearly surrounded by well-protected hostile batteries, with guns equal in quality to the best of its own, and outnumbering the latter as perhaps ten to one. A disproportionate share of the Federal muskets and rifles had somehow found their way into these States, and had been seized to be used against the Government. Accumulations of the public revenue, lying within them, had been seized for the same object. The Navy was scattered in distant seas, leaving but a very small part of it within the immediate reach of the Government. Officers of the Federal Army and Navy had resigned in great numbers; and of those resigning, a large proportion had taken up arms against the Government. Simultaneously, and in connection with all this, the purpose to sever the Federal Union was openly avowed. In accordance with this purpose, an ordinance had been adopted in each of these States, declaring the States, respectively, to be separated from the National Union. A formula for instituting a combined government of these States had been promulgated; and this illegal organization, in the character of Confederate States, was already invoking recognition, aid, and intervention from foreign Powers.

Finding this condition of things, and believing it to be an imperative duty upon the incoming Executive to prevent, if possible, the consummation of such attempt to destroy the Federal Union, a choice of means to that end became indispensable. This choice was made, and was declared in the inaugural address. The policy chosen looked to the exhaustion of all peaceful measures before a resort to any stronger ones. It sought only to hold the public places and property not already wrested from the Government, and to collect the revenue, relying for the rest on time, discussion, and the ballot-box. It promised a continuance of the

mails, at Government expense, to the very people who were resisting the Government; and it gave repeated pledges against any disturbance to any of the people, or any of their rights. Of all that which a President might constitutionally and justifiably do in such a case, every thing was forborne, without which it was believed possible to keep the Government on foot.

On the 5th of March, (the present incumbent's first full day in office,) a letter of Major Anderson, commanding at Fort Sumter, written on the 25th of February, and received at the War Department on the 4th of March, was by that Department placed in his hands. This letter expressed the professional opinion of the writer, that reinforcements could not be thrown into that fort within the time for his relief, rendered necessary by the limited supply of provisions, and with a view of holding possession of the same, with a force of less than twenty thousand good and well-disciplined men. This opinion was concurred in by all the officers of his command, and their memoranda on the subject were made enclosures of Major Anderson's letter. The whole was immediately laid before Lieutenant-General Scott, who at once concurred with Major Anderson in opinion. On reflection, however, he took full time, consulting with other officers, both of the army and the navy; and at the end of four days came reluctantly, but decidedly, to the same conclusion as before. He also stated at the same time that no such sufficient force was then at the control of the Government, or could be raised and brought to the ground within the time when the provisions in the fort would be exhausted. In a purely military point of view, this reduced the duty of the Administration in the case to the mere matter of getting the garrison safely out of the fort.

It was believed, however, that to so abandon that position, under the circumstances, would be utterly ruinous; that the necessity under which it was to be done would not be fully understood; that by many it would be construed as a part of a voluntary policy; that at home it would discourage the friends of the Union, embolden its adversaries, and go far to insure to the latter a recognition abroad; that, in fact, it would be our national destruction consummated. This could not be allowed. Starvation was not yet upon the garrison; and ere it would be reached Fort Pickens might be reinforced. This last would be a clear indication of policy, and would better enable the country to accept the evacuation of Fort Sumter as a military necessity. An order was at once directed to be sent for the landing of the troops from the steamship Brooklyn into Fort Pickens. This order could not go by land, but must take the longer and slower route by sea. The first return news from the order was received just one week before the fall of Fort Sumter. The news itself was that the officer commanding the Sabine, to which vessel the troops had been transferred from the Brooklyn, acting upon some *quasi* armistice of the late Administration, (and of the existence of which the present Administration, up to the time the order was despatched, had only too vague and uncertain rumors to fix attention,) had refused to land the troops. To now reinforce Fort Pickens before a crisis would be reached at Fort Sumter was impossible—rendered so by the near exhaustion of provisions in the latter-named fort. In precaution against such a conjuncture, the Government had a few days before commenced preparing an expedition, as well adapted as might be, to relieve Fort Sumter, which expedition was intended to be ultimately used or not, according to circumstances. The strongest anticipated case for using it was now presented, and it was resolved to send it forward. As had been intended in this contingency, it was also resolved to notify the Governor of South Carolina that he might expect an attempt would be made to provision the fort; and that, if the attempt should not be resisted, there would be no effort to throw in men, arms, or ammunition, without further notice, or in case of an attack upon the fort. This notice was accordingly given; whereupon the fort was attacked and bombarded to its fall, without even

awaiting the arrival of the provisioning expedition.

It is thus seen that the assault upon and reduction of Fort Sumter was in no sense a matter of self-defence on the part of the assailants. They well knew that the garrison in the fort could by no possibility commit aggression upon them. They knew—they were expressly notified—that the giving of bread to the few brave and hungry men of the garrison was all which would on that occasion be attempted, unless themselves, by resisting so much, should provoke more. They knew that this Government desired to keep the garrison in the fort, not to assail them, but merely to maintain visible possession, and thus to preserve the Union from actual and immediate dissolution—trusting, as hereinbefore stated, to time, discussion, and the ballot-box for final adjustment; and they assailed and reduced the fort for precisely the reverse object—to drive out the visible authority of the Federal Union, and thus force it to immediate dissolution. That this was their object the Executive well understood; and having said to them in the inaugural address, "You can have no conflict without being yourselves the aggressors," he took pains not only to keep this declaration good, but also to keep the case so free from the power of ingenious sophistry that the world should not be able to misunderstand it. By the affair at Fort Sumter, with its surrounding circumstances, that point was reached. Then and thereby the assailants of the Government began the conflict of arms, without a gun in sight or in expectancy to return their fire, save only the few in the fort, sent to that harbor years before for their own protection, and still ready to give that protection in whatever was lawful. In this act, discarding all else, they have forced upon the country the distinct issue, "immediate dissolution or blood."

And this issue embraces more than the fate of these United States. It presents to the whole family of man the question, whether a constitutional republic or democracy—a government of the people by the same people—can or cannot maintain its territorial integrity against its own domestic foes. It presents the question, whether discontented individuals, too few in numbers to control administration, according to organic law, in any case, can always, upon the pretences made in this case, or on any other pretences, or arbitrarily, without any pretence, break up their Government, and thus practically put an end to free government upon the earth. It forces us to ask, "Is there, in all republics, this inherent and fatal weakness?" "Must a Government, of necessity, be too strong for the liberties of its own people, or too weak to maintain its own existence?"

So viewing the issue, no choice was left but to call out the war power of the Government; and so to resist force employed for its destruction, by force for its preservation.

The call was made, and the response of the country was most gratifying, surpassing in unanimity and spirit the most sanguine expectation. Yet none of the States commonly called slave States, except Delaware, gave a regiment through regular State organization. A few regiments have been organized within some others of those States by individual enterprise, and received into the Government service. Of course, the seceded States, so called, (and to which Texas had been joined about the time of the inauguration,) gave no troops to the cause of the Union. The border States, so called, were not uniform in their action, some of them being almost for the Union, while in others—as Virginia, North Carolina, Tennessee, and Arkansas—the Union sentiment was nearly repressed and silenced. The course taken in Virginia was the most remarkable—perhaps the most important. A convention, elected by the people of that State to consider this very question of disrupting the Federal Union, was in session at the capital of Virginia when Fort Sumter fell. To this body the people had chosen a large majority of professed Union men. Almost immediately after the fall of Sumter, many members of that majority went over to the original disunion minority, and with them adopted an or-

dinance for withdrawing the State from the Union. Whether this change was wrought by their great approval of the assault upon Sumter, or their great resentment at the Government's resistance to that assault, is not definitely known. Although they submitted the ordinance for ratification to a vote of the people, to be taken on a day then somewhat more than a month distant, the convention and the Legislature, (which was also in session at the same time and place,) with leading men of the State, not members of either, immediately commenced acting as if the State were already out of the Union. They pushed military preparations vigorously forward all over the State. They seized the United States armory at Harper's Ferry, and the navy-yard at Gosport, near Norfolk. They received—perhaps invited—into their State large bodies of troops, with their warlike appointments, from the so-called seceded States. They formally entered into a treaty of temporary alliance and cooperation with the so-called "Confederate States," and sent members to their Congress at Montgomery; and, finally, they permitted the insurrectionary Government to be transferred to their capital at Richmond.

The people of Virginia have thus allowed this giant insurrection to make its nest within her borders; and this Government has no choice left but to deal with it where it finds it. And it has the less regret, as the loyal citizens have in due form claimed its protection. Those loyal citizens this Government is bound to recognize and protect as being Virginia.

In the border States, so called—in fact, the middle States—there are those who favor a policy which they call "armed neutrality;" that is, an arming of those States to prevent the Union forces passing one way, or the disunion the other, over their soil. This would be disunion completed. Figuratively speaking, it would be the building of an impassable wall along the line of separation—and yet not quite an impassable one; for, under the guise of neutrality, it would tie the hands of Union men, and freely pass supplies from among them to the insurrectionists, which it could not do as an open enemy. At a stroke it would take all the trouble off the hands of secession, except only what proceeds from the external blockade. It would do for the disunionists that which of all things they most desire—feed them well and give them disunion without a struggle of their own. It recognizes no fidelity to the Constitution, no obligation to maintain the Union; and while very many who have favored it are doubtless loyal citizens, it is, nevertheless, very injurious in effect.

Recurring to the action of the Government, it may be stated that at first a call was made for seventy-five thousand militia; and rapidly following this a proclamation was issued for closing the ports of the insurrectionary districts by proceedings in the nature of a blockade. So far all was believed to be strictly legal. At this point the insurrectionists announced their purpose to enter upon the practice of privateering.

Other calls were made for volunteers to serve for three years, unless sooner discharged, and also for large additions to the regular army and navy. These measures, whether strictly legal or not, were ventured upon under what appeared to be a popular demand and a public necessity; trusting then, as now, that Congress would readily ratify them. It is believed that nothing has been done beyond the constitutional competency of Congress.

Soon after the first call for militia, it was considered a duty to authorize the commanding General in proper cases, according to his discretion, to suspend the privilege of the writ of habeas corpus, or, in other words, to arrest and detain, without resort to the ordinary processes and forms of law, such individuals as he might deem dangerous to the public safety. This authority has purposely been exercised but very sparingly. Nevertheless, the legality and propriety of what has been done under it are questioned, and the attention of the country has been called to the proposition that one who is sworn to "take care that the laws be faithfully executed" should not himself violate them. Of course

some consideration was given to the questions of power and propriety before this matter was acted upon. The whole of the laws which were required to be faithfully executed were being resisted, and failing of execution in nearly one-third of the States. Must they be allowed to finally fail of execution, even had it been perfectly clear that by the use of the means necessary to their execution some single law, made in such extreme tenderness of the citizen's liberty, that practically it relieves more of the guilty than of the innocent, should to a very limited extent be violated? To state the question more directly: are all the laws but one to go unexecuted, and the Government itself go to pieces, lest that one be violated? Even in such a case, would not the official oath be broken if the Government should be overthrown, when it was believed that disregarding the single law would tend to preserve it? But it was not believed that this question was presented. It was not believed that any law was violated. The provision of the Constitution that "the privilege of the writ of habeas corpus shall not be suspended unless when, in cases of rebellion or invasion, the public safety may require it," is equivalent to a provision—is a provision—that such privilege may be suspended when, in case of rebellion or invasion, the public safety does require it. It was decided that we have a case of rebellion, and that the public safety does require the qualified suspension of the privilege of the writ which was authorized to be made. Now, it is insisted that Congress, and not the Executive, is vested with this power. But the Constitution itself is silent as to which or who is to exercise the power; and as the provision was plainly made for a dangerous emergency, it cannot be believed the framers of the instrument intended that in every case the danger should run its course until Congress could be called together; the very assembling of which might be prevented, as was intended in this case, by the rebellion.

No more extended argument is now offered, as an opinion, at some length, will probably be presented by the Attorney-General. Whether there shall be any legislation upon the subject, and if any, what, is submitted entirely to the better judgment of Congress.

The forbearance of this Government had been so extraordinary, and so long-continued, as to lead some foreign nations to shape their action as if they supposed the early destruction of our national Union was probable. While this, on discovery, gave the Executive some concern, he is now happy to say that the sovereignty and rights of the United States are now everywhere practically respected by foreign Powers; and a general sympathy with the country is manifested throughout the world.

The reports of the Secretaries of the Treasury, War, and the Navy, will give the information in detail deemed necessary and convenient for your deliberation and action; while the Executive and all the Departments will stand ready to supply omissions, or to communicate new facts considered important for you to know.

It is now recommended that you give the legal means for making this contest a short and decisive one; that you place at the control of the Government, for the work, at least four hundred thousand men, and \$400,000,000. That number of men is about one-tenth of those of proper ages within the regions where, apparently, all are willing to engage; and the sum is less than a twenty-third part of the money value owned by the men who seem ready to devote the whole. A debt of \$600,000,000 now, is a less sum per head than was the debt of our Revolution when we came out of that struggle; and the money value in the country now bears even a greater proportion to what it was then, than does the population. Surely each man has as strong a motive now to preserve our liberties, as each had then to establish them.

A right result, at this time, will be worth more to the world than ten times the men and ten times the money. The evidence reaching us from the country leaves no doubt that the material for the work is abundant, and that it needs only the hand of legislation to

give it legal sanction, and the hand of the Executive to give it practical shape and efficiency. One of the greatest perplexities of the Government is to avoid receiving troops faster than it can provide for them. In a word, the people will save their Government if the Government itself will do its part only indifferently well.

It might seem, at first thought, to be of little difference whether the present movement at the South be called "secession," or "rebellion." The movers, however, will understand the difference. At the beginning they knew they could never raise their treason to any respectable magnitude by any name which implies violation of law. They knew their people possessed as much of moral sense, as much of devotion to law and order, and as much pride in, and reverence for, the history and Government of their common country, as any other civilized and patriotic people. They knew they could make no advancement directly in the teeth of these strong and noble sentiments. Accordingly they commenced by an insidious debauching of the public mind. They invented an ingenious sophism, which, if conceded, was followed by perfectly logical steps, through all the incidents, to the complete destruction of the Union. The sophism itself is: that any State of the Union may, consistently with the national Constitution, and therefore lawfully and peacefully, withdraw from the Union without the consent of the Union or of any other State. The little disguise that the supposed right is to be exercised only for just cause, themselves to be the sole judge of its justice, is too thin to merit any notice.

With rebellion thus sugar-coated, they have been dragging the public mind of their section for more than thirty years, and until at length they have brought many good men to a willingness to take up arms against the Government the day after some assemblage of men have enacted the farcical pretence of taking their State out of the Union, who could have been brought to no such thing the day before.

This sophism derives much, perhaps the whole, of its currency from the assumption that there is some omnipotent and sacred supremacy pertaining to a State—to each State of our Federal Union. Our States have neither more nor less power than that reserved to them in the Union by the Constitution—no one of them ever having been a State out of the Union. The original ones passed into the Union even before they cast off their British colonial dependence; and the new ones each came into the Union directly from a condition of dependence, excepting Texas. And even Texas, in its temporary independence, was never designated a State. The new ones only took the designation of States on coming into the Union, while that name was first adopted by the old ones in and by the Declaration of Independence. Therein the "United Colonies" were declared to be "free and independent States;" but, even then, the object plainly was not to declare their independence of one another, or of the Union, but directly the contrary; as their mutual pledge, and their mutual action, before, at the time, and afterwards, abundantly show. The express plighting of faith by each and all of the original thirteen in the Articles of Confederation, two years later, that the Union shall be perpetual, is most conclusive. Having never been States, either in substance or in name, outside of the Union, whence this magical omnipotence of "State rights," asserting a claim of power to lawfully destroy the Union itself? Much is said about the "sovereignty" of the States; but the word, even, is not in the national Constitution; nor, as is believed, in any of the State constitutions. What is "sovereignty," in the political sense of the term? Would it be far wrong to define it "a political community, without a political superior?" Tested by this, no one of our States, except Texas, ever was a sovereignty. And even Texas gave up the character on coming into the Union; by which act she acknowledged the Constitution of the United States and the laws and treaties of the United States made in pursuance of the Constitution, to be, for her, the supreme law of the land. The States have their *status* in the Union, and they have no other legal *status*. If they break

from this, they can only do so against law and by revolution. The Union, and not themselves separately, procured their independence and their liberty. By conquest, or purchase, the Union gave each of them whatever of independence or liberty it has. The Union is older than any of the States, and, in fact, it created them as States. Originally some dependent colonies made the Union, and, in turn, the Union threw off their old dependence for them, and made them States, such as they are. Not one of them ever had a State constitution independent of the Union. Of course, it is not forgotten that all the new States framed their constitutions before they entered the Union; nevertheless, dependent upon, and preparatory to, coming into the Union.

Unquestionably the States have the powers and rights reserved to them in and by the national Constitution; but among these, surely, are not included all conceivable powers, however mischievous or destructive; but, at most, such only as were known in the world, at the time, as governmental powers; and certainly a power to destroy the Government itself had never been known as a governmental—as a merely administrative power. This relative matter of national power and State rights, as a principle, is no other than the principle of generality and locality. Whatever concerns the whole should be confided to the whole—to the General Government; while whatever concerns only the State should be left exclusively to the State. This is all there is of original principle about it. Whether the national Constitution in defining boundaries between the two has applied the principle with exact accuracy, is not to be questioned. We are all bound by that defining, without question.

What is now combated, is the position that secession is consistent with the Constitution—is lawful and peaceful. It is not contended that there is any express law for it; and nothing should ever be implied as law which leads to unjust or absurd consequences. The nation purchased with money the countries out of which several of these States were formed: is it just that they shall go off without leave and without refunding? The nation paid very large sums (in the aggregate, I believe, nearly a hundred millions) to relieve Florida of the aboriginal tribes: is it just that she shall now be off without consent, or without making any return? The nation is now in debt for money applied to the benefit of these so-called seceding States in common with the rest: is it just either that creditors shall go unpaid, or the remaining States pay the whole? A part of the present national debt was contracted to pay the old debts of Texas: is it just that she shall leave and pay no part of this herself?

Again: if one State may secede, so may another; and when all shall have seceded, none is left to pay the debts. Is this quite just to creditors? Did we notify them of this sage view of ours when we borrowed their money? If we now recognize this doctrine by allowing the seceders to go in peace, it is difficult to see what we can do if others choose to go, or to extort terms upon which they will promise to remain.

The seceders insist that our Constitution admits of secession. They have assumed to make a national Constitution of their own, in which, of necessity, they have either discarded or retained the right of secession, as they insist it exists in ours. If they have discarded it, they thereby admit that, on principle, it ought not to be in ours. If they have retained it, by their own construction of ours they show that, to be consistent, they must secede from one another whenever they shall find it the easiest way of settling their debts, or effecting any other selfish or unjust object. The principle itself is one of disintegration, and upon which no Government can possibly endure.

If all the States, save one, should assert the power to drive that one out of the Union, it is presumed the whole class of seceder politicians would at once deny the power, and denounce the act as the greatest outrage upon State rights. But suppose that precisely the same act, instead of being called "driving the one

out," should be called "the seceding of the others from that one," it would be exactly what the seceders claim to do; unless, indeed, they make the point that the one, because it is a minority, may rightfully do what the others, because they are a majority, may not rightfully do. These politicians are subtle and profound on the rights of minorities. They are not partial to that power which made the Constitution, and speaks from the preamble, calling itself "We, the People."

It may well be questioned whether there is, to-day, a majority of the legally qualified voters of any State, except perhaps South Carolina, in favor of disunion. There is much reason to believe that the Union men are the majority in many, if not in every other one, of the so-called seceded States. The contrary has not been demonstrated in any one of them. It is ventured to affirm this even of Virginia and Tennessee; for the result of an election held in military camps, where the bayonets are all on one side of the question voted upon, can scarcely be considered as demonstrating popular sentiment. At such an election, all that large class who are at once for the Union, and against coercion, would be coerced to vote against the Union.

It may be affirmed, without extravagance, that the free institutions we enjoy have developed the powers and improved the condition of our whole people, beyond any example in the world. Of this we now have a striking and an impressive illustration. So large an army as the Government has now on foot was never before known without a soldier in it but who had taken his place there of his own free choice. But more than this: there are many single regiments whose members, one and another, possess full practical knowledge of all the arts, sciences, professions, and whatever else, whether useful or elegant, is known in the world; and there is scarcely one from which there could not be selected a President, a Cabinet, a Congress, and perhaps a court, abundantly competent to administer the Government itself! Nor do I say this is not true also in the army of our late friends, now adversaries, in this contest; but if it is, so much better the reason why the Government which has conferred such benefits on both them and us should not be broken up. Whoever, in any section, proposes to abandon such a Government, would do well to consider, in deference to what principle it is that he does it; what better he is likely to get in its stead; whether the substitute will give, or be intended to give, so much of good to the people? There are some foreshadowings on this subject. Our adversaries have adopted some declarations of independence, in which, unlike the good old one, penned by Jefferson, they omit the words, "all men are created equal." Why? They have adopted a temporary national constitution, in the preamble of which, unlike our good old one, signed by Washington, they omit "We, the People," and substitute, "We, the deputies of the sovereign and independent States." Why? Why this deliberate pressing out of view the rights of men and the authority of the people?

This is essentially a people's contest. On the side of the Union, it is a struggle for maintaining in the world that form and substance of government whose leading object is to elevate the condition of men; to lift artificial weights from all shoulders; to clear the paths of laudable pursuit for all; to afford all an unfettered start and a fair chance in the race of life. Yielding to partial and temporary departures, from necessity, this is the leading object of the Government for whose existence we contend.

I am most happy to believe that the plain people understand and appreciate this. It is worthy of note, that while in this the Government's hour of trial, large numbers of those in the army and navy who have been favored with the offices have resigned and proved false to the hand which had pampered them, not one common soldier or common sailor is known to have deserted his flag.

Great honor is due to those officers who remained true, despite the example of their treacherous associates; but the greatest honor, and most important fact of all, is the unanimous firmness of the common

soldiers and common sailors. To the last man, so far as known, they have successfully resisted the traitorous efforts of those whose commands, but an hour before, they obeyed as absolute law. This is the patriotic instinct of plain people. They understand, without an argument, that the destroying the Government which was made by Washington means no good to them.

Our popular Government has often been called an experiment. Two points in it our people have already settled—the successful establishing and the successful administering of it. One still remains—its successful maintenance against a formidable internal attempt to overthrow it. It is now for them to demonstrate to the world that those who can fairly carry an election can also suppress a rebellion; that ballots are the rightful and peaceful successors of bullets; and that when ballots have fairly and constitutionally decided, there can be no successful appeal back to bullets; that there can be no successful appeal except to ballots themselves, at succeeding elections. Such will be a great lesson of peace; teaching men that what they cannot take by an election, neither can they take by a war; teaching all the folly of being the beginners of a war.

Let there be some uneasiness in the minds of candid men as to what is to be the course of the Government towards the Southern States after the rebellion shall have been suppressed, the Executive deems it proper to say, it will be his purpose then, as ever, to be guided by the Constitution and the laws; and that he probably will have no different understanding of the powers and duties of the Federal Government relatively to the rights of the States and the people, under the Constitution, than that expressed in the inaugural address.

He desires to preserve the Government, that it may be administered for all, as it was administered by the men who made it. Loyal citizens everywhere have the right to claim this of their Government, and the Government has no right to withhold or neglect it. It is not perceived that, in giving it, there is any coercion, any conquest, or any subjugation, in any just sense of those terms.

The Constitution provides, and all the States have accepted the provision, that "the United States shall guarantee to every State in this Union a republican form of Government." But if a State may lawfully go out of the Union, having done so, it may also discard the republican form of Government; so that to prevent its going out is an indispensable means to the end of maintaining the guarantee mentioned; and when an end is lawful and obligatory, the indispensable means to it are also lawful and obligatory.

It was with the deepest regret that the Executive found the duty of employing the war power in defence of the Government forced upon him. He could but perform this duty, or surrender the existence of the Government. No compromise by public servants could in this case be a cure; not that compromises are not often proper, but that no popular Government can long survive a marked precedent that those who carry an election can only save the Government from immediate destruction by giving up the main point upon which the people gave the election. The people themselves, and not their servants, can safely reverse their own deliberate decisions.

As a private citizen, the Executive could not have consented that these institutions shall perish; much less could he, in betrayal of so vast and so sacred a trust as these free people have confided to him. He felt that he had no moral right to shrink, or even to count the chances of his own life, in what might follow. In full view of his great responsibility, he has, so far, done what he has deemed his duty. You will now, according to your own judgment, perform yours. He sincerely hopes that your views and your action may so accord with his as to assure all faithful citizens who have been disturbed in their rights of a certain and speedy restoration to them, under the Constitution and the laws.

And having thus chosen our course, without guile

and with pure purpose, let us renew our trust in God, and go forward without fear and with manly hearts.

ABRAHAM LINCOLN.

July 4, 1861.

Message of President Lincoln at the Second Session of the Thirty-seventh Congress, December 3d, 1861.

Fellow-Citizens of the Senate and House of Representatives:

In the midst of unprecedented political troubles, we have cause of great gratitude to God for unusual good health, and most abundant harvests.

You will not be surprised to learn that, in the peculiar exigencies of the times, our intercourse with foreign nations has been attended with profound solicitude, chiefly turning upon our own domestic affairs.

A disloyal portion of the American people have, during the whole year, been engaged in an attempt to divide and destroy the Union. A nation which endures factious domestic division, is exposed to disrespect abroad; and one party, if not both, is sure, sooner or later, to invoke foreign intervention.

Nations thus tempted to interfere are not always able to resist the counsels of seeming expediency and ungenerous ambition, although measures adopted under such influences seldom fail to be unfortunate and injurious to those adopting them.

The disloyal citizens of the United States who have offered the ruin of our country, in return for the aid and comfort which they have invoked abroad, have received less patronage and encouragement than they probably expected. If it were just to suppose, as the insurgents have seemed to assume, that foreign nations, in this case, discarding all moral, social, and treaty obligations, would act solely and selfishly for the most speedy restoration of commerce, including especially the acquisition of cotton, those nations appear, as yet, not to have seen their way to their object more directly, or clearly, through the destruction, than through the preservation, of the Union. If we could dare to believe that foreign nations are actuated by no higher principle than this, I am quite sure a sound argument could be made to show them that they can reach their aim more readily and easily by aiding to crush this rebellion, than by giving encouragement to it.

The principal lever relied on by the insurgents for exciting foreign nations to hostility against us, as already intimated, is the embarrassment of commerce. Those nations, however, not improbably, saw from the first, that it was the Union which made, as well our foreign, as our domestic commerce. They can scarcely have failed to perceive that the effort for disunion produces the existing difficulty; and that one strong nation promises more durable peace, and a more extensive, valuable, and reliable commerce, than can the same nation broken into hostile fragments.

It is not my purpose to review our discussions with foreign States; because whatever might be their wishes or dispositions, the integrity of our country, and the stability of our Government mainly depend, not upon them, but on the loyalty, virtue, patriotism, and intelligence of the American people. The correspondence itself, with the usual reservations, is herewith submitted.

I venture to hope it will appear that we have practised prudence and liberality towards foreign powers, averting causes of irritation; and with firmness maintaining our own rights and honor.

Since, however, it is apparent that here, as in every other State, foreign dangers necessarily attend domestic difficulties, I recommend that adequate and ample measures be adopted for maintaining the public defences on every side. While, under this general recommendation, provision for defending our sea-coast line readily occurs to the mind, I also, in the same connection, ask the attention of Congress to our great lakes and rivers. It is believed that some fortifications and depots of arms and munitions, with harbor and navigation improvements, all at well-selected points

upon these, would be of great importance to the national defence and preservation. I ask attention to the views of the Secretary of War, expressed in his report, upon the same general subject.

I deem it of importance that the loyal regions of East Tennessee and Western North Carolina should be connected with Kentucky, and other faithful parts of the Union, by railroad. I therefore recommend, as a military measure, that Congress provide for the construction of such road as speedily as possible. Kentucky no doubt will coöperate, and through her legislation make the most judicious selection of a line. The northern terminus must connect with some existing railroad; and whether the route shall be from Lexington, or Nicholasville, to the Cumberland Gap, or from Lebanon to the Tennessee line, in the direction of Knoxville, or on some still different line, can easily be determined. Kentucky and the General Government coöperating, the work can be completed in a very short time; and when done, it will be not only of vast present usefulness, but also a valuable permanent improvement, worth its cost in all the future.

Some treaties, designed chiefly for the interests of commerce, and having no grave political importance, have been negotiated, and will be submitted to the Senate for their consideration.

Although we have failed to induce some of the commercial powers to adopt a desirable melioration of the rigor of maritime war, we have removed all obstructions from the way of this humane reform, except such as are merely of temporary and accidental occurrence.

I invite your attention to the correspondence between her Britannic Majesty's Minister accredited to this Government, and the Secretary of State, relative to the detention of the British ship *Perthshire*, in June last, by the United States steamer *Massachusetts*, for a supposed breach of the blockade. As this detention was occasioned by an obvious misapprehension of the facts, and as justice requires that we should commit no belligerent act not founded in strict right, as sanctioned by public law, I recommend that an appropriation be made to satisfy the reasonable demand of the owners of the vessel for her detention.

I repeat the recommendation of my predecessor, in his annual message to Congress in December last, in regard to the disposition of the surplus which will probably remain after satisfying the claims of American citizens against China, pursuant to the awards of the commissioners under the act of the 3d of March, 1859. If, however, it should not be deemed advisable to carry that recommendation into effect, I would suggest that authority be given for investing the principal, over the proceeds of the surplus referred to, in good securities, with a view to the satisfaction of such other just claims of our citizens against China as are not unlikely to arise hereafter in the course of our extensive trade with that Empire.

By the act of the 5th of August last, Congress authorized the President to instruct the commanders of suitable vessels to defend themselves against, and to capture pirates. This authority has been exercised in a single instance only. For the more effectual protection of our extensive and valuable commerce, in the eastern seas especially, it seems to me that it would also be advisable to authorize the commanders of sailing vessels to recapture any prizes which pirates may make of United States vessels and their cargoes, and the consular courts, now established by law in eastern countries, to adjudicate the cases, in the event that this should not be objected to by the local authorities.

If any good reason exists why we should persevere longer in withholding our recognition of the independence and sovereignty of Hayti and Liberia, I am unable to discern it. Unwilling, however, to inaugurate a novel policy in regard to them without the approbation of Congress, I submit for your consideration the expediency of an appropriation for maintaining a chargé d'affaires near each of those new States. It does not admit of doubt that important commercial

advantages might be secured by favorable treaties with them.

The operations of the Treasury during the period which has elapsed since your adjournment have been conducted with signal success. The patriotism of the people has placed at the disposal of the Government the large means demanded by the public exigencies. Much of the national loan has been taken by citizens of the industrial classes, whose confidence in their country's faith, and zeal for their country's deliverance from present peril, have induced them to contribute to the support of the Government the whole of their limited acquisitions. This fact imposes peculiar obligations to economy in disbursement and energy in action.

The revenue from all sources, including loans, for the financial year ending on the 30th June, 1861, was eighty-six million eight hundred and thirty-five thousand nine hundred dollars and twenty-seven cents, and the expenditures for the same period, including payments on account of the public debt, were eighty-four million five hundred and seventy-eight thousand eight hundred and thirty-four dollars and forty-seven cents; leaving a balance in the treasury, on the 1st July, of two million two hundred and fifty-seven thousand sixty-five dollars and eighty cents. For the first quarter of the financial year, ending on the 30th September, 1861, the receipts from all sources, including the balance of 1st of July, were one hundred and two million five hundred and thirty-two thousand five hundred and nine dollars and twenty-seven cents, and the expenses ninety-eight million two hundred and thirty-nine thousand seven hundred and thirty-three dollars and nine cents; leaving a balance, on the 1st of October, 1861, of four million two hundred and ninety-two thousand seven hundred and seventy-six dollars and eighteen cents.

Estimates for the remaining three-quarters of the year, and for the financial year 1863, together with his views of ways and means for meeting the demands contemplated by them, will be submitted to Congress by the Secretary of the Treasury. It is gratifying to know that the expenditures made necessary by the rebellion are not beyond the resources of the loyal people, and to believe that the same patriotism which has thus far sustained the Government will continue to sustain it till peace and union shall again bless the land.

I respectfully refer to the report of the Secretary of War for information respecting the numerical strength of the army, and for recommendations having in view an increase of its efficiency, and the well-being of the various branches of the service intrusted to his care. It is gratifying to know that the patriotism of the people has proved equal to the occasion, and that the number of troops tendered greatly exceeds the force which Congress authorized me to call into the field.

I refer with pleasure to those portions of his report which make allusion to the creditable degree of discipline already attained by our troops, and to the excellent sanitary condition of the entire army.

The recommendation of the Secretary for an organization of the militia upon a uniform basis, is a subject of vital importance to the future safety of the country, and is commended to the serious attention of Congress.

The large addition to the regular army, in connection with the defection that has so considerably diminished the number of its officers, gives peculiar importance to his recommendation for increasing the corps of cadets to the greatest capacity of the Military Academy.

By mere omission, I presume, Congress has failed to provide chaplains for hospitals occupied by volunteers. This subject was brought to my notice, and I was induced to draw up the form of a letter, one copy of which, properly addressed, has been delivered to each of the persons, and at the dates respectively named and stated in a schedule, containing also the form of the letter, marked A, and herewith transmitted.

These gentlemen, I understand, entered upon the duties designated at the times respectively stated in

the schedule, and have labored faithfully therein ever since. I therefore recommend that they be compensated at the same rate as chaplains in the army. I further suggest that general provision be made for chaplains to serve at hospitals, as well as with regiments.

The report of the Secretary of the Navy presents in detail the operations of that branch of the service, the activity and energy which have characterized its administration, and the results of measures to increase its efficiency and power. Such have been the additions, by construction and purchase, that it may almost be said a navy has been created and brought into service since our difficulties commenced.

Besides blockading our extensive coast, squadrons larger than ever before assembled under our flag have been put afloat, and performed deeds which have increased our naval renown.

I would invite special attention to the recommendation of the Secretary for a more perfect organization of the navy, by introducing additional grades in the service.

The present organization is defective and unsatisfactory, and the suggestions submitted by the department will, it is believed, if adopted, obviate the difficulties alluded to, promote harmony, and increase the efficiency of the navy.

There are three vacancies on the bench of the Supreme Court—two by the decease of Justices Daniel and McLean, and one by the resignation of Justice Campbell. I have so far forbore making nominations to fill these vacancies for reasons which I will now state. Two of the outgoing judges resided within the States now overrun by revolt; so that if successors were appointed in the same localities, they could not now serve upon their circuits; and many of the most competent men there probably would not take the personal hazard of accepting to serve, even here, upon the supreme bench. I have been unwilling to throw all the appointments northward, thus disabling myself from doing justice to the South on the return of peace; although I may remark that to transfer to the North one which has heretofore been in the South, would not, with reference to territory and population, be unjust.

During the long and brilliant judicial career of Judge McLean his circuit grew into an empire—altogether too large for any one judge to give the courts therein more than a nominal attendance—rising in population from one million four hundred and seventy thousand and eighteen, in 1830, to six million one hundred and fifty-one thousand four hundred and five, in 1860.

Besides this, the country generally has outgrown our present judicial system. If uniformity was at all intended, the system requires that all the States shall be accommodated with circuit courts, attended by supreme judges, while, in fact, Wisconsin, Minnesota, Iowa, Kansas, Florida, Texas, California, and Oregon have never had any such courts. Nor can this well be remedied without a change of the system; because the adding of judges to the Supreme Court, enough for the accommodation of all parts of the country with circuit courts, would create a court altogether too numerous for a judicial body of any sort. And the evil, if it be one, will increase as new States come into the Union. Circuit courts are useful, or they are not useful. If useful, no State should be denied them; if not useful, no State should have them. Let them be provided for all, or abolished as to all.

Three modifications occur to me, either of which, I think, would be an improvement upon our present system. Let the Supreme Court be of convenient number in every event. Then, first, let the whole country be divided into circuits of convenient size, the supreme judges to serve in a number of them corresponding to their own number, and independent circuit judges be provided for all the rest. Or, secondly, let the supreme judges be relieved from circuit duties, and circuit judges provided for all the circuits. Or, thirdly, dispense with circuit courts altogether, leaving the judicial functions wholly to the district courts and an independent Supreme Court.

I respectfully recommend to the consideration of Congress the present condition of the statute laws, with the hope that Congress will be able to find an easy remedy for many of the inconveniences and evils which constantly embarrass those engaged in the practical administration of them. Since the organization of the Government, Congress has enacted some five thousand acts and joint resolutions, which fill more than six thousand closely printed pages, and are scattered through many volumes. Many of these acts have been drawn in haste and without sufficient caution, so that their provisions are often obscure in themselves, or in conflict with each other, or at least so doubtful as to render it very difficult for even the best informed persons to ascertain precisely what the statute law really is.

It seems to me very important that the statute laws should be made as plain and intelligible as possible, and be reduced to as small a compass as may consist with the fulness and precision of the will of the legislature and the perspicuity of its language. This, well done, would, I think, greatly facilitate the labors of those whose duty it is to assist in the administration of the laws, and would be a lasting benefit to the people, by placing before them, in a more accessible and intelligible form, the laws which so deeply concern their interests and their duties.

I am informed by some whose opinions I respect, that all the acts of Congress now in force, and of a permanent and general nature, might be revised and rewritten, so as to be embraced in one volume (or, at most, two volumes) of ordinary and convenient size. And I respectfully recommend to Congress to consider of the subject, and, if my suggestion be approved, to devise such plan as to their wisdom shall seem most proper for the attainment of the end proposed.

One of the unavoidable consequences of the present insurrection is the entire suppression, in many places, of all the ordinary means of administering civil justice by the officers, and in the forms of existing law. This is the case, in whole or in part, in all the insurgent States; and as our armies advance upon and take possession of parts of those States, the practical evil becomes more apparent. There are no courts nor officers to whom the citizens of other States may apply for the enforcement of their lawful claims against citizens of the insurgent States; and there is a vast amount of debt constituting such claims. Some have estimated it as high as two hundred million dollars, due, in large part, from insurgents in open rebellion to loyal citizens who are, even now, making great sacrifices in the discharge of their patriotic duty to support the Government.

Under these circumstances, I have been urgently solicited to establish, by military power, courts to administer summary justice in such cases. I have thus far declined to do it, not because I had any doubt that the end proposed—the collection of the debts—was just and right in itself, but because I have been unwilling to go beyond the pressure of necessity in the unusual exercise of power. But the powers of Congress I suppose are equal to the anomalous occasion, and therefore I refer the whole matter to Congress, with the hope that a plan may be devised for the administration of justice in all such parts of the insurgent States and Territories as may be under the control of this Government, whether by a voluntary return to allegiance and order, or by the power of our arms: this, however, not to be a permanent institution, but a temporary substitute, and to cease as soon as the ordinary courts can be reestablished in peace.

It is important that some more convenient means should be provided, if possible, for the adjustment of claims against the Government, especially in view of their increased number by reason of the war. It is as much the duty of Government to render prompt justice against itself, in favor of citizens, as it is to administer the same between private individuals. The investigation and adjudication of claims, in their nature belong to the judicial department; besides, it is apparent that the attention of Congress will be more than usually

engaged, for some time to come, with great national questions. It was intended, by the organization of the court of claims, mainly to remove this branch of business from the halls of Congress; but while the court has proved to be an effective and valuable means of investigation, it in great degree fails to effect the object of its creation, for want of power to make its judgments final.

Fully aware of the delicacy, not to say the danger, of the subject, I commend to your careful consideration whether this power of making judgments final may not properly be given to the court, reserving the right of appeal on questions of law to the Supreme Court, with such other provisions as experience may have shown to be necessary.

I ask attention to the report of the Postmaster-General, the following being a summary statement of the condition of the department:

The revenue from all sources during the fiscal year ending June 30, 1861, including the annual permanent appropriation of seven hundred thousand dollars for the transportation of "free mail matter," was nine million forty-nine thousand two hundred and ninety-six dollars and forty cents, being about two per cent. less than the revenue for 1860.

The expenditures were thirteen million six hundred and six thousand seven hundred and fifty-nine dollars and eleven cents, showing a decrease of more than eight per cent. as compared with those of the previous year, and leaving an excess of expenditure over the revenue for the last fiscal year of four million five hundred and fifty-seven thousand four hundred and sixty-two dollars and seventy-one cents.

The gross revenue for the year ending June 30, 1863, is estimated at an increase of four per cent. on that of 1861, making eight million six hundred and eighty-three thousand dollars, to which should be added the earnings of the department in carrying free matter, viz.: seven hundred thousand dollars, making nine million three hundred and eighty-three thousand dollars.

The total expenditures for 1863 are estimated at twelve million five hundred and twenty-eight thousand dollars, leaving an estimated deficiency of three million one hundred and forty-five thousand dollars to be supplied from the Treasury, in addition to the permanent appropriation.

The present insurrection shows, I think, that the extension of this district across the Potomac River, at the time of establishing the capital here, was eminently wise, and consequently that the relinquishment of that portion of it which lies within the State of Virginia was unwise and dangerous. I submit for your consideration the expediency of regaining that part of the district, and the restoration of the original boundaries thereof, through negotiations with the State of Virginia.

The report of the Secretary of the Interior, with the accompanying documents, exhibits the condition of the several branches of the public business pertaining to that department. The depressing influences of the insurrection have been especially felt in the operations of the Patent and General Land Offices. The cash receipts from the sales of public lands during the past year have exceeded the expenses of our land system only about two hundred thousand dollars. The sales have been entirely suspended in the Southern States, while the interruptions to the business of the country, and the diversion of large numbers of men from labor to military service, have obstructed settlements in the new States and Territories of the Northwest.

The receipts of the Patent Office have declined in nine months about one hundred thousand dollars, rendering a large reduction of the force employed necessary to make it self-sustaining.

The demands upon the Pension Office will be largely increased by the insurrection. Numerous applications for pensions, based upon the casualties of the existing war, have already been made. There is reason to believe that many who are now upon the pension rolls, and in receipt of the bounty of the Government, are in the ranks of the insurgent army, or giving them aid

and comfort. The Secretary of the Interior has directed a suspension of the payment of the pensions of such persons upon proof of their disloyalty. I recommend that Congress authorize that officer to cause the names of such persons to be stricken from the pension rolls.

The relations of the Government with the Indian tribes have been greatly disturbed by the insurrection, especially in the Southern superintendency and in that of New Mexico. The Indian country south of Kansas is in the possession of insurgents from Texas and Arkansas. The agents of the United States appointed since the 4th of March for this superintendency have been unable to reach their posts, while the most of those who were in office before that time have espoused the insurrectionary cause, and assume to exercise the powers of agents by virtue of commissions from the insurrectionists. It has been stated in the public press that a portion of those Indians have been organized as a military force, and are attached to the army of the insurgents. Although the Government has no official information upon this subject, letters have been written to the Commissioner of Indian Affairs by several prominent chiefs, giving assurance of their loyalty to the United States, and expressing a wish for the presence of Federal troops to protect them. It is believed that upon the repossession of the country by the Federal forces the Indians will readily cease all hostile demonstrations, and resume their former relations to the Government.

Agriculture, confessedly the largest interest of the nation, has not a department, nor a bureau, but a clerkship only, assigned to it in the Government. While it is fortunate that this great interest is so independent in its nature as to not have demanded and extorted more from the Government, I respectfully ask Congress to consider whether something more cannot be given voluntarily with general advantage.

Annual reports exhibiting the condition of our agriculture, commerce, and manufactures, would present a fund of information of great practical value to the country. While I make no suggestion as to details, I venture the opinion that an agricultural and statistical bureau might profitably be organized.

The execution of the laws for the suppression of the African slave trade has been confided to the Department of the Interior. It is a subject of gratulation that the efforts which have been made for the suppression of this inhuman traffic have been recently attended with unusual success. Five vessels being fitted out for the slave trade have been seized and condemned. Two mates of vessels engaged in the trade, and one person in equipping a vessel as a slaver, have been convicted and subjected to the penalty of fine and imprisonment, and one captain, taken with a cargo of Africans on board his vessel, has been convicted of the highest grade of offence under our laws, the punishment of which is death.

The Territories of Colorado, Dakota, and Nevada, created by the last Congress, have been organized, and civil administration has been inaugurated therein under auspices especially gratifying, when it is considered that the leaven of treason was found existing in some of these new countries when the Federal officers arrived there.

The abundant natural resources of these Territories, with the security and protection afforded by organized government, will doubtless invite to them a large immigration when peace shall restore the business of the country to its accustomed channels. I submit the resolutions of the legislature of Colorado, which evidence the patriotic spirit of the people of the Territory. So far the authority of the United States has been upheld in all the Territories, as it is hoped it will be in the future. I commend their interests and defence to the enlightened and generous care of Congress.

I recommend to the favorable consideration of Congress the interests of the District of Columbia. The insurrection has been the cause of much suffering and sacrifice to its inhabitants, and as they have no representative in Congress, that body should not overlook their just claims upon the Government.

At your late session a joint resolution was adopted authorizing the President to take measures for facilitating a proper representation of the industrial interests of the United States at the exhibition of the industry of all nations to be held at London in the year 1862. I regret to say I have been unable to give personal attention to this subject—a subject at once so interesting in itself, and so extensively and intimately connected with the material prosperity of the world. Through the Secretaries of State and of the Interior a plan or system has been devised, and partly matured, and which will be laid before you.

Under and by virtue of the act of Congress entitled "An act to confiscate property used for insurrectionary purposes," approved August 6, 1861, the legal claims of certain persons to the labor and service of certain other persons have become forfeited; and numbers of the latter, thus liberated, are already dependent on the United States, and must be provided for in some way. Besides this, it is not impossible that some of the States will pass similar enactments for their own benefit respectively, and by operation of which persons of the same class will be thrown upon them for disposal. In such case I recommend that Congress provide for accepting such persons from such States, according to some mode of valuation, in lieu, *pro tanto*, of direct taxes, or upon some other plan to be agreed on with such States respectively; that such persons, on such acceptance by the General Government, be at once deemed free; and that, in any event, steps be taken for colonizing both classes, (or the one first mentioned, if the other shall not be brought into existence,) at some place or places in a climate congenial to them. It might be well to consider, too, whether the free colored people already in the United States could not, so far as individuals may desire, be included in such colonization.

To carry out the plan of colonization may involve the acquiring of territory, and also the appropriation of money beyond that to be expended in the territorial acquisition. Having practised the acquisition of territory for nearly sixty years, the question of constitutional power to do so is no longer an open one with us. The power was questioned at first by Mr. Jefferson, who, however, in the purchase of Louisiana, yielded his scruples on the plea of great expediency. If it be said that the only legitimate object of acquiring territory is to furnish homes for white men, this measure effects that object; for the emigration of colored men leaves additional room for white men remaining or coming here. Mr. Jefferson, however, placed the importance of procuring Louisiana more on political and commercial grounds than on providing room for population.

On this whole proposition, including the appropriation of money with the acquisition of territory, does not the expediency amount to absolute necessity—that, without which the Government itself cannot be perpetuated?

The war continues. In considering the policy to be adopted for suppressing the insurrection, I have been anxious and careful that the inevitable conflict for this purpose shall not degenerate into a violent and remorseless revolutionary struggle. I have, therefore, in every case, thought it proper to keep the integrity of the Union prominent as the primary object of the contest on our part, leaving all questions which are not of vital military importance to the more deliberate action of the Legislature.

In the exercise of my best discretion I have adhered to the blockade of the ports held by the insurgents, instead of putting in force, by proclamation, the law of Congress enacted at the late session for closing those ports.

So, also, obeying the dictates of prudence, as well as the obligations of law, instead of transcending, I have adhered to the act of Congress to confiscate property used for insurrectionary purposes. If a new law upon the same subject shall be proposed, its propriety will be duly considered. The Union must be preserved; and hence, all indispensable means must be employed.

We should not be in haste to determine that radical and extreme measures, which may reach the loyal as well as the disloyal, are indispensable.

The inaugural address at the beginning of the Administration, and the message to Congress at the late special session, were both mainly devoted to the domestic controversy out of which the insurrection and consequent war have sprung. Nothing now occurs to add or subtract, to or from, the principles or general purposes stated and expressed in those documents.

The last ray of hope for preserving the Union peacefully, expired at the assault upon Fort Sumter; and a general review of what has occurred since may not be unprofitable. What was painfully uncertain then, is much better defined and more distinct now; and the progress of events is plainly in the right direction. The insurgents confidently claimed a strong support from north of Mason and Dixon's line; and the friends of the Union were not free from apprehension on the point. This, however, was soon settled definitely, and on the right side. South of the line, noble little Delaware led off right from the first. Maryland was made to seem against the Union. Our soldiers were assaulted, bridges were burned, and railroads torn up within her limits; and we were many days, at one time, without the ability to bring a single regiment over her soil to the capital. Now her bridges and railroads are repaired and open to the Government; she already gives seven regiments to the cause of the Union, and none to the enemy; and her people, at a regular election, have sustained the Union by a larger majority and a larger aggregate vote than they ever before gave to any candidate or any question. Kentucky, too, for some time in doubt, is now decidedly, and, I think, unchangeably, ranged on the side of the Union. Missouri is comparatively quiet, and, I believe, cannot again be overrun by the insurrectionists. These three States of Maryland, Kentucky, and Missouri, neither of which would promise a single soldier at first, have now an aggregate of not less than forty thousand in the field for the Union; while, of their citizens, certainly not more than a third of that number, and they of doubtful whereabouts and doubtful existence, are in arms against it. After a somewhat bloody struggle of months, winter closes on the Union people of Western Virginia, leaving them masters of their own country.

An insurgent force of about fifteen hundred, for months dominating the narrow peninsular region, constituting the counties of Accomac and Northampton, and known as eastern shore of Virginia, together with some contiguous parts of Maryland, have laid down their arms; and the people there have renewed their allegiance to, and accepted the protection of, the old flag. This leaves no armed insurrectionist north of the Potomac, or east of the Chesapeake.

Also we have obtained a footing at each of the isolated points on the southern coast, of Hatteras, Port Royal, Tybee Island, near Savannah, and Ship Island; and we likewise have some general accounts of popular movements, in behalf of the Union, in North Carolina and Tennessee.

These things demonstrate that the cause of the Union is advancing steadily and certainly southward.

Since your last adjournment, Lieutenant-General Scott has retired from the head of the army. During his long life, the nation has not been unmindful of his merit; yet, on calling to mind how faithfully, ably, and brilliantly he has served the country, from a time far back in our history, when few of the now living had been born, and thenceforward continually, I cannot but think we are still his debtors. I submit, therefore, for your consideration, what further mark of recognition is due to him, and to ourselves as a grateful people.

With the retirement of General Scott came the executive duty of appointing, in his stead, a general-in-chief of the army. It is a fortunate circumstance that neither in council nor country was there, so far as I know, any difference of opinion as to the proper person to be selected. The retiring chief repeatedly expressed his judgment in favor of General McClellan for the position; and in this the nation seemed to give

a unanimous concurrence. The designation of General McClellan is, therefore, in considerable degree, the selection of the country as well as of the Executive; and hence there is better reason to hope there will be given him the confidence and cordial support thus, by fair implication, promised, and without which he cannot, with so full efficiency, serve the country.

It has been said that one bad General is better than two good ones; and the saying is true, if taken to mean no more than that an army is better directed by a single mind, though inferior, than by two superior ones, at variance and cross-purposes with each other.

And the same is true in all joint operations, wherein those engaged can have none but a common end in view, and can differ only as to the choice of means. In a storm at sea, no one on board can wish the ship to sink; and yet, not unfrequently all go down together, because too many will direct, and no single mind can be allowed to control.

It continues to develop that the insurrection is largely, if not exclusively, a war upon the first principle of popular government—the rights of the people. Conclusive evidence of this is found in the most grave and maturely-considered public documents, as well as in the general tone of the insurgents. In those documents we find the abridgment of the existing right of suffrage, and the denial to the people of all right to participate in the selection of public officers, except the legislative, boldly advocated, with labored arguments to prove that large control of the people in government is the source of all political evil. Monarchy itself is sometimes hinted at as a possible refuge from the power of the people.

In my present position, I could scarcely be justified were I to omit raising a warning voice against this approach of returning despotism.

It is not needed, nor fitting here, that a general argument should be made in favor of popular institutions; but there is one point, with its connections, not so hackneyed as most others, to which I ask a brief attention. It is the effort to place capital on an equal footing with, if not above, labor, in the structure of government. It is assumed that labor is available only in connection with capital; that nobody labors unless somebody else, owning capital, somehow by the use of it induces him to labor. This assumed, it is next considered whether it is best that capital shall hire laborers, and thus induce them to work by their own consent, or buy them, and drive them to it without their consent. Having proceeded so far, it is naturally concluded that all laborers are either hired laborers, or what we call slaves. And further, it is assumed that whoever is once a hired laborer is fixed in that condition for life.

Now, there is no such relation between capital and labor as assumed; nor is there any such thing as a free man being fixed for life in the condition of a hired laborer. Both these assumptions are false, and all inferences from them are groundless.

Labor is prior to and independent of capital. Capital is only the fruit of labor, and could never have existed if labor had not first existed. Labor is the superior of capital, and deserves much the higher consideration. Capital has its rights, which are as worthy of protection as any other rights. Nor is it denied that there is, and probably always will be, a relation between labor and capital, producing mutual benefits. The error is in assuming that the whole labor of community exists within that relation. A few men own capital, and that few avoid labor themselves, and, with their capital, hire or buy another few to labor for them. A large majority belong to neither class—neither work for others, nor have others working for them. In most of the Southern States, a majority of the whole people of all colors are neither slaves nor masters; while in the Northern, a large majority are neither hirers nor hired. Men, with their families—wives, sons, and daughters—work for themselves, on their farms, in their houses, and in their shops, taking the whole product to themselves, and asking no favors of capital on the one hand, nor of hired laborers or slaves on the other. It is not forgotten that a considerable number

of persons mingle their own labor with capital—that is, they labor with their own hands, and also buy or hire others to labor for them; but this is only a mixed, and not a distinct class. No principle stated is disturbed by the existence of this mixed class.

Again: as has already been said, there is not of necessity any such thing as the free hired laborer being fixed to that condition for life. Many independent men everywhere in these States, a few years back in their lives, were hired laborers. The prudent, penniless beginner in the world labors for wages awhile, saves a surplus with which to buy tools or land for himself, then labors on his own account another while, and at length hires another new beginner to help him. This is the just, and generous, and prosperous system, which opens the way to all, gives hope to all, and consequent energy, and progress, and improvement of condition to all. No men living are more worthy to be trusted than those who toil up from poverty—none less inclined to take or touch aught which they have not honestly earned. Let them beware of surrendering a political power which they already possess, and which, if surrendered, will surely be used to close the door of advancement against such as they, and to fix new disabilities and burdens upon them, till all of liberty shall be lost.

From the first taking of our national census to the last, are seventy years; and we find our population, at the end of the period, eight times as great as it was at the beginning. The increase of those other things which men deem desirable has been even greater. We thus have, at one view, what the popular principle, applied to government through the machinery of the States and the Union, has produced in a given time; and also what, if firmly maintained, it promises for the future. There are already among us those who, if the Union be preserved, will live to see it contain two hundred and fifty millions. The struggle of to-day is not altogether for to-day; it is for a vast future also. With reliance on Providence all the more firm and earnest, let us proceed in the great task which events have devolved upon us.

ABRAHAM LINCOLN.

INAUGURAL ADDRESS of President Jefferson Davis.

Gentlemen of the Congress of the Confederate States of America, Friends, and Fellow-Citizens:

Called to the difficult and responsible station of Chief Executive of the Provisional Government which you have instituted, I approach the discharge of the duties assigned me with an humble distrust of my abilities, but with a sustaining confidence in the wisdom of those who are to guide and aid me in the administration of public affairs, and an abiding faith in the virtue and patriotism of the people. Looking forward to the speedy establishment of a permanent Government to take the place of this, and which by its greater moral and physical power will be better able to combat with the many difficulties which arise from the conflicting interests of separate nations, I enter upon the duties of the office to which I have been chosen, with the hope that the beginning of our career as a Confederacy may not be obstructed by hostile opposition to our enjoyment of the separate existence and independence which we have asserted, and which, with the blessing of Providence, we intend to maintain.

Our present condition, achieved in a manner unprecedented in the history of nations, illustrates the American idea that Governments rest upon the consent of the governed, and that it is the right of the people to alter and abolish Governments whenever they become destructive to the ends for which they were established. The declared compact of the Union from which we have withdrawn was to establish justice, ensure domestic tranquility, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity; and when in the judgment of the sovereign States now com-

posing this Confederacy, it has been perverted from the purposes for which it was ordained, and ceased to answer the ends for which it was established, a peaceful appeal to the ballot-box declared that, so far as they were concerned, the Government created by that compact should cease to exist. In this they merely asserted the right which the Declaration of Independence of 1776 defined to be inalienable. Of the time and occasion of its exercise they as sovereigns were the final judges, each for itself. The impartial, enlightened verdict of mankind will vindicate the rectitude of our conduct; and He who knows the hearts of men will judge of the sincerity with which we labored to preserve the Government of our fathers in its spirit.

The right solemnly proclaimed at the birth of the States, and which has been affirmed and reaffirmed in the bills of rights of the States subsequently admitted into the Union of 1789, undeniably recognizes in the people the power to resume the authority delegated for the purposes of Government. Thus the sovereign States here represented, proceeded to form this Confederacy; and it is by the abuse of language that their act has been denominated revolution. They formed a new alliance, but within each State its Government has remained. The rights of person and property have not been disturbed. The agent through whom they communicated with foreign nations is changed, but this does not necessarily interrupt their international relations. Sustained by the consciousness that the transition from the former Union to the present Confederacy has not proceeded from a disregard on our part of our just obligations or any failure to perform every constitutional duty, moved by no interest or passion to invade the rights of others, anxious to cultivate peace and commerce with all nations, if we may not hope to avoid war, we may at least expect that posterity will acquit us of having needlessly engaged in it. Doubly justified by the absence of wrong on our part, and by wanton aggression on the part of others, there can be no cause to doubt the courage and patriotism of the people of the Confederate States will be found equal to any measures of defence which soon their security may require.

An agricultural people, whose chief interest is the export of a commodity required in every manufacturing country, our true policy is peace, and the freest trade which our necessities will permit. It is alike our interest and that of all those to whom we would sell and from whom we would buy, that there should be the fewest practicable restrictions upon the interchange of commodities. There can be but little rivalry between ours and any manufacturing or navigating community, such as the northeastern States of the American Union. It must follow, therefore, that mutual interest would invite good-will and kind offices. If, however, passion or lust of dominion should cloud the judgment or inflame the ambition of those States, we must prepare to meet the emergency and maintain by the final arbitrament of the sword the position which we have assumed among the nations of the earth.

We have entered upon a career of independence, and it must be inflexibly pursued through many years of controversy with our late associates of the Northern States. We have vainly endeavored to secure tranquillity and obtain respect for the rights to which we were entitled. As a necessity, not a choice, we have resorted to the remedy of separation, and henceforth our energies must be directed to the conduct of our own affairs, and the perpetuity of the Confederacy which we have formed. If a just perception of mutual interest shall permit us peaceably to pursue our separate political career, my most earnest desire will have been fulfilled. But if this be denied us, and the integrity of our territory and jurisdiction be assailed, it will but remain for us with firm resolve to appeal to arms and invoke the blessing of Providence on a just cause.

As a consequence of our new condition, and with a view to meet anticipated wants, it will be necessary to

provide a speedy and efficient organization of the branches of the Executive Department having special charge of foreign intercourse, finance, military affairs, and postal service. For purposes of defence the Confederate States may, under ordinary circumstances, rely mainly upon their militia; but it is deemed advisable in the present condition of affairs, that there should be a well-instructed, disciplined army, more numerous than would usually be required on a peace establishment. I also suggest that, for the protection of our harbors and commerce on the high seas, a navy adapted to those objects will be required. These necessities have, doubtless, engaged the attention of Congress.

With a Constitution differing only from that of our fathers in so far as it is explanatory of their well-known intent, freed from sectional conflicts, which have interfered with the pursuit of the general welfare, it is not unreasonable to expect that the States from which we have recently parted may seek to unite their fortunes to ours, under the Government which we have instituted. For this your Constitution makes adequate provision, but beyond this, if I mistake not, the judgment and will of the people are, that union with the States from which they have separated is neither practicable nor desirable. To increase the power, develop the resources, and promote the happiness of the Confederacy, it is requisite there should be so much homogeneity that the welfare of every portion would be the aim of the whole. Where this does not exist antagonisms are engendered which must and should result in separation.

Actuated solely by a desire to preserve our own rights, and to promote our own welfare, the separation of the Confederate States has been marked by no aggression upon others, and followed by no domestic convulsion. Our industrial pursuits have received no check, the cultivation of our fields progresses as heretofore, and even should we be involved in war, there would be no considerable diminution in the production of the staples which have constituted our exports, in which the commercial world has an interest scarcely less than our own. This common interest of producer and consumer can only be intercepted by an exterior force which should obstruct its transmission to foreign markets, a course of conduct which would be detrimental to manufacturing and commercial interests abroad.

Should reason guide the action of the Government from which we have separated, a policy so detrimental to the civilized world, the Northern States included, could not be dictated by even a stronger desire to inflict injury upon us; but if it be otherwise, a terrible responsibility will rest upon it, and the suffering of millions will bear testimony to the folly and wickedness of our aggressors. In the mean time there will remain to us, besides the ordinary remedies before suggested, the well-known resources for retaliation upon the commerce of an enemy.

Experience in public stations of a subordinate grade to this which your kindness has conferred, has taught me that care and toil and disappointments are the price of official elevation. You will see many errors to forgive, many deficiencies to tolerate; but you shall not find in me either want of zeal or fidelity to the cause that is to me the highest in hope and of most enduring affection. Your generosity has bestowed upon me an undeserved distinction, one which I neither sought nor desired. Upon the continuance of that sentiment, and upon your wisdom and patriotism, I rely to direct and support me in the performance of the duties required at my hands.

We have changed the constituent parts but not the system of our Government. The Constitution formed by our fathers is that of these Confederate States. In their exposition of it, and in the judicial construction it has received, we have a light which reveals its true meaning. Thus instructed as to the just interpretation of that instrument, and ever remembering that all offices are but trusts held for the people, and that delegated powers are to be strictly construed, I will hope

by due diligence in the performance of my duties, though I may disappoint your expectation, yet to retain, when retiring, something of the good-will and confidence which will welcome my entrance into office.

It is joyous in the midst of perilous times to look around upon a people united in heart, when one purpose of high resolve animates and actuates the whole, where the sacrifices to be made are not weighed in the balance, against honor, right, liberty, and equality. Obstacles may retard, but they cannot long prevent the progress of a movement sanctioned by its justice and sustained by a virtuous people. Reverently let us invoke the God of our fathers to guide and protect us in our efforts to perpetuate the principles which by his blessing they were able to vindicate, establish, and transmit to their posterity; and with a continuance of His favor, ever gratefully acknowledged, we may hopefully look forward to success, to peace, to prosperity.

MESSAGE of Jefferson Davis, President of the Confederate States, April 29, 1861.

Gentlemen of Congress:

It is my pleasing duty to announce to you that the Constitution framed for the establishment of a permanent Government of the Confederate States of America has been ratified by the several conventions of each of those States which were referred to to inaugurate the said Government in its full proportions and upon its own substantial basis of the popular will.

It only remains that elections should be held for the designation of the officers to administer it.

There is every reason to believe that at no distant day other States, identical in political principles and community of interests with those which you represent, will join this Confederacy, giving to its typical constellation increased splendor—to its Government of free, equal, and sovereign States, a wider sphere of usefulness, and to the friends of constitutional liberty a greater security for its harmonious and perpetual existence.

It was not, however, for the purpose of making this announcement that I have deemed it my duty to convoke you at an earlier day than that fixed by yourselves for your meeting.

The declaration of war made against this Confederacy, by Abraham Lincoln, President of the United States, in his proclamation, issued on the 15th day of the present month, renders it necessary, in my judgment, that you should convene at the earliest practicable moment to devise the measures necessary for the defence of the country.

The occasion is, indeed, an extraordinary one. It justifies me in giving a brief review of the relations heretofore existing between us and the States which now unite in warfare against us, and a succinct statement of the events which have resulted, to the end that mankind may pass intelligent and impartial judgment on our motives and objects.

During the war waged against Great Britain by her colonies on this continent, a common danger impelled them to a close alliance, and to the formation of a Confederation by the terms of which the colonies, styling themselves States, entered severally into a firm league of friendship with each other for their common defence, the security of their liberties, and their mutual and general welfare, binding themselves to assist each other against all force offered to, or attacks made upon them, or any of them, on account of religion, sovereignty, trade, or any other pretence whatever.

In order to guard against any misconstruction of their compact, the several States made an explicit declaration in a distinct article—that each State retain its sovereignty, freedom, and independence, and every power of jurisdiction and right which is not by this said Confederation expressly delegated to the United States in Congress assembled under this contract of alliance.

The war of the Revolution was successfully waged,

and resulted in the treaty of peace with Great Britain in 1783, by the terms of which the several States were each by name recognized to be independent.

The articles of confederation contained a clause whereby all alterations were prohibited, unless confirmed by the Legislatures of every State after being agreed to by the Congress; and in obedience to this provision, under the resolution of Congress of the 21st of February, 1787, the several States appointed delegates for the purpose of revising the articles of confederation, and reporting to Congress and the several Legislatures such alterations and provisions therein as shall, when agreed to in Congress, and confirmed by the States, render the Federal Constitution adequate to the exigencies of the Government, and the preservation of the Union.

It was by the delegates chosen by the several States under the resolution just quoted, that the Constitution of the United States was formed in 1787, and submitted to the several States for ratification, as shown by the seventh article, which is in these words: "The ratification of the conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same."

I have italicised certain words in the resolutions just made for the purpose of attracting attention to the singular and marked caution with which the States endeavored in every possible form to exclude the idea that the separate and independent sovereignty of each State was merged into one common government or nation; and the earnest desire they evinced to impress on the Constitution its true character—that of a compact between independent States—the Constitution of 1787, however, admitting the clause already recited from the articles of confederation, which provided in explicit terms that each State reclaimed its sovereignty and independence.

Some alarm was felt in the States, when invited to ratify the Constitution, lest this omission should be construed into an abandonment of their cherished principles, and they refused to be satisfied until amendments were added to the Constitution, placing beyond any pretence of doubt the reservation by the States of their sovereign rights and powers not expressly delegated to the United States by the Constitution.

Strange, indeed, must it appear to the impartial observer, that it is none the less true that all these carefully worded clauses proved unavailing to prevent the rise and growth in the Northern States of a political school which has persistently claimed that the Government set above and over the States, an organization created by the States, to secure the blessings of liberty and independence against foreign aggression, has been gradually perverted into a machine for their control in their domestic affairs.

The creature has been exalted above its Creator—the principals have been made subordinate to the agent appointed by themselves.

The people of the Southern States, whose almost exclusive occupation was agriculture, early perceived a tendency in the Northern States to render a common Government subservient to their own purposes by imposing burthens on commerce as protection to their manufacturing and shipping interests.

Long and angry controversies grew out of these attempts, often successful, to benefit one section of the country at the expense of the other, and the danger of disruption arising from this cause was enhanced by the fact that the Northern population was increasing, by emigration and other causes, more than the population of the South.

By degrees, as the Northern States gained preponderance in the National Congress, self-interest taught their people to yield ready assent to any plausible advocacy of their right as majority to govern the minority. Without control, they learn to listen with impatience to the suggestion of any constitutional impediment to the exercise of their will, and so utterly have the principles of the Constitution been corrupted in the Northern mind, that, in the inaugural address delivered by President Lincoln in March last, he asserts a

maxim which he plainly deems to be undeniable, that the theory of the Constitution requires, in all cases, that the majority shall govern. And in another memorable instance the same Chief Magistrate did not hesitate to liken the relations between States and the United States to those which exist between the country and the State in which it is situated, and by which it was created.

This is the lamentable and fundamental error in which rests the policy that has culminated in his declaration of war against these Confederate States.

In addition to the long-continued and deep-seated resentment felt by the Southern States at the persistent abuse of the powers they had delegated to the Congress for the purpose of enriching the manufacturing and shipping classes of the North at the expense of the South, there has existed for nearly half a century another subject of discord, involving interests of such transcendent magnitude as at all times to create the apprehension in the minds of many devoted lovers of the Union that its permanence was impossible.

When the several States delegated certain powers to the United States Congress, a large portion of the laboring population were imported into the colonies by the mother country. In twelve out of the fifteen States, negro slavery existed, and the right of property existing in slaves was protected by law; this property was recognized in the Constitution, and provision was made against its loss by the escape of the slave.

The increase in the number of slaves by foreign importation from Africa was also secured by a clause forbidding Congress to prohibit the slave trade anterior to a certain date, and in no clause can there be found any delegation of power to the Congress to authorize it in any manner to legislate to the prejudice, detriment, or discouragement of the owners of that species of property, or excluding it from the protection of the Government.

The climate and soil of the Northern States soon proved unpropitious to the continuance of slave labor, while the reverse being the case at the South, made unrestricted free intercourse between the two sections unfriendly.

The Northern States consulted their own interests by selling their slaves to the South and prohibiting slavery between their limits. The South were willing purchasers of property suitable to their wants, and paid the price of the acquisition, without harboring a suspicion that their quiet possession was to be disturbed by those who were not only in want of constitutional authority, but by good faith as vendors, from disquieting a title emanating from themselves.

As soon, however, as the Northern States, that prohibited African slavery within their limits, had reached a number sufficient to give their representation a controlling vote in the Congress, a persistent and organized system of hostile measures against the rights of the owners of slaves in the Southern States was inaugurated and gradually extended. A series of measures was devised and prosecuted for the purpose of rendering insecure the tenure of property in slaves.

Fanatical organizations, supplied with money by voluntary subscriptions, were assiduously engaged in exciting amongst the slaves a spirit of discontent and revolt. Means were furnished for their escape from their owners, and agents secretly employed to entice them to abscond.

The constitutional provision for their rendition to their owners was first evaded, then openly denounced as a violation of conscientious obligations and religious duty. Men were taught that it was a merit to elude, disobey, and violently oppose the execution of the laws enacted to secure the performance of the promise contained in the constitutional compact. Often owners of slaves were mobbed and even murdered in open day solely for applying to a magistrate for the arrest of a fugitive slave.

The dogmas of the voluntary organization soon obtained control of the Legislatures of many of the

Northern States, and laws were passed for the punishment, by ruinous fines, and long-continued imprisonment in gaols and penitentiaries, of citizens of the Southern States who should dare ask of the officers of the law for the recovery of their property. Emboldened by success on the theatre of agitation and aggression, against the clearly expressed constitutional rights of the Congress, Senators and Representatives were sent to the common councils of the nation, whose chief title to this distinction consisted in the display of a spirit of ultra fanaticism, and whose business was, not to promote the general welfare, or ensure domestic tranquillity—but to awaken the bitterest hatred against the citizens of sister States by violent denunciations of their institutions.

The transaction of public affairs was impeded by repeated efforts to usurp powers not delegated by the Constitution, for the purpose of impairing the security of property in slaves, and reducing those States which held slaves to a condition of inferiority.

Finally, a great party was organized for the purpose of obtaining the administration of the Government, with the avowed object of using its power for the total exclusion of the slave States from all participation in the benefits of the public domain acquired by all the States in common, whether by conquest or purchase, surrounding them entirely by States in which slavery should be prohibited, thus rendering the property in slaves so insecure as to be comparatively worthless, and thereby annihilating in effect property worth thousands of millions of dollars.

This party, thus organized, succeeded in the month of November last in the election of its candidate for the Presidency of the United States.

In the mean time, under the mild and genial climate of the Southern States, and the increasing care for the well-being and comfort of the laboring classes, dictated alike by interest and humanity, the African slaves had augmented in number from about six hundred thousand, at the date of the adoption of the constitutional compact, to upwards of four millions.

In a moral and social condition they had been elevated from brutal savages into docile, intelligent, and civilized agricultural laborers, and supplied not only with bodily comforts, but with careful religious instruction, under the supervision of a superior race. Their labor had been so directed as not only to allow a gradual and marked amelioration of their own condition, but to convert hundreds of thousands of square miles of the wilderness into cultivated lands covered with a prosperous people. Towns and cities had sprung into existence, and rapidly increased in wealth and population under the social system of the South.

The white population of the Southern slave-holding States had augmented from about 1,250,000 at the date of the adoption of the Constitution, to more than 8,500,000 in 1860, and the productions of the South in cotton, rice, sugar, and tobacco, for the full development and continuance of which the labor of African slaves was and is indispensable, had swollen to an amount which formed nearly three-fourths of the export of the whole United States, and had become absolutely necessary to the wants of civilized man.

With interests of such overwhelming magnitude imperilled, the people of the Southern States were driven by the conduct of the North to the adoption of some course of action to avoid the dangers with which they were openly menaced. With this view, the Legislatures of the several States invited the people to select delegates to conventions to be held for the purpose of determining for themselves what measures were best to be adopted to meet so alarming a crisis in their history.

Here it may be proper to observe that, from a period as early as 1798, there had existed in all of the States of the Union a party almost uninterruptedly in the majority, based upon the creed that each State was, in the last resort, the sole judge as well of its wrongs as of the mode and measures of redress. Indeed, it is obvious that under the law of nations this principle is

an axiom as applied to the relations of independent sovereign States, such as those which had united themselves under the constitutional compact.

The Democratic party of the United States repeated, in its successful canvass in 1836, the deduction made in numerous previous political contests, that it would faithfully abide by, and uphold the principles laid down in the Kentucky and Virginia Legislatures of 1799, and that it adopts those principles as constituting one of the main foundations of its political creed.

The principles thus emphatically announced embrace that to which I have already adverted—the right of each State to judge of, and redress the wrongs of which it complains. Their principles were maintained by overwhelming majorities of the people of all the States of the Union at different elections, especially in the election of Mr. Jefferson in 1805, Mr. Madison in 1809, and Mr. Pierce in 1852. In the exercise of a right so ancient, so well established, and so necessary for self-preservation, the people of the Confederate States in their conventions determined that the wrongs which they had suffered, and the evils with which they were menaced, required that they should revoke the delegation of powers to the Federal Government which they had ratified in their several conventions. They consequently passed ordinances resuming all their rights as sovereign and independent States, and dissolved their connection with the other States of the Union. Having done this, they proceeded to form a new compact among themselves by new articles of confederation, which have been also ratified by conventions of the several States, with an approach to unanimity far exceeding that of the conventions which adopted the Constitution of 1787. They have organized their new Government in all its departments. The functions of the executive, legislative, and judicial magistrates are performed in accordance with the will of the people, as displayed not merely in a cheerful acquiescence, but in the enthusiastic support of the Government thus established by themselves; and but for the interference of the Government of the United States, this legitimate exercise of a people to self-government has been manifested in every possible form.

Scarce had you assembled in February last, when, prior even to the inauguration of the chief-magistrate you had elected, you expressed your desire for the appointment of commissioners, and for the settlement of all questions of disagreement between the two Governments upon principles of right, justice, equity, and good faith.

It was my pleasure as well as my duty to coöperate with you in this work of peace. Indeed, in my address to you on taking the oath of office, and before receiving from you the communication of this resolution, I had said that “as a necessity, not as a choice, we have resorted to the remedy of separating, and henceforth our energies must be directed to the conduct of our own affairs, and the perpetuity of the Confederacy which we have formed. If a just perception of mutual interest shall permit us to peaceably pursue our separate political career, my most earnest desire will then have been fulfilled.”

It was in furtherance of these accordant views of the congress and the executive, that I made choice of three discreet, able, and distinguished citizens, who repaired to Washington. Aided by their cordial coöperation and that of the Secretary of State, every effort compatible with self-respect and the dignity of the Confederacy was exhausted before I allowed myself to yield to the conviction that the Government of the United States was determined to attempt the conquest of this people, and that our cherished hopes of peace were unobtainable.

On the arrival of our commissioners in Washington on the 5th of March, they postponed, at the suggestion of a friendly intermediary, doing more than giving informal notice of their arrival. This was done with a view to afford time to the President of the United States, who had just been inaugurated, for the discharge of other pressing official duties in the organiza-

tion of his administration, before engaging his attention to the object of their mission.

It was not until the 12th of the month that they officially addressed the Secretary of State, informing him of the purpose of their arrival, and stating in the language of their instructions their wish to make to the Government of the United States overtures for the opening of negotiations, assuring the Government of the United States that the President, Congress, and people of the Confederate States desired a peaceful solution of these great questions—that it was neither their interest nor their wish to make any demand which is not founded on the strictest principles of justice, nor to do any act to injure their late confederates.

To this communication no formal reply was received until the 8th of April. During the interval, the commissioners had consented to waive all questions of form, with the firm resolve to avoid war if possible. They went so far even as to hold, during that long period, unofficial intercourse through an intermediary, whose high position and character inspired the hope of success, and through whom constant assurances were received from the Government of the United States of its peaceful intentions—of its determination to evacuate Fort Sumter; and further, that no measure would be introduced changing the existing status prejudicial to the Confederate States; that in the event of any change in regard to Fort Pickens, notice would be given to the commissioners.

The crooked path of diplomacy can scarcely furnish an example so wanting in courtesy, in candor and directness, as was the course of the United States Government towards our commissioners in Washington. For proof of this I refer to the annexed documents marked, taken in connection with further facts which I now proceed to relate.

Early in April the attention of the whole country was attracted to extraordinary preparations for an extensive military and naval expedition in New York and other Northern ports. These preparations commenced in secrecy, for an expedition whose destination was concealed, and only became known when nearly completed, and on the 5th, 6th, and 7th of April, transports and vessels of war with troops, munitions, and military supplies, sailed from northern ports bound southward.

Alarmed by so extraordinary a demonstration, the commissioners requested the delivery of an answer to their official communication of the 12th of March, and the reply dated on the 15th of the previous month, from which it appears that during the whole interval, whilst the commissioners were receiving assurances calculated to inspire hope of the success of their mission, the Secretary of State and the President of the United States had already determined to hold no intercourse with them whatever—to refuse even to listen to any proposals they had to make, and had profited by the delay created by their own assurances, in order to prepare secretly the means for effective hostile operations.

That these assurances were given, has been virtually confessed by the Government of the United States, by its act of sending a messenger to Charleston to give notice of its purpose to use force if opposed in its intention of supplying Fort Sumter.

No more striking proof of the absence of good faith in the confidence of the Government of the United States towards the Confederacy can be required, than is contained in the circumstances which accompanied this notice.

According to the usual course of navigation, the vessels composing the expedition, and designed for the relief of Fort Sumter, might be looked for in Charleston harbor on the 9th of April. Yet our commissioners in Washington were detained under assurances that notice should be given of any military movement. The notice was not addressed to them, but a messenger was sent to Charleston to give notice to the Governor of South Carolina, and the notice was so given at a late hour on the 8th of April, the eve

of the very day on which the fleet might be expected to arrive.

That this manoeuvre failed in its purpose was not the fault of those who controlled it. A heavy tempest delayed the arrival of the expedition, and gave time to the commander of our forces at Charleston to ask and receive instructions of the Government. Even then, under all the provocation incident to the contemptuous refusal to listen to our commissioners, and the treacherous course of the Government of the United States, I was sincerely anxious to avoid the effusion of blood, and directed a proposal to be made to the commander of Fort Sumter, who had avowed himself to be nearly out of provisions, that we would abstain from directing our fire on Fort Sumter if he would promise to not open fire on our forces unless first attacked. This proposal was refused. The conclusion was, that the design of the United States was to place the besieging force at Charleston between the simultaneous fire of the fleet. The fort should, of course, be at once reduced. This order was executed by General Beauregard with skill and success, which were naturally to be expected from the well-known character of that gallant officer; and, although the bombardment lasted some thirty-three hours, our flag did not wave over the battered walls until after the appearance of the hostile fleet off Charleston.

Fortunately, not a life was lost on our side, and we were gratified in being prepared. The necessity of an useless effusion of blood, by the prudent caution of the officers who commanded the fleet, in abstaining from the evidently futile effort to enter the harbor for the relief of Major Anderson, was spared.

I refer to the report of the Secretary of War, and the papers accompanying it, for further particulars of this brilliant affair.

In this connection I cannot refrain from a well-deserved tribute to the noble State, the eminently soldierly qualities of whose people were conspicuously displayed. The people of Charleston for months had been irritated by the spectacle of a fortress held within their principal harbor as a standing menace against their peace and independence—built in part with their own money—its custody confided with their long consent to an agent who held no power over them other than such as they had themselves delegated for their own benefit, intended to be used by that agent for their own protection against foreign attack. How it was held out with persistent tenacity as a means of offence against them by the very Government which they had established for their own protection, is well known. They had beleaguered it for months, and felt entire confidence in their power to capture it, yet yielded to the requirements of discipline, curbed their impatience, submitted without complaint to the unaccustomed hardships, labors, and privations of a protracted siege, and when at length their patience was relieved by the signal for attack, and success had crowned their steady and gallant conduct, even in the very moment of triumph they evinced a chivalrous regard for the feelings of the brave but unfortunate officer who had been compelled to lower his flag.

All manifestations or exultations were checked in his presence. Their commanding general, with their cordial approval and the consent of his Government, refrained from imposing any terms that would wound the sensibility of the commander of the fort. He was permitted to retire with the honors of war, to salute his flag, to depart freely with all his command, and was escorted to the vessel on which he embarked with the highest marks of respect from those against whom his guns had so recently been directed.

Not only does every event connected with the siege reflect the highest honor on South Carolina, but the forbearance of her people and of this Government from making any harangue of a victory obtained under circumstances of such peculiar provocation, attest to the fullest extent the absence of any purpose beyond securing their own tranquility, and the sincere desire to avoid the calamities of war.

Scarcely had the President of the United States re-

ceived intelligence of the failure of the scheme which he had devised for the reinforcement of Fort Sumter, when he issued the declaration of war against this Confederacy, which has prompted me to convoke you. In this extraordinary production, that high functionary affects total ignorance of the existence of an independent Government, which, possessing the entire and enthusiastic devotion of its people, is exercising its functions without question over seven sovereign States—over more than five millions of people—and over a territory whose area exceeds five hundred thousand square miles.

He terms sovereign States "combinations too powerful to be suppressed in the ordinary course of judicial proceedings, or by the powers vested in the marshals by law."

He calls for an army of seventy-five thousand men to act as the posse comitatus in aid of the process of the courts of justice in States where no courts exist, whose mandates and decrees are not cheerfully obeyed and respected by a willing people.

He avows that the first service to be assigned to the forces which have been called out will not be to execute the processes of courts, but to capture forts and strongholds situated within the admitted limits of this Confederacy, and garrisoned by its troops, and declares that this effort is intended to maintain the perpetuity of popular Government.

He concludes by commanding the persons composing the "combinations" aforesaid, to wit, the five millions of inhabitants of these States, to retire peaceably to their respective abodes within twenty days.

Apparently contradictory as are the terms of this singular document, one point was unmistakably evident. The President of the United States calls for an army of seventy-five thousand men, whose first service was to be to capture our forts. It was a plain declaration of war which I was not at liberty to disregard, because of my knowledge that under the Constitution of the United States the President was usurping a power granted exclusively to the Congress.

He is the sole organ of communication between that country and foreign powers. The law of nations did not permit me to question the authority of the Executive of a foreign nation to declare war against this Confederacy. Although I might have refrained from taking active measures for our defence, if the States of the Union had all imitated the action of Virginia, North Carolina, Arkansas, Kentucky, Tennessee, and Missouri, by denouncing it as an unconstitutional usurpation of power to which they refuse to respond, I was not at liberty to disregard the fact that many of the States seemed quite content to submit to the exercise of the powers assumed by the President of the United States, and were actively engaged in levying troops for the purpose indicated in the proclamation. Deprived of the aid of Congress, at the moment I was under the necessity of confining my action to a call on the States for volunteers for the common defence, in accordance with the authority you had confided to me before your adjournment.

I deemed it proper further to issue a proclamation, inviting applications from persons disposed to aid in our defence in private armed vessels on the high seas, to the end that preparations might be made for the immediate issue of letters of marque and reprisal, which you alone, under the Constitution, have the power to grant.

I entertain no doubt that you will concur with me in the opinion, that in the absence of an organized navy, it will be eminently expedient to supply their place with private armed vessels, so happily styled by the publicists of the United States the militia of the sea, and so often and justly relied on by them as an efficient and admirable instrument of defensive warfare.

I earnestly recommend the immediate passage of a law authorizing me to accept the numerous proposals already received.

I cannot close this review of the acts of the Government of the United States without referring to a pro-

lamation issued by their President under date of the 19th inst., in which, after declaring that an insurrection has broken out in this Confederacy against the Government of the United States, he announces a blockade of all the ports of these States, and threatens to punish as pirates all persons who shall molest any vessel of the United States under letters of marque issued by this Government. Notwithstanding the authenticity of this proclamation, you will concur with me that it is hard to believe that it could have emanated from a President of the United States.

Its announcement of a mere paper blockade is so manifestly a violation of the law of nations, that it would seem incredible that it could have been issued by authority; but conceding this to be the case, so far as the Executive is concerned, it will be difficult to satisfy the people of these States that their late confederates will sanction its declarations—will determine to ignore the usages of civilized nations, and will inaugurate a war of extermination on both sides, by treating as pirates open enemies acting under the authority of commissions issued by an organized government.

If such proclamation was issued, it could only have been published under the sudden influence of passion, and we may rest assured that mankind will be spared the horrors of the conflict it seems to invite.

For the details of the administration of the different departments, I refer to the reports of the secretaries of each, which accompany this Message.

The State Department has furnished the necessary instructions for those commissioners who have been sent to England, France, Russia, and Belgium, since your adjournment, to ask our recognition as a member of the family of nations, and to make with each of these powers treaties of amity and commerce.

Further steps will be taken to enter into like negotiations with the other European powers, in pursuance to resolutions passed at your last session.

Sufficient time has not yet elapsed since the departure of these commissioners for the receipt of any intelligence from them.

As I deem it desirable that commissioners or other diplomatic agents should also be sent at an early period to the independent American powers south of our Confederacy, with all of whom it is our interest and earnest wish to maintain the most cordial and friendly relations, I suggest the expediency of making the necessary appropriations for that purpose.

Having been officially notified by the public authorities of the State of Virginia that she had withdrawn from the Union and desired to maintain the closest political relations with us which it was possible at this time to establish, I commissioned the Hon. Alexander H. Stephens, Vice-President of the Confederate States, to represent this Government at Richmond.

I am happy to inform you that he has concluded a convention with the State of Virginia, by which that honored Commonwealth, so long and justly distinguished among her sister States, and so dear to the hearts of thousands of her children in the Confederate States, has united her power and her fortunes with ours and become one of us. This convention, together with the ordinance of Virginia adopting the Provisional Constitution of the Confederacy, will be laid before you for your constitutional action.

I have satisfactory assurances from other of our late confederates that they are on the point of adopting similar measures; and I cannot doubt that, ere you shall have been many weeks in session, the whole of the slaveholding States of the late Union will respond to the call of honor and affection, and by uniting their fortunes with ours, promote our common interests and secure our common safety.

In the Treasury Department, regulations have been devised and put into execution for carrying out the policy indicated in your legislation, on the subject of the navigation of the Mississippi River, as well as for the collection of the revenue on the frontier.

Free transit has been secured for vessels and merchandise passing through the Confederate States, and

delay and inconvenience have been avoided as far as possible.

In organizing the revenue service for the various railways entering our territory, as fast as experience shall indicate the possibility of improvement in these regulations, no effort will be spared to free commerce from all unnecessary embarrassments and obstructions.

Under your act authorizing a loan, proposals were issued inviting subscriptions for five millions of dollars, and the call was answered by the prompt subscription of eight millions by our own citizens, and not a single bid was made under par.

The rapid development of the purpose of the President of the United States to invade our soil, capture our forts, blockade our ports, and wage war against us, induced me to direct that the entire subscription should be accepted. It will now become necessary to raise means to a much larger amount to defray the expenses of maintaining our independence and repelling invasion.

I invite your special attention to this subject. The financial condition of the Government, with the suggestion of ways and means for the supply of the Treasury, will be presented to you in a separate communication.

To the department of Justice you have confided not only the organization and supervision of all matters connected with the courts of justice, but also those connected with patents and with the bureau of the public printing.

Since your adjournment all the courts, with the exception of those of Mississippi and Texas, have been organized by the appointment of marshals and district attorneys, and are now prepared for the exercise of their functions. In the two States just named the gentlemen confirmed as judges declined to accept the appointment, and no nominations have yet been made to fill the vacancies.

I refer you to the report of the Attorney-General, and concur in his recommendation for immediate legislation, especially on the subject of patent rights. Early provision should be made to secure to the subjects of foreign nations the full enjoyment of their property in valuable inventions, and to extend to our own citizens protection not only for their own inventions, but for such as may have been assigned to them or may hereafter be assigned by persons not alien enemies.

The patent office business is much more extensive and important than had been anticipated. The applications for patents, although confined under the laws exclusively to citizens of our Confederacy, already average seventy per month, showing the necessity for the prompt organization of a bureau of patents.

The Secretary of War, in his report and accompanying documents, conveys full information concerning the forces, regular, volunteer, and provisional, raised and called for under the several acts of Congress—their organization and distribution; also, an account of the expenditures already made, and the further estimates for the fiscal year ending on the 18th of February, 1862, rendered necessary by recent events.

I refer to the report, also, for a full history of the occurrences in Charleston harbor, prior to, and including, the bombardment and reduction of Fort Sumter, and of the measures subsequently taken for common defence on receiving the intelligence of the declaration of war against us, made by the President of the United States.

There are now in the field at Charleston, Pensacola, Forts Morgan, Jackson, St. Philip, and Pulaski, 19,000 men, and 16,000 are now en route for Virginia. It is proposed to organize and hold in readiness for instant action, in view of the present exigencies of the country, an army of 100,000 men. If further force be needed, the wisdom and patriotism of the Congress will be confidently appealed to for authority to call into the field additional numbers of our noble-spirited volunteers, who are constantly tendering their services far in excess of our wants.

The operations of the Navy Department have been

necessarily restricted by the fact that sufficient time has not yet elapsed for the purchase or construction of more than a limited number of vessels adapted to the public service. Two vessels have been purchased and manned, the *Sumter* and *McRea*, and are now being prepared for sea, at New Orleans, with all possible despatch. Contracts have also been made at that city, with two different establishments, for the casting of ordnance—cannon, shot, and shell—with the view to encourage the manufacture of these articles, so indispensable for our defence, at as many points within our territory as possible. I call your attention to the recommendation of the Secretary for the establishment of a magazine and laboratory for the preparation of ordnance stores and the necessary appropriation required for that purpose.

Hitherto such stores have been prepared at the navy yards, and no appropriation was made at your last session for this object.

The Secretary also calls attention to the fact that no provision has been made for the payment of invalid pensions to our citizens. Many of these persons are advanced in life—they have no means of support—and by the secession of these States have been deprived of their claims against the Government of the United States.

I recommend the appropriation of the sum necessary to pay these pensioners as well as those of the army, whose claim can scarcely exceed \$20,000 per annum.

The Postmaster-General has already succeeded in organizing his department to such an extent as to be in readiness to assume the direction of our postal affairs on the occurrence of the contingency contemplated by the act of 15th March, 1861, or even sooner if desired by Congress.

The various books and circulars have been prepared, and measures taken to secure supplies of blanks, post-age stamps, stamped envelopes, mail bags, locks, keys, &c.

He presents a detailed classification and arrangement of the clerical force, and asks for its increase.

An Auditor of the Treasury for this Department is necessary, and a plan is submitted for the organization of his bureau.

The great number and magnitude of the accounts of this department require an increase of the clerical force in the accounting branch of the Treasury. The revenues of this department are collected and distributed in modes peculiar to itself, and require a special bureau to secure a proper accountability in the administration of its finances.

I call your attention to the additional legislation required for this department—to the recommendation for changes in the law fixing the rates of postage on newspapers and sealed packages of certain kinds, and specially to the recommendation of the Secretary, in which I concur, that you provide at once for the assumption by him of the control of our entire postal service.

In the military organization of the States, provision is made for Brigadier and Major-Generals, but in the army of the Confederate States the highest grade is that of a Brigadier-General; hence it will no doubt sometimes occur that, where troops of the Confederacy do duty with the militia, the General selected for the command and possessed of the views and purposes of this Government, will be superseded by an officer of the militia, not having the same advantages.

To avoid contingencies in the least objectionable manner, I recommend that additional rank be given to the General of the Confederate army; and concurring in the policy of having but one grade of Generals in the army of the Confederacy, I recommend that the law of its organization be amended so that the grade be that of General.

To secure thorough military education, it is deemed essential that officers should enter upon the study of their profession at an early period of life, and have elementary instruction in a military school.

Until such school shall be established it is recommended that cadets be appointed and attached to companies until they shall have attained the age and shall

have acquired the knowledge to fit them for the duties of lieutenants.

I also call your attention to an omission in the law organizing the army, in relation to military chaplains, and recommend that provision be made for their appointment.

In conclusion, I congratulate you on the fact that in every portion of our country there has been exhibited the most patriotic devotion to our common cause. Transportation companies have freely tendered the use of their lines for troops and supplies.

The presidents of the railroads of the Confederacy, in company with others who control lines of communication with States that we hope soon to greet as sisters assembled in convention in this city, have not only reduced largely the rates heretofore demanded for mail service and conveyance of troops and munitions, but have voluntarily proffered to receive their compensation at their reduced rates in the bonds of the Confederacy, for the purpose of leaving all the resources of the Government at its own disposal for the common defence.

Requisitions for troops have been met with such alacrity that the numbers tendering their services have in every instance greatly exceeded the demand. Men of the highest official and social position are serving as volunteers in the ranks. The gravity of age, the zeal of youth, rival each other in the desire to be foremost in the public defence; and though at no other point than the one heretofore noticed have they been stimulated by the excitement incident to actual engagement and the hope of distinction for individual department, they have borne, what for new troops is the most severe ordeal, patient toil, constant vigil, and all the exposure and discomfort of active service, with a resolution and fortitude such as to command the approbation and justify the highest expectation of their conduct when active valor shall be required in place of steady endurance.

A people thus united and resolute cannot shrink from any sacrifice which they may be called on to make, nor can there be a reasonable doubt of their final success, however long and severe may be the test of their determination to maintain their birthright of freedom and equality as a trust which it is their first duty to transmit unblemished to their posterity.

A bounteous Providence cheers us with the promise of abundant crops.

The fields of grain which will, within a few weeks, be ready for the sickle, give assurance of the amplest supply of food, whilst the corn, cotton, and other staple productions of our soil afford abundant proof that up to this period the season has been propitious.

We feel that our cause is just and holy.

We protest solemnly, in the face of mankind, that we desire peace at any sacrifice, save that of honor.

In independence we seek no conquest, no aggrandizement, no cession of any kind from the States with which we have lately confederated. All we ask is to be let alone—that those who never held power over us shall not now attempt our subjugation by arms. This we will, we must resist, to the direst extremity.

The moment that this pretension is abandoned, the sword will drop from our grasp, and we shall be ready to enter into treaties of amity and commerce that cannot but be mutually beneficial.

So long as this pretension is maintained, with a firm reliance on that Divine Power which covers with its protection the just cause, we will continue to struggle for our inherent right to freedom, independence, and self-government.

JEFFERSON DAVIS.

MONTGOMERY, April 29, 1861.

MESSAGE of President Davis at the Session of the Confederate Congress, held at Richmond, July 20, 1861.

Gentlemen of the Congress of the Confederate States of America:

My Message addressed to you at the commencement of the last session contained such full information of

the state of the Confederacy as to render it unnecessary that I should now do more than call your attention to such important facts as have occurred during the recess, and the matters connected with the public defence.

I have again to congratulate you on the accession of new members to our Confederation of free and equally sovereign States. Our loved and honored brethren of North Carolina and Tennessee have consummated the action foreseen and provided for at your last session, and I have had the gratification of announcing, by proclamation, in conformity with law, that these States were admitted into the Confederacy. The people of Virginia, also, by a majority previously unknown in our history, have ratified the action of her Convention uniting her fortunes with ours. The States of Arkansas, North Carolina, and Virginia have likewise adopted the permanent Constitution of the Confederate States, and no doubt is entertained of its adoption by Tennessee, at the election to be held early in next month.

I deemed it advisable to direct the removal of the several executive departments, with their archives, to this city, to which you have removed the seat of Government. Immediately after your adjournment, the aggressive movements of the enemy required prompt, energetic action. The accumulation of his forces on the Potomac sufficiently demonstrated that his efforts were to be directed against Virginia, and from no point could necessary measures for her defence and protection be so effectively decided, as from her own capital. The rapid progress of events, for the last few weeks, has fully sufficed to lift the veil, behind which the true policy and purposes of the Government of the United States had been previously concealed. Their odious features now stand fully revealed. The Message of their President, and the action of their Congress during the present month, confess their intention of the subjugation of these States, by a war, by which it is impossible to attain the proposed result, while its dire calamities, not to be avoided by us, will fall with double severity on themselves.

Commencing in March last, with the affectation of ignoring the secession of seven States, which first organized this Government; persevering in April in the idle and absurd assumption of the existence of a riot, which was to be dispersed by a *posse comitatus*; continuing in successive months the false representation that these States intended an offensive war, in spite of conclusive evidence to the contrary, furnished as well by official action as by the very basis on which this Government is constituted, the President of the United States and his advisers succeeded in deceiving the people of these States into the belief that the purpose of this Government was not peace at home, but conquest abroad; not defence of its own liberties, but subversion of those of the people of the United States. The series of manoeuvres by which this impression was created; the art with which they were devised, and the perfidy with which they were executed, were already known to you; but you could scarcely have supposed that they would be openly avowed, and their success made the subject of boast and self-laudation in an executive message. Fortunately for truth and history, however, the President of the United States details, with minuteness, the attempt to reinforce Fort Pickens, in violation of an armistice of which he confessed to have been informed, but only by rumors, too vague and uncertain to fix the attention of the hostile expedition despatched to supply Fort Sumter, admitted to have been undertaken with the knowledge that its success was impossible. The sending of a notice to the Governor of South Carolina of his intention to use force to accomplish his object, and then quoting from his inaugural address the assurance that "there could be no conflict unless these States were the aggressors," he proceeds to declare his conduct, as just related by himself, was the performance of a promise, so free from the power of ingenious sophistry as that the world should not be able to misunderstand it; and in defiance of his own statement that he gave notice of

the approach of a hostile fleet, he charges these States with becoming the assailants of the United States, without a gun in sight, or in expectancy, to return their fire, save only a few in the fort. He is, indeed, fully justified in saying that the case is so free from the power of ingenious sophistry that the world will not be able to misunderstand it. Under cover of this unfounded pretence, that the Confederate States are the assailants, that high functionary, after expressing his concern that some foreign nations had so shaped their action as if they supposed the early destruction of the national Union probable, abandons all further disguise, and proposes to make this contest a short and decisive one, by placing at the control of the Government for the work at least four hundred thousand men, and four hundred millions of dollars. The Congress, concurring in the doubt thus intimated as to the sufficiency of the force demanded, has increased it to half a million of men.

These enormous preparations in men and money, for the conduct of the war, on a scale more grand than any which the new world ever witnessed, is a distinct avowal, in the eyes of civilized man, that the United States are engaged in a conflict with a great and powerful nation. They are at last compelled to abandon the pretence of being engaged in dispersing rioters and suppressing insurrections, and are driven to the acknowledgment that the ancient Union has been dissolved. They recognize the separate existence of these Confederate States, by an interdictive embargo and blockade of all commerce between them and the United States, not only by sea, but by land; not only in ships, but in cars; not only with those who bear arms, but with the entire population of the Confederate States. Finally, they have repudiated the foolish conceit that the inhabitants of this Confederacy are still citizens of the United States; for they are waging an indiscriminate war upon them all, with savage ferocity, unknown in modern civilization.

In this war, rapine is the rule; private houses, in beautiful rural retreats, are bombarded and burnt; grain crops in the field are consumed by the torch, and, when the torch is not convenient, careful labor is bestowed to render complete the destruction of every article of use or ornament remaining in private dwellings after their inhabitants have fled from the outrages of brute soldiery. In 1781 Great Britain, when invading the revolted colonies, took possession of every district and county near Fortress Monroe, now occupied by the troops of the United States. The houses then inhabited by the people, after being respected and protected by avowed invaders, are now pillaged and destroyed by men who pretend that Virginians are their fellow-citizens. Mankind will shudder at the tales of the outrages committed on defenceless families by soldiers of the United States, now invading our homes; yet these outrages are prompted by inflamed passions and the madness of intoxication. But who shall depict the horror they entertain for the cool and deliberate malignancy which, under the pretext of suppressing insurrection, (said by themselves to be upheld by a minority only of our people,) makes special war on the sick, including children and women, by carefully-devised measures to prevent them from obtaining the medicines necessary for their cure. The sacred claims of humanity, respected even during the fury of actual battle, by careful diversion of attack from hospitals containing wounded enemies, are outraged in cold blood by a Government and people that pretend to desire a continuance of fraternal connections. All these outrages must remain unavenged by the universal reprehension of mankind. In all cases where the actual perpetrators of the wrongs escape capture, they admit of no retaliation. The humanity of our people would shrink instinctively from the bare idea of urging a like war upon the sick, the women, and the children of an enemy. But there are other savage practices which have been resorted to by the Government of the United States, which do admit of repression by retaliation, and I have been driven to the necessity of enforcing the repression. The prisoners of war taken by the

enemy on board the armed schooner *Savannah*, sailing under our commission, were, as I was credibly advised, treated like common felons, put in irons, confined in a jail usually appropriated to criminals of the worst dye, and threatened with punishment as such. I had made application for the exchange of these prisoners to the commanding officer of the enemy's squadron off Charleston, but that officer had already sent the prisoners to New York when application was made. I therefore deemed it my duty to renew the proposal for the exchange to the constitutional commander-in-chief of the army and navy of the United States, the only officer having control of the prisoners. To this end, I despatched an officer to him under a flag of truce, and, in making the proposal, I informed President Lincoln of my resolute purpose to check all barbarities on prisoners of war by such severity of retaliation on prisoners held by us as should secure the abandonment of the practice. This communication was received and read by an officer in command of the United States forces, and a message was brought from him by the bearer of my communication, that a reply would be returned by President Lincoln as soon as possible. I earnestly hope this promised reply (which has not yet been received) will convey the assurance that prisoners of war will be treated, in this unhappy contest, with that regard for humanity, which has made such conspicuous progress in the conduct of modern warfare. As measures of precaution, however, and until this promised reply is received, I still retain in close custody some officers captured from the enemy, whom it had been my pleasure previously to set at large on parole, and whose fate must necessarily depend on that of prisoners held by the enemy. I append a copy of my communication to the President and commander-in-chief of the army and navy of the United States, and of the report of the officer charged to deliver my communication. There are some other passages in the remarkable paper to which I have directed your attention, having reference to the peculiar relations which exist between this Government and the States usually termed Border Slave States, which cannot properly be withheld from notice. The hearts of our people are animated by sentiments towards the inhabitants of these States, which found expression in your enactment refusing to consider them enemies, or authorize hostilities against them. That a very large portion of the people of these States regard us as brethren; that, if unrestrained by the actual presence of large armies, subversion of civil authority, and declaration of martial law, some of them, at least, would joyfully unite with us; that they are, with almost entire unanimity, opposed to the prosecution of the war waged against us, are facts of which daily-recurring events fully warrant the assertion that the President of the United States refuses to recognize in these, our late sister States, the right of refraining from attack upon us, and justifies his refusal by the assertion that the States have no other power than that reserved to them in the Union by the Constitution. Now, one of them having ever been a State of the Union, this view of the constitutional relations between the States and the General Government is a fitting introduction to another assertion of the Message, that the Executive possesses power of suspending the writ of habeas corpus, and of delegating that power to military commanders at their discretion. And both these propositions claim a respect equal to that which is felt for the additional statement of opinion in the same paper, that it is proper, in order to execute the laws, that some single law, made in such extreme tenderness of citizens' liberty that practically it relieves more of the guilty than the innocent, should to a very limited extent be violated. We may well rejoice that we have forever severed our connection with a Government that thus trampled on all principles of constitutional liberty, and with a people in whose presence such avowals could be hazarded. The operations in the field will be greatly extended by reason of the policy which heretofore has been secretly entertained, and is

now avowed and acted on by us. The forces hitherto raised provide amply for the defence of seven States which originally organized in the Confederacy, as is evidently the fact, since, with the exception of three fortified islands, whose defence is efficiently aided by a preponderating naval force, the enemy has been driven completely out of these stations; and now, at the expiration of five months from the formation of the Government, not a single hostile foot presses their soil. These forces, however, must necessarily prove inadequate to repel invasion by the half million of men now proposed by the enemy, and a corresponding increase of our forces will become necessary. The recommendations for the raising of this additional force will be contained in the communication of the Secretary of War, to which I need scarcely invite your earnest attention.

In my Message delivered in April last, I referred to the promise of the abundant crops with which we were cheered. The grain crops, generally, have since been harvested, and the yield has proven to be the most abundant ever known in our history. Many believe the supply adequate to two years' consumption of our population. Cotton, sugar, tobacco, forming a surplus of the production of our agriculture, and furnishing the basis of our commercial interchange, present the most cheering promises ever known. Providence has smiled on the labor which extracts the teeming wealth of our soil in all parts of our Confederacy.

It is the more gratifying to be able to give you this, because, in need of large and increased expenditure in support of our army, elevated and purified by a sacred cause, they maintain that our fellow-citizens, of every condition of life, exhibit most self-sacrificing devotion. They manifest a laudable pride of upholding their independence, unaided by any resources other than their own, and the immense wealth which a fertilized and genial climate has accumulated in this Confederacy of agriculturists, could not be more strongly displayed than in the large revenues which, with eagerness, they have contributed at the call of their country. In the single article of cotton, the subscriptions to the loan proposed by the Government cannot fall short of fifty millions of dollars, and will probably exceed that sum; and scarcely an article required for the consumption of our army is provided otherwise than by subscription to the produce loan, so happily devised by your wisdom. The Secretary of the Treasury, in his report submitted to you, will give you the amplest details connected with that branch of the public service; but it is not alone in their prompt pecuniary contributions that the noble race of freemen who inhabit these States evidence how worthy they are of those liberties which they so well know how to defend. In numbers far exceeding those authorized by your laws, they have pressed the tender of their services against the enemy. Their attitude of calm and sublime devotion to their country, the cool and confident courage with which they are already preparing to meet the invasion, in whatever proportions it may assume; the assurance that their sacrifices and their services will be renewed from year to year with unflinching purpose, until they have made good to the uttermost their rights to self-government; the generous and almost unequivocal confidence which they display in their Government during the pending struggle, all combine to present a spectacle, such as the world has rarely, if ever, seen. To speak of subjugating such a people, so united and determined, is to speak in a language incomprehensible to them; to resist attack on their rights or their liberties is with them an instinct. Whether this war shall last one, or three, or five years, is a problem they leave to be solved by the enemy alone. It will last till the enemy shall have withdrawn from their borders; till their political rights, their altars, and their homes are freed from invasion. Then, and then only, will they rest from this struggle, to enjoy in peace the blessings which, with the favor of Providence, they have secured by the aid of their own strong hearts and steady arms.

JEFFERSON DAVIS.

Message of President Davis at the Session of the Confederate Congress, held at Richmond, November 18, 1861.

To the Congress of the Confederate States:

The few weeks which have elapsed since your adjournment have brought us so near the close of the year that we are now able to sum up its general results. The retrospect is such as should fill the hearts of our people with gratitude to Providence for His kind interposition in their behalf. Abundant yields have rewarded the labor of the agriculturist, whilst the manufacturing interest of the Confederate States was never so prosperous as now. The necessities of the times have called into existence new branches of manufactures, and given a fresh impulse to the activity of those heretofore in operation. The means of the Confederate States for manufacturing the necessities and comforts of life within themselves increase as the conflict continues, and we are gradually becoming independent of the rest of the world for the supply of such military stores and munitions as are indispensable for war.

The operations of the army, soon to be partially interrupted by the approaching winter, have afforded a protection to the country, and shed a lustre upon its arms, through the trying vicissitudes of more than one arduous campaign, which entitle our brave volunteers to our praise and our gratitude.

From its commencement up to the present period the war has been enlarging its proportions and expanding its boundaries so as to include new fields. The conflict now extends from the shores of the Chesapeake to the confines of Missouri and Arizona; yet sudden calls from the remotest points for military aid have been met with promptness enough not only to avert disaster in the face of superior numbers, but also to roll back the tide of invasion from the border.

When the war commenced the enemy were possessed of certain strategic points and strong places within the Confederate States. They greatly exceeded us in numbers, in available resources, and in the supplies necessary for war. Military establishments had been long organized, and were complete; the navy, and, for the most part, the army, once common to both, were in their possession. To meet all this we had to create not only an army in the face of war itself, but also military establishments necessary to equip and place it in the field. It ought, indeed, to be a subject of gratulation that the spirit of the volunteers and the patriotism of the people have enabled us, under Providence, to grapple successfully with these difficulties.

A succession of glorious victories at Bethel, Bull Run, Manassas, Springfield, Lexington, Leesburg, and Belmont, has checked the wicked invasion which greed of gain and the unhallowed lust of power brought upon our soil, and has proved that numbers cease to avail when directed against a people fighting for the sacred right of self-government and the privileges of freemen. After seven months of war the enemy have not only failed to extend their occupancy of our soil, but new States and Territories have been added to our Confederacy, while, instead of their threatened march of unchecked conquest, they have been driven, at more than one point, to assume the defensive; and, upon a fair comparison between the two belligerents as to men, military means, and financial condition, the Confederate States are relatively much stronger now than when the struggle commenced.

Since your adjournment the people of Missouri have conducted the war, in the face of almost unparalleled difficulties, with a spirit and success alike worthy of themselves and of the great cause in which they are struggling. Since that time Kentucky, too, has become the theatre of active hostilities. The Federal forces have not only refused to acknowledge her right to be neutral, and have insisted upon making her a party to the war, but have invaded her for the purpose of attacking the Confederate States. Outrages of the most despotic character have been perpetrated upon her people; some of her most eminent citizens have been seized and borne away to languish in foreign

prisons without knowing who were their accusers, or the specific charges made against them; while others have been forced to abandon their homes, their families, and property, and seek a refuge in distant lands.

Finding that the Confederate States were about to be invaded through Kentucky, and that her people, after being deceived into a mistaken security, were unarmed, and in danger of being subjugated by the Federal forces, our armies were marched into that State to repel the enemy, and prevent their occupation of certain strategic points, which would have given them great advantages in the contest—a step which was justified not only by the necessities of self-defence on the part of the Confederate States, but also by a desire to aid the people of Kentucky. It was never intended by the Confederate Government to conquer or coerce the people of that State; but, on the contrary, it was declared by our Generals that they would withdraw their troops if the Federal Government would do likewise. Proclamation was also made of the desire to respect the neutrality of Kentucky, and the intention to abide by the wishes of her people as soon as they were free to express their opinions.

These declarations were approved by me, and I should regard it as one of the best effects of the march of our troops into Kentucky if it should end in giving to her people liberty of choice, and a free opportunity to decide their own destiny according to their own will.

The army has been chiefly instrumental in prosecuting the great contest in which we are engaged; but the navy has also been effective in full proportion to its means. The naval officers, deprived to a great extent of an opportunity to make their professional skill available at sea, have served with commendable zeal and gallantry on shore and upon inland waters, further detail of which will be found in the reports of the Navy and of War.

In the transportation of the mails many difficulties have arisen, which will be found fully developed in the report of the Postmaster-General. The absorption of the ordinary means of transportation for the movement of troops and military supplies, the insufficiency of the rolling stock of railroads for the accumulation of business, resulting both from military operations and the obstruction of water communication by the presence of the enemy's fleet; the failure and even refusal of contractors to comply with the terms of their agreements; the difficulties inherent in inaugurating so vast and complicated a system as that which requires postal facilities for every town and village in a territory so extended as ours, have all combined to impede the best directed efforts of the Postmaster-General, whose zeal, industry, and ability have been taxed to the utmost extent. Some of these difficulties can only be overcome by time and an improved condition of the country upon the restoration of peace; but others may be remedied by legislation, and your attention is invited to the recommendations contained in the report of the head of that Department.

The condition of the Treasury will doubtless be a subject of anxious inquiry on your part. I am happy to say that the financial system already adopted has worked well so far, and promises good results for the future. To the extent that Treasury notes may be issued, the Government is enabled to borrow money without interest, and thus facilitate the conduct of the war. This extent is measured by the portion of the field of circulation which these notes can be made to occupy. The proportion of the field thus occupied depends again upon the amount of the debts for which they are receivable; and dues, not only to the Confederate and State Governments, but also to corporations and individuals, are payable in this medium; a large amount of it may be circulated at par.

There is every reason to believe that the Confederate Treasury note is fast becoming such a medium. The provision that these notes shall be convertible into Confederate stock, bearing eight per cent. interest, at the pleasure of the holder, ensures them against a depreciation below the value of that stock, and no con-

siderable fall in that value need be feared so long as the interest shall be punctually paid. The punctual payment of this interest has been secured by the act passed by you at the last session, imposing such a rate of taxation as must provide sufficient means for that purpose.

For the successful prosecution of this war, it is indispensable that the means of transporting troops and military supplies be furnished, as far as possible, in such manner as not to interrupt the commercial intercourse between our people, nor place a check on their productive energies. To this end the means of transportation from one section of country to the other must be carefully guarded and improved. And this should be the object of anxious care on the part of State and Confederate Governments, so far as they may have power over the subject.

We have already two main systems of through transportation from the North to the South—one from Richmond, along the seaboard; the other through Western Virginia to New Orleans. A third might be secured by completing a link of about forty miles between Danville, in Virginia, and Greensborough, in North Carolina. The construction of this comparatively short line would give us a through route from North to South in the interior of the Confederate States, and give us access to a population and to military resources from which we are now, in a great measure, debarred. We should increase greatly the safety and capacity of our means for transporting men and military supplies.

If the construction of the road should, in the judgment of Congress, as it is in mine, be indispensable for the most successful prosecution of the war, the action of the Government will not be restrained by the constitutional objection which would attach to a work for commercial purposes; and attention is invited to the practicability of securing its early completion by giving the needful aid to the company organized for its construction and administration.

If we husband our means and make a judicious use of our resources, it would be difficult to fix a limit to the period during which we could conduct a war against the adversary whom we now encounter. The very efforts which he makes to isolate and invade us must exhaust his means, whilst they serve to complete the circle and diversify the productions of our industrial system. The reconstruction which he seeks to effect by arms becomes daily more and more palpably impossible. Not only do the causes which induced us to separate still exist in full force, but they have been strengthened, and whatever doubt may have lingered in the minds of any must have been completely dispelled by subsequent events.

If, instead of being a dissolution of a league, it were indeed a rebellion in which we are engaged, we might find ample vindication for the course we have adopted in the scenes which are now being enacted in the United States. Our people now look with contemptuous astonishment on those with whom they have been so recently associated. They shrink with aversion from the bare idea of renewing such a connection.

When they see a President making war without the assent of Congress; when they behold judges threatened because they maintain the writ of habeas corpus, so sacred to freemen; when they see justice and law trampled under the armed heel of military authority, and upright men and innocent women dragged to distant dungeons upon the mere edict of a despot; when they find all this tolerated and applauded by a people who had been in the full enjoyment of freedom but a few months ago, they believe that there must be some radical incompatibility between such a people and themselves. With such a people we may be content to live at peace, but the separation is final, and for the independence we have asserted, we will accept no alternative.

The nature of the hostilities which they have waged against us must be characterized as barbarous whenever it is understood. They have bombarded undefended villages without giving notice to women and children to enable them to escape, and in one instance

selected the night as the period when they might surprise them most effectually whilst asleep and unsuspecting of danger. Arson and rapine, the destruction of private houses and property, and injuries of the most wanton character, even upon non-combatants, have marked their forays along their borders and upon our territory. Although we ought to have been admonished by these things that they were disposed to make war upon us in the most cruel and relentless spirit, yet we were not prepared to see them fit out a large naval expedition with the confessed purpose not only to pillage, but to incite a servile war in our midst.

If they convert their soldiers into incendiaries and robbers, and involve us in a species of war which claims non-combatants, women, and children as its victims, they must expect to be treated as outlaws and enemies of mankind. There are certain rights of humanity which are entitled to respect even in war, and he who refuses to regard them forfeits his claims, if captured, to be considered as a prisoner of war, but must expect to be dealt with as an offender against all law, human and divine.

But not content with violating our rights under the law of nations at home, they have extended these injuries to us within other jurisdictions. The distinguished gentlemen whom, with your approval, at the last session, I commissioned to represent the Confederacy at certain foreign Courts, have been recently seized by the captain of a United States ship-of-war, on board a British steamer, on their voyage from the neutral Spanish port of Havana to England. The United States have thus claimed a general jurisdiction over the high seas, and, entering a British ship sailing under its country's flag, violated the rights of embassy, for the most part held sacred even amongst barbarians, by seizing our Ministers whilst under the protection and within the dominions of a neutral nation.

These gentlemen were as much under the jurisdiction of the British Government upon that ship, and beneath its flag, as if they had been upon its soil; and a claim on the part of the United States to seize them in the streets of London would have been as well-founded as that to apprehend them where they were taken. Had they been malefactors, and citizens even of the United States, they could not have been arrested on a British ship or on British soil, unless under the express provisions of a treaty, and according to the forms therein provided for the extradition of criminals.

But rights the most sacred seem to have lost all respect in their eyes. When Mr. Faulkner, a former Minister of the United States to France, commissioned before the secession of Virginia, his native State, returned in good faith to Washington to settle his accounts and fulfil all the obligations into which he had entered, he was perfidiously arrested and imprisoned in New York, where he now is. The unsuspecting confidence with which he reported to his Government was abused, and his desire to fulfil his trust to them was used to his injury.

In conducting this war, we have sought no aid and proposed no alliances, offensive and defensive, abroad. We have asked for a recognized place in the great family of nations, but in doing so we have demanded nothing for which we did not offer a fair equivalent. The advantages of intercourse are mutual amongst nations, and in seeking to establish diplomatic relations, we were only endeavoring to place that intercourse under the regulation of public law. Perhaps we had the right, if we had chosen to exercise it, to ask to know whether the principle that "blockades, to be binding, must be effectual," so solemnly announced by the great Powers of Europe at Paris, is to be generally enforced or applied only to particular parties.

When the Confederate States, at your last session, became a party to the declaration reaffirming this principle of international law, which has been recognized so long by publicists and Governments, we certainly supposed that it was to be universally enforced.

The customary laws of nations are made up of their practice rather than their declarations; and if such declarations are only to be enforced in particular instances, at the pleasure of those who make them, then the commerce of the world, so far from being placed under the regulation of a general law, will become subject to the caprice of those who execute or suspend it at will. If such is to be the course of nations in regard to this law, it is plain that it will thus become a rule for the weak and not for the strong.

Feeling that such views must be taken by the neutral nations of the earth, I have caused the evidence to be collected which proves completely the utter inefficiency of the proclaimed blockade of our coast, and shall direct it to be laid before such Governments as shall afford us the means of being heard. But, although we should be benefited by the enforcement of this law so solemnly declared by the great Powers of Europe, we are not dependent on that enforcement for the successful prosecution of the war. As long as hostilities continue, the Confederate States will exhibit a steadily increasing capacity to furnish their troops with food, clothing, and arms.

If they should be forced to forego many of the luxuries and some of the comforts of life, they will at least have the consolation of knowing that they are thus daily becoming more and more independent of the rest of the world. If, in this process, labor in the Confederate States should be gradually diverted from those great Southern staples which have given life to so much of the commerce of mankind into other channels, so as to make them rival producers instead of profitable customers, they will not be the only or even chief losers by this change in the direction of their industry.

Although it is true that the cotton supply from the Southern States could only be totally cut off by the subversion of our social system, yet it is plain that a long continuance of this blockade might, by a diversion of labor and investment of capital in other employments, so diminish the supply as to bring ruin upon all those interests of foreign countries which are dependent on that staple. For every laborer who is diverted from the culture of cotton in the South, perhaps four times as many elsewhere, who have found subsistence in the various employments growing out of its use, will be forced also to change their occupation.

While the war which is waged to take from us the right of self-government can never attain that end, it remains to be seen how far it may work a revolution in the industrial system of the world, which may carry suffering to other lands as well as to our own. In the mean time we shall continue this struggle in humble dependence upon Providence, from whose searching scrutiny we cannot conceal the secrets of our hearts, and to whose rule we confidently submit our destinies. For the rest we shall depend upon ourselves. Liberty is always won where there exists the unconquerable will to be free, and we have reason to know the strength that is given by a conscious sense not only of the magnitude but of the righteousness of our cause.

JEFFERSON DAVIS.

RICHMOND, November 18, 1861.

A PROCLAMATION OF NEUTRALITY.

VICTORIA R.

Whereas, We are happily at peace with all Sovereigns, Powers, and States;

And whereas hostilities have unhappily commenced between the Government of the United States of America and certain States styling themselves "the Confederate States of America:"

And whereas we, being at peace with the Government of the United States, have declared our Royal determination to maintain a strict and impartial neutrality in the contest between the said contending parties;

"We, therefore, have thought fit, by and with the

advice of our Privy Council, to issue this our Royal Proclamation:

And we do hereby strictly charge and command all our loving subjects to observe a strict neutrality in and during the aforesaid hostilities, and to abstain from violating or contravening either the laws and statutes of the realm in this behalf, or the law of nations in relation thereto, as they will answer to the contrary at their peril.

And *whereas*, in and by a certain statute made and passed in the fifty-ninth year of His Majesty King George III., entitled "an act to prevent the enlisting or engagement of His Majesty's subjects to serve in a foreign service, and the fitting out or equipping, in His Majesty's dominions, vessels for warlike purposes, without His Majesty's license," it is, among other things, declared and enacted as follows:

"That if any natural born subject of His Majesty, his heirs and successors, without the leave or license of His Majesty, his heirs or successors, for that purpose first had and obtained, under the sign manual of His Majesty, his heirs or successors, or signified by Order in Council, or by proclamation of His Majesty, his heirs or successors, shall take or accept, or shall agree to take or accept, any military commission, or shall otherwise enter into the military service as a commissioned or non-commissioned officer, or shall enlist or enter himself to enlist, or shall agree to enlist or to enter himself to serve as a soldier, or to be employed, or shall serve in any warlike or military operation in the service of, or for, or under, or in aid of any foreign Prince, State, Potentate, Colony, Province, or part of any Province or people, or of any person or persons, exercising or assuming to exercise the powers of government in or over any foreign country, colony, province, or part of any province or people, either as an officer or soldier, or in any other military capacity; or if any natural born subject of His Majesty shall, without such leave or license as aforesaid, accept, or agree to take or accept, any commission, warrant or appointment, as an officer, or shall enlist or enter himself, or shall agree to enlist or enter himself, to serve as a sailor or marine, or to be employed or engaged, or shall serve in and on board any ship or vessel of war, or in and on board any ship or vessel used or fitted out, or equipped, or intended to be used for any warlike purpose, in the service of, or for, or under, or in aid of any foreign power, prince, State, potentate, colony, province, or part of any province or people, or of any person or persons exercising or assuming to exercise the powers of government in or over any foreign country, colony, province, or part of any province or people; or, if any natural born subject of His Majesty shall, without such leave and license as aforesaid, engage, contract, or agree to go, or shall go, to any foreign State, country, colony, province, or part of any province, or to any place beyond the seas, with an intent or in order to enlist or enter himself to serve, or with intent to serve, in any warlike or military operation whatever, whether by land or by sea, in the service of, or for, or under, or in aid of any foreign prince, State, potentate, colony, province, or part of any province or people, or in the service of, or for, or under, or in aid of any person or persons exercising or assuming to exercise the powers of government in or over any foreign country, colony, province, or part of any province, or people, either as an officer or a soldier, or in any other military capacity, or an officer or sailor, or marine in any such ship or vessel as aforesaid, although no enlisting money, or pay, or reward shall have been or shall be in any or either of the cases aforesaid actually paid to or received by him, or by any person to or for his use or benefit; or if any person whatever, within the United Kingdom of Great Britain and Ireland, or any part of His Majesty's dominions elsewhere, or in any country, colony, settlement, island or place belonging to or subject to His Majesty, shall hire, retain, engage, or procure, or shall attempt or endeavor to hire, retain, engage, or procure any person or persons whatever to enlist, or enter, or engage to enlist, or to serve or to be employed in any such service or employment

as aforesaid, as an officer, soldier, sailor or marine, either in land or sea service, for or under or in aid of any foreign prince, State, potentate, colony, province, or part of any province or people, or for, or under, or in aid of any person or persons exercising or assuming to exercise any powers of government as aforesaid, or to go or to agree to go or embark from any part of His Majesty's dominions, for the purpose or with intent to be enlisted, entered, engaged or employed as aforesaid, whether any enlisting money, pay, or reward shall have been or shall be actually given or received, or not; in any or either of such cases every person so offending shall be deemed guilty of a misdemeanor, and upon being convicted thereof, upon any information or indictment, shall be punishable by fine and imprisonment, or either of them, at the discretion of the Court before which such offender shall be convicted."

And it is in and by the said act further enacted:

"That if any person, within any part of the United Kingdom or in any part of His Majesty's dominions beyond the seas, shall without the leave and license of His Majesty, for that purpose first had and obtained as aforesaid, equip, furnish, fit out, or arm, or attempt or endeavor to equip, furnish, fit out, or arm, or procure to be equipped, furnished, fitted out, or armed, or shall knowingly aid, assist, or be concerned in the equipping, furnishing, fitting out, or arming of any ship or vessel, with intent or in order that such ship or vessel shall be employed in the service of any foreign prince, State, or potentate, or of any foreign colony, province, or part of any province or people, or of any person or persons exercising or assuming to exercise any powers of government in or over any foreign State, colony, province, or part of any province or people, as a transport or store ship, or with intent to cruise or commit hostilities against any prince, State, or potentate, or against the subjects or citizens of any prince, State, or potentate, or against the persons exercising or assuming to exercise the powers of government in any colony, province, or part of any province or country, or against the inhabitants of any foreign colony, province, or part of any province or country, with whom His Majesty shall not then be at war; or shall, within the United Kingdom, or any of His Majesty's dominions, or in any settlement, colony, territory, island, or place belonging or subject to His Majesty, issue or deliver any commission for any ship or vessel to the intent that such ship or vessel shall be employed as aforesaid, every such person so offending shall be deemed guilty of a misdemeanor, and shall upon conviction thereof, upon any information or indictment, be punished by fine and imprisonment, or either of them, at the discretion of the Court in which such offender shall be convicted; and every such ship or vessel, with the tackle, apparel, and furniture, together with all the materials, arms, ammunition and stores which may belong to or be on board of any such ship or vessel, shall be forfeited; and it shall be lawful for any officer of His Majesty's Customs or Excise, or any officer of His Majesty's navy, who is by law empowered to make seizures, for any forfeiture incurred under any of the laws of Customs or Excise, or the laws of trade and navigation, to seize such ships and vessels aforesaid, and in such places and in such manner in which the officers of His Majesty's Customs or Excise and the officers of His Majesty's navy are empowered respectively to make seizures under the laws of Customs and Excise, or under the laws of trade and navigation; and that every ship and vessel, with the tackle, apparel, and furniture, together with all the materials, arms, ammunition, and stores which may belong to or be on board of such ship or vessel, may be prosecuted and condemned in the like manner, and in such courts as ships or vessels may be prosecuted and condemned for any breach of the laws made for the protection of the revenues of Customs and Excise, or of the laws of trade and navigation."

And it is in and by the said act further enacted:

"That if any person in any part of the United Kingdom of Great Britain and Ireland, or in any part of His Majesty's dominions beyond the seas, without

leave and license of His Majesty, for that purpose first had and obtained as aforesaid, shall, by adding to the number of the guns of such vessel, or by changing those on board for other guns, or by the addition of any equipment for war, increase or augment, or procure to be increased or augmented, or shall be knowingly concerned in increasing or augmenting the warlike force of any ship or vessel of war or cruiser, or other armed vessel, which at the time of her arrival in any part of the United Kingdom, or any of His Majesty's dominions, was a ship of war, cruiser, or armed vessel in the service of any foreign prince, State, or potentate, or of any person or persons exercising or assuming to exercise any powers of government in or over any colony, province, or part of any province or people belonging to the subjects of any such prince, State, or potentate, or to the inhabitants of any colony, province, or part of any province or country under the control of any person or persons so exercising or assuming to exercise the powers of government, every such person so offending shall be deemed guilty of a misdemeanor, and shall, upon being convicted thereof, upon any information or indictment, be punished by fine and imprisonment, or either of them, at the discretion of the Court before which such offender shall be convicted."

Now, in order that none of our subjects may unwarily render themselves liable to the penalties imposed by the said statute, we do hereby strictly command, that no person or persons whatsoever do commit any act, matter or thing whatsoever, contrary to the provisions of the said statute, upon pain of the several penalties by the said statute imposed, and of our high displeasure.

And we do hereby further warn all our loving subjects, and all persons whatsoever entitled to our protection, that if any of them shall presume, in contempt of this Royal Proclamation, and of our high displeasure, to do any acts in derogation of their duty as subjects of a neutral sovereign, in the said contest, or in violation or contravention of the law of nations in that behalf—as, for example and more especially, by entering into the military service of either of the said contending parties as commissioned or non-commissioned officers or soldiers; or by serving as officers, sailors, or marines on board any ship or vessel of war or transport or in the service of either of the said contending parties; or by serving as officers, sailors, or marines on board any privateer bearing letters of marque of or from either of the said contending parties; or by engaging to go or going to any place beyond the seas with intent to enlist or engage in any such service, or by procuring or attempting to procure, within Her Majesty's dominions, at home or abroad, others to do so; or by fitting out, arming, or equipping, any ship or vessel to be employed as a ship-of-war, or privateer, or transport, by either of the said contending parties; or by breaking, or endeavoring to break, any blockade lawfully and actually established by or on behalf of either of the said contending parties; or by carrying officers, soldiers, despatches, arms, military stores or materials, or any article or articles considered and deemed to be contraband of war according to the law of modern usage of nations, for the use or service of either of the said contending parties, all persons so offending will incur and be liable to the several penalties and penal consequences by the said statute, or by the law of nations, in that behalf imposed or denounced.

And we do hereby declare that all our subjects and persons entitled to our protection who may misconduct themselves in the premises will do so at their peril and of their own wrong, and that they will in no wise obtain any protection from us against any liability or penal consequences, but will, on the contrary, incur our high displeasure by such misconduct.

Given at our Court at the White Lodge, Richmond Park, this 13th day of May, in the year of our Lord 1861, and in the 24th year of our reign.

GOD save the QUEEN.

DECREE OF THE QUEEN OF SPAIN.

Taking into consideration the relations which exist between Spain and the United States of America, and the desirability that the reciprocal sentiments of good intelligence should not be changed by reason of the grave events which have taken place in that republic, I have resolved to maintain the most strict neutrality in the contest begun between the Federal States of the Union and the States confederated at the South; and in order to avoid the damage which might come to my subjects and to navigation, and to commerce, from the want of clear provisions to which to adjust their conduct in consonance with my council of ministers, I do decree the following:

ART. 1. It is forbidden in all the ports of the monarchy to arm, provide, or equip any privateer vessel, whatever may be the flag she displays.

ART. 2. It is forbidden in like manner to the owners, masters, or captains of merchant vessels to accept letters of marque, or contribute in any way whatsoever to the armament or equipment of vessels of war or privateers.

ART. 3. It is forbidden to vessels of war or privateers with their prizes, to enter or to remain for more than twenty-four hours in the ports of the monarchy, except in case of stress of weather. Whenever this last shall occur, the authorities will keep watch over the vessel and oblige her to get out to sea the soonest possible without permitting her to take in any stores except the purely necessary for the moment, but in no case arms nor supplies for war.

ART. 4. Articles proceeding from prizes shall not be sold in the ports of the monarchy.

ART. 5. The transportation under the Spanish flag of all articles of commerce is guaranteed, except when they are directed to blockaded ports. The transportation of effects of war is forbidden, as well as the carrying of papers or communications for belligerents. Transgressors shall be responsible for their acts, and shall have no right to the protection of my Government.

ART. 6. It is forbidden to all Spaniards to enlist in the belligerent armies, or take service on board of vessels of war or privateers.

ART. 7. My subjects will abstain from every act which, in violation of the laws of the kingdom, can be considered as contrary to neutrality.

ART. 8. Those who violate the foregoing provisions shall have no right to the protection of my Government; shall suffer the consequences of the measures which the belligerents may dictate, and shall be punished according to the laws of Spain.

Palace, on the seventeenth of June, one thousand eight hundred and sixty-one.

SIGNED WITH THE ROYAL HAND.

The Minister of State,

SATURNINO CARDERON COLLANTES.

DECREE OF THE KING OF PORTUGAL.

MINISTRY OF FOREIGN AFFAIRS, }
PALACE OF NECESSIDADES, July 29, 1861. }

It being proper, in view of the circumstances at present existing in regard to the United States of America, to carry into effect the principles established in the declaration of Paris of April 16, 1856, made by the representatives of the powers that signed the treaty of peace of the 30th of March of that year, to which declaration my Government acceded, and likewise, for the same reason, to adopt other measures which I deem opportune, I have been pleased, after hearing the Council of State, to decree as follows:

ARTICLE 1. In all the ports and waters of this kingdom, as well on the continent and in the adjacent islands as in the ultramarine provinces, Portuguese subjects and foreigners are prohibited from fitting out vessels destined for privateering.

ART. 2. In the same ports and waters referred to in the preceding article is, in like manner, prohibited the entrance of privateers and of the prizes made by privateers, or by armed vessels.

§ The cases of overruling necessity, (*força maior*), in which, according to the law of nations, hospitality is indispensable, are excepted from this regulation, without permission, however, being allowed, in any manner, for the sale of any objects proceeding from prizes.

The Ministers and Secretaries of State in all the departments will thus understand, and cause it to be executed.
KING.

MARQUEZ DE LOULÉ.

ALBERTO ANTONIO DE MORAES CARVALHO.

CARLOS BENTO DA SILVA.

THIAGO AUGUSTO VELLOSO DE HORTA.

ANTONIO JOSÉ D'ÁVILA.

VIEWS OF THE EMPEROR OF RUSSIA.

ST. PETERSBURG, July 10, 1861.

SIR: From the beginning of the conflict which divides the United States of America, you have been desired to make known to the Federal Government the deep interest with which our august master was observing the development of a crisis which puts in question the prosperity and even the existence of the Union.

The Emperor profoundly regrets to see that the hope of a peaceful solution is not realized, and that American citizens, already in arms against each other, are ready to let loose upon their country the most formidable of the scourges of political society—a civil war.

For the more than eighty years that it has existed, the American Union owes its independence, its towering rise, and its progress, to the concord of its members, consecrated, under the auspices of its illustrious founder, by institutions which have been able to reconcile union with liberty. This union has been fruitful. It has exhibited to the world the spectacle of a prosperity without example in the annals of history.

It would be deplorable that, after so conclusive an experience, the United States should be hurried into a breach of the solemn compact which, up to this time, has made their power.

In spite of the diversity of their constitutions and of their interests, and perhaps, even, because of this diversity, Providence seems to urge them to draw closer the traditional bond which is the basis and the very condition of their political existence. In any event, the sacrifices which they might impose upon themselves to maintain it are beyond comparison with those which dissolution would bring after it. United, they perfect themselves; isolated, they are paralyzed.

The struggle which unhappily has just arisen, can neither be indefinitely prolonged nor lead to the total destruction of one of the parties. Sooner or later it will be necessary to come to some settlement, whatever it may be, which may cause the divergent interests now actually in conflict to coexist.

The American nation would then give a proof of high political wisdom in seeking in common such a settlement before a useless effusion of blood, a barren squandering of strength and of public riches, and acts of violence and reciprocal reprisals shall have come to deepen an abyss between the two parties to the confederation, to end definitively in their mutual exhaustion, and in the ruin, perhaps irreparable, of their commercial and political power.

Our august master cannot resign himself to admit such deplorable anticipations. His Imperial Majesty still places his confidence in that practical good sense of the citizens of the Union who appreciate so judiciously their true interests. His Majesty is happy to believe that the members of the Federal Government, and the influential men of the two parties, will seize all occasions, and will unite all their efforts to calm the effervescence of the passions. There are no interests so divergent that it may not be possible to reconcile them by laboring to that end with zeal and perseverance in a spirit of justice and moderation.

If, within the limits of your friendly relations, your language and your councils may contribute to this

result, you will respond, sir, to the intentions of his Majesty, the Emperor, in devoting to this the personal influence which you may have been able to acquire during your long residence at Washington, and the consideration which belongs to your character as the representative of a sovereign animated by the most friendly sentiments towards the American Union. This Union is not simply, in our eyes, an element essential to the universal political equilibrium. It constitutes, besides, a nation to which our august master and all Russia have pledged the most friendly interest; for the two countries, placed at the extremities of the two worlds, both in the ascending period of their development, appear called to a natural community of interests and of sympathies, of which they have already given mutual proofs to each other.

I do not wish here to approach any of the questions which divide the United States. We are not called upon to express ourselves in this contest. The preceding considerations have no other object than to attest the lively solicitude of the Emperor in presence of the dangers which menace the American Union, and the sincere wishes which his Majesty entertains for the maintenance of that great work, so laboriously raised, which appeared so rich in its future.

It is in this sense, sir, that I desire you to express yourself, as well to the members of the General Government as to influential persons whom you may meet, giving them the assurance that in every event the American nation may count upon the most cordial sympathy on the part of our august master during the important crisis which it is passing through at present.

Receive, sir, the expression of my very distinguished consideration.

GORTCHAKOFF.

MR. DE STOECKL, &c., &c., &c.

THE CONSTITUTION OF THE CONFEDERATE STATES OF AMERICA.

WE, the people of the Confederate States, each State acting in its sovereign and independent character, in order to form a permanent federal government, establish justice, insure domestic tranquillity, and secure the blessings of liberty to ourselves and our posterity—involving the favor and guidance of Almighty God—do ordain and establish this Constitution for the Confederate States of America.

ARTICLE I. SEC. 1.—All legislative powers herein delegated shall be vested in a Congress of the Confederate States, which shall consist of a Senate and House of Representatives.

SEC. 2.—The House of Representatives shall be chosen every second year by the people of the several States; and the electors in each State shall be citizens of the Confederate States, and have the qualifications requisite for electors of the most numerous branch of the State Legislature; but no person of foreign birth, not a citizen of the Confederate States, shall be allowed to vote for any officer, civil or political, State or Federal.

2. No person shall be a Representative who shall not have attained the age of twenty-five years, and be a citizen of the Confederate States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Confederacy, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all slaves. The actual enumeration shall be made within three years after the first meeting of the Congress of the Confederate States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every fifty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of South Carolina shall be entitled to choose six; the State of Georgia, ten; the

State of Alabama, nine; the State of Florida, two; the State of Mississippi, seven; the State of Louisiana, six; and the State of Texas, six.

4. When vacancies happen in the representation of any State, the Executive authority thereof shall issue writs of election to fill such vacancies.

5. The House of Representatives shall choose their Speaker and other officers; and shall have the sole power of impeachment; except that any judicial or other federal officer resident and acting solely within the limits of any State, may be impeached by a vote of two-thirds of both branches of the Legislature thereof.

SEC. 3.—The Senate of the Confederate States shall be composed of two Senators from each State, chosen for six years by the Legislature thereof, at the regular session next immediately preceding the commencement of the term of service; and each Senator shall have one vote.

2. Immediately after they shall be assembled, in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year; of the second class at the expiration of the fourth year; and of the third class at the expiration of the sixth year; so that one-third may be chosen every second year; and if vacancies happen by resignation or otherwise during the recess of the Legislature of any State, the Executive thereof may make temporary appointments until the next meeting of the Legislature, which shall then fill such vacancies.

3. No person shall be a Senator, who shall have not attained the age of thirty years, and be a citizen of the Confederate States; and who shall not, when elected, be an inhabitant of the State for which he shall be chosen.

4. The Vice-President of the Confederate States shall be President of the Senate, but shall have no vote, unless they be equally divided.

5. The Senate shall choose their other officers, and also a President *pro tempore*, in the absence of the Vice-President, or when he shall exercise the office of President of the Confederate States.

6. The Senate shall have sole power to try all impeachments. When sitting for that purpose they shall be on oath or affirmation. When the President of the Confederate States is tried, the Chief-Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment in cases of impeachment shall not extend further than removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit, under the Confederate States; but the party convicted shall, nevertheless, be liable to and subject to indictment, trial, judgment, and punishment according to law.

SEC. 4.—The times, places, and manner of holding elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof, subject to the provisions of this Constitution; but the Congress may, at any time, by law, make or alter such regulations, except as to the times and places of choosing Senators.

2. The Congress shall assemble at least once in every year; and such meeting shall be on the first Monday in December, unless they shall, by law, appoint a different day.

SEC. 5.—Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner and under such penalties as each House may provide.

2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds of the whole number, expel a member.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, except-

ing such part as may in its judgment require secrecy, and the ayes and noes of the members of either House, on any question, shall, at the desire of one-fifth of those present, be entered on the journal.

4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Sec. 6.—The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the Confederate States. They shall, in all cases except treason and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House, they shall not be questioned in any other place.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the Confederate States, which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the Confederate States shall be a member of either House during his continuance in office. But Congress may, by law, grant to the principal officer in each of the Executive Departments a seat upon the floor of either House, with the privilege of discussing any measure appertaining to his department.

Sec. 7.—All bills for raising revenue shall originate in the House of Representatives; but the Senate may propose or concur with amendments as on other bills.

2. Every bill which shall have passed both Houses shall, before it becomes a law, be presented to the President of the Confederate States; if he approve he shall sign it; but if not, he shall return it with his objections to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If, after such reconsideration, two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered, and if approved by two-thirds of that House, it shall become a law. But in all such cases, the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the Congress, by their adjournment, prevent its return; in which case it shall not be a law. The President may approve any appropriation and disapprove any other appropriation in the same bill. In such case he shall, in signing the bill, designate the appropriations disapproved; and shall return a copy of such appropriations, with his objections, to the House in which the bill shall have originated; and the same proceedings shall then be had as in case of other bills disapproved by the President.

3. Every order, resolution, or vote, to which the concurrence of both Houses may be necessary, (except on questions of adjournment,) shall be presented to the President of the Confederate States; and before the same shall take effect shall be approved by him; or being disapproved by him, may be re-passed by two-thirds of both Houses, according to the rules and limitations prescribed in case of a bill.

Sec. 8.—The Congress shall have power—

1. To lay and collect taxes, duties, imposts, and excises, for revenue necessary to pay the debts, provide for the common defence, and carry on the Government of the Confederate States; but no bounties shall be granted from the treasury; nor shall any duties or taxes on importations from foreign nations be laid to promote or foster any branch of industry; and all duties, imposts, and excises shall be uniform throughout the Confederate States.

2. To borrow money on the credit of the Confederate States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes: but neither this, nor any other clause contained in the Constitution, shall be construed to delegate the power to Congress to appropriate money for any internal improvement intended to facilitate commerce; except for the purpose of furnishing lights, beacons, and buoys, and other aids to navigation upon the coasts, and the improvement of harbors, and the removing of obstructions in river navigation; in all which cases, such duties shall be laid on the navigation facilitated thereby, as may be necessary to pay the costs and expenses thereof.

4. To establish uniform laws of naturalization, and uniform laws on the subject of bankruptcies throughout the Confederate States, but no law of Congress shall discharge any debt contracted before the passage of the same.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the Confederate States.

7. To establish post-offices and post-roads; but the expenses of the Post-office Department, after the first day of March, in the year of our Lord eighteen hundred and sixty-three, shall be paid out of its own revenues.

8. To promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies; but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Confederate States; suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the Confederate States; reserving to the States, respectively, the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation, in all cases whatsoever, over such district (not exceeding ten miles square) as may, by cession of one or more States, and the acceptance of Congress, become the seat of the Government of the Confederate States; and to exercise a like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dock-yards, and other needful buildings, and

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers vested by this Constitution in the Government of the Confederate States, or in any department or officer thereof.

Sec. 9.—The importation of negroes of the African race, from any foreign country, other than the slaveholding States or Territories of the United States of America, is hereby forbidden; and Congress is required to pass such laws as shall effectually prevent the same.

2. Congress shall also have power to prohibit the

introduction of slaves from any State not a member of, or Territory not belonging to, this Confederacy.

8. The privilege of the writ of *habeas corpus* shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

4. No bill of attainder, or *ex post facto* law, or law denying or impairing the right of property in negro slaves, shall be passed.

5. No capitation or other direct tax shall be laid unless in proportion to the census or enumeration hereinbefore directed to be taken.

6. No tax or duty shall be laid on articles exported from any State, except by a vote of two-thirds of both Houses.

7. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another.

8. No money shall be drawn from the treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

9. Congress shall appropriate no money from the treasury except by a vote of two-thirds of both Houses, taken by yeas and nays, unless it be asked and estimated for by some one of the heads of departments, and submitted to Congress by the President; or for the purpose of paying its own expenses and contingencies; or for the payment of claims against the Confederate States, the justice of which shall have been judicially declared by a tribunal for the investigation of claims against the Government, which it is hereby made the duty of Congress to establish.

10. All bills appropriating money shall specify in federal currency the exact amount of each appropriation and the purposes for which it is made; and Congress shall grant no extra compensation to any public contractor, officer, agent, or servant, after such contract shall have been made or such service rendered.

11. No title of nobility shall be granted by the Confederate States; and no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emoluments, office, or title of any kind whatever, from any king, prince, or foreign state.

12. Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble and petition the Government for a redress of grievances.

13. A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

14. No soldier shall, in time of peace, be quartered in any house without the consent of the owner; nor in time of war, but in a manner prescribed by law.

15. The right of the people to be secure in their persons, houses, papers, and against unreasonable searches and seizures, shall not be violated; and no warrant shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the person or things to be seized.

16. No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war, or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor be compelled in any criminal case to be a witness against himself; nor be deprived of life, liberty, or property, without due process of law; nor shall any private property be taken for public use without just compensation.

17. In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have com-

pulsory process for obtaining witnesses in his favor; and to have the assistance of counsel for his defence.

18. In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved; and no fact so tried by a jury shall be otherwise reexamined in any court of the Confederacy, than according to the rules of the common law.

19. Excessive bail shall not be required, nor excessive fines imposed, nor cruel or unusual punishment inflicted.

20. Every law, or resolution having the force of law, shall relate to but one subject, and that shall be expressed in the title.

SEC. 10.—No State shall enter into any treaty, alliance, or confederation; grant letters of marque and reprisals; coin money; make any thing but gold and silver coin a tender in payment of debts; pass any bill of attainder, or *ex post facto* law, or law impairing the obligation of contracts; or grant any title of nobility.

2. No State shall, without the consent of Congress, lay any imposts or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws; and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the Confederate States; and all such laws shall be subject to the revision and control of Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, except on sea-going vessels, for the improvement of its rivers and harbors navigated by the said vessels; but such duties shall not conflict with any treaties of the Confederate States with foreign nations; and any surplus of revenue, thus derived, shall, after making such improvement, be paid into the common treasury; nor shall any State keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay. But when any river divides or flows through two or more States, they may enter into compacts with each other to improve the navigation thereof.

ARTICLE II. SEC. 1.—The Executive power shall be vested in a President of the Confederate States of America. He and the Vice-President shall hold their offices for the term of six years; but the President shall not be reëligible. The President and Vice-President shall be elected as follows:

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the State may be entitled in Congress; but no Senator or Representative, or person holding an office of trust or profit under the Confederate States, shall be appointed an elector.

3. The electors shall meet in their respective States and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each; which list they shall sign, and certify, and transmit, sealed, to the Government of the Confederate States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person shall have such a majority, then, from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But, in choosing the President, the votes

shall be taken by States, the Representative from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in case of the death, or other constitutional disability of the President.

4. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed; and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary for a choice.

5. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the Confederate States.

6. The Congress may determine the time of choosing the electors, and the day on which they shall give their votes; which day shall be the same throughout the Confederate States.

7. No person except a natural born citizen of the Confederate States, or a citizen thereof at the time of the adoption of this Constitution, or a citizen thereof born in the United States prior to the 20th December, 1860, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained the age of thirty-five years, and been fourteen years a resident within the limits of the Confederate States, as they may exist at the time of his election.

8. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President; and the Congress may, by law, provide for the case of the removal, death, resignation, or inability both of the President and the Vice-President, declaring what officer shall then act as President, and such officer shall then act accordingly until the disability be removed or a President shall be elected.

9. The President shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected; and he shall not receive within that period any other emolument from the Confederate States, or any of them.

10. Before he enters on the execution of the duties of his office, he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the Confederate States, and will, to the best of my ability, preserve, protect, and defend the Constitution thereof."

Sec. 2.—The President shall be commander-in-chief of the army and navy of the Confederate States, and of the militia of the several States, when called into the actual service of the Confederate States; he may require the opinion, in writing, of the principal officer in each of the Executive Departments, upon any subject relating to the duties of their respective offices; and he shall have power to grant reprieves and pardons for offences against the Confederate States, except in cases of impeachment.

2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and, by and with the advice and consent of the Senate, shall appoint ambassadors, other public ministers, and consuls, Judges of the Supreme Court, and all other officers of the Confederate States, whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers, as they think proper, in the President

alone, in the courts of law, or in the heads of departments.

3. The principal officer in each of the Executive Departments, and all persons connected with the diplomatic service, may be removed from office at the pleasure of the President. All other civil officers of the Executive Department may be removed at any time by the President, or other appointing power, when their services are unnecessary, or for dishonesty, incapacity, inefficiency, misconduct, or neglect of duty; and when so removed, the removal shall be reported to the Senate, together with the reasons therefor.

4. The President shall have power to fill all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of the next session; but no person rejected by the Senate shall be reappointed to the same office during their ensuing recess.

Sec. 3.—The President shall, from time to time, give to the Congress information of the state of the Confederacy, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them; and, in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he may think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the Confederate States.

Sec. 4.—The President and Vice-President, and all civil officers of the Confederate States, shall be removed from office on impeachment for, or conviction of, treason, bribery, or other high crimes and misdemeanors.

ARTICLE III. SEC. 1.—The judicial power of the Confederate States shall be vested in one Superior Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation, which shall not be diminished during their continuance in office.

Sec. 2.—The judicial power shall extend to all cases arising under the Constitution, the laws of the Confederate States, or treaties made or which shall be made under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty or maritime jurisdiction; to controversies to which the Confederate States shall be a party; to controversies between two or more States; between a State and citizens of another State, where the State is plaintiff; between citizens claiming lands under grants of different States, and between a State or the citizens thereof, and foreign States, citizens, or subjects; but no State shall be sued by a citizen or subject of any foreign State.

2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be a party, the Supreme Court shall have original jurisdiction. In all the other cases before mentioned, the Supreme Court shall have appellate jurisdiction, both as to law and fact, with such exceptions, and under such regulations as the Congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State, the trial shall be at such place or places as the Congress may by law have directed.

Sec. 3.—Treason against the Confederate States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason

shall work corruption of blood, or forfeiture, except during the life of the person attainted.

ARTICLE IV. SEC. 1.—Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may, by general laws, prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

SEC. 2.—The citizens of each State shall be entitled to all the privileges and immunities of citizens of the several States, and shall have the right of transit and sojourn in any State of this Confederacy, with their slaves and other property; and the right of property in said slaves shall not be thereby impaired.

2. A person charged in any State with treason, felony, or other crime against the laws of such State, who shall flee from justice, and be found in another State, shall, on demand of the executive authority of the State from which he fled, be delivered up to be removed to the State having jurisdiction of the crime.

3. No slave or other person held to service or labor in any State or Territory of the Confederate States, under the laws thereof, escaping or unlawfully carried into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor; but shall be delivered up on claim of the party to whom such slave belongs, or to whom such service or labor may be due.

SEC. 3.—Other States may be admitted into this Confederacy by a vote of two-thirds of the whole House of Representatives, and two-thirds of the Senate, the Senate voting by States; but no new State shall be formed or erected within the jurisdiction of any other State; nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned as well as of the Congress.

2. The Congress shall have power to dispose of and make all needful rules and regulations concerning the property of the Confederate States, including the lands thereof.

3. The Confederate States may acquire new territory; and Congress shall have power to legislate and provide governments for the inhabitants of all territory belonging to the Confederate States, lying without the limits of the several States, and may permit them, at such times, and in such manner as it may by law provide, to form States to be admitted into the Confederacy. In all such territory, the institution of negro slavery, as it now exists in the Confederate States, shall be recognized and protected by Congress and by the territorial government; and the inhabitants of the several Confederate States and Territories shall have the right to take to such territory any slaves lawfully held by them in any of the States or Territories of the Confederate States.

4. The Confederate States shall guarantee to every State that now is or hereafter may become a member of this Confederacy, a Republican form of Government, and shall protect each of them against invasion; and on application of the Legislature, (or of the Executive when the Legislature is not in session,) against domestic violence.

ARTICLE V. SEC. 1.—Upon the demand of any three States, legally assembled in their several Conventions,

the Congress shall summon a Convention of all the States, to take into consideration such amendments to the Constitution as the said States shall concur in suggesting at the time when the said demand is made; and should any of the proposed amendments to the Constitution be agreed on by the said Convention—voting by States—and the same be ratified by the Legislatures of two-thirds of the several States, or by conventions in two-thirds thereof—as the one or the other mode of ratification may be proposed by the general Convention—they shall thenceforward form a part of this Constitution. But no State shall, without its consent, be deprived of its equal representation in the Senate.

ARTICLE VI. SEC. 1.—The Government established by this Constitution is the successor of the Provisional Government of the Confederate States of America, and all the laws passed by the latter shall continue in force until the same shall be repealed or modified; and all the officers appointed by the same shall remain in office until their successors are appointed and qualified, or the offices abolished.

2. All debts contracted and engagements entered into before the adoption of this Constitution, shall be as valid against the Confederate States under this Constitution as under the Provisional Government.

3. This Constitution, and the laws of the Confederate States made in pursuance thereof, and all treaties made, or which shall be made, under the authority of the Confederate States, shall be the supreme law of the land; and the judges in every State shall be bound thereby, any thing in the Constitution or laws of any State to the contrary notwithstanding.

4. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the Confederate States and of the several States, shall be bound, by oath or affirmation, to support this Constitution; but no religious test shall ever be required as a qualification to any office of public trust under the Confederate States.

5. The enumeration, in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people of the several States.

6. The powers not delegated to the Confederate States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people thereof.

ARTICLE VII. SEC. 1.—The ratification of the Conventions of five States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

When five States shall have ratified this Constitution in the manner before specified, the Congress, under the Provisional Constitution, shall prescribe the time for holding the election of President and Vice-President, and for the meeting of the electoral college, and for counting the votes and inaugurating the President. They shall also prescribe the time for holding the first election of members of Congress under this Constitution, and the time for assembling the same. Until the assembling of such Congress, the Congress under the provisional Constitution shall continue to exercise the legislative powers granted them; not extending beyond the time limited by the Constitution of the Provisional Government.

R

RAILWAY, SUBTERRANEAN. A quick and safe means of communication beneath the overcrowded streets of London has always been the great ideal of engineers, and is now in course of accomplishment by Mr. John Fowler. The present powers of the Company only allow them to carry their line from Paddington to

Finsbury-circus, a distance of four and a half miles; and of this length more than three miles, extending from Paddington to the Victoria-street Station, are in many parts quite complete, and in others nearly so, with perfect working junctions with the Great Western and Northern Railways. It commences at the Pad-

dington Station, and is continued thence, in an almost direct line, towards the New-road, passing beneath the Edgware-road at right angles, and intersecting in the same manner Lisson-grove-road and Upper Baker-street, skirting along, beneath, and just outside the southern extremity of Regent's Park. Thence it passes under the houses at the eastern extremity of Park-crescent, continues beneath Tottenham-court-road into the New-road, and, passing close by Euston-square, turns at King's-cross to effect a junction with the up and down lines of the Great Northern Railway. From King's-cross a great part of the line is an open cutting, except for a length of about 600 yards beneath Bagnigge-wells-road and Coppice-row, where again, for the length we have said, a tunnel intervenes. From this to the Victoria-street Station it is nearly all a fair open cutting. From the station to be erected in Victoria-street, the line is to have two branches, one intersecting Holborn-hill, or rather Skinner-street, and continuing its course due south under the site of the old Fleet Prison, effecting a junction with the Chatham and Dover line, which is to cross the Thames at Blackfriars. The other and more important branch—in fact, the main line—is to be continued under the ground north of Smithfield and south of Charter-house-square, and will pass beneath Barbican into Finsbury circus. At this terminus it is intended, for the present at least, to stop. As it is, even completed to the Victoria-street Station, and communicating with the Chatham and Dover-bridge when finished, the facilities which it will offer to rapid travelling will be immense. A person starting from Brighton or Dover will be put down almost at his own door at Bayswater, instead of, as now, taking almost as much time to travel from London-bridge to Bayswater as to perform a long journey by rail. In like manner, those coming from the North—Edinburgh, Liverpool, or Manchester—will be able to book direct through to Dover or Southampton without the loss of a minute on their journey. It is not too much to say that for passengers pressed for time the two or three miles' interval between the northern and southern stations of the metropolis is equal in actual delay to 200 or 300 miles' distance on an unbroken journey. By the condition of taking the line underground, sewers were not to be interfered with, gas-pipes and water-pipes not to be touched, churches to be avoided, and houses to be left secure. With these drawbacks, Mr. Fowler was at liberty to take his tunnel through a labyrinth of sewers and gas and water mains if he could. At every step, vestries, gas and water companies, and the Board of Works had to be consulted, and but for the kind and liberal spirit in which the Company was met, and the fair efforts which were everywhere made by these bodies to help them over their great difficulties, the railway could never have been made at all.

The following are the constructive details of the portion of the line completed: To the Victoria-street Station the line is nearly $3\frac{1}{4}$ miles long, having stations at Paddington, Edgware-road, Baker-street, Portland-road, Euston-square, King's-cross, and Victoria-street. From west to east the average slope downwards of the whole line is about 1 in 300 feet, though after entering the city it again rises, but there is no steeper gradient throughout than 1 in 100. Its greatest curve is of 200 yards' radius, and its greatest depth from the ground above to the rails not less than 54 feet, and there are not more than 1200 yards of straight line throughout. The span of the arch of the tunnel is $28\frac{1}{2}$ feet; its form is elliptical, and its height 17 feet, except in the parts where there is great superincumbent pressure, when the form of the arch is altered to give it greater strength and to take the crown to a height of 19 feet. The foundations of the tunnel go from four to five feet into the solid ground on each side below the rails, except in some few places, where the close vicinity of very heavy buildings rendered extra strength necessary, and here the tunnel has been driven like a shaft, and is a solid ring of massive brickwork above and below; in fact, in all parts of the tunnel itself the most zealous care has been taken to ensure the structure, being everywhere greatly in excess of the strength it actually requires. Thus, even the lightest parts of the tunnel have six rings of brickwork, though railway arches of seven feet greater span are never built with more than five. The outer side of the arches is also filled in with solid beds of concrete, and the whole covered over with a layer of asphalt to keep it water-tight. In fact, the tunnel has been formed on what engineers call the "cut and cover" principle; that is, the ground has been opened to the base of the intended tunnel, the tunnel built, covered with concrete and asphalt, and filled in again with earth, and the roadway paved over as before. On this plan, and working in 12-feet lengths, the tunnel has actually been constructed at the rate of 72 feet a week, quicker than any work of the kind has ever yet been accomplished. It has not all, however, been completed at this rapid rate. Passing near churches and heavy buildings, the tunnel has been regularly driven in four-feet lengths by skilled miners; and such portions advanced but slowly. At the western extremity, where the soil was a fine gravel, the works were at one time greatly impeded by the water, which in that district is abundant everywhere at about 14 feet from the surface. This it was useless to try pumping out, as the pumps brought up sand and gravel as well as water, and would, had the attempt been persevered in, have brought up the very foundation of the surrounding houses also. It was necessary at last to make regular drains into the low-level sewers in order to keep the works free. Through the gravel and through the London clay the labor has been very easy, but

in parts where there was light, loose, sandy soil, a great deal of difficulty was experienced. All the really difficult parts have now, however, been surmounted, and the tunnel built in the most solid manner. The lines of rails are laid through many lengths, each line being double gauge, intended for both the broad and narrow traffic. Where the junctions have been effected, at Paddington and King's-cross it was necessary at the point where the switch rails joined to widen the tunnel and at these parts make it, in fact, like the mouth of a trumpet. This was the most difficult operation ever attempted in either tunnelling or brick-work, but Mr. Fowler surmounted all the obstacles in a masterly manner.

What made the work at King's-cross more difficult than all, was that at precisely the most difficult part of all the junctions the great Fleet Ditch sewer crossed it right through the crown of the tunnel arch. As the sewer, of course, could not be disturbed, the obstacle was met by carrying it across, slung, as it were, in a powerful cast-iron trough, and there it now hangs, peering through the brickwork like a colossal main, and with all beneath it as dry and sweet-smelling as if Fleet Ditch—the fullest and foulest of all London sewers—were 100 miles away. The stations along the line already enumerated will, all but two, be open-air stations, and even those that are to be underground will be amply lit by daylight coming through apertures in the roof of the arch. But one of the greatest difficulties of all the many that had to be overcome consisted of constructing an engine that should be at once of great power and speed, capable of consuming its own smoke, and, above all, to give off no steam. Ordinary engines passing through tunnels so completely enclosed would in a very short time fill them with such a mixture of steam and smoke as would be very nearly suffocating, would make signals almost useless, and, in short, render the traffic not only disagreeable but dangerous. To avoid all these complicated evils Mr. Fowler has invented an engine which, while in the open air, works like a common locomotive, but when in the tunnel, consumes its own smoke, or rather makes none, and by condensing its own steam gives off not a particle of vapor.

In a trial trip, as long as this engine remained in the open air at Paddington, it fizzed and simmered like any other locomotive; but the instant it entered the tunnel it condensed its steam, and scarcely a mark of vapor was perceptible; while, from the flues into the smoke-box being damped, not the least smell of smoke was given off. As upon the success of this engine the practical working of the line depends, the result of the experiment was watched with a good deal of anxiety. It, however, was perfectly conclusive: not even the most distant lamps in the long vista down the sides of the tunnel were dimmed in the slightest degree—in short, nothing could have been more

entirely complete and satisfactory. Having gone through the tunnel, the engine returned down the same track, and when in the centre of the tunnel, to show the difference, the engine was allowed to work on the usual plan, and in a few instants the whole place was full of vapor, which was so thick that even when the visitors returned through for the third time the lamps were still scarcely visible. The through trains from east to west and *vice versa*, will be arranged to start every ten minutes, to accomplish the distance from end to end in thirteen minutes, at a rate of fares which, it is said, will compete with those of the cheapest omnibuses. If this is so, the line ought to prove remunerative to the shareholders, though whether it is so or not it must be an immense convenience to the public.

RATIONS FOR VOLUNTEERS. The amount of subsistence allowed to each volunteer, and known under the term "ration," previous to the extra session of Congress in July, 1861, was as follows:

- 1 pound of pork or bacon, or 1½ pound of fresh or salt beef;
- 18 ounces of bread or flour, or 12 ounces of pilot bread, or 1½ pound of corn meal;
- 8 quarts of beans or peas, or 10 pounds of rice, or 140 ounces of desiccated potatoes, or 82 ounces of desiccated mixed vegetables;
- 10 pounds of coffee;
- 15 pounds of sugar;
- 4 quarts of vinegar;
- 1½ pound of adamantine candles;
- 4 pounds of soap, and
- 2 quarts of salt.

To 100 Rations.

This ration has been found, by long experience in the regular army, to be ample.

At the extra session above mentioned, Congress increased it, until it is now as follows:

- 1 pound of pork or bacon, or 1½ pound of fresh or salt beef;
- 22 ounces of bread or flour, or 1 pound of pilot bread;
- 8 quarts of beans, 10 pounds of rice or hominy, and 1 pound of potatoes three times a week, or a substitute therefor;
- 10 pounds of coffee;
- 15 pounds of sugar;
- 4 quarts of vinegar;
- 1½ pound of adamantine candles;
- 4 pounds of soap, and
- 2 quarts of salt.

To 100 Rations.

Extra issues of molasses are occasionally made. This ration, if cared for, and properly cooked, is more than can be eaten.

RHODE ISLAND, one of the original thirteen States, and one of the New England States, is the smallest of the States of the Union. It lies on both sides of Narraganset Bay, chiefly on the western. It extends from 41° to 42° N. latitude, and from 71° 8' to 71° 54' W. longitude. The continental portion is 56 miles in extreme length, is 40 miles broad at the southern, and 20 at the northern end. The area is 1,225 square miles, including the bay, or 1,200 miles of land. Its surface is very diversified, considering its extent.

Its political division consists of only five counties. It has a coast line on the Atlantic

ocean of forty miles; along Connecticut fifty miles; and along Massachusetts seventy miles; in all an outline of one hundred and sixty miles, extending from latitude $41^{\circ} 18'$ to $42^{\circ} 1'$ north.

It is, in proportion to its population, the greatest manufacturing section in the Union. The annual value of goods produced, by the census of 1850, was \$22,117,688. This had more than doubled in 1860, according to the census of the year. The population of the State, which had been 76,931 in 1810, had risen to 174,621 in 1860. In politics the State has been eminently conservative. Although it gave 4,537 majority for Lincoln in 1860, it at the same time gave 1,460 for the conservative Governor Sprague. The Legislature meets semi-annually, in May and November. The present Senate is composed of 17 Conservatives, and 13 Republicans; the House of 45 Conservatives and 25 Republicans.

The large manufactories of Rhode Island seek markets in all sections of the Union, and she is largely dependent on the South for raw material.

The increasing difficulties with the South were in Rhode Island regarded with much solicitude. The threatened interruption to her trade, as well by cutting off raw material as by closing the market for many of her productions, was, although of vital interest, still apparently secondary to other considerations. The necessity for preserving the Union was of paramount importance, and Governor Sprague promptly took the initiative in respect to existing difficulties. In his Message to the Legislature, he was the first to propose the repeal of the Personal Liberty bills, which had been passed by Rhode Island, in common with many other States of the North, and which were so generally regarded as one of the main causes of dissatisfaction at the South. Accordingly, Gov. Sprague expressed himself to the effect that the offensive law would be rescinded "without hesitation, not from fear or cowardice, but from a brave determination, in the face of threats and sneers, to live up to the Constitution and all its guarantees, the better to testify their love for the Union, and the more firmly to exact allegiance to it from all others." The vote at the close of January, 1861, on the motion to repeal, was in the Senate—yeas 21, nays 9; in the House—yeas 49, nays 18.

This result was hailed by the friends of the Union as a harbinger of peace, the more so that Ohio and some other States had made a movement in the same direction, and that the peace conference called by Virginia was on the eve of assembling at the National Capital. At such a juncture, an indication of more moderate views at the North, even if confined to the limited sphere of Rhode Island, was enough to awaken hopes of an amicable settlement. These were not realized.

When, in the progress of affairs, the difficulties culminated in the fall of Fort Sumter, the

Governor promptly tendered the Government the services of a thousand infantry and a battalion of artillery, and immediately convened the Legislature in extra session. It met on the 17th of April. The Senate passed a resolution of thanks to the Governor for his prompt action in support of the Government. In the House a bill was at once reported for providing the State's quota, and a bill was presented appropriating \$500,000 for enlisting men into the services of the United States. The Providence banks came promptly forward with money. The Bank of Commerce offered \$30,000, the State Bank \$50,000, the Providence Bank \$15,000, as loans to the State to aid in the outfit of the troops. Large offers from private citizens were also made to Gov. Sprague for similar purposes. The troops began immediately to move, and on the 20th the Rhode Island Marine Artillery, 8 guns, 110 horses, Col. Tompkins, passed through New York on their way to Washington. The enthusiasm in the State was great, and the citizens crowded forward into the ranks. The First Regiment, Col. Burnside, was ready to move. Many of the officers and men were of the wealthiest class. This regiment, 1,200 strong, when it left Providence, was accompanied by Gov. Sprague, as commander-in-chief of the Rhode Island forces. A. E. Burnside, the colonel, a native of Indiana, graduated at West Point, served in the Mexican war, resigned, and was employed with Gen. McClellan on the Illinois Central Railroad when the call for troops was made. The formation of troops went on rapidly. A second regiment, under the command of Col. John S. Slocum, was despatched soon after to Washington, and, with the First Regiment, took a conspicuous part at Bull Run, where Burnside earned his brigadier-general's commission. That disastrous day stimulated Rhode Island to new efforts. The Federal Government had made a call for more troops. Lieut.-Gov. Arnold issued the following proclamation:

STATE OF RHODE ISLAND, &c.
EXECUTIVE DEPARTMENT, July 23, 1861. }

To the People of Rhode Island:

All hearts are bowed in sorrow at the disastrous result of the battle of the 21st inst., at Bull Run, in Virginia.

The national arms have sustained a temporary defeat. This reverse is the more sad to us that it is accompanied by the loss of so many gallant officers and brave men who held the honor of Rhode Island second only to their love of country.

Colonel John S. Slocum, Major Sullivan Ballou, Captains Levi Tower and Samuel J. Smith, and Lieutenant Thomas Foy, of the Second Regiment, and Lieutenant Henry A. Prescott, of the First Regiment, have fallen. So far as yet known, this completes the list of fatal casualties among the officers; that of the privates is not yet received.

The State will embalm the memory of these noble men, as it preserves the fame of its heroes of Revolutionary days.

This reverse calls for renewed and vigorous effort on the part of all loyal citizens to maintain the Federal Government.

Therefore, I, Samuel G. Arnold, Lieutenant-Governor, do hereby call upon the good people of this

State to come forward without delay and volunteer their services in defence of the Constitution and the laws.

Arrangements will at once be made for the commandants of the several military companies to enroll men to serve for three years or during the war, unless sooner discharged. Let the response to this call be prompt, decided, and such as will show that the martial spirit of our State is alike indomitable in victory or defeat.

SAM'L G. ARNOLD, Lieut.-Gov.

By His Honor's command,
JOHN R. BARTLETT, Secretary of State.

Gov. Sprague convened the Legislature, and sent in a message, in which he said:

"When the action of this body was first taken, the State and the country felt that the war would, from the necessities of the case, be of short duration. Since that time events have transpired which have opened the eyes of the whole country to the magnitude of the rebellion which they are called upon to crush out. The repulse which the army has recently suffered has been owing to so many causes that it is impossible to attribute it to any one which we should regard as satisfactory—all of them pointing to the condition of things which we now behold. The State and the country, however, may feel assured, from the change in the programme at Washington, and by the people throughout the whole North, that the errors of the past will not be repeated in the future, and also that every movement for the future will hardly fail to result in success.

"The war will, of necessity, be a long one. We have been in error as to the strength of the enemy, and as to the long and persistent course which has been pursued by the South, tending towards this point. While we have been occupied in our business they have been creating revolution. We were under the impression that they were lacking in all the resources which go to raise and maintain armies; whereas, in almost every particular, we have found them superior to ourselves. We have found not only the physique of their men equal to ours, but their clothing, their arms, their subsistence, and their means of transportation—every thing that goes to make up military efficiency, superior to ours. And when we have been obliged to be the attacking force, marching under a Southern sun, exhausted, without provisions and without shelter, they have been encamped and in fortified positions, in a country unfriendly to us and friendly to them, where they could receive information of every movement of ours, and we could learn nothing whatever as to theirs.

"The probabilities are that in no case on the record of the world's history has an army been called into the field possessing so little knowledge of the strength and position of the enemy; and, such being the case, it was impossible for any troops in the position ours found themselves to have sustained themselves for any considerable length of time. It has opened the eyes of the country to the immensity of this struggle, and in that view of the subject the result may be bearable."

The Legislature was in session three days, and adjourned, having authorized a bounty of fifteen dollars for each recruit enlisted under the authority of the State, to be paid to him on being mustered into the service of the United States. A resolution was adopted directing the payment to the families of killed, wounded, or disabled soldiers, of the bounty to which those soldiers would be entitled by three months' service under the acts of April and May. The several towns were authorized to appropriate and raise money for bounties to soldiers and their families, on the same footing that money for town expenses is appropriated and raised; and their past action in this respect was confirmed.

An act was passed authorizing the General Treasurer, under advice of the Governor, to issue the bonds of the State, with semi-annual coupons at six per cent. interest, for an amount not exceeding \$500,000, payable in ten years from the first of October next; but the State is privileged to redeem them at any time after five years. The sums allowed by the United States to the State in settlement of the war claims are by the present act devoted to the redemption of these bonds.

The General Treasurer was empowered to hire \$500,000, or less, at not over six per cent., and to renew said loans from time to time; the money was to be expended in raising and equipping troops under the provisions of the military act passed in April. The Governor was authorized to employ a proper person to adjust military accounts between the State and the United States.

A resolution was adopted declaring that all political parties should unite in supporting the constitutionally elected Government of the United States in the present crisis, and pledging the best exertions and the entire resources of the State and its people to preserve the Union.

The thanks of the Assembly were by resolution tendered to the Governor for his vigorous conduct in camp and field, and he was presented with the piece of cannon belonging to the Second Rhode Island battery, and brought away from the battle field at Bull Run.

The Assembly, by resolution, thanked Ambrose E. Burnside, late Colonel of the First Regiment Rhode Island Volunteers, for his gallant services, and expressed its satisfaction that the National Government had recognized and rewarded those services; the resolution also signifies a wish that in his new capacity as brigadier-general he might be placed in immediate command of the Rhode Island regiments.

The call for troops was promptly responded to, and the State furnished six regiments and three batteries of artillery during the year. The enrolled militia of Rhode Island, (comprising all males between the ages of 18 and 45,) numbers 20,283, which is an increase over 1860 of 1,742. Her quota of troops, under the call for 500,000, was 4,057, but, according to the report of the Adjutant-General Maura, she had

sent in her own regiments 5,124, while 1,005 had enlisted in regiments belonging to other States, and in the navy.

This is a heavy draught, being equal to nearly one-third of the whole active male population.

The State of Rhode Island suffered perhaps more, proportionally to her population, than any other State, by reason of the short supply of cotton, and attention was immediately drawn to the prospects of "cottoning" flax. The Rhode Island Society for the Encouragement of Domestic Industry offered \$500 for the best bale of flax cotton, fit for use on cotton machinery. In consequence, five competitors claimed the amount, but the committee decided that none of them met the requirements. Some of their samples would work with wool and in a small per cent. with cotton, giving the cloth greater body. The difficulty was to obtain a uniform thickness.

ROMNEY, is a village on the South Branch of the Potomac, 190 miles northwest of Richmond. It is the capital of Hampshire county. A few miles from Romney, near Mill Creek, an attack was made on a small body of Confederate troops by an Indiana regiment under Col. Wallace. The enemy retired through Romney on the road to Winchester. They abandoned their tents, arms, uniforms, &c. Some prisoners were taken, with a small loss on both sides.

RUSSIA. The most extensive though not the most populous empire of the world, possessing vast tracts of territory in the three continents of Europe, Asia, and North America; extending over 35° of latitude and 192° of longitude, and having an area of about 8,000,000 square miles, and a population of 72,961,811 inhabitants. Much of its territory is sterile, and either consists of snow-capped mountains, elevated sandy plains, or frigid and ice-clad wastes; but other portions are abundantly fertile, and yield vast quantities of grains and fruits; while its forests produce the best of timber, and its mountainous regions are prolific in mineral wealth beyond any other portion of the globe. Gold, silver, platinum, iron of extraordinary quality, copper, lead, tin, the precious malachite, beryl, onyx, agate, and other gems exist in great profusion in the mines of the Ural, the Altai, and the Siberian mountains.

The people are of numerous races and have rather formed a conglomeration of nations than a distinct nationality. In Russia in Europe the Muscovite race is perhaps more numerous than any other, but large portions of the population are composed of Poles, Swedes, Germans, Jews, the Slavonic races, Lapps, and Finns; in the south and southeast, Tartars and Turks of the Asiatic tribes, Georgians, Circassians, Armenians, &c., &c. In Asia, Tartars, Turks, Tungouses, and Chinese predominate, but there are many Persians of the old Aryan stock, as well as Samoides, and other tribes of the Finnish family; while in America the Esquimaux and other Arctic tribes of a similar origin are the

principal inhabitants of the cold and cheerless region belonging to Russia.

The government is an absolute monarchy; the Czar or Emperor being in reality, as he is by title, *autocrat* of all the Russias. The people of European Russia have been divided into three classes; the nobility, who possess vast landed estates, and some of them immense wealth; the middle class, composed mainly of merchants, teachers, men of science, and master mechanics; and the serfs, who were slaves, but of late years attached to the soil. These last were again divided into two classes, serfs of the nobility and serfs of the crown. The Russian serf possesses extraordinary mechanical ingenuity, and a remarkable facility for the acquisition of languages and literature, and has extraordinary local attachments; but he is crafty and deceitful, and ages of servitude have developed in him the vices of the servile condition. The events of the year in Russia have been deeply interesting. At its commencement there were, perhaps, no more than the usual causes of disturbance: the chronic difficulties growing out of the forcible disintegration of Poland, which at frequent intervals assumed the acute form of insurrection or revolution; the restless condition of the serfs as the time of their long-looked-for emancipation drew nigh; the disaffection of the Tartar or Turkish tribes inhabiting the Crimean peninsula, who on some real or fancied grievance, growing out of the conflict of religions, they being bigoted Mohammedans, left their homes in a body and precipitated themselves upon the Christian population of Northeastern Turkey, driving them out, and claiming the protection of their co-religionists, the dominant power in Turkey—the calm preceding the storm, in the Caucasus, and which some months later broke out in a renewed and severe conflict; the occupation by Russia of a considerable portion of Independent Turkistan, and of the region south of the lower Amoor, rather by virtue of the arts of diplomacy than by the more costly method of invasion. This was the condition of the empire at the opening of the year.

In Poland an outbreak soon occurred. In 1856, at the close of the Crimean war, and soon after his own coronation, the Emperor Alexander II. had promised to Poland a general amnesty; liberty of conscience in religious matters; the restoration of the Polish language in the records and government of the kingdom, and instruction in it in the schools; and the reestablishment of the suppressed universities. These promises had for the most part remained unfulfilled, and though the amiable and popular Gortchakoff (*see* GORTCHAKOFF) had been installed as Governor of Poland, and had done his utmost to beautify Warsaw, and restore it to more than its former stateliness, and in many ways the rigor of the iron-handed Nicholas had been softened under the administration of his successor, yet the Poles felt that they were grievously wronged.

Before narrating the circumstances of the insurrection, it may be necessary to give a brief account of the Agronomic Society which has been to such an extent identified with it. The Count André Zamoiski, or Monsieur André, as the Poles call him, was a Polish patriot of noble and ancient family, who had taken part in the revolution of 1830, but after the taking of Warsaw in 1831, has been permitted to return to Poland. Unable to be of service otherwise to his country, he endeavored to promote its material progress; he established lines of steamboats upon the Vistula, and erected warehouses in Warsaw, but the improvement of agriculture was the subject to which he devoted most attention. Its processes, implements, and science were matter to which he directed his thoughts and efforts. In 1850, he obtained permission to publish a monthly agricultural journal at Warsaw, and in 1857 secured the sanction of the young emperor to the founding of the Agronomic Society. In 1859, he sought and received permission for the Society to hold an anniversary and public sittings for the discussion of agricultural topics. He had also been instrumental in the foundation of similar associations at Cracow and Leopold (in Galicia) in Austrian Poland, and at Posen in Prussian Poland, and maintained a constant communication with them. Those who have never lived under a despotic government can hardly realize with what almost childish eagerness the educated Poles joined these agricultural associations. In their discussions of agricultural topics they were measurably free, and if, occasionally, under the garb of a politico-economical doctrine, some great principle of liberty was enunciated, who could blame them? The Agronomic Society of Warsaw, in the third year of its existence, numbered 4,600 members, and its sessions were attended by hundreds of ladies of the highest rank and social position. The others, though younger, had a proportionally numerous membership. On the 25th of November, 1860, the anniversary of the revolution of 1830 had been celebrated in Warsaw, by funeral services in memory of the patriots, and by the chanting of national martial hymns. In January, 1861, masses were said for the dead poets, Mickiewicz, Krasinski, and Slowacki. The government tolerated these manifestations, and even permitted those who took part in them to wear the Polish national costume. On the 25th of February, a great crowd gathered around the old market at Warsaw, and the streets adjacent, to do honor to the memory of the Poles who fell at the battle of Grochow in 1831, and a procession passed through one of the streets, bearing flags with a white eagle on a red ground. The chief of Police, Colonel Trepoff, ordered them to disperse, but the order was received with shouts of derisive laughter, and the mounted police, irritated at their refusal, rode upon the procession with drawn sabres, and wounded a considerable number.

On the 27th of February, a funeral service

was held in the church of the Carmelites in honor of Zawiska, a Polish patriot who was hung in 1833. From that church a portion of the crowd went to the hall of the Agronomic Society then holding its annual session, and attempted to draw it into the insurrectionary movement, but by the adroit management of its President, were prevented from doing so. Another portion were by accident thrown into confusion before the great gate of the church of the Bernardines, and the Russian general Zabolotskoi ordered the military force to fire upon them, unarméd as they were, and the Cossack guard to charge upon them; and, as a result, a number were killed and many wounded.

The people, though overwhelmed with grief, were now thoroughly indignant. On the evening of the day of this last massacre, the Polish committee addressed to the Emperor a remonstrance, closing with these words: "Cut off from every legal means of bringing before your throne her grievances, and the demonstration of her necessities, Poland is compelled to make her voice heard only by the cry to heaven of the martyrs, whom each day she offers as a holocaust." The Government apparently felt that it had gone too far, and conciliatory measures were adopted, unpopular officers were removed, and reforms promised. The funeral of the victims of the 27th of February passed off on the 2d of March without disturbance, the prudence of Count Zamoiski having secured the adjournment of the Agronomic Society, without any participation in the exciting scenes and topics of the day, having first passed a resolution in favor of giving the right of property to the serfs, a measure which the Emperor was known to have greatly at heart.

The danger seemed to have passed, when suddenly, on the 7th of April, an imperial decree was published suppressing the Agronomic Society. This new grievance roused all the former bitterness; again the crowds assembled in Warsaw, and gathered around the hall of the Society; and, on the 8th, the order was given to disperse them by armed force, and the charges of cavalry, and the deadly fire of the infantry again caused the death and wounding of more than a thousand citizens. The excitement spread throughout Poland, and even into some of the Russian governments, especially the Ukraine, where strong sympathy was expressed for the Poles. The Russian Government meanwhile adopted the most stringent and cruel measures. Soldiers were encamped in the principal streets, and cannon were placed in position to shell the city. The soldiers committed numberless outrages; the Circle of "The Resource," a favorite place of assembly for the principal citizens, was closed; the inhabitants were forbidden to wear, and the merchants to sell mourning goods; the Poles who resigned government offices were subjected to the severest penalties; great numbers were arrested, and especially all clergymen who manifested, as most of them did, their patriotic sympathies.

Yet with a vacillation which irritated the people almost as much as its severities, the Government seemed to fear that it had been too harsh, and again indicated a desire to introduce reforms which should pacify the Poles. Public fêtes in honor of the Czar were held, but the Poles discountenanced them; the journals and the penny post which had been suppressed, were restored; the Circle of "The Resource" was again opened, and permission granted to make the annual pilgrimage to Czenstochowa, the holy city of Poland, on the 8th of May, but no one went. The taxes were lightened, and other measures which looked towards some reduction of the burdens of the country were adopted; but the people were firm in their demands for the restoration of the kingdom of Poland with its constitution, its rights, and its immunities, and appeared determined to take nothing less; and this the Emperor, though undoubtedly sincerely desirous of the pacification of Poland, that he might give his exclusive attention to the emancipation of the serfs, was unwilling to grant. On the 15th of Oct., 1861, the celebration of the birthday of Kosciuszko led to further disturbances, and the imprisonment of a number of Poles, but the massacre of April was fortunately not repeated.

Russian serfdom dates from 1601, when, by an imperial ukase, the peasants on an estate were forbidden to leave the service of the landholder without his consent. Prior to the accession of Nicholas I. to the throne, in 1825, the serfs were wholly in the power of their masters, and were often treated with great cruelty. The life of the serf was of scarcely so much account as that of a dog or horse, and at the caprice of his master he was sold, given away, drowned, sent to Siberia, or otherwise disposed of. The ukase of 1827, by which the Emperor declared the serf an integral and inseparable portion of the soil, produced a sensible improvement in the condition of the class. A further amelioration ensued, from the system adopted by the Government of loaning money to the landholders on the pledge of their lands and serfs, and the eventual foreclosure of these mortgages, by which the lands became crown lands, and the serfs crown peasants. In this new relation, they were only required to pay to the Government one dollar a year for each male peasant, and were liable to the military conscription. But only about two-fifths of the serfs were in this way relieved from the oppression of their masters, and in order to remedy this, the Emperor, in 1845, conferred on them the power, hitherto withheld, of making contracts. Armed with this power, the serfs sought to purchase the lands on which they lived from their landholders, since by that purchase they themselves became free. They also in many cases loaned to the landholders money on the mortgage of their estates. But they had not, like the Government, the means of paying to the landholder the third part of the value of his property, on foreclosing the mortgage, and hence they lost

their capital, and did not gain their liberty. The Government again interposed, and opened to them the imperial treasury for the loans they needed, in order to complete the purchase of the property, requiring only the payment of 3 per cent. interest, and 3 per cent. of the capital annually, secured by the mortgage of the property. In this way, in many cases, by payments spread over 30 years, they became free, and the proprietors of their lands; or, if they failed, they were at the worst only crown peasants, a far better position than their previous one. There were still, however, many large proprietors who were not in debt either to the Government or their serfs, and who refused to sell their lands to their serfs; and for these serfs there was no redress in the ukases already promulgated. For them the only hope of release from servitude, was by enlistment in the army, or in the case of females, marriage with a free man.

At the accession of the present Emperor, in 1855, there were in the empire 38,000,000 serfs, of whom 16,000,000 were crown peasants, and 22,000,000 belonged to private estates, or to the private lands of the crown. Notwithstanding the exhaustion of his finances by the Crimean war, Alexander II. was sincerely desirous of promoting the emancipation of the servile class, and to this he was prompted as well by motives of humanity as by the conviction of the material development in the physical condition of his empire which would be the result of the substitution of free for compulsory labor. In 1857 he promulgated a ukase, providing that the serfs were to be finally liberated within twelve years after settling the terms to be resolved on between them and the proprietors. For the purpose of framing the measures of emancipation in such a way as to avoid or overcome the many and serious difficulties which were involved in it, the Emperor appointed on the 15th of July, 1857, a superior committee composed of the most eminent men of the Empire, and of which his brother, Grand Duke Constantine, was president, to digest and mature a plan of emancipation which should harmonize the interests of the landed proprietors and the peasants, and should also provide for the release from servitude of the very considerable class of domestics, who, while serfs by birth, and servants by occupation, had no connection with the landed estates of the proprietors. This committee reported late in 1860 to the Grand Council of the Empire, by which their propositions were duly considered and approved, and on the 5th of March, O. S., (March 17, N. S.,) 1861, the Emperor issued his manifesto dated February 19, O. S., (March 3,) in which, after reciting the past disabilities and injustice which the serfs had endured, and the solicitude which he and his immediate predecessors had felt for the improvement of their condition, he proceeded to declare that thenceforth the landed proprietors must allow the serfs to cultivate their land at a fixed rental, and that they should be at liberty to purchase from

the estates of the proprietors sufficient land for their support and that of their families; that at the end of two years they were to be free, and sooner if they purchased the full quantity of land to which they were entitled, for which purpose loans would be furnished, if needed, from the imperial treasury. The domestics (*dvorovye*) were to be free at the end of two years. It was further provided that, by amicable arrangements, the proprietors and serfs might shorten this period of temporary bondage, and adjust their mutual relations at once. For the settlement of any difficulties or disputes arising from this prospective emancipation, special courts were established, and a charter of rules drawn up, specifying the quantity of land to which the peasants should be entitled, the rental and other charges which might be exacted, and the terms and times of payment. The Emperor closed his manifesto with an earnest appeal to both classes, the proprietors and peasants, to maintain towards each other a spirit of mutual accommodation and good will, and to avoid all disputes or manifestations of hostility. A commission, of which the Grand Duke Constantine was president, was appointed to superintend the measures for emancipation.

While the measures thus initiated were wise and benevolent in intention, they were hardly so clear in their expression as was desirable, and it was found that they had excited expectations on the part of the serfs which the events did not justify, and that in several instances serious disturbances resulted.

The territorial acquisitions of Russia during the year, were of great magnitude and importance. In the article GEOGRAPHICAL EXPLORATIONS, we have alluded to the approaches made by that Government towards India in Independent Turkistan, and to their explorations, followed by the stationing of a resident commissioner in Chinese Turkistan. In the extreme east of Asia, they have acquired far larger and more important possessions. By a treaty negotiated with the Emperor of China in November, 1860, and ratified in 1861, the astute Russian Plenipotentiary, Mouravieff, secured the cession to Russia of the island of Saghalien, and that portion of Mantchooria lying east of the Oussouri River, as far south as the 42d parallel of north latitude. They also took possession of the principal port of the Japanese island of Yesso; and on the 13th of June, 1861, seized also the important island of Tsus-sima in the straits of Corea, which is fifty miles long and twelve wide, and commands the strait. This island, it is said, they purpose fortifying, when the Russian Government will have command of the entire western coast of Asia, from the 35th parallel northward.

The conduct of Russia towards the United States, since the commencement of the civil war, has been marked by courtesy and kindness. The desire of the Emperor for the maintenance of our institutions, and the suppression of the

rebellion has been repeatedly expressed, and manifested by deeds as well as words. (*See DIPLOMATIC CORRESPONDENCE.*)

The finances of Russia are not in a remarkably prosperous condition. Her resources are immense, and her revenues large, but there has been for a number of years past an annual deficit, which has been met by new loans, and the credit of the empire not being of the best abroad, her loans have been either taken at home, or if negotiated abroad, have paid heavy rates of interest. The extreme reluctance of the Russian Government to make any thing like a full *exposé* of its financial condition has had an unfavorable effect upon its credit. To-day the best-informed financiers of Europe have very little positive knowledge concerning the debt or the present revenue or expenditure of the empire. A Russian authority, M. Ogareff, states the debt in 1861 as £82,410,000, or about \$410,000,000; but as the same authority states the debt of 1860 at £87,876,920, which would indicate a reduction of \$27,000,000 in a year, when no financier has any knowledge of the payment of any portion of the debt, his statements are to be received with some caution. The annual expenditure is supposed to range from \$220,000,000 to \$250,000,000.

With the exception of canals, for which the country was well adapted, and which are numerous and well constructed, Russia had not till quite recently, accomplished much in the way of internal improvement. A railway seventeen miles in length was, indeed, built in 1836, but no great enterprises of that kind were attempted till ten or twelve years later. The railway from St. Petersburg to Moscow was opened in 1851, and there are now lines completed or in course of construction to most of the principal towns of European Russia, and to Berlin. There were, at the end of 1861, 3,395 miles completed, and nearly as many more projected or in progress. A line of electric telegraph, to extend from St. Petersburg to Nikolaiev on the Pacific, near the mouth of the Amoor, was commenced in the spring of 1861, and was to be vigorously pushed forward to completion. It was expected that it would eventually be connected with the American line to San Francisco.

Education in Russia is confined mostly to those who are able to pay for it, and to the foundlings and other *protégés* of Government. The high schools, seminaries, colleges, and universities are well conducted, and the course of education in them is thorough; but the communal schools, where they exist, are of the poorest character, and impart no instruction of any value.

The empire is emerging, and with a rapidity which under all the circumstances is encouraging, from a barbarism which two centuries ago was nearly absolute, into a high degree of civilization; and though there are occasional and partial reactions, and the autocratic government under which it has remained, is gene-

rally considered inimical to the highest moral and intellectual development, there is as little cause to blush for the progress of the nation

since the commencement of the present century as can be found in the history of any nation of Europe for the same period.

S

SCHLOSSER, FRIEDRICH CHRISTOPHE, a German historian, born in Jever, Nov. 17, 1776, died in Heidelberg, Sept. 23, 1861. He was educated at Göttingen, and after completing his university course, was for some years a private tutor. In 1808 he became associate rector of the school at Jever, but retained the position only a year, removing in 1809 to Frankfort-am-Main, that he might enjoy greater facilities for his historical studies. In 1812 he accepted a professorship in the New Lyceum at Frankfort, in 1814 was appointed city librarian, and in 1817 professor of history at Heidelberg. This professorship he retained till his death. His greatest and most widely known work was "History of the Eighteenth Century, and of the Nineteenth to the Overthrow of the French Empire," 8 vols., published at Heidelberg in 8 vols., (1823-46,) and translated by D. Davison and republished in England in 8 vols., (1843-52.) His other principal works were: "Lives of Beza and Peter Martyr," Heidelberg, 1809; "History of the Iconoclastic Caesars of the Eastern Empire," Frankfort, 1812; "General View of the History of the Ancient World, and its Civilization," 3 vols., Frankfort, 1826-34; "The History of the World, in Consecutive Narration," 9 vols., 1817-24.

SCRIBE, EUGÈNE, a French dramatic writer, born at Paris, Dec. 24, 1791, died in the same city Feb. 20, 1861, of apoplexy. He was originally intended for the legal profession, but his guardian, the advocate Bennet, found his dramatic tastes so strong that he advised him to abandon the bar for the stage. His first drama, produced in 1811, and in which he was aided by his schoolfellow, De la Vigue, was highly successful, and his whole career as a dramatic writer has been crowned by equal success. He was the author of an immense number of dramas of very unequal merit, but all exhibiting a correct conception and great power of vigorous delineation of the life of the lower and middle classes. A selection of his dramas (translated) in seven volumes, was published in England in 1845, and many of them have been reproduced on the American as well as the English stage. "Fra Diavolo," "Robert le Diable," "Les Diamans de la Couronne," "The Finest Day of my Life," &c., are among those which will be most readily recognized.

SEWELL'S POINT is the projection of land on the right shore, where the Elizabeth River turns from a north to an easterly course, becoming then what is called Hampton Roads. It is on this river that Norfolk in Virginia is situated. The point was fortified immediately after the secession of Virginia. The battery placed here by her troops was the exterior of the line

of batteries intended to guard the Elizabeth River, through which Norfolk is approached. This line of batteries consisted of seven, the heaviest of which was at Craney Island, mounting about thirty guns. Two batteries further inland mounted about twelve and fifteen guns respectively. The other batteries mounted from seven to ten guns. The battery at Sewell's Point commanded the vessels blockading James River, and if the guns were sufficiently heavy and effective, it could cause them to remove. A party being observed perfecting the earthworks, the gunboat *Star* opened fire upon them with two ten-inch guns and shell. Subsequently the *Freeborn*, Capt. Ward, arrived, and, taking a position near the shore, drove the defenders out of the works, and disabled the battery.

The *Star* was struck by five shots of small calibre, all of which took effect. One ball, a six-pounder, penetrated the hull on the larboard bow, a few inches above the water line. Two of her crew were injured, and one of them, a boy, seriously. This was the first skirmish between the floating batteries of the North and land batteries of the South. On the other side, Vice-President Stephens, in an address at Atlanta, Ga., on the 23d of May, spoke of the affair as resulting in "the vessel being repulsed and disabled."

SHAW, LEMUEL, LL. D., late Chief-Justice of the Supreme Court of Massachusetts, born at Barnstable, Mass., January, 1781, died at Boston, Mass., March 30, 1861. He was a graduate of Harvard College, and the following year was assistant teacher in one of the Boston public schools, and assistant editor of the "Boston Gazette." He studied law with David Everett, Esq., and was admitted to the bar in New Hampshire, Sept. 1804, and two months after, commenced practice in Boston, remaining in practice until his appointment as Chief-Justice. In 1816 he was elected a member of the Massachusetts House of Representatives, in which he was continued by reelection for seven years, and was subsequently for four years a member of the Senate. In 1820 he was a member of the Convention for revising the Constitution. In Sept. 1830 he was appointed Chief-Justice of the Supreme Judicial Court, which office he held thirty years. He was an overseer of Harvard College about fifteen years, and thirty years in the Corporation. While in the Legislature he drew up an elaborate report concerning the lands of the United States, advocating their distribution to the old as well as to the new States, for the purposes of education. He was considered an able jurist, and his legal opinions were regarded as possessing great weight.

SLAVES. This species of property, as it is known in the South, and this "class of persons held to service and labor," as it is designated in the North, was the occasion of much perplexity to the Government in the conduct of hostilities against the seceded States. The Constitution of the United States gives no authority, either express or implied, to the Federal Government to interfere with, control, or regulate the relations of master and slave in any State in which this social condition exists. On this point the people are almost unanimous* in their opinion. But when a member of the slaveholding States seceded, and a civil war ensued between them and the Federal Government, how were the relations of that Government to the slaves affected? The Government took the position that each State was a part of the Union, and that "insurgents" or "rebels" had undertaken to wrest its authority in certain States. Therefore the Government continued in full force over all the States, as between the Federal Government and its loyal citizens, and the arm of the Government was thereby stopped from interference with slaves of loyal citizens. In Western Virginia, which refused to become a part of the Confederate States, the relations of master and slaves were unaltered; so likewise in Kentucky, in Missouri, in Maryland and Delaware. But how was this state of servitude in its relations to the Government affected among disloyal citizens, those whose hands were raised to destroy the Government over them—could they claim the forbearance of the military power organized under the Constitution, when they were striving to destroy the Constitution itself? The development which this question received in the progress of events is the answer which it is the province of history to give.

The slaves were first called combatants.

This term, as used in law, has been almost entirely confined to property. Military or naval persons in the service of the army, his ambassadors and ministers sent to solicit assistance, comprise nearly the entire class heretofore known as such. But in those novel relations which arise in the conflict between the North and the South, a new class, composed of slaves, has appeared, to whom it has been applied. Even here it has its limitations. It should strictly embrace those who had been employed upon plantations and other works of an enemy, and who came within the Union lines. The term was first given to certain able-bodied men who came within the lines of General Butler's camp, at Fortress Monroe. Upon the demand for their surrender made by the officer of a Confederate force in the neighborhood, he replied that they were contrabands of war, and as such would not be given up. The

immediately notified the War Department of these contrabands.

Soon after, embarrassed by the mass of "contrabands" in the camp, General Butler wrote again to the Secretary:

"Since I wrote my last, the question in regard to slave property is becoming one of very serious magnitude. The inhabitants of Virginia are using their negroes in the batteries, and are preparing to send their women and children South. The escapes from them are very numerous, and a spirit has come in the morning, July 27, and my pickets are bringing their women and children. Of course these cannot be dealt with upon the theory of which I designed to treat the service of able-bodied men and women who might come within my lines, and of which I gave you a detailed account in my last dispatch."

"I am in the utmost doubt what to do with this species of property. Up to this time I have had some within my lines men and women with their children—whole families—each family belonging to the same owner. I have, therefore, determined to employ, as I can, to very profitable use the able-bodied persons in the party, leaving proper food for the support of all, and charging against their services the expense of care and subsistence of the non-workers, keeping a strict and accurate account as well of the services as of the expenditures, having the worth of the services and the cost of the expenditures determined by a board of survey, to be held as to be held. I know of no other manner in which to dispose of this subject and the questions connected therewith. As a matter of property to the insurgents, it will be of very great moment—the number that I now have amounting, as I am informed, to what in good times would be of the value of sixty thousand dollars."

The Secretary of War immediately, on the 30th of May, replied, answering the views of the Government in that time:

"Your action in respect to the negroes who came within your lines from the service of the rebels is approved. The Department is sensible of the embarrassments which arise around officers conducting military operations in a State by the laws of which slavery is sanctioned. The Government cannot recognize the rejection by any State of the Federal obligations, nor can it refuse the performance of the Federal obligations resting upon itself. Among these Federal obligations, however, none can be more important than that of suppressing and dispersing armed combinations formed for the purpose of overthrowing or violating constitutional authority. While, therefore, you will permit no interference by the persons under your command with the relations of persons held to service under the laws of any State, yet will, on the other hand, so long as any State within which your military operations are conducted is under the control of such armed combinations, sustain such surrendering to larger num-

*On the 10th of February, the House of Representatives in Congress passed the following resolution—*yes, 67; nays, none.*

Resolved, That neither Congress, nor the people or Governments of the non-seceding States have a constitutional right to assume men or members with property in any seceding State of the Union.

ters any persons who may come within your lines. You will employ such persons in the services to which they may be best adapted, keeping an account of the labor by them performed, of the value of it, and the expenses of their maintenance. The question of their final disposition will be reserved for future determination."

On the 11th of July, the United States Marshal of Kansas writes to the Attorney-General, asking whether he should give his official services in the execution of the Fugitive Slave Law.

In reply, the Attorney-General says:

"It is the President's constitutional duty to 'take care that the laws be faithfully executed.' That means all the laws. He has no right to discriminate—no right to execute the laws he likes, and leave unexecuted those he dislikes. And of course you and I, his subordinates, can have no wider latitude of discretion than he has. Missouri is a State in the Union. The insurrectionary disorders in Missouri are but individual crimes, and do not change the legal *status* of the State, nor change its rights and obligations as a member of the Union.

"A refusal, by a ministerial officer, to execute any law which properly belongs to his office, is an official misdemeanor, of which I do not doubt the President would take notice."

At the extra session of Congress, a bill known as the Confiscation Act was passed, containing the following section:

And be it further enacted, That whenever hereafter, during the present insurrection against the Government of the United States, any person claimed to be held to labor or service under the law of any State shall be required or permitted by the person to whom such labor or service is claimed to be due, or by the lawful agent of such person, to take up arms against the United States, or shall be required or permitted by the person to whom such labor or service is claimed to be due, or his lawful agent, to work or to be employed in or upon any fort, navy yard, dock, armory, ship, intrenchment, or in any military or naval service whatsoever, against the Government and lawful authority of the United States, then, and in every such case, the person to whom such labor or service is claimed to be due shall forfeit his claim to such labor, any law of the State or of the United States to the contrary notwithstanding. And whenever thereafter the person claiming such labor or service shall seek to enforce his claim, it shall be a full and sufficient answer to such claim that the person whose service or labor is claimed had been employed in hostile service against the Government of the United States, contrary to the provisions of this act.

This was finally approved by the President on the 6th of August. On the 8th, the Secretary of War again writes to General Butler, giving very fully the views of the Government. The conclusion adopted was such as to convince citizens acknowledging the sovereignty of the United States Government that the principle laid down in the Constitution, that "private property shall not be taken for public uses without just compensation," was to be strictly observed, and the command to the troops against interference with the servants of peaceful citizens, "in house or field," was all

that could be claimed of a just Government called to cope with a great enemy.

The Secretary thus proceeds: "It is the desire of the President that all existing rights, in all the States, be fully respected and maintained. The war now prosecuted on the part of the Federal Government is a war for the Union, and for the preservation of all constitutional rights of States and the citizens of the States in the Union. Hence no question can arise as to fugitives from service within the States and Territories in which the authority of the Union is fully acknowledged. The ordinary forms of judicial proceeding, which must be respected by military and civil authorities alike, will suffice for the enforcement of all legal claims. But in States wholly or partially under insurrectionary control, where the laws of the United States are so far opposed and resisted that they cannot be effectually enforced, it is obvious that rights dependent on the execution of those laws must temporarily fail; and it is equally obvious that rights dependent on the laws of the States within which military operations are conducted, must be necessarily subordinated to the military exigencies created by the insurrection, if not wholly forfeited by the treasonable conduct of parties claiming them. To this general rule rights to services can form no exception.

"The act of Congress approved August 6th, 1861, declares that if persons held to service shall be employed in hostility to the United States, the right to their services shall be forfeited, and such persons shall be discharged therefrom. It follows of necessity that no claim can be recognized by the military authorities of the Union to the services of such persons when fugitives.

"A more difficult question is presented in respect to persons escaping from the service of loyal masters. It is quite apparent that the laws of the State, under which only the services of such fugitives can be claimed, must needs be wholly, or almost wholly suspended, as to remedies, by the insurrection and the military measures necessitated by it, and it is equally apparent that the substitution of military for judicial measures, for the enforcement of such claims, must be attended by great inconveniences, embarrassments, and injuries.

"Under these circumstances it seems quite clear that the substantial rights of loyal masters will be best protected by receiving such fugitives, as well as fugitives from disloyal masters, into the service of the United States, and employing them under such organizations and in such occupations as circumstances may suggest or require. Of course a record should be kept, showing the name and description of the fugitives, the name and the character, as loyal or disloyal, of the master, and such facts as may be necessary to a correct understanding of the circumstances of each case after tranquillity shall have been restored. Upon the return of peace, Congress will doubtless properly provide for all

the persons thus received into the service of the Union, and for just compensation to loyal masters. In this way only, it would seem, can the duty and safety of the Government and the just rights of all be fully reconciled and harmonized.

"You will therefore consider yourself as instructed to govern your future action, in respect to fugitives from service, by the principles herein stated, and will report from time to time, and at least twice in each month, your action in the premises to this Department. You will, however, neither authorize nor permit any interference, by the troops under your command, with the servants of peaceful citizens, in house or field, nor will you, in any way, encourage such servants to leave the lawful service of their masters; nor will you, except in cases where the public safety may seem to require it, prevent the voluntary return of any fugitive to the service from which he may have escaped."

It will be seen that these instructions are in harmony with the act of Congress above mentioned, and equally remote from emancipation by proclamation and heedless inaction in regard to such an important matter.

The leading principle of the instructions is that the existing war had no direct relation to slavery. It was a war for the restoration of the Union under the existing Constitution. National success would establish each State of the restored Union in full enjoyment of all those rights which it possessed prior to secession, except so far as they may have been inevitably damaged by it.

The whole subject of slavery in loyal States was to be left to the civil authorities. No action was contemplated in relation to it by military force or direction. No hindrance would be opposed to the exercise of the lawful authority of masters within or without the lines of the army.

In seceded States the military authorities were directed to refrain from all interference with servants lawfully employed in peaceful pursuits. But where servants were abandoned by their masters, or escape from them, the instructions did not allow the troops employed in suppressing the insurrection to be diverted from their legitimate duties for the purpose of determining claims to service, or of restoring slaves to masters. They simply directed that those who came within the lines and offered their services to the Government be received and employed, and that care be taken to preserve a record which would enable loyal masters, after the end of the war, to obtain indemnity from Congress for the loss of servants so received and employed.

Thus the rights of loyal masters were to be secured, and all interference with the internal institutions of a State avoided, as far as practicable; at the same time the Government would avail itself to a legitimate extent of the services of that portion of the servile population not otherwise lawfully employed. In using their

services, the Federal Government followed the example of the Confederate authorities. Slaves and free negroes were pressed into service, organized into squads and companies, and compelled to labor on fortifications and in other employments. It was further argued, that if the blacks who resorted to the lines of the army, were repelled, they would either organize themselves as irregular partisans, or become hostile, and be employed against the Federal troops. If they were received, and organized and employed during the war, they would be under control and discipline, and all excesses, and all violent interference with peaceful industry or existing institutions, could be restrained and prevented.

On the 16th of August, the Secretary of the Interior, Mr. Caleb Smith, in an address to the citizens of Providence, Rhode Island, at a social festival, thus declared what was the position of the Government: "The minds of the people of the South have been deceived by the artful representations of demagogues, who have assured them that the people of the North were determined to bring the power of this Government to bear upon them for the purpose of crushing out this institution of slavery. I ask you, is there any truth in this charge? Has the Government of the United States, in any single instance, by any one solitary act, interfered with the institutions of the South? No, not one. The theory of this Government is, that the States are sovereign within their proper sphere. The Government of the United States has no more right to interfere with the institution of slavery in South Carolina, than it has to interfere with the peculiar institution of Rhode Island, whose benefits I have enjoyed."

On the 31st of August, Major-General Fremont, commanding the Western Department, which embraced Missouri and the portion of Kentucky west of the Cumberland River, issued a proclamation, (*see MISSOURI*), of which the following are extracts:

Circumstances, in my judgment, of sufficient urgency, render it necessary that the Commanding General of this Department should assume the administrative powers of the State. * * * * *

In order, therefore, to suppress disorders, to maintain, as far as now practicable, the public peace, and to give security and protection to the persons and property of loyal citizens, I do hereby extend and declare established martial law throughout the State of Missouri. The lines of the army of occupation in this State are for the present declared to extend from Leavenworth, by way of the posts of Jefferson City, Rolla, and Ironton, to Cape Girardeau, on the Mississippi River.

All persons who shall be taken with arms in their hands within these lines shall be tried by court martial, and if found guilty, will be shot. The property, real and personal, of all persons in the State of Missouri who shall take up arms against the United States, or who shall be directly proven to have taken active part with their enemies in the field, is declared to be confiscated to the public use, and their slaves, if any they have, are hereby declared free men.

Emancipation of the slaves as proclaimed herein, attracted the immediate attention of the

Government. A correspondence ensued between the President and Gen. Fremont, which is explained in the following letter from the former to the latter :

WASHINGTON, D. C., *September 11, 1861.*

MAJOR-GENERAL JOHN C. FREMONT :

SIR : Yours of the 8th, in answer to mine of the 2d inst., was just received. Assured that you upon the ground could better judge of the necessities of your position than I could at this distance, on seeing your proclamation of August 30, I perceived no general objection to it; the particular clause, however, in relation to the confiscation of property and the liberation of slaves appeared to me to be objectionable in its non-conformity to the act of Congress, passed the 6th of last August, upon the same subjects, and hence I wrote you expressing my wish that that clause should be modified accordingly. Your answer just received expresses the preference on your part that I should make an open order for the modification, which I very cheerfully do. It is therefore ordered that the said clause of said proclamation be so modified, held and construed as to conform with, and not to transcend, the provisions on the same subject contained in the act of Congress entitled "An act to confiscate property used for insurrectionary purposes," approved August 6, 1861, and the said act be published at length with this order. Your obedient servant, A. LINCOLN.

The views of the Government were still further enforced by a letter of instructions from the Secretary of War to General T. W. Sherman, commanding the expedition against Port Royal, South Carolina. This letter is dated October 14th, and thus proceeds :

"In conducting military operations within States declared by the proclamation of the President to be in a state of insurrection, you will govern yourself, so far as persons held to service under the laws of such States are concerned, by the principles of the letters addressed by me to Major-General Butler on the 30th of May and the 8th of August, copies of which are herewith furnished to you. As special directions, adapted to special circumstances, cannot be given, much must be referred to your own discretion, as Commanding General of the expedition. You will, however, in general avail yourself of any persons, whether fugitives from labor or not, who may offer themselves to the National Government; you will employ such persons in such services as they may be fitted for, either as ordinary employees, or, if special circumstances seem to require it, in any other capacity, with such organization, in squads, companies, or otherwise, as you may deem most beneficial to the service. This, however, not to mean a general arming of them for military service. You will assure all loyal masters that Congress will provide just compensation to them for the loss of the services of the persons so employed. It is believed that the course thus indicated will best secure the substantial rights of loyal masters, and the benefits to the United States of the services of all disposed to support the Government, while it avoids all interference with the social systems of local institutions of every State, beyond that which insurrection makes unavoidable, and which a restoration of peaceful relations to the Union,

under the Constitution, will immediately remove."

In a proclamation to the inhabitants of South Carolina, issued on the 8th of November, after landing his force at Port Royal, the General thus described his purpose so far as related to the slaves : "We have come among you with no feelings of personal animosity, no desire to harm your citizens, destroy your property, or interfere with any of your lawful laws, rights, or your social and local institutions, beyond what the causes herein briefly alluded to may render unavoidable."

Again he says : "We have come among you as loyal men, fully impressed with our constitutional obligations to the citizens of your State. Those obligations shall be performed as far as in our power; but be not deceived: the obligation of suppressing armed combinations against the constitutional authorities, is paramount to all others. If, in the performance of this duty, other minor but important obligations should be in any way neglected, it must be attributed to the necessities of the case, because rights dependent on the laws of the State must be necessarily subordinate to military exigencies created by insurrection and rebellion."

Again, on the 17th of November, the General commanding at Baltimore, John A. Dix, being about to send a force into the counties of Accomac and Northampton, Virginia, issued a proclamation to the inhabitants, in which he thus states the instructions to the troops : "Special directions have been given not to interfere with the condition of any persons held to domestic service, and in order that there may be no ground for mistake or pretext for misrepresentation, commanders of regiments and corps have been instructed not to permit any such persons to come within their lines."

In the Western Department of the army, after the retirement of Gen. Fremont, an order was issued by the commanding officer, General Halleck, prohibiting fugitives from entering the lines of the camps of the army. This order was strictly enforced.

The views expressed in the letter of the President to Gen. Fremont, in the letters of the Secretary of War, and in the proclamations of the Generals, must be regarded as explaining the position of the Government relative to this class of persons held to service or labor. This position was based upon the section of the Confiscation Act of Congress, passed August 6th. Although called a "Confiscation Act," it certainly has not that effect on slaves. Confiscation is the forfeiture of property for the benefit of the public treasury. But no such intention is disclosed in this act. The slave is described in constitutional language as "a person claimed to be held to labor or service under the law of any State"; and it is declared that when he is permitted, by the person making this claim, to be employed in any military or naval service, the claim shall be forfeited. The claim is not forfeited to the Government, nor does it pass

over to any other person: but the fact of this prohibited employment is made "a full and sufficient answer to such claim." The operation of the statute seems to have been intended to be somewhat analogous to that of the statute of limitation, which does not destroy the debt, but takes away the action for its recovery. The act of Congress simply provides an effectual bar to any action on the claim of labor or service. It recognizes and acts upon that claim alone; it does not pretend to act upon the status of the individual, nor admit that there is any such peculiar status, aside from the immediate result of the claim. It cuts off the means of enforcing the claim, only when the person against whom it is made has been employed in hostile service; and it even seems to be the intention of the act that its operation shall be confined to those "required or permitted" by the claimants to render hostile service—not extending to such as may be impressed by the Confederate Government in opposition to the will of the claimants. (*See DIPLOMATIC CORRESPONDENCE OF THE CONFEDERATE STATES—Letter of the Southern Commissioners to Lord John Russell, dated August 14.*)

Many plans were suggested for the adoption of the Government on this subject, all looking more or less directly to emancipation. The boldest and most startling was that which recommended the arming of the slaves. In a public address made to the regiment of First United States Chasseurs, by its colonel, Cochran, he argued the necessity of turning against the enemy their own weapons, and inquired "if the Government should hesitate to use against the rebels their own guns, and the munitions that it might find in such of their arsenals and magazines as might fall into our possession?" If it were an unquestionable right to do this, why should it not seize any of their property which they had used against us, and in turn apply it to their own destruction? He believed that the slaves, of whose labors the South had without scruple availed itself, should be made useful by the Government in its effort to put "down a causeless rebellion against its just authority. He was in favor of the extremest measures against the rebels, even to their absolute ruin, so that the National Government should be preserved, and afford its blessings to generations yet to come."

The Secretary of War, Mr. Cameron, being present, made a few remarks. He heartily approved every sentiment that had been uttered. They were sentiments which would not only lead our soldiers to victory, but which in the end would reconstruct our Constitution. "It was idle to talk of treating with the rebels upon their own terms. They must be met as enemies, and treated and punished as such, until they should learn to demean themselves as true and loyal citizens. Every means which God has placed in our hands, he said, it was our duty to use for the purpose of protecting ourselves." This proposition met with only a faint

response among the people, they being at this time unwilling to adopt extreme measures.

The final disposition of the negroes driven by the state of affairs at the South into the Federal lines, and temporarily employed in their operations, will remain for future determination, according to the different aspects of the question presented in the cases of slaves belonging to loyal and disloyal masters. Colonization was suggested by the President in his Message at the second session of the Thirty-seventh Congress. (*See PUBLIC DOCUMENTS.*) An emigration to Hayti, or some other inter-tropical region, might so provide for the cases of both, that all injurious influences from their emancipation would be avoided, while loyal masters could be fully indemnified.

On the occupation of Beaufort, in South Carolina, and the adjoining country, by the Federal force under command of General Sherman, the Secretary of the Treasury issued the following orders respecting the disposal of cotton and other property captured, and also the services of the slaves:

TREASURY DEPARTMENT, *Saturday, Nov. 30, 1861.*

In order to the security and proper disposition of the productions of the soil, and all other property found within the limits of States, or parts of States, declared to be in insurrection against the United States, and now occupied, or to be hereafter occupied, by the troops and authority of the Union, the following regulations are established:

There shall be appointed by the Secretary of the Treasury, with the approbation of the President, agents to reside at such points or places as are, or may be, occupied by the forces of the United States, whose duties shall be to secure and prepare for market the cotton and such other products and property as may be found or brought within the lines of the army, or under the control of the Federal authorities.

To enable such agents to fulfil the duties devolved upon them, the military and naval authorities, under proper instructions, will render such military protection and aid as may be required to carry out the intentions of this Department.

Persons held to service for life under State laws who may be found within such limits, may be employed by the agent, who will prepare lists embracing the names, sex, and condition of such persons, and as near as may be, their respective ages, together with the name of any person claiming their services; which lists shall be in triplicate, one for the military commandant, one for the files of the agent, and one to be immediately forwarded to the Secretary of the Treasury.

The persons so listed will be organized for systematic labor in securing and preparing for market the cotton, rice, and other products found within the territory brought under Federal control. Pay rolls will be prepared, and a strict account of the labor daily performed by each person entered thereon, for which a proper compensation shall be allowed and paid to the laborers. The amount of such compensation will be fixed, in proportion to the service rendered, by the agent and approved by the military commandant by the Secretary of the Treasury.

An inventory of all horses, mules, and other stock, vehicles of transportation, and other property, will be carefully made, and a copy transmitted to the Secretary of the Treasury, signed by such agent.

A record of all products taken possession of will be made, and those of each plantation kept distinct. When prepared for shipment, the packages from the several plantations will be plainly marked and numbered, so as to be easily distinguished.

An account of all provisions of whatsoever character found on each plantation will be taken, and such provisions will be used, so far as may be necessary, for the sustenance of the laborers thereon. Any deficiencies of subsistence will be supplied by the United States commissary, upon the requisition of the agent, to whom they will be charged, and for which he will account.

The cotton and other articles, when prepared for market, shall be shipped to New York, and, so far as practicable, by the returning Government transports; and all shipments shall be consigned to the designated agent at New York, unless otherwise specially directed by the Secretary of the Treasury.

A carefully detailed account will be kept by the agent of all supplies furnished by the Government, and of all expenditures made.

Each agent will transmit a weekly report of his proceedings to the Secretary of the Treasury, and render his accounts in duplicate monthly for settlement.

All requisitions, bills of lading, and invoices will be countersigned by the military commander or by such officer as he may designate for the purpose.

Each agent will so transact his business, and keep his accounts that as little injury as possible may accrue to private citizens who now maintain or may within reasonable time resume the character of loyal citizens of the United States.

S. P. CHASE, Secretary of the Treasury.

The following instructions to the Commander-in-Chief, Gen. McClellan, relative to the treatment of fugitive slaves coming within the lines of the army of the Potomac, were issued:

DEPARTMENT OF STATE, }
WASHINGTON, December 4, 1861. }

To Major-General Geo. B. McClellan, Washington:

GENERAL: I am directed by the President to call your attention to the following subject:

Persons claimed to be held to service or labor under the laws of the State of Virginia, and actually employed in hostile service against the Government of the United States, frequently escape from the lines of the enemy's forces, and are received within the lines of the army of the Potomac.

This Department understands that such persons afterwards coming into the city of Washington are liable to be arrested by the city police, upon the presumption, arising from color, that they are fugitives from service or labor.

By the 4th section of the act of Congress, approved August 6, 1861, entitled "An Act to confiscate property used for insurrectionary purposes," such hostile employment is made a full and sufficient answer to any further claim to service or labor. Persons thus employed and escaping are received into the military protection of the United States, and their arrest as fugitives from service or labor should be immediately followed by the military arrest of the parties making the seizure.

Copies of this communication will be sent to the Mayor of the city of Washington, and to the Marshal of the District of Columbia, that any collision between the civil and military authorities may be avoided.

I am, General, your very obedient,

WILLIAM H. SEWARD.

SOUTH CAROLINA, one of the original States of the Union, is bounded on the north and northeast by North Carolina, southeast by the Atlantic Ocean, and southwest by Georgia, from which it is separated by the Savannah River. Its area is 30,213 square miles. Population in 1860, 703,812, of whom 301,271 were free, and 402,541 were slaves. The population on which the State would be entitled to send

representatives to the Federal Congress is 542,795. The value of real and personal property in the State by the census of 1860 is \$548,138,774. The assessed value of the real estate is \$129,772,684. The Governor, Lieutenant-Governor, and presidential electors are chosen by the Legislature. The Senate consists of 45 members, chosen by the people for four years, and the House of Representatives, of 124 members, chosen in the same manner for two years. The Constitution of the State was framed in 1790. (*See NEW AMERICAN CYCLOPEDIA*.)

The Legislature of the State duly assembled on the 4th of November, 1860, and having chosen the presidential electors, adjourned.

The political views of South Carolina have always been openly and plainly declared by her public men. In the year 1850 it was proposed to convene a "Southern Congress" for the initiation of measures looking to the defence of the South. The subject was brought up in the Legislature of the State, and the debate shows the spirit which then prevailed in that body.

Mr. W. S. Lyles said he would not recapitulate the series of wrongs inflicted upon South Carolina, and the only question which he would consider was the remedy. The remedy is the union of the South and the formation of a Southern Confederacy. The friends of the Southern movement in the other States look to the action of South Carolina; and he would make the issue in a reasonable time, and the only way to do so was by secession. There would be no concert among the Southern States until a blow was struck.

Mr. Sullivan proceeded to discuss the sovereignty of the States and the right of secession, and denied the right or the power of the General Government to coerce the State in case of secession. He thought there "never would be a union of the South until this State strikes the blow and makes the issue."

Mr. F. D. Richardson would not recapitulate the evils which had been perpetrated upon the South. Great as they have been, they are comparatively unimportant when compared with the evils to which they would inevitably lead. "We must not consider what we have borne, but what we must bear hereafter. There is no remedy for these evils in the Government; we have no alternative left us, then, but to come out of the Government."

Mr. Preston said he was opposed to calling a convention, because he thought it would impede the action of the State on the questions now before the country. He thought it would impede progress towards disunion. All his objections to a convention of the people applied only to the proposition to call it now. He thought conventions dangerous things, except when the necessities of the country absolutely demand them. He said he had adopted the course he had taken on these weighty matters simply and entirely with the view of hastening the dissolution of this Union.

Mr. Keitt said he would sustain the bill for electing delegates to a Southern Congress, because he thought "it would bring about a more speedy dissolution of the Union."

Such were the sentiments existing in the State in 1850. But the passage by Congress during that year of the so-called "compromise measures" appeared to be satisfactory to the South, and disunion views ceased to be advocated.

The last election for President was held on the 6th of November, 1860. On that day the vote of the State was given by the Legislature to John C. Breckinridge for President. On the next day the Legislature, being in session, the subject of withdrawal from the United States was taken up, and an act passed calling a State Convention to meet at Columbia on the 17th of December. Other measures were then introduced and adopted, the object of which was to place the State in a suitable position to meet the crisis about to be inaugurated. The Governor, Gist, in his Message at the commencement of the session, had called attention to the subject of a direct trade with Europe, the postal service of South Carolina as an independent State, slaves from Border States, an armory, the expected aid from other States, arming the State, &c. On the right of secession he expressed these views:

"It is true, no provision is made in the Constitution for dissolving the Union, and it is very probable that the patriots who framed the instrument had no idea that a loathsome fanaticism, pandered to by Northern politicians, would ever make it necessary for the safety of the South that they should dissolve the compact on account of its violation by the other section of the Confederacy; but it must be remembered as a rule of universal application, that a violation of a compact or agreement by one party, releases the other party from its binding obligation, and the only question is, who is to judge of the infraction?"

"The simple statement of the case is this: Each State entered the Union under the Constitution; the Federal Government is the agent of the States, created for special purposes, and circumscribed in its action by the articles of agreement, or, in other words, the Constitution. Whenever the States, having power to control this agent, permit or command him to violate the compact, each State, not having surrendered its sovereignty, has a right to remonstrate or withdraw, as she may think proper, and no earthly power has a right to prevent her."

The military bill was the most important measure adopted at this time. It provided for maintaining an army of ten thousand men. There were in the State three hundred and eighty-two companies of infantry, fifty of cavalry, eighteen of artillery, and sixty-two rifle companies, being fifty-six regiments.

On the 10th of December Francis W. Pickens was chosen Governor of the State by the

Legislature. Gov. Gist, previous to his retirement, sent a farewell Message to the Legislature, in which he thus spoke of the progress of events:

"We have progressed thus far with firm and even tread, with calmness and deliberation, but with a constancy of purpose not to be shaken by any danger or suffering. A single pause, or the least vacillation, and all will be lost. However anxious we may be for coöperation, however certain we may be of obtaining it, let us first move ourselves as the best means of effecting that object, and, having forever closed the door from which we have passed out of the Union, so that no insidious device of the enemy, or false promises, or pretended friends can avail to open it. Then, and not till then, may we with safety seek coöperation and unity with other States who have assumed their sovereignty, and are prepared to form a more perfect union, and share with us a common destiny. Every sentinel should remain at his post, and not relax a fibre until the great work is completed, the great battle fought, and the glorious victory achieved.

"The delay of the convention for a single week to pass the ordinance of secession will have a blighting and chilling influence upon the action of the other Southern States. The opponents of the movement everywhere will be encouraged to make another effort to rally their now disorganized and scattered forces to defeat our action and stay our onward march. Fabius conquered by delay, and there are those of his school, though with a more unworthy purpose, who, shrinking from open and manly attack, use this veil to hide their deformity, and from a masked battery to discharge their missiles. But I trust they will strike the armor of truth, and fall harmless at our feet, and that by the 28th of December no flag but the Palmetto will float over any part of South Carolina."

Governor Pickens was inaugurated immediately after his election. He improved the occasion to declare the cause of the movement on the part of South Carolina to separate from the Union. In his view it was as follows:

"For seventy-three years this State has been connected by a Federal compact with co-States, under a bond of union for great national objects common to all. In recent years there has been a powerful party, organized upon principles of ambition and fanaticism, whose undisguised purpose is to divert the Federal Government from external and turn its power upon the internal interests and domestic institutions of these States. They have thus combined a party exclusively in the Northern States, whose avowed objects not only endanger the peace, but the very existence of nearly one-half of the States of this Confederacy. And in the recent election for President and Vice-President of these States, they have carried the election upon principles that make it no longer safe for us to rely upon the powers of the Federal Gov-

ernment or the guarantees of the Federal compact. This is the great overt act of the people in the Northern States at the ballot-box, in the exercise of their sovereign power at the polls, from which there is no higher appeal recognized under our system of Government in its ordinary and habitual operations. They thus propose to inaugurate a Chief Magistrate, at the head of the army and navy, with vast powers, not to preside over the common interests and destinies of all the States alike, but upon issues of malignant hostility and uncompromising war to be waged upon the rights, the interests, and the peace of half the States of this Union.

"In the Southern States there are two entirely distinct and separate races, and one has been held in subjection to the other by peaceful inheritance from worthy and patriotic ancestors, and all who know the races well know that it is the only form of government that can preserve both, and administer the blessings of civilization with order and in harmony. Any thing tending to change and weaken the government and the subordination between the races, not only endangers the peace, but the very existence of our society itself. We have for years warned the Northern people of the dangers they were producing by their wanton and lawless course. We have often appealed to our sister States of the South to act with us in concert upon some firm and moderate system by which we might be able to save the Federal Constitution, and yet feel safe under the general compact of Union; but we could obtain no fair warning from the North, nor could we see any concerted plan proposed by any of our co-States of the South calculated to make us feel safe and secure.

"Under all these circumstances we now have no alternative left but to interpose our sovereign power as an independent State to protect the rights and ancient privileges of the people of South Carolina. This State was one of the original parties to the Federal compact of union. We agreed to it, as a State, under peculiar circumstances, when we were surrounded with great external pressure, for purposes of national protection, and to advance the interests and general welfare of all the States equally and alike. And when it ceases to do this, it is no longer a perpetual Union. It would be an absurdity to suppose it was a perpetual Union for our ruin."

After a few days the Legislature took a recess until the 17th of December, the day on which the State Convention was to assemble. Preparations for the Convention were commenced immediately after the bill was passed by the Legislature. Candidates for membership were immediately nominated. All were in favor of secession, and the only important distinction to be seen among them consisted in the personal character of individuals. Those who were known to be men of moderate and conservative views were generally successful over individuals of a radical and ultra stamp.

The Convention assembled in the Baptist church at Columbia, the capital of the State, at noon, on the 17th of December. Unlike the conventions of the other States, its sessions were at first held with open doors, and its proceedings published to the country. When the Convention was called to order, David F. Jamison was requested to act as president *pro tem*. Upon taking the chair, he made a brief address, in which he said:

"If any thing has been decided by the late election, it is that South Carolina must be taken out of this Confederation in as speedy a manner as possible. I trust that no outside pressure, no guarantees from abroad, will drive us from our purpose; for, gentlemen, there are two dangers which we are to avoid—overtures from abroad and disputations from within. I trust that the door now is forever closed from any further connection with our Northern Confederacy. What guarantees can they offer us more binding, more solemn, and with a higher sanction, than the present written compact between us? Has that sacred instrument protected us from the jealousy and aggressions of the Northern people, which commenced forty years ago, and which ended in the Missouri Compromise? Has it protected us from the cupidity and avarice of the Northern people, who for thirty-five years have imposed the burden of sustaining this Government chiefly upon the South? Has it saved us from abolition petitions, intended to annoy and insult us, on the very floors of Congress? Has not that instrument been trodden under their very feet by every Northern State, by placing on their books statutes nullifying the laws for the recovery of fugitive slaves? I trust, gentlemen, we will put no faith in paper guarantees. They are worthless, unless written in the hearts of the people. As there is no common bond between us, all attempts to continue us united will only prove futile to the least and smallest section of the country. Our greatest danger is from any division within our border. In inaugurating a great event like this, I trust we will go onward, and not be diverted from our purpose by any dictates from without, but to do what we are sent to do. I can at this time offer you nothing better in inaugurating such a movement than the counsel of him who inaugurated the French Revolution—to dare, and again to dare, and without end to dare."

It was next proposed that a list of the members should be made, and that each one should present his credentials and be sworn in. To this proposition Mr. Adams replied:

"Mr. President, I do not see how we can consistently do that, as a clause of the Constitution of South Carolina makes provision that we shall take an oath to support the Constitution of the United States. We come here to break down a Government, and not to take an oath to support it."

The names were called, but an oath was not administered to the delegates. For president

of the Convention, on the fourth ballot, David F. Jamison received 118 votes, J. L. Orr 30, and James Chesnut, jr., 3. Mr. Jamison was elected.

A motion was next made that the Convention adjourn, to meet in Charleston on the afternoon of the next day, owing to the prevalence of small-pox in Columbia. This motion was opposed by W. Porcher Miles, who said:

"We would be sneered at. It would be asked on all sides, Is this the chivalry of South Carolina? They are prepared to face the world, but they run away from the small-pox. Sir, if every day my prospects of life were diminished by my being here, and if I felt the certain conviction that I must take this disease, I would do so, and die, if necessary. I am just from Washington, where I have been in constant, close, continual conference with our friends. Their unanimous, urgent request to us is, not to delay at all. The last thing urged on me, by our friends from Georgia, Mississippi, Florida, North Carolina, Alabama, Texas, and Louisiana, and every State that is with us in this great movement, was, take out South Carolina the instant you can. Now, sir, when the news reaches Washington that we met here, that a panic arose about a few cases of small-pox in the city, and that we forthwith scampered off to Charleston, the effect would be a little ludicrous, if I might be excused for that expression."

The motion was adopted, and the Convention assembled on the next day at Charleston.

The following committee was then appointed to draft an ordinance of secession: Messrs. Inglis, Rhett, sen., Chesnut, Orr, Maxcy Gregg, B. F. Dunkin, and Hutson, and another committee, as follows, to prepare an address to the people of the Southern States, viz.: Messrs. Rhett, sen., Calhoun, Finley, J. D. Wilson, W. F. De Saussure, Cheves, and Carn.

The following committees were also appointed, each to consist of thirteen members:

A Committee on Relations with the Slaveholding States of North America; a Committee on Foreign Relations; a Committee on Commercial Relations and Postal Arrangements; and a Committee on the Constitution of the State.

On the same day Mr. Magrath, of Charleston, offered the following resolution:

Resolved, That so much of the Message of the President of the United States as relates to what he designates "the property of the United States in South Carolina," be referred to a committee of thirteen, to report of what such property consists, how acquired, and whether the purpose for which it was so acquired can be enjoyed by the United States after the State of South Carolina shall have seceded, consistently with the dignity and safety of the State. And that said committee further report the value of the property of the United States not in South Carolina; and the value of the share thereof to which South Carolina would be entitled upon an equitable division thereof among the United States.

Upon offering the resolution, he said:

"As I understand the Message of the Presi-

dent of the United States, he affirms it as his right and constituted duty and high obligation to protect the property of the United States within the limits of South Carolina, and to enforce the laws of the Union within the limits of South Carolina. He says he has no constitutional power to coerce South Carolina, while, at the same time, he denies to her the right of secession. It may be, and I apprehend it will be, Mr. President, that the attempt to coerce South Carolina will be made under the pretence of protecting the property of the United States within the limits of South Carolina. I am disposed, therefore, at the very threshold, to test the accuracy of this logic, and test the conclusions of the President of the United States. There never has been a day—no, not one hour—in which the right of property within the limits of South Carolina, whether it belongs to individuals, corporations, political community, or nation, has not been as safe under the Constitution and laws of South Carolina as when that right is claimed by one of our own citizens; and if there be property of the United States within the limits of South Carolina, that property, consistently with the dignity and honor of the State, can, after the secession of South Carolina, receive only that protection which it received before."

Mr. Miles, who had just returned from Washington, stated the position of affairs to be as follows:

"I will confine myself simply to the matter of the forts in the harbor of Charleston, and I will state what I conceive to be the real condition of things. I have not the remotest idea that the President of the United States will send any reinforcement whatsoever into these forts. I desire no concealment—there should be no concealment—but perfect frankness. I will state here that I, with some of my colleagues, in a conversation with the President of the United States, and subsequently in a written communication, to which our names were signed, after speaking of the great excitement about the forts, said thus to him:

Mr. President, it is our solemn conviction that, if you attempt to send a solitary soldier to these forts, the instant the intelligence reaches our people, (and we shall take care that it does reach them, for we have sources of information in Washington, so that no orders for troops can be issued without our getting information,) these forts will be forcibly and immediately stormed.

"We all assured him that, if an attempt was made to transport reinforcements, our people would take these forts, and that we would go home and help them to do it; for it would be suicidal folly for us to allow the forts to be manned. And we further said to him that a bloody result would follow the sending of troops to those forts, and that we did not believe that the authorities of South Carolina would do any thing prior to the meeting of this convention, and that we hoped and believed that nothing would be done after this body met until we had demanded of the General Govern-

ment the recession of these forts. This was the substance of what we said. Now, sir, it is my most solemn conviction that there is no attempt going to be made to reenforce these forts."

Resolutions were offered and referred, which proposed a provisional government for the Southern States on the basis of the Constitution of the United States; also to send commissioners to Washington to negotiate for the cession of Federal property within the State, &c.; also, the election of five persons to meet delegates from other States for the purpose of forming a Confederacy, &c.

On the 20th the committee appointed to draft an ordinance of secession made the following report:

The committee appointed to prepare the draught of an Ordinance proper to be adopted by the Convention in order to effect the secession of South Carolina from the Federal Union respectfully report:

That they have had the matter referred to under consideration, and believing that they would best meet the exigencies of the great occasion, and the just expectations of the Convention by presenting in the fewest and simplest words possible to be used, consistent with perspicuity and all that is necessary to effect the end proposed and no more, and so excluding every thing which, however proper in itself for the action of the Convention, is not a necessary part of the great solemn act of secession, and may at least be effected by a distinct ordinance or resolution, they submit for the consideration of the Convention the following proposed draught:

An Ordinance to dissolve the Union between the State of South Carolina and other States united with her under the compact entitled "The Constitution of the United States of America."

We, the people of the State of South Carolina, in Convention assembled, do declare and ordain, and it is hereby declared and ordained, that the ordinance adopted by us in Convention on the twenty-third day of May, in the year of our Lord one thousand seven hundred and eighty-eight, whereby the Constitution of the United States was ratified, and also all acts and parts of acts of the General Assembly of the State ratifying amendments of the said Constitution, are hereby repealed, and the Union now subsisting between South Carolina and other States, under the name of "The United States of America," is hereby dissolved.

The ordinance was then taken up and immediately passed by the unanimous vote of the convention.

After the passage of the ordinance of secession, the following ordinance was offered, in order to preserve the order of affairs under the altered political relations of the State:

Be it ordained by the People of South Carolina, by their Delegates in Convention assembled, That, until otherwise provided by the Legislature, the Governor shall be authorized to appoint collectors and other officers connected with the customs, for the ports within the State of South Carolina, and also all the postmasters within the said State; and that until such appointments shall have been made, the persons now charged with the duties of the said several offices shall continue to discharge the same, keeping an account of what moneys are received and disbursed by them respectively.

The debate which followed on this ordinance showed very distinctly that, however unanimous the convention was relative to the passage of the ordinance to secede, there still existed a

great difference of opinion among the members as to its legal force and effect.

Judge Magrath, of Charleston, said: "I think the special matter of this ordinance should be immediately considered. To my understanding there is no collector of the port nor postmaster now within the limits of South Carolina. What you have done to-day has extinguished the authority of every man in South Carolina deriving his authority from the General Government. I am in favor of this body making such provisional arrangements as may be necessary in the interval which may exist between this moment and the time the Legislature may act. I am not, however, to be implicated as sanctioning the idea that there is no lawful authority within the limits of the State except the General Government."

Mr. Gregg: "After South Carolina has abrogated the Constitution of the United States, are the laws still in force? I think not. All the laws of Congress fall instantly to the ground on the passage of the act of secession."

Mr. Cheves: "An immense chasm has been made in law. It is necessary that, to avoid inconvenience to the people, we must make temporary arrangements to carry on the Government."

Mr. Gregg: "There is now no law on the subject of the collection of duties in South Carolina, now that we have accomplished the work of forty years."

Mr. Hayne: "The Congress of the United States is no longer our Government. It will be for our Legislature to say what laws of the United States shall be continued, and what not. The simple act of secession does not abrogate all laws. We have a great many laws on the statute-books which were passed by the Governor and privy council."

Mr. Gregg: "The congressional laws for the collection of the revenue are for the support of the Federal Government at Washington. All the post-office laws fall on our dissolution from that Government."

Mr. Miles: "We have now to deal with stern facts and realities. We must prevent confusion and anarchy in the derangement of our Government affairs. Things must for the present remain in *statu quo*, or confusion will arise."

Mr. Chesnut: "Two questions are involved: power and duty. We must prevent our people not only from inconveniences, but from a chaotic condition. We must revivify such laws as are best adapted to preserve us from calamities. As to our duty, will you turn the ship of State adrift? What becomes of her officers?"

Mr. Masyck: "There is no duty collector now for the ports. So, too, with the post-office. All are swept off by this act. My opinion is that the present system of postal arrangement is a nuisance. The public would be better served by private parties between the cities—like the system in Philadelphia and New York. Have a postage of one cent instead of three

cents, and to less important places make it ten cents or more."

Mr. Calhoun: "We have pulled the temple down that has been built for three-quarters of a century. We must now clear the rubbish away and reconstruct another. We are now houseless and homeless. We must secure ourselves from storms."

Mr. Dunkin: "If that ordinance of secession be passed, things will still go on in the custom-house and post-office exactly as now until other arrangements are made by this convention. There is nothing in the ordinance to affect the dignity, honor, or welfare of the State of South Carolina. We must keep the wheels of Government going. The Constitution of the United States is not entirely abrogated by the ordinance. What is the legal tender for the payment of debts? Is it not the gold and silver of the United States?"

Mr. Carrel said the present officers of revenue would be continued till an act of the Legislature authorized otherwise.

Mr. Brown: "There is no longer any communication with the Government from which we are just separated."

Mr. Duncan: "The spirit of the ordinance is temporarily suspended till we treat with the General Government."

Mr. Gregg: "The President of the United States has thrown down the gauntlet in his Message. He has said it is his duty to collect the revenue, and that he will do it. On one side the Federal Government claims the right and declares its intention to execute the power of collecting the revenue in our ports. On the other side, we have declared that we are free. I desire no compromise. It is necessary, I maintain, that from fifteen to thirty per cent. of duties imposed by a Congress of the United States should continue to be levied; otherwise our people will suffer terrible calamity. As to the carrying of the mails, let the present contract be assumed by South Carolina instead of the United States."

Mr. Rhett: "This great revolution must go on with as little change as possible to the country. By making the Federal agents ours, the machinery will move on. The Federal laws of taxation must not exist over us. We are now contending for the great principle of taxation. I trust the present system of taxation has fallen forever."

Mr. Barnwell: "We have seceded from the United States and established our independence. We can't allow the United States to exercise authority over us any more. Let the postal convenience be sacrificed if necessary. There never was any thing purchased worth having, unless at the cost of sacrifice."

Mr. Maszyck: "In regard to the mail, all restrictions must be removed. Let us appoint our own officers. Let the collector of the port battle with the difficulties as they come."

The Convention adjourned to meet at Institute Hall, and in the presence of the Governor,

and both branches of the State Legislature, to sign the ordinance of secession.

At the close of the ceremonies the president of the Convention announced the secession of the State in these words: "The ordinance of secession has been signed and ratified, and I proclaim the State of South Carolina an independent Commonwealth." The ratified ordinance was then given to the Secretary of State to be preserved among its archives, and the assembly dissolved.

On the 21st the committee to prepare an address to the Southern States made a report, reviewing the injuries to South Carolina arising from her connection with the Federal Union. An ordinance was then adopted which prescribed the following oath, to be taken by all persons elected and appointed to any office.

"I do solemnly swear, (or affirm,) that I will be faithful and true allegiance bear to the Constitution of the State of South Carolina, so long as I may continue a citizen of the same, and that I am duly qualified under the laws of South Carolina, and will discharge the duties thereof to the best of my ability, and will preserve, protect, and defend the Constitution of this State. So help me God."

In secret session, Messrs. Robert W. Barnwell, J. H. Adams, and James L. Orr were appointed commissioners to proceed to Washington, to treat for the delivery of the forts, magazines, light-houses, &c., within the limits of the State, also the apportionment of the public debts and a division of all other property held by the Government of the United States, as agent of the confederation of States, of which South Carolina was recently a member, and to negotiate all other arrangements proper to be adopted in the existing relations of the parties.

Mr. Memminger, then, from the special committee appointed to draught a "Declaration of the causes which justify the secession of South Carolina from the Federal Union," submitted a paper bearing this title, which was read to the Convention.

This paper commences by briefly referring to a portion of colonial history, the separation of the colonies from Great Britain, their organization into sovereign States, the adoption of the Federal Constitution, its ratification by the different States, including South Carolina, and then proceeds to declare the causes which have impelled South Carolina "to resume her separate and equal place among nations."

These causes are thus stated:

We hold that the Government thus established is subject to the two principles asserted in the Declaration of Independence; and we hold further that the mode of its formation subjects it to a third fundamental principle, namely, the law of compact. We maintain that in every compact between two or more parties the obligation is mutual; that the failure of one of the contracting parties to perform a material part of the agreement entirely releases the other, and that where no arbiter is provided, each party is remitted to his own judgment to determine the fact of failure, with all its consequences. In the present case that fact is established with certainty.

We assert that fifteen of the States have deliberately refused for years past to fulfil their constitutional obligations, and we refer to their own statutes for the proof. The Constitution of the United States, in its fourth article, provides as follows:

No person held to labor or service in one State, under the laws thereof, escaping into another, shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

This stipulation was so material to the compact that without it that compact would not have been made. The greater number of the contracting parties held slaves, and the State of Virginia had previously declared her estimate of its value by making it the condition of her cession of the territory which now composes the States north of the Ohio River. The same article of the Constitution stipulates also for rendition by the several States of fugitives from justice from the other States.

The General Government, as the common agent, passed laws to carry into effect these stipulations of the States. For many years these laws were executed. But an increasing hostility on the part of the Northern States to the institution of slavery has led to a disregard of their obligations, and the laws of the General Government have ceased to effect the objects of the Constitution. The States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, Illinois, Indiana,* Ohio, Michigan, Wisconsin, and Iowa have enacted laws which either nullify the acts of Congress, or render useless any attempt to execute them. In many of these States the fugitive is discharged from the service or labor claimed, and in none of them has the State government complied with the stipulation made in the Constitution. The State of New Jersey, at an early day, passed a law for the rendition of fugitive slaves in conformity with her constitutional undertaking, but the current of anti-slavery feeling has led her more recently to enact laws which render inoperative the remedies provided by her own law and by the laws of Congress. In the State of New York even the right of transit for a slave has been denied by her tribunals; and the States of Ohio and Iowa have refused to surrender to justice fugitives charged with murder and with inciting servile insurrection in the State of Virginia. Thus the constitutional compact has been deliberately broken and disregarded by the non-slaveholding States, and the consequence follows that South Carolina is released from its obligation.

The ends for which the Constitution was framed are declared by itself to be "to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defence, promote the common welfare, and secure the blessings of liberty to ourselves and our posterity." These ends it endeavored to accomplish by a Federal Government, in which each State was recognized as an equal, and had separate control over its own institutions. The right of property in slaves was recognized by giving to free persons distinct political rights; by giving them the right to represent, and burdening them with direct taxes for three-fifths of their slaves; by authorizing the importation of slaves for twenty years, and by stipulating for the rendition of fugitives from labor. We affirm that these ends for which this Government was instituted have been defeated, and the Government itself has been made destructive of them by the action of the non-slaveholding States. Those States have assumed the right of deciding upon the propriety of our domestic institutions; and have denied the rights of property established in fifteen of the States and recognized by the Constitution; they have denounced as sinful the institution of slavery; they have permitted the open establishment among them of societies whose avowed object is to disturb the peace and to eloin the property

of the citizens of other States. They have encouraged and assisted thousands of our slaves to leave their homes; and those who remain have been incited by emissaries, books, and pictures to servile insurrection.

For twenty-five years this agitation has been steadily increasing, until it has now secured to its aid the power of a common Government. Observing the *forms* of the Constitution, a sectional party has found within that article establishing the Executive Department the means of subverting the Constitution itself. A geographical line has been drawn across the Union, and all the States north of that line have united in the election of a man to the high office of President of the United States whose opinions and purposes are hostile to slavery. He is to be entrusted with the administration of the common Government, because he has declared that that "Government cannot endure permanently half slave, half free," and that the public mind must rest in the belief that slavery is in the course of ultimate extinction. This sectional combination for the subversion of the Constitution has been aided in some of the States by elevating to citizenship persons who, by the supreme law of the land, are incapable of becoming citizens; and their votes have been used to inaugurate a new policy, hostile to the South, and destructive of its peace and safety.

The declaration concludes as follows:

We, therefore, the people of South Carolina, by our delegates in Convention assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, have solemnly declared that the Union heretofore existing between this State and the other States of North America is dissolved, and that the State of South Carolina has resumed her position among the nations of the world as a free, sovereign, and independent State, with full powers to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which independent States may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honors.

Such is the sum of the grievances which were published to the world as sufficient to justify the destruction of the Union. No State had any additional ones to allege in its own special case. The apprehensions declared to exist in the minds of the Southern people looked forward to such a radical change in their social condition as would involve the extinction of the white inhabitants of the State. On the well founded nature and justness of these apprehensions they professed to act. Admitting that they were truthful and certain to become realities, there is not a patriot in the world, who, if placed in such a position, would hesitate to rush to arms and contend to the last moment of existence. No outside or incidental circumstances would be needed to arouse to war a people thus placed. Was such the position of the Southern States? Was there that danger of impending ruin which their apprehensions portrayed? Facts and their own declarations deny it. The act of Congress to amend the Constitution denies any right of interference in the domestic institutions of a State. One of the citizens of South Carolina thus described the manner in which secession was effected, thereby showing that whatever apprehensions for the future existed among the people, they were in a very torpid state:

"I know of no instance in the history of the

* Neither Indiana nor Illinois have passed a personal liberty law.

world in which a people have deliberately resolved upon an act of political dissolution. Even our fathers did not, and blood had been shed from Massachusetts to Georgia before there was the political intrepidity to assert their independence. And so it ever has been, that in States, as in men, the conservatism of life have been stronger than the motives to destroy it. The stimulant of physical collision has been necessary to political movement, and blood has been ever required to the baptism of a regenerated nation. But in South Carolina we thought there was the chance of political action. For years we have been without the distractions of party issues; for years our attentions have been fixed upon the aggressions of the General Government. Our readiness to detect the danger was greater, perhaps, than that of the other States, and if any State could ever hope to act upon a political issue we could hope to act upon the issues presented by the election of Mr. Lincoln; but there were also fortuitous circumstances that concurred to aid us. It was a fortuitous circumstance that the Federal officers within our State were too spirited to hold commissions upon the implication of a willingness to perform the service aggression might exact, and upon the incident of that election were ready to renounce them. It was a fortuitous circumstance that our Legislature was in session, and was ready to respond to the feeling of our people. It was a fortuitous circumstance that no other event had occurred to preoccupy the public mind; and so it was that, as the feelings of our people became aroused, that as amid these circumstances there gleamed the hope of political action, we sprang to the occasion. We pressed the measure onward. We did all we could to inspire the popular heart to the great achievement, and we yet believe that in so acting only was there a possibility of success. If, instead of acting for ourselves, we had named some future time for the coöperation of the other States, we believe the measure would have failed. We believe that other Southern States themselves would have looked upon it as a backing-down, and would have lost the courage necessary to concurrence; and I myself believe that if the State of South Carolina had stated some distant day for future action, to see if other States would join us, and had thus allowed the public feeling to subside, she herself would have lost the spirit of adventure, and would have quailed from the shock of this great controversy; but we did not do so. We pressed sternly onward, trusting that other States, with a generous confidence befitting the occasion, would properly conceive our motives."

A debate ensued in the Convention upon this declaration of grievances, which manifested quite a diversity of sentiment on the causes of secession. (See CONFEDERATE STATES, page 122.)

On the 24th the address was adopted, after a motion to lay it on the table had failed by a vote of ayes 30, nays 124. On this day Gov. Pickens issued the following proclamation:

Whereas, The good People of this State, in Convention assembled, by an ordinance, unanimously adopted and ratified on the twentieth day of December, in the year of our Lord one thousand eight hundred and sixty, repealed an ordinance of the people of this State adopted on the twenty-third day of May, in the year of our Lord one thousand seven hundred and eighty-eight, and have thereby dissolved the Union between the State of South Carolina and other States under the name of the United States of America:

I, therefore, as Governor and Commander-in-Chief in and over the State of South Carolina, by virtue of authority in me vested, do hereby proclaim to the world, that this State is, as she has a right to be, a separate, sovereign, free, and independent State, and, as such has a right to levy war, conclude peace, negotiate treaties, leagues, or covenants, and to do all acts, whatsoever, that rightfully appertain to a free and independent State.

Given under my hand and the seal of the State, at Charleston, this twenty-fourth day of December, in the year of our Lord one thousand eight hundred and sixty, and in the eighty-fifth year of the sovereignty and independence of South Carolina.
F. W. PICKENS.

On the 25th the committee on the relations with the slaveholding States of North America made a report, and concluded by recommending the adoption of the following resolutions:

Resolved, First, that this Convention do appoint a Commissioner to proceed to each of the slaveholding States that may assemble in Convention, for the purpose of laying our ordinance of secession before the same, and respectfully invite their coöperation in the formation with us of a Southern Confederacy.

Second, That our Commissioners aforesaid be further authorized to submit, on our part, the Federal Constitution as the basis of a Provisional Government for such States as shall have withdrawn their connection with the Government of the United States of North America.

Third. That the said Commissioners be authorized to invite the seceding States to meet in Convention at such time and place as may be agreed upon, for the purpose of forming a permanent Government for such States.

On the next day the Convention adopted an ordinance, making provisional arrangements for the continuance of commercial facilities in South Carolina. Custom-house officers were retained in office under the State authority; the Governor was authorized to fill all vacancies; the revenue collection and navigation laws of the United States were adopted until otherwise ordered; public documents, registers of vessels, &c., to be styled in the name of the State of South Carolina; and all duties collected to be paid into the State Treasury.

On the 27th an ordinance was adopted, authorizing the Governor to receive ambassadors, ministers, consuls, &c., and to appoint similar officers, &c.

The committee on the State Constitution on the 29th prepared an ordinance, transferring to the Legislature the powers lately vested in Congress, except during the existence of the Convention, when it shall not extend, without the Convention's direction, to duties on imports, post-offices, declaration of war, treaties, confederation, &c. The judicial powers of the United States courts are vested in the State courts. The General Assembly may direct that the court sitting in Charleston may have origi-

nal jurisdiction in admiralty cases, with the right of appeal when exceeding in interest \$2,000. In cases affecting the public ministers, the provisions are nearly the same as exist in the Federal courts. The act of Congress of March 3d, 1825, for the more effectual punishment of certain crimes, has been substituted by making all offences subject to the jurisdiction of the State courts.

The remaining sessions of the Convention were chiefly held in secret. Military measures were adopted.

An ordinance was passed, vesting all power necessary to make postal arrangements in the Legislature. Military officers in command of a volunteer or regular force raised under the orders of the Convention were allowed to hold seats in the Legislature.

Five thousand copies of the correspondence between the commissioners and the President of the United States were ordered to be printed.

The table, chair, and other appurtenances used on the night of signing the ordinance of secession, were ordered to be placed in the State House at Columbia, and the Convention adjourned on the 5th of January.

The forts in the harbor of Charleston early became an object of attention. If they were reinforced by the United States, it would require a bloody struggle on the part of South Carolina to obtain possession of them. On the other hand, an immediate seizure, before even a secession, would be an outrage which would occasion intense excitement against the State. After the passage of the ordinance of secession, when she declared herself an independent nation, her honor required that she should demand the surrender of the forts; and if this demand was not complied with, she could then proceed to capture them. An assurance was given to President Buchanan by the representatives in Congress from the State that the forts would not be attacked, and at his request it was made in writing, as follows:

*To His Excellency James Buchanan,
President of the United States.*

In compliance with our statement to you yesterday, we now express to you our strong convictions that neither the constituted authorities, nor any body of the people of the State of South Carolina, will either attack or molest the United States forts in the harbor of Charleston, previously to the action of the Convention, and we hope and believe not until an offer has been made through an accredited representative, to negotiate for an amicable arrangement of all matters between the State and Federal Government, provided that no reinforcements shall be sent into those forts, and their relative military status shall remain as at present.

JOHN McQUEEN,
WM. PORCHER MILES,
M. L. BONHAM,
W. W. BOYCE,
LAWRENCE M. KEITT.

WASHINGTON, Dec. 9, 1860.

Still later, in the month of December, and after the passage of the ordinance of secession, the Governor, on being serenaded, on Dec. 21st, in the evening, expressed the following opinion as to war:

"That Convention is now assembled, and, under existing circumstances, it would be obviously improper in me to make any lengthy or protracted remarks. But, fellow-citizens, allow me to say to you that I hope and trust I am in possession of information that perhaps there may be no appeal to force on the part of the Federal authorities. But if I am mistaken in this, at least so far as I am concerned, we are prepared to meet any and every issue. I hope and trust that, under existing circumstances, there will be no imprudence; no rash appeals to counsels caught under the impulse of false rumors; that we will prove to the world that we are not only free and independent, but that we are entitled to be so by our virtues and our character. The Convention, in all human probability, will, in a few days, send the ordinance to Washington which proclaims you to be, as you have a right to be, a free and independent republic. And, until they present the claims of South Carolina to your forts and your public places now in possession of the Federal Government, it is our duty to sustain that Convention by showing that we are ready to await a free and fair demand. But if, in the meantime, there is any attempt to increase the forces that now garrison them, so far as I am concerned, it shall not be done without an appeal to arms. I sincerely desire that we shall triumphantly go through this great controversy without this appeal to arms. But, if it be necessary to vindicate the independence of my country, I vow to you here that all the power that I have shall be exerted to maintain to the last extremity the independence of South Carolina. Allow me to say that there is nothing at present in the present issue to excite the slightest alarm. Be firm, be united, be true to your country, and your country is safe. I desire to say nothing that is imprudent or rash. I desire coolness and calmness. I desire that every man shall be ready, standing at his post; ready to do his duty when the word is given to march. I tell you, as far as I am able, when necessary that word shall be given to march forward to honor and independence—now and forever."

The commissioners sent to Washington had a brief correspondence with President Buchanan on the 29th of December, but accomplished nothing. (*See UNITED STATES.*)

Active movements immediately commenced for resisting any attempt on the part of the United States to exercise Federal powers within the limits of the State. Rumors that vessels of war had started for Charleston harbor, and that the commissioners to Washington were on their way home, created great excitement in the State, and all thoughts of peaceable secession were abandoned. A collector for the port of Charleston was nominated to the Senate by President Buchanan, but that body failed to confirm the nomination.

Meantime, Governor Pickens organized his Cabinet, as follows: Secretary of State, A. G. Magrath; Secretary of War, D. F. Jamison;

Secretary of the Treasury, C. G. Memminger; Postmaster-General, W. H. Harlee; Secretary of the Interior, A. C. Gurlington.

On the 31st of December, the State troops, which had been for some time acting as a guard to the arsenal, under orders from the Governor, took full possession, and relieved the United States officer who had been in charge. At half-past one o'clock on Sunday, the Federal flag was lowered after a salute of thirty-two guns. The State troops were drawn up in order and presented arms. The Palmetto flag was then run up, with a salute of one gun for South Carolina.

The arsenal contained at the time a large amount of arms and other stores. Meanwhile military preparations were actively pushed forward, and several volunteer companies from other Southern States tendered their services. Notice was given by the collector at Charleston that the masters of all vessels from ports outside of South Carolina must enter and clear at Charleston. Bank bills were also made receivable for duties.

The Legislature had continued its session, but no business of importance was transacted until after the adjournment of the State Convention. Under the military law, which had been passed, a call was made for volunteers by the Governor about the time that Fort Sumter was occupied by Major Anderson. This act required the Governor to receive one volunteer company from each battalion in the State, and two rifle companies from each infantry brigade, each company to consist, besides the commissioned and non-commissioned officers, of not less than sixty nor more than eighty-five men.

If volunteers in sufficient numbers did not present themselves, the order then required that a sufficient number be drafted into the service of the State—thus compelling them to perform military duty. The term of their service was not stated.

A loan of \$400,000 was also authorized, which was taken by the banks of the State, which were also authorized to suspend specie payments.

About this time the United States Assistant Treasurer was ordered not to pay any further drafts of Major Anderson, then in command at Fort Sumter. (See SUMTER.) The money at this time in the hands of the Treasurer was \$150,000.

The flag of the State, adopted by the Legislature, to whom the subject had been referred by the State Convention, consisted of a plain white ground with a green Palmetto tree in the centre, and a white crescent in the left upper corner on a square blue field.

On the 14th of January the Legislature unanimously passed a resolution declaring that any attempt by the Federal Government to reënforce Fort Sumter would be considered as an act of open hostility, and as a declaration of war. At the same time they adopted another resolution, approving the act of the troops who

fired on the Star of the West, (*see STAR OF THE WEST*), and also resolved to sustain the Governor in all measures necessary for defence.

The Governor proposed, for the defence of the coast, the purchase of three steam propellers of light draught, each to be manned by thirty-two seamen. One of the steamers should be stationed in Charleston harbor, one at Beaufort, and one at Georgetown. He also recommended that all inlets and mouths of rivers should be fortified with redoubts and ordnance, and that boats should keep up a constant communication between the several points as a protection against sudden invasion by lawless bands.

On the 16th an act passed the House, to stay the collection of all debts due by South Carolina to persons in the non-slaveholding States, until after December ensuing.

An act of treason to the State was detected at this time, and the criminal was arrested and confined for trial. The collector of the port at Georgetown, J. N. Merriman, was the person.

A letter was found, written by him, and addressed to President Buchanan, stating that he had just cleared vessels in the name of the United States, and that he would continue to do so. The letter urged upon the President to send a boat and men to collect the Federal revenue, and informed him of the progress made in the construction of the works near Georgetown, and promised to keep him informed from time to time in relation to the same. When arrested, he acknowledged himself the author of the letter.

The reply of South Carolina to the peace propositions of Virginia is to be found in these resolutions, adopted by her General Assembly of the Legislature.

Resolved unanimously, That the General Assembly of South Carolina tenders to the Legislature of Virginia their acknowledgments of the friendly motives which inspired the mission intrusted to Hon. Judge Robertson, her commissioner.

Resolved unanimously, That candor, which is due to the long-continued sympathy and respect which has subsisted between Virginia and South Carolina, induces the Assembly to declare with frankness that they do not deem it advisable to initiate negotiations when they have no desire or intention to promote the ultimate object in view—that object which is declared in the resolution of the Virginia Legislature to be the procurement of amendments or new guarantees to the Constitution of the United States.

Resolved unanimously, That the separation of South Carolina from the Federal Union is final, and she has no further interest in the Constitution of the United States; and that the only appropriate negotiations between her and the Federal Government are as to their mutual relations as foreign States.

The following resolution was also adopted about the same time by the Assembly:

Resolved unanimously, That this Assembly further owes it to her friendly relations with the State of Virginia to declare that they have no confidence in the Federal Government of the United States; that the most solemn pledges of that Government have been disregarded; that under pretence of preserving property hostile troops have been attempted to be introduced into one of the fortresses of this State, concealed

in the hold of a vessel of commerce, with a view to subjugate the people of South Carolina, and that even since the authorities at Washington have been informed of the present mediation of Virginia, a vessel of war has been sent to the South, and troops and munitions of war concentrated on the soil of Virginia.

Dudley Mann was at this time sent out as commissioner on the part of South Carolina to arrange some system with foreign Governments respecting their varied interests, and more particularly in regard to opening commercial facilities and direct trade. On the secession of Florida, four thousand stand of arms were sent to the authorities of that State from the arsenal at Charleston. The Governor was also authorized to send volunteers to that State if they should be needed.

The forts in Charleston harbor, occupied by a small garrison of regular troops of the United States, afforded a standing denial of the sovereignty and independence of South Carolina. The first object to be accomplished by the State authorities to secure that respect due to an independent nation, was to obtain possession of these forts. For this object the following correspondence took place:

STATE OF SOUTH CAROLINA, }
EXECUTIVE OFFICE, CHARLESTON, Jan. 11, 1861. }

To Major Robert Anderson, commanding Fort Sumter.

SIR: I have thought proper, under all the circumstances of the peculiar state of public affairs in the country at present, to appoint the Hon. A. G. Magrath and Gen. D. F. Jamison, both members of the Executive Council, and of the highest position in the State, to present to you considerations of the gravest public character, and of the deepest interest to all who deprecate the improper waste of life, to induce the delivery of Fort Sumter to the constituted authorities of the State of South Carolina, with a pledge, on its part, to account for such public property as is under your charge.

Your obedient servant,

F. W. PICKENS.

MAJOR ANDERSON TO GOV. PICKENS.

HEAD-QUARTERS FORT SUMTER, S. C. }
January 11, 1861. }

His Excy F. W. Pickens, Governor of S. Carolina.

SIR: I have the honor to acknowledge the receipt of your demand for the surrender of this fort to the authorities of South Carolina, and to say, in reply that the demand is one with which I cannot comply.

Your Excellency knows that I have recently sent a messenger to Washington, and that it will be impossible for me to receive an answer to my despatches, forwarded by him, at an earlier date than next Monday. What the character of my instructions may be I cannot foresee. Should your Excellency deem fit, prior to a resort to arms, to refer this matter to Washington, it would afford me the sincerest pleasure to depute one of my officers to accompany any messenger you may deem proper to be the bearer of your demand.

Hoping to God that in this, and all other matters, in which the honor, welfare, and lives of our fellow-countrymen are concerned, we shall so act as to meet His approval, and deeply regretting that you have made a demand of me with which I cannot comply, I have the honor to be, with the highest regard, your obedient servant,

ROBERT ANDERSON,

Major U. S. Army, commanding.

This reply of Major Anderson referred the question to the President of the United States,

to whom, therefore, Governor Pickens then addressed the following letter:

STATE OF SOUTH CAROLINA, }
EXECUTIVE OFFICE, HEAD-QUARTERS, }
CHARLESTON, Jan'y 11, 1861. }

SIR: At the time of the separation of the State of South Carolina from the United States, Fort Sumter was, and still is, in the possession of the troops of the United States, under command of Major Anderson. I regard that possession as not consistent with the dignity or safety of the State of South Carolina; and I have this day addressed to Major Anderson a communication to obtain from him the possession of that fort by the authorities of this State. The reply of Major Anderson informs me that he has no authority to do what I required; but he desires a reference of the demand to the President of the United States.

Under the circumstances now existing, and which need no comment by me, I have determined to send to you the Hon. I. W. Hayne, the Attorney-General of the State of South Carolina, and have instructed him to demand the delivery of Fort Sumter, in the harbor of Charleston, to the constituted authorities of the State of South Carolina.

The demand I have made of Major Anderson, and which I now make of you, is suggested because of my earnest desire to avoid the bloodshed which a persistence in your attempt to retain possession of that fort will cause, and which will be unavailing to secure you that possession, but induce a calamity most deeply to be deplored. If consequences so unhappy shall ensue, I will secure for this State, in the demand which I now make, the satisfaction of having exhausted every attempt to avoid it.

In relation to the public property of the United States within Fort Sumter the Hon. I. W. Hayne, who will hand you this communication, is authorized to give you the pledge of the State that the valuation of such property will be accounted for by this State, upon the adjustment of its relations with the United States, of which it was a part.

F. W. PICKENS.

To the President of the United States.

For the result of this attempt to obtain possession of the fort, *see* SUMTER; for the reply of the President, and his views upon the questions incidentally raised, *see* UNITED STATES.

To furnish resources for the State, an act was passed by the Legislature appropriating \$850,000 to meet demands upon the State; also \$980,000 for military and other exigencies, and \$50,000 for postal service. The amount not provided for by direct taxation was to be supplied by Treasury notes and bills receivable, in sums of \$50, \$100, and \$500.

Preparations were now made to organize a volunteer force of 10,000 men, and the Governor appointed Milledge L. Bonham, of Edgefield, major-general; P. H. Nelson, of Sumter, brigadier-general; Major T. G. Rhett, late of the United States army, Samuel McGowan, of Abbeville, and A. G. Garlington, of Newberry, brigadier-generals.

All commerce had now ceased, and a general stagnation of commercial affairs ensued. A degree of popular excitement was maintained by the condition in which Fort Sumter was held, and by the preparations on foot for its ultimate capture. The Provisional Constitution of the Confederate States was adopted by the State Convention, which reassembled on the 26th of March. The vote on its adoption was 140 ayes and 29 noes. Thus South Carolina

relinquished her boasted sovereignty after a duration of little more than three months, and relapsed into the condition of a submissive member of an anti-free-trade and anti-slave-trade Confederacy. Fort Sumter was captured by orders from the Confederate Government, on which occasion the Governor addressed the people and thus reviewed the events that had taken place: "We have had a great many delicate and peculiar relations since the 20th of December last. We took the lead in coming out of this old Union, and in forming this new Confederacy. We, therefore, had certain relations to those who were to come out and stand by our side. We owed a great deal to those who were expected to come with us. We were bound to consult their feelings and their interests, and it was due that we should be forbearing as well as free. We are now one of the Confederate States, and they have sent us a brave and scientific officer, to whom the credit of this day's triumph is due. We have humbled the flag of the United States, and as long as I have the honor to preside as your chief magistrate, so help me God, there is no power on this earth shall ever lower from that fortress those flags, unless they be lowered and trailed in a sea of blood. I can here say to you it is the first time in the history of this country that the Stars and Stripes have been humbled. It has triumphed for seventy years, but to-day, on the 13th day of April, it has been humbled, and humbled before the glorious little State of South Carolina. The Stars and Stripes have been lowered before your eyes this day, but there are no flames that shall ever lower the flag of South Carolina while I have the honor to preside as your chief magistrate."

This closed military operations in the State until near the end of the year, when the military and naval expedition under Gen. Sherman and Com. Dupont arrived at Port Royal. (*See EXPEDITION.*)

The volunteers of the State were sent away under the orders of the Confederate Government to defend the soil of Virginia from invasion by Northern troops. The number of these volunteers was about 19,000. The Representatives of the State in the Confederate Congress were R. Barnwell Rhett, and J. L. Orr, Senators; and W. W. Boyce, W. P. Miles, M. L. Bonham, John McQueen, L. M. Ager, and James Farran, Representatives. (*See CHARLESTON, also SUMTER.*)

SPECTROGRAPHY; Analysis by means of the prismatic spectrum.—Some remarkable experiments have been performed in 1861 in Germany by MM. Bunsen and Kirchhoff, in detecting the presence of elementary bodies, by means of the effect they produce upon the prismatic spectrum, when present in inconceivably small quantities, and in whatever combination, in the illuminated atmosphere. When a ray of light is decomposed by being passed through a prism, the different rays thrown upon a white screen succeed each other in the following or-

der: violet, green, indigo, blue, green, yellow, orange, red. Under certain circumstances numerous dark parallel lines of variable width and distinctness may be produced, which traverse the spectrum or assemblage of colored rays thus obtained, each line extending through the ray to which it belongs, and retaining the same position as respects its distance from the adjoining rays. Solar light, it has been observed, produced a spectrum marked by lines differing in position from those produced by gas light, and spectra from other artificial lights also had their respective peculiarities.

The German optician Fraunhofer, who had closely studied the lines or bands upon the solar spectrum, selected from the several hundred of them which he observed, seven as particularly conspicuous and easily recognized, which he named from the letters of the alphabet, B, C, D, E, F, G, H, and which are still referred to as standard points of reference in the spectrum for defining special rays of light which cannot be exactly indicated by any descriptive names. B and C extend through the red color in that half of it nearest the orange, D is in the centre of the orange, E at the junction of the yellow and green, F at the junction of the green and blue, G in the middle of the indigo, and H in that of the violet.

Bunsen and Kirchhoff found that the presence of metallic or other elementary substances in the flame producing the artificial light, caused in the spectrum the appearance of characteristic lines; and these being determined for each substance, might be taken as conclusive tests of the presence of these substances; and what is remarkable, the presence of the element can be determined when it is in infinitely smaller quantity than is required for its detection by ordinary modes of qualitative analysis. The apparatus employed, of which a simple form, described by M. Mousson in "Poggendorff's Annalen" under the name of the spectroscop, and which may be obtained in New York City,* consists essentially of a tube blackened within, having at one extremity a metal plate with an adjustable slit for the admission of light, and a prism at the other extremity. It is placed upon a stand and has a small metallic screen for excluding extraneous light from the eye of the observer, which is applied to the second refracting surface of the prism. Various methods were introduced by Bunsen and Kirchhoff of submitting substances to this new test. A light giving great heat, and of little illuminating power, is found to present the lines most distinctly upon the spectrum, and that from hydrogen gas is used in preference to others. The burner is placed directly opposite the slit in the metallic plate at the end of the tube, and the substance to be examined may be introduced into the flame attached to a hook of platinum wire, as in blow-pipe experiments. When in the form of chlorides, the metals being more

* See American "Journal of Science," vol. XXXII., p. 105, (July, 1861.)

or less volatile, produce the most marked effect; but for the easily vaporized salts of the metals, such, for example, as the chloride of sodium, it was found sufficient to burn an extremely small quantity of it in any part of a room of ordinary size, for the reaction to appear upon the spectrum as soon as any portion of the vapor could reach the flame. From the quantity diffused throughout the atmosphere of a room of known capacity, it was calculated that the quantity of vapor of chloride of sodium brought into the flame in one second of time, in which the reaction became apparent, could not have exceeded the three-millionth part of a milligramme in weight. The effect of the sodium is to produce a bright and distinct yellow line across the spectrum. Lithium is little less sensitive in its reaction than sodium, and, what is remarkable, it was found in a great variety of substances examined, as in the water of springs and of the sea, in the ashes of marine plants, of tobacco, of the vine, &c., and even in milk, and in human blood. In the mother liquors of certain saline springs and of the tartaric acid manufactories, lithia was found so concentrated as to be profitably extracted. The distinctive mark of lithium consists of a sharply defined, but faint yellow line, and also a bright red line, both near the extremity of the spectrum. Many of the elements present two or more lines. Potassium gives two, one in the extreme red, and the other in the violet ray. Barium is distinguished by two very distinct green lines; calcium by a very broad green line, and a bright orange near the red end of the spectrum; strontium by eight lines, six red, one orange, and one blue. Even when the salts of these metals are mixed together, the lines characteristic of each are quite distinct, appearing in succession one after another.

Discovery of new elements by the photo-chemical process.—Not only have these known elements been detected in substances in which they were never before recognized, but some new elements have, by means of this process, been brought to light. Finding in a mineral water blue lines different from those produced by any known element, Bunsen and Kirchhoff were at the trouble of concentrating by evaporation full 20 tons of this water, and on analyzing the residue obtained 240 grains of the platinum salt of a new metal, which they named *cæsium* from the Latin *cæsius*, signifying grayish blue, from the color of the lines. They detected it in other mineral waters, and also another element, which they termed *rubidium*, from the Latin *rubidus*, dark red. The chemical reactions of these metals so closely resemble those of potassium that they are not distinguished from this by the ordinary methods of analysis. The two new metals accompany each other in the saline waters of Dürkheimer in Germany. Rubidium is most abundant in the mineral known as lepidolite. Its atomic weight by the hydrogen scale is 85.36; that of cæsium is 123.4. The latter is the most electro-positive

element known. In subjecting native sulphur to this test, Mr. William Crooks, an English chemist, discovered in it the new element he called *thallium*—Gr. *θαλλος*, green, from the intense green line that it produces in the spectrum.

Application of photo-chemical analysis to the determination of the elements existing in the solar atmosphere.—In subjecting the light of the sun to this method of examination, M. Kirchhoff was led to the conclusion that beneath the ignited gaseous atmosphere of the sun the central mass, more intensely luminous, interferes with the representation of the spectrum of the enveloping atmosphere, and causes the lines to appear as dark which such an atmosphere would otherwise present as bright. With an apparatus, however, of superior construction, Kirchhoff became satisfied that the dark lines in the solar spectrum contained between the orange and blue, and amounting to about 70 particularly well-marked lines, correspond to the light lines peculiar to iron, which are always numerous and distinct. He also recognized the lines indicative of magnesium, chromium, and nickel, but no distinct dark lines corresponding to the very brilliant ones produced by cobalt, silver, lead, copper, zinc, antimony, and aluminium. He applied the same apparatus to experiments upon light produced by the sparks from a large Ruhmkorff's induction coil, and found that the spectrum thus produced exhibited with the greatest distinctness the lines peculiar to the metals of which the electrodes consisted. This method proved to be especially adapted for the determination of such elements as are not readily volatilized in an ordinary flame. It was, however, liable to a confusion from the exhibition, also, of lines due to any metallic substances happening to be in the air through which the spark passes. Another difficulty was also experienced in a very great number of bright lines produced by every electric spark, and to avoid the confusion thus caused, the expedient was adopted of producing two spectra from two similar pairs of electrodes, the light of one spark being made to pass through the upper, and that of the other through the lower half of the slit. The effect of any change introduced in one of the pairs of electrodes is then immediately perceived by the difference in the lines upon the two spectra. Thus it became possible to detect the presence of the rare metals, yttrium, erbium, terbium, &c.; and there is little reason to doubt but the principle may be extended to the detection of most of the other elements.

SPRINGFIELD, a city and capital of Green Co., Missouri, situated on the line of the S. W. branch of the Pacific Railroad, 250 miles southwest of St. Louis, and 130 south-southwest from Jefferson City. Population about 1,500. Before the commencement of the war it was one of the finest towns in southwestern Missouri. Its situation was high and healthy, and its trade flourishing and rapidly increasing. It

had a court house, a United States land office, two newspaper offices, several churches, and a bank, and had a city charter. On the 5th August, 1861, Gen. Lyon, commanding a body of about 4,000 troops of the Federal forces, arrived at Springfield, and on the 8th a skirmish occurred between a part of his force and the Confederates at Dug Spring, a short distance from the city. On the 10th a battle was fought at David's and Wilson's creeks, the first nine, the second fifteen miles from the city, in which Gen. Lyon's force, in three columns, commanded by General Siegel, Major (since General) Sturgis, and himself, attacked a Confederate force of nearly five times its own numbers, and after a desperate battle of six hours remained in possession of the Confederate camp, but with the loss of Gen. Lyon and 223 others killed, 721 wounded, and 291 taken prisoners. The Confederate loss was never published in detail, but was known to be considerably greater than this. After the battle, General Siegel, taking the chief command, fell back to Springfield, and the next day made a masterly retreat to Rolla, where he received reinforcements. On the 11th the Confederate general Rains entered and occupied the city with four regiments of cavalry. On the 25th October Major Charles Zagonyi, commander of Gen. Fremont's body guard, with 160 mounted troops of that guard, made a most brilliant attack upon the Confederate forces stationed near the city, over two thousand in number, and who, having been informed of his coming, were drawn up in order of battle to receive him. He charged with his little band up a steep hill in the face of a most murderous fire, and after a short action, drove them into, through, and out of the town, with a loss of fifty killed, wounded, and missing. The Confederate loss was 60 killed and a large number wounded. On the 28th October a skirmish occurred in the town, in which several Confederates were taken prisoners. On November 3 Major-General David Hunter, who had been appointed to supersede Gen. Fremont in the command of the Federal army in the Department of the West, arrived with his staff at Springfield, and on the 9th abandoned it and moved towards Rolla with his army. On the 27th Gen. Price, of the Confederate army, re-occupied it, and it was held by the Confederates till February, 1862.

ST. HELENA PARISH, S. C. This district, which has been the field of such important movements during the war, is situated on the coast of South Carolina, between 32° 05' and 32° 20' N. latitude. St. Helena Parish proper lies between the Combahee and Savannah rivers, and extends on the latter to the line of 32° 55', about 80 miles by the course of the river from its mouth; but the tract now included, under the name of Port Royal district, extends on the coast from a point above the Edisto River; and about 20 miles below Charleston, to St. Augustine, Florida, with a varying breadth of from five to twenty miles inland.

This is the region in which the great bulk of the Sea Island cotton is produced. Along the whole distance the coast is lined with a series of islands forming the deltas of the Edisto, Ashepo, Combahee, Broad, Coosawhatchie, Savannah, Ogeechee, Camanchee, Altamaha, and Santilla rivers, and their interlocking branches. In most instances these rivers, at their several points of debouchure, have sand bars partially closing the entrance, and admitting only vessels of light draft, and these by tortuous channels, to the deeper waters inside. Only two entrances of considerable depth occur on this part of the South Carolina coast, viz.: St. Helena and Port Royal sounds, or entrances. Of these the latter is by far the best, and is, indeed, one of the finest harbors on the Atlantic coast of the Southern States. The Broad River here forms an estuary varying in width from 2½ to 5 miles, and, interlacing with the Combahee and Port Royal rivers, encloses within navigable channels more than twenty islands of considerable size, of which the principal are Hilton's Head, St. Helena, Phillips, Hunting, Port Royal, Pinckney, and Parry islands.

At the entrance of Port Royal harbor there is, at flood tide, sufficient depth of water for vessels drawing 23 feet to pass, and, once inside, the sheltered bay is sufficiently capacious for a navy to ride in safety. The larger of the forts captured by Com. Dupont on the 7th of November, was called Fort Walker, and was situated on Hilton Head Island, on the south side of the entrance, while the other, Fort Beauregard, was on Phillips Island, on the north side of the entrance, 2½ miles distant, and a small earthwork was about a half mile distant on the same island, commanding the approach from the northeast. (*See EXPEDITIONS.*)

The importance of Port Royal entrance as a harbor has long been known. In 1562 a body of French Protestants, under the direction of Admiral Coligni, and commanded by John Rebault, of Dieppe, explored the harbor, erected a fort on the site of Beaufort, and commenced a settlement. It did not prosper, however, and after two or three years was entirely abandoned. Nearly a century later the first British settlement was made here by Lord Cardross, a Scotch nobleman. They settled on Port Royal Island, but their numbers did not rapidly increase. In 1670 William Sayle was sent out as governor of this settlement. In 1700 the present town of Beaufort was founded. Notwithstanding the excellence of its harbor, the fertility of its soil, and the comparative salubrity of the climate, great efforts had been made to turn commerce aside from Port Royal and to concentrate it at the much poorer harbor of Charleston. Port Royal and St. Helena islands became the favorite summer residences of wealthy merchants and planters, whose winters were spent in Charleston, and the luxurious dwellings of Beaufort and its vicinity were abundantly supplied with all the appliances of

art and taste. Beaufort, or St. Helena district or parish, for it is called by each of these names, contained, in 1860, a population of 40,052 inhabitants, of whom 32,531 were slaves.

By way of Scull Creek, which divides Pinckney Island from Hilton Head, Savannah is only 22 miles distant; while, by way of Beaufort River, which separates Parry Island from St. Helena, there is an interior route of 49 miles to Charleston; while, at a distance of about 20 miles inland, lies the Charleston and Savannah Railroad. On the capture of the islands the white population, being mostly sympathizers with secession, retreated inland, and have not since returned in any considerable numbers. About 10,000, or nearly one-third of the slaves, have come into the Federal lines, and are now mostly employed either in the cultivation of the soil or in the labor requisite about the ships and forts.

ST. LOUIS is the chief city west of the Mississippi River, on the right bank of which it is located, at a distance of twenty miles below the mouth of the Missouri River, one hundred and seventy-four miles above the mouth of the Ohio, and eleven hundred and ninety-four miles above New Orleans. It is a most important commercial point. The first incident arising out of the irritating state of affairs in the country, to occasion any special excitement in this great and populous city, occurred on the 11th of January. The United States sub-treasurer, then having in his custody all the public money in the city, and naturally anxious for the safety of his important trust, from abundant, or perhaps superabundant caution, conceived that his duty required of him some security for his treasure beyond the ordinary one of locks and bolts. He therefore requested of the Government the presence of a small guard of soldiers from the neighboring barracks, where they were unemployed; and in compliance with this application the Secretary of War directed that such a guard should be furnished. This led to a telegraphic despatch, through the country, that troops had taken possession of the sub-treasury, post-office, and custom-house, by order of the Government, and occasioned an unusual excitement, as indicating a purpose on the part of the Government to use its military power.

On the 26th of April, twenty-one thousand stand of arms were removed from the arsenal and taken to Springfield in Illinois. Subsequently troops were enlisted to the number of fifteen hundred to protect the property.

On the 16th of May, the brigade of State militia under Gen. Frost surrendered to Gen. Lyon, an officer in the United States service. A camp of instruction had been formed under Gen. Frost in the western suburbs of the city, in pursuance of orders from the Governor of the State. He had directed the other militia districts also to go into encampments with a view of acquiring a greater proficiency in military drill. It had been reported to Gen. Frost,

that Gen. Lyon intended to attack him, and on the other hand, it had been reported to Gen. Lyon that it was the intention of Gen. Frost to attack the arsenal and United States troops. On the 16th, Gen. Frost addressed a note to Gen. Lyon alluding to these reports, and saying:

I would be glad to know from you personally whether there is any truth in the statements that are constantly poured into my ears. So far as regards any hostility being intended towards the United States, or its property or representatives, by any portion of my command, or, as far as I can learn, (and I think I am fully informed,) of any other part of the State forces, I can say positively that the idea has never been entertained. On the contrary, prior to your taking command of the arsenal, I proffered to Major Bell, then in command of the very few troops constituting its guard, the service of myself and all my command, and, if necessary, the whole power of the State to protect the United States in the full possession of all her property. Upon Gen. Harney's taking command of this department, I made the same proffer of services to him, and authorized his adjutant-general, Capt. Williams, to communicate the fact that such had been done to the War Department. I have had no occasion since to change any of the views I entertained at that time, neither of my own volition nor through the orders of my constitutional commander.

About the same time, Gen. Lyon's troops were put in motion, to the number, as was represented, of four or five thousand, and proceeded through the city, to the camp of Gen. Frost, and surrounded it, planting batteries on all the heights overlooking the camp. Long files of men were stationed in platoons at various points on every side, and a picket guard established, covering an area of two hundred yards. The guards, with fixed bayonets and muskets at half-cock, were instructed to allow none to pass or repass within the limits thus taken up.

By this time an immense crowd of people had assembled in the vicinity, having gone thither in carriages, buggies, rail cars, baggage wagons, on horseback, and on foot. Numbers of men seized rifles, shot-guns, or whatever other weapons they could lay hands on, and rushed to the assistance of the State troops, but were, of course, obstructed in their design. The hills, of which there are a number in the neighborhood, were literally black with people—hundreds of ladies and children stationing themselves with the throng, but as they thought out of harm's way.

Having arrived in this position, Gen. Lyon addressed a letter to Gen. Frost saying:

To General D. M. Frost:

SIR: Your command is regarded as evidently hostile towards the Government of the United States. It is; for the most part, made up of those secessionists who have openly avowed their hostility to the General Government, and have been plotting the seizure of its property and the overthrow of its authority. You are openly in communication with the so-called Southern Confederacy, which is now at war with the United States; and you are receiving, at your camp, from the said Confederacy, under its flag, large supplies of material of war, most of which is known to be the property of the United States.

These extraordinary preparations plainly indicate none other than the well-known purpose of the Gov-

error of this State, under whose orders you are acting, and whose purpose, recently communicated to the Legislature, has just been responded to by that body in the most unparalleled legislation, having in direct view hostilities against the General Government, and cooperating with its enemies.

In view of these considerations, and your failure to disperse in obedience to the proclamation of the President, and of the eminent necessity of State policy and welfare, and obligations imposed upon me by instructions from Washington, it is my duty to demand, and I do hereby demand of you, an immediate surrender of your command, with no other conditions than that all persons surrendering under this demand shall be humanely and kindly treated.

Believing myself prepared to enforce this demand, one half hour's time before doing so will be allowed for your compliance therewith. N. LYON,

Captain Second Infantry, Commanding Troops.

Immediately on the receipt of the foregoing, Gen. Frost called a hasty consultation of the officers of his staff. The conclusion arrived at was that the brigade was in no condition to make resistance to a force so numerically superior, and that only one course could be pursued—a surrender.

The State troops were therefore made prisoners, but an offer was made to release them on condition they would take an oath to support the Constitution of the United States, and not to take up arms against the Government. These terms they declined on the ground that they had already taken the oath of allegiance, and to repeat it would be to admit that they had been in rebellion.

About half-past five, the prisoners left the grove and entered the road, the United States soldiers enclosing them by a single file stretched along each side of the line. A halt was ordered, and the troops remained standing in the position they had deployed into the road. The head of the column at the time rested opposite a small hill on the left as one approaches the city, and the rear was on a line with the entrance to the grove. Vast crowds of people covered the surrounding grounds and every fence and house top in the vicinity. Suddenly the sharp reports of several fire-arms were heard from the front of the column, and the spectators that lined the adjacent hill were seen fleeing in the greatest dismay and terror. It appeared that several members of one of the German companies, on being pressed by the crowd and receiving some blows from them, turned and discharged their pieces. Fortunately no one was injured, and the soldiers who had done the act were at once placed under arrest. Hardly, however, had tranquillity been restored when volley after volley of rifle reports was suddenly heard from the extreme rear ranks, and men, women, and children were beheld running wildly and frantically away from the scene. Many, while running, were suddenly struck to the sod, and the wounded and dying made the late beautiful field look like a battle-ground. The total number killed and wounded was twenty-five. It was said that the arsenal troops were attacked with stones, and two shots discharged at them

by the crowd before they fired. Most of the people exposed to the fire were citizens with their wives and children, who were merely spectators. It was now night, and the excitement in the city was indescribable. On the next afternoon a large body of the German Home Guard entered the city from the arsenal, where they had been enlisted during the day, and furnished with arms. They passed unmolested until they turned up Walnut street, and proceeded westward. Large crowds were collected on the corners, who hooted and hissed as the companies passed, and one man standing on the steps of a church fired a revolver into the ranks. A soldier fell dead, when two more shots were fired from the windows of a house near by. This time the head of the column, which had reached as far as Seventh street, suddenly turned, and levelling their rifles, fired down the street, and promiscuously among the spectators, who lined the pavements. Shooting, as they did, directly towards their rear ranks, they killed some of their men as well as those composing the crowd. The shower of bullets was for a moment terrible, and the only wonder was that more lives were not lost. The missiles of lead entered the windows and perforated the doors of private residences, tearing the ceilings, and throwing splinters in every direction. On the street the scene presented, as the soldiers moved off, was sad indeed. Six men lay dead at different points, and several were wounded and shrieking with pain upon the pavements. Four of the men killed were members of the regiment, and two were citizens. Immense crowds of people filled the streets after the occurrence, and the whole city presented a scene of excitement seldom witnessed. Among the arms taken at Camp Jackson were three thirty-two pounders, a large quantity of balls and bombs, several pieces of artillery, twelve hundred rifles, of the late model, six brass field-pieces, six brass six-inch mortars, one ten-inch iron mortar, three six-inch iron cannon, several chests of new muskets, five boxes canister shot, ninety-six ten-inch and three hundred six-inch shells, twenty-five kegs of powder, and a large number of musket stocks and barrels, between thirty and forty horses, and a considerable quantity of camp tools.

The number of prisoners taken to the arsenal, was six hundred and thirty-nine privates and fifty officers.

The character of Camp Jackson is described by Gen. Harney in his proclamation to the people of Missouri, in these words:

"It is not proper for me to comment upon the official conduct of my predecessor in command of this department, but it is right and proper for the people of Missouri to know that the main avenue of Camp Jackson, recently under command of Gen. Frost, had the name of Davis, and the principal street of the same camp that of Beauregard; and that a body of men had been received into that camp by its commander, which had been notoriously organ-

ized in the interests of the secessionists—the men openly wearing the dress and badge distinguishing the army of the so-called Southern Confederacy. It is also a notorious fact that a quantity of arms had been received into the camp, which were unlawfully taken from the United States arsenal at Baton Rouge, and surreptitiously passed up the river in boxes marked marble."

The city was in a short time surrounded by a line of military posts, extending from the river below the arsenal round the western outskirts to the river again on the north. The object of these posts was to prevent hostile troops and munitions of war from entering the city, and to protect the public peace and give security to the citizens.

On the 17th of June, another street affair occurred, by which four citizens lost their lives, and three or four soldiers were wounded. The selection of St. Louis as the head-quarters of the Western Department gave it a military position, from whence the troops were fitted out, who were destined either for Missouri or Kentucky. Gen. Harney was succeeded here by Gen. Fremont, and he again by Gen. Halleck, and under their management St. Louis was identified with all the movements of the great Western army. No event apart from such as naturally arise out of this combination of circumstances, therefore, occurred during the year. When martial law was declared by Gen. Fremont, it was enforced throughout the city, and when the Union people were forced to flee from the Western villages on the approach of the Confederate forces, and resorted to St. Louis, Gen. Halleck came to their relief, by imposing fines upon such citizens of St. Louis, as were known to sympathize with secessionists.

His order, directing a levy upon the friends of the enemy for charitable purposes, caused a number of the citizens of St. Louis to prepare and lay before him a protest, in which they thus speak of the order and the proceedings under it:

They violate the provisions of a fundamental law of the land—a law to you as well as to us—prescribing the duties of the citizen, and clearly defining and limiting the powers of the Government. That law provides that no person shall "be deprived of life, liberty, or property, without due process of law;" that the "accused shall enjoy a speedy and public trial, by an impartial jury, and to be informed of the nature and cause of the accusation; to be confronted with the witness against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defence."

And yet, in disregard of all these great and dearly cherished principles of constitutional freedom, at a time when the Federal Congress is in session to enact laws, if new ones be deemed necessary; the courts in full operation to enforce them; civil officers with all the power of the army and navy at hand to aid them in the execution of process, and all branches of the Government in full and harmonious operation, we have been tried before a secret inquisitorial tribunal, on what charge we know not, and condemned to pay a forced contribution, arbitrarily levied upon us for alleged charitable purposes. In case of failure to liquidate the amount adjudged against us within the

number of days allowed for that purpose, our property is threatened to be seized and sacrificed by sale at auction, to satisfy such demand, and twenty-five per cent. additional. And what is the remedy prescribed for those considering themselves aggrieved by the secret edicts and decrees of this tribunal? They are allowed one week within which "to furnish evidence to the Board to vindicate their character," and if at the end of that time they fail to satisfy those judges, who have already prejudged their cases, of their loyalty, they shall be adjudged to pay the further sum of ten per cent. on the sum assessed.

If we have in any manner transgressed the law, we are ready to make all the atonement which the violated law demands. Its avenging ministers are near to try, condemn, and punish us conformably to the established forms and usages of law. There exists no necessity in our opinion for overriding, in the way proposed, the great principles of the fundamental law, setting aside all the restraints and limitations it so guardedly places upon power, and thus inaugurating new tests and arbitrary modes for ascertaining guilt. There exists no necessity for such summary proceedings. Within this jurisdiction the ordinary course of justice, except so far as it has been interfered with by the military authority, has been, and is now, entirely free and unobstructed.

Vouchsafe us a speedy and public trial by an impartial jury; make known to us the nature and cause of the accusations against us; let us be confronted with our accusers, that we may see the hand that would smite us, and do not leave us and all we own to the mercy of a Star Chamber Court of Inquiry, where malice may be the lurking motive that determines the question of guilt, and pronounces the judgment that may doom us and ours to want and beggary. If two or three military officers of the United States, or other persons designated for such purpose, may meet in secret, and, without notice, single out such citizens as they may choose, upon whom to levy forced contributions, and arbitrarily fix the amount of the same, what man, who may perchance hold political opinions not altogether acceptable to the tribunal thus constituted, can consider himself secure in his right of liberty or property?

The fines, however, were enforced much to the chagrin of those compelled to pay them. (See MARTIAL LAW.)

STAR OF THE WEST. The merchant steamer *Star of the West*, of 1,172 tons burthen, was built to run to Aspinwall, on the route to California. She was chartered by the United States Government to take a small force and supplies for Major Anderson at Fort Sumter. She left New York at five o'clock in the afternoon of the 5th of January, 1861, and proceeded down the bay, hove to and received on board four officers and two hundred and fifty soldiers, with their arms and ammunition, and proceeded to sea, crossing the bar at Sandy Hook at nine o'clock the same night. She arrived off Charleston bar at half-past one in the morning of the 9th, and as the lights were all out and no guiding marks to be found, she proceeded slowly until 4 A. M., and then, being in four and a half fathoms of water, lay to until daylight. As the day began to break a small steamer was discovered in-shore, which, as soon as she discovered the *Star of the West*, burned a blue light and two red lights as signals, and shortly after steamed over the bar into the ship channel. The soldiers were now all put below, and no one allowed on deck except those belonging to the vessel. As soon as there was light

enough to see, the Star of the West crossed the bar and proceeded up the channel. Meanwhile the little steamer ahead continued on her course, sending off rockets and burning blue lights until after broad daylight. When within about two miles of Fort Moultrie and about the same distance from Fort Sumter, a masked battery on Morris Island, where was a red Palmetto flag flying, opened fire on the Star of the West. The distance appeared about five-eighths of a mile. The American flag was flying at the time from the flagstaff of the Star of the West, and soon after the first shot the American ensign was hoisted at the fore. She continued on under the fire of the battery for over ten minutes, several of the shots going entirely over her; one shot passed just clear of the pilot house, another passed between the smoke stack and walking beams of the engine, another struck the ship just abaft of the fore rigging and stove in the planking, while another came near carrying away the rudder. At the same time there was a movement of two steamers from near Fort Moultrie, one of them towing a schooner, which was thought by the officers of the Star of the West to be an armed schooner intended to cut them off. They regarded the position of the steamer at this time as rather critical, as they must approach Fort Moultrie within three-quarters of a mile before they could keep away for Fort Sumter. The report of Capt. McGowan says: "A steamer approaching us with an armed schooner in tow, and the battery on the island firing at us all the time, and having no cannon to defend ourselves from the attack of the vessels, we concluded that to avoid certain capture or destruction we would endeavor to get to sea." They then wore round and steered down the channel, and the battery continued to fire upon them until the shot fell short. They crossed the bar outward at 8.50 A. M., and returned to New York.

"The steamer," says another account, "which discovered the Star of the West, was the General Clinch, and she signalled the fact to the occupants of the battery at Morris Island. As soon as she had signalled, Morris Island was astir. Men were at their posts before orders were given. They remained in anxious suspense, ready for what they believed was sure to come, namely, a volley from Fort Sumter. The Star of the West rounded the point, took the ship channel inside of the bar, and proceeded straightforward until opposite to Morris Island, three-quarters of a mile from the battery. A ball was fired athwart the bows of the steamer. The Star of the West displayed the Stars and Stripes. As soon as they were unfurled, the fortification fired a succession of heavy shots. The vessel continued with increased speed. But one or two shots took effect; and she concluded to retire. Fort Moultrie fired a few shots, but out of range. The damage done to the steamer was trifling. Only two out of seventeen shots took effect. Fort Sumter made no demonstration, except

opening the port-holes and running out the guns which bear on Morris Island and Fort Moultrie."

What instructions were given by the Government to the commander of the Star of the West have not been made known. A correspondence immediately took place between the commander of Fort Sumter and the Governor of South Carolina, in which the former stated that an unarmed vessel of the United States had been fired on, and wished to know if it had been with the sanction of the Governor. The latter replied, that any attempt to send troops into Charleston harbor by the United States, to reinforce the forts, or to retake and resume possession of the forts within the waters of South Carolina, would be regarded as an act of hostility.

This steamer was subsequently chartered again by the Federal Government, and sent to Texas to receive and convey to New York a part of the regular force withdrawn from that State; but on the 17th of April she was boarded off Indianola by a party of volunteers from Galveston, and captured without resistance. Between eight and nine hundred barrels of provisions were on board at the time.

STORRS, WILLIAM LUCIUS, LL. D., late chief-justice of Connecticut, was born at Middletown, Connecticut, March 25, 1795, died at Hartford, June 25, 1861. He graduated at Yale College in 1814, studied law at Whites-town, New York, and was admitted to the bar in that State in 1817. Soon after he returned to his native city, where he practised his profession till 1840. He repeatedly represented Middletown in the State Legislature, and in 1834 was Speaker of the House of Representatives of the State. He was elected to Congress in 1829, and served as representative of that district in the 21st, 22d, and 26th Congresses. In 1840 he was elected an associate judge of the Supreme Court of the State, and in 1857, on the resignation of Chief-Justice Waite, chief-justice. He was a man of profound legal attainments, and his decisions were regarded with the highest respect by the able jurists of the State.

SUMMERSVILLE is the county seat of Nicholas County, the next east of Kanawha County, in Virginia. It is about fifty miles from Charleston, the central position of the Kanawha Valley, and 25 miles from Gauley Bridge, up the Gauley River. On the 26th of August the Seventh Ohio Regiment, under Col. Tyler, was surrounded at Summersville while at breakfast, and attacked on both flanks and in the front simultaneously. The troops, although surprised, forced their way through the enemy with considerable loss. About nine hundred were engaged on the Federal side, and double that number on the Confederate side. No permanent advantage was gained by the Confederate force, as a larger Federal force, under General Cox, was stationed at Gauley Bridge.

SUMTER, (FORT.) Vigorous operations were commenced on this fort, which is one of the defences of Charleston, in the month of August, 1860, with a view of placing it in a good defensive position as soon as possible. The casemate arches supporting the second tier of guns were all turned; the granite flagging for the second tier was laid, on the right face of the work; the floors laid, and the iron stairways put up in the east barrack; the traverse circle of the first tier of guns reset; the blue-stone flagging laid in all the gun-rooms of the right and left faces of the first tier; and the construction of the embrasure of the second tier commenced, at the time that the fort was occupied by Major Anderson. Then the fears of an immediate attack and disloyal feelings induced the greater portion of the engineer corps to leave. But those that remained of this corps, fifty-five in number, reduced towards the end of the investment to thirty-five, were made very effective in preparing for a vigorous defence. The armament of the fort was mounted and supplied with manœuvring implements; machicolis galleries, splinter-proof shutters, and traverses, were constructed; the openings left for the embrasures of the second tier were filled with brick and stone and earth, and those in the gorge with stone and iron and lead concrete; mines were established in the wharf and along the gorge; the parade was cleared, and communications opened to all parts of the fort, and through the quarters.

This fort was occupied by Major Anderson on the night of the 26th of December. It is the largest of the forts in Charleston harbor. It is a work of solid masonry, octagonal in form, and pierced on the north, east, and west sides with a double row of port-holes for the heaviest guns, and on the south, or land side, in addition to openings for guns, loop-holes for musketry. It stands in the middle of the harbor, like a monster on the bosom of the waters, and near the edge of the ship channel. The armament consists of one hundred and forty guns, many of them being the formidable ten-inch columbiads. The wharf, or landing, is on the south side, and exposed to a cross fire from all the openings on that side. At twelve o'clock on the 27th, the stars and stripes were hoisted over the fort, and Charleston knew for the first time that Major Anderson was in full possession. The garrison now consisted of eighty men, as follows:

Names.	Rank.	Regiment or Corps.	Original Entry into Service.	Where born.
R. Anderson....	Major	1st Artill'y	July 1, '25 Ky.	
S. W. Crawford..	As't Surgeon	Med. Staff	M'h 10, '51 Penn.	
A. Doubleday....	Captain.....	1st Artill'y	July 1, '42 N. Y.	
T. Seymour.....	Captain.....	1st Artill'y	July 1, '46 Vt.	
Theo. Talbot....	1st Lieut.....	1st Artill'y	M'y 22, '47 D. C.	
Jeff. C. Davis....	1st Lieut.....	1st Artill'y	J'e 17, '48 Ind.	
J. N. Hall.....	2d Lieut.....	1st Artill'y	July 1, '59 N. Y.	
J. G. Foster.....	Captain.....	Engineers	July 1, '46 N. H.	
G. W. Snyder....	1st Lieut.....	Engineers	July 1, '56 N. Y.	
E. K. Meade.....	2d Lieut.....	Engineers	July 1, '57 Va.	

Officers, 10; Band, 15; Artillerists, 55. Total, 80.

There were in addition fifty-five of the engineer corps, which was subsequently reduced, as before mentioned, to thirty-five.

This movement on the part of Major Anderson created great excitement in Charleston. The authorities of South Carolina immediately conceived that the honor of their sovereign and independent State was involved, and that it was their duty to obtain possession of the fort, either by negotiation or by force. If the State was independent and sovereign, she could not allow a fort within her territory to be peacefully occupied by a foreign power. So, on the other hand, if the President of the United States conceived that he had no power to enter into negotiations with a State, or to surrender a portion of the common property of the Union, he must refuse all offers for negotiation, and prepare to defend the common property. The State authorities immediately commenced the preparation of batteries to reduce the fort, and also opened negotiations for its surrender.

Governor Pickens first demanded a surrender of the fort from Major Anderson. He replied, on the 11th of January, that he had "no power to comply with such a demand." On the same day, the Governor prepared a demand on the President for the fort, and proposed to account for the property in any future settlement between the United States and the State of South Carolina. This demand was despatched to Washington by J. W. Hayne, envoy of South Carolina to Washington. On his arrival, he was addressed by several Senators from the other seceded States, under date of January 15th. They desired him to postpone for a time the delivery of the letter with which he was charged to the President of the United States, and urged their community of interest, of destiny, and of position, as a reason why he should postpone action, and allow time for consultation. He agreed to do this, upon the condition that, "until he can hear from his Government, no reinforcements shall be sent to Fort Sumter, pledging himself that, in the mean time, no attack shall be made upon that fort."

The Senators, through Messrs. Fitzpatrick, Mallory, and Slidell, transmitted the correspondence between them and Mr. Hayne to the President, asking him to take into consideration the substance of the said correspondence. The reply came through Mr. Holt, who gave no pledge that he would not attempt to reinforce Fort Sumter. The only remark was, that it was not at present deemed necessary to reinforce Fort Sumter, but, if deemed necessary, every effort would be made to reinforce it.

The Senators to whom this was addressed did not regard it as satisfactory, but told Mr. Hayne that they felt certain that at present no attempt would be made to reinforce Sumter, and upon their judgment he postponed the delivery of his letter to the President. On the 24th, he stated to the Senators, that he had,

the day before, forwarded the correspondence to Charleston. The reply of the State Government was lengthy, and bore down heavily upon the tone of Mr. Holt's answer to the letter of the Senators.

Col. Hayne was instructed to deliver his letter conveying the demand for the surrender of Fort Sumter; also, to ask if the President was to be understood as asserting the right to send reinforcements to Fort Sumter, stating that the assertion of such right, with the attempt to exercise it, would be regarded by South Carolina as an act of war. If the President refused to deliver the fort, then Col. Hayne was to communicate that fact immediately. The President's answer could be transmitted within a reasonable time to the Government at Charleston, and Col. Hayne was not instructed to wait for it.

The final reply of the President, through Mr. Holt, the Secretary of War, was made on the 6th of February. That reply closes with these words: "If, with all the multiplied proofs which exist of the President's anxiety for peace, and of the earnestness with which he has pursued it, the authorities of that State shall assault Fort Sumter, and peril the lives of the handful of brave and loyal men shut up within its walls, and thus plunge our common country into the horrors of civil war, then upon them and those they represent must rest the responsibility." (See UNITED STATES.)

The question of attacking the fort was finally referred to the Confederate Congress at Montgomery. By that body all military matters were placed under the charge of the President of the Confederate States.

As it had been resolved to remove the women and children from the fort, they were, by the permission of the South Carolina authorities, taken to Charleston and placed on board the steamer Marion, bound to New York. She left on Sunday, February 3d; and as she proceeded down the harbor, having among the passengers the wives—twenty in number—and the children of the soldiers stationed in the fort, quite an exciting scene occurred, which an eye-witness thus described: "On nearing the fort, the whole garrison was seen mounted on the top of the ramparts, and when the ship was passing, fired a gun and gave three heart-thrilling cheers as a parting farewell to the dear loved ones on board, whom they may possibly never meet again this side the grave. The response was weeping and 'waving adieus' to husbands and fathers—a small band pent up in an isolated fort, and completely surrounded by instruments of death, as five forts could be seen from the steamer's deck with their guns pointing towards Sumter."

Major Anderson, writing to the War Department, about March 1st, expressed his conviction that Fort Sumter would soon be attacked. He could then clearly discern with the naked eye the arrangements for the assault, which he believed would be of the most determined char-

acter. The fortification was only then entirely completed. The utmost ingenuity of himself and brother officers had been employed to strengthen every part, and to provide means for resisting the attack, which was certain to come.

Preparations were made under the direction of the Confederate Government to capture the fort, until the 11th of April, when the following correspondence took place between the commander of the Confederate forces, Gen. Beauregard, and the commander of the fort, Major Anderson:

HEAD-QUARTERS PROVISIONAL ARMY C. S. A., }
CHARLESTON, S. C., April 11, 1861—2 P. M. }

SIR: The Government of the Confederate States has hitherto forbore from any hostile demonstration against Fort Sumter, in the hope that the Government of the United States, with a view to the amicable adjustment of all questions between the two Governments, and to avert the calamities of war, would voluntarily evacuate it. There was reason at one time to believe that such would be the course pursued by the Government of the United States; and under that impression my Government has refrained from making any demand for the surrender of the fort.

But the Confederate States can no longer delay assuming actual possession of a fortification commanding the entrance of one of their harbors, and necessary to its defence and security.

I am ordered by the Government of the Confederate States to demand the evacuation of Fort Sumter. My aides, Colonel Chesnut and Captain Lee, are authorized to make such demand of you. All proper facilities will be afforded for the removal of yourself and command, together with company arms and property, and all private property, to any post in the United States which you may elect. The flag which you have upheld so long and with so much fortitude under the most trying circumstances, may be saluted by you on taking it down.

Colonel Chesnut and Captain Lee will, for a reasonable time, await your answer.

I am, sir, very respectfully,

Your obedient servant,

G. T. BEAUREGARD,

Brigadier-General Commanding.

Major ROBERT ANDERSON, Commanding at Fort Sumter, }
Charleston Harbor, S. C. }

HEAD-QUARTERS, FORT SUMTER, S. C., }
April 11th, 1861. }

GENERAL: I have the honor to acknowledge the receipt of your communication demanding the evacuation of this fort, and to say in reply thereto that it is a demand with which I regret that my sense of honor and of my obligations to my Government prevent my compliance.

Thanking you for the fair, manly, and courteous terms proposed, and for the high compliment paid me,

I am, General, very respectfully,

Your obedient servant,

ROBERT ANDERSON,

Major U. S. Army, Commanding.

To Brig-Gen. G. T. BEAUREGARD, Commanding Provisional Army C. S. A.

HEAD-QUARTERS PROVISIONAL ARMY C. S. A., }
CHARLESTON, April 11, 1861—11 P. M. }

MAJOR: In consequence of the verbal observations made by you to my aides, Messrs. Chesnut and Lee, in relation to the condition of your supplies, and that you would in a few days be starved out if our guns did not batter you to pieces—or words to that effect;—and desiring no useless effusion of blood, I communicated both the verbal observation and your written answer to my communication to my Government.

If you will state the time at which you will evacuate Fort Sumter, and agree that in the mean time you will

not use your guns against us, unless ours shall be employed against Fort Sumter, we will abstain from opening fire upon you. Colonel Chesnut and Captain Lee are authorized by me to enter into such an agreement with you. You are therefore requested to communicate to them an open answer.

I remain, Major, very respectfully,

Your obedient servant,

G. T. BEAUREGARD,

Brigadier-General Commanding.

Major ROBERT ANDERSON, Commanding at Fort Sumter, Charleston Harbor, S. C.

HEAD-QUARTERS, FORT SUMTER, S. C., }
2.30 A. M., April 12, 1861.

GENERAL: I have the honor to acknowledge the receipt of your second communication of the 11th inst., by Col. Chesnut, and to state, in reply, that cordially uniting with you in the desire to avoid the useless effusion of blood, I will, if provided with the proper and necessary means of transportation, evacuate Fort Sumter by noon on the 15th instant, should I not receive, prior to that time, controlling instructions from my Government, or additional supplies; and that I will not, in the mean time, open my fire upon your forces, unless compelled to do so by some hostile act against this fort, or the flag of my Government, by the forces under your command, or by some portion of them, or by the perpetration of some act showing a hostile intention on your part against this fort, or the flag it bears.

I have the honor to be, General,

Your obedient servant,

ROBERT ANDERSON,

Major U. S. Army Commanding.

To Brig.-Gen. G. T. BEAUREGARD, Commanding Provisional Army C. S. A.

FORT SUMTER, S. C., }
April 12, 1861—3.20 A. M. }

SIR: By authority of Brigadier-General Beauregard, commanding the provisional forces of the Confederate States, we have the honor to notify you that he will open the fire of his batteries on Fort Sumter in one hour from this time.

We have the honor to be, very respectfully,

Your obedient servants,

JAMES CHESNUT, JR., Aide-de-Camp.

STEPH. D. LEE, Capt. S. C. A., and Aide-de-Camp.

Major ROBERT ANDERSON, U. S. Army, Commanding Fort Sumter.

[See PUBLIC DOCUMENTS, Message at First Session Thirty-seventh Congress.]

At thirty minutes past 4 o'clock on the morning of Friday, April 12, the first gun of civil war was fired, discharging a shell from the howitzer battery on James' Island. The sending of this deadly messenger to Major Anderson was followed by a deafening explosion, caused by the blowing up of a building that stood in front of the battery.

While the white smoke was melting away into the air another shell pursued its swift way towards the silent fortification. The missile described its beautiful curve through the balmy air, and falling within the hostile fortress, scattered its deadly contents in all directions.

Fort Moultrie then took up the assault, and in a moment the guns from the Gun Battery on Cummings' Point, from Captain McCready's Battery, from Captain James Hamilton's Floating Battery, the Enfilade Battery, and other fortifications, sent forth their wrath at the grim fortress rising so defiantly out of the sea.

Major Anderson received the shot and shell in silence. But the deepening twilight revealed the stars and stripes floating proudly in the breeze. The batteries continued at regular intervals to belch forth iron shells, and still no answer was returned by the besieged. About an hour after the firing began, two balls rushed hissing through the air and glanced harmless from the stuccoed bricks of Fort Moultrie. The embrasures of the besieged fortress gave forth no sound again till between six and seven o'clock, when, as if wrathful from enforced delay, from casemate and parapet there poured a storm of iron hail upon Fort Moultrie, Stevens' Iron Battery, and the Floating Battery. The broadside was returned with spirit by the gunners at those posts.

The firing now began in good earnest. The curling white smoke hung above the angry pieces of hostile brothers, and the jarring boom rolled at regular intervals on the anxious ear. The atmosphere was charged with the smell of foul saltpetre, and, as if in sympathy with the melancholy scene, the sky was covered with heavy clouds, and every thing wore a sombre aspect.

A brisk fire was kept up by all the batteries until about 7 o'clock in the evening, after which hour the guns fired at regular intervals.

The effect during the night was grand and terrific. The firing reached its climax at about ten o'clock. The heavens were obscured by rain-clouds, and the horizon was as dark as Erebus. The guns were worked with vigor, and their booming was heard with astonishing distinctness, because the wind was blowing in-shore. At each discharge a lurid sheet of flame was belched forth, and then another and another was seen before the report reached the ears. Sometimes a shell would burst in mid-air, directly over the doomed fortress, and at all times the missiles of this character could be distinguished in their course by the trail of fire left momentarily behind them.

The fire from all the forts, Sumter included, and from the batteries of the Confederate States, was kept up with vigor till early dawn. Then the rapidity of the discharges gradually diminished.

Such was the appearance of the contest during the first day and night.

The batteries firing upon Sumter were, as nearly as could be ascertained, armed as follows:

On Morris' Island.—Breaching battery No. 1, 2 42-pounders; 1 12-pounder, Blakely rifled gun.

Mortar battery, (next to No. 1,) 4 10-inch mortars.

Breaching battery No. 2, (iron-clad battery,) 3 8-inch columbiads.

Mortar battery, (next to No. 2,) 3 10-inch mortars.

On James' Island.—Battery at Fort Johnson, 3 24-pounders, (only one of them bearing on Fort Sumter.)

Mortar battery, south of Fort Johnson, 4 10-inch mortars.

Sullivan's Island.—Iron-clad (floating) battery, 4 42-pounders.

Columbiad battery No. 1, 1 9-inch Dahlgren gun.

Columbiad battery No. 2, 4 8-inch columbiads.

Mortar battery, west of Fort Moultrie, 8 10-inch mortars.

Mortar battery, on parade, in rear of Fort Moultrie, 2 10-inch mortars.

Fort Moultrie.—3 8-inch columbiads; 2 8-inch S. C. howitzers; 5 32-pounders; 4 24-pounders.

At Mount Pleasant.—1 10-inch mortar.

Total, firing on Fort Sumter, 80 guns, 17 mortars.

Of the 43 workmen constituting the engineer force in Fort Sumter, nearly all volunteered to serve as cannoniers, or to carry shot and cartridges to the guns.

The armament of the fort was as follows:

Barbette Tier.—Right flank.—1 10-inch columbiad; 4 8-inch columbiads; 4 42-pounders.

Right face.—None.

Left face.—3 8-inch sea-coast howitzers; 1 32-pounder.

Left flank.—1 10-inch columbiad; 2 8-inch columbiads; 2 42-pounders.

Gorge.—1 8-inch sea-coast howitzer; 2 32-pounders; 6 24-pounders.

Total in barbette, 27 guns.

Casemate Tier.—Right flank.—1 42-pounder; 4 32-pounders.

Right face.—3 42-pounders.

Left face.—10 32-pounders.

Left flank.—5 32-pounders.

Gorge.—2 32-pounders.

Total in casemate, 21 guns. Total available in both tiers, 48 guns.

Besides the above, there were arranged on the parade, to serve as mortars, 1 10-inch columbiad to throw shells into Charleston, and 4 8-inch columbiads to throw shells into the batteries on Cummings' Point. The casemate guns were the only ones used. Of these, those that bore on Cummings' Point were the 42-pounder in the pan-coupé of the right gorge angle; the 32-pounder next to it on the gorge, which, by cutting into the brick wall, had been made to traverse sufficiently; and the 32-pounder next the angle on the right flank, which, by cutting away the side of the embrasure, had been made to bear on a portion of the point, although not on the breaching batteries.

The guns of the first tier, that bore on Fort Johnson, were 4 32-pounders, on the left flank; of these one embrasure had been, by order, bricked up.

The guns that bore on the three batteries on the west end of "Sullivan's Island" were 10 32-pounders, situated on the left face, and one at the pan-coupé of the salient angle, (four embrasures being bricked up.)

The guns bearing on Fort Moultrie were 2 42-pounders, situated on the right face, and one at the pan-coupé of the right shoulder angle.

The supply of cartridges, seven hundred in number, with which the engagement commenced, became so much reduced by the middle of the day, although the six needles in the fort were kept steadily employed, that the firing was forced to slacken, and to be confined to six guns, two firing towards Morris' Island, two towards Fort Moultrie, and two towards the batteries on the west end of Sullivan's Island.

At 1 o'clock on the 12th, two United States

men-of-war were seen off the bar, and soon after, a third appeared.

The effect of the fire was not very good, owing to the insufficient calibre of the guns for the long range, and not much damage appeared to be done to any of the batteries except those of Fort Moultrie, where the two 42-pounders appeared to have silenced the gun for a time, to have injured the embrasures considerably, riddled the barracks and quarters, and torn three holes through the flag. The so-called "floating battery" was struck very frequently by shot, one of them penetrating at the angle between the front and roof, entirely through the iron covering and wood work beneath, and wounding one man. The rest of the 32-pound balls failed to penetrate the front or the roof, but were deflected from their surfaces, which were arranged at a suitable angle for this purpose.

The columbiad battery and Dahlgren battery, near the floating battery, did not appear to be much injured by the few shots that were fired at them. Only one or two shots were fired at Fort Johnson, and none at Castle Pinckney or the city.

The fire towards Morris' Island was mainly directed at the iron-clad battery, but the small calibre of the shot failed to penetrate the covering when struck fairly. The aim was therefore taken at the embrasures, which were struck at least twice, disabling the guns for a time. One or two shots were thrown at the reverse of batteries "3" and "4," scattering some groups of officers and men on the lookout, and cutting down a small flagstaff on one of the batteries.

The barracks caught fire three times during the day, from shells apparently, but each time the flames, being in the first or second stories, were extinguished by a pump and application of the means at hand.

The effect of the Confederate fire upon Fort Sumter during the day was very marked in respect to the vertical fire. This was so well directed and so well sustained, that from the seventeen mortars engaged in firing 10-inch shells, one-half the shells came within or exploded above the parapet of the fort, and only about ten buried themselves in the soft earth of the parade, without exploding. In consequence of this precision of vertical fire, Major Anderson decided not to man the upper tier of guns.

Saturday dawned a bright and lovely day, but the flags of each of the combatants were still flying in stately defiance, and the cannon continued to send forth their fiery thunder. Within Fort Sumter, the last of the rice was cooked that morning, and served with the pork, the only other article of food left in the mess-room. After this the fire was reopened, and continued very briskly as long as the increased supply of cartridges lasted. The surrounding batteries had reopened fire at daylight, and continued it with rapidity. The aim of their guns was better than on the previous day.

It soon became evident that they were firing

hot shot from a large number of their guns, especially from those in Fort Moultrie; and at nine o'clock volumes of smoke issued from the roof of the officers' quarters, where a shot had just penetrated. From the exposed position, it was utterly impossible to extinguish the flames, and permission was given to remove as much powder from the magazine as was possible, before the flames, which were only one set of quarters distant, should encircle the magazine and make it necessary to close it. All the men and officers not engaged at the guns worked rapidly and zealously at this; but so rapid was the spread of the flames that only fifty barrels of powder could be taken out and distributed around in the casemates before the fire and heat made it necessary to close the magazine doors and pack earth against them. The men then withdrew to the casemates on the faces of the fort. As soon as the flames and smoke burst from the roof of the quarters, the surrounding batteries redoubled the rapidity of their fire, firing red-hot shot from most of their guns. The whole range of officers' quarters was soon in flames. The wind, being from the southward, communicated fire to the roof of the barracks, and this, being aided by the hot shot constantly lodging there, spread to the entire roofs of both barracks, so that by twelve o'clock all the wood work of quarters and of upper story of barracks was in flames. Although the floors of the barracks were fire-proof, the utmost exertions of the officers and men were often required to prevent the fire communicating down the stairways, and from the exterior to the doors, window-frames, and other wood work of the east barrack, in which the officers and men had taken their quarters.

The clouds of smoke and cinders which were sent into the casemates by the wind, set on fire many boxes, beds, and other articles belonging to the men, and made it dangerous to retain the powder which had been saved from the magazine. Orders were accordingly given that all but five barrels should be thrown out of the embrasures into the water, which was done.

The small stock of cartridges now only allowed a gun to be fired at intervals of ten minutes.

As the fire reached the magazines of grenades that were arranged in the stair towers and implement rooms on the gorge, they exploded, completely destroying the stair towers at the west gorge angle.

About this time information was brought to the commanding officer that Mr. Wigfall, bearing a white flag, was on the outside and wished to see him. He accordingly went out to meet Mr. Wigfall, passing through the blazing gateway, accompanied by Lieutenant Snyder. In the mean time, however, Mr. Wigfall had passed to an embrasure on the left flank, where, upon showing the white flag upon his sword, he was permitted to enter; and Lieutenant Snyder, entering immediately after, accompanied him down the batteries to where some other officers

were posted, to whom Mr. Wigfall commenced to address himself to the effect that he came from General Beauregard to desire that, inasmuch as the flag of the fort was shot down, a fire raging in the quarters, and the garrison in a great strait, hostilities be suspended, and the white flag raised for this object. He was replied to that the flag was again hoisted on the parapet; that the white flag would not be hoisted, except by order of the commanding officer; and that his own batteries should set the example of suspending fire. He then referred to the fact of the batteries on Cummings' Point, from which he came, having stopped firing, and asked that his own white flag might be waved to indicate to the batteries on Sullivan's Island to cease also. This was refused; but he was permitted to wave the white flag himself, getting into an embrasure for this purpose. Having done this for a few moments, Lieutenant Davis, First Artillery, permitted a corporal to relieve him. Very soon, however, a shot striking very near to the embrasure, the corporal jumped inside and declared to Mr. Wigfall that "he would not hold his flag, for it was not respected."

At this moment, the commanding officer, having reentered through an embrasure, came up. To him Mr. Wigfall addressed nearly the same remarks that he had used on entering, adding some complimentary things about the manner in which the defence had been made, and ending by renewing the request to suspend hostilities in order to arrange terms of evacuation. The commanding officer desiring to know what terms he came to offer, Mr. Wigfall replied: "Any terms that you may desire; your own terms—the precise nature of which General Beauregard will arrange with you."

The commanding officer then accepted the conditions, saying that the terms he accepted were those proposed by General Beauregard on the 11th; namely, to evacuate the fort with his command, taking arms and all private and company property, saluting the United States flag as it was lowered, and being conveyed, if he desired it, to any Northern port.

With this understanding Mr. Wigfall left, and the white flag was raised and the United States flag lowered by order of the commanding officer.

Very soon after, a boat arrived from the city, containing three aides of General Beauregard, with a message to the effect that, observing the white flag hoisted, General Beauregard sent to inquire what aid he could lend in extinguishing the flames, &c. Being made acquainted with the condition of affairs and Mr. Wigfall's visit, they stated that the latter, although an aide of General Beauregard, had not seen him for two days.

The commanding officer then stated that the United States flag would be raised again; but yielded to the request of the aides for time to report to their chief and obtain his instructions.

They soon returned with the approval of all the conditions desired, except the saluting the flag as it was lowered; and this exception was subsequently removed after correspondence.

The evacuation was completed after saluting the flag; in doing which, one man was instantly killed, one mortally and four severely wounded, by the premature discharge of a gun and explosion of a pile of cartridges.

After the cessation of fire, about 600 shot marks on the face of the scarp wall were counted, but they were so scattered that no breached effect could have been expected from such fire, and probably none was attempted except at the right gorge angle. The only effect of the direct fire during the two days was to disable three barbette guns, knock off large portions of the chimneys and brick walls projecting above the parapet, and to set the quarters on fire with hot shot. The vertical fire produced more effect, as it prevented the working of the upper tier of guns, which were the only really effective guns in the fort, being columbiads, 8-inch sea-coast howitzers, and 42-pounders principally, and also prevented the use of the columbiads arranged in the parade to be used as mortars against Cummings' Point.

The weakness of the defence principally lay in the lack of cartridge bags, and of the materials to make them, by which the fire of the fort was all the time rendered slow, and toward the last was nearly suspended.

The contest continued thirty-two hours, and the weapons used were of the most destructive character, and in skilful hands, but no life appears to have been lost on either side.

The garrison was taken by the steamer Isabel to the Baltic, which lay off the harbor, and thence transported to New York. The naval force and supplies which had been sent to the relief of the fort by the Government, arrived off Charleston harbor previous to the commencement of the assault, but were prevented from entering the harbor by a gale of wind, until after the attack began. The vessels, however, continued outside, and there was no communication between them and the fort.

The force and supplies thus sent by the Government was composed as follows:

VESSELS.	GUNS.	MEN.
Sloop-of-war Pawnee,	10	200
Sloop-of-war Powhatan,	11	275
Cutter Harriet Lane,	5	96
Steam transport Atlantic,	—	353
Steam transport Baltic,	—	160
Steam transport Illinois,	—	300
Steamtug Yankee,	Ordinary crew.	
Steamtug Uncle Ben,	Ordinary crew.	
Total number of vessels,		8
Total number of guns, (for marine service,)		26
Total number of men and troops,		1,380

Nearly thirty launches, whose services are useful in effecting a landing of troops over shoal water, and for attacking a discharging battery when covered with sand and gunny bags, were taken out by the Powhatan, and

by the steam transports Atlantic, Baltic, and Illinois.

The official notification of the surrender of the fort, sent by Major Anderson to the War Department, was as follows:

STEAMSHIP BALTIC, off Sandy Hook. }
April 18, 1861—10.30 A. M., via New York. {

Having defended Fort Sumter for thirty-four hours, until the quarters were entirely burnt, the main gates destroyed by fire, the gorge walls seriously injured, the magazine surrounded by flames, and its door closed from the effects of heat; four barrels and three cartridges of powder only being available, and no provisions remaining but pork, I accepted terms of evacuation offered by General Beauregard—being the same offered by him on the 11th instant, prior to the commencement of hostilities—and marched out of the fort on Sunday afternoon, the 14th instant, with colors flying and drums beating, bringing away company and private property, and saluting my flag with fifty guns.

ROBERT ANDERSON,

Major First Artillery Commanding.

HON. SIMON CAMERON,
Secretary of War, Washington.

Major Anderson is a native of the State of Kentucky. He received his first commission as brevet 2d Lieut. of 2d Artillery, on July 1st, 1825, and was an acting Inspector-General in the Black Hawk war, and received the rank of brevet Captain in August, 1838, for his successful conduct in the Florida war. On Sept. 8th, 1847, he was made brevet Major for his gallant and meritorious conduct in the battle of Molino del Rey in Mexico. Upon an improvement of his health, after the surrender of Fort Sumter, he was appointed Brigadier-General, and ordered to the Department of Kentucky. (See KENTUCKY.) Here, his health again failing him, he was obliged to retire from active service.

In South Carolina the removal of Major Anderson with his little force from Fort Moultrie to Fort Sumter was regarded as a hostile act. In the North the act was considered, at the time, as favorable to peace. It was thought that while Fort Moultrie was comparatively weak, and might provoke the assault of a lawless multitude, the impregnable strength of Fort Sumter placed it beyond such a contingency, as it could be reduced only by a regular and protracted siege; thus an immediate collision was avoided. The act was done on his own responsibility, under the liberty allowed in his instructions, thinking that by such a step he would make himself secure against attack, protect the lives of his soldiers, and could better guard the public property; for, in his position at Fort Sumter, he could easily command, and if necessary silence, the batteries of Fort Moultrie.

On the reception of the news of the surrender, a salute of thirty guns was fired at Reading, Penn., in honor of Major Anderson. Three salutes with the same object were fired in Philadelphia. A hundred guns were fired in Boston, Mass.; and the citizens of Taunton, in the same State, voted to present him a sword. The excitement occasioned by this attack united the North in support of the Government.

T

TACONIC SYSTEM. The most interesting subject of discussion among American geologists, shared in to some extent by those of Europe, is the question of the recognition of the "Taconic System" of Dr. E. Emmons. This division of stratified rocks underlying the lower silurian was proposed by him in 1842, in his final report on the geology of that portion of New York of which he had charge; and in 1844 he published a work expressly devoted to this subject, entitled "The Taconic System." The same arrangement was originally proposed by Professor Eaton, the geologist; and Dr. Emmons, in adopting it, subdivided the group as follows, commencing with the lowest member: 1. Granular Quartz; 2. Stockbridge Limestone; 3. Magnesian Slates; 4. Sparry Limestone; 5. Roofing Slates; 6. Silicious Conglomerates; 7. Taconic Slates; 8. Black Slates. He traced the series along the eastern border of New York, from the southern extremity of the State through western Massachusetts and central Vermont into Canada, and named it from the range of mountains containing these strata, which runs nearly north and south near the eastern boundary line of New York. He and other geologists afterwards recognized the same group as extending the whole length of the Appalachian chain, and attaining a thickness of some 30,000 feet. Its metamorphic character, the uplifted and even supposed overturned position of the strata, and the obscurity of the few fossils they contained, had always rendered it extremely difficult to determine its true relations to the adjacent. What Dr. Emmons regarded as its upper members seemed indeed to pass under the gneiss of the Green Mountains, which Dr. E. regarded as a primitive azoic rock; and this could be explained only on the supposition of a grand overthrow of the whole belt of palaeozoic rocks. The fossils observed were a few graptolites in the black slates, and in some of the other strata fucoides, what appeared to be trails of annelides, and two trilobites, which Dr. E. designated *Atops trilineatus* and *Elliptocephala asaphoides*, and believed to be characteristic of the system, and of especial interest as the oldest representatives of animal life. His views were opposed from the first by most of the American geologists. The Professors Rogers of Pennsylvania and Virginia found, as they believed, a gradual passage of the sandstones, shales, and limestones of the lower silurian, into these obscure groups on leaving their more western and comparatively little disturbed outcrops, and approaching the highly metamorphic districts on the eastern side of the Appalachian chain, thus proving the two to be of the same age; and Professor Hall, of the New York survey, regarded the trilobites of Dr. Emmons, the first named, as identical with the *Trianthrus Beckii*, the characteristic trilobite of the Utica

slate, and referred the other to the genus *Olenus*, another species of which was known in the Hudson River slates, and in no lower rocks. Thus both on stratigraphical and palaeontological grounds the most eminent geologists of the country classed these disputed strata with the lower silurian, and the Taconic system was naturally treated with neglect. In Canada the same group has been traced by the Canadian geologists, from the northern extremity of Vermont to the neighborhood of Quebec, and thence along the south side of the St. Lawrence to the mouth of that river, at Cape Gaspé; and has everywhere been referred to the Hudson River group of the New York survey, or the upper members of the lower silurian. It is not a little remarkable, that after this question had been considered settled by most geologists for as many as 10 or 15 years, it should have been brought up again by a geologist in Austria, M. Joachim Barrande, who recognized in the description, by Professor Hall, of three trilobites found in the uppermost slates of the Hudson River group, near the town of Georgia, Vermont, and named by him *Olenus Thompsoni*, *O. Vermontana*, and *Peltura (Olenus) holopyga*, the characters of the trilobites of the primordial fauna of Europe, a new group of fossils established by him, of an older date than those of silurian age. Hence, on the ground that each geological epoch has its proper and characteristic forms, which once extinct reappear no more, he questions whether these fossils are not from a formation older than the Potsdam sandstone, and that this is the "Taconic group" of Dr. Emmons.

The discovery, in 1860, of a great number of mollusca, articulata, graptolida, and radiata in the calcareous strata of the Quebec group, found near Quebec, Canada, a formation considered of the same age with the slates of Georgia, Vermont, furnished full evidence of this group being at least as ancient as the Potsdam sandstone, and perhaps belonging to the primordial zone of Barrande. Professor Hall, however, while admitting that these rocks on palaeontological evidence are of greater age than had been before admitted, still hesitates to admit that the occurrence of a small number of established primordial types should be sufficient authority for bringing into this zone a large number of genera associated with them, and heretofore regarded as beginning their existence in the second stage, or succeeding fauna; and consequently does not recognize the lower portion of the rocks of the Quebec group as constituting a part of the Taconic system.

Other evidence of the occurrence of the primordial zone in the United States is afforded by the discovery of the trilobite *Paradoxides Harlani*, in the metamorphic slates at Braintree, Mass., announced by Professor W. B. Rogers

in 1856. Until this discovery, data were entirely wanting upon which to base the age of these palæozoic slates; and this genus being peculiar in Bohemia, Sweden, and Great Britain, to the lowest fossiliferous strata, the slates are now referred to the same position, and are claimed by the advocates of the Taconic system as belonging to the lower portion of this group.

In Wisconsin and Iowa, the lowest fossiliferous rocks also contain *Paradoxides*, *Dikellocephalus*, &c., which render it questionable whether they too do not belong to an older group than the Potsdam sandstone, to which they have heretofore been referred.

The recognition of the Taconic system is strongly opposed by Mr. T. Sterry Hunt, of the Canadian survey. He does not admit the overturned position of the strata as explained by Dr. Emmons; nor the greater age of the Green Mountain gneiss, than that of the rocks it rests upon. He considers this the Sillery sandstone metamorphosed, and in its regular position upon the granular quartz and Stockbridge limestone, which with the other groups, excepting the Taconic slates, and Black slates, (7 and 8 of the series named above), are regarded as the Quebec group, having the same stratigraphical position and lithological characters; and this group by its fossils is the palæontological equivalent of the calciferous sandrock of the lower silurian. The slates beneath, (which Dr. Emmons places at the summit of his system,) Mr. Hunt admits, may contain a fauna distinct from the Potsdam, and hence "might be retained under the name of the Taconic formation, as a lower member of the primordial zone, to which the Potsdam sandstone unquestionably belongs."

* * * "It yet remains to be seen whether Dr. Emmons can retain from the wreck of his system the lower slates as a Taconic formation older than the Potsdam sandstone of Lake Champlain, and subordinate to the primordial zone, whose fossils he was the first to recognize."

The subject is discussed in a number of papers, in the March, May, and November numbers of the "American Journal of Science" for 1861, and also in the "Proceedings of the Boston Society of Natural History," 1860-62.

TARIFF. The tariff of duties on imported goods has been the means on which the Federal Government, during its existence, may be said to have exclusively depended for its support, and it has been amply sufficient, not only for that purpose, but for affording money to extend the territories, carry on wars, execute treaties, and accumulate a large property in lands, buildings, war materials, &c. It has also been for many years an issue of animating interest between political parties, and thereby for a long time postponed more exciting and dangerous questions. The friends and opponents of the measure have in the main admitted that it is the best means for raising the public revenue since direct taxes, although readily paid for State, town, and county purposes, are impolitic for Federal

revenue. It has nevertheless been charged by the opponents of duties that their ultimate effect is very injurious to the agricultural interests. The great wealth of the country has consisted in its cheap lands, from which large annual products are drawn; but these, being greatly in excess of the home consumption, derive their chief value from the exports to foreign countries. The proceeds come home in the shape of goods on which the tax is laid, not only for the purpose of revenue, but to protect the home manufacture of the same article, which is raised in price to the consumer to the amount of the tax; consequently the agricultural producer who consumed the imported or domestic goods, paid not only the Government tax, but the tribute or bonus to the manufacturer. The result in a long period manifests itself in vast wealth to those manufacturing districts that were formerly poor, and in continued comparative poverty in the agricultural regions, where much wealth has been produced. The friends of the tariff denied this effect, but alleged that to admit foreign goods freely in exchange for produce would ruin the whole country. These debates and discussions had at times occasioned much excitement; but, nevertheless, when the Government has, through commercial revulsions, been in want of money, all parties have united in increasing the tariff of duties. The revenue from this source has, in times of prosperity and great commercial activity, far exceeded the wants of the Government, and it has fallen short of those demands when financial reverses have overtaken the country. This has been a main reason why there has been so little stability in the revenue laws. In the forty years, up to 1860, some twelve general changes took place in the rates charged, and in 1861 the difficulties growing out of the war united all parties in support of higher duties, and three alterations took place in the view of obtaining more revenue for the Government. The protectionists did not fail, however, to seize the opportunity for discriminating in favor of the articles in which they were interested, even to the extent of diminishing the revenue by prohibiting the importation.

The operation of high duties, at a time of much general commercial depression, has more of a prohibitory nature by far, than in times of activity and speculative excitement. The prosperity of the past few years, with abundance of money and raw materials, had stocked the markets with goods that found an inadequate demand when the war paralyzed trade. The tendency of prices was downward, and such a moment was not propitious for higher duties, which raised the cost of goods. The new tariff did not therefore, in the first few months of its operation, produce the revenue expected from it.

The following table shows the alterations that have taken place since 1821, the amount of customs revenue, and the annual imports free and dutiable, with average rate of duty upon the whole imports:

YEARS.	Customs.	IMPORTS.			Average on duty.
		Free.	Dutiable	Total.

1846 to 1857	10 "	52	523,957,872	2,173,428,818	244
1857 to 1860	3 "	48	144,542,956	741,213,216	204
Total...	39	34	\$1,308,546,177	\$4,709,924,145	29

The highest amount of duties ever received in any one year was in 1854, and the aggregate revenue was 25 per cent. of the dutiable imports. The highest average of duty was in 1830, under the tariff of 1828, with the additional duties of 1830. The aggregate revenue was then over 48 per cent. of the dutiable imports, and the free list was by no means large. In the following year additions were made to the free list, and under the compromise of 1833 biennial reductions in rates were made until the year 1842. In that and the following year, owing to the collapse in financial affairs, the revenue of the Government was small, and higher duties were imposed to improve the revenue. In 1846 the principle of protection was repudiated, and a tariff so imposed as to yield the largest revenue was enacted. For this purpose the whole list was divided into a

number of schedules, each of which bore a different ad valorem duty. Simultaneously with this change a warehouse system and the Independent Treasury plan of finance were adopted. It happened also at the same time that, the harvests of Europe being short, a large export of breadstuffs took place, which necessarily enhanced the imports and consequently the revenue. From that time up to 1857 there was a regular increase in the amount of dutiable goods imported, bringing a larger revenue to the Government. The surplus in the Treasury accumulated, and considerable sums had been expended in the purchase of the Government stock at high premiums, in order to deplete the Treasury. Under these circumstances the tariff of 1857 was framed, lowering the rates of duties, and the operation of that tariff was marked by a financial revolution which reduced the amount of dutiable imports, notwithstanding the lower duties, and the revenue fell off 22 millions. The increase in the free list caused a decline in the average rate of duty. The commercial disasters of 1861 made it requisite again to raise the duties, at the same time the withdrawal of the Southern members from Congress left the protectionists in a majority, and the so-called Morrill Tariff, passed in March, came into operation in April. The change produced by this tariff was very great, not only in the rates levied, but in the manner of levying. The ad valorem principle of 1846 was set aside for specific du-

ties, and in some cases both duties were levied on the same article, as in the case of woollens, on which 25 per cent. ad valorem is charged, and also 12 cents per lb. The complications were so great that it became almost impossible to make the correct entries, and to add to the difficulties, the non-intercourse with the Southern ports deranged the warehouse usages. The tariff reduced duties on certain articles, and in these cases entries from warehouse were permitted at the reduced rates; consequently the quantities placed in warehouse were large in March. The following orders are illustrative of the difficulties that presented themselves:

TREASURY DEPARTMENT, April 1, 1861.

SIR: Referring you to the Department's letter of the 30th ult., directing that no further entries of merchandise for transportation in bond can be allowed relative to shipments to the ports of South Carolina, Georgia, Alabama, Mississippi, Louisiana, Florida, and Texas, I have now to instruct you that transportation bonds for merchandise to the ports referred to will be cancelled on the payment of duties at your office, in cases where the party shall satisfy you by his affidavit, to be filed with his bond, that the merchandise arrived at the port of destination, and that it was found impracticable, by reason of the existing condition of the affairs in those ports, to obtain the requisite cancelling certificate. Very respectfully, your obedient servant,

S. P. CHASE, Secretary of the Treasury.

AUGUSTUS SCHELL, Esq., Collector, &c., New York.

The following order was issued by the collector:

CUSTOM HOUSE, New York, April 1, 1861.

Under the tariff which goes into effect from and after this day, the specific duties will be made up by the entry clerks, in every case where it is practicable, upon the invoice quantity or measurements, subject to readjustment on receipt of the proper returns.

In cases where the duty cannot be made up from the invoice, a deposit will be taken sufficient to cover the duty, the estimate of which to be checked in the naval office. The accompanying schedule will serve as a guide to the entry clerks in estimating the amounts to be received as deposits on certain articles.

In cases where articles are subject to rates of duty, varying according to the return of measurement, the highest rate (as was the practice under the former

tariff) will be assessed in the first instance, to be subsequently reduced on liquidation, should the returns when received, warrant such reduction. Under this rule, 30 per cent. ad valorem, will be the estimated charge on all linens and silks.

In all cases where the duties are ad valorem, specific, or secured by deposits, the invoice values will be reduced by the entry clerks to United States currency.

The invoice amount will be written in full on the invoice (as formerly) in all cases, with rate of duty, ad valorem or specific.

No amended entries will hereafter be made, but the original entry will be amended, (in red ink,) and in cases where a further sum of duty is due, immediate payment will be required.

The same rules will apply to entries for warehousing. When goods are withdrawn at a less rate of duty, by virtue of the provisions of the new tariff, the difference of duty will be noted on the entry, and endorsed on the bond, to balance the amount originally assessed.

AUGUSTUS SCHELL, Collector.

To the Entry and Amendment Clerks.

The following protest was filed with the collector by a firm engaged in the leather trade:

To the Collector of the Port of New York:

SIR: We hereby protest against the payment of 15 per cent. charged on seven cases leather contained in this entry, because the duties on the same kind, description, character, and quality of leather are not levied and collected in other ports of the United States, by authority thereof, to wit: in the ports of the States of South Carolina, Georgia, Florida, Alabama, Louisiana, and others; whereas, by the first clause of the eighth section of the first article of the Constitution of the United States it is expressly declared that "all duties, imposts, and excises shall be uniform throughout the United States;" and also by the fifth clause of the ninth section of the same article it is declared that "no preference shall be given by any regulation of commerce or revenue, to the ports of one State over those of another." We pay the amount exacted in order to get possession of the goods, and claim to have the full amount refunded.

The increasing necessities of the Government required a further alteration of the tariff, in which also some needful modifications were requisite for its working. In August a new change was made, and the leading charges were, as compared with the rates of former tariffs, as follows:

COMPARATIVE RATES OF DUTY, 1842-1861.

	1842.	1848.	1857.	March, 1861.	August, 1861.
Acid, tartaric.....	20 per cent.	20 per ct.	4 per ct.	10 per cent.	10 cents lb.

Cocoa, prepared,.....lb.	1 cent lb.	10 per ct.	4 per ct.	free.	8 cents lb.

An instance of the difficulties that were presented by the operation of the new tariff, as compared with the old, presents itself in the case of cottons. Under former tariffs there was one rate, viz.: by that of 1842, 30 per cent.; of 1846, 25 per cent.; and of 1857, 24 per cent., on the invoice value. The tariff of 1861 made nearly 30 different charges on cotton goods. Thus, unbleached cotton cloth, 100 threads or less to the square inch, and weighing less than 5 ounces per square yard, paid 2 cents per square yard; and the same over 5 ounces, 1½ cents, the charge increasing with the number of threads to the square inch. Different charges in all these cases were made for bleached, and still others for colored, ten per cent. ad valorem being added to the square yard duties in the latter. These and other complications produced a great change in the various departments of the custom-house. The appraisers required instruments of various kinds—scales and weights, measures, provers for counting threads, magnifying glasses, gauges and hydrometers—all of which had become necessary in ascertaining the quantities and values of merchandise.

The general depression in business prevented much revenue from the tariff, and in December a new law was passed, raising the duty on teas to 20 per cent., and on coffee to 5 cents; on raw sugar to 2½ cents, clayed do. 3 cents, refined 5 cents, confectionery 8 cents; molasses, 6 cents a gallon. These were all the alterations made by that act. The amount of revenue raised under each act in New York City was as follows:

Period.	1860.	1861.
Jan. 1 to April 1, 3 mos. act of '57	\$10,754,754	\$7,068,564
To Aug. 4 " " '61	11,483,990	6,586,062
" Jan., 1862, 4 " " '61	13,257,699	8,519,119
Total duties.....	\$35,491,443	\$22,174,045
Total value of goods, duty paid,	155,794,422	93,971,920

The average rate for 1860 was 19 per cent., and for 1861 23½ per cent. in the whole year; for the last 5 months, however, it was 34 per cent., and the yield was far less than for the same period the former year; the result was a decline of \$4,738,580, or 35 per cent.

TAYLOR, FORT. This fort is located at Key West, Florida. It forms an irregular quadrangle, with three channel curtains of equal length and a gorge or shore curtain of much greater length. It is situated near the southwest point of the island, in from six to twelve feet of water, and distant from the shore three hundred yards. The foundation is granite, and the superstructure brick. The scarp walls are eight feet thick, and rise to the height of forty-one feet from the water's edge. It has two tiers of casemates, and one barbette tier, and mounts one hundred and twenty 8 and 10-inch columbiads on the channel fronts, and forty-five heavy guns on the shore fronts. This remains in the possession of the United States, and is strongly garrisoned.

TELEGRAPH, ELECTRIC. The electric telegraph during 1861 made rapid progress in its

appointed work of putting a girdle round the earth. The overland line, from western Missouri to San Francisco, was completed on the 22d of October, thus placing that city in immediate connection with New York and the other eastern cities. The first continuous message sent, was the following: "The Pacific to the Atlantic sends greeting; and may both oceans be dry before a foot of all the land that lies between them shall belong to any other than one united country." On the first day after the line was opened for business, forty through despatches were sent, besides a considerable number of congratulatory messages. As the difference in longitude between New York and San Francisco is about 48° 30', if a despatch could be sent instantaneously through, from the former to the latter city, it would reach San Francisco three hours and fifteen minutes before the time at which it left New York, according to the clocks of each city; so that a despatch sent from New York to San Francisco at half-past ten o'clock A. M., might find the man to whom it was addressed yet in bed; and one sent from New York after business hours, would reach there about mid-day. Practically, however, the transmission of a despatch takes an appreciable amount of time, as the weather is rarely in a condition in which the message can be transmitted without one or more (often four or five) repetitions at different points. On rare occasions, when the atmosphere along the entire line is in a proper condition, messages have been sent even from Halifax to San Francisco without interruption.

The Russian Government, stimulated in part to the measure by the zeal and enterprise of Perry McD. Collins, Esq., United States commercial agent to the Amoor region, prosecuted with great energy the erection of a line of telegraph to the lower Amoor, and has given encouragement and aid to a company for constructing a line to connect this with ours at San Francisco. A telegraph line is now building from San Francisco to Victoria, on Vancouver's Island, and this will be extended to Sitka Island. In November, 1861, only 5,000 miles remained to complete the connection between western Europe and America, by way of Siberia, and this distance was rapidly shortening. Three routes were proposed: the first, by way of Behring's Straits, would require only about 40 miles of submarine cable; the second, from the mouth of the Amoor to Saghalien Island, and thence up the east coast of that island, across the sea of Okhotsk to Kamtschatka, and across at or near Behring's Straits, would require three submerged cables, none of them of great length, the most considerable, that across the sea of Okhotsk, being only about 400 miles long; the third route, and the one looked upon with the most favor by the Russian Government, would be to extend one branch through the newly acquired Russian possessions to Peking, and if possible to Shanghai, and another by Saghalien Island, across the strait of La Pe-

rouse, through the island of Yesso to Hakodadi, thence across the strait of Matsmai, through Nippon to Nagasaki and Yeddo, and joining this line in Yesso to carry it across the Koorile Islands to Kamtchatka, and thence across Behring's Island and the Aleutians to Point Alaska, in Russian America. This would require several sections of submerged cable, but not more than one or two of them exceeding 60 miles in length. By one or other of these routes, it seems certain that Eastern Asia will be placed in communication with us, as well as with Western Europe within the next three or four years.

Mr. Cyrus W. Field, who was so indefatigable in his efforts to complete the Atlantic cable some years ago, has again revived his project, and after spending some months in England has succeeded in procuring such assurances of aid from the British Government, and offers by the manufacturers to share the risk of another attempt, as to render the reconstruction of that line probable at an early period. A new invention for the protection of the cable, or rather a new arrangement of the enveloping wires and cable, obviating the tendency to "kink," which was so serious a difficulty in the former cable, and a better method of paying out, render its success now more certain.

Another route for telegraphic communication between Europe and America has been agitated by the persevering efforts of Mr. Taliaferro P. Shaffner, a citizen of the United States, who as early as 1854 procured from the king of Denmark a concession for the construction of such a communication by way of the Faroe Islands, Iceland, and Greenland, and when in 1859-60 succeeded in having the route explored and soundings made, partly at the cost of the British Government, and secured a report in favor of the feasibility of his project. As yet, however, no measures are known to have been taken for the laying of a line by this route. The distances to be crossed by submerged cables is, indeed, much less than by the route proposed by Mr. Field; but there are liabilities to the destruction of the cable by icebergs, and a vast extent of intensely cold, inhospitable country to be traversed, which would make its success exceedingly problematical.

Of smaller telegraphic enterprises, perhaps the most important is the connection of Fortress Monroe with Baltimore by means of a submerged cable across Chesapeake Bay. The first effort failed, from the breaking of the cable in consequence of a storm while being laid; and in the second, the cable was broken by an anchor two or three days after it was laid. A third effort has succeeded, an improved method of protecting the cable having been adopted. A temporary telegraphic communication has been established with the army in Eastern Virginia throughout most of their progress, and has greatly facilitated military operations. The aeronauts who have used the balloon for the purpose of ascertaining the positions and condi-

tion of the Confederate camps and fortifications, have also maintained telegraphic communication with the camp from which they ascended, and have reported their observations at the instant of making them.

TENNESSEE. This fertile State lies south of Kentucky, and north of Georgia, Alabama, and Mississippi. North Carolina bounds it on the east, and the Mississippi River on the west. Its greatest length from east to west is about 430 miles, and its breadth 110 miles. The State is commonly divided into three sections; the part east of the Cumberland Mountains is called East Tennessee; that between the Cumberland Mountains and the Tennessee River, Middle Tennessee; and west of this river it takes the name of West Tennessee. On the east it is separated from North Carolina by the Appalachian chain of mountains, of which the Cumberland, an outlying ridge, enters the State from Kentucky. The height of the mountains of this ridge is estimated at from 1,000 to 2,000 feet. They are wooded to the top, and embosom delightful and fertile valleys. Middle Tennessee is moderately hilly, while West Tennessee is either level or gently undulating. Indian corn, tobacco, and cotton are the great staples. The population of the State in 1860 was 826,828 white; 7,235 free colored; and 275,784 slaves; total, 1,109,847.

The Legislature of Tennessee holds its regular sessions in the odd years, commencing on the third Monday of October. The members are elected on the first Thursday of the preceding August. After it has once adjourned *sine die*, it cannot hold a second session, unless convened by the Governor, who is authorized by the Constitution to call the General Assembly together on extraordinary occasions, by proclamation; and, in that case, he must state to them, when assembled, the purposes for which they were convened; and then, "they shall enter on no legislation except that for which they were specially called together."

In August, 1859, the members who were to constitute the 33d General Assembly were elected. At the canvass preceding the election, the people had presented to them no question regarding national affairs. The session was distinguished by nothing out of the ordinary course of State legislation. Before the adjournment, about the 24th of March, 1860, electoral tickets for President and Vice-President of the United States had been presented to the people of the Union; and, in Tennessee, there was a ticket for Breckinridge, another for Douglas, and a third for Bell, her own citizen. No ticket was offered for Lincoln. The electors for each of the candidates industriously canvassed the entire State, and each one represented his candidate as an unconditional Union man, while Bell was recommended to the people as the special advocate of the "Constitution, the Union, and the enforcement of the laws." He carried the State by a majority of 4,565 over Breckinridge, the next highest

candidate. The total vote of the State was as follows: Lincoln, ———; Douglas, 11,850; Breckinridge, 64,709; Bell, 69,274. The election, however, having resulted in the choice of Lincoln, the people of Tennessee quietly acquiesced. But Isham G. Harris, the Governor, holding extreme opinions upon the subject of slavery, warmly sympathized with the secession movement, which followed in the Southern slave States immediately after the election, and maintained an active correspondence with its leaders. Accordingly he called a session of the General Assembly for the 7th of January, 1861; and in his message to the body, on its assembling, he stated that the purpose of the call was, that they should deliberate upon the "crisis" in the affairs of the country, which had been produced, as he said, by "the systematic, wanton, and long continued agitation of the slavery question, with the actual and threatened aggressions of the Northern States and a portion of their people, upon the well-defined, constitutional rights of the Southern citizens; the rapid growth and increase, in all the elements of power, of a purely sectional party, whose bond of union is uncompromising hostility to the rights and institutions of the fifteen Southern States." After a long recital of grievances, he declared that he submitted to the discretion of the Legislature, "the whole question of our" (the State's) "Federal relations;" and though having no doubt himself as to the necessity and propriety of calling a State Convention, he yet recommended that the law to be passed should submit "to the people of the State the question of convention or no convention." The evils complained of, he said, could be obviated by certain amendments to the national Constitution, which were: 1. The establishment of a line through the territories to the Pacific, all the territory north of which should be forever free, and all south of it *forever* slave. 2. Any State refusing to deliver a fugitive slave, to pay the owners double his value. 3. Security in the possession of slaves by masters travelling through, or sojourning in a free State; and slaves lost, in such cases, to be paid for by the State in which the escape occurred. 4. A prohibition against the abolition of slavery in the District of Columbia, and in dockyards, navy-yards, arsenals, or any other district in a slave State under the national jurisdiction. 5. These provisions never to be changed, except by the consent of all the slave States. He had, he said, no hope of such concessions, for "two months had passed since the development of the facts which make the perpetuity of the Union depend *alone* upon the giving to the South satisfactory guarantees for her chartered rights, yet no proposition at all satisfactory" had been made "by any member of the dominant and aggressive party" of the North.

A controlling conservative sentiment manifested itself in the Legislature, which, while it endorsed the position that the grant of additional guarantees to the South should be made

a condition of Tennessee's remaining in the Union, determined that the State should not be precipitated into secession. The bill calling for a convention of the people of the State, provided that any ordinance or resolution which might be adopted by said Convention having for its object a change of the position or relation of the State to the National Union, or her sister Southern States, should be of no binding force or effect until it was submitted to or ratified by the people, and required a vote equal to a majority of the votes cast in the last election for Governor to ratify it. Thus the people had an opportunity, in voting for delegates, to declare for or against secession; and should the action of the Convention contemplate any change in the Federal relations of the State, they had still the opportunity of endorsing or overruling alike their former decision and the action of the Convention. The election for members of the Convention was to be held on the 9th of February, the Convention to assemble on the 25th.

At this same date, in a public meeting, held in Nashville, it was urged that the third party at the last Presidential election, the "Constitutional Union party," and its champion, John Bell, had held the doctrine that the election of Mr. Lincoln would be a just cause for the dissolution of the Union. Mr. Bell, who was at the meeting, rose and denied the charge. Upon this, cheers rang through the hall, satisfying the audience of the predominant Union feeling in that assemblage, notwithstanding the disunion element had mustered its strength. Mr. Bell, before he sat down, expressed the hope and conviction that all would be well with the Union; and this declaration was received with great applause.

The resolutions of the Legislature of New York were replied to with moderation and also with great decision, as follows:

Resolved, That the Legislature of Tennessee has heard with profound regret the resolution come to by the Legislature of the State of New York, offering men and money to the Government, in order to coerce sovereign States. That the General Assembly of Tennessee sees in the action of the Legislature of New York an indication of the disposition to complicate existing difficulties, and to force the Southern States into submission; and, so regarding it, the State of Tennessee requests to inform the State of New York that, if any force be sent South for the purpose of subjugating the people thereof, the people of the State will join as one man to resist such an invasion at all hazards and to the last extremity.

The result of the election for delegates to a State convention was highly successful to the friends of the Union. Even West Tennessee gave a Union majority. The following returns, except a few counties, show the relative strength of union and disunion in the State:

	<i>Union.</i>	<i>Disunion.</i>
East Tennessee.....	30,903	5,577
Middle Tennessee.....	36,809	9,828
West Tennessee.....	24,091	9,344
Total.....	91,803	24,749
Union majority.....		67,054

The returns from all the counties made the actual majority 64,114. The question of holding a convention was determined in the negative by a large majority, thus declaring that there was no need for a convention at all to determine where Tennessee should stand. The Union delegates at Memphis were elected by a majority of 400. The vote of the State on the convention question was as follows:

East Tennessee voted no convention by 25,611 majority, or four and a quarter to one. Middle Tennessee 1,382 majority; but West Tennessee gave for a convention 15,118 majority. The vote for no convention was 69,673. The total vote for and against convention was 127,471, with a majority against the meeting of a convention of 11,875.

The people decided that no convention should be held, chiefly because they had seen that all the conventions which had been held in the Southern States had withdrawn their States from the Union, and then had proceeded to sit on their own adjournments, as if they conceived they possessed the right to continue their own existence indefinitely. The loyal people of Tennessee now flattered themselves that they had thus put an effectual stop to the secession movement in the State, and so the secessionists thought as well; and even the Governor seemed, for a time, to have abandoned the scheme.

The proclamation of the President, on the 15th of April, produced an intense feeling throughout the State. The Governor immediately called an extra session of the Legislature, to be convened on the 25th of April. He refused the requisition of the President for troops saying:

Hon. Simon Cameron:

SIR: Your despatch of the 15th inst., informing me that Tennessee is called upon for two regiments of militia for immediate service, is received.

Tennessee will not furnish a man for purposes of coercion, but 50,000, if necessary, for the defence of our rights, and those of our Southern brothers.

ISHAM G. HARRIS, Governor of Tennessee.

At the same time an address was issued to the people of the State by some of her most eminent citizens, as Messrs. Neil S. Brown, Russell Houston, E. H. Ewing, C. Johnson, John Bell, R. J. Meigs, S. D. Morgan, John S. Brien, Andrew Ewing, John H. Callender, and Baylie Peyton.

Patriotic as were their views, they were unable to stem the tide of secession when it came in the flood. They say:

"We unqualifiedly disapprove of secession, both as a constitutional right, and as a remedy for existing evils; we equally condemn the policy of the Administration in reference to the seceded States. But while we, without qualification, condemn the policy of coercion as calculated to dissolve the Union forever, and to dissolve it in the blood of our fellow-citizens, and regard it as sufficient to justify the State in refusing her aid to the Government in its attempt to suppress the revolution in the seceded

States, we do not think it her duty, considering her position in the Union, and in view of the great question of the peace of our distracted country, to take sides against the Government. Tennessee has wronged no State or citizen of this Union. She has violated the rights of no State, North or South. She has been loyal to all, where loyalty was due. She has not brought on this war by any act of hers. She has tried every means in her power to prevent it. She now stands ready to do any thing within her reach to stop it. And she ought, as we think, to decline joining either party; for in so doing they would at once terminate her grand mission of peace-maker between the States of the South and the General Government. Nay, more; the almost inevitable result would be the transfer of the war within her own borders, the defeat of all hopes of reconciliation, and the deluging of the State with the blood of her own people."

On the 25th of April, the Legislature assembled for the third time, although the members had been elected without any reference to the momentous questions now about to be considered. In the Assembly, on the same day, the following resolution was offered:

Resolved, That upon the grave and solemn matters for our consideration, submitted by the Governor's Message, with a view to the public safety, the two Houses of this Legislature hold their sessions with closed doors whenever a secret session in either House may be called for by five members of said House, and that the oath of secrecy be administered to the officers and members of said House.

The resolution was adopted. Ayes 42; noes 8.

The Message of the Governor was very strong and decided in urging immediate secession. In it he said:

"I respectfully recommend the perfecting of an ordinance by the General Assembly, formally declaring the independence of the State of Tennessee of the Federal Union, renouncing its authority, and reassuming each and every function belonging to a separate sovereignty; and that said ordinance, when it shall have been thus perfected by the Legislature, shall, at the earliest practicable time, be submitted to a vote of the people, to be by them adopted or rejected.

"When the people of the State shall formally declare their connection with the remaining States of the Union dissolved, it will be a matter of the highest expediency, I might almost say of unavoidable political necessity, that we shall at the same time, or as soon thereafter as may be, connect ourselves with those with whom a common interest, a common sympathy, and a common destiny identify us, for weal or for woe.

"I therefore further recommend that you perfect an ordinance with a view to our admission as a member of the Southern Confederacy, (which, it is evident, must soon embrace the entire slaveholding States of the South,) to be submitted in like manner, and at the same time, but separately, for adoption or rejection

by the people, so that they may have the opportunity to approve the former and reject the latter, or adopt both, as in their wisdom may seem most consistent with the future welfare of the State. However fully satisfied the Executive and Legislature may be as to the urgent necessity for the speedy adoption of both these propositions, it is our duty to furnish the amplest means for fair and full expression of the popular will."

The Governor next proceeded to argue that, at the opening of a revolution so imminent, he could see no propriety for encumbering the people of the State with the election of delegates to do that which it is in the power of the Legislature to enable them to do directly for themselves. Since it is only the voice of the people that is to be heard, there was no reason, he thought, why they might not as readily and effectively express themselves upon an ordinance framed and submitted to them by the Legislature as if submitted to them by a convention. In case, however, it should be deemed advisable that a convention "representing the sovereignty of the people" should be called by the Legislature, he admitted that a greater degree of harmony and unanimity might be thereby effected.

On the 30th of April, Henry W. Hilliard, commissioner from the Confederate States, appeared before the Legislature and made an address. He said his object was to establish a temporary alliance between Tennessee and the Confederate States, to continue until Tennessee should decide for or against adopting the Constitution of that Government, and becoming one of the Confederate States. He regarded the issue now pending between the North and the South something more than a mere right to hold slaves. It was a question of constitutional liberty, involving the right of the people of the South to govern themselves. "We have said that we will not be governed by the abolition North, the abolition North says we shall," and he would not hesitate to say there was not a true-hearted man in the South but would rather die than submit. He repudiated the idea of settling the pending questions between the North and South by reconstruction "by going back to our enemies." He regarded the Southern system of government established at Montgomery, and based upon slavery, as the only permanent form which could be established in this country.

A letter from Neil S. Brown, formerly Governor of the State, appeared at this time, in which he said:

"I have hoped obstinately against such an alternative, but the conviction is forced upon my mind that it is the settled policy of the Administration, and, so far as I can see, of the whole North, to wage a war of extermination against the South.

"The clouds are gathering in every direction, and the signs now are, that the Border States are to be the battle-ground. In this

view, the first duty is to arm at once; and to talk of keeping out of such a contest, if it comes, is simply idle."

Another, from Gen. Zollicoffer, afterwards a commander in the Confederate army, saying:

"We are involved in war and no mistake, waged for the purpose of humbling the Southern States. It cannot be done. But we must have unity, energy, and action, to save ourselves. Let us drop party and party names. Let us emulate the glorious example of our fathers in arms. We must not, cannot stand neutral, and see our Southern brothers butchered."

On the 29th of April Governor Harris had ordered to be seized sixty-six thousand dollars' worth of Tennessee bonds and five thousand dollars in cash, belonging to the United States, which were in possession of the collector at Nashville. He said:

"This seizure was conditional; the property was to be held in trust until the Government restored the property of the State and its citizens involved in the seizure of the steamer Hillman by troops of the Federal Government."

The steamer Hillman was seized at Cairo by the Illinois troops, because she was laden with munitions and other articles contraband of war. The boat, and property not contraband, was subsequently surrendered to the owners.

The Legislature in secret session, immediately on the 1st of May, passed a joint resolution directing the Governor to enter into a military league with the Confederate States, subjecting "the whole military force of the State" to the control of the Confederate States. Acting upon this authority, the Governor immediately appointed Gustavus A. Henry, Archibald O. W. Totten, and Washington Barrow, as commissioners for that purpose. On the 7th of May he sent a Message to the Legislature, stating that he had appointed the said commissioners on the part of Tennessee, &c., as follows:

To enter into a military league with the authorities of the Confederate States, and with the authorities of such other slaveholding States as may wish to enter into it; having in view the protection and defence of the entire South against the war that is now being carried on against it.

The said commissioners met the Hon. Henry W. Hilliard, the accredited representative of the Confederate States, at Nashville on this day, and have agreed upon and executed a military league between the State of Tennessee and the Confederate States of America, subject, however, to the ratification of the two Governments, one of the duplicate originals of which I herewith transmit for your ratification or rejection. For many cogent and obvious reasons, unnecessary to be rehearsed to you, I respectfully recommend the ratification of this league at the earliest practicable moment.

The convention was as follows:

Convention between the State of Tennessee and the Confederate States of America.

The State of Tennessee, looking to a speedy admission into the Confederacy, established by the Confederate States of America, in accordance with the constitution for the provisional government of said States, enters into the following temporary convention, agree-

ment, and military league with the Confederate States, for the purpose of meeting pressing exigencies affecting the common rights, interests, and safety of said States, and said Confederacy.

1st. Until the said State shall become a member of said Confederacy, according to the constitutions of both powers, the whole military force and military operations, offensive and defensive, of said State, in the impending conflict with the United States, shall be under the chief control and direction of the President of the Confederate States, upon the same basis, principles and footing, as if said State were now and during the interval a member of the said Confederacy—said forces, together with those of the Confederate States, to be employed for the common defence.

2d. The State of Tennessee will, upon becoming a member of said Confederacy, under the permanent Constitution of said Confederate States, if the same shall occur, turn over to said Confederate States all the public property, naval stores and munitions of war, of which she may then be in possession, acquired from the United States, on the same terms and in the same manner as the other States of said Confederacy have done in like cases.

3d. Whatever expenditures of money, if any, the said State of Tennessee shall make before she becomes a member of said Confederacy, shall be met and provided for by the Confederate States.

The vote in the Senate, on the adoption of this treaty, was 14 to 6—absent or not voting, 4; in the House, 42 to 15—absent or not voting, 18.

Meanwhile, the Legislature had not been idle. On the 6th of May it passed an ordinance entitled, "An Act to submit to a vote of the people a Declaration of Independence, and for other purposes." The first section provided that the Governor should, by proclamation, require the respective officers in each county to hold the polls open in their several precincts on the 8th day of June ensuing. The second section provided that the following declaration should be submitted to a vote of the qualified voters for their ratification or rejection:

Declaration of Independence and Ordinance dissolving the Federal relations between the State of Tennessee and the United States of America.

1st. We, the people of the State of Tennessee, waiving an expression of opinion as to the abstract doctrine of secession, but asserting the right as a free and independent people to alter, reform, or abolish our form of Government in such manner as we think proper, do ordain and declare that all the laws and ordinances by which the State of Tennessee became a member of the Federal Union of the United States of America, are hereby abrogated and annulled, and that all obligations on our part be withdrawn therefrom; and we do hereby resume all the rights, functions, and powers which by any of said laws and ordinances were conveyed to the Government of the United States, and absolve ourselves from all the obligations, restraints, and duties incurred thereto; and do hereby henceforth become a free, sovereign, and independent State.

2d. We furthermore declare and ordain, that Article 10, Sections 1 and 2 of the Constitution of the State of Tennessee, which requires members of the General Assembly, and all officers, civil and military, to take an oath to support the Constitution of the United States, be and the same are hereby abrogated and annulled, and all parts of the Constitution of the State of Tennessee, making citizenship of the United States a qualification for office, and recognizing the Constitution of the United States as the supreme law of this State, are in like manner abrogated and annulled.

3d. We furthermore ordain and declare that all rights

acquired and vested under the Constitution of the United States, or under any act of Congress passed in pursuance thereof, or under any laws of this State, and not incompatible with this ordinance, shall remain in force and have the same effect as if this ordinance had not been passed.

The third section provided that the election should be by ballot, and that those voting for the declaration and ordinance should have on their ballots the word "Separation," and those voting against it should have on their ballots the words "No separation;" the returns should be made to the Secretary of State by the 24th of June, and if a majority of votes were given for separation, the Governor was required immediately to issue his proclamation declaring "all connection by the State of Tennessee with Federal Union dissolved, and that Tennessee is a free, independent Government, free from all obligations to, or connection with the Federal Government."

The fourth section authorized all volunteers to vote, wherever they may be in active service.

By the fifth section it was provided that, under the rules and regulations prescribed for the election above ordered, the following ordinance should be submitted to the popular vote:

An Ordinance for the adoption of the Constitution of the Provisional Government of the Confederate States of America.

We, the people of Tennessee, solemnly impressed by the perils which surround us, do hereby adopt and ratify the Constitution of the Provisional Government of the Confederate States of America, ordained and established at Montgomery, Alabama, on the 8th of February, 1861, to be in force during the existence thereof, or until such time as we may supersede it, by the adoption of a permanent Constitution.

The sixth section provided that all voters in favor of adopting the Provisional Constitution, and thereby securing to Tennessee equal representation in the deliberations and councils of the Confederate States, should have written or printed on their ballots the word "Representation;" opposed, the words "No Representation."

The seventh section provides for an election of delegates to the Confederate Congress in case the Provisional Constitution was adopted. The vote on the Declaration of Independence in the Senate was—yeas 20, nays 4; in the House, yeas 46, nays 21.

By this act, provision was made to submit to the vote of the people of the State, the adoption or rejection of a "Declaration of Independence," whereby they were to separate themselves from the Union, and adopt the Confederate States Constitution, and abrogate that part of their own Constitution which required every person chosen or appointed to any office of trust or profit under it, or any law made in pursuance of it, before entering on the duties thereof, to take an oath to support the Constitution of the State and of the United States; and requiring each member of the Senate and House of Representatives, before proceeding to business, to take an oath to support the Con-

stitution of the State and of the United States. (Constitution of Tennessee, art. x., sections 1, 2.)

By another act the Governor was required to raise, organize, and equip, a provisional force of volunteers for the defence of the State, to consist of 55,000 men; 25,000 of whom, or any less number demanded by the wants of the service, were to be fitted for the field, at the earliest practicable moment, and the remainder to be held in reserve, ready to march at short notice. It authorized the Governor, should it become necessary for the safety of the State, to "call out the whole available military strength of the State," and to determine when this force should serve, and direct it accordingly. To defray the expenses of this military organization, the Governor was authorized "to issue and dispose of \$5,000,000 of the bonds of the State," in denominations of not less than \$100, or greater than \$1,000, to run ten years, and bear interest at the rate of 8 per cent.

Thus provided with a semblance of authority, the Governor hastened the organization of the provisional force of 25,000 men, and before the day of the election, June 8, 1861, he had most of it on foot, and distributed in camps around Nashville and elsewhere, armed and equipped, so far as it could be, with the munitions of the United States in possession of the State, and with such as could be obtained from the arsenal at Augusta, Georgia, from which they were brought by Gen. Zollicoffer. Thus, on the morning of the election, the people of Tennessee, for the first time in their lives, went to the polls conscious that they were no longer a free people; knowing that the Executive and Legislative Departments of the State, with its Treasury in their hands, and with all the arms of the State in their possession, and with a formidable army in their pay, had joined a conspiracy to overthrow their Government, and that nothing remained for them but to reverse their vote of the 9th of February, and to ratify what their self-constituted masters had already accomplished. Even by voting against the Declaration of Independence, and by refusing to absolve their officers from the oath to support the Constitution of the United States, and declining to accept the Constitution of the Confederate States, they could not free themselves from the military incubus which had been imposed upon them. In these circumstances it is not to be wondered at that the election showed an apparent majority of 57,667 for secession. It must not be concluded, however, that this majority was real; for the men who could so wantonly condemn the obligations of the law as to resort to the measures above detailed, could not escape from the suspicion of having filled the ballot-box with spurious votes.

By such means was Tennessee carried over to the Confederate States, and in the employment of these means there does not appear to have been any semblance of regard, among the actors, for oaths or for the observance of the most solemn obligations of legal and constitu-

tional duty. The Constitution of the United States ordains that "no State shall enter into any treaty, alliance, or confederation;" nor, "without the consent of Congress, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will admit of no delay;" and that "the Constitution and laws of the United States, made in pursuance thereof, shall be the supreme law of the land; and the judges in every State shall be bound thereby, any thing in the Constitution or laws of any State to the contrary notwithstanding." The State Constitution, as above stated, required every Tennessee official person, before assuming his office, "to take an oath to support the Constitution of the United States." The State declaration of rights acknowledges the supremacy of the Constitution of the United States, and explicitly admits that the people of the State themselves have the right of exercising sovereignty, and the right of soil over the territory of the State, only "so far as is consistent with the Constitution of the United States." Moreover, the State Constitution, enumerating the powers of the Governor, ordains that he shall be commander-in-chief of the army and navy of the State, and of the militia, except when they shall be called into the service of the United States, in which case, by the national Constitution, "the President shall be commander-in-chief of the militia of the several States." Finally, the Constitution of the State provides a method for its own amendment, by which the General Assembly, during its period of existence, can only propose an amendment, which it must cause to be entered on its journals, with the ayes and noes thereon. This proposal must be referred by the General Assembly which makes it, to the General Assembly next chosen, first causing it to be published six months before such choice. If the proposal is agreed to by two-thirds of all the members elected to each house of such second General Assembly, then that body shall submit the proposal to the people; and, if the people approve and ratify the proposal by a majority of all those who voted for the members of the Assembly, voting for it, then the proposal becomes a part of the Constitution.

Such being the fundamental law of Tennessee, the thirty-third General Assembly appears before the world as striking out two sections of the State Constitution, by submitting a proposition to the people directly for the purpose; and, by a mere resolution, forming a military league with the Confederate States, and placing the whole military force of the State under the control of the President of those States; it also appears as setting aside the whole Constitution of the United States, and accepting another Constitution by means of a vote of the people of Tennessee, when that people had no sovereignty over their own territory except in subordination to the Constitution of the United

States; it also raises a formidable army for the express purpose of joining the Confederate States in a war against the United States, when, in case of war, the President of the United States is commander of the army and of the militia of the States. Such was the climax of usurpation and violence which the secession movement attained in Tennessee, and it is too plain to need a statement, that if the people of the United States ever come to submit to like pretensions on the part of the people of a single State, or of any number of States, there is an end of any real liberty or government in this country.

The Legislature also passed resolutions recommending a congress of the officers of banks in the Southern States.

On the 16th of May the Governor issued a proclamation requiring all volunteer organizations in the State, who had heretofore drawn arms, and did not hold themselves in readiness for immediate service, to return them to the State arsenal in Nashville. The object was to disarm all organizations friendly to the Union.

An act to stop the collection of debts by citizens of Northern States was also passed, of which the following were sections:

SEC. 1. That no person in any non-slaveholding State, or their agents or attorneys in this State, shall have power to sue or collect any moneys owing to or any property claimed by the citizens of any such State in Tennessee during hostilities between Tennessee and the Federal Government.

SEC. 2. That it may and shall be lawful for such debtors to pay such moneys into the treasury of the State, which sums shall be receipted for by the treasurer, and shall be refunded with interest upon cessation of hostilities.

Meantime Union meetings of the most decided character were held in East Tennessee, and resolutions adopted, denouncing the action of the Legislature.

The progress of military affairs in the western part of the State had been such that at this time there were established on the Mississippi River five or six batteries of heavy guns, including mortars, columbiads, and 32 and 24-pounders, commanding the river from Memphis to the Kentucky line. About fifteen thousand troops were concentrated in West Tennessee under Major-General G. J. Pillow, as commander-in-chief, with Brigadier-Generals Cheatham and Sneed. Eight thousand troops of all arms from Mississippi had passed up the Mobile and Ohio Railroad, at Corinth, and at Grand Junction, on the Mississippi Central Railroad, on their way to a rendezvous near the Kentucky line, to act under Major-General Clark, of Mississippi, in concert with Major-General Pillow, of Tennessee. With these troops were some cavalry and two light batteries. At least seventy-five or one hundred heavy guns had been placed in battery, and other large guns were in the State ready for use. A *corps d'armée*, under command of Brigadier-General Foster, had assembled in Camp Cheatham. General William R. Caswell had assembled, and armed, and

equipped a *corps d'armée* of some thousand men, in East Tennessee, ready to repel any attack in that division of the State.

In East Tennessee the attachment of the people to the Union continued very strong. On the 30th and 31st of May a Union convention was held at Knoxville, which manifested a determined spirit. This was shared by a large portion of the people in that part of the State. Their vote on the separation or secession ordinance was almost entirely in opposition. In several of the central and western counties a Union majority was given; but throughout the State only a portion of the vote was cast.

The Governor made an agreement with the Governor of Kentucky at this time, that no troops should cross the Tennessee line for any purpose, unless upon the invitation or permission of the latter. This proved worthless when the Confederate Government deemed it necessary to move a force into Kentucky. The rights of the State of Tennessee as a sovereign were not taken into account.

An adjourned session, and the fourth of the Legislature, was held about June 20, at which the Governor, in his address, brought to their notice the financial condition of the State. He said:

Under the provisions of the act of 1852 the principal and interest of the internal improvement State bonds are made payable in the city of New York. It will be impossible to pay the interest accruing at that point during the continuance of the war. I recommend that you so amend the laws referred to as to require the payment at the Bank of Tennessee, at Nashville, or at Charleston or New Orleans, of all sums which may become due from the State to the people of all Governments which are on terms of peace and friendship with us, who are and were previous to the commencement of the war bona fide owners of our bonds, and that you adopt such policy towards the owners and holders of our bonds who are citizens of States at war with us as is recognized and justified by the law of nations regulating their intercourse as belligerents.

The ordeal through which the country is now passing necessarily prostrates the trade and commerce of the country, and deranges the currency to a greater or less extent. Such legislation as will tend to secure a uniform currency throughout the Confederate States is of the highest importance. I therefore submit the question to your consideration for such action as, in your opinion, the general welfare demands.

By the — section of the act of the 6th May, 1861, it is made the duty of the Governor to issue bonds of the State for the purpose of raising a fund with which to defray the expenses of the provisional army of the State. In view of the scarcity of a circulating medium, and the probable difficulty of converting any considerable amount of bonds into money in times like the present, I respectfully recommend that you so modify that act as to authorize the issuance of treasury notes to the extent of three-fifths of the amount of said bonds; and that the same, when issued, be made receivable by the State in payment of all taxes or government dues.

Bills were introduced to suspend the civil courts and the sale of property under execution; to prevent any one from holding any Federal office; to transfer the Hermitage to the Confederate States as the site of a military institution; to send representatives to the Montgomery Congress; to clothe the Governor

with power to enroll all free colored males between sixteen and fifty for building fortifications; to repeal all laws in regard to bowie-knives; and to suspend the distribution of the common school fund.

On the 17th of June a large Union convention was held at Greenville, East Tennessee. All the counties were represented except Rhea. It continued for three days. A declaration of grievances was adopted, which stated facts showing that the right of free suffrage had been obstructed by a disunion government; that the people had been subjected to insults, their flags fired upon and torn down, their houses rudely entered, their families insulted, their women and children shot by a merciless soldiery, and their citizens robbed and assassinated; and that, in view of these facts, they resolved that the action of the State Legislature, in passing a declaration of independence, and in forming a military league with the Southern Confederacy, was unconstitutional, and not binding upon loyal citizens. In order to avoid a conflict with their brethren, a committee was appointed to prepare a memorial, asking the consent of the Legislature that the eastern part of the State may form a separate government. The aggregate votes in the several divisions of the State were then announced to be as follows on the ordinance of separation:

	<i>For Separation.</i>	<i>No Separation.</i>
East Tennessee.....	14,780	32,923
Middle Tennessee	58,265	8,198
West Tennessee.....	29,127	6,117
Military Camps.....	2,741	—
	104,913	47,238
	47,238	
Majority	57,675	

The commanding general, Pillow, of the State forces, issued, on the 21st of June, an order confiscating, under the State law, the stock and claims of non-residents belonging to the Northern States:

"All merchants, brokers, and other persons owing allegiance to the State of Tennessee, and all banks in the State having on deposit balances, or on hand balances of specie, bills of exchange, notes, or other funds, or causes in action for collection, and belonging to the enemies of Tennessee, are, by a law of the State Legislature of the State, and by the laws of war, due to the State, and are hereby declared seized and sequestered, in reprisal for illegal seizures by the people and Government of the North."

A report of assets was ordered to be made to the adjutant-general's office.

On the 6th July, the Legislature adjourned. It passed the bill exempting State bonds for military purposes from taxation. Another act authorized the Governor to issue treasury notes for three millions of dollars, of the denomination of not less than five nor more than five hundred dollars, with interest not exceeding six per cent., the same to be receivable as cur-

rency. An act was also passed to make the treasury notes of the Confederate States bankable in Tennessee.

The first day of August was fixed for the State election, for the purpose of choosing Governor, members of the Legislature, and representatives in Congress; and on the day of the general election, the people were to vote for or against the permanent Constitution of the Confederate States.

Confederate troops were sent at the earliest moment to take possession of the three gaps in the mountains of East Tennessee, known as the Fentress, Wheeler, and Cumberland. Cleveland was also declared a military station. The mails of the United States were, by order of the proper department, continued in twenty-six of the counties of East Tennessee at this time, in consequence of the Union feeling which was manifested.

They were as follows: Anderson, Bledsoe, Blount, Bradley, Campbell, Carter, Claiborne, Cocke, Grainger, Green, Hamilton, Hancock, Hawkins, Johnson, Knox, Marion, McMuir, Meigs, Monroe, Morgan, Polk, Rhea, Sevier, Sullivan, and Washington.

On the other side every effort was made to procure arms. The Governor sent instructions to the clerks of all the county courts, requesting them to issue to each constable in their respective counties an order requiring him to make diligent inquiry at each house in his civil district for all muskets, bayonets, rifles, swords, and pistols belonging to the State of Tennessee, to take them into possession, and deliver them to the clerks.

A reward of one dollar was to be paid to the constable for each musket and bayonet or rifle, and of fifty cents for each sword or pistol thus reclaimed.

The arms thus obtained were to be forwarded, at public expense, to the military authorities at Nashville, Knoxville, and Memphis, as might be most convenient, and information sent to the military and financial board at Nashville, of the result.

Stringent measures were adopted with the Union people of East Tennessee. Many, upon bare suspicion, were arrested and taken prisoners, insulted, abused, and carried into camps, there to be disposed of as the Confederate mob thought proper. Squads of cavalry and infantry were scouring over the country, offering the people, male and female, every indignity that ruffian bands are capable of; destroying crops and substance without regard to the condition or circumstances of the persons; pasturing their horses in corn-fields, wasting hay-stacks, taking provisions of every description without regard to quantity, not even asking the price or tendering an equivalent therefor in any shape whatever.

Nashville was put under martial law. Passports were required, and all baggage was examined under directions of the Committee of Safety.

Meanwhile, soldiers from East Tennessee found their way to the camps in Kentucky. The first regiment which came was composed of men who had been driven from their homes for their Union sentiments. They were described in the following terms:

"A very large proportion of them are men of religious instinct and habits, and not a night passes without the voice of morning and evening prayer being heard in the Tennessee camps. These earnest and devoted men, far from their families and homes, which are left to be desolated by ruthless hands, are yet firm and undaunted amid the calamity which has overtaken them. Their trust is in God and their own strong arms. A large proportion are young, unmarried men; but there are many heads of families and representatives of large landed estates. Some of the privates in the ranks, who have abandoned all they possessed rather than submit, are worth from \$30,000 to \$40,000 each. Some of the young men are willing to remain and assist in defending Kentucky, or serving anywhere that the Government may call them. But the great majority have set their hearts upon going back fully armed for the redemption of East Tennessee."

The act, forbidding payment to be made by citizens of Tennessee to Northern creditors, did not operate so favorably for the debtors as they had anticipated. They were ordered to pay the amount of their indebtedness into the Treasury of the Confederate States. In Nashville the merchants asked of the Government the privilege of paying these amounts in good paper of their "country customers."

The military efforts of the State were described by the Governor, in a Message to the Legislature, with much detail.

Tennessee had no military organization, and was almost destitute of arms. Her Executive had no authority to raise troops or procure arms until the act of the 6th of May, and yet, within less than two months from the passage of this act, the Governor says thirty thousand volunteers were organized and thrown into the field. He also stated that he had been compelled to decline the services of a large number tendered in excess of the demand.

In addition to the provisional army of the State, a number of regiments were raised for Confederate service, making in the aggregate thirty-eight infantry regiments, seven cavalry battalions, and sixteen artillery companies, which Tennessee had sent to sustain the Confederacy. To overcome the want of arms and ammunition cut off by the blockade and lack of access to Northern markets, an armory was established at Nashville, and the State had for some time been receiving about two hundred and fifty army guns per week. Cannon, also, were cast in the State, and one percussion cap factory in Tennessee had already furnished more than twelve millions of caps, and produced over a quarter of a million per day. The State had also made liberal advances to manufacturers

of powder, to enable them to increase their machinery to the highest degree of efficiency.

All this had been accomplished within six months from the first of May by Tennessee, and while the State was far from being a unit in support of the Confederacy. The facts might be taken as an evidence of what the Confederate States had done to sever the Union by force of arms.

At this session of the Legislature an act was passed to authorize tax collectors and other revenue officers to receive treasury notes of the Confederate States in payment of taxes; also, an act to abolish the Courts of Chancery.

As the year approached its close, the storm was rapidly gathering which was soon to burst over the State, and no one was more quick to foresee its coming than Governor Harris. On the 12th of November he issued the following proclamation:

NASHVILLE, November 12, 1861.

The State must, and to the full extent of its resources shall, be defended. Threatened with invasion, all good citizens will regard it as a patriotic duty to make any reasonable sacrifice to repel the invaders. Regiments are now in camp and organized, while others are ready to organize, but for want of arms are not prepared to take the field.

Prompted by the noblest impulses of patriotism, these men are ready to take the field to defend your homes, and to prevent the theatre of this cruel and vindictive war being brought within our borders. They appeal to you, who quietly remain at home, to place arms in their hands, that they may give you protection and security.

If you fail to respond to this appeal, I shall be compelled by the sternest convictions of duty, charged as I am with the responsibility of seeing that the State is defended, to disband these regiments of brave soldiers, and call you who have arms into the service as militia.

I earnestly entreat that the people will bring forward and deliver to the clerk of the county court of their respective counties, or to such other agents as I may send to the various counties, every effective double barrel shot-gun and sporting rifle which they may have, to be immediately shipped to the arsenal at Nashville, Knoxville, or Memphis, where the same will be valued by a competent ordnance officer, and the value paid to the owner by the Confederate Government.

I urge you to give me your aid in the important work of arming our troops, with which we can repel the invaders; but if you refuse, prepare to take the field, for I am resolved to exhaust all resources, before the foot of the invader shall pollute the soil of Tennessee. Respectfully,

ISHAM G. HARRIS.

At this time, the Confederate Government, through Gen. A. S. Johnston, made a requisition upon the State for thirty thousand troops for immediate active service. The Governor accordingly issued a proclamation calling for that number of troops. He urged upon all who might be able to do so to supply themselves with the most effective arms the country afforded, such as the Tennessee rifle, the double and single shot-gun. These arms would be replaced by furnishing the troops with the regular army gun at the earliest practicable period.

The following is the proclamation issued by the Governor:

NASHVILLE, Tenn., Nov. 19, 1861.

To the officers in command of the Militia of the State of Tennessee in the Second, Third, and Fourth Divisions:

The danger of invasion on the part of the Federal forces is imminent. This invasion threatens the quiet and security of your homes, and involves the destruction of your sacred rights of person and property. The warning example of Maryland, Missouri, and Kentucky bids you, if you would preserve your firesides, your homes, and the sanctity of your wives and daughters, to meet the despotic invader and his minions at the threshold of your State and drive him back. Let the soil of Tennessee be preserved from his unhallowed touch, and let him know that in defence of our liberties and our altars every Tennessean is ready to yield up his life. Gen. A. S. Johnston, commanding the forces of the Confederate States in this department, in view of the threatened danger, has called upon me to send to the field such force as can be armed by the State.

In obedience to which requisition, and to repel the invader, thirty thousand of the militia of this State are hereby called into the field.

Officers in command of the militia of the second, third, and fourth divisions will hold their commands in readiness to receive marching orders by the 25th inst., unless, in the mean time, a sufficient number of volunteers shall have tendered their services to fill this requisition.

Special orders to the commanders of the militia, apportioning this requisition among the different brigades of said divisions, will be immediately forwarded, accompanied with such instructions and directions as may be necessary for the movement of troops to the places of rendezvous.

In the mean time, captains will direct their companies to parade on some given day, with whatever arms they may have, and they will take all other proper and legal steps to possess the arms within the bounds of their respective districts, and immediately report to the commanding officer of their regiments the number of arms and accoutrements, as well as the strength of their companies.

Meanwhile Federal troops from the northwestern States were steadily pouring into the camp at Cairo, which was well known in Tennessee, where consternation began to prevail. In East Tennessee the Union men were strong in numbers, and now began to take courage. On the day for the election of President Davis under the permanent Constitution a very small vote was polled in that part of the State. In Roane County, which usually gave two thousand votes, less than three hundred and fifty were polled. In Knox County the submission candidate for the Confederate Congress received only eighty votes, where the Union men numbered over three thousand.

Animated by these encouraging indications, an attempt was made to embarrass the Confederate Government by burning the bridges on the great line of railroad connecting the Southwest with Virginia. In one week five bridges were burned in East Tennessee, to impede the movements of Confederate troops, as follows: bridge over the Hiawasse River at Charleston, on the East Tennessee and Georgia Railroad; bridge over Lick Creek, on the East Tennessee and Virginia Railroad; bridge over the Holston River at Union, on the East Tennessee and Virginia Railroad; two small bridges on the Chickamanga Creek, on the Western and Atlantic Railroad. The telegraph wires

were cut at various places between Knoxville and Chattanooga, and Knoxville and Bristol. The damage was estimated at about \$50,000, but the interruption of the trains was the most serious consequence.

On the East Tennessee and Virginia Railroad, which extends from Knoxville to Bristol, a distance of 130½ miles, all in East Tennessee, there are 2,401 feet of trestle work; 11 truss bridges of a joint length of 2,815 feet, equal to an average length of 256 feet; 4 arch bridges of a joint length of 345 feet; and 40 stringer bridges of a joint length of 938 feet. Here are 6,499 feet, almost 1¼ mile of wooden structures, which are perishable by fire. And as the East Tennessee and Virginia Railroad is a link in the great southern route from the Potomac to the Mississippi, the destruction of its bridges would necessarily be a severe blow to the Confederate strength in Virginia. Most stringent measures were adopted by the Confederate authorities, and the work of destruction ceased. (See CONFEDERATE STATES, page 153.)

The representatives of Tennessee in the Confederate Congress were Gustavus A. Henry and Landon C. Haynes, senators; and D. M. Currin, J. D. C. Atkins, H. E. Foster, Thomas Meneses, Geo. W. Jones, M. P. Gentry, W. G. Swann, W. H. Tibbs, E. L. Gardner, and J. T. Heiskell, representatives.

TERRITORIES. The territories of the United States, which were originally of very vague extent, under the grants to the colonies, have gradually been consolidated by treaties until they extend across the continent, having an Atlantic coast line of 1,900 miles. The Gulf coast has a line of 1,600 miles from the Florida capes to the Rio Grande. The Pacific coast line is 1,620 miles, including California, Oregon, and the Straits of Fuca. The area of this vast territory is 2,059,623 square miles, or 1,318,156,720 acres. A large portion of this territory was acquired by various treaties; with Great Britain in 1783, 1842, and 1846; with Spain in 1795 and in 1819; with France in 1803; with Mexico in 1848. The area annexed by this last treaty is estimated to be equal to all possessed before by the United States. This vast region has been very rapidly surveyed and organized into separate territories, or admitted as States within the last few years. In the year 1861 Kansas was admitted as a State; three new territories, Nevada, Colorado, and Dakota, were created; and two, Arizona and Chippewa, were nearly ready for organization. The Territory of Dakota was formed out of what was Minnesota Territory, 52,454,400 acres, and 156,762,880 of what was formerly the northern part of Nebraska. It contains, therefore, 209,217,280 acres, or 326,902 square miles, and is the largest of all the territories. There were surveyed during the year, 60,639 acres. Its boundary on the north is the international line of 49° north latitude; east, the States of Iowa and Minnesota; south, the Missouri River, the

Running Waters, and the Turtle Hill River following this last to the Rocky Mountains, which form the western boundary. The Indian title is extinguished to 14,000,000 acres, and a land office opened at Yankton. The territory is drained by the Missouri River on the south, and by the Red River of the North emptying into Hudson Bay; possessing, for the most part, a fine healthy climate and good soil; it was first settled on the north by emigrants in the employ of the Hudson Bay Company, and is now peopled from the Northern and Western States. Capital, YANKTON. The population in 1860 was 4,839 whites, and a large number of Indians of different tribes. In this territory the buffalo and other wild animals are found in great abundance.

The Colorado Territory was organized by act of Congress, Feb. 28, 1861. It was formed of 47,657,600 acres, formerly included in the territories of Utah and Kansas, and 10,262,400 acres in that of Nebraska, and 8,960,000 acres formerly in New Mexican territory; making an area of 66,880,000 acres, or 104,500 square miles. By a treaty with the Cheyennes and Arapahoes, made Feb. 1861, but not yet ratified, about one third of the area of Colorado situated north of the Arkansas River and east of the Rocky Mountains was ceded to the United States. The mining attractions of Pike's Peak, included in the territory, had produced numerous settlements on the eastern slope of the Rocky Mountains, and in May, 1861, the land office was opened at Denver City, and surveys were commenced. The name Idaho, or "Gem of the Mountains," was originally proposed for the territory, from reference to Pike's Peak. The boundaries of the territory are: north, the 41st degree N. lat.; south, 37th degree N. lat.; east, 25th meridian of longitude; west, 32d meridian of longitude. The population of the territory in 1860 was 34,197, together with many tribes of Indians. The climate is very healthy and the soil fertile. It is remarkable as a grazing country. The timber in the mountains is plentiful, and coal and other minerals very abundant, including gold and silver.

The Nevada Territory, organized March 2, 1861, is mostly conspicuous for the possession of the famous Washoe silver mines. Its boundaries are: north, the 42d degree of latitude; east, the 89th meridian of longitude; south, New Mexico; west, the dividing ridge separating the waters of Carson's Valley from those that flow into the Pacific. This area embraces 64,550 square miles, or 41,312,000 acres, formerly a portion of Utah, and includes a strip of about 10,000 square miles from the eastern end of California, if that State consents. The surveyor opened his office in Carson City. Some surveys had been made under the authority of Utah, and some depredations were made by persons claiming under those surveys. The Washoe valley is 15 miles long by 5 wide, and contains numerous settlers. The surveyor-general reports the population in 1861 at 17,000, mostly

in the mining regions, the resources of which are being very rapidly developed. The supply of silver from Washoe at the United States mint was in 1861 \$213,420.

The projected Territory of Arizona may embrace all the territory obtained from Mexico east of the Colorado and its affluent, the Virgin River, and west of the 108th meridian; on the north, the parallel 36° 30' separates it from Utah, and on the south is the Mexican border. The area is estimated at 200,000 square miles, and the population about 8,000 Mexicans. The mineral wealth is very great, but only \$12,260 reached the United States mint in 1861 from Arizona.

The territory lying between Nebraska, Dakotah, the Rocky Mountains and the British dominions, having an area of 130,000 square miles, and a population of about 8,000, it is proposed to call Chippewa.

TEXAS is, with the exception of Florida, the most southern portion of the United States. It is bounded on the north by New Mexico, Indian Territory, and Arkansas; on the east by Arkansas and Louisiana; on the southeast by the Gulf of Mexico; and on the southwest and west by Mexico and New Mexico. Its area of territory is nearly six times that of the State of Pennsylvania. Formerly a part of Mexico, afterwards an independent State, it became one of the United States in 1846—reserving the right to be divided into five States. By the Compromise Act of 1850 the boundaries of the State were somewhat modified, she conceding to New Mexico a portion of her northern territory, in consideration of ten millions of dollars to be paid by the United States.

The Governor is elected for two years. The Senate consists of twenty-one members, elected for four years; and the House of sixty-six members, elected for two years. The Legislature meets biennially in December.

The population, in 1860, was 421,411 whites, 339 free colored, 180,682 slaves. Total, 602,492.

The secession sentiment, which manifested itself immediately after the election in November, was neither strong nor unanimous. It existed more through the inactivity and indecision of those inclined to the Union. In some parts of the State distant from the Gulf, it was almost unknown. Even in Austin, the capital, a counter demonstration was made as early as the 17th of December. Several young men, tired of the display of the Lone Star, and the overbearing course of the secessionists, drove through the city with national flags displayed from their carriages. This struck the chord in favor of the "Star-Spangled Banner," and they were vociferously cheered. The spirit, once awakened, received volume, and on the night of the 17th December Governor Houston and F. M. White, Commissioner of the General Land Office, were serenaded by a procession of five hundred people. They both responded in enthusiastic Union speeches. On the 23d December, the largest meeting ever held at the

capital assembled; a pole ninety feet high was raised, from which streamed the Stars and Stripes. The masses came from the hills and mountains. Men, women, and children marched in procession to the capital, where they were addressed by distinguished citizens. Patriotic resolutions were passed amidst enthusiastic cheers for the Union. "Hail Columbia," and other patriotic airs were played by the German band and sung by the ladies. The crowd would not disperse, but at night formed a torchlight and transparency procession, and marched through the principal streets.

The Governor had thus far withstood all efforts to induce him to call a session of the Legislature. He was well known to the country for his public services during a long series of years. A Southern man by birth, he had shed his blood on more than one Southern battle field. About this time he issued an address to the people of the State, expressing the reasons why he did not call an extra session of the Legislature. In this address he declared that he had no intention or desire to thwart the wishes of the people, and believed that the time had come for the South to make a firm stand for its rights; but he believed that the precipitate action of two or three extreme Southern States would involve the Border States in destruction, drive slavery from them at once, and ruin their citizens. They had long stood the bulwark against abolitionism, and they had a right, now in their time of trouble, to expect their sister States to stand by them. They claimed, and with reason, that the South can maintain its rights in the Union. He therefore would not abandon them, but would counsel with them as to the wrongs of the South and the remedy therefor, and endeavor to bring the North to a sense of justice. With this object in view, he had transmitted to the Governor of each Southern State the Texan legislative resolutions providing for the election of seven delegates to meet delegates from other slaveholding States to confer upon measures for preserving the rights of the South in the Union. He had also taken measures for the election of such delegates in Texas. This, he thought, was sufficient, as but few counties had petitioned for an extra session of the Legislature, to hold which would involve an expense of a hundred thousand dollars, at a time when the treasury was nearly exhausted and a debt accumulating upon the State. Let the people at the ballot-box select men to reflect their sentiments in a Convention of Southern States, and no one could complain. In closing, Governor Houston said: "The question now is, will Texas act a discreet part and unite with the other Southern States in a Convention which shall take into consideration the grievances we suffer through the passage of unconstitutional laws in some of the Northern States, calculated to defeat the execution of the fugitive slave law, and all other causes which have disturbed the harmony which should exist between the two sec-

tions of the Union? When such a Convention assembles, the sagacious statesmen of the South will be in its councils. They will look at the questions presented for their consideration like men who owe duties to themselves, their constituents, and posterity; and I trust that through the influence of their deliberations those States which, prompted by indignant feelings at the triumph of our sectional opponents, have resolved to precipitate the entire South into revolution, will hesitate to take such a step, but will make common cause with all the Southern States in the endeavor to preserve the equal rights of such States in the Union."

In his correspondence with the Commissioner, J. M. Calhoun, sent to Texas by the State Convention of Alabama, Governor Houston said that "secession will involve civil war and the ruin of our institutions, if not of liberty itself." He further expressed the opinion that Texas could not "rely for protection on an alliance with the Gulf States alone," and he therefore desired a consultation with the Border Slave States. He said further, that "Texas has views of expansion not common to many of her sister States," and he foreshadowed his policy of making a conquest of Mexico by the prowess of Texas alone, &c. The Governor said that he could not make up his mind to desert the true men in the North, and such he believed was the sentiment of the State, until at least one more effort was made to preserve her constitutional rights within the Union.

On the 3d of January, the office of the "Wöchentliche Union," a German newspaper printed at Galveston, was sacked by a mob, because the "Union" had admitted articles against the secession movement. The editor had been for nineteen years a citizen of the State, and was a slaveholder.

The call for the Convention in Texas was revolutionary. It was signed by sixty-one individuals. Upon this call delegates were elected.

About the same time one of the members of the Legislature took the responsibility of issuing a call for the meeting of that body in extra session. To avoid a conflict between the State authorities and the revolutionists, Governor Houston convened the Legislature in extra session at Austin on January 22d.

The following is the proclamation issued by the Governor:

Whereas there has been and yet is great excitement existing in the public mind, arising from various causes, touching our relations with the Federal Government and many of the States, and a portion of the people have expressed a desire that the Legislature should be convened in extra session; and *whereas* the Executive desires that such measures should be adopted as will secure a free expression of the popular will through the ballot-box upon the question at issue, involving their peace, security, and happiness, and the action of the whole people made known in relation to the course which it may be proper and necessary for Texas, as one of the States of the Union, to pursue, in order to maintain, if possible, her rights in the

Union, as guaranteed by the Federal Constitution; and *whereas* our frontier is now invaded by Indians, and the lives of our citizens taken and their property destroyed; and *whereas* the treasury is without means either to defend the frontier or meet ordinary expenses of government:

Now, therefore, I, Sam Houston, Governor of the State of Texas, for the reasons herein set forth, do hereby issue this my proclamation, ordering the Legislature of the State of Texas to convene in extra session at the Capitol, in the city of Austin, on Monday, the 21st day of January, A. D. 1861.

When the Legislature assembled, he addressed a message to them, in which he favored delay as long as possible, in holding a State Convention. He was himself opposed to calling one, and believed that the Union could be preserved.

The Legislature sanctioned the election of delegates to the State Convention, which assembled one week later, by the adoption of the following

JOINT RESOLUTION concerning the Convention of the people of Texas, called in pursuance of the Bill of Rights.

Whereas the people of Texas, being much concerned for the preservation of the rights, liberties, and powers of the State and its inhabitants, endangered by the political action of a majority of the States, and the people of the same, have, in the exercise of powers reserved to themselves in the Bill of Rights, called a Convention, composed of two members for each representative in the Legislature, from the various districts established by the apportionment law of 1860, to assemble on the 28th day of January, 1861, at the city of Austin; which Convention, by the terms of the call, made by numerous assemblages of citizens in various parts of the State, was, when elected and assembled, to have power to consider the condition of public affairs; to determine what shall be the future relations of this State to the Union, and such other matters as are necessarily and properly incident thereto; and in case it should be determined by said Convention that it is necessary for the preservation of the rights and liberties aforesaid that the sovereignty of Texas should resume the powers delegated to the Federal Government, in the Constitution of the United States, and by the articles of annexation, then the ordinance of said Convention resuming said delegated powers, and repealing the ratification by the people of Texas of said articles of annexation, should be submitted to a vote of the qualified electors of this State for their ratification or rejection: Therefore—

Be it resolved by the Legislature of the State of Texas, That the Government of the State of Texas hereby gives its assent to and approves of the Convention aforesaid.

Sec. 2. That this resolution take effect and be in force from and after its passage.

With a protest against the assumption of any powers on the part of said Convention beyond the reference of the question of a longer connection of Texas with the Union to the people, approved 4th February, 1861.

SAM. HOUSTON.

Resolutions had been offered for delaying the secession movement, but these were twice laid on the table. A resolution was also passed repudiating the idea of using forcible means for coercing any seceding State, and declaring that any such attempt would be resisted to the last extremity. A bill was passed requiring the ordinance of secession, if adopted by the State Convention, to be submitted to the people.

On the 28th of January, the State Convention assembled. The call having been irregular, the vote for members was very light.

There are 122 counties in the State, of which nearly half held no election, and were not represented in the Convention. Some of these were: Old Nacogdoches, with 1,023 legal voters; Lamar, with 1,123 voters; Blanco, with 1,139 voters; Cherokee, with 1,644 voters; Fannin, with 1,183 voters.

The vote in some of the counties were as follows: Anderson, with 1,093 voters, only 387 voted; Bastrop, 769 voters, 153 voted; Collin, 1,119 voters, 211 voted; Grayson, 1,217 voters, 280 voted; Hays, 296 voters, 67 voted; Jackson, 296 voters, 40 voted; Lampasas, 285 voters, 50 voted; Red River, 879 voters, 60 voted; Travis, 1,011 voters, 342 voted. This county has Austin within its limits.

On the 5th of February, an ordinance of secession was passed in the Convention by a vote of ayes 166, nays 7. The following is the ordinance:

AN ORDINANCE to dissolve the Union between the State of Texas and the other States under the compact styled "the Constitution of the United States of America."

SEC. 1. Whereas the Federal Government has failed to accomplish the purposes of the compact of union between these States, in giving protection either to the persons of our people upon an exposed frontier, or to the property of our citizens; and whereas, the action of the Northern States is violative of the compact between the States and the guarantees of the Constitution; and whereas, the recent developments in Federal affairs make it evident that the power of the Federal Government is sought to be made a weapon with which to strike down the interests and property of the people of Texas and her sister slaveholding States, instead of permitting it to be, as was intended—our shield against outrage and aggression—therefore, "We, the people of the State of Texas, by delegates in the Convention assembled, do declare and ordain that the ordinance adopted by our Convention of delegates on the fourth (4th) day of July, A. D. 1845, and afterwards ratified by us, under which the Republic of Texas was admitted into the Union with other States, and became a party to the compact styled 'The Constitution of the United States of America,' be, and is hereby repealed and annulled.

That all the powers which, by the said compact, were delegated by Texas to the Federal Government are resumed. That Texas is of right absolved from all restraints and obligations incurred by said compact, and is a separate sovereign State, and that her citizens and people are absolved from all allegiance to the United States or the Government thereof.

Sec. 2. The ordinance shall be submitted to the people of Texas for their ratification or rejection, by the qualified voters, on the 23d day of February, 1861; and unless rejected by a majority of the votes cast, shall take effect and be in force on and after the 2d day of March, A. D. 1861. Provided that in the representative district of El Paso said election may be held on the 18th day of February, 1861.

Done by the people of the State of Texas, in convention assembled, at Austin, the 1st day of February, A. D. 1861.

Public sentiment was in favor of joining a Southern Confederacy, and on the 11th an ordinance was passed favoring the formation of such a Confederacy, and electing seven delegates to a Southern Congress.

A report was received from a Committee of Safety, which had been appointed, accompanied with a resolution to the effect that said com-

mittee should be authorized to act during the recess of the Convention. They were to be authorized to hold their sittings at such times and places as might be most convenient. This was adopted.

On the 14th the Convention adjourned to the 20th of February.

The vote to refer the ordinance of secession to the people was quite as unanimous in the Convention as was that on the adoption of the ordinance. The election of delegates being to some extent informal, and scarcely half of the vote of the State having been cast, it was thought best that the ordinance of secession should receive the sanction of the people before it should be declared final.

The ordinance of secession was submitted to the voters of the State on the 23d of February, which election was legalized by the Legislature, and approved by the Governor under a protest against the shortness of time intervening between the passage of the ordinance and the day of election. The vote in eighty counties of the State was: For secession, 34,794; against secession, 11,235. Majority for secession, 23,559. The vote at the Presidential election in November previous was: Lincoln, —; Douglas, —; Breckinridge, 47,548; Bell, 15,438.

On the 2d of March the Convention reassembled without a quorum, and on the 4th the vote was counted. When the result was announced in the Convention, and the President declared that Texas was a free and independent State, there immediately ensued a tremendous burst of cheering and enthusiastic applause.

On the 5th the Convention passed an ordinance instructing the delegates, whom it had previously appointed to the Southern Congress, to apply for the admission of Texas into the Southern Confederacy, and to that end to give the adhesion of Texas to the Provisional Constitution of the said Confederacy.

A resolution was then introduced to appoint a committee to wait on Governor Houston and ask his coöperation, as the Executive of the State, with the Convention. This resolution caused some excitement in the Convention, and, after debate, the following was adopted in lieu of it, viz.:

Resolved, That a committee of five be appointed by the President to wait on his Excellency the Governor, and inform him that the Convention has re-assembled; that the ordinance of secession has been ratified by the people; and that the State of Texas is and has been from the 2d of this current month a free, sovereign, and independent State.

The committee appointed in pursuance of the resolution waited formally upon the Governor, and presented to him a copy of the resolution, together with the following letter:

AUSTIN, TEXAS, March 5th, 1861.

To his Excellency, &c.:

DEAR SIR: The undersigned having been appointed a committee, by the Convention of the people of Texas now in session, to present to your Excellency the accompanying resolution, passed this day by that body, this duty we now most respectfully perform, and will with pleasure be the bearer of any communication

your Excellency may wish to make to the Convention in reply.

With sentiments of esteem and regard, we remain your Excellency's obedient servants,

W. P. ROGERS, THOS. J. JENNINGS,
J. B. ROBERTSON, A. S. BROADUS,
W. A. MONTGOMERY.

Governor Houston, in reply to this letter, transmitted to the Committee on the 6th the following communication:

EXECUTIVE DEPARTMENT, AUSTIN, TEXAS, {
March 6, 1861. }

W. P. Rogers and others, Committee:

GENTLEMEN: In reply to your communication of the 5th I can say, when the Legislature authorized the Convention to submit the proposition to the people of Texas, on the subject of secession from the Federal Government of the United States, it was understood that the performance of that act, when done, would terminate the existence of the Convention. The Executive approved the same, with a protest against the shortness of the time allowed, owing to the great limits of our State. By a subsequent act of the Legislature it was required, that the returns of the votes should be made at the office of the Secretary of State, and counted in the presence of the Governor and Attorney-General. The votes were counted, and the result declared, by proclamation, that a majority of the votes cast was for secession. By an act of the Legislature the Convention was empowered only to submit the question of secession to the vote of the people. The Convention performed the functions assigned it by the Legislature, and, in the opinion of Executive, its powers were then exhausted. The Executive will recommend to the Legislature, which is to re-assemble on the 18th instant, to take into consideration the important issues arising out of the severance of our connection with the United States, with such recommendations and suggestions as he may think proper in the discharge of this duty. It will then be within the province of the Legislature to take such action on the subject as it may think proper; and also to call a convention, directly from the people, who will fairly represent their wishes and opinions, and who will have authority to make such changes in the constitution of the State as her present and future relations to the world at large may require. Until then, it will be the duty of the Executive, as well as all State officers, to continue in the lawful discharge of their functions, confining their action to the sphere of Texas only.

The Executive tenders his respects to the gentlemen of the Convention, and assures you, gentlemen, individually, of his esteem.

Very truly, your obedient servant,

SAM HOUSTON.

This communication produced much feeling in the Convention, which was thus described by a spectator: "Some favored a reference of the communication to a committee of ten, with instructions to answer the alleged misstatements contained in it. Others favored the passing it by in contemptuous silence, and to instruct the Committee on the Constitution to prepare immediately an ordinance requiring all State and county officers to take the oath of allegiance to support the new Government and carry out in good faith the ordinances of the Convention. It was thought by many at the time that the Governor had commissioned several officers under the militia law, with a view of raising men for the purpose of resisting the action of the Convention. He opposed the confederation of Texas with the other Southern States, and favored her setting up for herself."

On the 8th, the Convention passed the following ordinance in relation to the Governor's letter:

Whereas, a letter bearing date March 6, 1861, has been read before this Convention, written by the Executive of this State, addressed to a Committee of this body, calling in question the power of the Convention to do more than submit the ordinance of secession to the people of Texas for their ratification or rejection; and *whereas* it is important that there should be no misunderstanding on this subject—

Resolved, That this Convention do now declare that it not only had the power to pass and submit the ordinance of secession, but also that it possesses and will exercise the right, on behalf of the people of Texas, to do whatever may be incidental to the same, and that may be necessary and proper for the protection of the rights of the people and the defence of the State in the present emergency, and that it will as speedily as practicable consummate the connection of Texas with the Provisional Government of the Confederate States of America, whose Constitution has already been ratified by an ordinance of this Convention.

Resolved further, That this resolution be communicated by the Secretary of this Convention to the respective Departments of the State Government.

An ordinance was also passed declaring that vessels sent by the Federal Government to receive the returning troops should not be seized. The unexpected turn of affairs in the Texas Department, by which all or nearly all of the troops had been suddenly discharged from service by the surrender of the various military posts in that State, devolved on the War Department the necessity of promptly furnishing them with the means of subsistence, and, if required, of conveyance to more northern posts. For this purpose, steamers were sent out from New York by the authorities at Washington. The condition of affairs in the State at this time, as viewed under a commercial aspect, may be briefly told in the words of one who was a calm spectator of the passing scenes: "There is a wild spirit of legislation here, that will lead to improvident expenditure, onerous taxation, stay laws, prostration of credit, and mischief generally. You know nothing of the recklessness afloat here in all matters of law and government. Our interests here are at the mercy of a set of men who think they can legislate the State into glory and grandeur by passing stay laws, and who bid fair to legislate it, posthaste, into debt, bankruptcy, and another repudiation of the scaling sort. Several expeditions are already on foot to be paid for by taxation. Several sessions of Convention and Legislature are on hand to be paid for by taxation. A new Government is to be organized and got under way, with all its costly machinery, to be paid for by taxation. Every expenditure will be of the most thriftless sort, and on a reckless scale, for we are no economists down here. Government has become a mere child's play, and law a thing to be made and unmade at pleasure. Of course the remedy may come after awhile, with the retribution, when the evils weigh heavily on the people. But, in the mean time, much mischief will have been done."

For the protection of the frontier, the Legislature passed an act to authorize the organization of mounted companies of sixty men in each frontier county. Ten men of the company were to be constantly in service, and the others called out for any time not exceeding twelve days at once. An issue of treasury warrants, receivable for taxes, was authorized to defray claims against the State.

The House also passed a bill authorizing the Governor to issue State bonds to the amount of five hundred thousand dollars, in case of invasion from any quarter, one fifth of the whole annual State tax to be appropriated as a sinking fund until the bonds were paid.

The numerical strength of the United States army in Texas was about 2,500 men, divided into thirty-seven companies—twenty-two infantry, five artillery, and ten cavalry. Twenty companies were on the Rio Grande—fifteen infantry, and five artillery. The other seven companies—were stationed in the interior, from Camp Cooper, Phantom Hill, in the northern part of the State, south as far as San Antonio and Fort Inge, near Fort Duncan, on the Rio Grande.

On the withdrawal of these troops, their places on the Rio Grande were supplied by State militia from Galveston, and the neighboring counties.

Previous to this time, the surrender of Major-General Twiggs, the United States commander in that Department, to the authorities in Texas took place. This caused great astonishment at Washington, where it was hardly anticipated. The secession of the State was not then, in fact, consummated. There had been no vote of the people upon the ordinance. The United States army was allowed to march to the coast by the articles of agreement, and to take with them their side-arms, facilities for transportation and subsistence, as well as two batteries of flying artillery of four guns each. The means of transportation were to be surrendered, and left upon arrival at the coast. By this treaty, without one drop of bloodshed, and "without sulling in the least the honor of the United States army," Texas came into possession of over thirteen hundred thousand dollars' worth of property, principally consisting of munitions of war.

The seizure of all the property of the United States was complete. The revenue cutter was surrendered, and the lighthouse supply-vessel for the coast was captured. This vessel, the "Guthrie," sailed from New Bedford, Massachusetts, November 8, 1860, with a full cargo of supplies for one year for all the lighthouses and light vessels between Amelia Island, Georgia, and the Rio Grande, Texas. The master in charge reached the bay at Galveston on the 5th of March, for the purpose of delivering the year's supply of oil, &c. to the Bolivar Point and other lighthouses in that vicinity. While he was absent from the vessel, attending to the delivery of the supplies, the Guthrie was boarded by

several men, accompanied by an individual calling himself General Sherman, claiming to act by authority, and under the orders of the "Committee of Safety at Galveston." These men got the vessel under weigh, and proceeded with her nearer the cutter, where she was detained.

Subsequently, in the Convention, an ordinance was passed requiring the State officers to appear before that body and take an oath, or that they, or either of them, who might refuse, should be considered as no longer in office. The Governor and the Secretary of State, neglecting or refusing to comply, the Convention, on the 20th of March, passed an ordinance declaring vacant the Gubernatorial chair, and that of the Secretary of State, on account of the refusal of those holding these offices to appear before the Convention, as did the other State officers, to take the oath of allegiance to the Confederate States. Lieut.-Governor Clark was required to assume the functions of Governor at once, and the Secretary of State called on to hand over the great seal of office and his official records.

The Legislature of the State met again on the 18th. The members of the House and Senate took the new oath of allegiance. The archives, seal, &c., were surrendered by the Governor and Secretary of State.

Some detachments of United States troops still remained in the State, and these were made prisoners, and released upon parole. On the 24th of April, Colonel Van Dorn, with a Texan force on steamers, came down from Indianola to Salaria, and anchored near the schooners having on board the United States troops under Major Sibley, numbering 450. An interview took place during the next day between the commanding officers, which ended in the surrender of the entire Federal force as prisoners of war. The officers were to be released on parole, and the men on their oaths that they would not take up arms against the Southern Confederacy, after surrendering their arms and all the property of the companies; such of the men and officers as desired were to be received into the Confederate army. Private property was not to be molested, and the soldiers were not permitted to leave the State except by way of Galveston and the Mississippi River.

On the 9th of May, six companies of the 8th United States Infantry, under command of Lieut.-Colonel Reeve, surrendered to a Confederate force under Colonel Van Dorn, near San Lucas Springs, about twenty-two miles west of San Antonio, and on the Castroville road. Colonel Reeve's command consisted of 366 rank and file, with their appropriate officers, together with Colonel Bumford and several other officers who were on leave, or under orders to report at other points, and who, taking advantage of the troops coming to San Antonio, sought and obtained the escort of the same.

Colonel Van Dorn left his camp on the Leon at four o'clock on Thursday morning, the 8th, and took a position previously selected, about

two miles to the westward on the road leading to Castroville, where he formed his command into line of battle. Shortly after daylight the pickets and spies reported Colonel Reeve as having left his camp at two o'clock, A. M., as had been his custom on this march, and having reached the high ridge of land near San Lucas Springs, and at the rancho of Mr. Adams, where he had halted his command, taken possession of the large stone house, barricaded the road with his wagons, and placed his troops in position behind the strong corral fences and in the stone house, apparently to await the assault.

Upon this being announced to the colonel commanding the Confederate troops, he ordered a forward movement of the whole command and gave directions for the forming of the line of battle. The infantry, under the command of Lieut.-Colonel Duff, were placed on the right; the battery of flying artillery—six pieces, 12-pounders—under Captain Edgar, in the centre, with the cavalry and mounted troops under Colonel H. E. McCulloch on the left. The whole command, numbering some 1,500 troops of all arms, presenting a very fine appearance, with banners flying, drums beating, sabres and bayonets glittering in the meridian sun, horses pawing and neighing, the field officers flying from one end of the field to another, carrying the commands of their chief.

Under a flag of truce, borne by Capts. Wilcox and Majors, a demand was made of an unconditional surrender of the United States troops as prisoners of war, and five minutes given to answer it. Col. Reeve would not agree to the terms unless Col. Van Dorn would convince him that he had sufficient strength to enforce them, by permitting an officer of his command, whom he would designate, to see the troops and report to him; the prompt answer returned was, that he should have that opportunity to see the troops, and the more he saw of them the less he would like it. The officer designated by Col. Reeve was Lieut. Bliss, a young officer of distinguished bravery, well known in the United States army, who mounted a horse, rode down the line of Confederate troops, and was repeatedly cheered. Suffice it to say, on his report, Col. Reeve surrendered with his command, together with all the public property in his possession, unconditionally, as prisoners of war, giving his word of honor that he would report himself and command at Col. Van Dorn's camp on the Leon that evening at 6 o'clock.

The Confederates then retired to camp, where they arrived about 3 o'clock P. M. At 5 o'clock P. M. Col. Reeve's command arrived in camp, and their ground being designated by the proper officer, they pitched their tents as orderly, and stacked their arms with as much precision as if on inspection parade. Next morning at 5 o'clock the infantry and cavalry struck their tents and marched into San Antonio, where they arrived in good condition at 6 o'clock. Col. Reeve's command marched to

the San Pedro Springs, two miles above San Antonio, to a camp designated by a proper officer, where all the arms and Government property were given up.

On the 18th of May, Gov. Houston addressed the people at Independence. The closing sentence of his speech was as follows:

"I have ever been conservative, was conservative as long as the Union lasted, am a conservative citizen of the Southern Confederacy, and, giving to the constituted authorities of the country, civil and military, and the Government which a majority of the people have approved and acquiesced in, an honest obedience; I feel that I should do less than my duty, did I not press upon others the importance of regarding this the first duty of a good citizen."

Still later in the year, near the latter part of September, the ex-Governor issued a letter explaining his position. In this letter he says:

"The time has been when there was a powerful Union sentiment in Texas, and a willingness on the part of many true patriots to give Mr. Lincoln a fair trial in the administration of the Federal Government. There was also a time when many of the best men in the country hoped that by an energetic demonstration they might bring about a reconstruction of the Government upon such principles as might guarantee the rights of the South. These times have passed by, while Union and reconstruction have become obsolete terms, or, if even mentioned, it is only in reference to past events. If there is any Union sentiment in Texas, I am not apprised of it.

"Mr. Lincoln and his Cabinet have usurped the powers of Congress, and have waged war against the sovereign States, and have thereby not only absolved the States, but all the people of the several States, from their allegiance to his Government, the Federal Government having ceased to exist by his acts of usurpation. He has, through his officers, suspended the writ of habeas corpus, the bulwark of American liberty, and proclaimed martial law in sovereign States. If I am to rely on the current intelligence of the day, he has, through his major-general, Mr. John C. Fremont, proclaimed martial law in Missouri, and assumed the civil administration of affairs in that State, thereby ignoring the Constitution and setting at naught the sovereignty of the people, and has, in fact, with more than Vandalic malignity and Gothic hate, sought to incite a servile insurrection in that State. If the last feather had been wanting to break the camel's back, this act of atrocity would have supplied it. His acts and feelings are such as have never failed to characterize the heart of a renegade.

"If Mr. Lincoln, as he was the aggressor, by invading the soil of a sovereign State, and causing the blood of her sons to be shed, even in the neighborhood of the sacred remains of Washington, after having become President upon a sectional issue, in derogation of the teaching of his farewell address, wishes to

make reparation for the wrongs inflicted, he has but one course left, and, in my opinion, that course is to propose an armistice that shall withdraw all the Federal troops from Virginia, suspend the action of all the Federal forces in all of the Southern States, the Confederate authorities at the same time guaranteeing that they will not advance their troops into any territory not occupied by them until the meeting of the Confederate and Federal Congresses at their next session. Should this course be pursued, there is little doubt but that the good sense and patriotism of the two sections would adopt such measures as would restore peace, arrest the further destruction of human life, and restore, to a great extent, the prosperity of the two sections, for it cannot be imagined that a vain hope of restoring the Union can ever be realized.

"The South can never reunite with the North, nor can the North entertain any rational hopes of her subjugation. The sooner war is ended, the greater will be the probability of establishing friendly relations between the two sections, and this cannot fail to promote the mutual prosperity of both. Should this be disregarded, a terrific responsibility must rest upon the heads of those who either interpose power or authority to prevent its consummation.

"Trusting that no further misapprehension of my opinions and feelings may be entertained by any one, I have been thus explicit, and submit them for what they are worth to the world."

The State had now become a member of the Confederacy, and her efforts were put forth to promote the success of that cause. On the 18th of June, Gov. Clark issued a proclamation forbidding all intercourse with the people of the Northern States; all existing contracts were to be suspended, and all made during the war would be void. He said:

It will be regarded as treason against the Confederate States of America, and against the State of Texas, for any citizen of said State to donate, sell, or in any manner exchange any property or commodity whatsoever with any citizen or citizens of either of said States or Territories now at war with said Confederate States, without special permission from proper authority.

It will also be treasonable for any citizen of Texas to pay any debts now owing by him to a citizen or citizens of either of said States or Territories, or to contract with them any new debts or obligation during the continuance of said war.

The statute of limitations will cease to run, and interest will not accrue during the continuance of the war.

All citizens of Northern States were warned to leave Texas within twenty days.

No hostile movement against Texas was made by the Federal Government during the year, and the only hostile act which occurred was at Galveston. (*See GALVESTON.*)

On the 5th of November the Legislature assembled at Austin. The state of affairs is thus described by a citizen:

"There is a good deal to be done, it is true, for we have an empty treasury, and our finances are in a woful condition. We cannot effect loans now as in peace times. Our United States bonds are not available. Our lands, in my opinion, cannot be made available now, and is the only thing I can see, which is a certainty, is taxation, and the people must face the music.

"I have no doubt ample relief will be extended to our citizens, by something akin to a stay law, and, indeed, there is a disposition already exhibited to extend relief wherever it is needed."

The election for Governor resulted in the choice of F. R. Lubback by a majority a little over 1,400.

The number of troops which Texas had in the Confederate army on the 1st of November, was estimated at nineteen regiments. These were all in the field, or on their way thither, and posted as follows:

Wigfall's, Hood's, and Archer's in Virginia; Terry's and Gregg's in Kentucky; Green's and Locke's in Missouri; Young's in the Indian Nation; Ford's in Arizona; H. E. McCulloch's on the Northern frontier; Reily's, Green's, and a third not yet organized in Sibley's brigade; Luckett's, Garland's, Parson's, Moore's, Nelson's, and Bate's for the coast. In addition to these, Col. Nichols was raising a regiment for six months' service on the coast; and there were also several more companies in service not attached to organized regiments.

The cereal crops of the State were unprecendently abundant last year all through the grain regions. Great quantities of wheat, corn, rye, and barley were raised by the German portion of the population. It was thus stated by a citizen: "The cattle upon a thousand hills and plains were never so thriving and well-conditioned, and if there were railroad communication, Western Texas could feed and forage all the army of the Confederacy at the lowest rates."

An attempt was made to prepare Galveston for a defence; for this purpose a battery of four columbiads and several rifled cannon was undertaken to be transported across Northern Louisiana by the State Government. A force of between two and three hundred oxen was employed, making a progress of about ten miles per day. The line of march commenced at Alexandria, on Red River, where the ordnance had been landed from New Orleans steamboats. These efforts do not appear to have been successful.

TRENT, BRITISH MAIL STEAMER. This vessel belonged to the line of English merchant steamers which run from Vera Cruz and Havana to St. Thomas, carrying the mail by contract, and thence connecting with a line to England. She left Havana on the morning of the 7th of November, under the command of Captain Moir, having on board Messrs. J. M. Mason and John Slidell—the former sent by the Government of the Confederate States, as am-

bassador to England, and the latter to France. Nothing of interest occurred till about noon on the 8th, when in the narrow passage of the old Bahama channel, opposite the Panador Grande light, a steamer was observed ahead, apparently waiting, and showing no colors.

The English report says: On approaching her, Capt. Moir, of the Trent, hoisted the British ensign, which met with no response, until the two vessels were within about a furlong of each other, when the stranger fired a shot across the Trent's bow, and hoisted the American flag. The Trent was still holding on her way, when a shell was fired from a long pivot gun on the American's deck forward, which burst about one hundred yards from the Trent's bow. Captain Moir immediately stopped the Trent, as the American had her broadside of guns run out, and men at quarters ready to fire. Captain Moir then hailed her, and the American captain replied that he wished to send a boat to the steamer. Two officers and about twenty men, armed with muskets, pistols, and cutlasses, then shoved off in a boat and boarded the Trent, and demanded a list of the passengers, which the captain refused to give. The officer commanding the boat stated that the name of the frigate was the "San Jacinto," of which he was the first lieutenant, and further, that they had received most positive information that certain passengers were on board, whom he wished to take out. Commander Williams, R. N., the naval agent in charge of Her Majesty's mails, with Captain Moir, positively objected to their being taken, denying their right to take any person whatever from under the English flag. The lieutenant then called out the names of the commissioners and their secretaries, and said that those were the persons he sought, and that he would take them at all hazards. The four gentlemen, who were standing near, answered to their names, and requested to know what was wanted of them. The lieutenant stated that he wished to take them on board the man-of-war, to which they replied that they would not go until they were taken by force, and turning to Captain Moir, Mr. Slidell said, "We claim the protection of the British flag." On the captain's again refusing to give up the passengers, the lieutenant said he should take charge of the ship. Commander Williams, R. N., then spoke as follows: "In this ship I am the representative of Her Majesty's Government, and I call upon the officers of the ship and the passengers generally to mark my words when, in the name of that Government, and in distinct language, I denounce this as an illegal act—an act of violation of international law—an act, indeed, of wanton piracy, which, had we the means of defence, you would not dare to attempt." The lieutenant then beckoned to the frigate, and three boats, containing thirty marines and about sixty sailors, officered and heavily armed, came alongside. The men at once leaped on deck, sword in hand. After some more parleying Messrs.

Slidell, Mason, Eustis, and McFarland were taken and forced into the boat. The officers of the *San Jacinto* went back to the cabins and took possession of the baggage, and sent it with their prisoners on board the *San Jacinto*. Mr. Slidell said, as the boat shoved off, that he expected redress from the British Government for this outrage while under the protection of its flag, and called upon the English captain to represent the case properly. The lieutenant stopped on board, having ordered the boat to return. He then stated that he had orders to take Captain Moir and his papers on board the *San Jacinto*, and that the *Trent* was to be moved nearer. Captain Moir replied: "You will find me on my quarter-deck; if you want me you will have to come there for me," and he immediately walked on deck. The lieutenant, however, went into one of the boats, and told Captain Moir that he could proceed. The boat pulled for the *San Jacinto*, and the *Trent* steamed ahead for St. Thomas. The officers of the *San Jacinto* asked for provisions for the prisoners, stating that they were short of stores. Captain Moir told the four gentlemen that at their request he would supply what was needed, and they having expressed a wish that he should do so, all the necessities were supplied.

An officer of the *San Jacinto* thus reports the affair: "About 11.40 A. M., the look-out at the masthead reported a smoke as from a steamer from the westward, and about 11 A. M. she was visible from the deck. We were all ready for her, beat to quarters, and as soon as she was within reach of our guns, every gun of our starboard battery was trained upon her. A shot from our pivot gun was fired across her bow. She hoisted English colors, but showed no disposition to slacken her speed or heave to. We hoisted the 'Star Spangled Banner,' and as soon as she was close upon us, fired a shell across her bow, which brought her to. Our captain hailed her, and said he would send a boat on board, and ordered Lieutenant Fairfax to board her; he went in the second cutter; at the same time Lieutenant Greer was already in the third cutter to shove from the port side should his assistance be required. On coming alongside the packet, Lieutenant Fairfax ordered the other officers to remain in the boat with the crew until force should become necessary, and he went on board alone. The captain of the mail steamer refused to show his papers and passenger list, knowing very well the object of our visit and the character and mission of the commissioners. But Mr. Mason being recognized, a part of the armed crew was ordered from the boat, and came on board. Messrs. Mason and Slidell were then requested to come on board the *San Jacinto*, but declined, and said that they would only yield by force; Mr. Slidell making the remark that 'it would require considerable force to take him on board the *San Jacinto*.' Lieutenant Fairfax then ordered Mr. Houston to return to our ship and

report that the Confederate commissioners were on board the mail steamer, and refused to come on board the *San Jacinto* by other means than force. Lieutenant Greer then shoved off and went alongside the *Trent*, sent his armed crew and marines on board, and stationed them at both gangways, and then, after a 'gentle application' of force, the four gentlemen were taken in the second cutter and conveyed on board of our ship, where they were received by Captain Wilkes at the gangway, and shown into his cabin, which they afterwards occupied. Two other boats were then sent on board to remove the luggage, and the ladies having declined the hospitalities offered them, at 3.30 we parted company from the *Trent*."

The commissioners made a protest to Captain Wilkes on the next day, in which they say that when the *Trent* got within hailing distance, her captain inquired what was wanted? The reply was understood to be: "They would send a boat." Both vessels were then stationary, with steam shut off. A boat very soon put off from the ship, followed immediately by two other boats, with full crews, and armed with muskets and side-arms. A lieutenant in the uniform of the United States navy, and with side-arms, boarded the *Trent*, and, in the presence of most of the passengers then assembled on the upper deck, said to Captain Moir that he came with orders to demand his passenger list. The captain refused to produce it, and formally protested against any right to visit his ship for the purpose indicated. After some conversation, implying renewed protests on the part of the captain against the alleged object of the visit, and on the part of the officer of the *San Jacinto* that he had only to execute his orders, the latter said that two gentlemen, naming Messrs. Slidell and Mason, were known to be on board, as also two other gentlemen, naming Messrs. Eustis and McFarland, and that his orders were to take and carry them on board the *San Jacinto*. On first addressing the captain, he announced himself as a lieutenant of the United States steamer *San Jacinto*. The four gentlemen named being present, the lieutenant addressed Mr. Slidell and afterwards Mr. Mason, repeating that his orders were to take them, together with Messrs. Eustis and McFarland, and carry them on board his ship. Messrs. Slidell and Mason, in reply, protested in the presence of the captain of the *Trent*, his officers and passengers, against such threatened violation of their persons and their rights, and informed the lieutenant that they would not leave the ship they were in unless compelled by the employment of actual force greater than they could resist, and Messrs. Eustis and McFarland united with them in expressing a like purpose. That officer stated that he hoped he would not be compelled to resort to the use of force, but if it should become necessary to employ it, in order to execute his orders, he was prepared to do so. He was answered by the commissioners that they would submit only to such a force.

The lieutenant then went to the gangway where his boats were, the commissioners going at the same time to their state rooms on the next deck below, followed by Captain Moir and by the other passengers. The lieutenant returned with a party of his men, a portion of whom were armed with side-arms, and others, appearing to be a squad of marines, having muskets and bayonets. Mr. Slidell was in his state room immediately by and in full view. The lieutenant then said to Mr. Mason that, having his force now present, he hoped to be relieved from the necessity of calling it into actual use. The gentleman again answered that he would only submit to actual force greater than he could overcome, when the lieutenant, and several of his men, by his order, took hold of him, and in a manner and in numbers sufficient to make resistance fruitless; and Mr. Slidell joining the group at the same time, one or more of the armed party took like hold of him, and those gentlemen at once went into the boat.

One account says, an exciting scene took place between Mr. Slidell, his eldest daughter, a noble girl devoted to her father, and Lieutenant Fairfax. With flashing eyes and quivering lips, she threw herself in the doorway of the cabin where her father was, resolved to defend him with her life, till, on the order being given to the marines to advance, which they did with bayonets pointed at this poor defenceless girl, her father ended the painful scene by escaping from the cabin by a window, when he was immediately seized by the marines and hurried into the boat. The commissioners were taken by the San Jacinto to Fort Warren, in Boston harbor, where they remained as prisoners.

A most intense excitement was aroused in England upon the arrival of the news of the transaction. Preparations for war with the United States were commenced, troops were sent to Canada, and a formal demand was made for the surrender of the commissioners, and an apology for the act by the Government. (*See* DIPLOMATIC CORRESPONDENCE.)

A vote of thanks to Captain Wilkes passed the House of Representatives subsequently, but the authorities at Washington sent instructions to the commandant at Fort Warren to deliver the Confederate commissioners to the representatives of the British Government. They were, therefore, quietly placed on board of a small steamer and taken to an English steam vessel at anchor near Provincetown, some distance from Boston. In her they were conveyed to the island of St. Thomas, and thence by the line of steam packets took passage to England, where they safely arrived, and were landed without any special official attention.

TUCKER, GEORGE. A Virginian jurist, born in 1775, died 1861. He was elected to Congress in 1819, from the district composed of the counties of Pittsylvania, Halifax, and Campbell, at that time one of the twenty-two districts of Virginia. While in Congress, Mr. Tucker oc-

cupied a high position as a debater and a constitutional lawyer, and his constituents manifested their appreciation of his merits by re-electing him in 1821 and 1823. In 1825, he retired from Congress to accept the Professorship of Law in the University of Virginia, which position he filled for a number of years. In his retirement from public life, Professor Tucker continued to render himself useful to his countrymen by the preparation of several works, the most important of which were a *Life of Jefferson*, and a *Political History of the United States*.

TYBEE ISLAND. Tybee Island is in Tybee Bay, on the south side of the entrance to Savannah River, in Georgia. The Savannah River is the dividing line between the States of South Carolina and Georgia. This island is southward of the bar, and about twenty miles southwest of Port Royal. It is one of the chain of sea islands which stretch all along the coast of Georgia and the adjoining States. The island is small, not as large as Port Royal Island. Cockspur Island lies immediately to the north of it, on which is situated Fort Pulaski—a very strong work, that defends the entrance to the Savannah River, and the defensive outpost of the city of Savannah itself. Tybee Island has been notable chiefly for mariners on account of its light-house, (Tybee Light,) one of the most prominent on the Southern coast. It was a fixed light, 108 feet above the sea, on the northeast end of the island, and in clear weather it might be seen at the distance of sixteen miles. This beacon was extinguished by the Georgians shortly after they had seceded from the Union. Tybee is long, narrow, and somewhat marshy, in the coast county of Chatham, and in climate and scenery is very much like Port Royal and the other Carolina sea islands. A small amount of sea island cotton is raised upon it, and its inhabitants are few. It has a beautiful creek to the west of it, where a ship of any burden may lie at anchor in perfect safety.

On the 26th of November, General Sherman, from the Port Royal expedition, determined to make a reconnoissance of the island, and landed with a small party. They discovered, on the point of land reaching out beyond the light-house, a fortification which had apparently been deserted for about eight days. It was a mere redan with flanking curtains, and had been mounted with not more than four or five guns. These had been moved. Behind it was a marteletto tower, with embrasures, altogether unfit for use. The light-house was deserted, and no trace of occupation discovered anywhere in its vicinity. The island is about two miles wide by five long, and its nearest point is distant only about a mile from Fort Pulaski. The light-house and battery are on the opposite corner from the fort. General Sherman, with an escort of marines, having examined the lower and deserted battery, approached the point of the island nearest to the fort, and was honored

with a shell or two from Fort Pulaski, which came quite near them. Lieutenant Magner, however, was allowed to examine another small work situated so as to cover the whole line of the beach between its two angles. He found no guns left, but that the position was admirable for defensive purposes. The enemy had evidently been aware of its importance; as once in possession of Federal forces, it would be very easy to throw shells into Fort Pulaski. The remains of a hutted encampment large

enough for a hundred men were to be seen from this place, but they bore no trace of having been recently occupied. There was no flag on the island, and it had evidently been completely abandoned. The fact that Federal vessels could come under the lee of the island and anchor in sight of Fort Pulaski, (only fifteen miles from Savannah,) and that shells could be thrown into the fort without difficulty, made its possession, at any cost, a matter of importance to the Federal force.

U

UNITED STATES. The population of the United States is numbered at the end of each ten years. The first census was taken in 1790, at which time the whole population was 3,929,827. The last census was taken in the month of June, 1860. The whole population, consisting of white, free colored, and slave, and the ratio of increase of each class since the previous census in 1850, were as given below.

The election for a President of the United States took place on the 4th of November, 1860.

The candidate of the Republicans was Abraham Lincoln, of Illinois. The distinctive principle which he represented was the non-extension of slavery to the territories of the United States, and its speedy removal from all places belonging to, or under the exclusive control of the Federal Government.

Stephen A. Douglas was the candidate representing the principle of non-intervention, which was understood to mean that Congress should not interfere with the question of slavery

or no slavery in a territory, but that it should be left to the inhabitants to determine when they assembled in convention to form a State constitution. The friends of Mr. Douglas consisted of a portion of the Democratic party.

John C. Breckinridge was the candidate representing the principle of protection to slavery in the territories, regarding slaves as a species of property recognized in the Constitution of the United States. After the territories become States, the whole question is under their control. The friends of Mr. Breckinridge constituted that portion of the Democratic party which did not support Mr. Douglas.

John Bell was the candidate of a party whose platform was "the Constitution, the Union, and the enforcement of the laws."

The vote of the people at the election was as follows: Lincoln, 1,857,610; Douglas, 1,365,976; Breckinridge, 847,953; Bell, 590,631.

The Government of the United States at this time was composed of the following officers:

President.—James Buchanan, of Pennsylvania.
Vice-President.—John C. Breckinridge, of Kentucky.
Secretary of State.—Lewis Cass, of Michigan.
Secretary of the Treasury.—Howell Cobb, of Georgia.
Secretary of War.—John B. Floyd, of Virginia.
Secretary of the Navy.—Isaac Toucey, of Conn.
Secretary of the Interior.—Jacob Thompson, of Miss.
Postmaster-General.—Joseph Holt, of Ky.
Attorney-General.—John S. Black, of Pennsylvania.

The movements in South Carolina early attracted the attention of the Government. Some of its members were doubtless informed that measures leading to secession would be immediately taken after the day on which the presidential election was held; others probably apprehended some movements of this nature, but were not informed what they would probably be. As early as the 20th of November the Attorney-General sent a reply to some questions respecting which his opinion had been asked by the President. These questions related to the obligation of citizens to obey the laws; to the power of the Government for the collection of duties, for the protection of public property, and to put down unlawful combinations too powerful to be suppressed by the ordinary course of judicial proceedings. On the first question the view taken by the Attorney-General was expressed in these words:

The will of a State, whether expressed in its constitution or laws, cannot, while it remains in the Confederacy, absolve her people from obeying the just and constitutional requirements of the Central Government. Nor can any act of the Central Government displace the jurisdiction of a State, because the laws of the United States are supreme and binding only so far as they are passed in pursuance of the Constitution. I do not say what might be effected by mere revolutionary force. I am speaking of legal and constitutional right. This is the view always taken by the Judiciary, and so universally adopted that the statement of it may seem common-place.

With regard to the collection of duties at any port, his views were as follows:

Where the law directs a thing to be done, without saying how, that implies the power to use such means as may be necessary and proper to accomplish the end

of the Legislature. But where the mode of performing a duty is pointed out by statute, that is the exclusive mode, and no other can be followed. The United States have no common law to fall back upon when the written law is defective. If, therefore, an Act of Congress declares that a certain thing shall be done by a particular officer, it cannot be done by a different officer. The agency which the law furnishes for its own execution must be used, to the exclusion of all others. For instance, the revenues of the United States are to be collected in a certain way, at certain established ports, and by a certain class of officers; the President has no authority, under any circumstances, to collect the same revenues at other places, by a different sort of officers, or in ways not provided for. Even if the machinery furnished by Congress for the collection of the duties should by any cause become so deranged or broken up that it could not be used, that would not be a legal reason for substituting a different kind of machinery in its place.

The law requires that all goods imported into the United States within certain collection districts shall be entered at the proper port, and the duty thereon shall be received by the collector appointed for and residing at that port. But the functions of the collector may be exercised anywhere at or within the port; there is no law which confines him to the custom-house, or any other particular spot. If the custom-house were burnt down, he might remove to another building; if he were driven from the shore, he might go on board a vessel in the harbor. If he keeps within the port he is within the law.

The right of the Government over public property is thus explained:

It is believed that no important public building has been bought or erected on ground where the Legislature of the State in which it is, has not passed a law consenting to the purchase of it and ceding the exclusive jurisdiction. This Government, then, is not only the owner of those buildings and grounds, but by virtue of the supreme and paramount law, it regulates the action and punishes the offences of all who are within them. If any one of an owner's rights is plainer than another, it is that of keeping exclusive possession and repelling intrusion. The right of defending the public property includes also the right of recapture after it has been unlawfully taken by another. President Jefferson held the opinion, and acted upon it, that he could order a military force to take possession of any land to which the United States had title, though they had never occupied it before, though a private party claimed and held it, and though it was not then needed nor proposed to be used for any purpose connected with the operations of the Government. This may have been a stretch of Executive power; but the right of retaking public property in which the Government has been carrying on its lawful business, and from which its officers have been unlawfully thrust out, cannot well be doubted; and when it was exercised at Harper's Ferry, in October, 1859, every one acknowledged the legal justice of it.

The next question asked of the Attorney-General, was the most important of all the inquiries. His view of it is interesting, as it comprises the ground upon which the succeeding Administration relied at the commencement of its military operations.

I come now to the point in your letter which is probably of the greatest practical importance. By the act of 1807 you may employ such parts of the land and naval forces as you shall judge necessary for the purpose of causing the laws to be duly executed, in all cases where it is lawful to use the militia for the same purpose. By the act of 1795 the militia may be called forth "whenever the laws of the United States shall be opposed, or the execution thereof obstructed in any States by combinations too powerful to be suppressed by the ordinary course of judicial proceedings, or by

the power vested in the marshals." This imposes upon the President the sole responsibility of deciding whether the exigency has arisen which requires the use of military force; and in proportion to the magnitude of that responsibility will be his care not to overstep the limits of his legal and just authority.

The laws referred to in the act of 1795 are manifestly those which are administered by the judges and executed by the ministerial officers of the courts for the punishment of crime against the United States, for the protection of rights claimed under the Federal Constitution and laws, and for the enforcement of such obligations as come within the cognizance of the Federal Judiciary. To compel obedience to these laws the courts have authority to punish all who obstruct their regular administration, and the marshals and their deputies have the same powers as sheriffs and their deputies in the several States in executing the laws of the States. These are the ordinary means provided for the execution of the laws, and the whole spirit of our system is opposed to the employment of any other except in cases of extreme necessity, arising out of great and unusual combinations against them. Their agency must continue to be used until their incapacity to cope with the power opposed to them shall be plainly demonstrated. It is only upon clear evidence to that effect that a military force can be called into the field. Even then its operations must be purely defensive. It can suppress only such combinations as are found directly opposing the laws and obstructing the execution thereof. It can do no more than what might and ought to be done by a civil posse, if a civil posse could be raised large enough to meet the same opposition. On such occasions, especially, the military power must be kept in strict subordination to the civil authority, since it is only in aid of the latter that the former can act at all.

But what if the feeling in any State against the United States should become so universal that the Federal officers themselves (including judges, district attorneys, and marshals) would be reached by the same influences and resign their places? Of course the first step would be to appoint others in their stead, if others could be got to serve. But, in such an event, it is more than probable that great difficulties would be found in filling the offices. We can easily conceive how it might become altogether impossible. We are therefore obliged to consider what can be done in case we have no courts to issue judicial process, and no ministerial officers to execute it. In that event troops would certainly be out of place, and their use wholly illegal. If they are sent to aid the courts and marshals, there must be courts and marshals to be aided. Without the exercise of those functions, which belong exclusively to the civil service, the laws cannot be executed in any event, no matter what may be the physical strength which the Government has at its command. Under such circumstances, to send a military force into any State with orders to act against the people would be simply making war upon them.

The existing laws put and keep the Federal Government strictly on the defensive. You can use force only to repel an assault on the public property, and aid the courts in the performance of their duty. If the means given you to collect the revenue and execute the other laws be insufficient for that purpose, Congress may extend and make them more effectual to that end.

If one of the States should declare her independence, your action cannot depend upon the rightfulness of the cause upon which such declaration is based. Whether the retirement of a State from the Union be the exercise of a right reserved in the Constitution or a revolutionary movement, it is certain that you have not in either case the authority to recognize her independence or to absolve her from her Federal obligations. Congress, or the other States in convention assembled, must take such measures as may be necessary and proper. In such an event I see no course for you but to go straight onward in the path you have hitherto trodden, that is, execute the laws to the extent of the defensive means placed in your hands, and act generally upon

the assumption that the present constitutional relations between the States and the Federal Government continue to exist, until a new order of things shall be established, either by law or force.

On the right of Congress to make war upon a State, and require the President to carry it on, the views of the Attorney-General were also given. Subsequent events attach interest to these views, which they would otherwise hardly possess. They were doubtless the opinions which controlled the action of the Administration until the close of its term.

Whether Congress has the constitutional right to make war against one or more States, and require the Executive of the Federal Government to carry it on by means of force to be drawn from the other States, is a question for Congress itself to consider. It must be admitted that no such power is expressly given; nor are there any words in the Constitution which imply it. Among the powers enumerated in Article I, section 8, is that "to declare war, grant letters of marque and reprisal, and to make rules concerning captures on land and water." This certainly means nothing more than the power to commence and carry on hostilities against the foreign enemies of the nation. Another clause in the same section gives Congress the power "to provide for calling forth the militia," and to use them within the limits of the State. But this power is so restricted by the words which immediately follow, that it can be exercised only for one of the following purposes: 1. To execute the laws of the Union; that is, to aid the Federal officers in the performance of their regular duties. 2. To suppress insurrections against the States; but this is confined by Article IV., sec. 4, to cases in which the State herself shall apply for assistance against her own people. 3. To repel the invasion of a State by enemies who come from abroad to assail her in her own territory. All these provisions are made to protect the States, not to authorize an attack by one part of the country upon another; to preserve their peace, and not to plunge them into civil war. Our forefathers do not seem to have thought that war was calculated "to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity." There was undoubtedly a strong and universal conviction among the men who framed and ratified the Constitution that military force would not only be useless but pernicious as a means of holding the States together.

If it be true that war cannot be declared, nor a system of general hostilities carried on by the Central Government against a State, then it seems to follow that an attempt to do so would be *ipso facto* an expulsion of such State from the Union. Being treated as an alien and an enemy, she would be compelled to act accordingly. And if Congress shall break up the present Union by unconstitutionally putting strife and enmity and armed hostility between different sections of the country, instead of the "domestic tranquillity" which the Constitution was meant to insure, will not all the States be absolved from their Federal obligations? Is any portion of the people bound to contribute their money or their blood to carry on a contest like that?

The right of the General Government to preserve itself in its whole constitutional vigor by repelling a direct and positive aggression upon its property or its officers cannot be denied. But this is a totally different thing from an offensive war to punish the people for the political misdeeds of their State government, or to prevent a threatened violation of the Constitution, or to enforce an acknowledgment that the Government of the United States is supreme. The States are colleagues of one another, and if some of them shall conquer the rest and hold them as subjugated provinces, it would totally destroy the whole theory upon which they are now connected.

During the month of November, the State of South Carolina had passed an act requiring a State Convention to assemble on the 17th of December. Preparations were commenced in other States bordering on the Gulf of Mexico, to secure similar conventions. These preparations consisted of proclamations by the Governors calling an extra session of the legislatures, or of the demonstrations of citizens in favor of the same object. Evidently a boastful and violent spirit was becoming aroused, which was determined to effect a separation of the States of the Union. Its development could be seen almost daily, and the first apprehensions awakened were, that it might acquire so much force and violence as to overwhelm those sentiments of attachment to the Union, which were known to be alive in the bosom of the mass of the people in each of the Southern States. In the border States of Virginia, Tennessee, North Carolina, and Arkansas, the love for the Union was supposed to be sufficient to check the violence of every hostile passion, and retain them under the Federal Government, unless new motives for secession should arise. So it for a time proved. But in those farther south, the Union demonstrations, although numerous, could not withstand the torrent of passion with which they were assailed. The calm and manly eloquence of Stephens, uttered at the request of members of the Legislature of Georgia, on the evening of November 14, was soon forgotten amid the excitement of passion that followed, and he himself was swept away by it. At that hour, standing in the hall of the House of Representatives of Georgia, he said:

"I look upon this country, with our institutions, as the Eden of the world, the paradise of the universe. It may be that out of it we may become greater and more prosperous, but I am candid and sincere in telling you that I fear if we rashly evince passion, and without sufficient cause shall take that step, that instead of becoming greater or more peaceful, prosperous, and happy—instead of becoming gods, we will become demons, and at no distant day commence cutting one another's throats. This is my apprehension. Let us, therefore, whatever we do, meet these difficulties, great as they are, like wise and sensible men, and consider them in the light of all the consequences which may attend our action. Let us see first clearly where the path of duty leads, and then we may not fear to tread therein."

He then proceeded to meet and refute the popular argument in favor of secession in these direct and plain words:

"The first question that presents itself is, Shall the people of the South secede from the Union in consequence of the election of Mr. Lincoln to the Presidency of the United States? My countrymen, I tell you frankly, candidly, and earnestly, that I do not think that they ought. In my judgment, the election of no man, constitutionally chosen to that high office, is sufficient cause for any State to separate from the

Union. It ought to stand by and aid still in maintaining the Constitution of the country. To make a point of resistance to the Government, to withdraw from it because a man has been constitutionally elected, puts us in the wrong. We are pledged to maintain the Constitution. Many of us have sworn to support it. Can we, therefore, for the mere election of a man to the Presidency—and that too in accordance with the prescribed forms of the Constitution—make a point of resistance to the Government without becoming the breakers of that sacred instrument ourselves, by withdrawing ourselves from it? Would we not be in the wrong? Whatever fate is to befall this country, let it never be laid to the charge of the people of the South, and especially to the people of Georgia, that we were untrue to our national engagements. Let the fault and the wrong rest upon others. If all our hopes are to be blasted, if the Republic is to go down, let us be found to the last moment standing on the deck, with the Constitution of the United States waving over our heads. Let the fanatics of the North break the Constitution, if such is their fell purpose. Let the responsibility be upon them. I shall speak presently more of their acts; but let not the South, let us not be the ones to commit the aggression. We went into the election with this people. The result was different from what we wished; but the election has been constitutionally held. Were we to make a point of resistance to the Government and go out of the Union on that account, the record would be made up hereafter against us."

Hours passed during which a crowded audience listened to his arguments and eloquence in favor of the Union. Three months later, and this man becomes the Vice-President of a Southern Confederacy. The Union, in his view, is dissolved, the past is forgotten, the future spreads a glorious vision before his eyes. (*See CONFEDERATE STATES*, page 129.)

The secession of the Southern States was not accomplished by a movement of the people. It was a preconceived and arranged purpose on the part of many prominent public men, cherished until the favorable hour should come for its execution. The hour thus selected was that upon which the election of Mr. Lincoln took place. Then the plan was put in execution without regard to the forms of law, or the numbers of the Union men.

The Congress of the United States assembled on the 3d of December, 1860, (*see CONGRESS U. S.*) and the Message of President Buchanan was immediately delivered. (*See PUBLIC DOCUMENTS.*) In this Message he denied in strong and unanswerable language the right of secession, and indicated his purpose to collect the revenue and defend the forts of South Carolina.

The attitude of South Carolina already excited the apprehensions of the Government. The subject of sending reinforcements to the

forts in the harbor of Charleston, had evidently been under consideration in the Cabinet, but was deferred or delayed by the action of Secretary Floyd. On the other hand, fears of these reinforcements were entertained by the authorities of that State, and on the 9th of December, a part of the delegation in Congress gave their assurances to the President that there would be no immediate attempt to possess them. (See page 654 for copy of their statement.)

Assurances were given by the President, as it is stated, that there should be no change in the position of the troops at Charleston.

On the 10th of December, the Secretary of the Treasury, Howell Cobb, resigned his office and immediately left Washington for his residence in Georgia, where he was soon after elected a member of the State Convention, and subsequently chosen as a delegate to the Confederate Congress, and appointed a brigadier-general in the Confederate army. This resignation was followed four days afterwards by that of the Secretary of State, Lewis Cass. The explanation given in the official paper was in these words:

"To avoid all misconception or misstatement of the reasons which caused this event, we have taken pains to ascertain the true cause. It is not that General Cass differed from the President in regard to any portion of his late Message. On the great question of coercing a State to remain in the Union by military force, the President and General Cass were perfectly united in opinion. The difficulty arose from the fact that General Cass insisted that a naval and military force should be sent immediately to Charleston to reinforce the forts in that harbor; and that the President was of opinion that there was no necessity for any such measure, in order to secure the forts against attack. This being the President's conviction, he would not sanction a movement which might lead to collision and bloodshed in the present excited state of feelings in South Carolina and other Southern States, and at a time when every friend of the Union is using his best efforts to prevent its dissolution, or, if that be not possible, to avert the adoption of any measure which would render its reconstruction hopeless."

General Cass was the oldest member of the Cabinet. In early life, he emigrated from his native State, New Hampshire, to Ohio, and subsequently rose to distinction as Governor of the Northwestern Territory, which became the State of Michigan. He was subsequently a member of the Cabinet of President Jackson, a minister to Paris, senator from the State of Michigan, and democratic candidate for the Presidency in 1848. He was succeeded as Secretary of State, by Attorney-General Black. The office vacated by Mr. Cobb was filled by the appointment of Philip F. Thomas, of Maryland.

The question which arose between the President and General Cass was doubtless the most difficult one ever before the Cabinet. At this time the State Convention of South Carolina had

not assembled. No overt act had been committed, no official step had been taken except the passage of an act by the Legislature calling a State Convention, which had often been done in nearly all the States. Immediately upon the opening of the session of Congress, measures had been introduced into each House for the purpose of stopping the progress of the secession movement, and healing the difficulties of the country. The propositions of Mr. Crittenden were before the Senate, and a flood of measures of reconciliation, so far as it could be done by a declaration of sentiments, was brought forward in the House. Meantime the people began to move in every Northern, Middle, and the upper tier of the Southern States, in favor of a settlement of the difficulties. It was an indisputable fact, at this time, that the vote cast for Mr. Douglas, numbering 1,365,976, and that cast for Mr. Bell, numbering 590,631, and the vote for Mr. Breckinridge in the free States, numbering 284,422, making a total of 2,241,029, was unanimously in favor of a peaceable and reasonable settlement of all difficulties with any of the Southern States. The vote for Mr. Lincoln was 1,857,610, of which at least one-fourth would have approved of such a peaceable settlement of the difficulties as might have been satisfactory to all the Southern States, whose complaints were founded upon questions connected with slavery. Of the vote given to Mr. Breckinridge in the slaveholding States, numbering 563,531, more than one-fourth of it desired a peaceable settlement upon such terms as would have been satisfactory to the friends of conciliation and compromise in the Northern States. Thus the voice of the people of the country at this time was overwhelmingly in favor of conciliation, forbearance, and compromise. The remainder of those who voted for Mr. Breckinridge were determined upon secession if it could be accomplished, and a portion of those who voted for Mr. Lincoln were determined that there should be no concession, on the ground that the Constitution and the laws were sufficient for the emergency. This state of public sentiment continued for some time, and those in favor of an adjustment indicated a decided opposition to coercive measures against the Southern States. The view which they then entertained of coercion was subsequently expressed in the emphatic words of Mr. Douglas: "You must do one of two things: either settle the difficulty amicably, or by the sword. An amicable settlement is a perpetuation of the Union. The use of the sword is war, disunion, and separation, now and forever." Meantime the Government, in its endeavors to act in conformity to these views of the country, manifested the most extreme forbearance, even in the presence of acts which, if proceeding from a foreign power, would, by common consent, have resulted in immediate war.

On the 20th of December, 1860, the ordinance of secession was passed by the State

Convention of South Carolina, and immediately afterwards commissioners were appointed to proceed to Washington to negotiate for a peaceable surrender, by the Federal Government, of the forts and other public property within the limits of the State. (*See SOUTH CAROLINA.*)

About this time, on the 26th of December, Major Anderson transferred his garrison from Fort Moultrie to Fort Sumter, in Charleston harbor. (*See FORTS*, page 315, also SUMTER and CHARLESTON.) The movement excited intense indignation among the active secessionists. It was the first flash across their minds of the idea that the United States might fight before the matter was ended. This movement of Major Anderson was made upon his own responsibility, and in view of the weakness of his former position, and the excitement which existed in the city of Charleston.

Major Anderson is a native of the State of Kentucky, and entered the army as a second lieutenant by brevet, in the Second Artillery, in 1845; in 1847 he was brevetted a major. He was ordered to the forts in Charleston harbor, in August, 1860.

The resignation of Mr. Floyd, Secretary of War, followed immediately upon this movement of Major Anderson. His letter of resignation and the reply of the President were as follows:

WAR DEPARTMENT, Dec. 29, 1860.

SIR: On the morning of the 27th inst. I read the following paper to you in the presence of the Cabinet:

COUNCIL CHAMBER, EXECUTIVE MANSION.

SIR: It is evident now from the action of the Commander of Fort Moultrie, that the solemn pledges of the Government have been violated by Major Anderson. In my judgment but one remedy is now left us by which to vindicate our honor and prevent civil war. It is in vain now to hope for confidence on the part of the people of South Carolina in any further pledges as to the action of the military. One remedy is left, and that is to withdraw the garrison from the harbor of Charleston. I hope the President will allow me to make that order at once. This order, in my judgment, can alone prevent bloodshed and civil war.

(Signed.) JOHN B. FLOYD, Secretary of War.

I then considered the honor of the Administration pledged to maintain the troops in the position they occupied, for such had been the assurances given to the gentlemen of South Carolina, who had a right to speak for her. South Carolina, on the other hand, gave reciprocal pledges that no force should be brought by them against the troops or against the property of the United States. The sole object of both parties in these reciprocal pledges was to prevent a collision and the effusion of blood, in the hope that some means might be found for a peaceful accommodation of the existing troubles, the two Houses of Congress having both raised committees looking to that object. Thus affairs stood until the action of Major Anderson, taken unfortunately while the commissioners were on their way to this capital, on a peaceful mission looking to the avoidance of bloodshed, has complicated matters in the existing manner. Our refusal or even delay to place affairs back as they stood under our agreement, invites a collision and must inevitably inaugurate civil war. I cannot consent to be the agent of such a calamity. I deeply regret that I feel myself under the necessity of tendering to you my resignation as Secretary of War, because I can no longer hold it under my convictions

of patriotism, nor with honor, subjected as I am to a violation of solemn pledges and plighted faith.

With the highest personal regard,

I am most truly yours,

JOHN B. FLOYD.

To His Excellency the President of the United States.

THE PRESIDENT'S REPLY.

WASHINGTON, Dec. 31, 1860.

MY DEAR SIR: I have received and accepted your resignation of the office of Secretary of War; and not wishing to impose upon you the task of performing its mere routine duties, which you have so kindly offered to do, I have authorized Postmaster-General Holt to administer the affairs of the Department until your successor shall be appointed.

Yours, very respectfully,

JAMES BUCHANAN.

HON. JOHN B. FLOYD,

Secretary Floyd is a native of the State of Virginia; he has been a representative in Congress, Governor of his native State, and member of Mr. Buchanan's Cabinet. Subsequently an indictment was found against the ex-Secretary by the Grand Jury of the District of Columbia as being privy to the abstraction of certain bonds amounting to more than \$800,000, in the custody of the Department of the Interior, in the latter part of the year 1860. The report of the proceedings in this matter is very summary. On the 19th of March, 1861, in the Criminal Court at Washington, in the case of John B. Floyd, ex-Secretary of War, for conspiracy in attempting to defraud the Government, District Attorney Ould moved to enter a *nolle prosequi*. He stated that he believed the conspiracy existed with Godard Bailey alone, and also, that as Mr. Floyd had been summoned and requested to testify before a congressional committee in relation to the matter, he could not be prosecuted by the Court, according to its ruling in the case of Russell.

Mr. Carlisle thought it was proper to state that his client (Mr. Floyd) had come here ready to answer the charges brought against him; but hearing of the decision with regard to Russell, he (Carlisle) had, upon his own responsibility, and without consultation with any one, thought proper to bring the matter before his Honor. He hoped the motion of the District Attorney would be allowed.

The Judge stated that he would take time to examine the indictment, and some other technicalities of the case. He gave a decision on the 20th, dismissing the case.

The agency of the Secretary in improving the military condition of the Southern States, filling the arsenals with arms, and preventing the occupation of the forts by the United States forces, was most important to the Confederacy. Before the close of the year he was appointed a brigadier-general in the Confederate army, and was in command at several skirmishes in Western Virginia.

On the 29th of December the commissioners from South Carolina, Messrs. Barnwell, Adams, and Orr, addressed a letter to President Buchanan, stating that they were authorized and empowered to treat with the Government of

the United States for the delivery of the forts, magazines, light-houses, and other real estate, with their appurtenances, in the limits of South Carolina; and also for an apportionment of the public debt, and for a division of all other property held by the Government of the United States, as agent of the Confederate States, of which South Carolina was recently a member, and generally to negotiate as to all other measures and arrangements proper to be made and adopted in the existing relation of the parties, and for the continuance of peace and amity between that commonwealth and the Government at Washington.

They further laid before the President an official copy of the ordinance of secession, by which the State of South Carolina, as they said, "has resumed the powers she delegated to the Government of the United States, and has declared her perfect sovereignty and independence." They then proceed to say:

It would also have been our duty to have informed you that we were ready to negotiate with you upon all such questions as are necessarily raised by the adoption of this ordinance, and that we were prepared to enter upon this negotiation with the earnest desire to avoid all unnecessary and hostile collision, and so to inaugurate our new relations as to secure mutual respect, general advantage, and a future of good will and harmony, beneficial to all the parties concerned.

But the events of the last twenty-four hours render such an assurance impossible. We came here the representatives of an authority which could, at any time within the past sixty days, have taken possession of the forts in Charleston harbor, but which, upon pledges given in a manner that we cannot doubt, determined to trust to your honor rather than to its own power. Since our arrival here an officer of the United States, acting, as we are assured, not only without, but against your orders, has dismantled one fort and occupied another—thus altering to a most important extent the condition of affairs under which we came.

Until these circumstances are explained in a manner which relieves us of all doubt as to the spirit in which these negotiations shall be conducted, we are forced to suspend all discussion as to any arrangement by which our mutual interests may be amicably adjusted.

And, in conclusion, we would urge upon you the immediate withdrawal of the troops from the harbor of Charleston. Under present circumstances, they are a standing menace which renders negotiation impossible, and, as our recent experience shows, threatens speedily to bring to a bloody issue questions which ought to be settled with temperance and judgment.

The reply of the President is dated on the 30th. He alludes to his Message to Congress on the 3d of December, in which his position was defined. He states that he could meet them only as private gentlemen of the highest character, and was entirely willing to communicate to Congress any proposition they might have to make to that body. He then refers to that portion of their letters which speaks of the events of the previous twenty-four hours, and the change in their position, and says:

This brings me to a consideration of the nature of those alleged pledges, and in what manner they have been observed. In my Message of the 3d of December last, I stated, in regard to the property of the United States in South Carolina, that it "has been purchased for a fair equivalent, by the consent of the

Legislature of the State, for the erection of forts, magazines, arsenals, &c., and over these the authority 'to exercise exclusive legislation,' has been expressly granted by the Constitution to Congress. It is not believed that any attempt will be made to expel the United States from this property by force; but if in this I should prove to be mistaken, the officer in command of the forts has received orders to act strictly on the defensive. In such a contingency, the responsibility for consequences would rightfully rest upon the heads of the assailants." This being the condition of the parties on Saturday, December 8, four of the representatives from South Carolina called upon me, and requested an interview. We had an earnest conversation on the subject of these forts, and the best means of preventing a collision between the parties, for the purpose of sparing the effusion of blood. I suggested, for prudential reasons, that it would be best to put in writing what they said to me verbally. They did so, accordingly, and on Monday morning, the 10th inst., three of them presented to me a paper signed by all the representatives of South Carolina, with a single exception. (See page 654.)

And here I must, in justice to myself, remark that at the time the paper was presented to me, I objected to the word "provided," as it might be construed into an agreement on my part, which I never would make. They said that nothing was further from their intention—they did not so understand it, and I should not so consider it. It is evident they could enter into no reciprocal agreement with me on the subject. They did not profess to have authority to do this, and were acting in their individual character. I considered it as nothing more, in effect, than the promise of highly honorable gentlemen to exert their influence for the purpose expressed. The event has proven that they have faithfully kept this promise, although I have never since received a line from any of them, or from any member of the Convention on the subject. It is well known that it was my determination, and this I freely expressed, not to reinforce the forts in the harbor, and thus produce a collision, until they had been actually attacked, or until I had certain evidence that they were about to be attacked. This paper I received most cordially, and considered it as a happy omen that peace might be still preserved, and that time might be thus given for reflection. This is the whole foundation for the alleged pledge.

But I acted in the same manner as I would have done had I entered into a positive and formal agreement with parties capable of contracting, although such an agreement would have been, on my part, from the nature of my official duties, impossible. The world knows that I have never sent any reinforcements to the forts in Charleston harbor, and I have certainly never authorized any change to be made "in their relative military status." Bearing upon this subject I refer you to an order issued by the Secretary of War, on the 11th inst., to Major Anderson, but not brought to my notice until the 21st inst. (See FORTS AND ARSENALS, MOULTRIE.)

The President then proceeds to say that Major Anderson acted on his own responsibility in removing to Fort Sumter, (see PUBLIC DOCUMENTS, *Message of January 8*), and justice required that he should not be condemned without a hearing. He then states that his first promptings, on hearing of the removal of Anderson, were to order him to return to Fort Moultrie, but before any steps could be taken to secure the concurrence of the South Carolina authorities, the latter took possession of the abandoned fort, and the other vacant ones. After describing the occurrences, the President thus proceeds:

It is under all these circumstances that I am urged

immediately to withdraw the troops from the harbor of Charleston, and I am informed that without this negotiation is impossible. This I cannot do—this I will not do. Such an idea was never thought of by me in any possible contingency. No such allusion had been made in any communication between myself and any human being. But the inference is that I am bound to withdraw the troops from the only fort remaining in the possession of the United States in the harbor of Charleston, because the officer there in command of all of the forts thought proper, without instructions, to change his position from one of them to another.

At this point of writing, I have received information by telegraph from Capt. Humphreys, in command of the arsenal at Charleston, that "it has to-day (Sunday, the 30th) been taken by force of arms." It is estimated that the munitions of war belonging to this arsenal are worth half a million of dollars.

Comment is needless. After this information, I have only to add, that whilst it is my duty to defend Fort Sumter, as a portion of the public property of the United States, against hostile attacks, from whatever quarter they may come, by such means as I possess for this purpose, I do not perceive how such a defence can be construed into a menace against the city of Charleston.

To this letter of the President the commissioners sent a reply, dated January 1, 1861. It is devoted to an examination of the main points of the President's letter, and insists that he was under a pledge to preserve the *status* of affairs in Charleston harbor previous to the removal of Major Anderson to Fort Sumter, and insisting that he should observe this pledge.

This communication was returned by the President, with the following indorsement upon it: "This paper, just presented to the President, is of such a character that he declines to receive it."

After the departure of the South Carolina delegation, Messrs. Wm. Porcher Miles and Lawrence M. Keitt published at Charleston, S. C., a narrative entitled, "A statement of what transpired between the President and the South Carolina delegation," in relation to the reinforcement of Major Anderson. The following extract shows that the understanding on the subject between the President and representatives of the State was not, even in the opinion of the latter, in the nature of a pledge on either side:

The very fact that we, the representatives from South Carolina, were not authorized to commit or "pledge" the State, were not treating with the President as accredited ministers with full powers, but as gentlemen assuming, to a certain extent, the delicate task of undertaking to foreshadow the course and policy of the State, should have made the President more ready to strengthen our hands to bring about and carry out the course and policy which he professed to have as much at heart as we had. While we were not authorized to say that the Convention would not order the occupation of the forts immediately after secession, and prior to the sending on of commissioners, the President, as commander-in-chief of the army and navy of the United States, could most positively say that, so long as South Carolina abstained from attacking and seizing the forts, he would not send reinforcements to them or allow their relative military *status* to be changed. We were acting in the capacity of gentlemen holding certain prominent positions, and anxious to exert such influence as we might possess to effect a peaceful solution of pending political difficulties, and

prevent, if possible, the horrors of war. The President was acting in a double capacity; not only as a gentleman, whose influence in carrying out his share of the understanding or agreement was potential, but as the head of the army, and, therefore, having the absolute control of the whole matter of reinforcing or transferring the garrison at Charleston. But we have dwelt long enough upon this point. Suffice it to say that, considering the President as bound in honor, if not by treaty stipulation, not to make any change in the forts, or to send reinforcements to them unless they were attacked, we of the delegation who were elected to the Convention felt equally bound in honor to do every thing on our part to prevent any premature collision. This Convention can bear us witness as to whether or not we endeavored honorably to carry out our share of the agreement.

Affairs now continued to grow worse. The hope of an amicable adjustment was diminished by every hour's delay, and as the prospect of a bloodless settlement passed away, the public distress became more and more aggravated. The Treasury was without money, and could obtain it only at twelve per cent. interest. The military force of the Government was almost entirely on the western frontier, and the vessels of the navy were in active service in distant stations, or required immediate repairs. (See NAVY.)

On the 8th of January the President sent a Message to Congress, urging its immediate attention to the state of affairs. After alluding to the views advanced in his former Message, he said:

This left me no alternative, as the chief Executive officer under the Constitution of the United States, but to collect the public revenues and to protect the public property, so far as this might be practicable, under existing laws.

This is still my purpose. My province is to execute, and not to make the laws. It belongs to Congress exclusively to repeal, to modify, or to enlarge their provisions to meet exigencies as they may occur. I possess no dispensing power.

I certainly had no right to make aggressive war upon any State; and I am perfectly satisfied that the Constitution has wisely withheld that power even from Congress. But the right and the duty to use military force defensively against those who resist the Federal officers in the execution of their legal functions, and against those who assail the property of the Federal Government, are clear and undeniable.

But the dangerous and hostile attitude of the States towards each other has already far transcended and cast in the shade the ordinary Executive duties already provided for by law, and has assumed such vast and alarming proportions as to place the subject entirely above and beyond Executive control. The fact cannot be disguised that we are in the midst of a great revolution. In all its various bearings, therefore, I commend the question to Congress, as the only human tribunal, under Providence, possessing the power to meet the existing emergency. To them exclusively belongs the power to declare war, or to authorize the employment of military force in all cases contemplated by the Constitution, and they alone possess the power to remove grievances which might lead to war, and to secure peace and union to this distracted country. On them, and on them alone, rests the responsibility.

Referring to the principle which had thus far governed his conduct, he said:

At the beginning of these unhappy troubles I determined that no act of mine should increase the excitement in either section of the country. If the political conflict were to end in a civil war it was my deter-

mined purpose not to commence it, nor even to furnish an excuse for it by any act of this Government. My opinion remains unchanged, that justice as well as sound policy require us still to seek a peaceful solution of the questions at issue between the North and the South. (See PUBLIC DOCUMENTS.)

On the 8th of January, Jacob Thompson, of Mississippi, the Secretary of the Interior, during Mr. Buchanan's administration, resigned. He had telegraphed to Charleston and other places at the South that no more troops would be sent to Charleston for the present, and learning that more had then been ordered, he thought that his honor had been compromised, and therefore resigned. From the correspondence between him and Mr. Buchanan, it appears that the former had mistaken the action of the Cabinet. Mr. Thompson, on tendering his resignation, addressed the President as follows:

SIR: It is with extreme regret I have just learned that additional troops have been ordered to Charleston. This subject has been frequently discussed in Cabinet Council; and when on Monday night, 31st of December ultimo, the orders for reinforcements to Fort Sumter were countermanded, I distinctly understood from you that no order of the kind would be made without being previously considered and decided in Cabinet. It is true that on Wednesday, January 2, this subject was again discussed in Cabinet, but certainly no conclusion was reached, and the War Department was not justified in ordering reinforcements without something more than was then said. I learn, however, this morning, for the first time, that the steamer *Star* of the West sailed from New York last Saturday night with two hundred and fifty men, under Lieutenant Bartlett, bound for Fort Sumter. Under these circumstances I feel myself bound to resign my commission, as one of your constitutional advisers, into your hands.

With high respect, your obedient servant, &c.

To this President Buchanan replied on the next day:

SIR: I have received and accepted your resignation on yesterday, of the office of Secretary of the Interior.

On Monday evening, 31st December, 1860, I suspended the orders which had been issued by the War and Navy Departments to send the Brooklyn with reinforcements to Fort Sumter. Of this I informed you on the same evening. I stated to you my reason for this suspension, which you knew, from its nature, would be speedily removed. In consequence of your request, however, I promised that these orders should not be renewed "without being previously considered and decided in Cabinet." This promise was faithfully observed on my part. In order to carry it into effect I called a special Cabinet meeting on Wednesday, 2d January, 1861, in which the question of sending reinforcements to Fort Sumter was amply discussed both by yourself and others. The decided majority of opinions was against you. At this moment, the answer of the South Carolina "Commissioners" to my communication to them of 31st December was received and read. It produced much indignation among the members of the Cabinet. After a further brief conversation I employed the following language: "It is now all over, and reinforcements must be sent." Judge Black said, at the moment of my decision, that after this letter the Cabinet would be unanimous, and I heard no dissenting voice. Indeed, the spirit and tone of the letter left no doubt on my mind that Fort Sumter would be immediately attacked, and hence the necessity of sending reinforcements there without delay.

Whilst you admit "that on Wednesday, January 2, this subject was again discussed in Cabinet," you say, "but certainly no conclusion was reached, and the War Department was not justified in ordering reinforcements without something more than was then

said." You are certainly mistaken in alleging that "no conclusion was reached." In this your recollection is entirely different from that of your four oldest colleagues in the Cabinet. Indeed, my language was so unmistakable that the Secretaries of War and the Navy proceeded to act upon it without any further intercourse with myself than what you heard, or might have heard me say. You had been so emphatic in opposing these reinforcements that I thought you would resign in consequence of my decision. I deeply regret that you have been mistaken in point of fact, though I firmly believe honestly mistaken. Still, it is certain you have not the less been mistaken.

Yours, very respectfully.

'On his return home to Mississippi, he was welcomed by a number of neighbors and friends, to whom he made an address, stating the opinions which existed in Mr. Buchanan's Cabinet.

He said that there was "no serious difficulty" in the Cabinet until after the presidential election, when there arose a discussion upon the rights and powers of the General and State Governments. On the right of a State to secede, the Cabinet split at once; but on the right of the General Government to coerce a State, all agreed in the negative. Mr. Thompson held strongly to the right to secede, but kept his place, in the hope, as he says, of preserving peace. He agreed with the President that it was his duty to enforce the laws and hold public property, but held that the army and navy could only be used as a posse to aid the civil authority, and as all the civil and executive officers in South Carolina had resigned, there could be no attempt to uphold the laws. He held, also, that the forts in the seceding States could not be occupied as military posts without endangering the peace of the country. He not only pressed this view of the subject, but insisted that the President had no right to reinforce the defences in Charleston harbor. He says: "As I was writing my resignation, I sent a dispatch to Judge Longstreet, that the *Star* of the West was coming with reinforcements. The troops were thus put on their guard, and when the *Star* of the West arrived she received a warm welcome from booming cannon, and soon beat a retreat."

Philip F. Thomas, of Maryland, who had been appointed Secretary of the Treasury, on the resignation of Howell Cobb, of Georgia, on the 10th of December, 1860, discharged the duties of the office one month, and on the 11th of January tendered his resignation. His statement of reasons for this step is important, so far as it manifests any of the views entertained by the Cabinet at this time. He writes to President Buchanan:

MY DEAR SIR: It has not been in my power, as you are aware, to agree with you and with a majority of your constitutional advisers in the measures which have been adopted in reference to the present condition of things in South Carolina; nor do I think it at all probable that I shall be able to concur in the views which you entertain, so far as I understand them, touching the authority, under existing laws, to enforce the collection of the customs at the port of Charleston.

To avoid embarrassment on the one hand, and the exposure of himself to just criticism by those who knew his views, his resignation was tendered, &c. To this the President replied, accepting the resignation, by saying, "I very much regret that circumstances, in your opinion, have rendered this necessary."

On the same day John A. Dix, of New York, was appointed Secretary of the Treasury, and confirmed by the Senate. He was a citizen of,

New York, had belonged to the army in the war of 1812, was subsequently a Senator in Congress, and at the time of his appointment held the office of post-master at New York City. Subsequently, on the 16th of May, he was made a major-general in the army, and commanded a force stationed at Baltimore.

The views entertained by the Government from this period until the 4th of March, were stated explicitly by Secretary Dix in his speech at the great meeting at Union Square in New York City on the 20th of April ensuing. Coming from a member of the Cabinet during the time of which he speaks, they are entitled to unreserved credit. His words were these:

"And here, fellow-citizens, it is important that we should clearly understand the position of the late Administration on this question. It is due to this Administration, as well as the last, that we should all understand it. I shall be very brief, but I must ask your close attention for the few moments that will be needed. On the 3d of December last, in his annual Message to Congress, the late President made a strong and unanswerable argument against the right of secession. He also indicated his purpose to collect the revenue and defend the forts in South Carolina. In a special Message to Congress, on the 8th of January, he declared (I use the language of the Message)—'The right and the duty to use military force defensively against those who resist the Federal officers in the execution of their legal functions, and against those who assail the property of the Federal Government, are clear and undeniable.' The authorities of South Carolina were repeatedly warned that, if they assailed Fort Sumter, it would be the commencement of civil war, and they would be responsible for the consequences. The last and most emphatic of these warnings is contained in the admirable answer of Mr. Holt, Secretary of War, to Mr. Hayne, the commissioner from South Carolina, on the 6th of February. It is in these words: 'If, with all the multiplied proof which exists of the President's anxiety for peace, and of the earnestness with which he has pursued it, the authorities of that State shall assault Fort Sumter, and peril the lives of the handful of brave and loyal men shut up within its walls, and thus plunge our common country into the horrors of civil war, then upon them and those they represent must rest the responsibility.' I believe the letter from which I have read this extract has never been published, for I, as a member of the Administration at the time it was written, have a right to say that it had the cordial approval of the late President and all his constitutional advisers. And this brings me to the point I wish to make. I violate no confidence in making it. It is this: if South Carolina had tendered war to the late Administration as she has to this—I mean by a hostile and deadly assault—it would have been unanimously accepted."

The President states, in his letter accepting

the resignation of Secretary Thompson, that on the 2d of January, in Cabinet meeting, it was decided to reinforce Fort Sumter. On the 5th the steamer *Star* of the West left New York with men, arms, and ammunition on board, and arrived off Charleston on the 9th, (*see STAR OF THE WEST*;) was fired upon, and returned. This proceeding was consistent with the position taken by the President in his Message of January 8, and his correspondence with the retiring secretaries.

Meantime, on the 4th of January, an order was issued to all the available troops at Leavenworth, Kansas, to be ready to march to Fort McHenry at Baltimore. The order to march was given on the 7th. On the 7th a small force was sent to Harper's Ferry armory. A regiment of volunteers had been offered from Westchester, Penn., on the 5th. On the same day a salute in honor of Major Anderson was fired at Schenectady, N. Y. On the 10th the steamer *Joseph Whitney* left Boston with stores and troops for the Tortugas and other forts in Florida.

The occupation of Fort Sumter by a little garrison of Federal troops, and the waving of the Stars and Stripes daily over its walls in the harbor of Charleston, gave great annoyance to the authorities of South Carolina. The sovereignty and independence of South Carolina was not an accomplished fact, while that emblem of another power floated without her consent over a portion of the State territory. Accordingly, on the 11th of January, a demand for the surrender of the fort was made by Gov. Pickens on Major Anderson, who declined to comply, from want of authority. (*See SUMTER.*) On the same day I. W. Hayne, Attorney-General of South Carolina, was despatched as an envoy of the State to Washington, to demand the surrender of the fort by the President of the United States. On his arrival in Washington, ten Senators in Congress from seceding States advised him to delay action until those States should have formed a Confederacy. They offered to propose to the President that Fort Sumter should not be reinforced in the mean time. On this condition he acceded to their request. Those Senators, through Messrs. Fitzpatrick, Mallory, and Slidell, having laid the correspondence before the President, received through Secretary Holt a reply dated on the 22d of January.

Mr. Holt stated that the President had considered that correspondence, in which it appeared that their suggestions to Mr. Hayne to withhold his demand on the President, had received a clear and explicit answer from Mr. Hayne himself, in these words:

"I am not clothed with power to make the arrangements you suggest; but provided you can get assurances, with which you are entirely satisfied, that no reinforcements will be sent to Fort Sumter in the interval, and that the public peace will not be disturbed by any act of hostility towards South Carolina, I will refer your communication to the authorities of South Carolina, and, withholding the communication with

which I am at present charged, will await further instructions.

Mr. Holt then states that the President has endeavored to perform his duties in such a manner as to preserve the peace and prevent bloodshed. His sole object has been to act strictly on the defensive, and to authorize no movement against the people of South Carolina, unless clearly justified by a hostile movement on their part.

In regard to the proposition of Colonel Hayne, "that no reinforcements will be sent to Fort Sumter in the interval, and that the public peace will not be disturbed by any act of hostility towards South Carolina," it is impossible for him to give any such assurances. The President has no authority to enter into such an agreement or understanding. As an executive officer, he is simply bound to protect the public property, so far as this may be practicable; and it would be a manifest violation of his duty to place himself under engagements that he would not perform this duty either for an indefinite or a limited period. At the present moment, it is not deemed necessary to reinforce Major Anderson, because he makes no such request, and feels quite secure in his position. Should his safety, however, require reinforcements, every effort will be made to supply them.

In regard to an assurance from the President "that the public peace will not be disturbed by any act of hostility towards South Carolina," Mr. Holt said: "The answer will readily occur to yourselves. To Congress, and to Congress alone, belongs the power to make war, and it would be an act of usurpation for the Executive to give any assurance that Congress would not exercise this power, however strongly he may be convinced that no such intention exists."

This correspondence was forwarded to Charleston, and the Governor of South Carolina ordered Mr. Hayne to deliver his letter forthwith. The demand of Mr. Hayne was urged on these grounds:

South Carolina, as a separate independent sovereign, assumes the right to take into her own possession every thing within her limits essential to maintain her honor or her safety, irrespective of the question of property, subject only to the moral duty requiring that compensation should be made to the owner. This right she cannot permit to be drawn into discussion. As to compensation for any property, whether of an individual or a Government, which she may deem it necessary, for her honor or safety, to take into her possession, her past history gives ample guarantee that it will be made, upon a fair accounting, to the last dollar.

In another part of his letter he speaks in terms of similar purport, as follows:

She (South Carolina) rests her position on something higher than mere property. It is a consideration of her own dignity as a sovereign, and the safety of her people, which prompts her to demand that this property should not longer be used as a military post by a Government she no longer acknowledges. She feels this to be an imperative duty. It has, in fact, become an absolute necessity of her condition.

On the 6th of February, Mr. Holt gave a final reply, in which he said:

The proposal now presented to the President, is simply an offer on the part of South Carolina to buy Fort Sumter and contents as property of the United States, sustained by a declaration, in effect, that if she is not permitted to make the purchase, she will seize the fort by force of arms. As the initiation of the negotiation for the transfer of property between friendly Governments, this proposal impresses the President as having assumed a most unusual form. He has, however, investigated the claim on which it professes to be based, apart from the declaration that accompanies it. And it may be here remarked that much stress has been laid upon the employment of the words "property" and "public property" by the President in his several messages. These are the most comprehensive terms which can be used in such a connection, and surely, when referring to a fort or any other public establishment, they embrace the entire and undivided interest of the Government therein.

The title of the United States to Fort Sumter is complete and incontestable. Were its interest in this property purely proprietary, in the ordinary acceptation of the term, it might probably be subjected to the exercise of the right of eminent domain; but it has also political relations to it of a much higher and more imposing character than those of mere proprietorship. It has absolute jurisdiction over the fort and the soil on which it stands. This jurisdiction consists in the authority to "exercise exclusive legislation" over the property referred to, and is therefore clearly incompatible with the claim of eminent domain now insisted upon by South Carolina. This authority was not derived from any questionable, revolutionary source, but from the peaceful cession of South Carolina herself, acting through her Legislature, under a provision of the Constitution of the United States. South Carolina can no more assert the right of eminent domain over Fort Sumter than Maryland can assert it over the District of Columbia. The political and proprietary rights of the United States in either case rest upon precisely the same ground.

The President, however, is relieved from the necessity of further pursuing this inquiry by the fact that, whatever may be the claim of South Carolina to this fort, he has no constitutional power to cede or surrender it. The property of the United States has been acquired by force of public law, and can only be disposed of under the same solemn sanctions. The President, as the head of the Executive branch of the Government only, can no more sell and transfer Fort Sumter to South Carolina, than he can sell and convey the capital of the United States to Maryland, or to any other State or individual seeking to possess it. His Excellency the Governor is too familiar with the Constitution of the United States, and with the limitations upon the powers of the Chief Magistrate of the Government it has established, not to appreciate at once the soundness of this legal proposition.

The question of reinforcing Fort Sumter is so fully disposed of in my letter to Senator Slidell and others, under date of the 22d of January—a copy of which accompanies this—that its discussion will not now be renewed. I then said: "At the present moment it is not deemed necessary to reinforce Major Anderson, because he makes no such request. Should his safety, however, require reinforcements, every effort will be made to supply them." I can add nothing to the explicitness of this language, which still applies to the existing status. The right to send forward reinforcements, when in the judgment of the President the safety of the garrison requires them, rests on the same unquestionable foundation as the right to occupy the fortress itself.

In the letter of Senator Davis and others to yourself, under date of the 15th ultimo, they say: "We, therefore, think it especially due from South Carolina to our States—to say nothing of other slaveholding States—that she should, as far as she can consistently with her honor, avoid initiating hostilities between her and the United States, or any other Power;" and you now yourself give to the President the gratifying as-

surance that "South Carolina has every disposition to preserve the public peace;" and, since he is himself sincerely animated by the same desire, it would seem that this common and patriotic object must be of certain attainment. It is difficult, however, to reconcile with this assurance the declaration on your part that "it is a consideration of her (South Carolina's) own dignity as a sovereign, and the safety of her people, which prompts her to demand that this property should not longer be used as a military post by a Government she no longer acknowledges," and the thought you so constantly present that this occupation must lead to a collision of arms and the prevalence of civil war.

Fort Sumter is in itself a military post, and nothing else; and it would seem that not so much the fact as the purpose of its use should give to it a hostile or friendly character. This fortress is now held by the Government of the United States, for the same objects for which it has been held from the completion of its construction. These are national and defensive; and were a public enemy now to attempt the capture of Charleston or the destruction of the commerce of its harbor, the whole force of the batteries of this fortress would be at once exerted for their protection. How the presence of a small garrison, actuated by such a spirit as this, can compromise the dignity or honor of South Carolina, or become a source of irritation to her people, the President is at a loss to understand. The attitude of that garrison, as has been often declared, is neither menacing nor defiant, nor unfriendly. It is acting under orders to stand strictly on the defensive, and the Government and people of South Carolina must well know that they can never receive ought but shelter from its guns, unless, in the absence of all provocation, they should assault it, and seek its destruction. The intent with which this fortress is held by the President is truthfully stated by Senator Davis and others, in their letter to yourself of the 15th January, in which they say: "It is not held with any hostile or unfriendly purpose towards your State, but merely as property of the United States, which the President deems it his duty to protect and preserve."

If the announcement so repeatedly made of the President's pacific purposes in continuing the occupation of Fort Sumter until the question shall have been settled by competent authority, has failed to impress the Government of South Carolina, the forbearing conduct of his Administration for the last few months should be received as conclusive evidence of his sincerity. And if this forbearance, in view of the circumstances which have so severely tried it, be not accepted as a satisfactory pledge of the peaceful policy of this Administration towards South Carolina, then it may be safely affirmed that neither language nor conduct can possibly furnish one. If, with all the multiplied proofs which exist of the President's anxiety for peace, and of the earnestness with which he has pursued it, the authorities of that State shall assault Fort Sumter, and peril the lives of the handful of brave and loyal men shut up within its walls, and thus plunge our common country into the horrors of civil war, then upon them and those they represent must rest the responsibility.

Very respectfully, your obedient servant.

The question of safety to South Carolina is set aside, and her right and title to the possession of the fort thus denied by the Secretary with unanswerable force. It was at this time believed to be impossible that the authorities of South Carolina would incur the tremendous responsibility of commencing hostilities at Charleston by an attack on the handful of men shut up in the fort—the surrender of which had been thus demanded.

On the 19th of January, the Legislature of Virginia passed the series of resolutions which

led to the Peace Conference at Washington on February 4. (See page 178, also PEACE CONFERENCE.) Under one of the resolutions, ex-President Tyler was appointed a commissioner to the President of the United States, and John Robertson a commissioner to the State of South Carolina, and the other States that had seceded, or should secede, with instructions to request the President of the United States, and the authorities of such States, "to agree to abstain, pending the proceedings contemplated, from any and all acts calculated to produce a collision of arms between the States and the Government of the United States."

On the 24th of January, ex-President Tyler called upon President Buchanan to discharge the duties of his mission. On his return to Virginia he made a report to the Legislature, respecting his mission. So much of this report as serves to explain the views of the President, and thereby those of the Government, was as follows:

On the next morning, at the hour of ten, I repaired to the President's mansion, and met from him a warm and cordial reception. I lost no time in handing him your letter of appointment, attested by the seal of the State and the legislative resolutions. He said that they were the first full copies of the resolutions which he had seen; and, after reading them, he remarked that he considered them very important, and was good enough to add that, being borne by myself, he should feel it his duty to make them the subject of a special Message to Congress. Either I suggested, or he voluntarily remarked, most probably the latter, that he should accompany them with a strong recommendation to Congress, with whom, he said, rested the entire power over the subject of war or peace, to abstain from all action of a hostile character until Virginia should have had a fair opportunity to exert all her efforts to preserve the public peace and restore harmony to the Union. I said to him that my mission was to him; that he was commander-in-chief of the army and navy; could regulate the movements of soldiers and ships in peace and in war, and that every thing Virginia desired was that the status quo should be observed.

I represented to him that the people of Virginia were almost universally inclined to peace and reconciliation; that I need not inform him of the sacrifices the State had made for the Union in its initiation, or of her instrumentality in the creation of the Constitution; that her efforts to re-construct or preserve depended, for their success, on her being permitted to conduct them undisturbed by outside collision. He replied that he had in no measure changed his views as presented in his annual Message; that he could give no pledges; that it was his duty to enforce the laws, and the whole power rested with Congress. He complained that the South had not treated him properly; that they had made unnecessary demonstrations by seizing unprotected arsenals and forts, and thus perpetrating acts of useless bravado, which had quite as well been left alone. I suggested to him that while those things were (I admitted) calculated to fret and irritate the Northern mind, yet he would see in them only the necessary results of popular excitement, which, after all, worked no mischief in the end, if harmony in the States was once more restored; that the States wherein the seizures had been made would account for all the public property, and that, in the mean time, the agencies for its preservation were only changed. He repeated his views of the obligations which rested on him; could give no pledges but those contained in his public acts, and recurred again to the proceedings of the Legislature and his intention to send them to Congress in a special Message, accompanied with a strong

recommendation to avoid the passage of any hostile legislation. I asked if I might be permitted to see the sketch of the Message, to which he unhesitatingly replied that he would take pleasure in showing it to me next morning.

Much more occurred in the course of an interview which lasted for an hour and a half, all, however, relating exclusively to the above topics, and I left him entirely satisfied with the result of my interview. The President was frank and entirely confiding in his language and whole manner. A moment's reflection satisfied me that if the Message contained the recommendation to Congress to abstain from hostile legislation, I was at liberty to infer a similar determination on his part of a state of quietude.

Friday, 25. I waited on him again the following morning, and he lost no time in reading me so much of the sketch of the proposed Message as related to the recommendation to Congress. I suggested no change or alteration, believing it to be amply sufficient, and I became only anxious for its presentation to Congress. He said he should have it all prepared to be submitted to his Cabinet on that day, and would send it in the next day. On the afternoon of the same day (*Friday 25*) I was waited on by the Secretary of State and the Attorney-General, who stated that they had called upon me, at the request of the President, to express his regret that, in consequence of the adjournment over to Monday, he would not be able to send in the Message until Monday.

While in conversation with those gentlemen, which chiefly turned on the condition of public affairs, I was startled by the receipt of a telegraphic despatch from Judge Robertson, my co-commissioner, dated at Charleston, South Carolina, inquiring into the foundation of a rumor which had reached that place that the steamship Brooklyn, with troops, had sailed from Norfolk. I immediately handed over the despatch to the gentlemen, with the suitable inquiries. The Attorney-General said, in substance: "You know, sir, that I am attached to the law department, and not in the way of knowing any thing about it." The Secretary of State said that he had heard and believed that the Brooklyn had sailed with some troops, but he did not know when she sailed, or to what point she was destined. I then said: "I hoped that she had not received her orders since my arrival in Washington." On this point the gentlemen could give me no information, but expressed no doubt but that the President would give me the information if requested.

I excused myself to them, and, immediately withdrawing to the adjoining room, I addressed to the President a note, which Mr. Stanton, the Attorney-General, kindly volunteered to bear in person and without lapse of time to the President. In a short time afterwards Mr. Stanton returned to inform me that he had carried the note to the President's house, but, for a reason not necessary here to state, he could not see the President, but had placed it in the hands of his servant to be delivered at the earliest opportunity. The reply of the President reached me at half-past 11 o'clock that night. In the interim I had despatched by telegraph to Judge Robertson the information I had collected, and upon the opening of the Telegraph office the next morning, (*Saturday*), the material part of the President's reply relating to the sailing of the Brooklyn, viz., that she had gone on an errand of "mercy and relief," and that she was not destined to South Carolina. The orders for the sailing of the ship, as will be seen, were issued before I reached Washington. After receiving the letter, and willingly adopting the most favorable construction of its expressions, I resolved to remain in Washington until after Monday, when the Message would go to the two Houses. I listened to its reading in the Senate with pleasure.

The following is the letter of Mr. Buchanan to Mr. Tyler relative to the steamer Brooklyn:

January 25, 1861.

MY DEAR SIR: I have just received your note. The orders were given to the Brooklyn, I believe, on Mon-

day or Tuesday last; certainly before your arrival in this city. She goes on an errand of mercy and relief. If she had not been sent it would have been an abandonment of our highest duty. Her movements are in no way connected with South Carolina.

Your friend, very respectfully.

The resolutions of Virginia were sent to Congress accompanied by a Message, in which the President expressed his gratification on the occasion and his views of his own position. (*See page 178.*) It is manifest that from the 3d of December to this period, the views of the Government had been openly and constantly asserted relative to its position. In the Message of the President at the commencement of the session of Congress; in the correspondence with the retiring secretaries, and with the three commissioners from South Carolina; in the Message of the 8th of January; in the correspondence with Commissioner Hayne; in the interview with ex-President Tyler, and the subsequent Message to Congress, and in the speech of Secretary Dix at Union Square, the Government appears firm and steadfast, and unchangeable in its position of forbearance and conciliation, refusing all pledges, and determined to use military force if any violence should be manifested against its authority. Under such a state of facts, it is difficult to conceive of any grounds to sustain the implication contained in the Message of President Lincoln to Congress, on the 4th of July, in which he thus speaks of the reinforcement of Fort Pickens:

"An order was at once directed to be sent for the landing of the troops from the steamship Brooklyn into Fort Pickens. This order could not go by land, but must take the longer and slower route by sea. The first return news from the order was received just one week before the fall of Fort Sumter. The news itself was, that the officer commanding the Sabine, to which vessel the troops had been transferred from the Brooklyn, acting upon some *quasi* armistice of the late Administration, (and of the existence of which the present Administration, up to the time the order was despatched, had only too vague and uncertain rumors to fix attention,) had refused to land the troops."

So President Davis, in his Message to the Confederate Congress on the 20th of July, thus refers to these remarks of President Lincoln:

"Fortunately for truth and history, however, the President of the United States details with minuteness the attempt to reinforce Fort Pickens, in violation of an armistice, of which he confessed to have been informed, but only by rumors, too vague and uncertain to fix the attention of the hostile expedition despatched to supply Fort Sumter."

It is worth while to note how far the position of the Administration responded to the public sentiment of the country at this time. Congress was in session. Numerous propositions for an adjustment of difficulties were under consideration in the House. A less

number were awaiting the action of the Senate, and particularly the Crittenden Compromise. No progress was made in the bill to give the President men and money. The Peace Conference had just convened; Maryland, Virginia, Kentucky, Tennessee, and Missouri were represented in that body, indicating a strong and powerful sentiment in favor of a peaceful solution of the difficulties in that very portion of the country whose sympathies were with the South in preference to the North—and who were certain, if a violent division must come, to join the South. New York, Philadelphia, Boston, Cincinnati, the large centres of wealth, demanded a course of conciliation and compromise. New Jersey, and a large portion of all the Middle and Western States opposed coercive measures, and were ready to make sacrifices to preserve the Union, although, if a violent division came, their first sympathies were with the North, and were sure to place them in array against the South. Even in Faneuil Hall, at Boston, on the 4th of February the following resolution was adopted:

Resolved, That this meeting depends for the return of the seceding States and the permanent preservation of the Union on conciliatory counsels, and a sense of the benefits which the Constitution confers on all the States of the Confederacy, and not on military coercion; and that it shrinks with horror from the thought of civil war between the North and South.

Such was the nature of all the active measures proposed in the existing state of affairs. Meantime, the Legislatures of New York and Ohio had passed resolutions, tendering to the Government all their resources in men and money for its support. But it was not expected that these would be called for unless some hostile and violent act was committed by the secessionists against the authority of the Government. Nevertheless, it was soon apparent that no party to the difficulty could succeed in procuring an acquiescence in all the constitutional and legislative arrangements it might deem necessary to secure a pacification of the others on the question of slavery. The Government seemed to be threatened with overthrow on points rather of political punctilio than practical concern. On the one hand, the Republicans insisted that they could not and would not listen to any terms of pacification at a time when the people of a portion of the Southern States stood with arms in their hands, and in the attitude of practical rebellion against the Federal Government. On the other hand, the Southern leaders justified their revolutionary proceedings on the ground that a portion of the Northern States had nullified the Constitution and laws of the land by the passage of their personal liberty laws, (*see PERSONAL LIBERTY LAWS*.) and violated the spirit, if not the letter, of the civil compact existing between the States by the election of a "sectional" candidate to the Presidency. The Republicans also sturdily refused to give any consideration to propositions involving the assumption that

there could be, under the particular sanction of Federal law, any thing like property in man. The Southern leaders, on the contrary, contended that property in slaves should, in all Federal relations, be placed on the same footing as any other property. To the former, the paramount idea appeared now to be the recognition of the slave only as a person. To the latter the paramount idea appeared to be the recognition of the slave only as property. The fact was, and still is, that the slave in the different relations which he sustains, is both a person and property, and in the former of these characters, he counts as a modified element of political power recognized in the Constitution of the United States. But in the excitement and turbulence of the hour, reason and common sense were lost sight of, and these hair-splitting discriminations engrossed the attention even of Congress itself. Neither party to these views appear on the record of events, as having performed at this time any act aiming directly and solely to the restoration of peace and union throughout the country. Amid such conflicts, by which the Union men of the Border States were paralyzed, the term of Mr. Buchanan's Administration closed. The original national drama was over. The curtain had fallen. The nature of the new period of existence to be opened on the morrow no man comprehended.

On the 4th of March, at noon, President Lincoln delivered his Inaugural Address, (*see PUBLIC DOCUMENTS*.) took the oath of his office, and commenced the discharge of its duties. What was the posture of affairs at this time, especially as compared with their state on the day of election in November. Seven Southern States had retired from the Union, the officers of the Federal Government had resigned, and there were no persons to represent its powers or execute its duties within their limits, excepting in the Post-Office Department. Within these States, also, all the forts, arsenals, dockyards, custom-houses, revenue cutters, &c., embracing all the movable and stationary articles connected therewith, had been taken possession of by the authority of these States individually, and were held by persons and officers denying any allegiance to the Federal Government, and avowing it to be due by them only to a Government created by the united action of these seven States. Only Forts Pickens, Taylor, and Jefferson, near the Florida coast, and Sumter, in Charleston harbor, continued under the flag of the Union.

The other forts thus seized were put in an improved condition, new ones built, and armed forces had been organized, and were organizing, avowedly to protect this property from recapture, and to capture those not yet seized. Around Fort Sumter batteries had been erected, with guns equal or heavier in calibre than hers, and in far greater number. Officers of the army and navy of the Union from these States, had chiefly resigned, and had been reappointed in the service of the latter. A complete Gov-

ernment for a nation was in operation in these States, and the property thus seized was held, as the new Government avowed, to be accounted for in a peaceful settlement with the Federal Union, or to be used for the defence of those States, if assaulted by the same Union. They asked for peace, and to be "let alone," but were determined to hazard a war sooner than return to their former allegiance.

Among the other States, Kentucky made an application to Congress to call a National Convention to amend the Constitution of the United States, and requested the Legislatures of all the other States to make similar applications, and appointed commissioners to a conference of the Border States to consider and, if practicable, agree upon some suitable adjustment of the present unhappy controversies. Some of the States of the North appointed commissioners to this conference, which agreed upon terms for an adjustment, but no State action followed. Not a single slaveholding State complied with the request of Kentucky to apply to Congress to call a National Convention, whilst three non-slaveholding States so complied, and several others prepared to follow.

A Peace Conference was called by Virginia, in which twenty States were represented. Such measures would have been recommended as were desired by the seceding States if they had been present by their votes to secure their adoption. Three territorial bills were passed by Congress, in no one of which was inserted the prohibition of slavery as insisted upon hitherto by the Republicans. The North condemned the personal liberty bills of the States, declared in favor of a faithful execution of the fugitive slave law, and concurred in proposing, by the requisite constitutional majority, an amendment of the Constitution guaranteeing positively and forever the exemption of slavery in the States from the interference of Congress. This was one of the guarantees embraced in the scheme of Mr. Crittenden and also in the scheme of the Peace Conference.

Rhode Island repealed its personal liberty law outright, whilst Vermont, Maine, Massachusetts, Pennsylvania, and Wisconsin had under consideration the repeal or essential modification of their respective laws of this description. Not less than a quarter of a million of the people of the North, besides societies and representative bodies without number, petitioned Congress for the adoption of any adjustment satisfactory to States of the Southern Border.

After such a manifestation of public sentiment, there was nothing to justify the President in declaring that he should adopt a policy of coercion towards the seceding States. In his inaugural, he expressed himself in favor of a National Convention, and announced his policy. Whether it intended peace or war, was greatly discussed, at the time; public sentiment, however, generally believed it was to be peaceful.

But on this point he is himself the most satisfactory exponent. In his Message, at the extra session in July, he says: "Finding this condition of things, and believing it to be an imperative duty upon the incoming Executive to prevent, if possible, the consummation of such attempt to destroy the Federal Union, a choice of means to that end became indispensable. This choice was made, and was declared in the inaugural address. The policy chosen looked to the exhaustion of all peaceful measures, before a resort to any stronger ones. It sought only to hold the public places and property not already wrested from the Government, and to collect the revenue, relying for the rest on time, discussion, and the ballot-box. It promised a continuance of the mails, at Government expense, to the very people who were resisting the Government; and it gave repeated pledges against any disturbance to any of the people or any of their rights. Of all that which a President might constitutionally and justifiably do in such a case, every thing was forborne, without which it was believed possible to keep the Government on foot."

Such was the degree of excitement in the country that the declarations of the inaugural respecting the policy of the Government, which might in ordinary times have been considered quite explicit, were now looked upon as very unsatisfactory. Even the intimate friends of the Administration were unable to say whether peace or war was before the country. A feeling of solicitude pervaded all classes, which became deeper and stronger under the continued uncertainty.

Meantime, commissioners from the Confederate States, Messrs. John Forsyth and Martin J. Crawford at first, who were joined afterwards by A. B. Roman, arrived at Washington. On the 12th, Messrs. Forsyth and Crawford addressed the Secretary of State, stating their character as commissioners, and the object of their mission:

SIR: The undersigned have been duly accredited by the Government of the Confederate States of America as Commissioners to the Government of the United States, and in pursuance of their instructions have now the honor to acquaint you with that fact, and to make known, through you, to the President of the United States, the objects of their presence in this capital.

Seven States of the late Federal Union having, in the exercise of the inherent right of every free people to change or reform their political institutions, and through conventions of their people, withdrawn from the United States and reassumed the attributes of sovereign power delegated to it, have formed a government of their own. The Confederate States constitute an independent nation, *de facto* and *de jure*, and possess a government perfect in all its parts, and endowed with all the means of self-support.

With a view to a speedy adjustment of all questions growing out of this political separation, upon such terms of amity and good will as the respective interests, geographical contiguity, and future welfare of the two nations may render necessary, the undersigned are instructed to make to the Government of the United States overtures for the opening of negotiations, assuring the Government of the United States

that the President, Congress, and people of the Confederate States earnestly desire a peaceful solution of these great questions; that it is neither their interest nor their wish to make any demand which is not founded in strictest justice, nor do any act to injure their late confederates.

The undersigned have now the honor, in obedience to the instructions of their Government, to request you to appoint as early a day as possible, in order that they may present to the President of the United States the credentials which they bear, and the objects of the mission with which they are charged.

Three days afterwards, the Secretary prepared a reply, which was entitled a "Memorandum," and was as follows:

DEPARTMENT OF STATE, }
WASHINGTON, March 15, 1861. }

Mr. John Forsyth, of the State of Alabama, and Mr. Martin J. Crawford, of the State of Georgia, on the 11th inst., through the kind offices of a distinguished Senator, submitted to the Secretary of State their desire for an unofficial interview. This request was, on the 12th inst., upon exclusively public consideration, respectfully declined.

On the 13th inst., while the Secretary was preoccupied, Mr. A. D. Banks, of Virginia, called at this Department, and was received by the Assistant Secretary, to whom he delivered a sealed communication, which he had been charged by Messrs. Forsyth and Crawford to present the Secretary in person.

In that communication, Messrs. Forsyth and Crawford inform the Secretary of State that they have been duly accredited by the Government of the Confederate States of America as Commissioners to the Government of the United States, and they set forth the objects of their attendance at Washington. They observe that seven States of the American Union, in the exercise of a right inherent in every free people, have withdrawn, through conventions of their people, from the United States, reassumed the attributes of sovereign power, and formed a government of their own, and that those Confederate States now constitute an independent nation *de facto* and *de jure*, and possess a government perfect in all its parts, and fully endowed with all the means of self-support.

Messrs. Forsyth and Crawford, in their aforesaid communication, thereupon proceeded to inform the Secretary that, with a view to a speedy adjustment of all questions growing out of the political separation thus assumed, upon such terms of amity and good will as the respective interests, geographical contiguity, and the future welfare of the supposed two nations might render necessary, they are instructed to make to the Government of the United States, overtures for the opening of negotiations, assuring this Government that the President, Congress, and people of the Confederate States earnestly desire a peaceful solution of these great questions, and that it is neither their interest nor their wish to make any demand which is not founded in strictest justice, nor do any act to injure their late confederates.

After making these statements, Messrs. Forsyth and Crawford close their communication, as they say, in obedience to the instructions of their Government, by requesting the Secretary of State to appoint as early a day as possible, in order that they may present to the President of the United States the credentials which they bear, and the objects of the mission with which they are charged.

The Secretary of State frankly confesses that he understands the events which have recently occurred, and the condition of political affairs which actually exists in the part of the Union, to which his attention has thus been directed, very differently from the aspect in which they are presented by Messrs. Forsyth and Crawford. He sees in them, not a rightful and accomplished revolution and an independent nation, with an established government, but rather a perversion of a temporary and partisan excitement to the

inconsiderate purposes of an unjustifiable and unconstitutional aggression upon the rights and the authority vested in the Federal Government, and hitherto benignly exercised, as from their very nature they always must so be exercised, for the maintenance of the Union, the preservation of liberty, and the security, peace, welfare, happiness, and aggrandizement of the American people. The Secretary of State, therefore, avows to Messrs. Forsyth and Crawford that he looks patiently but confidently for the cure of evils which have resulted from proceedings so unnecessary, so unwise, so unusual, and so unnatural, not to irregular negotiations, having in view new and untried relations with agencies unknown to and acting in derogation of the Constitution and laws, but to regular and considerate action of the people of those States, in cooperation with their brethren in the other States, through the Congress of the United States, and such extraordinary conventions, if there shall be need thereof, as the Federal Constitution contemplates and authorizes to be assembled.

It is, however, the purpose of the Secretary of State on this occasion not to invite or engage in any discussion of these subjects, but simply to set forth his reasons for declining to comply with the request of Messrs. Forsyth and Crawford.

On the 4th of March inst., the newly elected President of the United States, in view of all the facts bearing on the present question, assumed the executive Administration of the Government, first delivering, in accordance with an early, honored custom, an Inaugural Address to the people of the United States. The Secretary of State respectfully submits a copy of this address to Messrs. Forsyth and Crawford.

A simple reference to it will be sufficient to satisfy those gentlemen that the Secretary of State, guided by the principles therein announced, is prevented altogether from admitting or assuming that the States referred to by them have, in law or in fact, withdrawn from the Federal Union, or that they could do so in the manner described by Messrs. Forsyth and Crawford, or in any other manner, than with the consent and concert of the people of the United States, to be given through a National Convention, to be assembled in conformity with the provisions of the Constitution of the United States. Of course the Secretary of State cannot act upon the assumption, or in any way admit that the so-called Confederate States constitute a foreign Power, with whom diplomatic relations ought to be established.

Under these circumstances, the Secretary of State, whose official duties are confined, subject to the direction of the President, to the conducting of the foreign relations of the country, and do not at all embrace domestic questions, or questions arising between the several States and the Federal Government, is unable to comply with the request of Messrs. Forsyth and Crawford, to appoint a day on which they may present the evidences of their authority and the objects of their visit to the President of the United States. On the contrary, he is obliged to state to Messrs. Forsyth and Crawford that he has no authority nor is he at liberty to recognize them as diplomatic agents, or hold correspondence or other communication with them.

Finally, the Secretary of State would observe that, although he has supposed that he might safely and with propriety have adopted these conclusions without making any reference of the subject to the Executive, yet so strong has been his desire to practise entire directness and to act in a spirit of perfect respect and candor towards Messrs. Forsyth and Crawford, and that portion of the Union, in whose name they present themselves before him, that he has cheerfully submitted this paper to the President, who coincides generally in the views it expresses, and sanctions the Secretary's decision declining official intercourse with Messrs. Forsyth and Crawford.

This communication remained in the Department of State until the 8th of April, when it

was delivered to the secretary of the commissioners, who had been directed by the commissioners to call there for it. Reasons for this delay are stated by the commissioners in their subsequent communication, dated April 9. It was as follows:

WASHINGTON, April 9, 1861.

Hon. Wm. H. Seward, Secretary of State of the United States, Washington.

The "memorandum," dated Department of State, Washington, March 15, 1861, has been received through the hands of Mr. J. T. Pickett, Secretary to this Commission, who, by the instructions of the undersigned, called for it on yesterday at the Department.

In that memorandum you correctly state the purport of the official note addressed to you by the undersigned on the 12th ult. Without repeating the contents of that note in full, it is enough to say here that its object was to invite the Government of the United States to a friendly consideration of the relation between the United States and the seven States lately of the Federal Union, but now separated from it by the sovereign will of their people, growing out of the pregnant and undeniable fact that those people have rejected the authority of the United States and established a government of their own. Those relations had to be friendly or hostile. The people of the old and new Governments, occupying contiguous territories, had to stand to each other in the relation of good neighbors, each seeking their own happiness and pursuing their national destinies in their own way, without interference with the other, or they had to be rival and hostile nations. The Government of the Confederate States had no hesitation in electing its choice in this alternative. Frankly and unreservedly, seeking the good of the people who had intrusted them with power, in the spirit of humanity, of the Christian civilization of the age, and of that Americanism which regards the true welfare and happiness of the people, the Government of the Confederate States, among its first acts, commissioned the undersigned to approach the Government of the United States with the olive branch of peace, and to offer to adjust the great questions pending between them, in the only way to be justified by the consciences and common sense of good men, who had nothing but the welfare of the people of the two Confederacies at heart.

Your Government has not chosen to meet the undersigned in the conciliatory and peaceful spirit in which they are commissioned. Persistently wedded to those fatal theories of construction of the Federal Constitution always rejected by the statesmen of the South, and adhered to by those of the Administration school, until they have produced their natural and often predicted result of the destruction of the Union, under which we might have continued to live happily and gloriously together, had the spirit of the ancestry who framed the common Constitution animated the hearts of all their sons; you now, with a persistence untaught and uncured by the ruin that has been wrought, refuse to recognize the great fact presented to you of a complete and successful revolution; you close your eyes to the existence of the Government founded upon it, and ignore the high duties of moderation and humanity which attach to you in dealing with this great fact. Had you met these issues with the frankness and manliness with which the undersigned were instructed to present them to you and treat them, the undersigned had not now the melancholy duty to return home and tell their Government and their countrymen, that their earnest and ceaseless efforts in behalf of peace had been futile, and that the Government of the United States meant to subjugate them by force of arms. Whatever may be the result, impartial history will record the innocence of the Government of the Confederate States, and place the responsibility of the blood and mourning that may ensue, upon those who have denied the great funda-

mental doctrine of American liberty, that "governments derive their just powers from the consent of the governed," and who have set naval and land armaments in motion to subject the people of one portion of the land to the will of another portion. That that can never be done while a freeman survives in the Confederate States to wield a weapon, the undersigned appeal to past history to prove. These military demonstrations against the people of the seceded States are certainly far from being in keeping and consistency with the theory of the Secretary of State, maintained in his memorandum, that these States are still component parts of the late American Union, as the undersigned are not aware of any constitutional power in the President of the United States to levy war without the consent of Congress, upon a foreign people, much less upon any portion of the people of the United States.

The undersigned, like the Secretary of State, have no purpose to "invite or engage in discussion" of the subject on which their two Governments are so irreconcilably at variance. It is this variance that has broken up the old Union, the disintegration of which has only begun. It is proper, however, to advise you that it were well to dismiss the hopes you seem to entertain that, by any of the modes indicated, the people of the Confederate States will ever be brought to submit to the authority of the Government of the United States. You are dealing with delusions, too, when you seek to separate our people from our Government and to characterize the deliberate, sovereign act of the people, as a "perversion of a temporary and partisan excitement." If you cherish these dreams you will be awakened from them, and find them as unreal and unsubstantial as others in which you have recently indulged. The undersigned would omit the performance of an obvious duty were they to fail to make known to the Government of the United States that the people of the Confederate States have declared their independence with a full knowledge of all the responsibilities of that act, and with as firm a determination to maintain it by all the means with which nature has endowed them, as that which sustained their fathers, when they threw off the authority of the British crown.

The undersigned clearly understand that you have declined to appoint a day to enable them to lay the objects of the mission with which they are charged, before the President of the United States, because so to do would be to recognize the independence and separate nationality of the Confederate States. This is the vein of thought that pervades the memorandum before us. The truth of history requires that it should distinctly appear upon the record that the undersigned did not ask the Government of the United States to recognize the independence of the Confederate States. They only asked audience to adjust, in a spirit of amity and peace, the new relations springing from a manifest and accomplished revolution in the Government of the late Federal Union. Your refusal to entertain these overtures for a peaceful solution, the active naval and military preparations of the Government, and a formal notice to the commanding general of the Confederate forces in the harbor of Charleston, that the President intends to provision Fort Sumter by forcible means, if necessary, are viewed by the undersigned, and can only be received by the world, as a declaration of war against the Confederate States; for the President of the United States knows that Fort Sumter cannot be provisioned without the effusion of blood. The undersigned, in behalf of their Government and people, accept the gage of battle thus thrown down to them; and appealing to God and the judgment of mankind for the righteousness of their cause, the people of the Confederate States will defend their liberties to the last against this flagrant and open attempt at their subjugation to sectional power.

This communication cannot be properly closed without adverting to the date of your memorandum. The official note of the undersigned, of the 12th March, was delivered to the Assistant Secretary of State on the 13th

of that month, the gentleman who delivered it informing him that the Secretary of this Commission would call at 12 o'clock, noon, on the next day, for an answer. At the appointed hour, Mr. Pickett did call, and was informed by the Assistant Secretary of State that the engagements of the Secretary of State had prevented him from giving the note his attention. The Assistant Secretary of State then asked for the address of Messrs. Crawford and Forsyth, the members of the Commission then present in this city, took note of the address on a card, and engaged to send whatever reply might be made to their lodgings. Why this was not done it is proper should be here explained. The memorandum is dated March 15, and was not delivered until April 8. Why was it withheld during the intervening twenty-three days? In the postscript to your memorandum you say it "was delayed, as was understood, with their (Messrs. Forsyth and Crawford's) consent." This is true; but it is also true that, on the 15th of March, Messrs. Forsyth and Crawford were assured by a person occupying a high official position in the Government, and who, as they believed, was speaking by authority, that Fort Sumter would be evacuated within a very few days, and that no measure changing the existing *status* prejudicially to the Confederate States, as respects Fort Pickens, was then contemplated, and these assurances were subsequently repeated, with the addition that any contemplated change as respects Pickens, would be notified to us. On the 1st of April we were again informed that there might be an attempt to supply Fort Sumter with provisions, but that Gov. Pickens should have previous notice of this attempt. There was no suggestion of any reinforcements. The undersigned did not hesitate to believe that these assurances expressed the intentions of the Administration at the time, or, at all events, of prominent members of that Administration. This delay was assented to for the express purpose of attaining the great end of the mission of the undersigned, to wit, a pacific solution of existing complications. The inference deducible from the date of your memorandum, that the undersigned had, of their own volition, and without cause, consented to this long hiatus in the grave duties with which they were charged, is therefore not consistent with a just exposition of the facts of the case. The intervening twenty-three days were employed in active unofficial efforts, the object of which was to smooth the path to a pacific solution, the distinguished personage alluded to cooperating with the undersigned; and every step of that effort is recorded in writing, and now in possession of the undersigned and of their Government. It was only when all these anxious efforts for peace had been exhausted, and it became clear that Mr. Lincoln had determined to appeal to the sword to reduce the people of the Confederate States to the will of the section or party whose President he is, that the undersigned resumed the official negotiation temporarily suspended, and sent their Secretary for a reply to their official note of March 12.

It is proper to add that, during these twenty-three days, two gentlemen of official distinction, as high as that of the personage hitherto alluded to, aided the undersigned as intermediaries in these unofficial negotiations for peace.

The undersigned, Commissioners of the Confederate States of America, having thus made answer to all they deem material in the memorandum filed in the Department on the 15th of March last, have the honor to be,

JOHN FORSYTH, A. B. ROMAN,
MARTIN J. CRAWFORD.

A true copy of the original by one delivered to Mr. F. W. Seward, Assistant Secretary of State, of the United States, at 8 o'clock in the evening of April 9, 1861. Attest, J. T. PICKETT, Secretary, &c., &c.

The answer to this communication, delivered on the next day, was as follows:

DEPARTMENT OF STATE. }
WASHINGTON, April 10, 1861. }

Messrs. Forsyth, Crawford, and Roman, having been apprised by a memorandum which has been delivered

to them that the Secretary of State is not at liberty to hold official intercourse with them, will, it is presumed, expect no notice from him of the new communication which they have addressed to him under date of the 9th inst., beyond the simple acknowledgment of the receipt thereof, which he hereby very cheerfully gives.

A true copy of the original received by the Commissioners of the Confederate States, this 10th day of April, 1861. Attest, J. T. PICKETT, Secretary, &c., &c.

A state of uncertainty now existed. Nothing was known except what was seen.

It was announced in New York on Monday morning, April 1, that every thing was dull and uninteresting on Governor's Island, Fort Hamilton, Bedloe's Island, and the Brooklyn navy yard. On Wednesday following there was intense excitement apparent at all these places.

During Monday orders were received from Washington to fit out the United States brig-of-war Perry for sea at once. She was immediately hauled alongside the wharf at the navy yard, but operations had hardly commenced when the order was countermanded. The Powhatan was then put out of commission, and her crew temporarily transferred to the receiving ship North Carolina. This was no sooner done than they were ordered to Norfolk. And, on Tuesday, to the astonishment of every one, the Powhatan, notwithstanding the unfavorable report of the engineer, was ordered to be equipped for a new commission with all the despatch in the power of the navy yard force.

On Governor's Island, too, indications were apparent that troops were about to leave, and it was announced there was not the slightest doubt that on Saturday or Sunday a large force of soldiers would depart for some unknown destination. The garrison of Fort Hamilton was paid off Thursday—the last move preparatory to marching. Officers were arriving from Washington, individually, all day, and, carpet-bag in hand, reporting themselves for duty. The village of Fort Hamilton was like a stormed citadel. Troops that had just got their money, having been indulging freely in stimulants, thronged the sidewalks in knots of from five to ten, boisterously discussing the affairs of the nation.

The bustle and excitement continued at the navy yard and the army depots. Men were at work all Wednesday night and Thursday night on board the steam-frigate Powhatan. Thursday a large force of laborers employed on her were reinforced by the crew, lately detached, who assisted in getting in the various necessities for a special cruise.

On Saturday, the 6th, it was again announced that vessels were chartered by the Government as transports, viz.: the Atlantic, Baltic, and Illinois. These vessels would proceed to sea under sealed orders, and their destination could only be conjectured.

The Atlantic cleared on Friday for Brazos Santiago, (Texas,) and the utmost despatch was made in fitting her out. She was coaled and well provisioned for a long trip, and accommodations were furnished for six hundred men and

five hundred horses. She was at the foot of Canal street, and was taking in freight as rapidly as possible. The dock was covered with barrels, boxes, bales, sacks, and all conceivable packages, while twenty or more carts stood in line on the street ready to be unloaded. The main portion of the freight to be taken comprised army stores of every kind—beef, pork, flour, fish, &c.—and there was by no means a slight sprinkling of material that would feed howitzers and columbiads. The utmost haste and energy were manifested in getting the ship ready for sea.

The Illinois received a very heavy freight, consisting of about two thousand barrels of assorted stores, five hundred cases of muskets, a large quantity of ammunition, one hundred cords of oak wood, two parks of artillery, with their appurtenances, a number of gun-carriages, &c.

The Powhatan was the only steam-frigate in the United States navy that was ever changed from the "lying up" to the "commission" state within three days; and such rapidity of execution could scarcely be accomplished in any other yard in the country than the one at Brooklyn. At four bells, two o'clock, on Friday, the ship went into commission. She had on board an extraordinary armament and immense quantities of shell. She carried 10 nine-inch and 1 eleven-inch shell guns; but a large portion of her ordnance consisted of ten-inch shell; consequently, these were thought to be intended for the reinforcement of some forts, or possibly for land service.

On Monday morning the revenue flag on the Harriet Lane was hauled down, and the Stars and Stripes run up at her peak. At nine o'clock Capt. Faunce visited the custom-house and bade adieu to some of his friends, to whom he stated that he had received sealed orders to sail immediately. The cutter was heavily armed, and the crew increased to eighty men. She went to sea before noon.

At Governor's Island station the utmost activity prevailed all day on Friday. Men were engaged in loading lighters with provisions, clothing, and large quantities of shell. On the dock, besides a large quantity of mortar-shells, were piles of the smaller but more destructive balls with which columbiads are loaded. Two of these guns, weighing 15,000 pounds each, were on an adjacent wharf, at which lay the schooner John N. Genin, which was to be laden with munitions of war. Within a month past two other schooners had been thus laden at the same pier, and departed for parts unknown. In the vicinity of the wharves were 37,000 shells and a large number of gun-carriages, each of which was directed to Capt. Vogdes, at Fort Pickens, Florida.

A large number of heavy transporting boats from the navy yard were alongside the wharf. Troops were packing up at Forts Columbus and Hamilton.

The correct dates of the sailing of these vessels were as follows: Two expeditions sailed

from New York in the early part of April. The chartered steamers Atlantic and Illinois, which were publicly announced to have taken out clearances for the Gulf and to be under convoy of the steam-frigate Powhatan, sailed from New York, respectively, on the 7th and 8th of April, the Powhatan having left that harbor in the afternoon of the 6th. These vessels were destined for the reinforcement of Fort Pickens, which was successfully and peacefully accomplished. The expedition which proceeded to Charleston consisted of the chartered steamer Baltic, well laden with provisions, and the steam-cutter Harriet Lane, both from New York. The latter left the harbor about 10 o'clock in the forenoon of the 8th of April, and the Baltic early in the morning of the 9th. The frigates Pawnee and Pocahontas, which also went to Charleston, left Norfolk, respectively, in the evening of the 9th and the morning of the 10th of April.

At Charleston, on the other hand, it was reported that during the whole of Thursday afternoon, the 4th, all kinds of rumors were rife on the streets. A vague impression had somehow got abroad that the long agony of suspense and inaction was to be speedily and abruptly ended; but how, or when, or by whose orders, nobody could tell. Diligent inquiry was made, and—in the absence of official information, which in such a juncture is seldom made public—the following facts were deemed to be reasonably certain: 1. That the supplies of provisions and the mails, hitherto furnished regularly to the garrison of Fort Sumter, were to be cut off that day, and that no further communication would be allowed between Major Anderson and the Government at Washington. 2. That the troops at all the State fortifications were finally disposed, equipped, and provided for, so as to be ready for action at a moment's warning. 3. That no attack of any kind would be made upon Fort Sumter until further orders, unless such an attack should be provoked by Major Anderson, or by an attempt on the part of his Government to bring aid to the beleaguered fortress. 4. That these measures are taken at the instance of the Government of the Confederate States, which had lost all confidence in the professions of Mr. Lincoln's Administration.

All eyes were turned towards Fort Sumter with intense interest. It was well known that the unseen future was wrapped up in her fate. If she was peaceably supplied with stores for the starving garrison, or if peaceably evacuated, then the prospect for peace would become hopeful; if, on the other hand, an assault should be made, war, with all its horrors, fraternal war, was upon the country.

On Friday morning, the 12th, about four o'clock, fire was opened from all points upon Fort Sumter, and continued for thirty-three hours, when her commander surrendered. (See SUMTER AND CONFEDERATE STATES.)

Meanwhile commissioners had been sent by the Virginia State Convention to the President

with instructions to ask him to communicate to the Convention the policy which he intended to pursue in regard to the Confederate States.

In reply he made the following explicit statement:

"In answer, I have to say, that having, at the beginning of my official term, expressed my intended policy as plainly as I was able, it is with deep regret and mortification I now learn there is great and injurious uncertainty in the public mind as to what that policy is, and what course I intend to pursue. Not having as yet seen occasion to change, it is now my purpose to pursue the course marked out in the inaugural address. I commend a careful consideration of the whole document as the best expression I can give to my purposes. As I then and therein said, I now repeat, 'The power confided in me will be used to hold, occupy, and possess property and places belonging to the Government, and to collect the duties and imposts; but beyond what is necessary for these objects there will be no invasion, no using of force against or among the people anywhere.' By the words 'property and places belonging to the Government,' I chiefly allude to the military posts and property which were in possession of the Government when it came into my hands. But if, as now appears to be true, in pursuit of a purpose to drive the United States authority from these places, an unprovoked assault has been made upon Fort Sumter, I shall hold myself at liberty to repossess it, if I can, like places which had been seized before the Government was devolved upon me; and in any event I shall, to the best of my ability, repel force by force. In case it proves true that Fort Sumter has been assaulted, as is reported, I shall, perhaps, cause the United States mails to be withdrawn from all the States which claim to have seceded, believing that the commencement of actual war against the Government justifies and possibly demands it. I scarcely need to say that I consider the military posts and property situated within the States which claim to have seceded, as yet belonging to the Government of the United States as much as they did before the supposed secession. Whatever else I may do for the purpose, I shall not attempt to collect the duties and imposts by any armed invasion of any part of the country; not meaning by this, however, that I may not land a force deemed necessary to relieve a fort upon the border of the country. From the fact that I have quoted a part of the inaugural address, it must not be inferred that I repudiate any other part, the whole of which I reaffirm, except so far as what I now say of the mails may be regarded as a modification."

The attack on Fort Sumter began on the 12th. The fort surrendered on the afternoon of the 13th, and was evacuated on Sunday, the 14th. As the news flashed over the country by the telegraph it was instantly followed by the summons of the President, "to arms; to arms." His proclamation, ordering seventy-five

thousand men into the field, was issued on the night of the 14th, as follows:

By the President of the United States.

A PROCLAMATION.

Whereas the laws of the United States have been for some time past and now are opposed, and the execution thereof obstructed, in the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, by combinations too powerful to be suppressed by the ordinary course of judicial proceedings, or by the powers vested in the marshals by law:

Now, therefore, I, Abraham Lincoln, President of the United States, in virtue of the power in me vested by the Constitution and the laws, have thought fit to call forth, and hereby do call forth, the militia of the several States of the Union, to the aggregate number of seventy-five thousand, in order to suppress said combinations, and to cause the laws to be duly executed.

The details for this object will be immediately communicated to the State authorities through the War Department.

I appeal to all loyal citizens to favor, facilitate and aid this effort to maintain the honor, the integrity, and the existence of our National Union, and the perpetuity of popular Government, and to redress wrongs already long enough endured.

I deem it proper to say that the first service assigned to the forces called forth will probably be to re-possess the forts, places, and property which have been seized from the Union; and in every event the utmost care will be observed, consistently with the objects aforesaid, to avoid any devastation, any destruction of or interference with property, or any disturbance of peaceful citizens in any part of the country.

And I hereby command the persons composing the combinations aforesaid to disperse and retire peaceably to their respective abodes within twenty days from this date.

Deeming that the present condition of public affairs presents an extraordinary occasion, I do hereby, in virtue of the power in me vested by the Constitution, convene both Houses of Congress.

Senators and Representatives are therefore summoned to assemble at their respective Chambers, at 12 o'clock, noon, on Thursday, the fourth day of July next, then and there to consider and determine such measures as, in their wisdom, the public safety and interest may seem to demand.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this fifteenth day of April, in the year of our Lord one thousand [L. S.] eight hundred and sixty-one, and of the independence of the United States the eighty-fifth.

ABRAHAM LINCOLN.

By the President:

WILLIAM H. SEWARD, Secretary of State.

A call for troops was issued by the Secretary of War, Cameron, in accordance with this proclamation, and sent to the Governors of the respective States, giving the quotas allotted to each, as follows:

DEPARTMENT OF WAR,
WASHINGTON, April 15, 1861 }

To His Excellency the Governor of ———:

SIR: Under the act of Congress for calling for the "Militia to execute the laws of the Union, suppress insurrections, repel invasions," &c., approved February 28, 1795, I have the honor to request your Excellency to cause to be immediately detached from the militia of your State the quota designated in the table below, to serve as infantry or riflemen, for the period of three months, unless sooner discharged.

Your Excellency will please communicate to me the time at or about which your quota will be expected at

its rendezvous, as it will be met as soon as practicable by an officer or officers to muster it into the service and pay of the United States. (See ARMY.)

These documents were spread through the country on Monday, and on Wednesday the Sixth Regiment of Massachusetts, completely equipped, passed through New York for Washington, so eager was the State to be the first in the field.

A most uncontrollable excitement now burst over the country. Both North and South rushed to arms—the former to maintain the Government and to preserve the Union, the latter to secure the independence of the Confederate States and the dissolution of the Union.

The national city of Washington became the most conspicuous object before the country. Northern troops hastened thither to secure its possession in the hands of the Government, and Southern troops gathered on its outskirts to seize it as their first prize.

The manner in which the requisition of the Secretary of War for troops was received by the authorities of the respective States, indicates the controlling sentiment of the people in those States at this time. The Governor of Kentucky replied on the same day: "Kentucky will furnish no troops for the wicked purpose of subduing her sister Southern States." (See KENTUCKY.) The Governor of North Carolina answered: "You can get no troops from North Carolina." (See NORTH CAROLINA.) The Governor of Virginia wrote on the next day to the Secretary of War, saying: "The militia of Virginia will not be furnished to the powers at Washington for any such use or purpose as they have in view." (See VIRGINIA.) The Governor of Tennessee replied: "Tennessee will not furnish a single man for coercion, but fifty thousand, if necessary, for defence of our rights, or those of our Southern brothers." The Governor of Missouri answered that "the requisition is illegal, unconstitutional, revolutionary, inhuman, diabolical, and cannot be complied with."

The Governor of Rhode Island replied by tendering the services of a thousand infantry and a battalion of artillery.

The Governor of Massachusetts immediately ordered out troops, and in fifty hours three regiments had been gathered, equipped, and had left for Washington.

The Governor of Connecticut also issued his proclamation at once, calling for troops.

The Legislature of New York adjourned on the 16th; but previously to adjournment appropriated three millions of dollars to defend the Federal Government. The Seventh Regiment left for Washington on the 18th.

Orders for four regiments were issued by the Governor of New Jersey on the 17th.

A detachment of five hundred men left Philadelphia on the night of the 17th for Washington.

The first regiment from Indiana left for Washington on the 18th. The Legislature also

resolved "That the faith, credit, and resources of the State in both men and money are hereby pledged in any amount and to every extent which the Federal Government may demand to subdue rebellion;" &c. At the same time, the State Bank tendered to the Governor a loan for the State of all the money necessary to fit out the required quota.

All the Northern or free States responded alike and instantly to the summons from Washington. The defence of the Government was proclaimed to be a most sacred cause, more especially such a Government as this of the United States had been. Arms, money, men, railroads, and all other "sinews of war," were freely offered. Men of wealth, influence, and position, without regard to party, stepped forth patriotically at this call.

Four days after the issue of the proclamation, the Sixth Regiment from Massachusetts, on its way to Washington, was attacked in the streets of Baltimore by the populace. Many were killed on both sides. (See BALTIMORE.) The Governor of the State strongly advised the President against the passage of any more Northern troops through the city, to which the President replied as follows:

WASHINGTON, April 20, 1861.

Governor Hicks and Mayor Brown:

GENTLEMEN: Your letter by Messrs. Bond, Dobbin, and Brune is received. I tender you both my sincere thanks for your efforts to keep the peace in the trying situation in which you are placed.

For the future, troops must be brought here, but I make no point of bringing them through Baltimore. Without any military knowledge myself, of course I must leave details to General Scott. He hastily said this morning in the presence of these gentlemen, "March them around Baltimore, and not through it." I sincerely hope the General, on fuller reflection, will consider this practical and proper, and that you will not object to it. By this a collision of the people of Baltimore with the troops will be avoided, unless they go out of their way to seek it. I hope you will exert your influence to prevent this.

Now and ever I shall do all in my power for peace consistently with the maintenance of the Government.

Your obedient servant,

A. LINCOLN.

Again, through the Secretary of State, the President thus replied:

DEPARTMENT OF STATE, April 22, 1861.

His Excellency Thos. H. Hicks, Gov. of Maryland:

SIR: I have had the honor to receive your communication of this morning, in which you inform me that you have felt it to be your duty to advise the President of the United States to order elsewhere the troops then off Annapolis, and also that no more may be sent through Maryland; and that you have further suggested that Lord Lyons be requested to act as mediator between the contending parties in our country to prevent the effusion of blood.

The President directs me to acknowledge the receipt of that communication, and to assure you that he has weighed the counsels which it contains with the respect which he habitually cherishes for the Chief Magistrates of the several States, and especially for yourself. He regrets, as deeply as any magistrate or citizen of the country can, that demonstrations against the safety of the United States, with very extensive preparations for the effusion of blood, have made it his duty to call out the force to which you allude.

The force now sought to be brought through Maryland is intended for nothing but the defence of this

capital. The President has necessarily confided the choice of the national highway which that force shall take in coming to this city to the Lieutenant-General commanding the Army of the United States, who, like his only predecessor, is not less distinguished for his humanity, than for his loyalty, patriotism, and distinguished public service.

The President instructs me to add, that the national highway thus selected by the Lieutenant-General, has been chosen by him, upon consultation with prominent magistrates and citizens of Maryland, as the one which, while a route is absolutely necessary, is farthest removed from the populous cities of the State, and with the expectation that it would therefore be the least objectionable one.

The President cannot but remember that there has been a time in the history of our country when a General of the American Union, with forces designed for the defence of its capital, was not unwelcome anywhere in the State of Maryland, and certainly not at Annapolis, then, as now, the capital of that patriotic State, and then, also, one of the capitals of the Union.

If eighty years could have obliterated all the other noble sentiments of that age in Maryland, the President would be hopeful, nevertheless, that there is one that would forever remain there and everywhere. That sentiment is that no domestic contention whatever, that may arise among the parties of this Republic, ought in any case to be referred to any foreign arbitration, least of all to the arbitrament of an European monarchy.

I have the honor to be, with distinguished consideration, your Excellency's most obedient servant,

WILLIAM H. SEWARD.

At the request of the President, the Mayor of Baltimore and other influential citizens waited upon him. This interview shows the importance which the Government attached to the free passage for troops through Maryland and also Baltimore. At the same time the object for which the troops were summoned, was stated. It took place in presence of the Cabinet and Gen. Scott, and was thus reported to the public by the Mayor :

The President, upon his part, recognized the good faith of the city and State authorities, and insisted upon his own. He admitted the excited state of feeling in Baltimore, and his desire and duty to avoid the fatal consequences of a collision with the people. He urged, on the other hand, the absolute, irresistible necessity of having a transit through the State for such troops as might be necessary for the protection of the Federal Capital. The protection of Washington, he asseverated with great earnestness, was the sole object of concentrating troops there, and he protested that none of the troops brought through Maryland were intended for any purposes hostile to the State, or aggressive as against the Southern States. Being now unable to bring them up the Potomac in security, the Government must either bring them through Maryland or abandon the capital.

He called on General Scott for his opinion, which the General gave at length, to the effect that troops might be brought through Maryland, without going through Baltimore, by either carrying them from Perryville to Annapolis, and thence by rail to Washington, or by bringing them to the Relay House on the Northern Central Railroad, and marching them to the Relay House on the Washington Railroad, and thence by rail to the Capital. If the people would permit them to go by either of those routes uninterruptedly, the necessity of their passing through Baltimore would be avoided. If the people would not permit them a transit thus remote from the city, they must select their own best route, and, if need be, fight their way through Baltimore—a result which the General earnestly deprecated.

The President expressed his hearty concurrence in

the desire to avoid a collision, and said that no more troops should be ordered through Baltimore if they were permitted to go uninterrupted by either of the other routes suggested. In this disposition the Secretary of War expressed his participation.

Mayor Brown assured the President that the city authorities would use all lawful means to prevent their citizens from leaving Baltimore to attack the troops in passing at a distance; but he urged, at the same time, the impossibility of their being able to promise anything more than their best efforts in that direction. The excitement was great, he told the President; the people of all classes were fully aroused, and it was impossible for any one to answer for the consequences of the presence of Northern troops anywhere within our borders. He reminded the President also that the jurisdiction of the city authorities was confined to their own population, and that he could give no promises for the people elsewhere, because he would be unable to keep them if given. The President frankly acknowledged this difficulty, and said that the Government would only ask the city authorities to use their best efforts with respect to those under their jurisdiction.

The interview terminated with the distinct assurance, on the part of the President, that no more troops would be sent through Baltimore unless obstructed in their transit in other directions, and with the understanding that the city authorities should do their best to restrain their own people.

The Mayor and his companions availed themselves of the President's full discussion of the questions of the day to urge upon him respectfully, but in the most earnest manner, a course of policy which would give peace to the country, and especially the withdrawal of all orders contemplating the passage of troops through any part of Maryland.

The troops were afterwards conveyed to Washington through Perryville and Annapolis, until such steps were taken by the Government as to place Baltimore under military control. No further disturbance then took place, and the city became the common highway for tens of thousands.

On the 19th of April the President issued another proclamation, declaring the ports of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, to be blockaded. This document was as follows :

By the President of the United States of America :
A PROCLAMATION.

Whereas an insurrection against the Government of the United States has broken out in the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, and the laws of the United States for the collection of the revenue cannot be effectually executed therein conformably to that provision of the Constitution which requires duties to be uniform throughout the United States :

And whereas a combination of persons, engaged in such insurrection, have threatened to grant pretended letters of marque to authorize the bearers thereof to commit assaults on the lives, vessels, and property of good citizens of the country lawfully engaged in commerce on the high seas, and in waters of the United States :

And whereas an Executive Proclamation has been already issued, requiring the persons engaged in these disorderly proceedings to desist therefrom, calling out a militia force for the purpose of repressing the same, and convening Congress in extraordinary session to deliberate and determine thereon :

Now, therefore, I, Abraham Lincoln, President of the United States, with a view to the same purposes before mentioned, and to the protection of the public peace, and the lives and property of quiet and orderly citizens pursuing their lawful occupations, until Con-

gress shall have assembled and deliberated on the said unlawful proceedings, or until the same shall have ceased, have further deemed it advisable to set on foot a blockade of the ports within the States aforesaid, in pursuance of the laws of the United States and of the laws of nations in such case provided. For this purpose a competent force will be posted so as to prevent entrance and exit of vessels from the ports aforesaid. If, therefore, with a view to violate such blockade, a vessel shall approach, or shall attempt to leave any of the said ports, she will be duly warned by the Commander of one of the blockading vessels, who will endorse on her register the fact and date of such warning, and if the same vessel shall again attempt to enter or leave the blockaded port, she will be captured and sent to the nearest convenient port, for such proceedings against her and her cargo as prize as may be deemed advisable.

And I hereby proclaim and declare that if any person, under the pretended authority of the said States, or under any other pretence, shall molest a vessel of the United States, or the persons or cargo on board of her, such person will be held amenable to the laws of the United States for the prevention and punishment of piracy.

In witness whereof, I have hereunto set my hand, and caused the seal of the United States to be affixed. Done at the city of Washington, this nineteenth day of April, in the year of our Lord one thousand eight hundred and sixty-one, and of the Independence of the United States the eighty-fifth. ABRAHAM LINCOLN.

By the President:

WILLIAM H. SEWARD, Secretary of State.

At 3 o'clock on the afternoon of the 20th of April, by order of the Government, a seizure was made by the United States marshals, of the despatches which had accumulated, during the previous twelve months, in every considerable telegraph office in all the Northern States. In these offices the originals of all despatches which are sent off, and the copies of all received, are placed on file. The object of the Government in making this seizure was to obtain evidence of the operations of Southern citizens with their Northern friends. The confidential telegrams passing between them could most certainly furnish this.

An additional proclamation was issued by the President on the 27th of April, extending the blockade to the ports of the States of North Carolina and Virginia. The most energetic measures were commenced by the Government to carry out this blockade. All the available war vessels were put into service. Mercantile steamers, and such as were not used for purposes of transportation, were fitted out as gunboats to cruise off the coast and run up shallow waters.

On the 3d of May the President issued another proclamation, calling into the service of the United States forty-two thousand and thirty-four volunteers for three years, unless sooner discharged, also ordering an addition to the army of eight regiments of infantry, one regiment of cavalry, and one regiment of artillery, or twenty-two thousand one hundred and fourteen officers and men; also eighteen thousand seamen for the navy. Again, on the 16th, he issued the following proclamation:

Whereas an insurrection exists in the State of Flori-

da, by which the lives, liberty, and property of loyal citizens of the United States are endangered:

And whereas it is deemed proper that all needful measures should be taken for the protection of such citizens and all officers of the United States in the discharge of their public duties in the State aforesaid:

Now, therefore, be it known that I, Abraham Lincoln, President of the United States, do hereby direct the Commander of the forces of the United States on the Florida coast to permit no person to exercise any office or authority upon the islands of Key West, the Tortugas, and Santa Rosa which may be inconsistent with the Laws and Constitution of the United States, authorizing him at the same time, if he shall find it necessary, to suspend there the writ of *habeas corpus*, and to remove from the vicinity of the United States fortresses all dangerous or suspected persons.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this tenth day of May, in the year of our Lord one thousand eight hundred and sixty-one, and of the Independence of the United States the eighty-fifth.

By the President: ABRAHAM LINCOLN.

WILLIAM H. SEWARD, Secretary of State.

The President, in this proclamation, not only directs that no person shall be allowed to exercise any authority, in the places named, inconsistent with the laws, &c., of the United States, but commands the suspension of the writ of *habeas corpus*, if necessary. (See *HABEAS CORPUS*.)

The Secretary of the Treasury likewise issued instructions to all collectors in the Northern and Western States relative to seizures of arms and munitions of war, saying: "In carrying out these instructions, you will bear in mind that all persons or parties in armed insurrection against the Union, however such persons or parties may be organized or named, are engaged in levying war against the United States; and that all persons furnishing to such insurgents arms, munitions of war, provisions, or other supplies, are giving them aid and comfort, and so, guilty of treason within the terms of the second section of the third article of the Constitution; and you will, therefore, use your utmost vigilance and endeavor to prevent the prohibited shipments, and to detect and bring to punishment all who are in any way concerned in furnishing to such insurgents any of the articles above described." So rigid were the details now adopted that the most insignificant coasting vessel, under a license, was required to obtain a permit in order to pass out of a district.

At this time the post-office department discontinued the steamboat mails on the Mississippi River from St. Louis to New Orleans; the steamboat mail from Mobile via Lake Pontchartrain; the steamship mail from New Orleans via Pensacola, Appalachicola, Cedar Keys, and Tampa Bay to Key West; also, all the steamship mails from New Orleans to the sea-ports in Texas, as Sabine City, Galveston, Indianola, and Brazos Santiago. This made a reduction of some \$400,000 per annum of mail pay. These were all discontinued in consequence of the act of Congress at the session commencing December, 1860, directing the postmaster-general to discontinue mails when the service was interrupted in any of the States.

On the 20th of June an order was issued from the department, requiring all passports issued to persons about to proceed beyond the lines of the United States forces, or to a foreign country, to be countersigned by the Secretary of State.

Orders were also issued on the 8th of July that the telegraph would convey no despatches concerning the operations of the army not permitted by the commanding General.

Congress had now convened in extra session under the call of the President. It was prompt and efficient to furnish the means to carry on the war, and placed at the command of the President whatever amount of money or number of men he desired. (*See CONGRESS, UNITED STATES, also ARMY AND NAVY.*) The course pursued by the Government to extricate itself from financial embarrassment was very successful. (*See FINANCES OF THE UNITED STATES.*) The position taken by the Federal Government relative to the Confederate States, was to regard them still as a part of the United States, whose inhabitants were in a condition of insurrection against the Government. Those carrying on active hostilities were to be subdued by military force. When all vestiges of military power on the part of the insurgents were destroyed, it was expected that the good sense of the people of those States would convince them of the great blessings of the Union, and induce their hearty return to its support. From the outset the Government was confident of its ultimate success. This was founded upon the peculiar character of the insurgent people, being that of masters rather than laborers, and upon their commercial inability to sustain a long war. The policy of the Government, therefore, was to blockade all the ports, and thereby shut out all foreign manufactures and all foreign aid from a people exclusively devoted to agriculture, and almost entirely dependent upon other States or nations for their market, and for all the comforts and luxuries of life. The military conquest was expected to be very easy and rapid, until the disaster at Bull Run taught the Government that success would result only from the most extensive, careful, and thoroughly organized military preparations.

On the other hand, the people of the Confederate States had, at first, looked upon secession as hopeless if it should be powerfully opposed by the Federal Government and Northern people; but within a short period they had become convinced that the North would not fight, and therefore flattered themselves that certain success was within their grasp. Their amazement at the valor, bravery, and vigor of the Northern troops has been inexpressible, and with the loss of all hope of foreign assistance, they have seen their prospects of success entirely fade away.

Congress, at its extra session in July, passed an act entitled "An Act to increase the pay of the privates in the regular army of the volunteers in the service of the United States, and

for other purposes." The third section of the act contains these words:

That all the acts, proclamations, and orders of the President of the United States, after the 4th of March, 1861, respecting the army and navy of the United States and calling out or relating to the militia or volunteers from the States, are hereby approved, and in all respects made legal and valid, to the same intent and with the same effect as if they had been issued and done under the previous express authority and direction of the Congress of the United States.

A reference to the debates of Congress will explain the occasion for this section, and the object intended to be accomplished by it. This was to approve of the extraordinary acts and proceedings which President Lincoln authorized or executed prior to the assemblage of that body. The question of the constitutionality of this section was brought before the Circuit Court of the United States at Washington, when Judge Wayne expressed this opinion:

It is my opinion that Congress has constitutional power to legalize and confirm Executive acts, proclamations, and orders done for the public good, although they were not, when done, authorized by any existing laws; and such legislation by Congress may be made to operate retroactively to confirm what may have been done under such proclamations and orders, so as to be binding upon the Government in regard to contracts made, and the persons with whom they were made; and that the third section of an act of Congress of the 6th day of August, 1861, legalizing the acts, proclamations, and orders of the President, after the 4th of March, 1861, respecting the army and navy, and calling out and relating to the militia and volunteers of the States, is constitutional and valid.

The course of the Government relative to the slave property in the Confederate States was designed to be in strict conformity with its views of the Constitution and laws. (*See SLAVES.*) The foreign policy of the Government was conducted on the principle that the troubles of the country formed a domestic affair of its own, and the interference of foreign nations was neither desired nor would be allowed. (*See DIPLOMATIC CORRESPONDENCE.*) The prompt manner in which the Confederate States were acknowledged as belligerents by France and England is a proof that not a doubt was entertained by the Governments of those nations of the ultimate independence of the new Confederacy.

After the adjournment of the extra session of Congress, the plan of the Government was to make the most ample and perfect preparations to recover and repossess the strongholds in the Confederate States. In its progress, due regard was had to the will of Congress, and the requirements of the emergency. With a surprising unanimity among the people, its measures were steadily sustained.

The army around Washington was reorganized, greatly increased in numbers, and brought up to the highest state of discipline. In its front the camps of the flower of the Confederate States were spread, and the year closed with the two armies watching each other. The one was growing more formidable and better prepared for the approaching strife, while the

other was growing weaker by the overstrained effort to maintain a position which it finally yielded without a single blow. A foothold was obtained on the coast of North Carolina, and another at Port Royal, in the waters of South Carolina, and adjacent to Georgia. Preparations were commenced for an expedition designed to attack New Orleans. (*See EXPEDITIONS.*) The effect of these movements was to cut off all hope of foreign aid, either military or commercial, from the people of the Confederate States. Meantime a powerful expedition was organized in the West. It consisted of two branches, one of which was prepared in Kentucky under Gen. Buell, and the other at St. Louis. In connection with the military force, a large number of light draft steam gunboats were built, many of which were clad with iron, and designed to coöperate on the rivers with the armed force on land. At the same time a sort of skirmishing warfare was conducted in Western Virginia, Kentucky, and Missouri, which resulted in the complete withdrawal of the Confederate forces from those States and that portion of Virginia. In this section of the country the people were so evenly divided in their sympathies between the North and South, that whichever had the largest force for the time, controlled the greatest portion of territory. A list of the skirmishes is embraced in the statements respecting those States. In the efforts for the war even Nebraska furnished two regiments, and the loyal people of New Mexico took the field, determined to defend their own, if no assistance came from the "States."

On the 31st of October, Gen. Winfield Scott, the lieutenant-general of the army of the United States, or the executive officer under the President, who is the commander-in-chief, determined to resign his position. Age and its infirmities had imposed this step upon him. This office was created and tendered to General Scott after the close of the Mexican war, in which he conducted the American arms with so much glory into the very halls of the Montezumas.

Born near Petersburg, in Virginia, June 13, 1785, he entered the army as captain of light artillery May 3, 1808, and served his country with unvarying success for more than half a century. In that time he proved his right to rank with the first commanders of the age. He was twice honored with a gold medal from Congress for distinguished services, and now retired from active duty with the reputation, after fifty years of command, of never having lost a battle when he was present in person.

To accomplish his purpose, he addressed the following letter to the Secretary of War:

HEAD-QUARTERS OF THE ARMY, }
WASHINGTON, October 31, 1861. }

The Hon. S. CAMERON, Secretary of War:

SIR: For more than three years I have been unable, from a hurt, to mount a horse, or to walk more than a few paces at a time, and that with much pain. Other and new infirmities—drowsy and vertigo—admonish me that repose of mind and body, with the appliances of surgery and medicine, are necessary to add a little

more to a life already protracted much beyond the usual span of man.

It is under such circumstances—made doubly painful by the unnatural and unjust rebellion now raging in the Southern States of our (so late) prosperous and happy Union—that I am compelled to request that my name be placed on the list of army officers retired from active service.

As this request is founded on an absolute right, granted by a recent act of Congress, I am entirely at liberty to say it is with deep regret that I withdraw myself, in these momentous times from the orders of a President who has treated me with distinguished kindness and courtesy; whom I know, upon much personal intercourse, to be patriotic, without sectional partialities or prejudices; to be highly conscientious in the performance of every duty, and of unrivalled activity and perseverance.

And to you, Mr. Secretary, whom I now officially address for the last time, I beg to acknowledge my many obligations, for the uniform high consideration I have received at your hands; and have the honor to remain, sir, with high respect, your obedient servant,

WINFIELD SCOTT.

This letter was laid before a Cabinet meeting called for the purpose of considering it, and it was concluded, under the authority of a recent act of Congress, to place Gen. Scott on the retired list of the army, with the full pay and allowances of his rank. At 4 o'clock on the afternoon of the same day the President, accompanied by the Cabinet, proceeded to the residence of General Scott, and read to him the official order carrying out this decision.

The venerable general, oppressed by infirmity and emotion, rose, with difficulty, to make to the President his acknowledgments, which he did in touching terms, concluding with the declaration that the kindness manifested towards him on this occasion he felt to be the crowning reward of a long life spent in the service of his country, and his deep conviction of the ultimate triumph of the national arms and the happy termination of the unnatural war.

The President responded, expressing the profound sentiment of regret with which the country, as well as himself, would part with a public servant so venerable in years, and so illustrious for the services he had rendered.

The following was the official order:

On the first day of November, A. D. 1861, upon his own application to the President of the United States, Brevet Lieutenant-General Winfield Scott is ordered to be placed, and hereby is placed, upon the list of retired officers of the army of the United States, without reduction of his current pay, subsistence, or allowances.

The American people will hear with sadness and deep emotion that Gen. Scott has withdrawn from the active control of the army, while the President and unanimous Cabinet express their own and the nation's sympathy in his personal affliction, and their profound sense of the important public services rendered by him to his country during his long and brilliant career, among which will ever be gratefully distinguished his faithful devotion to the Constitution, the Union, and the Flag, when assailed by parricidal rebellion.

ABRAHAM LINCOLN.

On the same day the following order was issued by the President:

WAR DEPARTMENT, WASHINGTON, Nov. 1, 1861.

GENERAL ORDERS, NO. 94.

The President is pleased to direct that Major-General George B. McClellan assume the command of the

Army of the United States. The head-quarters of the army will be established in the city of Washington. All communications intended for the Commanding General will hereafter be addressed direct to the Adjutant-General. The duplicate returns, orders, and other papers heretofore sent to the Assistant Adjutant-General, Head-quarters of the Army, will be discontinued.

By order of the Secretary of War:

L. THOMAS, Adjutant-General.

Less than six months previous, General McClellan was engaged as the President of the eastern division of the Ohio and Mississippi Railroad. Born in Philadelphia in 1826, he entered the army from West Point, and rose to distinction in the war with Mexico, and was subsequently sent by the Government as one of a deputation from the army, to the Crimea during the war of France, England, and Sardinia with Russia. A few years afterwards he resigned his commission in the army and retired to private life. This appointment received the highest approbation of the retiring General.

On taking the command of the army, General McClellan issued the following order:

HEAD-QUARTERS OF THE ARMY, }
WASHINGTON, Nov. 1, 1861. }

In accordance with General Order No. 94, from the War Department, I hereby assume command of the armies of the United States.

In the midst of the difficulties which encompass and divide the nation, hesitation and self-distrust very well accompany the assumption of so vast a responsibility; but, confiding as I do, in the loyalty, discipline, and courage of the troops; and, believing as I do, that Providence will favor ours as the just cause, I cannot doubt that success will crown our efforts and sacrifices.

The army will unite with me in the feeling of regret, that the weight of many years, and the effect of increasing infirmities, contracted and intensified in his country's service, should just now remove from our head the great soldier of our nation, the hero who, in his youth, raised high the reputation of his country in the fields of Canada, which he sanctified with his blood; who in more mature years proved to the world that American skill and valor could repeat, if not eclipse, the exploits of Cortez in the land of the Montezumas; whose whole life has been devoted to the service of his country; whose whole efforts have been directed to uphold our honor at the smallest sacrifice of life; a warrior who scorned the selfish glories of the battle field, when his great qualities as a statesman could be employed more profitably for his country; a citizen whose declining years have given to the world the most shining instances of loyalty in disregarding all the ties of birth, and clinging still to the cause of truth and honor. Such have been the career and character of Winfield Scott, whom it has long been the delight of the nation to honor—both as a man and as a soldier. While we regret his loss, there is one thing we cannot regret—the bright example he has left for our emulation. Let us all hope and pray that his declining years may be passed in peace and happiness, and that they may be cheered by the success of the country, and the cause he has fought for and loved so well. Beyond all that, let us do nothing that can cause him to blush for us; let no defeat of the army he has so long commanded embitter his last years, but let our victories illuminate the close of a life so grand.

GEO. B. MCCLELLAN,

Major-General, Commanding U. S. A.

Gen. McClellan had undertaken, after the battle of Bull Run, to re-organize the army of

the Potomac, and to these duties, together with those arising from his new position, he now devoted himself.

The only event of importance which occurred before the close of the year, was the surrender of Messrs. Mason and Slidell on the demand of the English Government. The capture of these Commissioners, and the possibility of a rupture with Great Britain, turned the attention of the Government to the unprotected condition of the northern coast and frontier. A letter was therefore addressed by the Secretary of State to the Governors of the respective States, requesting them to repair the fortifications within their limits. For further details of the year, see President Lincoln's Message, December 3, under PUBLIC DOCUMENTS.

It may not be out of place here to mention some of those brave men whom the war found engaged in peaceful pursuits of life, or in subordinate military positions, but who, upon the first call to arms, hastened to the field and trained the soldiers, and led them to victory.

Major-General John Charles Fremont was born in South Carolina in January, 1813; graduated at Charleston College in 1830; studied and taught civil engineering; employed by the Government on Mississippi survey; commissioned lieutenant of engineers, and in 1842 sent to explore the passes of the Rocky Mountains; made three exploring expeditions thither, of great interest and importance; assisted in the conquest of California; was made its first governor, became the victim of a quarrel between two American commanders, and was stripped of his command by court-martial; reinstated by the President, but resigned his connection with the army; made another expedition across the Rocky Mountains, and nearly perished in the snow; was sent to Washington as the first senator from California; held a large tract of land in the Mariposa gold region, but became greatly involved for a time by litigation of its title; was republican candidate for the Presidency in 1856; improved his Mariposa estate and made it profitable in 1858-60; visited Europe in autumn of 1860; rendered material service to the United States there in 1860-61; was appointed major-general in the regular army, May, 1861, and assigned to Western Department in July, 1861; removed from command in November, 1861, and ordered to report himself at Washington; reinstated in command in February, 1862, and assigned to Mountain Department.

Major-General Henry Wager Halleck was born in Oneida County, New York, in 1819; graduated at West Point in 1839, third in a class of 31; second lieutenant of engineers same year; acting assistant professor of engineers from July, 1839 to June, 1840; first lieutenant in 1845; author of a work on "Bitumen and its Uses," published 1841, and another on "Elements of Military Art and Science" in 1846; brevetted captain for gallant and meritorious conduct in 1847; Secretary of State in the military governments

of Gens. Kearney, Mason, and Riley, 1847-49; chief of staff to Com. Shubrick, 1847-'8; aided in forming the Constitution of California, 1849; promoted to captaincy of engineers, 1853; resigned in 1854, to engage in the practice of law in San Francisco; abandoned a large and lucrative practice in the summer of 1861; appointed major-general of the regular army, and put in charge of the Department of the West. Head-quarters at St. Louis.

Major-General Don Carlos Buell is a native of Ohio, born in 1820; entered West Point, 1837; graduated in 1841; became second lieutenant same year; first lieutenant in 1846; brevetted captain in 1848 for gallant and meritorious conduct at the battle of Monterey; was adjutant in 1847 and 1848; distinguished himself at Cerro Gordo; was brevetted major for services at Contreras and Churubusco, and severely wounded in the latter battle; assistant adjutant-general in 1848; relinquished his rank in the line in 1851, but subsequently resumed it, and was in service as major in California at the commencement of the war; appointed brigadier-general by Congress May 17, 1861, and given a command on the Potomac; assigned to the Department of Ohio on resignation of Anderson, and made major-general.

Major-General David Hunter, a native of the District of Columbia, born about 1802, graduated at West Point in 1822; became first lieutenant in 1828; captain First Dragoons, 1833; resigned in 1836, but returned to the army as temporary paymaster in 1841, and paymaster in 1842. In the present war, colonel in May at Washington; brigadier-general, and engaged in battle of Bull Run, July 21, 1861; sent to Missouri, made major-general, and took Gen. Fremont's place temporarily; transferred to Department of Kansas in December, 1861.

Major-General John Ellis Wool was born at Newburgh, New York, 1789. At the commencement of the war with Great Britain in 1812, he obtained a captain's commission in the Thirtieth Regiment of infantry, and joined the army on the Niagara frontier. At the battle on Queenstown Heights he distinguished himself, but by the surrender was made a prisoner; upon his exchange was assigned to the Twenty-ninth Regiment infantry, having previously been appointed major. In September, 1861, appointed inspector-general, with the rank of colonel; in 1818 lieutenant-colonel, and in 1826, "for ten years' faithful service," brevetted brigadier-general; in 1836 assisted in the removal of the Indians from the Cherokee country to Arkansas; appointed brigadier-general in 1841; distinguished himself in the war with Mexico, and was brevetted major-general in 1848; after the Mexican war, Gen. Wool was assigned to the command in the Eastern Military Department; on August 12, 1861, he was ordered to the command of the forces at Fortress Monroe, and was subsequently raised to the rank of major-general.

Major-General Benjamin F. Butler is a native

of New Hampshire, born about the year 1818; chose the legal profession; was admitted to the bar in 1842, and settled in practice at Lowell, Mass., where he became distinguished as a criminal lawyer, and a rising politician; was democratic candidate for Governor in 1859; volunteered in command of one of the three-months Massachusetts regiments in April, 1861; was appointed brigadier-general in May; stationed first at Baltimore, and subsequently at Fortress Monroe; ordered the expedition to Great Bethel; was promoted to major-generalship; commanded the land forces in Hatteras expedition, and subsequently in the Ship Island expedition.

Major-General John Adams Dix was born in Boscawen, New Hampshire, July 24, 1798; entered West Point Military Academy in 1812; ensign Fourteenth Infantry, 1813; second lieutenant, 1814; first lieutenant artillery, 1818; aide-de-camp to Gen. Brown in 1819; captain artillery, 1825; resigned, 1828, and same year settled as a lawyer in Cooperstown, New York; adjutant-general of State, 1830; Secretary of State, 1833; United States Senator, 1845-49; assistant treasurer United States, New York, in 1853; postmaster New York City, 1860; Secretary of the Treasury, (close of Buchanan Administration,) 1861; appointed brigadier-general, and major-general in summer of 1861; in command of Federal forces at Baltimore. Has travelled extensively abroad, and is the author of "Resources of the City of New York," 1827; "A Winter in Madeira," 1851; "A Summer in Spain and Florence," 1855.

Major-General Nathaniel P. Banks born in Waltham, Mass., January, 1816. In 1848 was representative for Waltham. In 1850 was sent to the State Senate; in 1852 was elected to Congress; was chosen Speaker of the 34th Congress; in 1856 elected Governor of Massachusetts, serving three terms. Was appointed major-general of volunteers in the United States army, May 11, 1861; was first commander of the Department of Annapolis, and since, of that of Shenandoah.

Brigadier-General Edwin V. Sumner, born in Massachusetts about 1800; appointed second lieutenant of infantry in 1819; first lieutenant, 1823; assistant commissary of subsistence in 1827; captain of dragoons, 1833; major Second Regiment of dragoons, 1846; brevet lieutenant-colonel for gallant and meritorious conduct at Cerro Gordo, where he commanded a regiment of mounted rifles and was wounded; brevet colonel for conduct at Molino del Rey; lieutenant-colonel, 1848; colonel First Cavalry, 1855; defeated a body of Cheyenne warriors in Kansas in 1857; remained in Kansas till 1859; made brigadier-general in August, 1861.

Brigadier-General Samuel P. Heintzelman is a native of Pennsylvania, born about 1806; graduated at West Point, 1826; second lieutenant infantry same year; first lieutenant, 1833; assistant commissary, 1836; assistant quartermaster, 1838; captain same year; bre-

vet major for gallantry at battle of Huamantla, Mexico, 1847; major, 1855; colonel May, 1861; brigadier-general of volunteers May 17, 1861; fought at battle of Bull Run, and retained his connection with the army of the Potomac.

Brigadier-General Erasmus D. Keyes is a native of Massachusetts, born about 1812; graduated at West Point in 1832; became first lieutenant artillery in 1836; aid to Major-General Scott from 1837 to 1841; appointed assistant adjutant-general in July, 1838; captain of artillery in November, 1841; instructor of artillery and cavalry at the military academy, 1844 to 1848; distinguished himself in the Indian wars in Oregon and Washington Territory in 1856 and 1858; attained the rank of major in 1858; appointed colonel of volunteers at the commencement of the war; made brigadier-general May 17, 1861; served in the battle of Bull Run, and has since that time been connected with the army of the Potomac.

Brigadier-General Fitz John Porter is a native of New Hampshire, born about 1825; graduated at West Point in 1845; became first lieutenant of artillery in 1847; brevetted captain and major for gallant and meritorious conduct at Molino del Rey and Chapultepec, wounded at the gate of Belen; was assistant instructor at the military academy from 1849 to 1856; appointed assistant adjutant-general in June, 1856; and captain, October of the same year. At the commencement of the present war he was appointed colonel of volunteers, and made brigadier-general May 17, 1861. Was in the battle of Bull Run, and has since commanded a brigade in the army of the Potomac.

Brigadier-General Andrew Porter is a native of Pennsylvania, born about 1820; was in the military academy 1836 to January, 1837; was appointed first lieutenant mounted rifles in May, 1846; captain, May, 1847; distinguished himself, and was brevetted major and lieutenant-colonel for gallant and meritorious conduct at Cerro Gordo, Contreras, Churubusco, and Chapultepec. At the commencement of the present war was appointed colonel of volunteers, and made brigadier-general May 17, 1861. He belongs to the army of the Potomac.

Brigadier-General William Benjamin Franklin is a native of Pennsylvania, born about 1823; graduated at West Point in 1843 first in his class, and was appointed to corps of topographical engineers; brevetted first lieutenant for gallant and meritorious conduct at Buena Vista; acting assistant professor of philosophy at military academy from 1848 to 1850; promoted to first lieutenant in 1853, and captain in 1857; was assigned to light-house duty in 1853; May 17, 1861, he was appointed brigadier-general of volunteers, and was connected with the army of the Potomac, in which he now commands a division.

Brigadier-General William Tecumseh Sherman is a native of Ohio, born about 1820; graduated at West Point in 1840; became first lieutenant of artillery in November, 1841; was

acting assistant adjutant-general in 1847; brevetted captain for meritorious service in California during the Mexican war; appointed commissary of subsistence in 1850, and resigned in 1853. At the commencement of the present war he entered the service, and was appointed brigadier-general of volunteers May 17, 1861, and on the resignation of Gen. Anderson placed in command of the Department of Kentucky, in which he was superseded November 8, 1861, by Gen. D. C. Buell.

Brigadier-General Charles P. Stone is a native of Massachusetts, born about 1824; graduated at West Point in 1845, seventh in his class, and appointed brevet second lieutenant ordnance same year; was acting assistant professor of ethics at military academy 1845-'6; brevetted first lieutenant and captain for gallant and meritorious conduct at Molino del Rey and Chapultepec; advanced to the rank of first lieutenant in 1853; resigned in 1856. In May, 1861, he was appointed brigadier-general of volunteers. In October, 1861, he was in command on the Maryland side of the Potomac, and on the 21st of that month directed the movement which resulted in the disastrous battle of Ball's Bluff. His subsequent conduct led to suspicions of his loyalty, and early in 1862 he was arrested and consigned to Fort Warren on a charge of treason.

Brigadier-General John A. McClernand is a citizen of Illinois, born about 1817, and was a prominent political leader in that State for some years. He was a member of the 36th Congress; and resigned to enter the army in 1861; was appointed brigadier-general of volunteers May 17, 1861, and distinguished himself at the battle of Belmont, and subsequently at forts Henry and Donelson.

Brigadier-General Henry W. Benham is a native of Connecticut, born about 1816; graduated at West Point in 1837, first in his class; made first lieutenant of engineers in 1838, wounded at battle of Buena Vista, and brevetted for his gallant and meritorious conduct there; attained the rank of captain in May, 1848; appointed assistant in United States coast survey, 1853; appointed brigadier-general of volunteers in August, 1861; distinguished himself for bravery and military skill in the battle and pursuit of the Confederate forces at Rich Mountain and Cheat Mountain pass; in consequence of a misunderstanding between him and General Rosecrans in relation to the pursuit of Gen. Floyd on the 12th of November, 1861, he was ordered by General Rosecrans to report himself at Washington as under arrest; but was, on examination, reinstated in his command, and assigned to the Department of the South.

Brigadier-General Joseph K. F. Mansfield is a native of Connecticut, born in 1798; graduated at West Point in 1823, second in his class; was chief engineer of the army of occupation in the Mexican war, and repeatedly promoted for gallant and meritorious conduct. In

1853 was made inspector-general, with the rank of colonel; and during the present war has been promoted to a brigadier-generalship in the regular army.

Brigadier-General Charles Ferguson Smith was a native of Pennsylvania, born about 1805; graduated at West Point in 1825, and made second lieutenant artillery the same year; in 1859 appointed assistant instructor in infantry tactics at West Point; in 1831 promoted to an adjutancy, and in 1832 made first lieutenant. In 1838 he was appointed instructor in infantry tactics in the military academy, and promoted to a captaincy the same year. He distinguished himself in the Mexican war at Palo Alto, Resaca de la Palma, Contreras, and Churubusco, and was brevetted major and lieutenant-colonel for his gallant conduct in these battles, and the same year appointed acting inspector-general in Mexico. In 1854 he attained the rank of major, and in 1855 that of lieutenant-colonel. On the 31st of August, 1861, he was made brigadier-general of volunteers, and put in command of troops at Paducah, Ky. He distinguished himself at Fort Donelson by a brilliant charge of his brigade, which he led in person, and which was the decisive action of the battle. He died at Savannah, Tenn., April 25, 1862.

Brigadier-General Horatio Gates Wright is a native of Connecticut, born about 1821; graduated at West Point, second in his class, in 1841; was acting assistant and assistant professor of engineering from 1842 to 1844; made first lieutenant, 1848, and captain of engineers, 1855, and served for four years as assistant to Gen. Totten. He was appointed brigadier-general of volunteers September 14, 1861, and attached to the Port Royal expedition as commander of the third brigade. He distinguished himself there in several actions.

Brigadier-General William Nelson, a native of Kentucky, born about 1828; was at first connected with the navy, and attained the rank of passed midshipman, July, 1846; served with the navy battery at Vera Cruz in 1847; appointed lieutenant in the army in 1855; made brigadier-general Sept. 16, 1861, and placed in command in Eastern Kentucky, where he defeated Humphrey Marshall in several engagements.

Brigadier-General John G. Barnard, a native of Massachusetts, born about 1813, graduated at West Point, second in his class, in 1833, and became second lieutenant of engineers same year; captain in 1838; brevetted major for meritorious conduct in the Mexican war; instructor in practical engineering at the military academy in 1854; superintendent of the military academy, 1855-'6; major, 1858; author of several works on engineering and mathematical science; appointed brigadier-general of volunteers, September 23, 1861.

Brigadier-General Irvin McDowell is a native of Ohio, born about 1818; received his early education in France; graduated at West

Point in 1838; second lieutenant of First Regiment of Artillery same year; aide-de-camp to Gen. Wool, 1845; assistant adjutant-general, 1847; brevetted captain for meritorious conduct at Buena Vista; resigned in 1851; made brigadier-general in the regular army in May, 1861; commanded at Bull Run; remained with the army of the Potomac in command near Fredericksburg.

Brigadier-General Thomas W. Sherman was born in Rhode Island about 1816; graduated at West Point, 1836, and was appointed second lieutenant in the Third Artillery same year; was promoted to the first lieutenantcy, 1838, and to the captaincy in 1846; was engaged in the Mexican war, and, "for gallant and meritorious conduct," was brevetted major. At the commencement of the present war was promoted colonel; made brigadier-general August, 1861; he commanded the land forces in the Port Royal expedition, and captured Tybee Island.

Brigadier-General John Pope, born in Illinois, about 1822, but was appointed a cadet from Kentucky; graduated at West Point in 1842, and received an appointment at once in the corps of topographical engineers; brevetted first lieutenant and captain for gallant and meritorious conduct at Monterey and Buena Vista; captain in 1859; colonel in June, 1861, and brigadier-general of volunteers, July, 1861; commanded in Northern Missouri in February, 1862, captured New Madrid, and aided in the capture of Island Number Ten.

Brigadier-General Charles D. Jameson was born in Cumberland County, Maine, February 24, 1827. Early in life he embarked in the lumber business, and in time became one of the most extensive manufacturers and shippers on the Penobscot River. At the commencement of the present war he was put in command of the First Regiment in his native State, and marched to the defence of the capital. On account of meritorious conduct at the battle of Bull Run, he received the appointment of brigadier-general, September 3, 1861, and was soon afterwards placed in command of one of the brigades in Gen. Heintzelman's division.

Major-General Ulysses S. Grant is a native of Ohio, born in 1822; graduated at West Point, July, 1843, and was made second lieutenant of the Fourth Regiment of United States infantry. In 1847 was made first lieutenant. He was with Gen. Taylor in the Mexican war, and for gallant and meritorious conduct at the battle of Chapultepec, was brevetted captain, 1847; attained rank of captain, 1853. At the opening of the present war he offered his services to Gov. Yates of Illinois, and was appointed colonel of the Twenty-first Regiment of Illinois Volunteers. He was made brigadier-general, and won himself much honor at the battle of Belmont and the capture of Fort Donelson.

Brigadier-General George H. Thomas is a native of Virginia, born about 1820; graduated at West Point, 1840; brevetted first lieutenant for gallantry and good conduct in the war against

the Florida Indians in 1841; first lieutenant, 1844; brevet captain for conduct at Monterey, 1846; brevet major, for conduct at Buena Vista, 1847; instructor of artillery and cavalry at the military academy, 1850-55, with rank of captain after 1853; major Second Cavalry, 1855; brigadier-general of volunteers, August, 1861; assigned to Department of Kentucky; fought battle of Mill Spring; and was engaged on the 6th and 7th of April, 1862, in the battle of Shiloh.

Brigadier-General Ormsby McKnight Mitchell was born in Union County, Ky., July, 1810; graduated at West Point in 1829, and appointed brevet second lieutenant of artillery; made assistant professor of mathematics 1829-31; engaged in railroad surveys June to September, 1831; detailed to St. Augustine, Fla.; resigned, 1832; went to Cincinnati, practised law for two years, then opened a scientific school; in 1836 became professor of mathematics, philosophy, and astronomy in Cincinnati College; projected, and, in spite of great difficulties, achieved the establishment of the Cincinnati Observatory; has lectured extensively on astronomy; edited "Sideral Journal," 1846-55; invented a magnetic clock in 1848; in 1859 was appointed superintendent of Dudley Observatory at Albany; has published several works on astronomy; soon after the commencement of the war, he resigned, and offered his services to the Government; was appointed brigadier-general, and assigned to the Department of Ohio. (Has distinguished himself in April, 1862, by the capture of Huntsville, Alabama, and taking possession of nearly 200 miles of the Memphis and Charleston Railroad; made major-general by Congress soon after.)

Brigadier-General Thomas W. Sweeney was born in Ireland in 1818; came to this country in childhood; was second lieutenant of New York Volunteers in the Mexican war; lost an arm at Churubusco; served on the western frontier subsequently, and was promoted to a captaincy; was appointed colonel of volunteers at the commencement of the present war, and made brigadier-general in the session of 1861-'2. He distinguished himself at Wilson's Creek.

Brigadier-General Harvey Brown is a native of New Jersey, born about 1798; graduated at West Point in 1818; became first lieutenant of artillery in 1821; was aid to Major-General Brown in 1824-'5; lieutenant-colonel of mounted Creek Volunteers in the Florida war, in 1836-'7; brevetted major for his gallant conduct in that war; distinguished himself at Monterey, Contreras, Churubusco, and Belen, and received two brevets for his meritorious conduct there; promoted to rank of major in 1851, and colonel in 1858; took command of Fort Pickens, Fla., in June, 1861, and twice engaged the Confederate batteries and forts on the main land; was made brigadier-general of the regular army by Congress in its session of 1861-'2, and placed in command of the forts in New York harbor.

Brigadier-General George Archibald McCall, born in Pennsylvania, about 1802, graduated at West Point, 1822; made first lieutenant of infantry, 1829; aide-de-camp to Gen. Gaines from 1831 to 1836; promoted captain, 1836; brevet major and lieutenant-colonel in 1846, for gallant conduct at Palo Alto and Resaca de la Palma, 1846; assistant adjutant-general, 1846; major, 1847; inspector-general, 1850; brigadier-general of volunteers, 1861.

Brigadier-General William S. Rosecrans is a native of Ohio, born in 1825. He graduated with high rank at West Point in 1842; appointed brevet second lieutenant of engineers same year, and made assistant professor of engineering, and afterwards of natural philosophy at the military academy. Resigned his commission in April, 1854, and established himself as an architect and civil engineer in Cincinnati, and subsequently as a manufacturer of kerosene oil; entered the army as colonel at the breaking out of the war; distinguished himself in several battles in Western Virginia; was promoted to the rank of brigadier-general in the regular army May 16, 1861.

Brigadier-General Isaac I. Stevens was born at Andover, Mass., about the year 1818; graduated as the first scholar in his class at West Point, July, 1839; was appointed first lieutenant of engineers, July, 1840. He served upon General Scott's staff throughout the Mexican war, and for gallant and meritorious conduct in the battles of Contreras, Churubusco, and Chapultepec was brevetted captain and major in 1848. Since 1849 Major Stevens has assisted in the United States Coast Survey. In 1853 he was appointed Governor of Washington Territory, and in 1857 was a delegate to Congress. At the commencement of the war he volunteered, and was subsequently given the command of the Seventy-ninth Highlanders. He was made brigadier-general, September, 1860, and commanded a brigade under General Sherman at Port Royal.

Brigadier-General Benjamin M. Prentiss was born in Belleville, Wood County, Virginia, November 23, 1819. In 1840 he removed to Illinois and in 1846, being captain of the Quincy Blues, volunteered for the Mexican war with his company, and was in the battle of Buena Vista. At the commencement of the present struggle he reorganized the Quincy Blues, was elected colonel of the Seventh Regiment of Illinois, and upon the organization of a brigade at Cairo was appointed brigadier-general.

Brigadier-General Robert C. Schenck is a native of Warren County, Ohio; was born in 1810. He graduated at the Miami University, and afterwards was a professor in that institution. He studied law, and settled in Dayton; served as State representative several years, and was twice elected to Congress; was appointed Minister to Brazil during the administration of President Fillmore. He received his commission of brigadier-general May 17, 1861.

Brigadier-General Frederick W. Lander was a native of Massachusetts, born about 1820. He was for some years connected with the overland route to California; acted as second of Hon. E. F. Potter in the threatened Pryor and Potter duel; was appointed colonel of a regiment in Western Virginia early in the war, and distinguished himself by his brilliant dashes at the enemy; captured Philippi in June, 1861; was made brigadier-general for services at Rich Mountain; was wounded at the battle of Ball's Bluff, October 21, 1861; drove the Confederates from Romney in February; died from congestion of the brain, and the results of his wound, March 2, 1862.

Flag-officer Andrew H. Foote is a native of Connecticut, born in 1807, a son of the late Governor Samuel A. Foote; entered the navy in 1822 as midshipman, and has advanced through all the grades to the highest; serving in the East Indies, where he routed the pirates; on the coast of Africa, where he made the slave trade unsafe; and on the coast of China, where he maintained the rights of American citizens and the honor of their flag. At the commencement of the war, he succeeded Commodore Breese in command of the Brooklyn Navy Yard, and in the fall of 1861 was assigned to the command of the Mississippi River squadron, captured Fort Henry, and aided in the capture of Fort Donelson, where he was severely wounded. In conjunction with Gen. Pope, he took Island Number Ten after twenty-three days' siege, and subsequently besieged Fort Wright on the Mississippi.

Flag-officer Samuel F. Dupont is a native of New Jersey, born about 1802. He entered the navy in 1815; served with great distinction under Commodore Shubrick in California; with one hundred men defeated and routed five hundred Mexicans; and commanded the Minnesota on the China station in 1858-'9 with great success. He was appointed commander of the Philadelphia Navy Yard in 1859, and flag-officer of the Port Royal expedition in 1861.

Brigadier-General Egbert L. Viele was born in Saratoga County, New York, in 1825. He graduated at West Point, 1846; served in the Mexican war; for several years has pursued his profession of civil engineer in New York, and was

chief engineer upon the Central Park. In 1849 he was appointed chief engineer of the State of New Jersey; and was made brigadier-general of volunteers, August, 1861.

Brigadier-General Thomas Francis Meagher is a native of Ireland, born about 1818. He was distinguished as a lawyer for his eloquence; took part in the Irish rebellion in 1848; was banished by the English Government to Australia in 1849; but made his escape to California in 1853, and attained distinction there as an advocate and orator. He joined the Sixty-ninth (Irish) Regiment of Colonel Corcoran as captain, and was promoted to be major; was in the battle of Bull Run; aided in organizing the Irish brigade from New York; was appointed colonel, and subsequently brigadier-general; and is now in service with his brigade in the army of the Potomac.

Brigadier-General James A. Mulligan was born in the city of Utica, New York, in 1829, of Irish parents. He was educated at the Catholic college of North Chicago; studied law in 1852-54; edited the *Western Tablet* in Chicago; admitted to the bar in 1856; clerk in Department of the Interior, Washington, 1857; captain of Shields' Guards, Chicago, 1859-61; colonel of the "Irish Brigade," Chicago, in June, 1861; defended Lexington, Missouri, for three days against a force five times his own, and finally surrendered with the honors of war.

Major-General Franz Siegel was born in the Grand Duchy of Baden, in 1824. He was educated in the military school of Carlsruhe, became chief adjutant in the Baden army in 1847, and was considered the best artilleryman in Germany. In the revolution of 1848 he became commander-in-chief of the Revolutionary army, but was overpowered by the immense army of the Austrians and Prussians, and emigrated to this country. He was colonel of a German regiment in New York, professor of military science in St. Louis, colonel and acting brigadier-general under Lyon, made a successful retreat after the battle of Wilson's Creek, was present in a three days' fight at Pea Ridge, Arkansas, February, 1862; received a vote of thanks from Congress, and was made a major-general for his bravery and skill in that battle.

V

VERMONT, one of the New England States, the first admitted under the Federal Constitution. It is situated between lat. 42° 44' and 45° N., and long. 71° 33' and 73° 25' W., and is bounded north by Lower Canada, east by New Hampshire, from which the Connecticut River separates it, south by Massachusetts, and west by New York and Lake Champlain, of which about two-thirds lies within the State. Its area is 9,056½ square miles, or 5,795,960 acres. It is divided into 14 counties. The population,

according to the census of 1860, was 315,116. It is eminently an agricultural State. In 1860, 4,995,624 acres of land were taxed, and the average price at which the land was assessed was over \$14 per acre. A large proportion of the land is better adapted to grazing than to tillage, and the horses, cattle, sheep, and swine of the State are of excellent quality. On the 1st of January, 1862, there were 576 miles of railroad completed or in progress in the State, of which 555 miles, costing for construction

and equipment \$22,586,705, were open for traffic. According to the census of 1860, the value of the products of industry for the year ending June 1, 1860 were, in round numbers, \$16,000,000. The following were some of the items: sawed and planed lumber, \$1,060,000; flour, \$1,660,000; steam engines and machinery, \$490,000; agricultural implements, \$160,000; tanned leather, \$1,000,000; iron ore, \$18,000; bar iron, \$63,000; pig iron, \$93,000. The commerce of Vermont is conducted entirely on Lake Champlain. The enrolled and licensed tonnage of the State in 1860 was 7,744 tons; the arrivals 29,232 tons, and the clearances 23,460. The exports of the State the same year were \$783,702, of which \$257,083 were domestic products, and \$526,619 foreign. The imports were \$2,731,857, of which a large proportion were British goods admitted through Canada under the reciprocity treaty. The number of banks in the State in 1861 was 44, whose condition was as follows:

Capital.....	\$3,872,642
Loans and discounts.....	6,748,500
Stocks.....	190,372
Real estate.....	174,736
Other investments.....	168,662
Due by other banks.....	1,299,595
Notes of other banks.....	58,558
Cash items.....	103,537
Specie.....	185,670
Circulation.....	3,784,673
Deposits.....	814,623
Due to other banks.....	15,042

The number of savings banks was 14, of which 2 were in the hands of receivers in chancery, 2 were winding up their affairs, and 10 were receiving deposits. The deposits in 12 of these banks were \$1,145,263. The State valuation of the real and personal estate of its inhabitants in 1860 was \$86,871,851.65. The government valuation under the census of 1860 was \$122,477,170. Up to January, 1861, the State had no permanent debt; a temporary loan, to be reimbursed by State tax, of \$175,000, had been contracted for the completion of a new State house. The government of the State had been conducted with great economy, the entire expenditure for executive, legislative, and judicial purposes seldom or never reaching the sum of \$200,000.

No State in the Union responded more heartily or willingly to the President's proclamation of the 15th of April, 1861, than Vermont.

On the 21st of April, despatches received from all the principal towns of the State reported the prevalence of intense enthusiasm and interest, and the rapid enlistment of volunteers. Gov. Hall called an extra session of the Legislature, which convened at Montpelier on the 22d of April, and in the course of a brief session passed an appropriation of one million dollars for military purposes, one-half absolutely, and one-half at the Governor's discretion.

The organization of one regiment for immediate service, in response to the call of the Gov-

ernment, was authorized, and also the organization and placing upon a war footing, without delay, of two more regiments, with provisions for drilling the same in barracks or encampment.

The Governor was empowered to call out four more regiments, if needed, (making seven in all,) with provision for filling the ranks of all the regiments by draft from the enrolled militia, when volunteers are wanting.

An act exempting militia men, in service, from arrest on civil process; granting to each private seven dollars a month, in addition to the regular pay of the United States army; providing for their families at the cost of the State, in case of destitution; and paying for the uniforms of those enlisting after March 12, 1861, was passed.

An act authorizing banks to loan over ten per cent. of their capital to the State, and an act for a State tax of ten cents on the dollar, were also adopted.

They also repealed sections ten and eleven of the Personal Liberty bill, which had been complained of as inconsistent with the Constitution of the United States, and substituted for it the following law:

It is hereby enacted by the General Assembly of the State of Vermont, as follows:

SECTION 1. If any person shall kidnap or unlawfully carry off or attempt to kidnap or unlawfully carry off any other person, or shall decoy, or attempt to decoy, any other person from, or shall without due process of law remove, or aid, or assist in removing any other person from this State, or shall without due process of law deprive any other person of his liberty, with intent to remove, or aid, or assist in removing such other person from this State, he shall be punished by a fine of not less than one hundred and not exceeding three thousand dollars, or be imprisoned in the State prison for a term not exceeding three years, or both said punishments, in the discretion of the court.

SEC. 2. Sections ten and eleven of chapter one hundred and one of the compiled statutes, and sections two, three, four, six, seven and eight of an act entitled "An act to secure freedom to all persons within this State," approved Nov. 25, A. D. 1858, are hereby repealed.

SEC. 3. This act shall take effect from its passage.

The raising of the sum of one million dollars, by loan or otherwise, was an unprecedented measure in the little State of Vermont. So large a sum had hardly ever been mentioned before in its Legislature, and the levying of a tax of ten cents on the dollar on the grand list, was an act equally without parallel in its history; yet there was no hesitation, and no dissenting voices.

On the 10th of May, her first regiment arrived in New York, admirably equipped, under the command of Colonel (now General) J. Wolcott Phelps, a graduate of West Point. This regiment was in many respects the most remarkable of the many which entered the service as three-months men. It was composed to an extraordinary extent of men of superior education and social position. Nearly one-tenth of its numbers, including many privates, were

graduates of New England colleges. Many were professional men of high standing, and almost all were men of strictly temperate habits. The remarkable stature of a considerable number of the men attracted attention. Ten men from one of the companies lay down upon the ground for measurement, and formed a line sixty-seven feet and ten inches in length. A visitor admired the unusually firm and substantial character of their blankets, so different from the shoddy blankets of some of the regiments from other States; "Our wives and sisters made them," said the Vermonter, proudly. A second regiment from Vermont reached New York on the 25th June, and a third on the 24th July. Two more followed in September, and a sixth in October, making in all over 6,000 men sent from this State. A cavalry regiment, in addition, was subsequently organized, and a large number of the citizens of the State enlisted in regiments from adjacent States.

The apportionment of the United States tax of August 6, 1861, due from Vermont, and amounting to \$211,068, was assumed by the State.

The State election in September resulted in an overwhelming majority for the Republican and Union candidates. Frederick Holbrook, the Republican and Union candidate for Governor, received 40,000 votes, against 5,000 cast for the other two candidates, one of whom was nominated as "Union;" the Legislature was almost unanimously Union. The vote of the State at the presidential election in 1860 was as follows: Lincoln, 33,808; Douglas, 6,849; Breckinridge, 218; Bell, 1,969.

VICAT, LOUIS JOSEPH, a French engineer, born at Grenoble, France, March 31, 1786, died at the same city, April 10, 1861. In 1804, he entered the Polytechnic School, and graduated in the corps of roads and bridges, in which he speedily attained the rank of an engineer of the first class. The study of mortars and cements, then in its infancy, attracted his attention, and in 1818 he published the first results of his persevering researches under the title *Recherches experimentales sur les chaux de construction les bétons et les mortiers*, Paris, 1818, 4to. Encouraged by his success, he made a chemical analysis of those mortars which had proved most durable, and found that they were made with hydraulic cement, and that their good properties were dependent upon the clay disseminated through them. He published his discoveries in this direction in his *Résumé des connaissances actuelles sur les mortiers et les ciments calcaires*, Paris, 1828. The result of this publication was an entire revolution in the method of constructing the foundations of bridges. M. Vicat was the first to apply his own principles at Souillac in 1822, on a bridge whose construction gave him a high reputation. He was next charged by government with the investigation of the localities in France which produced the best natural hydraulic lime, and with experiments for ascer-

taining the proper materials and proportions for reproducing it artificially. In this investigation he visited and explored 80 of the departments of France, and his report was adjudged worthy of the statistical prize of the Academy of Sciences in 1837. He had been elected a corresponding member of the Academy in 1833. The report which received the prize was published in 1839. The municipal council of Paris, in token of their appreciation of his labors, voted him a silver vase of the value of \$480, with the inscription, "The City of Paris to M. Vicat, in commemoration of the services rendered by his discoveries." Vicat gave freely to the public the results of his investigations, seeking no profit from their exclusive use; and, in token of their appreciation of his disinterestedness, the French Chamber of Deputies, in 1843, on motion of M. Arago, decreed him a pension of \$1,200 per annum, with reversion to his children. He also received the decoration of the orders of Russia, Prussia, and Piedmont, and the rank of Commander in the Legion of Honor, in February, 1846. After serving as engineer in chief of the corps of roads and bridges for more than 20 years, he retired in 1851 to his native city. His discoveries in the subject of cements have been of immense value to France. He was also the author of two or three works on suspension bridges.

VIENNA is a small village on the railroad which extends from Alexandria to Leesburg, in Virginia. It is fifteen miles from Alexandria and twenty-three miles from Leesburg. It was the scene of surprise and disaster to the First Ohio Regiment, Col. McCook, on the 17th of June. On the day previous, a train of cars passing over this portion of the road had been fired upon, and one man killed. In consequence, the Government resolved to place pickets along the road, and this regiment, accompanied by Brig.-Gen. Schenck, set out in a train of cars, and the men were distributed in detachments along the line. As the cars approached Vienna, Col. Gregg, with 600 South Carolinians, and a company of artillery and two companies of cavalry, on a reconnoitring expedition, heard the whistle of the locomotive. He immediately wheeled his column and marched back to Vienna, which he had just left. This force had scarcely time to place two cannon in position, when the train, consisting of six flats and a baggage car, pushed by the locomotive, came slowly around the curve. As the train was about to stop, the artillery opened a well-directed fire, which raked the cars from front to rear. At the same time the coupling of the locomotive became detached or destroyed, and the engineer retired, leaving the cars in their exposed position. The Ohio Volunteers immediately took to the woods on each side, and were pursued a short distance by the Confederate infantry and cavalry. The Federal loss was five killed, six wounded, and seven missing. The cars were burned, and a considerable quantity of

carpenters' tools, blankets, and other baggage was taken by the Confederates, who sustained no loss.

VIRGINIA, one of the largest States of the Union, is bounded on the North by Ohio, Pennsylvania, and Maryland; east by Maryland and the Atlantic Ocean; south by North Carolina and Tennessee; and west by Kentucky and Ohio. The population in 1860 was 1,047,613 white, 57,579 free colored, and 490,887 slaves. The area of the State is about 61,352 square miles. The assessed value of real property in 1860 was \$417,952,228; of personal property, \$239,069,108. (*See NEW AMERICAN CYCLOPEDIA.*) The popular vote for President in 1860 was as follows: Lincoln, 1,929; Douglas, 16,290; Breckinridge, 74,323; Bell, 74,681. That at the election in 1856 was: Fremont, 291; Buchanan, 89,706; Fillmore, 60,310.

No State watched the proceedings in South Carolina and Alabama relative to secession, with greater interest than Virginia. In favor of the Union by a large majority, she still possessed the warmest sympathy with the slaveholding States. Public affairs, however, maintained their ordinary course until the 7th of January, when an extra session of the Legislature convened at Richmond. Governor Letcher, in his Message, alluding to the condition of the country, said that all see, know, and feel that the danger is imminent, and all true patriots are exerting themselves to save the country from impending perils. He renewed the proposition in his previous Message for a convention of all the States, and said it is "monstrous to see a Government like ours destroyed merely because men cannot agree about a domestic institution. It becomes Virginia to be mindful of her own interests. A disruption is inevitable, and if new confederations are to be formed, we must have the best guarantees before we can attach Virginia to either." He charged upon the non-slaveholding States the responsibility for the state of affairs, and, if the Union was disrupted, upon them would rest the blame. He alluded at length to their aggressions, and said they have the power to end the strife and restore confidence. "Will they do it?" He awaited their response without apprehension.

The Governor further declared he would regard any attempt of the Federal troops to pass through Virginia for the purpose of coercing any Southern State as an act of invasion, which would be repelled. He was not without a hope that the present difficulties would find a satisfactory solution. "Let New England and Western New York be sloughed off and ally themselves with Canada." He opposed a State convention, and suggested such measures as to him seemed most suitable for the crisis. In the House, a resolution was unanimously adopted to appoint a committee with instructions to report a bill for assembling a State convention; and anti-coercion resolutions were passed, saying that "any attempt to coerce a State would

be resisted by Virginia." The bill in favor of calling a State convention was finally adopted, and February 4th fixed as the day for the election of the delegates, and the 13th as the day for them to assemble.

Numerous Union meetings, at this time, were held in Western Virginia. Resolutions were passed by the Legislature, declaring that the Union, being formed by the assent of the States, ought not to be maintained by force, that the Federal Government had no power to make war on a State, and that they would resist all attempts at coercion into reunion or submission.

On the 10th of January another resolution, having for its object to preserve peace, was adopted in the House. It requested the President, and also the Governors of the seceded States to give assurances that the *statu quo* in all matters tending to a collision should be maintained for the present. In the Senate the resolution was amended to ask of the President an assurance of absolute preservation of the peace for sixty days, and the whole matter was then referred to a committee. It was also resolved in the House to submit to the people on the election for delegates to the State convention, the question whether, if any action should be taken in convention relative to the Federal Union, it should be submitted to the people for ratification or rejection. The vote was ayes 77, nays 61. This was considered by the friends of the South as so "emasculating" the convention bill as to throw into imminent peril "all that the people of Virginia held most sacred and dear, both as to the Federal Constitution and the rights and honor of the State."

On the 14th propositions were introduced in the Legislature looking to a national convention, to be held at Washington on February 4th. (*See page 178.*) Meantime Union meetings were held in Winchester, Portsmouth, and other towns, particularly in the western part of the State.

On the 17th the Governor communicated to the Legislature the resolutions which had been adopted by the New York Legislature, with a Message expressing the utmost disdain; saying, at the close, that the threat conveyed can inspire no terror with freemen. The Legislature ordered these resolutions to be returned to Gov. Morgan, in New York, as an expression of the indignation with which they were received, because understood to countenance the doctrine and contemplate the policy of coercion. (*See NEW YORK.*) On the same day the House adopted the resolutions contemplating a national convention at Washington, providing that the commissioners should at all times be subject to the control of the Legislature or the State convention, if in session. This was regarded as embracing an approval of the Crittenden propositions.

The passage of the propositions for a peace conference at Washington were a matter of considerable interest, not only to the State,

but to the country. It was hailed, at the time, as a step on the part of that ancient commonwealth to effect a peaceable solution of the difficulties of the country, and to preserve the Union with its friendly and fraternal feeling. When the resolutions were before the House, a motion to amend of such a character as to bring up the question of the right and present policy of secession was offered and voted down, ayes 36, nays 96. On the adoption of these resolutions in the Senate, another was offered of this purport:

Resolved, That if all efforts to reconcile the unhappy differences between sections of our country shall prove abortive, then every consideration of honor and interest demands that Virginia shall unite her destinies with her sister slave-holding States.

This resolution was adopted unanimously.

Messrs. John Tyler and John Robertson were appointed Commissioners, the former to President Buchanan, and the latter to Gov. Pickens, to request them to abstain from hostile acts during the session of the Conference, and to obtain from South Carolina a representation therein.

On the 18th a bill passed the House appropriating one million of dollars for the defence of the State. It was also passed by the Senate on the 23d.

On the 22d the Governor sent to the Legislature the resolutions of the State of Ohio, breathing a coercive spirit. He suggested that such resolutions sent to slave-holding States had no other effect than to excite resentments and inflame prejudices, as well as to increase the difficulties, and embarrass, if not defeat, all the efforts being made to adjust the controversy. He suggested also the propriety of a rebuke to the Governor of Ohio for his refusal to surrender Owen Brown and Francis Merriam when demanded by the Executive of Virginia, as fugitives from justice. The Message was laid on the table by a small majority.

The members of Congress from Virginia, even at this period, had, it seems, given up all hope of an adjustment of the difficulties of the country. Tea of them sent an address to the people of the State, giving a view of the proceedings and the probable action of Congress, and declaring: "It is vain to hope for any measures of conciliation and adjustment from Congress which the people of Virginia could accept." They said, further, that they were satisfied the Republican party designed by civil war alone to coerce the Southern States, under the pretext of enforcing the laws, unless it should become speedily apparent that the seceding States were so numerous, determined, and united as to make such an attempt hopeless. They concluded by expressing their conviction that prompt and decided action by the people of Virginia in the Convention would afford the surest means, under the providence of God, of averting the impending civil war, and preserving the hope of reconstructing a Union already dissolved.

Messrs. Tyler and Robertson, the Commissioners, proceeded to discharge their duty. The reply of the President was that he had no power to make such an agreement. (*See UNITED STATES*.) The reply of South Carolina was embraced in the following resolution, which was unanimously adopted by the Legislature of that State:

Resolved unanimously, That the separation of South Carolina from the Federal Union is final, and she has no further interest in the Constitution of the United States; and that the only appropriate negotiations between her and the Federal Government are as to their mutual relations as foreign States.

The reply from Maryland, through Governor Hicks, to the request from Virginia to meet in conference at Washington, concludes with these words: "I am rejoiced that Virginia has made the move, and I trust it will be met in a corresponding spirit by the other States; if so, we may anticipate the best of consequences from their patriotic action." The letter was ordered to be printed by the Legislature. The views of the Legislature on coercion are embraced in this resolution, to which there were only five dissentient votes in the House:

Resolved, That when any one or more of the States have determined, or shall determine, under existing circumstances, to withdraw from the Union, we are unalterably opposed to any attempt on the part of the Federal Government to coerce the same into re-union or submission, and that we will resist the same by all the means in our power.

The number of delegates to the State Convention was 152, a large majority of those elected preferring the Union to secession. This was considered as a declaration against precipitate secession, and in favor of making every honorable effort to restore the Union. Virginia demanded her rights in the Union, looking to the conservative people of the North, if they were in a majority, to make a peaceful adjustment of difficulties. Of unconditional "Unionists," and extremists on the other side, there were very few elected. The effect of this election on the people of Maryland, Tennessee, Kentucky, and North Carolina was exceedingly favorable for the Union. All party distinctions had thus been forgotten in the choice of the delegates.

On the 11th of February the Governor sent to the Legislature the report of Commissioner Robertson, who had been sent to the seceded States. He reported that the Governor of Georgia accepted the mediation of Virginia, and gave assurances that the authorities of Georgia would abstain, during the period contemplated, from all acts calculated to produce a collision between that State and the General Government. The Commissioner believed that the Governor of Alabama would give a favorable answer, and that South Carolina would conform her course to the action or recommendation of the Southern Congress. The resolutions from the Legislature of Michigan were ordered to be returned to the Governor of that State.

The State Convention met at Richmond on the 13th of February. John Janney, of Loudon, was elected President of the Convention, and upon taking the chair, he made an address friendly to the Union, but said that Virginia would insist on her own construction of her rights as a condition of her remaining in the present Union. The next day was devoted to perfecting the organization. The Commissioners from South Carolina, Mississippi, and Georgia were invited to seats in the Convention.

The object of the people of Virginia, as expressed by their Legislature, and by their vote at the election for delegates to the Convention, was, if it could be done, honorably "to restore the Union of the States, and preserve that Union for all time to come."

On the 16th numerous resolutions were offered, which, while expressing a hope that the difficulties then existing might be reconciled and the Union perpetuated, yet denounced the idea of coercing in any way the seceding States.

Mr. Wise, of Princess Anne, reiterated his policy of fighting in the Union, and counselled speedy action.

Mr. Moore, of Rockingham, opposed haste. He would not be driven by the North, nor dragged by the cotton States, who had acted without consulting Virginia. He was opposed to coercion; but if the seceded States choose to assault the forts, let them take the consequences.

Mr. Carlisle contended that the Government had not yet attempted to coerce the South, and when this was done the people would resist it.

Addresses were made to the Convention by the Commissioners from other States who were present. Mr. Preston, from South Carolina, in his remarks, said that the Union could never be reconstructed "unless power should unfix the economy of good. No sanctity of human touch could reunite the people of the North and South."

Mr. Hall introduced resolutions declaring that Virginia had a legal right to secede; that the mere election of Mr. Lincoln was not just ground for secession; but, since a portion of the South had seceded, leaving the Border States greatly in a minority in Congress, Virginia should demand additional guarantees and proper amendments to the Constitution; that she should present an ultimatum to the Northern States, and fix a time beyond which she would not wait; and, if she failed in these, Virginia should take the proper steps to secure her just rights out of the Union.

On the 20th of February, numerous resolutions were offered and referred. They generally expressed an attachment to the Union and the desire for an equitable settlement, but denounced coercion, and declared a purpose to resist it. Others maintained that the union of the South was the safety of the South, and that each State should speedily resume the powers delegated to the General Government. A resolution was offered to raise a committee

to inquire whether any movement of arms or men had been made by the General Government towards strengthening any fort or arsenal in or bordering on Virginia, indicating preparations for an attack or coercion. It was laid on the table without further action, but taken up the next day and adopted. The report of the committee on the election of members stated that all the counties except sixteen had sent in returns thus far, and the majority for referring the action of the Convention to the people was 52,857.

On the 28th of February, Mr. Morton made a speech in favor of immediate secession, and denouncing the result of the Peace Conference as a failure.

On the 1st of March, resolutions were offered and referred that an ordinance should be passed submitting to the voters of the State the question whether Virginia shall remain with the North, or secede and go with the South; also, that Virginia should use her best efforts to procure a vote in all the States on the question of Union on the basis of the Peace Conference propositions or disunion, and that she would cooperate with the States agreeing with her in the result of the vote.

Mr. Baylor endorsed the Peace Conference propositions, and opposed the right of secession, as well as the right of coercion.

Mr. Turner said he meant to exert all his efforts to obtain an adjustment, but if they failed, Virginia ought to unite with the South.

Mr. Goode, of Mecklenburg, denounced the Peace Conference.

Mr. Goode, of Bedford, introduced the following resolution:

Whereas the powers delegated by Virginia to the Federal Government have been perverted to her injury and oppression; and whereas the moderate and reasonable demands known as the Crittenden propositions, with the essential modifications presented by the General Assembly as a final effort to restore the integrity of the Union, have been deliberately rejected by the Northern confederates; therefore

Resolved, That every consideration of duty, interest, honor, and patriotism requires that an ordinance be adopted by the Convention and submitted to the people, by which Virginia will resume all the powers delegated to the Federal Government, and declare her connection with that Government dissolved.

The resolution was referred.

Mr. Fisher presented resolutions suggesting that the General Government should early negotiate with the Confederate States for the transfer of Forts Sumter and Pickens to said Confederacy, and for an equitable division of the public property and obligations. These were also referred.

The Inaugural Address of President Lincoln created much excitement among the members of the Convention and others. A resolution instructing the Committee on Federal Relations to report a plan for a Border State Convention was offered on the 5th of March, to which a substitute was moved to instruct the committee, in view of the coercive policy of President Lincoln, to report an ordinance for Virginia to se-

cede and declare herself free from future alliance with the United States, &c., &c. To this an amendment was offered, instructing the committee to report in effect that,

Whereas it is plain that it is Mr. Lincoln's purpose to plunge the country into a civil war by a coercive policy which Virginia will resist; therefore

Resolved, That the Legislature make the needful appropriation of means, and provide the necessary forces to resist and repel every attempt of the Federal authorities to "hold, occupy, and possess" the property and places claimed by the United States in any of the seceded States, or those that may withdraw, or collect duties on imports in the same.

On the other hand, resolutions were offered opposing coercive measures for the collection of the revenue, &c., declaring that Virginia would repel such attempts, &c.; and though, while Virginia remained a member of the Union, she would assume no hostile attitude to the General Government, she would prepare to repel any assaults made upon her. All the members of the Convention appeared to be opposed to coercion. The committee appointed to examine into the subject reported that, in their opinion, there had been no movement of armed men towards the Virginia forts by the General Government, indicating any attempt at attack or coercion.

On the 7th of March, Mr. Carlisle made a speech against the resolution instructing the Committee on Federal Relations to make a report pledging the State to resist Mr. Lincoln's policy of coercion, and requesting the Legislature to make the needful preparations for that purpose. He denounced it as a treasonable measure; upheld the right of the Government to collect the revenues in the seceded States; was agreeably disappointed in the pacific tone of Mr. Lincoln's inaugural; and opposed any action by which Virginia should place herself in a hostile attitude to the General Government. He believed in the power of the people yet to restore the Union.

On the next day Mr. Wysor offered an ordinance dissolving the political connection between Virginia and the other States of the Union, and for establishing a separate independence. The former part was referred. Mr. Brent, in a Union speech, opposed the policy of secession, but at the same time opposed coercion. He thought Mr. Lincoln's inaugural unsusceptible of a warlike construction, but disagreed with many of its doctrines.

The Committee on Federal Relations, to whom the principal business of the Convention had been referred, and whose action would decide, in a measure, the character of all their proceedings, submitted several reports on the 10th. The report of the majority consisted of a series of resolutions, which were summarily as follows:

The first reaffirmed the doctrine of State rights.

The second declared any interference of slavery by the Federal or other authorities, or by the people, contrary to the Constitution, offensive, and dangerous.

The third condemned the formation of geographical or sectional parties.

The fourth demanded a fair partition of the Territories, and equal protection therein.

The fifth declared that in a time of profound peace with foreign nations, as now existed, and when no symptoms of domestic insurrection appeared, it was impolitic and offensive to accumulate within the limits of a State interested in irritating pending questions of the deepest importance an unusual amount of troops, munitions of war, &c.

The sixth indulged in the hope of a restoration of union and fraternal feelings.

The seventh recommended a repeal of unfriendly and unconstitutional legislation, and proper amendments to the Constitution.

The eighth conceded the right of States to withdraw from the Union for just causes.

The ninth alluded to the position of the Federal Government as disclaiming the power, under the Constitution, to recognize a withdrawal.

The tenth, without expressing an opinion on the question of power, desired to confer upon the General Government the powers necessary to deal peaceably with the questions involved, and, if necessary, to recognize separate and combined seceding States, to make treaties, and to pass any laws such separation may make necessary.

The eleventh recommended the people of the sister States to respond, at their earliest convenience, to the foregoing positions, and to the proposed amendments to the Constitution, and to a consultation intended to be held afterwards; and in the event that Virginia failed to obtain satisfactory responses from the non-slaveholding States, she would feel compelled to resume her sovereign powers and throw herself upon her reserved rights.

The twelfth made it an indispensable condition that a pacific policy be adopted towards the seceded States, and that no attempt be made to reinforce or recapture the forts, or exact payment of imposts upon commerce, or any measure calculated to provoke hostilities.

The thirteenth affirmed that Virginia would regard any hostile action on either side as hurtful and unfriendly, and as leaving Virginia free to determine as to her future policy.

The fourteenth recommended a conference of the Border States at Frankfort, Kentucky, on the last Monday of May.

The foregoing report did not fully meet the approval of the Union members, because it apparently recognized the right of secession.

Mr. Wise submitted the minority report, giving a list of demands, and requesting the States to give their answers by October, and in the mean time that every step should be taken to preserve the peace; that neither the General Government nor the seceded States should commence hostilities; and that the Government should retain only a sufficient number of men in the forts, &c., to preserve and guard the public property therein.

Mr. Harvie submitted a minority report, with three signatures, for the passage of an ordinance of secession.

Mr. Barbour, of Culpepper, submitted another minority report, to the effect that the Government must immediately adopt measures to afford the people of the slaveholding States full constitutional assurances of their safety in continuing a further association with them under the common Government; also, recommending the appointment of commissioners to Montgomery to confer with the Confederate authorities.

Mr. Baldwin, from the minority of the committee, submitted a report, endorsing the Peace Conference propositions; recommending a Border State convention at Frankfort, Kentucky; opposing coercion; favoring the removal of all causes of the present complaints, and charging the present condition of affairs on the politicians.

Mr. Wickham presented another minority report, opposing coercion; proposing a Border State conference at Frankfort; and favoring the peace propositions as a fair and honorable adjustment.

A resolution, tendering the thanks of the people of Virginia to Senator J. J. Crittenden, of Kentucky, "for his recent able, zealous, and patriotic efforts in the Senate of the United States to bring about a just and honorable adjustment of our national difficulties," passed by a vote of ayes 107, noes 16. Mr. Tyler, who had returned from the Peace Conference, was opposed to the adoption of the peace propositions. He desired Virginia to put forth an ultimatum, demanding full and ample security as the only condition of remaining in the Union. He thought such security, if guaranteed, might ultimately bring back the cotton States. Virginia could not exist without them.

On the 25th the Convention refused, ayes 4, noes 116, to strike out the report of the majority of the Committee on Federal Relations and substitute the report of the Peace Conference.

On the 28th the first and second resolutions of the report, were adopted.

Mr. Hall, of Wetzel, offered the Constitution of the Confederate States as a substitute for the report of the Committee on Federal Relations. The majority accepted the opportunity to make a test vote on the proposition, and the minority (the friends of secession) vainly sought to withdraw it. A vote, after considerable parliamentary manœuvring, was forced, and the proposition substituting the Constitution was rejected—yeas none, nays 78.

On the 4th of April the Convention proceeded to vote on the other resolutions reported by the Committee on Federal Relations.

The third resolution, which opposed the formation of geographical or sectional parties in respect to Federal politics, was adopted.

The fourth resolution was taken up, and, on motion, was amended by inserting the words "the several States," in lieu of the words "the

United States," making it declare that the Territories constitute a trust fund, to be administered for the common benefit of the people of the several States, &c. This was agreed to—yeas 68, nays 66. Mr. Morton moved to amend by striking out the last sentence, namely, "If equal admission of slave and free labor into any Territory excites an unfriendly conflict between the two systems, a fair partition of the Territories ought to be made, and each system protected within the limits assigned to it by laws necessary to its proper development." This was lost—yeas 38, nays 91. The fourth resolution, as amended, was adopted.

The fifth resolution coming up, Mr. Flournoy moved to amend it by striking out the words "and to aid in suppressing domestic insurrection," thus making the declaration simply that the legitimate use of the forts, &c., is to protect the country against a foreign force. This was agreed to—68 against 61.

The sixth resolution being under consideration, Mr. Harvie moved to strike out the whole of it, and to insert in lieu thereof the following:

Resolved, That an ordinance of secession, resuming the powers delegated by Virginia, and providing for submitting the same to the qualified voters of the commonwealth for adoption or rejection at the polls in the Spring elections in May next, should be adopted by this Convention.

Several motions that the Convention adjourn were voted down. Mr. Harvie's substitute was then rejected—yeas 45, nays 89. It was not strictly a test vote.

On the sixth resolution Mr. Wise moved to strike out the whole, and insert a substitute contemplating resistance to the wrongs of the South, indulging a desire for an adjustment, and that Virginia should not offer or adopt any terms of adjustment which ought not to be acceptable to the seceded States, and restore them to the Union. The Convention, by a vote of 57 ayes and 83 noes, refused this substitute. Mr. Wise then moved to amend by adding the last clause of the foregoing substitute, which was rejected—64 to 74. The resolution was then adopted as amended. The seventh, with slight amendments, was also adopted.

The Convention then referred to the eighth resolution, recognizing the right of secession for just causes. Mr. Carlisle moved to strike it out, and insert a substitute embodying President Madison's language, justifying secession only in the event of the failure of every constitutional resort. The Convention rejected the motion—yeas 22, nays 114. Other amendments were proposed and rejected. The eighth resolution was then adopted, after striking out the words "they concede."

On the ninth resolution Mr. Bouldin moved to strike out the whole, and insert a substitute embodying a declaration that the independence of the seceded States ought to be acknowledged without further delay, and such laws passed as a separation may make proper. The amend-

ment was rejected—yeas 68, nays 71. The resolution was adopted—yeas 92, nays 37.

Mr. Preston offered a preamble and resolution, which were modified, on the suggestion of Mr. Baldwin, and accepted by Mr. Preston, as follows:

Whereas, in the opinion of this Convention, the uncertainty which prevails in the public mind as to the policy the Government intends to pursue towards the seceded States is extremely injurious to the commercial and industrial interests of the country, tends to keep up an excitement which is unfavorable to an adjustment of the pending difficulties, and threatens a disturbance of the public peace; therefore

Be it resolved, That a committee of three delegates be appointed to wait on the President of the United States, and respectfully ask him to communicate to this Convention what course he intends to pursue.

Mr. Carlisle offered an amendment to include a desire to know what policy the seceded States intended to pursue towards the General Government, which was rejected, and Mr. Preston's resolution, as modified, was adopted. The Commissioners appointed under this resolution were Messrs. Wm. Ballard Preston, A. H. H. Stuart, and Geo. W. Randolph, who waited upon the President. For his reply see UNITED STATES. The tenth resolution was adopted by a vote of 120 against 20.

The eleventh resolution was then taken up, when Mr. Wickham offered an amendment, expressing confidence in the justice of the people of the other States; appealing to them for a satisfactory adjustment by the adoption of the amendments to the Constitution hereto appended; and declaring that a definite refusal or neglect of the non-slaveholding States to accede to such amendments should and would result in a total and final disruption of the Union.

Mr. Goode offered an amendment, declaring further that in such event Virginia will feel compelled to resume her powers and throw herself upon her reserved rights. This was rejected—54 against 70, and Mr. Wickham's amendment was also lost—57 against 68.

Mr. Tarr moved to strike out the last sentence in the eleventh resolution, declaring that the State of Virginia will resume her powers in the event of a failure to receive satisfactory responses. Rejected—54 against 70.

On the 10th, the Convention considered the other resolutions. The twelfth having been taken up, Mr. Carlisle moved to strike out that portion making it an indispensable condition that no attempt shall be made to reënfence or recapture the forts, &c., This was rejected—17 against 104. Mr. Wise moved to add a clause declaring that all forts, &c., in the limits of seceded States ought to be evacuated for purposes of pacification. Lost—60 against 67. The resolution was adopted.

On the 13th the debate turned exclusively upon the surrender of Fort Sumter. Messrs. Carlisle and Early deprecated the action of South Carolina in firing upon the fort, and expressed devotion to the flag of their country. Others applauded the gallantry of South Carolina and maintained that whatever the Con-

vention might do, the people would take Virginia out of the Union.

A communication was received from the Governor, submitting a dispatch from Gov. Pickens, giving an account of Friday's bombardment. He said: "There was not a man at our batteries hurt. The fort fired furiously upon us. Our iron battery did great damage to the south wall of the fort; the shells fell freely into the fort, and the effect is supposed to be serious, as they are not firing this morning. Our 'Enfield' battery dismounted three of Anderson's largest columbiads. We will take the fort, and can sink the ships if they attempt to pass the channel. If they land elsewhere, we can whip them. We have now 7,000 of the best troops in the world, and a reserve of 10,000 on the routes to the harbor. The war has commenced, and we will triumph or perish. Please let me know what your State intends to do."

Governor Letcher replied: "The Convention will determine."

On the 15th the reply of the President was presented by the Commissioners. A resolution was offered to go into secret session to consider this report. A debate followed. The proclamation of President Lincoln, calling for seventy-five thousand men, constituted the principal theme. Messrs. Scott and Preston (Unionists) declared that if the President meant subjugation of the South, Virginia had but one course to pursue. A difference of opinion existed as to whether it would be best to secede immediately or await the coöperation of the Border States, and it was believed the alternative propositions would be submitted to the people. Some delegates doubted the authenticity of the proclamation, and, in deference to their wishes, the Convention adjourned.

The reply of the Governor to the requisition of the Secretary of War was made on the 16th, as follows:

EXECUTIVE DEPARTMENT,
RICHMOND, (Va.,) April 16, 1861. }

Hon. Simon Cameron, Secretary of War.

SIR: I received your telegram of the 15th, the genuineness of which I doubted. Since that time I have received your communication, mailed the same day, in which I am requested to detach from the militia of the State of Virginia "the quota designated in a table," which you append, "to serve as infantry or riflemen for the period of three months, unless sooner discharged."

In reply to this communication, I have only to say that the militia of Virginia will not be furnished to the powers at Washington for any such use or purpose as they have in view. Your object is to subjugate the Southern States, and a requisition made upon me for such an object—an object, in my judgment, not within the purview of the Constitution or the act of 1795—will not be complied with. You have chosen to inaugurate civil war, and, having done so, we will meet it in a spirit as determined as the administration has exhibited towards the South. Respectfully,

JOHN LETCHER.

On the 16th the Convention assembled in secret session. This was immediately after the surrender of Fort Sumter.

On the 17th an ordinance of secession was passed by the Convention. The vote was 88 in

its favor and 55 against it. Only 91 delegates had signed it at the expiration of the first month after its passage. It is stated by a member that when the Convention assembled, a clear majority was for the Union, at which a mob excitement existed in Richmond. It was then calculated that if ten Union men could be kept away, there would be a majority for secession. Accordingly, ten members were waited upon and informed that they were given the choice of doing one of three things: either to vote for the secession ordinance, to absent themselves, or to be hanged. Resistance was found to be useless, and the ten yielded and were absent. The report of the vote, however, shows that at the final moment the majority in favor of the ordinance was large.

The following is the Ordinance of Secession :

An Ordinance to repeal the ratification of the Constitution of the United States of America, by the State of Virginia, and to resume all the rights and powers granted under said Constitution.

The people of Virginia, in the ratification of the Constitution of the United States of America, adopted by them in Convention, on the 25th day of June, in the year of our Lord one thousand seven hundred and eighty-eight, having declared that the powers granted under the said Constitution were derived from the people of the United States, and might be resumed whensoever the same should be perverted to their injury and oppression, and the Federal Government having perverted said powers, not only to the injury of the people of Virginia, but to the oppression of the Southern slaveholding States;

Now, therefore, we, the people of Virginia, do declare and ordain, that the Ordinance adopted by the people of this State in Convention on the twenty-fifth day of June, in the year of our Lord one thousand seven hundred and eighty-eight, whereby the Constitution of the United States of America was ratified, and all acts of the General Assembly of this State ratifying or adopting amendments to said Constitution, are hereby repealed and abrogated; that the union between the State of Virginia and the other States under the Constitution aforesaid is hereby dissolved, and that the State of Virginia is in the full possession and exercise of all the rights of sovereignty which belong and appertain to a free and independent State. And they do further declare that said Constitution of the United States of America is no longer binding on any of the citizens of this State.

This Ordinance shall take effect and be an act of this day, when ratified by a majority of the votes of the people of this State, cast at a poll to be taken thereon, on the fourth Thursday in May next, in pursuance of a schedule hereafter to be enacted.

Done in Convention in the city of Richmond, on the seventeenth day of April, in the year of our Lord one thousand eight hundred and sixty-one, and in the eighty-fifth year of the commonwealth of Virginia.

A true copy,
JNO. L. EUBANK,
Secretary of Convention.

At the same time the Convention passed an ordinance requiring the Governor to call out as many volunteers as might be necessary to repel invasion, and to protect the citizens of the State. The following is the Governor's Proclamation :

Whereas seven of the States formerly composing a part of the United States have, by authority of their people, solemnly resumed the powers granted by them to the United States, and have framed a Constitution and organized a Government for themselves, to which the

people of those States are yielding willing obedience, and have so notified the President of the United States by all the formalities incident to such action, and thereby become to the United States a separate, independent, and foreign Power; and whereas the Constitution of the United States has invested Congress with the sole power "to declare war," and until such declaration is made the President has no authority to call for an extraordinary force to wage offensive war against any foreign Power; and whereas on the 15th instant the President of the United States, in plain violation of the Constitution, issued a proclamation calling for a force of seventy-five thousand men, to cause the laws of the United States to be duly executed over a people who are no longer a part of the Union, and in said proclamation threatens to exert this unusual force to compel obedience to his mandates; and whereas the General Assembly of Virginia, by a majority approaching to entire unanimity, declared at its last session that the State of Virginia would consider such an exertion of force as a virtual declaration of war, to be resisted by all the power at the command of Virginia; and subsequently, the Convention now in session, representing the sovereignty of this State, has re-affirmed in substance the same policy, with almost equal unanimity; and whereas the State of Virginia deeply sympathizes with the Southern States in the wrongs they have suffered and in the position they have assumed, and having made earnest efforts peaceably to compose the differences which have severed the Union, and having failed in that attempt through this unwarranted act on the part of the President; and it is believed that the influences which operate to produce this proclamation against the Seceded States will be brought to bear upon this Commonwealth if she should exercise her undoubted rights to resume the powers granted by her people, and it is due to the honor of Virginia that an improper exercise of force against her people should be repelled:

Therefore I, John Letcher, Governor of the Commonwealth of Virginia, have thought proper to order all armed volunteer regiments or companies within this State forthwith to hold themselves in readiness for immediate orders, and upon the reception of this proclamation to report to the Adjutant-General of the State their organization and numbers, and prepare themselves for efficient service. Such companies as are not armed and equipped will report that fact that they may be properly supplied.

In witness whereof, I have hereunto set my hand, and caused the seal of the Commonwealth to be affixed, this 17th day of April, 1861, and in the eighty-fifth year of the Commonwealth.
JOHN LETCHER.

During the next day, it was announced from the hall of the Convention, that an ordinance of secession had been passed, to take effect as an act of that day, should the same be ratified by the people on a vote to be taken thereon on the fourth Thursday of May. The intelligence spread throughout Richmond and produced immense excitement. Loud and prolonged cheering proceeded from the assembled crowds. In a very short time a rush was made by a party of citizens to the custom-house, for the purpose of signaling the act of secession in a more demonstrative manner. The gilt letter sign, "United States Court," over the portico was speedily displaced and taken down, and the occupants of the building notified that the United States jurisdiction over the property had ceased. The next act was to raise a Southern Confederacy flag, with eight stars, over the capitol, in which the Convention held its sessions.

The Confederate flag was displayed on the same day from the custom-house, hotels, and private residences, eight stars being generally the number on the flag—one having been added for Virginia. The custom-house was also taken out of the hands of the United States officials, and placed under a guard of State troops. The steamships Yorktown and Jamestown (belonging to the Virginia and New York Steamship Company) were both seized and put in charge of Virginia State troops. Many other seizures were also made.

The Traders' Bank at Richmond tendered the State a loan of \$50,000.

A proclamation was issued by the Governor, prohibiting the exportation of flour, grain, and provisions from Virginia, and another was issued ordering all private vessels and property recently seized or detained, with the exception of the steamers Jamestown and Yorktown, to be released and delivered up to their masters or owners. For this purpose proper officers of the State were assigned to each of the rivers Rappahannock, York, Potomac, and James, with orders to release such vessels and property, and give certificates for damages incurred by their seizure or detention.

The supply of troops, under the call of the Governor authorized by the State Convention, was so great that further orders were issued directing no more troops to proceed to Richmond until called for. About 6,000 had assembled there, and 4,000 at Harper's Ferry.

An intelligent citizen of Richmond thus describes the military spirit existing there on the 25th of April: "Our beautiful city presents the appearance of an armed camp. Where all these soldiers come from, in such a state of preparation, I cannot imagine. Every train pours in its multitude of volunteers, but I am not as much surprised at the number as at the apparent discipline of the country companies. Some of them really march like regulars, and with their stalwart forms, dark, fierce countenances, and the red-coated negro fifers and drummers in front, present quite a picturesque as well as most warlike aspect.

"General R. E. Lee, late of the United States Army, has been appointed by the Governor to the chief command of the Virginia forces. Colonel Walter Gwynn, formerly of the United States Army, received a commission of Major-General.

"Yesterday evening, in addition to the large force pouring in from all parts of the country, five hundred troops arrived from South Carolina, under command of Brigadier-General M. D. Bonham. About the same number from the same State will arrive to-day.

"The Cadets of the Virginia Military Institute, under the Superintendent and officers, are here drilling and disciplining the various companies of military who require such aid. But I can give you no idea of the military spirit of the State. Augusta County, a strong Whig Union county in Western Virginia, and Rock-

ingham, an equally strong Democratic Union county, lying side by side with Augusta, each contribute 1,500 men to the war. These are like all our volunteer companies, farmers, mechanics, professional men, the bone and sinew of the country. It was of Augusta that Washington said in the darkest hour of the Revolution that, if defeated everywhere else, he would unfurl a banner on the mountains of Augusta, and raise the prostrate form of Liberty from the dust. Amherst County, with a voting population of only 1,500, contributes 1,000 volunteers.

"But the war spirit is not confined to the men nor to the white population. The ladies are not only preparing comforts for the soldiers, but arming and practising themselves. Companies of boys, also, from ten to fourteen years of age, fully armed and well drilled, are preparing for the fray. In Petersburg 300 free negroes offered their services, either to fight under white officers, or to ditch and dig, or any kind of labor. An equal number in this city and across the river in Chesterfield have volunteered in like manner."

The lights on the Virginia shore of Chesapeake Bay were removed or extinguished, by order of the authorities of the State.

The accession of Virginia to the Southern Confederacy was announced by the Governor in the following proclamation:

Whereas the Convention of this Commonwealth has, on this, the 25th day of April, 1861, adopted an ordinance "for the adoption of the Constitution of the Provisional Government of the Confederate States of America;" and has agreed to a "Convention between the Commonwealth of Virginia and the Confederate States of America, which it is proper should be made known to the people of this Commonwealth and to the world:

Therefore, I, John Letcher, Governor of the Commonwealth of Virginia, do hereby publish and proclaim that the following are authentic copies of the Ordinance and Convention aforesaid.

Given under my hand as Governor, and under the seal of the Commonwealth at Richmond, [L. s.] this twenty-fifth of April, one thousand eight hundred and sixty-one, and in the eighty-fifth year of the Commonwealth.

JOHN LETCHER.

By the Governor.

GEO. W. MUNFORD, Secretary of the Commonwealth.

An Ordinance for the adoption of the Constitution of the Provisional Government of the Confederate States of America.

We, the delegates of the people of Virginia, in Convention assembled, solemnly impressed by the perils which surround the Commonwealth, and appealing to the Searcher of hearts for the rectitude of our intentions in assuming the grave responsibility of this act, do by this Ordinance adopt and ratify the Constitution of the Provisional Government of the Confederate States of America, ordained and established at Montgomery, Alabama, on the eighth day of February, eighteen hundred and sixty-one; provided that this Ordinance shall cease to have any legal operation or effect if the people of this Commonwealth, upon the vote directed to be taken on the Ordinance of Secession passed by this Convention, on the seventeenth day of April, eighteen hundred and sixty-one, shall reject the same. A true copy.

JNO. L. EUBANK, Secretary.

Convention between the Commonwealth of Virginia and the Confederate States of America.

The Commonwealth of Virginia, looking to a speedy union of said Commonwealth and the other slave States with the Confederate States of America, according to the provisions of the Constitution for the Provisional Government of said States, enters into the following temporary Convention and agreement with said States, for the purpose of meeting pressing exigencies affecting the common rights, interests, and safety of said Commonwealth and said Confederacy.

1st. Until the union of said Commonwealth with said Confederacy shall be perfected, and said Commonwealth shall become a member of said Confederacy, according to the Constitutions of both powers, the whole military force and military operations, offensive and defensive, of said Commonwealth, in the impending conflict with the United States, shall be under the chief control and direction of the President of said Confederate States, upon the same principles, basis, and footing as if said Commonwealth were now, and during the interval, a member of said Confederacy.

2d. The Commonwealth of Virginia will, after the consummation of the union contemplated in this Convention, and her adoption of the Constitution for a permanent Government of said Confederate States, and she shall become a member of said Confederacy under said permanent Constitution, if the same occur, turn over to said Confederate States all the public property, naval stores, and munitions of war, etc., she may then be in possession of, acquired from the United States, on the same terms and in like manner as the other States of said Confederacy have done in like cases.

3d. Whatever expenditures of money, if any, said Commonwealth of Virginia shall make before the union under the Provisional Government, as above contemplated, shall be consummated, shall be met and provided for by said Confederate States.

This Convention, entered into and agreed to in the city of Richmond, Virginia, on the twenty-fourth day of April, 1861, by Alexander H. Stephens, the duly authorized commissioner to act in the matter for the said Confederate States, and John Tyler, William Ballard Preston, Samuel McD. Moore, James P. Holcombe, James C. Bruce, and Lewis E. Harvie, parties duly authorized to act in like manner for said Commonwealth of Virginia; the whole subject to the approval and ratification of the proper authorities of both Governments respectively.

In testimony whereof the parties aforesaid have hereto set their hands and seals, the day and year aforesaid and at the place aforesaid, in duplicate originals.

[Seal]

ALEXANDER H. STEPHENS,

Commissioner for Confederate States.

JOHN TYLER, WM. BALLARD PRESTON, S.

MCD. MOORE, JAMES P. HOLCOMBE, JAMES

[Seal]

C. BRUCE, LEWIS E. HARVIE, Commissioners for Virginia.

Approved and ratified by the Convention of Virginia, on the 25th day of April, 1861.

JOHN JANNEY, President.

JNO. L. EUBANK, Secretary.

In Western Virginia, on the 23d of April, at a public meeting held in Clarksburg, Harrison County, eleven delegates were appointed to meet delegates from other north-western counties at Wheeling on May 13th, to determine what course should be pursued in the present emergency. This movement resulted in the separation of Western from Eastern Virginia.

The State Convention appointed delegates to the Confederate Congress, which assembled on the 29th of April. A resolution was passed, inviting the Congress to make Richmond the seat of government for the Southern Confederacy. The banks were authorized to sus-

pend specie payments. An ordinance establishing a navy for Virginia, and providing for enlistments in the State army was passed. The Convention further ordered a poll to be held in the camps of Virginia Volunteers on the Ordinance of Secession. It also dismissed all militia officers, from generals to captains, thus removing a mass of incapable, and opening their places to competent men. Thus the ancient commonwealth of Virginia bared her breast as the shield and her arm as the defence of the Southern Confederacy. Alabama, Georgia, Mississippi, Louisiana, and South Carolina now hurried forward troops to Virginia, and before the year expired, nearly a million of soldiers from North and South were encamped within her borders.

The State Convention adjourned from the first of May to the eleventh of June. The injunction of secrecy was still retained as to their proceedings relative to the secession ordinance. The acts of violence which had been committed thus far, such as the march upon Harper's Ferry, and the sinking of vessels at the mouth of the Elizabeth River, were done in opposition to the authority of the State. The Governor refused to consent that troops should be ordered to the Ferry. It was his purpose to preserve the State in an uncommitted position until after the vote on the Ordinance of Secession. The seizure at Harper's Ferry was, however, afterwards approved by him, and his thanks given to the party who made it. He also issued his proclamation calling out troops, in accordance with the requisition of the Confederate Government. Whatever might have been his previous purposes, he seems now to have had only one object in view, which was, to secure Virginia to the Southern Confederacy. The vote on the Ordinance of Secession in the Convention was not published by them. It was rumored to have been—ayes 88, nays 55. Many of the negatives were subsequently induced to acquiesce with the majority.

In Western Virginia, the attachment to the Union was so strong, and the opposition to secession so great, that this state of feeling soon manifested itself in public meetings in different townships of several counties; the result was, that delegates were appointed in these counties to meet in convention at Wheeling. This Convention assembled on the 13th of May. Delegates were present from twenty-five counties. The Union flag floated from all the principal buildings, and was raised with much ceremony over the custom-house. The topic discussed in the Convention was the division of the State of Virginia.

Subsequently, the Convention adopted resolutions, condemning the Ordinance of Secession and annexation to the Southern Confederacy, as being destructive of the rights and interests, social and political, of Western Virginia, and providing for holding a Convention, to be composed of all the counties in the State favorable to the division thereof, on the 11th day of June,

provided the Ordinance of Secession was ratified against the vote of Western Virginia. The Convention then adjourned. (*See VIRGINIA, WESTERN.*)

Great activity took place in Eastern and Southwestern Virginia in the organization and equipment of troops. It was claimed as early as the 20th of May, that the whole number volunteered was 85,000, and that 48,000 of these were under arms, and distributed at Richmond, Norfolk, Petersburg, Lynchburg, Fredericksburg, Alexandria, Staunton, and Harper's Ferry. These points were nearly all connected by railroad. There were said to be, in addition, about 8,000 from other States. This assembling of troops in such positions that a rapid concentration of forces could be easily effected at any moment, doubtless caused the authorities at Washington to make an advance into Virginia and occupy the heights opposite that city and Alexandria. This occupation was commenced on the night of the 23d of May. In consequence, Northeastern Virginia was occupied by hostile armies during the remainder of this year. At its close a great battle appeared more nearly impending than ever before. The advance of Southern troops upon Washington was stayed by intrenchments on the south side of the Potomac, defended by at least two hundred thousand men from the North. The advance from the North upon Richmond was stopped by an equal number of men intrenched at Manassas Junction.

The advance of Ohio and Indiana and Western Virginia troops, under Gen. McClellan, through Western Virginia towards the Potomac was among the earliest military movements. The sympathy of the inhabitants was strongly on the side of the Union, and the State troops, under the command of officers in the Confederate service, were repulsed and driven out. It was in the early period of these operations that the Governor of Virginia addressed the following letter to a commandant of the State troops.

RICHMOND, VA., May 25, 1861.

DEAR SIR: When you get matters in proper condition at Grafton, take the train some night, run up to Wheeling, and seize and carry away the arms recently sent to that place by Cameron, the United States Secretary of War, and use them in arming such men as may rally to your camp. Recover the State arms also recently seized by the malcontents at Kingwood.

It is advisable to cut off telegraphic communication between Wheeling and Washington, so that the disaffected at the former place cannot communicate with their allies at head-quarters. Establish a perfect control over the telegraph, (if kept up,) so that no despatch can pass without your knowledge and inspection before it is sent.

If troops from Ohio and Pennsylvania shall be attempted to be passed on the railroad, do not hesitate to obstruct their passage by all means in your power, even to the destruction of the road and bridges.

Having confidence in your discretion, I am sure you will manage all things wisely and well.

Yours truly, JOHN LETCHER.
Col. PORTERFIELD, Grafton, Va.

The popular vote on the Ordinance of separation was almost unanimously against it in

Western Virginia, while with equal unanimity Eastern Virginia voted in favor of it. It was carried by a large majority of the votes cast. The vote in the city of Richmond was 2,400 in favor to 24 against it, being less than half the vote (5,400) polled at the presidential election in November previous.

As the troops arrived from the South, Richmond became the general rendezvous whence, as soon as inspected and properly outfitted for active duty, they were distributed wherever most needed. It was estimated that there were, by the 5th of June, in active service in Virginia, about fifty thousand Confederate troops, namely: about eight thousand at or near Manassas Junction; about five thousand at Fredericksburg and Acquia Creek; about twelve thousand at Norfolk and its neighborhood; about five thousand at Yorktown and Williamsburg; and about fourteen thousand at Harper's Ferry. Of this aggregate, nearly all, exclusive of the force at Harper's Ferry, were so posted that they could be concentrated by railroad at any point between Norfolk and Alexandria within twenty-four hours. About forty thousand, it was calculated at Richmond, could be thrown almost at once upon the Union troops whenever they might present themselves along the line. Such a movement, however, had a certain degree of hazard connected with it, as any concentration by which they withdrew their troops from the seaboard, exposed them to invasion from the fleet.

On the 15th of June the State Convention again assembled. A resolution was offered, inquiring into the number of the members of the Convention whose seats were vacant, the causes of their absence, their attitude towards the commonwealth, and proposing the punishment of such by hanging or otherwise. Various resolutions and ordinances relative to the more efficient organization of volunteers and militia companies throughout the State; to the more speedy and efficient protection of the northwestern counties, and "to the summary chastisement of the cowards and traitors who have entered our State for purposes of subjugation," were referred to the appropriate committees. Special instructions were given to the Military Committee to report the best mode in which it became Virginia to meet the policy proclaimed by Gen. Butler, and approved by the Federal Administration, in reference to the slave property. A resolution placing the bonds of the Southern Confederacy on a par with the notes issued by the banks of Virginia, and another authorizing military commanders throughout the State to compel free negroes to labor on all works of defence, were adopted.

On the 24th, the ordinance proposing to repudiate the payment of the interest on State bonds, the property of the United States Government or any State or citizen thereof, which were owned by the same on the 23d of May, the day on which the Ordinance of Secession was ratified, was taken up.

Mr. Morton and Mr. McFarland opposed the ordinance. They were of the opinion that such a course would place Virginia in a suspicious and unenviable position before the enlightened world, and maintained that plighted faith should never be broken, however strong the temptation might be. In the course of Mr. McFarland's remarks he said that he was not aware of a single instance in which any such course had been pursued in the North towards the South, but, on the contrary, the North had thus far liquidated their obligations with all propriety and promptness.

Mr. Ambler asked the gentleman whether he did not know that the usurpation at Washington had declared money to be contraband of war, and arrested it in its transmission from the North to the South?

Mr. McFarland replied that, as far as his information extended, the usurpation at Washington may have expressed opinions of that character, but he was not aware of any official act to that effect. He continued to urge the policy of retaining their ancient prestige, and coming up manfully to their obligations, alluding with especial emphasis to the power in the hands of the North, where many of their citizens owned valuable property.

Mr. Ambler made a reply to the argument of Mr. McFarland, contending that it was not only just, but proper, for Virginia to keep out of the hands of her enemies the means of prosecuting this war upon her. He referred to legal authorities and to history in support of his position.

Mr. Holcombe made a brief reply, in which he maintained that the ordinance proposed was inconsistent with public and constitutional law, and that the precedents referred to by the gentleman related to individual debts, and not to debts in which the honor of a State was concerned.

Mr. McFarland was about to make some additional remarks, when he gave way to a motion to lay the ordinance on the table for the present, and the Convention then adjourned. On a subsequent day the act was passed—ayes 58, nays 37, prohibiting the payment of interest as above stated. The interest on all other bonds, except those payable in London, was made payable in currency or State notes at the State treasury.

The following delegates were chosen by the Convention to represent the State in the Southern Congress, at its adjourned session in Richmond, on the 20th of July: R. M. T. Hunter, John Tyler, W. H. McFarland, Roger A. Pryor, Thomas S. B. Cooke, W. C. Rives, Robert E. Scott, James M. Mason, John W. Brockenbaugh, Charles W. Russell, Robert Johnson, Walter Staples, Walter Preston. For the State at large, James A. Seddon, and W. B. Preston.

The acceptance or holding of office under the Federal Government by any citizen of Virginia, after the 1st day of August, was declared to be evidence of treason to the State. The privileged question, regarding the expulsion

of certain members of the Convention, was called up, and the following named members, mostly from the western section of the State, were expelled by nearly a unanimous vote in every instance: Wm. G. Brown, of Preston County; James Burley, of Marshall; John S. Burdett, of Taylor; John S. Carlisle, of Harrison; Ephraim B. Hall, of Marion; Chester D. Hubbard, of Ohio; Gen. John J. Jackson, of Wood; James E. McGrew, of Preston; George McPorter, of Hancock; Chapman J. Steuart, of Doddridge; Campbell Tarr, of Brooke; and Waitman I. Willey, of Monongalia.

A proclamation was issued by the Governor, stating the popular vote on the question of ratifying the secession ordinance to be: for ratification, 125,950; for rejection, 20,373; majority, 105,577. He therefore proclaimed that "The Constitution of the Provisional Government of the Confederate States of America, ordained and established at Montgomery, Alabama, on the 18th day of February, 1861, was now in full force in the Commonwealth, and must be respected and obeyed."

The Governor stated that the returns from some of the counties had not been received, "in consequence of the presence of a hostile force in the northwestern, and of the blockade in the eastern portions of the State." Among this number were thirty-four counties in Western Virginia. The average majority in these counties was as four to one against secession. The total vote of the State at the presidential election was 167,223.

A requisition from the Confederate authorities was made upon the Governor at this time, for calling into immediate service the militia of the counties north of James River and east of the Blue Ridge, as well as all the militia in the valley of the State, north of James River. The necessary proclamation was issued on the 16th. By another proclamation of same date, the following persons were exempted from the call: operatives employed in the manufacture of arms, munitions of war, and woollens; millers, railroad employees, farm overseers, bank officers, city police officers, and telegraph agents. By another proclamation he prohibited the bills or notes of the Merchants' and Mechanics' Bank of Wheeling, and the Northwestern Bank, with the offices of discount and deposit of each, except the branch of the Northwestern Bank at Jeffersonville, from being received in payment of any money due to the State. The reason was that the banks named had "given aid to the enemy."

The following note, addressed to the commandant of the Loudoun County militia, describes the measures to which the Confederate troops were compelled to resort to obtain supplies:

HEAD-QUARTERS, ARMY OF POTOMAC.
MANASSAS, July 23, 1861.

COLONEL: Mr. George Johnson, special agent of the Quartermaster's Department, is sent to Loudoun County for the purpose of collecting wagons, teams, and grain forage for the use of this army. It is expected that he will have no difficulties whatsoever;

that the loyal citizens of your rich county will be glad to have an opportunity thus to furnish supplies for our army, which has so gloriously maintained the independence and sovereignty of Virginia, and driven back in ignominious flight the invaders of her soil. But, at the same time, all classes of your citizens must contribute their quota; therefore, if necessary, it is expected that constraint must be employed with all who are forgetful of their obligations.

By order of Gen. Beauregard.

Respectfully, Colonel, your obedient servant,

THOS. JORDAN, A. A. Adj't-General.

To Col. A. T. M. Rust,

Commandant Militia Loudon County.

A flood of paper money was now issued throughout the seceded portion of the State. Every bank, every town and village corporation, even the State itself, and private bankers, deluged the State with currency in notes from five cents to one dollar. Gold and silver were eagerly bought at eight per cent. premium for these notes, and carefully hoarded away. In North and South Carolina these notes were often printed on coarse brown paper, without any pretensions to a bankable appearance. Such was the amount of this species of currency thrown upon the community in Eastern Virginia, that alarm was excited among the people. In Lynchburg the notes of numberless defunct Southern banks were long imposed on the ignorant and unsuspecting; and finally, individual notes of denominations of ten, twenty, and twenty-five cents made their appearance. This "rag currency" passed off readily with the ignorant, and soldiers who were strangers.

The entire military strength of Virginia was now required in the field. In some counties, in which the militia refused to turn out, force was used, and if this was ineffectual, orders were given to treat those who refused as deserters, or alien enemies. All between the ages of eighteen and forty-five were required to enlist, and not such only as a draft would call into the field. The extreme measures often used were proof of a degree of desperateness and urgency hardly to be believed.

For this struggle, so suddenly commenced, Virginia had for some time been making such preparations as her means enabled her, and although she was not so well provided as the secessionists desired, still, she was better prepared than most of her Southern sisters—better, perhaps, than any one of them. For some time anterior to the secession she had been engaged in the purchase of arms of different kinds, ammunition, and other necessary articles, and in mounting artillery, in anticipation of the event which subsequently occurred. A large portion of the ammunition which was used during the year was captured at Norfolk, and the heavy guns supplied to the Southern States for coast, river, and land defence, were captured at the same time with the navy yard. All the field artillery issued belonged exclusively to the State of Virginia, and much the larger part of it had been in her possession for half a century. The small arms were all her own exclusive property, save 7,500 altered

percussion muskets, furnished by Governor Ellis, of North Carolina.

On the 30th of June, in compliance with the request of the Confederate Government, Virginia paid off her troops. The report of the paymaster-general states that at that time he had paid seventy-eight companies of cavalry, fifty-two companies of artillery, four hundred and two companies of infantry, one company of cadets and seven companies of militia, while there remained to be paid six companies of infantry and one of cavalry; making 547 companies of all arms, and comprising on June 30 41,885 men. The precise number of troops which the State had in the field near the close of the year was not known, owing to the fact that the mustering officers at Norfolk, Lynchburg, Abingdon, Staunton, Winchester, Harper's Ferry, the Potomac division, and other places had not made their returns. The number was estimated at not less than seventy thousand by Governor Letcher. There were fifty-nine regiments of infantry, and a considerable number of infantry battalions and companies not organized into regiments; also eight organized regiments of cavalry, and a number of companies attached to different commands, sufficient for three regiments. Three hundred and fifteen pieces of artillery were issued, and nearly all in service in the field, and one artillery regiment was organized. The expenditures of the State for war purposes subsequently to the 17th of April, up to the close of the year, exceeded six millions of dollars. The military operations of the year took place in Eastern and Western Virginia. (For the latter, *see VIRGINIA, WESTERN*.) The term Eastern Virginia as here used, is intended to include that portion of the State adjacent to the Potomac River, at and below Harper's Ferry, to the mouth of that river, and thence along the shore to Norfolk. Below Washington, on the Potomac, the skirmishes which took place were chiefly between Federal gunboats and batteries on the shore; the latter being placed for the purpose of stopping the passage of Federal vessels engaged in carrying supplies to Washington. The blockade thus attempted was never effective. During the months of September and October, when the number of batteries was the largest, many vessels came up to Washington, and it was seldom that one was injured. No lives were lost. In the neighborhood of Fortress Monroe, nothing of special moment occurred, except the battle at Great Bethel, after the troops were established in their positions. Newport News was occupied by a Federal force, and Yorktown by a considerable Confederate force. The latter position was the proper landing point for an army destined to attack Richmond. The occupation of Manassas by the Confederate army was intended to prevent an advance of Federal troops into Virginia, or rather to defend the territory of the State, and to threaten Washington. The flank of this force on the left was posted at Winchester, to defend the valley of

Battles and Skirmishes in Virginia, 1861.

the Shenandoah. The battle of Bull Run was the most serious conflict between the Confederate forces in this part of the State and the Federal troops. (*See BULL RUN.*) It resulted in no change in the military operations in Virginia on either side. A list of a large number of battles and skirmishes throughout the State is appended below. They occurred chiefly in Western Virginia, and in the neighborhood of the Potomac River above Washington. On two occasions a Confederate force crossed the river into the State of Maryland, and a skirmish took place at Darnestown, in which one Federal and several Confederate troops were killed. This was on the 15th of September. Previously, on the 5th of August, a small affair took place at Point of Rocks, in which seven Confederate prisoners were taken. These were the only instances of the invasion by Confederate troops of any State east of the Alleghany Mountains, which had not joined the Confederacy.

The condition of affairs in the State is thus described by the Governor of Western Virginia in his message to the Legislature of that section, near the close of the year: "I have embraced all the sources of information in my power to ascertain the truth. There seems no reason to doubt that nearly all the able-bodied men between the ages of sixteen and sixty have been forced into the Confederate army, including thousands who are at heart true to the Constitution and the Union. I need not mention that our public improvements, railroads, canals, bridges, and public buildings have been destroyed wherever the secession forces have had control of the country. Rapine and plunder have marked their path; and men, arrogating to themselves a superior civilization, derived, as they say, from the existence of negro slavery among them, have abandoned the rules of civilized warfare, and made war, like savages, a scene of indiscriminate and useless destruction. A large proportion of the slaves have been sent further South for security. All the live stock within the rebel lines have been seized for the use of their army. Farms have been stripped of horses, wagons, fencing, and timber, and the houses of the people of blankets, and even clothing—whatever, in short, that could be made useful to the soldiers. The property of men known or supposed to be true to the Union has been taken without compensation, and they regard themselves fortunate if their lives are spared. The property which is pretended to be paid for is paid for in Treasury notes of the Confederate States, or in bank notes issued on the deposit of such Treasury notes. This currency, even at Richmond, is already at a discount of not less than thirty per cent., and the papers there are seeking to maintain its credit by denouncing the penalties of death or confiscation against merchants and bankers who make any distinction between such notes and coin. Yet this circulation is really valueless. If the rebellion fails to sustain itself, the notes must go down with it; if

it succeeds from the immense amount issued and the character of the leaders, we may safely assume the repudiation of the debt as inevitable."

An amended constitution of the State was adopted during the year. It provides that the members of the Assembly shall be elected annually, and hold annual sessions. It abolishes the Board of Public Works, and provides for a new one. The district courts were abolished. The judges of the appellate and circuit courts are to be elected by the Assembly instead of an election by the people. Their term of office expires when they arrive at the age of seventy years. Clerks and attorneys for the State are to be appointed by the courts, and the attorney-general elected by the Assembly and not by the people. A right of voting is preserved to volunteers in the service. Numerous other amendments were made of local importance.

Virginia, east of the Chesapeake Bay, consists of the counties of Accomac and Northampton. It is a peninsula, having the Atlantic ocean on the east, and the bay above mentioned on the west. It was understood, near the close of the year, that a body of secessionists, who were chiefly residents, were in arms and exercising a hostile control over the inhabitants of these two counties. General Dix, then in command of that Department, with his head-quarters at Baltimore, despatched a body of troops to restore the Federal authority. At the same time he issued a proclamation, stating the objects of the expedition, which produced the happiest results. The troops as they advanced met with no opposition. The people declared their intention to submit to the authority of the United States before the arrival of the military force. On the night of November 15, a force of Confederate troops, in Accomac County, mostly drafted militia disbanded. They gave as reasons that they were satisfied with the proclamation, and they believed they could not withstand the military force. In Northampton County, the secessionists to the number of 1,800 laid down their arms, and the Union troops held peaceful possession of the entire county. The following was the proclamation of General Dix:

HEAD-QUARTERS, BALTIMORE, Nov. 13, 1861.

To the People of Accomac and Northampton Counties, Va.:

The military forces of the United States are about to enter your counties as a part of the Union. They will go among you as friends, and with the earnest hope that they may not by your own acts be compelled to become your enemies. They will invade no right of person or property. On the contrary, your laws, your institutions, your usages, will be scrupulously respected. There need be no fear that the quietude of any firesides will be disturbed, unless the disturbance is caused by yourselves. Special directions have been given not to interfere with the condition of any person held to domestic servitude; and, in order that there may be no ground for mistake or pretext for misrepresentation, commanders of regiments or corps have been instructed not to permit such persons to come within their lines.

The command of the expedition is intrusted to

Brigadier-General Henry H. Lockwood, of Delaware—a State identical in some of the distinctive features of its social organization with your own. Portions of his force come from counties in Maryland bordering on one of yours. From him and from them you may be assured of the sympathy of near neighbors, as well as friends, if you do not repel it by hostile resistance or attack.

This mission is to assert the authority of the United States, to reopen your intercourse with the loyal States, and especially with Maryland, which has just proclaimed her devotion to the Union by the most triumphant vote in her political annals; to restore to commerce its accustomed guides, by reestablishing the lights on your coast; to afford you a free export for the produce of your labor, a free ingress for the necessities and comforts of life which you require in exchange, and in a word, to put an end to the embarrassments and restrictions brought upon you by a causeless and unjustifiable rebellion.

If the calamities of intestine war which are desolating other districts of Virginia, and have already crimsoned her lands with fraternal blood, fall also upon you, it will not be the fault of the Government. It asks only that its authority may be recognized. It sends among you a force too strong to be successfully opposed—a force which cannot be resisted in any other spirit than that of wantonness and malignity. If there are any among you, who, rejecting all overtures of friendship, thus provoke retaliation and draw down upon themselves consequences which the Government is most anxious to avert, to their account must be laid the blood which may be shed, and the desolation which may be brought upon peaceful homes. On all who are thus reckless of the obligations of humanity and duty, and all who are found in arms, the severest punishment warranted by the laws of war will be visited.

To those who remain in the quiet pursuit of their domestic occupations, the public authorities assure all they can give peace, freedom from annoyance, protection from foreign and internal enemies, a guarantee of all constitutional and legal rights, and the blessings of a just and parental Government.

JOHN A. DIX,
Major-General Commanding.

The following were the wholesale prices of certain articles at Richmond, on November 20th: Bacon, hog round, 23 to 26 cts. Butter, 45 to 50 cts., very scarce. Corn meal, 80 to 85 cts. Candles, tallow, 20 cts.; Adamantine, 45 to 49 cts. Coffee, none in the market. Hay, timothy or clover, \$1.35 per hundred. Halifax herrings, \$8 to \$10, but none to be had. Pig iron, \$40 to \$45, stock small. Nails 7 to 7½ cts. Refined English iron, \$115 to \$120. Leather, 60 to 65 cts.; demand immense, stock very light. Lead 7½ to 7¾. New Orleans molasses, 52 to 65 cts. Pepper, 70 to 75 cts., very scarce. Salt, fine Liverpool, \$9.50 to \$10. Wool, washed Virginia, (common) 50 to 60 cts.; fine merino do., 50 to 60 cts. Exchange on New York in Richmond, 6 to 6½ per cent. premium; silver at 15 per cent., and gold at 20 per cent.; Confederate States bonds, (\$15,000, 000 issued,) 98 to 98½, Confederate money being rated at par.

VIRGINIA, WESTERN, is that part of the State of Virginia which refused to acquiesce in the vote by which the Ordinance of Secession was passed. The attachment to the Union was here so strong and so nearly unanimous, that the people rejected the authority at Richmond. By the aid of the United States

troops from Ohio and Indiana and the volunteers in this region, the Confederate and regular State troops were forced to retire entirely. Under this new aspect of affairs the people determined to form a political organization of their own, which should either supplant the old State organization throughout Virginia, or become separate and distinct from it.

This district of country known as Western Virginia, is bounded north by Ohio and Pennsylvania; east, by the Alleghany Mountains; south, by these mountains and South-western Virginia; and on the west by Ohio and Kentucky. In consequence of its location, the affinities of its inhabitants are more naturally with those of the free States, than with those of the slave States; the soil, climate, and productions are the same as those of Ohio and Pennsylvania adjoining. The number of slaves has always been small, and their labor afforded small remuneration, except in other pursuits than agriculture. These circumstances placed her inhabitants among the loyal people of the North, devoted to the Union, and desirous of its perpetual preservation. Their preliminary movements for a political organization of their own, (*see VIRGINIA*.) resulted in the assembling of a convention of representatives of the people at Wheeling, on the 11th of June. About forty counties were represented. The Convention was organized, and before proceeding to business, each county delegation came forward and took the following oath: "We solemnly declare that we will support the Constitution of the United States and the laws made in pursuance thereof, as the supreme law of the land, any thing in the Ordinance of the Convention that assembled in Richmond on the 18th day of February last to the contrary notwithstanding, so help us God."

On the next day a committee of thirteen, which had been previously appointed to prepare business, reported a Bill of Rights for adoption. It repudiated all allegiance to the Southern Confederacy, and vacated the offices of all who adhered to it, whether legislative, executive, or judicial. This was laid over for the day. Resolutions were also offered and adopted, declaring the intention never to submit to the Ordinance of Secession, but to maintain the rights of Virginia in the Union, and calling on all persons in arms against the United States to disband and to return to their allegiance.

On the 13th an ordinance was reported, vacating the offices held by all State officers acting in hostility to the Federal Government, and providing for the establishment of a Provisional Government and the election of officers; and further requiring all State, county, and town officers immediately to take the oath of allegiance.

On the 17th a form of Declaration of Independence was adopted unanimously, and signed by all the members present.

On the 20th, under an ordinance previously adopted, a Governor, Frank Pierpont, a Lieu-

tenant-Governor, and Council were elected. The new Governor was inaugurated on the same day. The Declaration of Independence, which had previously been adopted by the Convention, thus reviews the proceedings of the Richmond Convention:

The true purpose of all government is to promote the welfare and provide for the protection and security of the governed; and when any form or organization of government proves inadequate for or subversive of this purpose, it is the right, it is the duty of the latter to alter or abolish it. The Bill of Rights of Virginia, framed in 1776, reaffirmed in 1830, and again in 1851, expressly reserves this right to the majority of her people; and the existing Constitution does not confer upon the General Assembly the power to call a Convention to alter its provisions, or to change the relations of the Commonwealth, without the previously expressed consent of such majority. The act of the General Assembly calling the Convention which assembled at Richmond in February last, was, therefore, usurpation; and the Convention thus called has not only abused the powers dominantly entrusted to it, but, with the connivance and active aid of the Executive, has usurped and exercised other powers, to the manifest injury of the people, which, if permitted, will inevitably subject them to a military despotism.

The Governor, on taking the oath of office, delivered a speech in which he thus defined the position of Western Virginia:

We have been driven into the position we occupy to-day by the usurpers at the South, who have inaugurated this war upon the soil of Virginia, and have made it the great Crimea of this contest. We, representing the loyal citizens of Virginia, have been bound to assume the position we have assumed to-day for the protection of ourselves, our wives, our children, and our property. We, I repeat, have been driven to assume this position; and now we are but recurring to the great fundamental principle of our fathers, that to the loyal people of a State belongs the law-making power of that State. The loyal people are entitled to the Government and governmental authority of the State. And, fellow-citizens, it is the assumption of that authority upon which we are now about to enter.

Meantime Governor Letcher issued the following address to the inhabitants of this part of the State.

To the People of North-western Virginia:

The sovereign people of Virginia, unbiased, and by their own free choice, have, by a majority of nearly one hundred thousand qualified voters, severed the ties that heretofore bound them to the Government of the United States, and united this Commonwealth with the Confederate States. That our people have the right "to institute a new Government, laying its foundations on such principles, and organizing its powers in such form as to them shall seem most likely to effect their safety and happiness," was proclaimed by our fathers, and it is a right which no freeman should ever relinquish. The State of Virginia has now, the second time in her history, asserted this right, and it is the duty of every Virginian to acknowledge her act when ratified by such a majority, and to give his willing cooperation to make good the declaration. All her people have voted. Each has taken his chance to have his personal views represented. You, as well as the rest of the State, have cast your vote fairly, and the majority is against you. It is the duty of good citizens to yield to the will of the State. The Bill of Rights has proclaimed "that the people have a right to uniform government; and, therefore, that no government separate from or independent of the government of Virginia ought to be erected or established within the limits thereof."

The majority, thus declared, therefore, have a right

to govern. But notwithstanding this right, thus exercised, has been regarded by the people of all sections of the United States as undoubted and sacred, yet the Government at Washington now utterly denies it, and by the exercise of despotic power is endeavoring to coerce our people to abject submission to their authority. Virginia has asserted her independence. She will maintain it at every hazard. She is sustained by the power of ten of her sister Southern States, ready and willing to uphold her cause. Can any true Virginian refuse to render assistance? Men of the north-west, I appeal to you, by all the considerations which have drawn us together as one people heretofore, to rally to the standard of the Old Dominion. By all the sacred ties of consanguinity, by the intermixtures of the blood of East and West, by common paternity, by friendships hallowed by a thousand cherished recollections and memories of the past, by the relics of the great men of other days, come to Virginia's banner, and drive the invader from your soil. There may be traitors in the midst of you, who, for selfish ends, have turned against their mother, and would permit her to be ignominiously oppressed and degraded. But I cannot, will not, believe that a majority of you are not true sons, who will not give your blood and your treasure for Virginia's defence.

I have sent for your protection such troops as the emergency enabled me to collect, in charge of a competent commander. I have ordered a large force to go to your aid, but I rely with the utmost confidence upon your own strong arms to rescue your firesides and altars from the pollution of a reckless and ruthless enemy. The State is invaded at several points, but ample forces have been collected to defend her.

There has been a complaint among you that the eastern portion of the State has enjoyed an exemption from taxation to your prejudice. The State, by a majority of 50,000, has put the two sections on an equality in this respect. By a display of magnanimity in the vote just given, the East has, by a large majority, consented to relinquish this exemption, and is ready to share with you all the burdens of Government, and to meet all Virginia's liabilities. They come now to aid you as you came in former days to aid them. The men of the Southern Confederate States glory in coming to your rescue. Let one heart, one mind, one energy, one power, nerve every patriot to arm in a common cause. The heart that will not beat in unison with Virginia now is a traitor's heart; the arm that will not strike home in her cause now is palsied by common fear.

The troops are posted at Huttonsville. Come with your own good weapons and meet them as brothers!

Given under my hand, and under the seal of the [L. S.] Commonwealth, this 14th day of June, 1861, and in the 85th year of the Commonwealth.

By the Governor: JOHN LETCHER.

GEO. W. MENFORD, Secretary of the Commonwealth.

The Commanding General, McClellan, of this Department, issued a proclamation in which he thus states the position of military affairs:

To the Inhabitants of Western Virginia:

The army of this Department, headed by Virginia troops, is rapidly occupying all Western Virginia. This is done in cooperation with and in support of such civil authorities of the State as are faithful to the Constitution and laws of the United States. The proclamation issued by me, under date of May 26, 1861, will be strictly maintained. Your houses, families, property, and all your rights will be religiously respected. We are enemies to none but armed rebels, and those voluntarily giving them aid. All officers of this army will be held responsible for the most prompt and vigorous action in repressing disorder and punishing aggression by those under their command.

The Legislature of Western Virginia organized at Wheeling on July 2. Gov. Pierpont delivered a Message, stating the circumstances

under which that body was convened, and recommended the passage of such acts and appropriations as were necessary for the newly organized government.

John S. Carlisle and Waitman T. Willey were chosen United States Senators from the State of Virginia, to occupy the seats vacated by Messrs. Mason and Hunter. (See CONGRESS, U. S.)

A resolution was passed by the House, instructing the Senators and requesting the Representatives in Congress to vote the necessary appropriations of men and money for a vigorous prosecution of the war, and to oppose all compromise; \$27,000 in specie, belonging to the State and deposited in the Exchange Bank at Weston, were seized and brought to Wheeling.

A stay law was enacted by the Legislature, and an act authorizing the Governor to organize a patrol in such counties as may need it; and about \$200,000 were appropriated for carrying on the Government. A similar sum was also appropriated for military purposes.

The question of a division of the State was debated at some length, in the Senate, upon a report in its favor by a committee, but was voted down by 20 to 17. The agitation of the subject was considered premature.

Measures were also proposed for a thorough military organization of the north-west. The thirty-nine counties of Virginia lying west of the main chain of the Alleghany Mountains, the extreme southern point of which was about 37° 20' N. latitude, were those which formed the organization known as Western Virginia. They were, with their population, as follows:

Logan County.....	4,838	Barbour.....	8,959
Wyoming.....	2,865	Upshur.....	7,292
Raleigh.....	3,367	Harrison.....	13,790
Fayette.....	5,997	Lewis.....	7,999
Nicholas.....	4,626	Braxton.....	4,992
Webster.....	1,555	Clay.....	1,787
Randolph.....	4,990	Kanawha.....	14,575
Tucker.....	1,423	Boone.....	4,840
Preston.....	13,212	Wayne.....	6,747
Monongalia.....	13,043	Cabel.....	8,020
Marion.....	12,721	Putnam.....	6,801
Taylor.....	7,463	Mason.....	9,185
Jackson.....	8,306	Wood.....	11,046
Roanoke.....	8,043	Pleasants.....	2,945
Calhoun.....	2,502	Tyler.....	6,517
Wirt.....	3,751	Doddridge.....	5,203
Gilmer.....	3,759	Wetzel.....	6,703
Ritchie.....	6,847	Marshall.....	13,001
Ohio.....	22,422	Hancock.....	4,445
Brooke.....	6,494		
Total population.....		281,786	

The whole population of Virginia in 1861 was 1,593,199, including 495,826 slaves, leaving a white population of 1,097,373. Not more than eight or ten thousand of the slaves were in the counties included above, so that, in losing this population of 281,786, Virginia would lose about one-fourth of her white inhabitants. The territory of the Kanawha, as it was proposed to call it, including the valley of the river of that name, and the fertile region along the Ohio, is as fine as any in the State, and in the decade between 1850 and 1860 the population increased

there more rapidly than in any other part of Virginia. The proposition to erect this portion of Virginia into a new State created considerable discussion. The views of the Attorney-General of the United States, (Bates,) together with a statement of the plans of the Government relative to the seceded States, were thus expressed in a letter to a member of the Convention in Western Virginia: "The formation of a new State out of Western Virginia is an original, independent act of revolution. I do not deny the power of revolution—(I do not call it right, for it is never prescribed; it exists in force only, and has and can have no law but the will of the revolutionists.) Any attempt to carry it out involves a plain breach of both the Constitutions—of Virginia and of the Nation. And hence it is plain that you cannot take such course without weakening, if not destroying, your claims upon the sympathy and support of the General Government, and without disconcerting the plan already adopted both by Virginia and the General Government for the reorganization of the revolted States and the restoration of the integrity of the Union.

"That plan I understand to be this: When a State, by its perverted functionaries, has declared itself out of the Union, we avail ourselves of all the sound and loyal elements of the State, all who own allegiance to and claim protection of the Constitution, to form a State government as nearly as may be upon the former model, and claiming to be the very State which has been in part overthrown by the successful rebellion. In this way we establish a constitutional nucleus around which all the shattered elements of the commonwealth may meet and combine, and thus restore the old State in its original integrity.

"This, I verily thought, was the plan adopted at Wheeling, and recognized and acted upon by the General Government here. Your Convention annulled the revolutionary proceedings at Richmond, both in the Convention and the General Assembly, and your new Governor formally demanded of the President the fulfillment of the constitutional guarantees in favor of Virginia—Virginia as known to our fathers and to us. The President admitted the obligation, and promised his best efforts to fulfil it. And the Senate admitted your Senators, not as representing a new and nameless State, now for the first time heard of in our history, but as representing 'the good old commonwealth.'

"Must all this be undone, and a new and hazardous experiment be ventured upon at the moment when dangers and difficulties are thickening around us? I hope not; for the sake of the nation and the State I hope not. I had rejoiced in the movement in Western Virginia as a legal, constitutional, and safe refuge from revolution and anarchy—as at once an example and fit instrument for the restoration of all the revolted States.

"I have not time now to discuss the subject in its various bearings. What I have written

is written with a running pen and will need your charitable criticism."

The Convention in session at this time passed an ordinance creating a State. This was to be approved by the people at an election on the 24th of October. Provision was also made for the annexation to the State of any adjoining counties which might desire it. This ordinance was approved by a majority of nearly one hundred to one. It was proposed to call the new State, Kanawha. Its population would be about 282,000.

Public affairs, however, remained in the position in which they were originally placed. The new organization was regarded as representing the old commonwealth. On the 2d of December, the Legislature again assembled. The Governor recommended the repeal of the stay law, and the confiscation of the property of secessionists. He congratulated the people that they had contributed their full quota to the army of the United States, which was about 6,000 men. He added: "We have been repeatedly told that Western Virginia would soon be overrun and subjugated by the Confederate armies, our property confiscated and ourselves driven from our homes or subjected to the penalties of treason. Wise, Floyd and Lee were in their turn to accomplish this work. They have attempted it, and have owed their own safety to the rapidity with which they have retreated before our forces."

After the proclamation calling for troops by President Lincoln, military operations assumed great activity in the bordering State of Ohio. General George B. McClellan was invited from his duties in connection with the Ohio and Mississippi Railroad, by the Governor of Ohio, and appointed to the chief command in the State. Under his directions the volunteers were organized, and preparations for a campaign made. Early in May, the forces were ready to co-operate with the two or three regiments organized in Western Virginia, to oppose the advance of Confederate troops. The occupation of Western Virginia, which had voted against the Ordinance of Secession, and its control, was early an object with the Confederate Government. To oppose them, General McClellan pushed forward, under the orders of the United States Government.

On the 26th of May, he issued the following proclamation to the people of Western Virginia, from his head-quarters at Cincinnati, Ohio:

To the Union Men of Western Virginia:

VIRGINIANS: The General Government has long enough endured the machinations of a few factious rebels in your midst. Armed traitors have in vain endeavored to deter you from expressing your loyalty at the polls. Having failed in this infamous attempt to deprive you of the exercise of your dearest rights, they now seek to inaugurate a reign of terror, and thus force you to yield to their schemes and submit to the yoke of traitorous conspiracy dignified by the name of the Southern Confederacy. They are destroying the property of citizens of your State and ruining your magnificent railways.

The General Government has heretofore carefully

abstained from sending troops across the Ohio, or even from posting them along its banks, although frequently urged by many of your prominent citizens to do so. It determined to wait the result of the State election, desirous that no one might be able to say that the slightest effort had been made from this side to influence the free expression of your opinions, although the many agencies brought to bear upon you by the rebels were well known. You have now shown, under the most adverse circumstances, that the great mass of the people of Western Virginia are true and loyal to that beneficent Government under which we and our fathers lived so long.

As soon as the result of the election was known, the traitors commenced their work of destruction. The General Government cannot close its ears to the demand you have made for assistance. I have ordered troops to cross the river. They come as your friends and brothers—as enemies only to armed rebels, who are preying upon you; your homes, your families, and your property are safe under our protection. All your rights shall be religiously respected, notwithstanding all that has been said by the traitors to induce you to believe our advent among you will be signalized by an interference with your slaves. Understand one thing clearly: not only will we abstain from all such interference, but we will, on the contrary, with an iron hand crush any attempt at insurrection on their part. Now that we are in your midst, I call upon you to fly to arms and support the General Government; sever the connection that binds you to traitors; proclaim to the world that the faith and loyalty so long boasted by the Old Dominion are still preserved in Western Virginia, and that you remain true to the Stars and Stripes.

G. B. McCLELLAN,
Major-General Commanding.

On the same day he issued the following proclamation to his troops:

SOLDIERS: You are ordered to cross the frontier and enter on the soil of Virginia. Your mission is to restore peace and confidence, to protect the majesty of the law, and secure our brethren from the grasp of armed traitors. I place under the safeguard of your honor the persons and property of the Virginians. I know you will respect their feelings and all their rights, and preserve the strictest discipline. Remember, each one of you holds in his keeping the honor of Ohio and of the Union. If you are called upon to overcome armed opposition, I know your courage is equal to the task. Remember, that your only foes are armed traitors, and show mercy even to them when in your power, for many of them are misguided. When, under your protection, the loyal men of Western Virginia shall have been enabled to organize and form until they can protect themselves, you can return to your homes with the proud satisfaction of having preserved a gallant people from destruction.

G. B. McCLELLAN,
Major-General Commanding.

The instructions to General McClellan were to cross the Ohio, and, in conjunction with the forces of Western Virginia under Colonel Kelley, to drive out the Confederate force, and advance on Harper's Ferry. On the night of the 26th of May, orders were given to Colonel Kelley at Wheeling, to march on Grafton, which he proceeded to execute early the next morning with the First Virginia Volunteers. He was followed on the same day by the Sixteenth Ohio, Colonel Irvine, which had been stationed at Bellair, Ohio. These forces advanced by the Baltimore and Ohio Railroad. At the same time, the Fourteenth Ohio, Colonel Steadman, crossed the Ohio at Marietta, and occupied Parkersburg. These, advancing on the rail-

road, were welcomed by crowds at every station. On the same night, a Confederate force of 1,500 men evacuated Grafton, and that place was occupied, on the 29th, by the Virginia and Ohio Volunteers. Here they were joined by the Seventh and Ninth Indiana. The Confederate force, in the mean time, had retired to Philippi, where they prepared to make a stand with considerable strength. Philippi is twenty-four miles from Grafton, and General McClellan determined to surprise the Confederate force. On the night of June 2, two divisions moved forward for this purpose. (See PHILIPPI.) The surprise was complete, and the Confederate force, under Colonel G. A. Porterfield, was forced to retire, abandoning a large amount of stores and arms, with a loss of fifteen killed. Owing to the storm and the darkness of the night, the first division, under Colonel Kelley, was unable to arrive in the rear of the Confederate force soon enough to cut off its retreat. This force retired to Laurel Hill, in the vicinity of Beverly, where the enemy was concentrated in a strongly fortified position, which not only commanded the road to the southern part of the State, whence the Confederate supplies were obtained, but from which an attack upon the Federal forces was constantly threatened. Laurel Hill is on the western slope of a range of the Alleghany Mountains, which runs from northeast to southwest, and which is impassable for an army except at certain points. The Confederate encampment was on a slope which declined gradually to the valley, and was strongly fortified in front, below which passed the only road to southern Virginia. The plan of General McClellan was to occupy the attention of the enemy, by the appearance of a direct attack, while a strong force marched round to his rear to take possession of the road by which his supplies came. The enemy must then either come out of his intrenchments and fight, or starve. Taking the main body of his army, composing a force of ten thousand men, General McClellan moved to Clarksburg, and thence to Buckhannon, on the west of Laurel Hill. Previously however, and on the 7th of July, he ordered General Morris to march upon Laurel Hill, to occupy the enemy. Taking with him the Ninth Indiana, Colonel Milroy, the Fourteenth Ohio, the First Virginia, the Cleveland Artillery, the Sixth and Seventh Indiana, and the Sixth Ohio, in the order named and making a force of about 4,000 men, he left early in the morning, and reached Bealington in front of the enemy at eight o'clock, with his right, having flanking parties on each side, and two companies of skirmishers ahead. The Confederate pickets fired and retreated. A slight skirmish ensued with a party of the enemy in a wood beyond the town, about two miles from the Confederate camp, which the Federal force had occupied. On the 8th, a brisk skirmishing was kept up all the afternoon with the Confederates, and some were killed

on both sides. On the 9th, the skirmishing was renewed, and every outlet of the Confederate camp was watched except that back to Beverly, where General McClellan was soon expected to be. Thus the enemy was held in check on the north and occupied, while General McClellan was attempting to get in his rear. Meantime, as General McClellan reached Buckhannon, he found that the rear of the enemy was strongly fortified at a position called Rich Mountain, which was defended by one to two thousand men, under Colonel Pegram. He now formed the plan of capturing this entire force. For this purpose, General Rosecrans with about three thousand men was sent to attack his rear, while General McClellan himself made a direct attack in front. General Rosecrans with the Eighth, Tenth, Thirteenth Indiana, and Nineteenth Ohio, therefore proceeded, on the 11th, along the line of hills south-east of the enemy's intrenched camp on the Beverly road, to make an attack on the east side, while General McClellan made it on the west side, as soon as he heard from General Rosecrans. A courier, who mistook the road through the enemy's camp for the route of the troops, gave the enemy intelligence of the movement. Their position was about two miles west from Beverly, which is on the east side of what is called Rich Mountain, a gap in the Laurel Hill range, through which the southern road passes. General Rosecrans arrived in the rear of the enemy at four o'clock, and meeting a small force, immediately began the attack, to which they made a vigorous resistance, but were unable to withstand it. The effect was to alarm Colonel Pegram, and upon finding out his exposed position he silently moved off with his main body, with the hope of being able to join the camp at Laurel Hill. Meanwhile General McClellan was in position with his whole force during the afternoon ready to make an assault, but heard nothing from the other column except distant firing. Early in the morning he was about proceeding to plant cannon upon an eminence commanding a portion of the Confederate camp, and preparing to attack the whole next in front, when it was ascertained that the enemy had evacuated his position during the night, moving towards Laurel Hill, leaving only a few men in charge of the sick, cannon, and camp equipage and transportation.

The following despatch from General McClellan thus announced these movements:

RICH MOUNTAIN, VA., 9 A. M., July 12.

Col. E. D. Townsend, Assistant-Adjutant General:

We are in possession of all the enemy's works up to a point in sight of Beverly. We have taken all his guns; a very large amount of wagons, tents, &c.; every thing he had; and also a large number of prisoners, many of whom are wounded, and amongst whom are several officers. They lost many killed. We have lost in all, perhaps twenty killed and forty wounded, of whom all but two or three were in the column under Col. Rosecrans, which turned the position. The mass of the enemy escaped through the woods entirely dis-

organized. Among the prisoners is Dr. Taylor, formerly of the army. Col. Pegram was in command.

Col. Rosecrans' column left camp yesterday morning and marched some eight miles through the mountains, reaching the turnpike some two or three miles in the rear of the enemy. He defeated an advanced force, and took a couple of guns. I had a position ready for twelve guns near the main camp, and as the guns were moving up I ascertained that the enemy had retreated. I am now pushing on to Beverly—a part of Colonel Rosecrans' troops being now within three miles of that place. Our success is complete and almost bloodless. I doubt whether Wise and Johnston will unite and overpower me. The behavior of our troops in action and towards prisoners was admirable.

G. B. McCLELLAN,
Major-General Commanding.

By the retreat of Colonel Pegram, the rear of the Confederate force at Laurel Hill was entirely exposed. On the 11th, General Garnett first learned that General McClellan was in his rear. He immediately evacuated his camp, and retired before General Morris, hoping to reach Beverly in advance of General McClellan, and thus be able to withdraw his forces by the road to southern Virginia. Upon arriving within three miles of Beverly, the fugitives of Colonel Pegram's force were met, and finding escape impossible by that route, General Garnett returned towards Laurel Hill, and took the road branching off to the north-east towards St. George, in Tucker County. His aim was now to press along the base of the mountains down the Cheat River, with the hope of finding some practicable path across the mountains into the valley of Virginia. The following despatch of General McClellan describes the precise state of affairs at this time:

BEVERLY, VA., July 18, 1861.

To Col. E. D. Townsend:

The success of to-day is all that I could desire. We captured six brass cannon, of which one was rifled; all their camp equipage and transportation, even to their cups. The number of tents will probably reach two hundred, and more than sixty wagons. Their killed and wounded will fully amount to one hundred and fifty. We have at least one hundred prisoners, and more coming in constantly. I know already of ten officers killed and prisoners. Their retreat is complete. We occupied Beverly by a rapid march. Garnett abandoned his camp early this morning, leaving his camp equipage. He came within a few miles of Beverly, but our rapid march turned him back in great confusion, and he is now retreating on the road to St. George. I have ordered Gen. Morris to follow him up closely. I have telegraphed for the Second Pennsylvania Regiment at Cumberland to join Gen. Hill at Rowlesburg. The General is concentrating all his troops at Rowlesburg, to cut off Garnett's retreat, if possible, to St. George. I may say we have driven out some ten thousand troops, strongly intrenched, with the loss of eleven killed and thirty-five wounded. Provision returns were found showing Garnett's force to have been ten thousand men. They were Eastern Virginians, Georgians, Tennesseans, and, I think, Carolinians. To-morrow I can give full particulars, &c. Will move on Huttonsville to-morrow and endeavor to seize the Cheat Mountain pass, where there are now but few troops. I hope that Gen. Cox has by this time driven Wise out of the Kanawha valley. In that case I shall have accomplished the object of liberating Western Virginia. I hope the General will approve my operations.

G. B. McCLELLAN,
Major-General Commanding.

Up the mountains, through defiles, and

over rugged ridges, guided by the tents, camp-furniture, provisions and knapsacks thrown away, the hot pursuit of the flying enemy was pressed. Captain Bonham led the advance, and General Morris the rear, and after fording Cheat River four times, they came up with the enemy's rear guard at Carrick's Ford, where the enemy attempted to make a stand, but were attacked on the right flank and forced to retire. At another turn in the river, about a quarter of a mile below, the enemy again attempted to stand. General Garnett tried in vain to rally his men and gather them around him. While he was thus standing with his back to the Federal forces, he received a Minié ball on the left of the spine. It made a terrible wound, piercing the heart and coming out at the right nipple. He threw up his arm and fell dead. The Confederate rout was now complete. Only about two thousand of the troops with which General Garnett left his intrenchments, escaped. General McClellan's despatch was as follows:

HUTTONSVILLE, July 14, 1861.

To Ed. Townsend: Garnett and forces routed. His baggage and one gun taken. His army demoralized. Garnett killed.

We have annihilated the enemy in Western Virginia, and have lost thirteen killed and not more than forty wounded. We have in all killed at least two hundred of the enemy, and their prisoners will amount to at least one thousand. Have taken seven guns in all.

I still look for the capture of the remnant of Garnett's army by General Hill.

The troops defeated are the crack regiments of Eastern Virginia, aided by Georgians, Tennesseans, and Carolinians.

Our success is complete, and secession is killed in this country.

G. B. McCLELLAN,
Major-General Commanding.

Meantime Colonel Pegram, hearing of the retreat of General Garnett, surrendered the remnant of his force to General McClellan, (*see* BEVERLY,) who now issued the following address to his soldiers:

WESTERN VIRGINIA, BEVERLY, VA., July 19, 1861.

Soldiers of the Army of the West:

I am more than satisfied with you. You have annihilated two armies, commanded by educated and experienced soldiers, intrenched in mountain fastnesses

and fortified at their leisure. You have taken five guns, twelve colors, fifteen hundred stand of arms, one thousand prisoners, including more than forty officers. One of the second commanders of the rebels is a prisoner, the other lost his life on the field of battle. You have killed more than two hundred and fifty of the enemy, who has lost all his baggage and camp equipage. All this has been accomplished with the loss of twenty brave men killed and sixty wounded on your part.

You have proved that Union men, fighting for the preservation of our Government, are more than a match for our misguided and erring brothers. More than this, you have shown mercy to the vanquished. You have made long and arduous marches, with insufficient food, frequently exposed to the inclemency of the weather. I have not hesitated to demand this of you, feeling that I could rely on your endurance, patriotism, and courage. In the future I may have still greater demands to make upon you, still greater sacrifices for you to offer. It shall be my care to provide for you to the extent of my ability; but I know now that, by your valor and endurance, you will accomplish all that is asked.

Soldiers! I have confidence in you, and I trust you have learned to confide in me. Remember that discipline and subordination are qualities of equal value with courage. I am proud to say that you have gained the highest reward that American troops can receive—the thanks of Congress and the applause of your fellow-citizens.

GEO. B. McCLELLAN,
Major-General.

The disaster at Bull Run occurred at this time, and General McClellan was called to the active command of the Army of the Potomac. On the 1st of August he undertook the reformation and reorganization of a defeated army.

The gaps of the Cheat Mountain formed the key to Western Virginia, and they were now held by a strong Federal force. No further attempts were made by the Confederate Government to recover the country, until later in the year, when their forces reappeared under General Wise, and subsequently under General Floyd; and although many skirmishes took place, no material success was obtained, and finally, at the approach of winter, both generals had retired, the former to Southeastern Virginia and North Carolina, and the latter to Middle Tennessee, and Fort Donelson in Kentucky.

W

WARD, JAMES HARMAN, commander in the United States navy, son of Colonel James Ward of Hartford, Conn.; born in that city, in 1806, killed in the attack on Matthias Point, June 27, 1861. He was educated at the Vermont Military Academy at Norwich, and from thence entered Trinity College, Hartford. On the 4th of March, 1823, he received an appointment as midshipman on board of the Constitution, commanded by Commodore McDonough; rose to the rank of lieutenant on the 3d of March, 1831, and was attached to the Mediterranean squadron. For several years he was on the coast of Africa, and while there compiled his

"Manual of Naval Tactics," published in 1856. In 1842-'3, he delivered in Philadelphia a popular course of lectures on Gunnery. He urged upon the Government the necessity of establishing a Naval School, and upon the opening of the school was appointed one of the professors, and gave a series of lectures, subsequently published under the title of "Elementary Instructions on Naval Ordnance and Gunnery:" a work which has accomplished much in its effects upon naval science.

Soon after the introduction of steam into the navy, he gave the result of his observations in a work entitled "Steam for the Million," subse-

quently republished by Van Nostrand, New York. In 1853 he was made commander, and in 1857 was appointed to the command of the receiving ship North Carolina, lying at the Brooklyn Navy Yard. At the commencement of the hostilities resulting in the present war, Captain Ward was summoned to Washington to aid the Government by his counsels. Here he remained and organized the Potomac flotilla, to the command of which he was appointed on the 16th of May, 1861. On the 31st of May he, with the Freeborn, Anacosta and Resolute, cannonaded the Confederate batteries at Aquia Creek, silencing three of them, and only retiring when his ammunition became exhausted. The next day, aided by the Pawnee, he resumed the attack, and succeeded in silencing the guns. On the 26th of June, upon discovering that a battery was being erected at Matthias Point by the Confederates, he sent to the Pawnee for aid to throw up breastworks; when completed, as the men were returning to the boats for the guns, a destructive fire was opened upon them by the enemy in ambush. The crew hastened to the steamer, the Freeborn covering their retreat. Captain Ward gallantly stood at his post sighting one of the guns, when he was struck by a Minié ball and almost instantly killed. His body was carried with due honor to New York, where it was received and laid in state on the North Carolina. After many testimonials of respect and affection, it was conveyed to Hartford and, after appropriate funeral honors, was buried by the side of his parents.

WASHINGTON, the political capital of the United States, is situated on the left bank of the Potomac River, between two small tributaries—the one on the east called the East Branch, and the one on the west called Rock Creek, the latter separating it from Georgetown. It is 38 miles south-southwest of Baltimore, and 122 miles north of Richmond, Virginia.

The Constitution of the United States provides that the Federal Government shall have exclusive jurisdiction over a territory 10 miles square, in which shall be located the capital of the nation. Quite a strife arose in the early sessions of Congress relative to the location of the seat of Government. Many places were proposed, as Trenton in New Jersey, Philadelphia and Harrisburg in Pennsylvania, Wilmington in Delaware, and Baltimore and Georgetown in Maryland. The measure finally became combined with what was called the "Assumption Bill." This bill proposed that the Government should assume the debts of the several States, which were contracted during the revolutionary war. This bill, and the one to locate the seat of Government, had failed in Congress by small majorities. There was a strong sectional party in favor of each, but not a majority. The Eastern and Middle States were for the assumption, and the Southern States against it; the latter desired the location of the seat of Government on the bank of the Potomac; the former upon the

Susquehannah. The discontent was extreme on each side at losing its favorite measure. At last the two plans were combined. Two members from the Potomac, who had voted against the assumption, agreed to change their votes; a few from the Eastern and Middle States who had voted against the Potomac, agreed to change in its favor. Mr. Jefferson gives the following account of it: "This measure (the assumption) produced the most bitter and angry contest ever known in Congress before or since the union of the States. I arrived (from France) in the midst of it; but a stranger to the ground, a stranger to the actors in it, so long absent as to have lost all familiarity with the subject, and as yet unaware of its object, I took no concern in it. The great and trying question, however, was lost in the House of Representatives. So high were the feuds excited on this subject that, on its rejection, business was suspended. Congress met and adjourned from day to day without doing any thing, the parties being too much out of temper to do business together. The Eastern members threatened secession and dissolution. Hamilton was in despair. As I was going to the President's one day I met him in the street. He walked me backwards and forwards before the President's door for half an hour. He painted pathetically the temper into which the Legislature had been wrought—the disgust of those who were called the creditor States—the danger of the secession of their members, and of the separation of the States. He observed that the members of the Administration ought to act in concert—that, though this question was not of my Department, yet a common duty should make it a common concern—that the President was the centre upon which all administrative questions ultimately rested, and that all of us should rally around him, and support, with joint efforts, measures approved by him; and that the question having been lost by a small majority only, it was probable that an appeal from me to the judgment and discretion of some of my friends, might effect a change in the vote, and the machine of government, now suspended, be again set in motion. I told him that I was really a stranger to the whole subject; that not having yet informed myself of the system of finances adopted, I knew not how far this was a necessary sequence; that, undoubtedly, if its rejection endangered a dissolution of the Union at this incipient stage, I should deem that the most unfortunate of all consequences, to avert which all partial and temporary evils should be yielded. I proposed to him, however, to dine with me the next day, and I would invite another friend or two, bring them into conference together, and I thought it impossible that reasonable men, consulting together coolly, could fail, by some mutual sacrifices of opinion, to form a compromise which would save the Union. The discussion took place. I could take no part in it but an exhortatory one, because I was a stranger to the circumstances which

should govern it. But it was finally agreed that, whatever importance had been attached to the rejection of this proposition, the preservation of the Union and of concord among the States was more important, and that therefore it would be better that the vote of rejection should be rescinded—to effect which some members should change their votes. But it was observed that this pill would be peculiarly bitter to the Southern States, and that some concomitant measure should be adopted to sweeten it a little to them. There had before been propositions to fix the seat of Government either at Philadelphia or Georgetown on the Potomac, and it was thought that by giving it to Philadelphia for 10 years, and to Georgetown permanently afterwards, this might, as an anodyne, calm in some degree the ferment which might be excited by the other measure alone; so two of the Potomac members agreed to change their votes, and Hamilton undertook to carry the other point." Congress accordingly continued its sessions at Philadelphia until suitable preparations were made, and then removed to Washington. The subsequent growth and improvement of the city have been on a scale corresponding to its importance. The population in 1860 was 61,123.

In January of 1861, it was reported at Washington, then the scene of the greatest political excitement in the country, that the President elect, Mr. Lincoln, had contemplated coming to Washington from the West by the route of the Baltimore and Ohio Railroad, but in consequence of apprehended dangers had changed his purpose. This led to the following letter from the mayor of Washington to the president of the railroad company:

MAYOR'S OFFICE, WASHINGTON, }
February 1, 1861. }

SIR: I learn that the President elect, until very recently, contemplated passing over your road from Wheeling to this city, and that, owing to rumored intentions on the part of citizens of Maryland and Virginia to interfere with his travel to our capital, you were induced to make diligent inquiry as to the truth of these threats. If correctly informed, will you do me the favor to state the result of your inquiries touching this matter?

Very respectfully, your obedient servant,
JAMES G. BERRET, Mayor.

JNO. W. GARRETT,
Pres. Baltimore and Ohio Railroad Comp'y.

On the 4th of February Mr. Garrett replied:

I can assure you that there is not and has not been the least foundation for any of the rumors to which you refer, and which have been industriously circulated in the Northwest. They are the simple inventions of those who are agents in the West for other lines, and are set on foot more with a hope of interfering with the trade and travel on the shortest route to the seaboard than with any desire to promote the safety and comfort of the President elect. His safety and comfort would have been perfectly assured from the Ohio River to Washington, had he adhered to his original purpose.

Our road is regarded, both in Maryland and Virginia, as a monument of the common enterprise of their people and as the means of a common prosperity. This feeling is of itself sufficient to protect the travel and freight of the road from all annoyance. I can only regret that the purpose of the President elect

to travel by another route should serve to give countenance to stories which are in every respect unfounded.

Rumors of an attack upon Washington by bodies of men sympathizing with the secessionists had prevailed for some time previous. The substance of them was that an organization had been formed with the design of capturing the city. Small bodies of the regular army were therefore from time to time concentrated there.

On the 4th of February the Senate of the Virginia Legislature adopted a resolution, that in their opinion, there were "no just grounds for believing that citizens of Virginia meditate an attack on or seizure of the Federal property, or an invasion of the District of Columbia, and that all preparations to resist the same are unnecessary so far as this State is concerned."

Ex-Governor Wise of that State, upon whom such a design had been charged, in a speech at Richmond on Feb. 14, "denounced as false the report that he ever contemplated the invasion of Washington to prevent the inauguration of Mr. Lincoln. He deprecated civil war, but counselled active preparations to resist coercion. He was for the Union and the Constitution, but would never submit to a Northern Confederacy. He believed that if Virginia would take a firm stand and do her duty faithfully, all would yet be well. But she should demand that the Government should vacate the forts and arsenals in the South, and stand as a mediator between the North and the South."

On the 11th of February the House of Representatives of Congress adopted a resolution requesting the President to communicate "the reasons that had induced him to assemble so large a number of troops in this city, and why they are kept here; and whether he has any information of a conspiracy upon the part of any portion of the citizens of this country to seize upon the capital and prevent the inauguration of the President elect." To this resolution the President replied on the 1st of March, stating that the number of troops in Washington was 653, exclusive of marines, who were at the navy yard as their appropriate station. He further stated that these troops were ordered to Washington to act as a *posse comitatus*, in strict obedience to the civil authority, for the purpose of preserving peace and order in Washington, if this should have been necessary before or at the period of the inauguration of the President elect. At a time of high excitement, consequent upon revolutionary events—when the very air was filled with rumors, and individuals indulged in the most extravagant expressions of fears and threats, the President did not think that, before adopting this precautionary measure, he should have waited to obtain proof of the actual existence of a conspiracy to seize the capital. The safety of the immense amount of public property in the city, and that of the archives of the Government, in which all the States, and especially the new States in which

the public lands are situated, have a deep interest, required prompt action, no less than the peace and order of the city, and the security of the inauguration of the President elect, which were objects of vast importance to the whole country.

The resolution of the House had been referred by the President to the Secretary of War, Mr. Holt, who returned an answer to the President on the 18th of February, in which he thus expressed his belief in the existence of an organization to capture Washington:

At what time the armed occupation of Washington City became a part of the revolutionary programme, is not certainly known. More than six weeks ago, the impression had already extensively obtained that a conspiracy for the accomplishment of this guilty purpose was in process of formation, if not fully matured. The earnest endeavors made by men known to be devoted to the revolution, to hurry Virginia and Maryland out of the Union, were regarded as preparatory steps for the subjugation of Washington. This plan was in entire harmony with the aim and spirit of those seeking the subversion of the Government, since no more fatal blow at its existence could be struck than the permanent and hostile possession of the seat of its power. It was in harmony, too, with the avowed designs of the revolutionists, which looked to the formation of a confederacy of all the slave States, and necessarily to the conquest of the capital within their limits. It seemed not very indistinctly prefigured in a proclamation made upon the floor of the Senate, without qualification, if not exultingly, that the Union was already dissolved—a proclamation which, however intended, was certainly calculated to invite, on the part of men of desperate fortunes or of revolutionary States, a raid upon the capital. In view of the violence and turbulent disorders already exhibited in the South, the public mind could not reject such a scheme as at all improbable. That a belief in its existence was entertained by multitudes, there can be no doubt, and this belief I fully shared. My conviction rested not only on the facts already alluded to, but upon information, some of which was of a most conclusive character, that reached the Government from many parts of the country, not merely expressing the prevalence of the opinion that such an organization had been formed, but also often furnishing the plausible grounds on which the opinion was based. Superadded to these proofs, were the oft-repeated declarations of men in high political positions here, and who were known to have intimate affiliations with the revolution—if indeed they did not hold its reins in their hands—to the effect that Mr. Lincoln would not, or should not, be inaugurated at Washington. Such declarations, from such men, could not be treated as empty bluster. They were the solemn utterances of those who well understood the import of their words, and who, in the exultation of the temporary victories gained over their country's flag in the South, felt assured that events would soon give them the power to verify their predictions. Simultaneously with these prophetic warnings, a Southern journal of large circulation and influence, and which is published near the city of Washington, advocated its seizure as a possible political necessity.

A select committee of the House of Representatives, of which Mr. Howard of Michigan was chairman, made a report, in which they said that they had thoroughly investigated the subject, and were of opinion that the evidence before them did not prove the existence of a secret organization at Washington or elsewhere hostile to the Government, and that had for its object, upon its own responsibility, an attack

upon the capital, or any of the public property there, or an interruption of any of the functions of the Government. At the same period a resolution was offered in the House of Representatives, expressing the opinion "that the regular troops now in this city ought to be forthwith removed therefrom." This was laid on the table.

Whatever of excitement and alarm existed in the city, had entirely subsided before the 1st of March, and a feeling of comparative peace and security prevailed.

The ceremonies at the inauguration of Mr. Lincoln were in some respects the most brilliant and imposing ever witnessed at Washington. Nearly 20 well-drilled military companies of the District, comprising a force of more than 2,000 men, were on parade. Georgetown sent companies of cavalry, infantry, and artillery of fine appearance. The troops stationed at the City Hall and Willard's Hotel became objects of attraction to vast numbers of both sexes. At noon the Senate Committee called upon President Buchanan, who proceeded with them to Willard's Hotel to receive the President elect. The party thus composed, joined by other distinguished citizens, then proceeded, in open carriages, along the avenue at a moderate pace, with military in front and rear, and thousands of private citizens, in carriages, on horseback, and on foot, crowding the broad street. The capitol was reached by passing up on the north side of the grounds, and the party entered the building by the northern door over a temporary planked walk. During the hour and a half previous to the arrival of President Buchanan and the President elect in the Senate chamber, that hall presented a gayer spectacle than ever before. The usual desks of the senators had been removed, and concentric lines of ornamented chairs set for the dignitaries of this and other lands with which this country was in bonds of amity and friendship. The inner half-circle on the right was occupied by the judges of the Supreme Court, and by senators. The corresponding half-circle on the extreme left was occupied by the members of the cabinets of Mr. Buchanan and Mr. Lincoln, mingled together, and further on by senators. The concentric circle further back was filled by senators. The next half-circle on the right by the members of the diplomatic corps, all in the full court dress of their respective countries. In the half-circle immediately in the rear of that occupied by the ministers were the secretaries and attachés. The half-circles on the left, corresponding to those occupied by the corps diplomatique, furnished places for senators and governors of States and Territories. Outside of all, on both sides, stood—for there was no further room for seats—the members of the House of Representatives and chief officers of the executive bureaus. The galleries all round the Senate were occupied by ladies.

At a quarter past one o'clock the President

of the United States and the President elect entered the Senate chamber, preceded by Senator Foot and the marshal of the District of Columbia, and followed by Senators Baker and Pearce. They took seats immediately in front of the clerk's desk, facing outward; President Buchanan having the President elect on his right, and the senators equally distributed right and left.

In a few minutes Vice-President Hamlin, who had been previously installed, ordered the reading of the order of procession to the platform on the east of the capitol, and the line was formed, the marshal of the District of Columbia leading. Then followed Chief-Justice Taney and the judges of the Supreme Court, the sergeant-at-arms of the Senate, the Committee of Arrangements of the Senate, the President of the United States and President elect, Vice-President of the United States and Senate, the members of the diplomatic corps, governors of States and Territories, and members of the House of Representatives. In this order the procession marched to the platform erected in the usual position over the main steps on the east front of the capitol, where a temporary covering had been placed to protect the President elect from possible rain during the reading of his inaugural address. The greater part of an hour was occupied in seating the procession on the platform, and in the delivery of the address of Mr. Lincoln, which he read with a clear, loud, and distinct voice, quite intelligible to at least 10,000 persons below him. At the close of the address Mr. Lincoln took the oath of office from the venerable chief-justice of the Supreme Court. After the ceremony of inauguration had been completed the President and ex-President retired by the same avenue, and the procession, or the military part of it, marched to the executive mansion. On arriving at the President's House, Mr. Lincoln met Gen. Scott, by whom he was warmly greeted, and then the doors of the house were opened, and thousands of persons rapidly passed through, shaking hands with the President, who stood in the reception room for that purpose. In this simple and quiet manner was the change of rulers made.

The proclamation of the President calling for 75,000 men was issued on the 15th of April. The impression had spread through the North that the first point of attack by the Southern troops would be Washington. As early as the 18th, therefore, seventeen car loads of troops, numbering about 600 men, arrived from Harrisburg, via Baltimore, and were quartered in rooms in the capitol. They passed through Baltimore about five o'clock, without serious molestation from disorderly persons. Other bodies from the same quarter were expected to arrive during the night.

At the same time a new kind of deposit was made in the basement rooms of the Treasury building, in the shape of several hundred casks of middlings, barrels of white beans,

sugar, sacks of coffee, &c., to supply the troops which were concentrating at Washington. It is not often that such commodities have storage in buildings of such elegant and costly architecture. In and around the General Post-Office and public buildings also were stored hundreds of barrels of pork, and other army supplies from Baltimore and other points.

During the whole day and night of the 18th, the avenues to the city were guarded and closely watched. Cannon were planted in commanding positions so as to sweep the river along that front, and these were supported by infantry. A proclamation was also issued by Mayor Berret, exhorting "all good citizens and sojourners to be careful so to conduct themselves as neither by word or deed to give occasion for any breach of the peace." After the outbreak at Baltimore on the 19th, no mail was received at Washington, either from the North or South, except from Alexandria on the one side and Baltimore on the other, until the 25th. On the 27th the New York Seventh Regiment arrived, having left New York on the 18th. A delay took place between Annapolis and Washington, in consequence of the damage done to the railroad track. The news brought to Washington by the Seventh was that four New York regiments were at Annapolis, with a part of a Massachusetts regiment, the remainder of which was at the Junction. The Seventh, therefore, as they marched up Pennsylvania Avenue, preceded by their band, and making a fine appearance, were received with the wildest demonstrations of pleasure on the part of the citizens. On the next day another body of troops arrived. They consisted of one-half of the Rhode Island regiment, 1,200 strong, commanded and headed by Gov. Sprague; and the Butler brigade, under Col. Butler, of Massachusetts, numbering nearly 1,400 men. They were met at the depot by the Sixth Massachusetts Regiment, stationed in the capitol, who greeted their friends with the heartiest cheers. These men, though severely worked by the toilsome labor requisite to repair the bridges and road track from Annapolis to the Junction, presented a fine appearance as their long and serpent-like lines wound through the streets. Troops now began to arrive daily, and Washington soon became the most military city on the continent.

On the night of the 23d of May the troops proceeded to occupy the heights on the opposite side of the Potomac in Virginia. The large camps formed in such positions in Virginia, that a rapid concentration by railroad could be made, rendered it prudent for the Government to occupy these positions, which, in consequence of the railroad connections between Alexandria and Richmond, were of great importance to the security of Washington. The night of the 23d was beautiful on the Potomac. A full moon looked peacefully down, and perfect quietness prevailed over all the shores in the neighborhood of Washington.

Companies of infantry, cavalry, and artillery, were stationed near and on the Long Bridge. About midnight two companies of rifles were advanced across the bridge to the neighborhood of Roach's Spring. Scouts were sent out in all directions, who managed to get past the line of Virginia pickets. Somewhat later the latter, getting the alarm, set spurs to their horses, and made off down the road towards Alexandria in haste. Volunteers of the District of Columbia were also advanced towards Alexandria. At Georgetown, above, a movement was made about half-past eleven over the aqueduct by the Georgetown battalion. They drove off the two or three pickets on the Virginia side of the river, and soon established themselves in position. Next followed the Fifth Massachusetts Regiment, Twenty-eighth Brooklyn Regiment, Company B of the United States Cavalry, and the Sixty-ninth Regiment. The last-named regiment scoured Alexandria County, and went back as far as the Loudon and Hampshire Railroad. The sight of the troops crossing the aqueduct, with their burnished weapons gleaming in the bright moonlight, was strikingly beautiful. About 2 o'clock in the morning another large body of troops passed over from Washington and the neighborhood. The Seventh New York Regiment halted under orders at the Virginia end of the Long Bridge; the Second New Jersey Regiment went to Roach's Spring, half a mile from the end of the bridge; the New York Twenty-fifth and one cavalry company, and the New York Twelfth and the Third and Fourth New Jersey regiments, proceeded to the right, after crossing the bridge, for the occupation of the heights of Arlington. They were joined by the other troops, which crossed at the Georgetown aqueduct.

Ellsworth's Zouaves, in two steamers, with the steamer James Guy as tender, left their camp on the East Branch, and made directly for Alexandria by water. The Michigan Regiment, under Col. Wilcox, accompanied by a detachment of United States Cavalry and two pieces of Sherman's battery, proceeded by way of the Long Bridge directly for Alexandria. At four o'clock A. M., at about the same time, the Zouaves landed at Alexandria from the steamers, and the troops, who proceeded by the bridge, reached that town. As the steamers drew up near the wharf, armed boats left the Pawnee, whose crews leaped upon the wharfs just before the Zouaves reached the shore. The crews of the Pawnee's boats were fired upon by the few Virginia sentries as the boats left the steamship, by way of giving the alarm, when these sentries instantly fled into the town. Their fire was answered by scattering shots from some of the Zouaves on the decks of the steamers. Immediately on landing, the Zouaves marched up into the centre of the town, no resistance whatever to their progress being offered. Thus quiet possession was taken of that part of Alexandria, in the name of the

United States, by that portion of the troops immediately commanded by Col. Ellsworth. The Michigan regiment, at the same time, marched into the town by the extension of the Washington turnpike, the cavalry and artillery marching in two or three streets below. The destination of both these detachments was the depot of the Orange and Alexandria Railroad, which they instantly seized. They also found near by a disunion company of cavalry, of thirty-five men, and as many horses, who were made prisoners, not having heard the alarm made by the firing of the sentries below. A portion of the Virginian force escaped in cars. Thus was possession taken of the Virginia shore. Intrenching tools were conveyed over from Washington; the next day intrenchments were thrown up, and about noon a large national flag was raised within them, and thrown out to the winds. Great numbers of spectators, of both sexes, lined the heights on the east bank of the Potomac, watching the movements of the troops with eager interest. The only disastrous event occurring was the death of Col. Ellsworth, commander of the Fire Zouave regiment of New York. (See ELLSWORTH). The intrenchments thus commenced, subsequently became of immense extent, and with those on the other sides of Washington, consisted of forty-eight works, mounting 300 guns. The whole defence perimeter occupied was about thirty-five miles.

On the 9th of June a movement of troops up the Potomac took place from Washington. The Rhode Island battery, under Col. Burnside, was sent to join the force under Gen. Patterson at Chambersburg, and on the next day three battalions of District of Columbia Volunteers, numbering 1,000 men, moved up the Rockville road along the Potomac towards Edwards' Ferry. This point is about thirty miles from Georgetown, and equidistant from Washington and Harper's Ferry. It is the only crossing for teams between the Point of Rocks and the District. The road passed from Frederick (Md.) across a bridge over the Chesapeake and Ohio Canal, to the established ferry across the Potomac, and terminated in Leesburg, Va., which is only four miles distant from the crossing. This route was at the time a general thoroughfare for the transit of secessionists from Maryland, and also for military stores, provisions, &c.

The quota of 1,000 men required from the District of Columbia was furnished to the Government by Washington and Georgetown at once. The supplies of military stores held by the Government at Washington were of the most extensive nature. The issues of ordnance and ordnance stores for the space of four months, between the 1st of July and 31st Oct. 1861, were as follows: 152,347 small arms, 14,454 sabres, 3,740 swords, 48,000 sets of accoutrements for foot soldiers, 16,465 do. for mounted soldiers, 16,685 sets of horse equipments, 2,554 sets of artillery harness. *Ammunition.*—18,-

150,000 rounds for foot soldiers, 1,124,900 rounds for mounted soldiers, 61,306 rounds for field batteries, 16,942 rounds for garrison and seacoast. *Cannon*.—382 guns and howitzers, 717 gun-carriages and caissons, 53 travelling forges, 27 battery wagons.

WHEELING, the capital of Ohio County, in the western part of Virginia, is situated on the east or left bank of the Ohio River, and on both sides of Wheeling Creek. It is ninety-two miles below Pittsburg, three hundred and sixty-five miles above Cincinnati, and three hundred and fifty miles northwest of Richmond. It is also a port of entry for a district on the Ohio River. On the secession of Virginia, orders were received from Governor Letcher as early as the 20th of April, to seize the custom-house. But the people, being strongly in favor of the Union, maintained a guard over the building, under the direction of the city authorities. It subsequently became the seat of the State Government organized in Western Virginia. (*See VIRGINIA, WESTERN.*)

WHITTEMORE, THOMAS, D. D., born in Boston January 1, 1800, died in Cambridge, Mass., March 21, 1861. At the age of fourteen he was apprenticed to a morocco dresser in Charlestown, and subsequently to a brass-founder; but neither occupation suiting his taste, he entered into the employ of a bootmaker in Boston. Becoming acquainted with the Rev. Hosea Ballou, he was led to commence studying for the ministry under his direction, and preached his first sermon in Roxbury, two weeks before attaining his majority. In 1820, he was settled in Milford, Mass., and from thence removed to Cambridgeport, where he remained pastor over the Universalist Society nine years. In early life he was joint editor of the "Universalist Magazine," and in 1828 originated the "Trumpet," continuing the editorship for nearly thirty years. In 1830, he published a "History of Universalism." In 1832, "Notes and Illustrations of the Parables;" in 1836, the "Songs of Zion;" in 1841, the "Gospel Harmonist;" in 1841, "Conference Hymns;" and in 1844, a "Sunday School Choir." One of his most popular works appeared in 1839, entitled "Plain Guide to Universalism." He was president of the Cambridge Bank for many years, and also president of the Vermont and Massachusetts Railroad. Mr. Whittemore represented Cambridge several years in the Legislature.

WILLIAMS, THOMAS SCOTT, LL. D., an American jurist, born at Wethersfield, Conn., June 26, 1777, died at Hartford, Conn., Dec. 20, 1861. He was educated at Yale College, where he graduated in 1794; studied law at Litchfield, Conn., under Judge Reeve; was admitted to the bar in Windham County, in 1799, and commenced practice in Mansfield, Conn., whence he removed to Hartford in 1803. In 1809 he was appointed attorney of the Board of Managers of the School Fund, an office of considerable value and importance. Between 1813 and

1829 he represented the town of Hartford in the General Assembly seven times, and was a representative of the Hartford district in Congress from 1817 to 1819. In 1829 he was appointed an associate judge of the Supreme Court of Errors, and in 1834 was appointed chief-justice. He received the degree of LL. D. from Yale College the same year. He presided in the Supreme Court with eminent ability till 1847, when, having attained the age of seventy years, his term expired by constitutional limitation. He was mayor of the city of Hartford from 1831 to 1835. After retiring from the chief-justiceship, he returned to the practice of his profession as a counselling attorney and referee. He was deeply interested in all the great benevolent enterprises of the day, and was universally beloved and honored for his integrity and purity of character. He was, at the time of his death, and had been for some years, president of the American Tract Society, and a leading officer of the American Home Missionary Society, American Temperance Union, American Board of Commissioners for Foreign Missions, &c., &c. His donations to these and other objects of Christian benevolence were very large, and at his death he bequeathed \$28,000 to them and to kindred institutions.

WILLIAMSPORT is a village in Washington County, Maryland, on the Potomac River, at the mouth of Conecocheague Creek. It is nine miles southwest of Hagerstown. The Chesapeake and Ohio Canal passes through the village. The movement of troops from Pennsylvania, and also up the Potomac, resulted in the concentration of more than eighteen regiments at this point on July 1.

Within a radius of five miles lay encamped the Second and Third Pennsylvania, under General Wynkoop; the Regular Cavalry, four companies of the Second, Perkins' battery of artillery, the Sixth, Twenty-first, and Twenty-third Pennsylvania regiments, under Colonel Thomas; the Fourteenth, Fifteenth, and Twenty-fourth Pennsylvania, under General Negley; the Eleventh Pennsylvania Regiment, First Wisconsin Regiment, and McMullin's Independent Rangers, under Col. Abercrombie. The whole column, embracing eighteen full regiments, and several detached corps, such as Major Doubleday's two companies, the Second Cavalry, and the First City Troop, and Perkins' Artillery, were under marching orders to cross the river and take up a position on the south side unless repulsed by the enemy.

The ford is naturally one of the best on the river, and the proper ascent on the Virginia shore very easy. At three o'clock the next morning the movement commenced. It was a bright and beautiful morning, and as the soldiers, who were in excellent spirits, filed past, they were reviewed by Major-General Patterson. A Confederate force of three regiments of infantry, and one of cavalry, and four pieces of artillery, was on the Virginia side, under Gen-

eral Jackson. The crossing was suspected, but not at so early an hour, and the Federal troops were close upon the Confederates before they were seen by the latter. The first stand was made at Porterfield's farm, on the turnpike and near Hainesville, where it was necessary to destroy a barn and carriage-house in order to make a charge upon the Confederates. Here was a sharp skirmish—the Confederates held their ground for a time, but eventually retreated. Knapsacks and canteens were thrown aside as incumbrances to a backward march. They left behind them a number of blankets and other articles of value, indicating a hasty retreat. The loss of the Federal troops was reported by General Patterson, at three killed and ten wounded. This was called the skirmish at Falling Water. The troops moved thence to Martinsburg.

WILSON'S CREEK, BATTLE OF. This was the severest engagement of the year, except the battle of Bull Run. General Lyon, (*see* LYON,) who had arrived on the 5th of August at Springfield, Missouri, learning that General Price, of the Confederate army, (Missouri State Guards,) had effected a junction with General Ben. McCulloch, and that the consolidated force, about 23,000 strong, was within ten or twelve miles of Springfield, resolved, though aware of the hazard of the movement, as a last resource, to attack the Confederates at their camp on Wilson's Creek, nine miles from Springfield. His entire force amounted to 5,200 men, of whom one regiment, the Fifth Missouri, were three-months men, whose time had expired nine days before the battle, but who had been retained by the urgency of Colonel Siegel. There were in all less than 500 cavalry, while the Confederates had over 6,000, according to General Ben. McCulloch's report. He had also three batteries, comprising in all sixteen guns, all of light calibre. This force marched from Springfield at eight P. M. on the 9th of August, intending to commence the attack at daybreak the next morning. They were in two columns, the larger consisting of three small brigades and not quite 4,000 men, under the command of General Lyon himself, the brigades being severally commanded by Major Sturgis, Lieutenant-Colonel Andrews, and Colonel Deitzler; the smaller column, of about 1,300 men and one battery of six pieces, was commanded by Colonel (now Major-General) Siegel. The Confederate camp was situated along Wilson's Creek for a distance of five or six miles, and in the ravines, and on the heights west of the creek; and General Lyon's plan of attack was to march his main column, which he divided into two, giving the command of one to Major Sturgis, in front and to the left flank of the enemy, so as to enfilade their position on the creek; while Col. Siegel with his column, taking another road from Springfield, and crossing the creek, which here assumes the form of an inverted U, lower down, should endeavor to turn their right flank. Siegel's column fell into an

ambuscade, and suffered severely, losing five of his six cannon, and was thus unable to render as efficient service as had been intended. The fight was continued in front, and on the enemy's left with terrible effect for over six hours; the Confederates twice, in the course of the battle, coming up to the Federal lines with the Union flag flying, and thus deceiving the Federal troops till they could get so close as to pour a most destructive fire upon them, but themselves falling back in confusion, when the artillery, which was served by officers and men of the regular army, was brought to bear upon them. General Lyon, who was thrice wounded early in the engagement, and had had his horse killed under him, mounting another horse, led the Second Kansas Regiment, which had lost its colonel, for a charge upon the enemy; but was killed instantly by a rifle ball, which struck him in the breast. His death did not, however, throw the Federal troops into confusion, and the battle, in which Major Sturgis now commanded, was continued for nearly three hours longer, when the Confederate troops were driven from their camp and the field. Finding his force too much reduced to hold the position, Major Sturgis gave the order to fall back on Springfield, and there resigned the command to Colonel Siegel, who made a masterly retreat with the remnant of his army, his baggage trains, and \$250,000 in specie, to Rolla. The loss of the Federal force in this battle was 223 killed, 721 wounded, 292 missing, mostly prisoners. The Confederate loss, according to their own account, was 517 killed, about 800 wounded, and 30 missing. Three of their generals were wounded, two of them mortally.

WINCHESTER is the capital of Frederick County, Virginia, one hundred and fifty miles north-northwest of Richmond, and seventy-one miles west by north of Washington. Excepting Wheeling, it is the largest town in the State west of the Blue Ridge, which is twenty miles distant. It is the terminus of the Winchester and Potomac Railroad, thirty miles long, which connects with the Baltimore and Ohio Railroad at Harper's Ferry. The Confederate forces, on their retreat from Harper's Ferry in the middle of June, halted here. The place was thenceforth occupied by them through the year. It was the head-quarters of a wing of the great army of the Confederates, whose centre was at Manassas Junction. The number of troops was greater or less as circumstances might require. The fortifications surrounding the town, except to the southward on the high ground, were very heavy. The works were made with logs and barrels filled with earth. In front of the breast-works deep trenches were dug, communicating below with the inside of the works. The guns were masked by artificial thickets of evergreens, extended in some cases, to be used as ambuscades for riflemen and sharpshooters. The fortifications extended two and a half miles, and the trees were felled between Bunker

Hill and Winchester to impede a hostile advance.

WINTHROP, MAJOR THEODORE, an officer of volunteers in the United States army, and an American author, born in New Haven, Conn., September 22, 1828, killed in the battle at Great Bethel, June 10, 1861. He graduated with high honors at Yale College, in 1848, and soon after, partly to recruit his health, impaired by too close application, sailed for Europe, where he made an extensive tour mostly on foot. In Italy he formed the acquaintance of W. H. Aspinwall of New York, and upon his return became tutor to his son, with whom he afterwards again visited Europe. Returning from this second tour, he entered the employ of the Pacific Mail Steamship Company and went to Panama, where he resided about two years. He then joined the unfortunate expedition of Lieutenant Strain, the exposures of which injured his health to such a degree that he was compelled to return to New York. He next engaged in the study of law, and was admitted to the bar in 1855. He first practised in St. Louis, but finding the climate unfavorable, he returned again to New York, where his fondness for literary pursuits drew him aside from his profession.

At the commencement of hostilities which resulted in the present war, he enrolled himself in the artillery corps of the Seventh Regiment, and subsequently was made acting military secretary and aid by Gen. Butler. His description of the forty-two days' campaign of the Seventh Regiment, in the June, July, and August numbers of the *Atlantic Monthly*, attracted much attention by its gracefulness and brilliancy, and the interest thus excited was afterwards heightened by his untimely death. In the autumn of 1861, Messrs. Ticknor and Fields, of Boston, published two works of fiction of considerable merit, "*Cecil Dreeme*" and "*John Brent*," which were found among his papers after his death.

WISCONSIN, one of the Northwestern States of the Union, was admitted in 1848. It lies between the parallels of 42° 30' and 47° 05' north latitude, and between 87° and 92° 50' west longitude from Greenwich. It is bounded N. by Lake Superior; N. E. by the upper peninsula of Michigan; E. by Lake Michigan; S. by Illinois; and W. by Iowa and Minnesota, from which it is in considerable part separated by the Mississippi and St. Croix rivers. Its area is 53,924 square miles, and its population in 1860 was 775,873. It is divided into 58 counties. The State consists geographically of two distinct regions—the elevated plateau lying north of the Wisconsin River, and maintaining a mean altitude of from 800 to 1,200 feet above the surface of Lake Superior—a country of heavy forests and high rolling lands, well watered, and with abundant lakes—a region in which the affluents of the Mississippi cross and interlock with the streams which fall into Lakes Superior and Michigan; and the southern roll-

ing prairie, lying south of the Wisconsin River, also well watered and gemmed with lakes, but of less altitude, and admirably adapted for the cultivation of the cereals. The northern portion forms a part of the great lumber-producing region of the northwest, while the southern will long be one of the most productive wheat regions of the continent.

The following are some of the agricultural productions of the State in the year ending June, 1860, according to the census: Wheat, 15,812,625 bush.; rye, 888,534 bush.; Indian corn, 7,565,290 bush.; oats, 11,059,270 bush.; wool, 1,011,915 lbs.; potatoes, 3,848,505 bush.; barley, 678,992 bush.; cheese, 1,104,459 lbs.; butter, 13,651,053 lbs.; maple sugar, 1,584,406 lbs.; maple molasses, 83,003 gals.; sugarhouse molasses, 19,253 gals.; tobacco, 87,595 lbs.

The State has paid great attention to internal improvements. On the 1st of January, 1862, there were completed and in progress in the State, 2,223 miles of railway; of these 922 miles were open for traffic, the construction and equipment of which had cost \$33,630,693. The condition of the banks of the State, at the commencement of 1861, was as follows:

Number of Banks	110
Capital	\$6,752,000
Loans and Discounts	7,729,887
Stocks	4,949,686
Other investments	1,722,779
Due by other banks	745,063
Notes of other banks	1,162,986
Specie	372,518
Circulation	4,810,175
Deposits	4,083,181
Other liabilities	1,682,201

In June, 1862, there was a riot in Milwaukee, in consequence of the rejection by the bankers of that city of the notes of most of the banks of the State. The banking law of the State, which was modelled on the free banking law of New York, though modified in some particulars, permitted the lodging with the State comptroller, for the security of the issues of the banks of the State, of the bonds of the different States; and as the bonds of the Southern were generally lower than those of the Northern States, the banks had purchased largely of those as a basis for banking, and had issued their notes on those securities. The rapid reduction of the market value of these stocks, after the commencement of secession, produced an equally rapid depreciation in the value of the bank notes based upon them, and the eventual curtailment of the issues of these banks, occasioning severe losses and much bitterness of feeling on the part of the innocent holders of their notes. The riot was finally quelled by the State authorities without loss of life, but after considerable destruction of property.

Wisconsin was one of the first States of the North to declare herself unalterably for the Union. The State had gone for Lincoln in November, 1860, by 20,000 majority over all the other candidates, and the State election held the same month had resulted in a very large republican majority in both branches of the

Legislature. The Legislature convened at Madison on the 10th of January, and Gov. Ramsey undoubtedly expressed the sentiments of the majority of the people of the State in saying, as he did in his Message, that "the election of Mr. Lincoln was legal, and there was no just cause of complaint from any quarter." In reference to the secession movement which had already attained formidable proportions, he said: "This is not a league of States, but a government of the people. The General Government cannot change the character of the State governments, or usurp any power not delegated; nor can any State change its character or increase its rights. The signs of the times indicate in my opinion that there may arise a contingency in the condition of the Government, under which it may become necessary to respond to the call of the National Government for men and means to sustain the integrity of the Union, and thwart the designs of men engaged in an organized treason."

The response of the Legislature to this Message was such as to show their loyalty and willingness to participate in any measures which the emergency might demand; but as, during the winter, there seemed to be a strong probability of a pacification of the difficulty, no measures of defence were adopted. The Legislature adjourned April 17. On the receipt of the President's proclamation of April 15, the Governor's guard at once volunteered, and volunteer companies were formed in all parts of the State. Gov. Ramsey called an extra session of the Legislature, which convened in May. In his Message, the Governor reviewed the causes of the difficulties, and recommended that immediate measures should be taken to prosecute the war with energy. He urged the immediate equipment of six regiments of volunteers, the purchase of a number of rifled cannon, and the appropriation of a million of dollars for the purposes of the war. He also suggested the necessity of a more efficient military organization, and insisted on the vital importance to Wisconsin of the free navigation of the Mississippi.

"The vast lumber and mineral interests of Wisconsin, independent of her commanding produce and stock trade, bind her fast to the north border and Northwestern States, and demand, like them, the free navigation of the Mississippi and all its tributaries, from their highest navigable waters to their mouths."

The Legislature responded fully and heartily to the recommendations of the Governor. During their session, which closed on the 27th of May, they passed a "war bill," providing for the raising of five additional regiments, besides the three already called for by the Government; and, in case these should also be needed by the United States, the raising a reserve of two more still, and, in case of farther call from the General Government, they authorized the Governor to keep constantly a reserve of two regiments beyond what were required for the national defence. For the organization and equip-

ment of this force they made specific provision. An act "to provide for borrowing money to repel invasion and suppress insurrection," was also passed, which appointed the Governor, Secretary of State, and State Treasurer Commissioners to negotiate a loan upon State bonds, bearing six per cent. interest, of one million of dollars. Sixty per cent. of this loan was to be negotiated for specie, and the remainder for fully secured bank paper.

Two acts were passed in regard to the maintenance of families of volunteers: one appropriating from the war fund five dollars per month to each family, and the other authorizing counties, towns, cities, and villages to levy special taxes for the same purpose. The sum of \$50,000 was appropriated to buy arms, and an act passed to prevent rendering aid to enemies, containing stringent provisions for the prompt punishment of offences coming within that category.

Under the stimulating influence of excitement, and provided by their enactments with the necessary means of effective service, the citizens of Wisconsin promptly enlisted in the service of the Government.

The whole number sent into the field by the State at the commencement of 1862, according to Gov. Salomon, was 24,000, a number considerably in excess of the quota of the State; and it is only justice to say that no troops proved themselves more efficient in all soldierly duties than those from Wisconsin. From the difficulty of procuring arms, they were unable to enter upon the service so early as the soldiers of some of the other States, but once armed and equipped, their courage and endurance rendered them most valuable soldiers.

WOOL AND FLAX FABRICS, AND CANE FIBRE. A process has been introduced for disintegrating wool, flax, and cane, by charging it in a cannon with steam, and then suddenly discharging it with explosion. Flax and hemp thus reduced to fine short fibre is well adapted for mixing with wool in various cloths. Short flax fibre is capable of being most intimately mixed with wool in the fulling operation. The disintegration of cane is performed by charging cylinders of boiler iron, which are about 18 feet in length and 1½ to 2 feet in diameter, with cane to about two-thirds full. A head of steam is then let on, which moistens and softens the cane, until it has sufficient force to blow open a door at one end, when the whole mass is exploded with a noise like that of a cannon. The cane falls to the ground, presenting the appearance of coarse oakum. It is then, by another process, reduced to pulp and manufactured into paper of all qualities, from the cheapest to the finest. The cane is the common fishing rods, which grow in great abundance in North Carolina.

One establishment for the disintegration of cane has been in operation at Elizabeth, N. J., for some years. The work is now suspended in consequence of the impossibility of obtaining the raw material in North Carolina during the war.

Z

ZWIRNER, ERNST FRIEDRICH, a German architect, born at Jacobswald, in Silesia, Feb. 28, 1802, died at Cologne, September 22, 1861. He was the son of an inspector of forges, and was destined in childhood to the pursuits of metallurgy, for which he manifested a high capacity; but his preference for architecture was so evident that his father consented to allow him to follow his own inclination. After completing his classical course of studies, he entered the school of architecture at Breslau, from which he graduated at the age of 19 years. His first engagements procured him the means of entering, three years after, the Royal Academy of Architecture and the University of Berlin. He remained there four years, and was enrolled among the auxiliary members of the Superior Administration of Architecture in 1828. He became next the pupil and assistant of Schinkel, one of the most eminent architects of modern times, and for a time followed his plans and principles. In 1833 he was elected architect of the Cathedral of Cologne, and thenceforth it was the first object of his ambition to complete that great work in accordance with the spirit of its projector. The cathedral had been already five hundred years in building, and

each generation had advanced it somewhat, but none had dared to dream of seeing it finished and surmounted by its colossal dome. Zwirner believed its completion within his life-time and under his direction possible, and when the good people shook their heads at his enthusiasm, it only strengthened his faith and made his zeal the more fervid. He succeeded in interesting Frederick William IV., king of Prussia, in the work, and in inducing him to bestow upon it an annual subsidy of \$37,500, to aid in its completion; liberal subscriptions came also from other quarters, and in 1854 King Frederick William, with his own hands, placed the keystone in the north portal of the cathedral. The great work, a most admirable reproduction of the best gothic architecture of the middle ages, was nearly completed in 1855, but the last touches of the architect were not given to it till 1860. M. Zwirner also designed and executed several other chapels and castles of great beauty, at different points on the banks of the Rhine. At the time of his death he had been for some years president of the Council of Architecture of the province of Cologne, and privy councillor of the Prussian Government.

Columbus, Ky., its situation, 108; importance as a military position, 108; occupation by Confederate troops, 108; evacuation, 108.

Commerce of the United States, its character, 108; imports and exports for seventy years, 104; domestic exports for forty years, 104; imports and exports for 1861, 104; population, with the consumption of foreign goods and the duties collected, 105; table of leading articles exported in 1861, 106; decline in Southern products compared with other sections, 106; effect of Western railroads, 107; exports from the Northern section, 107; grain sent from the West, 107; receipts at Chicago, 107; exports of grain from Milwaukee, 107; grain at Toledo, 108; advance of freights on the Western lakes, 108; tonnage of the lakes, 108; Western produce received at

Buffalo by water, 108; transport of the New York Central railroad, 108; quantities and values left at tidewater on the New York canals in 1861, 109; Western grains exported from New York, 110; imports and exports at New York, 110; reversal of the trade in specie, 111; decline in the price of bills, 111; leading articles of domestic export, 111; vessels entered and cleared at New York, 111; coastwise tonnage, 112; exports from Baltimore, 112; do. from Philadelphia, 112; trade of St. Louis, 112; tonnage of New York, 112; leading articles of export, 112; trade of St. Louis, 112; receipts from the interior, 118; exports of leading crops from New Orleans, 114; railroads of the States, 115; canals and railroads in New York, 115; quantities and value of domestic exports of the United States, 117; exports of wheat and corn, 118; tonnage in each district of the United States, 119; indirect trade of the United States, 120; foreign vessels trading with the United States, 120.

Commissioners, Confederate, their last letter to Secretary Seward, 185.

Committee of Thirteen in the Senate, 175; report, 175.

Committee of Thirty-three in the House, 202; report, 207; action on their report, 216; action on amendments to, 216-218.

Compromise, readiness on the part of Southern statesmen to, 174, 224.

Compromise measures, vote on, in the Senate, 224.

Confederate Government, inferiority of the negro the corner-stone of, 129; errors of an opposite opinion, 129; entertained at the North, 129; a principle in politics as sure to succeed as a principle in physics, 129; elements for a successful career, 130; population of seceding States, 130.

Confederate States, first declaration of disunion, 121; occasional agitations of the question of disunion, 121; a question to be met, 122; political agitation of slavery, 122; grievances of South Carolina, debate in the convention, 122; no attempts to relieve the grievances made, 123; first public steps towards the formation of the Southern Confederacy, 123; shipment of arms to the Southern States in 1860, 123; views of General Scott on the future, 123, 124; action of Secretary Floyd in furnishing arms to the Confederate States, 124; secret meeting in Washington to plan the course of proceeding, 125; persons present, 125; *note*, 125; details of the proceedings, 125; conventions calling for the formation of a Southern Confederacy, 126; loyalty in Louisiana, 126; reconstruction, 126; inauguration of President Davis, 127; new questions, 127; mouths of the Mississippi River, freedom of the, 127; policy of the new Government, 128; military preparations, 128; pay of the army, 128; military force authorized, 128; commissioners sent to Europe, 131; do. to Washington, 131; organization of the Confederate Government, 131; instructions to collectors of the customs, 131; Beauregard ordered to demand the surrender of Fort Sumter, 132; or to reduce it if not surrendered, 132; commissioners to Washington refused an audience, 132; military force in the field May 1st, 133; subscription to five million loan, 133; plan of the campaign, 139; plan of the war, how decided, 140; auxiliaries relied upon by the Confederates, 140; Constitution of ratified, 141; business of second session of Congress, 142; loan of one hundred millions, 144; direct tax, 144; States aid the Government, 144; extortions on the people, 144; copy of treasury notes, 145; effect of President Lincoln's proclamation on the military spirit, 146; military objects of the Government, 147; passes an act to prohibit the payment of debts to Northern citizens, 147; amount so due, 147; an act to banish all who are not citizens, 147; proclamation under the act, 148; regulations in its

execution, 148; object of this act, 148; act of sequestration, 148; instructions to receivers, 148; interrogatories to garnishees, 149; constitutionality of the confiscation act contested in South Carolina, 149; objections to it, 149, 150; post-office arrangements, 151; postage, 152; stamps, 152; Confederate courts organized, 152; force in the field in July, 152; paper money in, 152; embarrassment in financial affairs, 153; Presidential election, 153 officers of the Government, 154; inflammable state of public feeling, 152; telegraphic despatches to, 152.

Confiscation Act before Congress, 247-250.

Congress, Confederate.—Convenes at Montgomery, 154; members, 154; chairman, 154; his speech, 144; rules, 155; Provisional Government reported, 155; its features, 155; tariff clause, 155; proceedings after its adoption, 155; first election of Davis and Stephens, 155; permanent Constitution, 156; all questions between the States and United States, 156; provisions for officers resigning in the United States army and navy, 156; national flag, 156; Texas admitted, 157; Federal officers continued in office, 157; goods to be admitted duty free, 157; departments organized, 157; export duty on cotton, 157; officers of Confederate Government nominated and confirmed, 157; free navigation of the Mississippi declared, 157; loan of fifteen millions, 157; postal system adopted, 158; Confederate courts not to have cognizance of civil cases in which citizens of the United States are a party, 158; bill to raise a force of 100,000 men passed, 158; permanent Constitution adopted, 158; compared with the Federal Constitution, 158, 159, 160; commissioners to Europe appointed, 160; act to prohibit African slave trade passed, 160; vetoed, 160; vote on the vetoed bill, 161; other acts passed, 161.

Second session of Congress convenes, 161; reasons for its meeting, 161; message of President Davis, 161; act recognizing a state of war passed, 161; the act, 161; Virginia admitted as a member of the Confederacy, 162; acceptance of volunteers authorized, 162; act to establish a patent office passed, 162; fifty millions bonds to be issued, 162; bill to prohibit the payment of Northern debts passed, 162; the bill, 162; tariff bill passed, 162; Congress adjourned to meet at Richmond, 162.

Third session of Congress convenes, 163; members present, 163; report of the Secretary of War, 163; act to control the telegraph passed, 163; the act, 163; act to provide for the public defence, 163; two other commissioners to be appointed, 164; act to aid Missouri passed, 164; the substance of the act, 164; Governor Jackson recognized, 164; sequestration act passed, 164; war tax imposed, 164; approval of the declaration of the Congress of Paris, 164; act of sequestration, 165.

Fourth session convenes, 165; its acts, 165; Kentucky and Missouri admitted, 165; appropriations, 165.

Assumes charge of all questions between the several States of the Confederacy and the United States, 130; President Davis authorized to assume control of all military operations between the Confederate States and foreign powers, 180; appropriation made, 132; authorizes one hundred thousand men to be raised, 133; adjourns to meet at Richmond, 140; second session convenes, 141; authorizes enlistments in Kentucky, 399.

Congress, United States.—Convenes December 2d, 1860, 166; its members, 166; cause of trouble to the country, 166, 167; better look the matter in the face, 167; this state of affairs looks to two things, 167; all that is asked, is to be allowed to depart in peace, 168; repeal all the personal liberty laws, and it will not stop this revolution, 168; we intend to leave this Union—then bring us back, 168; Delaware the first to adopt the Con-

stitution, and will be the last to do any act for separation, 163; the portion of the message on the state of the country referred to a committee of thirteen in the Senate, 163; object, 168; the country will go safely through the crisis, 163; we should look to our country, not to our party, in the consequences of our action, 163; sectional hostility substituted for fraternity, 169; where is the remedy, 169; the only point that remains for difference, 169; first thing to be done, 169; the crisis can be met only in one way, 169; nothing which cannot be redressed promptly and in the most efficacious manner, 170; a war of sentiment and opinion by one form of society against another form of society, 170; the only concession that will satisfy the South, 170; the Republicans a unit against it, 170; a large majority of the North opposed to any interference with slavery, 171; these discussions amount to nothing—we cannot save the Union, 171; if there is any thing in the legislation of the Federal Government not right, the Republicans are not responsible for it, 171; the last election, 172; I would not compromise away the platform upon which the candidate was elected, 172; amendments to the Constitution proposed, 172; their nature, 172; is it not the cheapest price at which this Union was ever purchased, 173; willingness of Southern statesmen to compromise, 174; the remedy is not to be sought in compromise, but in a faithful execution of the bond, 174; this controversy will not be settled here, 174.

Committee of thirteen appointed, 175; report, 175; other resolutions, 175; the real causes of the discontent, 175; war means disunion—final, irrevocable, eternal separation, 175; modification of Crittenden's resolutions, 176; their object, 176; its importance, 176; the Union is now dissolved, 176; the cause of the South will receive the sympathy of tens and hundreds of thousands of patriotic men in the non-slaveholding States, 176; resolutions that the Constitution is sufficient for the evil, and that the energies of the Government should be directed to the maintenance of the Union, 176; attempt to consider the Crittenden resolutions, 177; its failure, 177; renewed, 177; failure, 177; considered, 177; amendments, 177; withdrawal of Senator Iverson, 178; his letter, 178; resolutions of Virginia for a peace conference, 178; sent to Congress by President Buchanan, 178; memorial from New York city presented in the Senate, 179; speaking goes before voting, voting goes before giving money, and all go before a battle, 180; not to be expected that in the ninety days allotted to this Congress, reason and judgment will come back to the people, 180; what do we hear, 180; what is recommended, 180; a convention ultimately be called, 180; if the Union falls, stand in the breach, 180; the policy of the new Administration, 181; the remedies failing through the Constitution, battle and bloodshed to preserve the Union, 181; different views in regard to the future, 181; extremes North and South tend to inevitable disunion, 181; the action of the Senate has created the impression that there is no hope for an adjustment, 181; non-intervention disrupted the Democratic party, and has now disrupted the Union, 181; one of three contingencies inevitably before the country, 181; a settlement, or recognition of a peaceable separation, or war, 181; have we seized any forts, 182.

Naval appropriation bill considered, 182; is there any demand for these steamers, 182; explanation, 182; what is the public emergency, 182; the bill has no warlike purpose, 182; duty to let the South go in peace, 183; what does the United States want to do, 183; if the time comes when it will be necessary to use force under the laws and Constitution, I am ready to do it, 183; this Government cannot be peaceably destroyed, or over-

thrown, or divided, 183; to what purposes are these steamers to be applied, 183.

Amendments to the Constitution proposed, 183; remarks, 184; free navigation of the Mississippi, 184; the attempt to enforce the laws in South Carolina, when she was not a member of this Confederacy, would bring about civil war, 185; cause of the destruction of the Government, 185; the present state of things foreseen for years, 185; extent to which secession will go, 185; right of South Carolina to take the course she did, 185; an attempt to prove that this Government is no Government at all, 186; this Government not a compact, 186; resolution of Senator Davis, 186; sentiments of a majority of the Northern people, embraced in three propositions, 187; present complaints of the South, 187; what is offensive to the South in the Chicago platform, 187; sentiment of the South for demanding guarantees, 187.

Bill to provide a temporary government for Arizona considered, 188; Mexican law on slavery, 188; abolitionists watching present affairs with intense interest, 188; can a citizen obeying a State law be hung for treason, 188; the point at issue between the two sections, 189; Mexican law, 189; views of John C. Calhoun, 189; it is no longer a question of union, but one of reunion, 190; the real grievance of the South, 190; no ground to fear Republican interference, 190; what is the condition of the country, 190; message from the President, 191; the events which have taken place, 191; it is proposed that the Government should abdicate, 192; Congressional compromises not likely to save the Union, 192; immediate duty of Congress, 192; Florida Senators retire, 193; their remarks, 193-195; Alabama Senators retire, 196; speeches, 196, 197; Mississippi Senators retire, 198; speeches of Senator Davis, 198; Louisiana Senators retire, 200; speeches, 200; in the House, President's Message referred to a committee of one from each State, 201; the committee, 202; members decline to serve, 202; propositions submitted to the House, 203, 204; not a representative of the Democratic party on the committee, 203; what was the cause of this discrimination, 203; manoeuvres in the House to obtain an expression for compromise, 204-206; position of the Republican party, 206; slave property, 206; state of opinion in the House, 207; debate, 207; importance of cotton, 207; resolution relative to slavery unanimously passed the House, 208.

Proviso to exclude slavery from the territories, 208; omitted in the bills introduced, 208; right of secession, 208, 209; love of the Union, 209; importance of cotton, 209; object of the forts, 210; the President should collect the revenue, 210; the Government must be maintained, 210.

Object of the South, 211; movement of Major Anderson, 211; South Carolina is to-day approachable with reason and words of kindness, 211; the door of conciliation not closed, 212; amendment offered to the appropriation bill, that no money shall be used by the Government to make war, 212; is it the purpose to wage war or not, 212; no war contemplated by the Government but a defensive one, 212; members from Georgia retire, 213.

Reasons for opposing all compromise, 218; the just laws of the country should be enforced, 214; the present is no time for compromise, 214; obey the Constitution, and administer the laws as they are, and all will be well, 214; a general insurrection against the authority of the United States, 214; the present condition of things, 214; the Southern Confederacy is not hostile, 215; one of two things must be done, 215; it is a revolution—no more and no less, 215; object and effect of this bill is coercion,

215; to say that we have not the constitutional power to protect ourselves is an absurdity, 215; censure of the Secretary of the Navy, 216; votes on the report of the Committee of Thirty-three, 216, 217, 218; in the Senate, a bill to discontinue postal service considered, 218; rather a peace measure than otherwise, 219; an indirect attempt to strike at States which have seceded, 219; what the bill assumes, 219; what is the secret of the opposition to this bill, 219; a deliberate plot to break up this Union under pretence of preserving it, 219; but one issue in this case, 219; communication from the President of the Peace Conference, 220; report on, 220; dissent of certain Senators, 220; their reasons, 220; resolution offered, 220; the Peace Conference measure would increase the difficulties, 220; compromise measure to save the country, 220; to be deplored that the mediation of Virginia has not been effective, 221; we stand in the presence of peace or war, 222; the amendments of the Peace Conference are a cheat, 222; the Senate convenes on Sunday evening, 223; crowded hall, 223; disturbance, 223; questions of order, 223; readiness of the South to compromise, 224; amendments offered to the Peace Conference proposition, 224; all measures fail to pass, 225; Congress adjourns, 225.

EXTRA SESSION, commencing July 4th, 225; the members, 225; question of the right of Senators from Western Virginia to seats, 226; notice of a bill to confiscate property, 226; resolution to approve the acts of the President, 227; amendment offered, 227; all the propositions of this joint resolution cannot be endorsed, 227; suspension of the *habeas corpus*, 227; no necessity for it, 227; the acts of the Administration were forced upon it by the condition of the country, 228; an army of forty thousand true men last January would have prevented this state of affairs, 228; the application of force is not the way to maintain the Union, 228; justification for the suspension of the writ of *habeas corpus*, 228; ratify whatever needs ratification, 228; the determined aggregated power of the whole people of this country will yet conquer, 229; violation of the rights of the people, 229; seizure of telegraphic despatches a violation of the Constitution, 230; the President has no right to regulate commerce between the States, 230; he has involved the country in a war in violation of the Constitution, 230; other instances, 230; those who propose to maintain the Union by force are disunionists, 230; efforts to avert the difficulty, 231; what is the excuse for this violation of the Constitution—necessity, 231; the doctrine of necessity denied, 231; what has the President done, 232; who is to judge, 232; the line of demarcation in endorsing the conduct of the President, 232; the increase of the army, 232; not disposed to say the Administration has unlimited power, 233; this joint resolution of not much importance, 233; the Senate does not intend to pass the resolution, 234; the President has no power to suspend the writ of *habeas corpus*, 234; resolution to expel certain Senators offered, 234; is a Senator to be condemned individually for the action of his State, 234; desirable to deny on this floor the right of any State to secede, 234; expulsion implies turpitude, 235; resolution passed, 235.

Senators from Western Virginia, their credentials presented, 235; involves grave questions, 235; you have no authority to create a new State, 235; the certificates, 235; an abandonment of the whole form of your Government, 235; it is because we will not recognize insurrection in a State that we admit these men, 235; this proceeding is an overthrow of the Constitution, 236.

Amendment offered to the army bill, 236; the purpose of this war is to maintain the national honor, 236; defend the national property and uphold the flag, 236;

to preserve the Union, 236; declarations of Senators, 236; rather than let the Government perish let slavery perish, 236; the institution of slavery will not survive the march of the Union armies in any State, 236; this is no war of subjugation, 236; if it is not a war of subjugation, what is it, 237; if the issue is the Government or slavery, then let slavery do down, 237; the institution of slavery did not of necessity produce this rebellion, 237; is commerce to be destroyed because a tariff is made, 239; what right has any Senator to go into my State and thrust himself between me and my property, 237; what would be thought if you were to march an army against New York to despoil the people of their houses and their goods, 238; amendment rejected, 238.

Conduct of the war, 238; increase of the army necessary, 238; what is the clamor about the increase of the regular army, 239; state of the army when secession commenced, 239; this Government rests for its support on the consent of the governed, 239; men and money may desolate but cannot bring peace, 239; this is not a war of conquest, 239; this Government will be preserved and the gallows will eventually perform its office, 240; what is your country worth when the finale comes, 240; if there is no other way to quell this rebellion we will make a solitude and call it peace, 240; not vote more men and money than the Administration asks, 240; one hundred thousand men entirely sufficient to restore the Constitution, 240; may it not be necessary to leave the track of the chariot wheels of war so deep in the Southern soil that a century may not obliterate it, 241; amendment offered, 241; in the Senate resolution on the conduct of the war offered, 241; the war prosecuted for the purpose of the subjugation of rebels and traitors, 241; the resolution simply says that we are not waging a war for the subjugation of States, 241; we have a purpose to defend the Constitution and the laws of the country, 242; a fear exists that the design of this war is subjugation, 242; such not its purpose, 242; Congress no right to interfere with slavery in the States, 242; this war is prosecuted for purposes of subjugation, 243; the war is prosecuted for the purpose of subduing the disunionists of the Southern States, 243; what did the minority demand, 243.

In the House resolutions relative to the war offered, 244; appropriation to pay the police force of Baltimore considered, 244; by ratifying the acts of this administration you are writing the blackest pages in the history of this country, 244; division of the Democratic party at Charleston and Baltimore brought the existing calamity upon the Union, 245; the Douglass party furnished you one-half of your entire army, 245; who forced General Scott into the battle at Bull Run, 245; statement of General Scott respecting the battle, 246; discussion of the battle, 246.

Confiscation bill in the Senate, 246; its features, 247; fourth section of the bill, 247; under some contingencies the slave becomes entitled to his freedom, 247; it amounts to a wholesale emancipation, 247; limitations of the bill, 247; you place one species of property on a different footing from another, 248; you have no power by the Constitution to touch slavery at all, 248; is it not competent to forfeit the claim that a man has to his slaves for treason in the master, 248; if you have no power, there the question ends, 248; is it not a plain breach of the Constitution that a man shall forfeit his slaves, 249; can a confiscation law promote the success of the army, 249; the rebels have no standing in court, they cannot invoke the Constitution, 250; bill amended and passed, 250; Congress adjourns, 250.

Connecticut, its boundaries, 250; Government, 250; popu-

- lation, 250; members of Congress, 250; election in, 250; Message of the Governor, 251; acts of the Legislature, 251; militia law, 251; first regiment, 251; peace meetings, 251; proclamation of the Governor, 251; second Message of the Governor, 252; loan of two millions, 252; regiments furnished during the year, 252.
- Convention Commercial* meets at Memphis, 146; action of, 146.
- CONWAY, WILLIAM, quartermaster in the United States navy, 252; refuses to obey his superiors and haul down the United States flag at the Pensacola navy yard, 252.
- CORCORAN, Colonel, held as a hostage in prison, 151.
- Cotton* consumption in 1861, 252; cotton enterprises in India, 252; export from the United States, 253; qualities of, 253; Surat cotton, 253; supplies from other sources than the United States, 253; imports to Great Britain from all countries, 254; its culture in Turkey, 254; do. Greece, 254; do. Cyprus, 254; do. Asia Minor, 254; do. Egypt, 254; do. Tunis, 254; do. Madeira, 254; do. Sierra Leone, 254; do. Sherbo, 254; do. Lagos, 254; do. River Niger, 255; do. other places, 255.
- Recommendation to burn it, to prevent seizure, 142; export of prohibited, 165; importation of into Great Britain in 1861, 350.
- Cotton Loan* proposed, 142; instructions to planters, 142; views of the Government, 143.
- Cotton Planters*, doings of convention of, 144.
- Court-houses and Post-offices in seceded States*, their seizure, 315-320.
